HFS Top 10: Employee Experience Services, 2022

June 2022

RESEARCH AUTHORS:
Phil Fersht, CEO and Chief Analyst
Sarah Little, VP Content and Strategy, CEO’s Office
This is the first time in our history we’re truly looking at the fluency of business and technology coming together in a hybrid environment, at a time when industries and business models continue to shape-shift at an extraordinary rate.

The key to business agility and a thriving organization lies squarely in the power of its people. Employee experience sets apart the winners and the also-rans in the post-pandemic era.

Introduction and definitions
Introduction

- Business leaders recognize that successfully driving engagement, productivity, and change requires the ability to bring people, process, and technology together in a fluid and meaningful way.
- Delivering superior employee experience (EX) is the catalyst for driving competitive advantage and deeper engagement across personal, social, and organizational domains. With an imperative for people, leaders are driving EX capability from across the organization.

"Employee experience is an enormous field... It’s not a “Process” but a cross-functional strategy that needs to be embraced by the c-suite. It’s also not a “project” that will ever be done. It’s a huge area of many different strategies, practices, processes, systems, services, and technologies.”

Josh Bersin, The Definitive Guide: Employee Experience, 2021

- Essentially, it’s a field underpinning the OneOffice organization.
The OneOffice™ organization

An ecosystem of employee experience, customer experience, and partner experience

OneOffice is our view of digital transformation in action, aligning business operations and workforce interactions across an adaptive, experiential environment.

At its core, a OneOffice organization makes employee, customer, and partner experience the heart of its strategy.

"Companies that invest in employee experience are 4x more profitable than those that do not."

Jacob Morgan, The Employee Experience Advantage

Customer-centricity has long been at the helm of an experience framework, given the fact that without customers, there can be no company. However, it’s time to rebalance the equation. Studies continue to show that employee experience (EX) is a critical contributor to competitive advantage and growth. A key challenge has been the ability to articulate EX in measurable terms.

This research examines how participating advisories and service providers are evolving their practices to support the rapidly changing dynamics of employee experience within the context of a OneOffice organization and its ecosystem.
OneOffice is the core of OneEcosystem™

Shared goals and incentives
Purpose-led stakeholder value creation
Agility and speed to create or adapt

Al-enabled decisions
Ubiquitous connectivity (5G)
Autonomous processes
Secure and trustworthy data

Employee experience
Product and service innovation
Data and process innovation
Customer experience

Web 3.0
Decentralized self-governing data
Blockchain and DeFi

Hybrid cloud and edge computing infrastructure
Convergence of physical and digital worlds

Digital currency of ideas and property
Rewarding skills and culture that drive collaboration

Technological factors
People and culture factors

Customer experience
Partner experience
Employee experience
Data and process innovation
Supply and network innovation

ONE OFFICE
OneEcosystem™
Over the last 30 years, organizations have essentially been doing the same thing the same way, just a little faster, cheaper, and more electronically. This cycle has continued to gain efficiency, but the business model has not fundamentally changed.

In the 1990s, the internet enabled the global manifestation of shared services and nearshoring, which evolved into offshoring around the turn of the century. The industry centered on functional and geographic consolidation, driven by cost reduction, efficiency, and arbitrage.

Fast forward to 2010. The first real digital models emerged as we moved into the cloud and began satisfying customer needs in near real-time. Digital was born, but there wasn’t much focus on connecting digital transactions with customers past the “front office” and in the middle and backend of the organization.

The global pandemic in 2020 drove many enterprises to make real changes for the first time to enable virtual business models. The acceleration toward hyperconnected ecosystems is well underway in this ever-complexifying global business environment.

The need to develop talent to create value has never been so immediate for enterprises, and the opportunity for smart services partners has never been so prominent.

HFS TOP 10  © 2022 | HFS Research

Excerpt for EY
Evolution to OneOffice™ and OneEcosystem™

As the industry evolved, services talent shifted from being IT-centric in favor of process and domain expertise, driven by business outcomes and systems of engagement. And then the world stopped. The pandemic forced organizations into real-time transformation, and the OneOffice mindset took center stage. In a recent study, 82% of enterprise buyers believed a OneOffice mindset is “mission critical” or “very important” for their company’s overall operation and strategy.

The pandemic shock further exacerbated the need for ecosystems.

OneOffice is the core of OneEcosystem, bringing partners and employees to the forefront alongside customers for a holistic approach to stakeholder experience across the entire customer lifecycle. Ninety percent (90%) of C-level respondents to a recent study predict ecosystems will be even more important in the post-COVID world.

