

“Eco-design” (Directive 2009/125/EC & Several Regulations)

Please consult the Call for Expression for full information on the specific tasks, general specifications and the application. Specific requirements for this sector include:

Qualifications

- Master degree (or equivalent) in an adequate area of engineering and 8 years of proven relevant professional experience,
or
- Bachelor degree (or equivalent) in an adequate area of engineering and 10 years of proven relevant professional experience,
or
- An outstanding proven relevant professional experience of at least 15 years

Expertise

- A proven track record of working with standards related to energy efficiency of products
- Knowledge of standards related to material efficiency (durability, reparability, etc..)
- knowledge of the functioning of the Eco-design and Energy Labelling legislation
- Knowledge of practical aspects of market surveillance related to Eco-design and Energy Labelling

Candidates should have preferably a good understanding of the following topics:

- Mechanical engineering
- Electrical engineering
- Materials technology
- Electronics
- Measurement and testing
- Non-destructive testing
- Metrology