82% of enterprise buyers believe a OneOffice mindset is “mission critical” or “very important” for their company’s overall operation and strategy.

90% of C-level respondents predict ecosystems will be even more important in a post-COVID world.

How has the COVID-19 pandemic changed the relative importance of ecosystems for your organization?
Sample: 158 C-level respondents from Global 2000 enterprises
Source: HFS Research
Data and processes are inextricably linked. The focus on value has shifted firmly to the strategic value of data and how designing processes can help you achieve the data outcomes that create the value.

Enterprises want to buy continuous access to data outcomes and experience great service partnerships to achieve them. That is what BPO is all about and why HFS has termed the phrase “business data services.”

Advanced people data and decisioning is a critical capability for providing employee experience services.

### Raison d’être
- Cost savings and efficiency (Old school BPO (till 2010))
- Better business outcomes but still savings (BPO services today (2010-2020))
- Stay-in-the-game and grow (Business Data Services (2020++))

### Driver
- Recession in 2002, Internet (Old school BPO (till 2010))
- Incremental maturity of services (BPO services today (2010-2020))
- Pandemic, virtual business environment, great resignation (Business Data Services (2020++))

### Scope / focus
- Functional activities (AP, AR, claims, etc.) (Old school BPO (till 2010))
- End-to-end processes (02C, P2P, R2R, H2R) (BPO services today (2010-2020))
- Enterprise Data flows (customer data, employee data, partner data) (Business Data Services (2020++))

### Role of data
- Reporting (Old school BPO (till 2010))
- Support decision making (BPO services today (2010-2020))
- Data-as-an-asset to find new sources of value (Business Data Services (2020++))

### Role of talent
- Labor arbitrage (primarily offshore) (Old school BPO (till 2010))
- Process experts (offshore + nearshore) (BPO services today (2010-2020))
- New or scarce skills (anywhere shore) (Business Data Services (2020++))

### Role of technology
- Process enablement (Old school BPO (till 2010))
- Digitization delivers greater productivity (BPO services today (2010-2020))
- Competitive advantage (Business Data Services (2020++))

### Technologies involved
- On-premise ERP (Old school BPO (till 2010))
- SaaS + automation (BPO services today (2010-2020))
- AI-driven analytics, Web 3.0, hybrid cloud (Business Data Services (2020++))

### IT — business convergence
- IT and business operations in silos (Old school BPO (till 2010))
- Boundaries between business and IT starting to blur (BPO services today (2010-2020))
- Full convergence of IT and business operations (Business Data Services (2020++))

### Role of service provider
- Vendor (order-taker) (Old school BPO (till 2010))
- Partner (BPO services today (2010-2020))
- Orchestrate (Business Data Services (2020++))
X-centricity takes all

Enterprise innovation is defined at the intersection of customers, employees, and partners, and when it comes to deploying third-party services, X-centricity takes all.

In HFS’ 2021 OneOffice Pulse study, 62% of the 800 Global 2000 executives surveyed consider improving employee experience and customer experience as the top priorities for partnering with third-party providers, with supplier experience following directly behind.

EX has moved beyond HR and IT integration. Business leaders across the organization play a critical role in shaping employee experience. It’s about the orchestration of capabilities beyond silos and a OneOffice mindset in action.

What is the most important driver for deployment of third-party services?

% of respondents

- Improve employee experience: 62%
- Improve customer experience: 62%
- Improve supplier experience: 50%
- Improve efficiency by optimizing transactional process flow: 31%
- Drive digital transformation: 21%
- Allow retained (in-house) employees to focus on core activities: 18%
- Improve data and analytics-based decision making: 14%
- Reduce operational costs: 14%
- Drive business outcomes or top-line growth: 13%
- Gain access to hard-to-find skillsets: 13%

Sample: 800 Global 2000 Enterprise executives
Source: HFS OneOffice Pulse Study
Building blocks of the HFS employee experience value chain

What are employee experience (EX) services?

In this research, we define employee experience services as the capabilities connecting the client’s workforce to the strategic imperatives of the business across three perspectives:

• **Personal and purposeful**
  – Goals and purpose in work
  – Personal development
  – Interaction with tech and tools

• **Social and collaborative**
  – Interaction, access, and community with others in the ecosystem
  – Collaboration to accomplish objectives

• **Organizational and environmental**
  – Connection to organizational strategy and culture
  – Space, place, and societal environment through which we work
Building blocks of the HFS employee experience value chain

**Employee Experience services** must be able to measure value and articulate ROI across a digitally fluent organization.

---

**Value measurement and articulating ROI**

Service providers are making great strides to articulate the value of investments in employee experience at a time when cost management and doing more with less are imperative. By targeting the right mix of services, organizations can achieve cost savings while expanding capabilities and improving experience.

Experience data, or “X-data,” provides a critical link between the three perspectives of experience and the ability to determine what levers to pull.

---

**Digital fluency and the employee experience**

Digital fluency is the ability to drive the seamless interplay between business and technology. Technology has primarily been described as a tool, but technology is truly a functioning member of the team.

Harnessing the power of digital and human talent is a prerequisite for future-forward organizations—directing the digital workforce to do the heavy lifting while enabling people to deliver on purpose through personal, collaborative, and organizational perspectives.
HFS has identified twelve essential services and capabilities that measure value and ROI, empower people across the three perspectives of experience, and build a digitally fluent organization.

While any one of these components can improve employee experience, participants in this study are assessed on their ability to bring a matrix of services and capabilities to clients.
Executive summary
A OneOffice organization is aligned, adaptive, and intelligent. It empowers people and enables passion and creativity for a world of work where a new set of skills—and new applications of existing skills—are required.

The Super 7
The core attributes of a OneOffice organization are correlated to seven critical skills and mindsets that drive business outcomes.

Click here to read more: Skills Driving the OneOffice Organization
Key enablers: Training staff to be digitally fluent dominates our immediate future as we head to the cloud

While “digital transformation” focuses on resolving (often) decades of technology debt, the OneOffice mindset allows enterprise leaders to manage the talent and process debt that continues to be overlooked by many.

The clearest barometer that shows the major changes facing Global 2000 enterprises over the next 12-18 months are the heightened priorities to develop “Digitally Fluent” workforces to be best equipped to function effectively in the cloud.

**Digital Fluency** describes the ability to drive the seamless interplay between business and technology:

- Ability to translate the understanding of digital tools to create new ways to serve customers’ needs and drive value;
- Ability to consider how digital technology will impact every aspect, every functional area of the organization;
- Ability to examine the organization's business model, strategy, and operations in the context of digital technology.\(^1\)

Cloud computing is the technology wave of the future. It offers organizations levels of business agility and digital transformation that have never been seen before. As a result, we are seeing an explosion in organizations migrating to cloud computing…”

Michael Gibbs, The hidden truth behind cloud computing

Cloud capability has evolved from an efficiency and resiliency model to the foundation of how work gets done and the experiences that go along with it, enabling unparalleled global connectivity and scale with anytime, anywhere access.

With the twelve competencies comprising the HFS employee experience value chain, there is an “unseen” number thirteen. Cloud infrastructure should be considered foundational for EX enablement.

Quite simply, people compose, consume, collaborate, and deliver in the cloud.

Excerpt for EY
Employee experience services: What—and how much—buyers are buying

19.2%  EX services revenue growth

The employee experience services segment grew at an annualized rate of 19.2% from 2020 to 2021.

The top five services targeting employee experience are no surprise, spanning talent acquisition, retention and development, HR modernization, and dedicated employee experience solutions.

As the world emerges into a post-COVID era, enterprises are first and foremost targeting workspace initiatives to reimagine engagement and collaboration models in physical, virtual, and hybrid environments.

Top services enterprises are adopting to drive employee experience
% of offerings

- Workspace and environment: 27%
- Dedicated EX offerings: 14%
- Advanced learning, skilling, and employee development: 14%
- HR modernization: 12.5%
- Talent acquisition and internal mobility: 12.5%
- Cultural change: 11%
- Organizational change management: 9%

Source: Advisories and Providers in the HFS Employee Experience Services Top 10 Report
Employee experience services: How provider partners are approaching “workspace and environment” EX services as client zero

Workspace and environment—how provider partners are handling the challenge as client zero:

Amid the challenges of security, compliance, behavioral change, and new expectations from clients, brick-and-mortar environments will never return to pre-pandemic levels. The percentage of providers’ workforce engaging in a work-from-home (WFH) model jumped from a pre-pandemic average of 8% to a 2021 average of 92%¹. For the duration of 2022, service providers are planning to continue a work from home model with nearly 49% of their total headcount in 2022.²

Employee experience services: the skills solving for EX

**Agile is the #1 skill solving for employee experience.**
The skills of the enterprise continue to change, and as silos break down,
services are provided from matrixed teams across the organization. The
skills of the talent organization and resources providing employee
experience services reflect a firm focus on change, leading with agile,
data, and DEI specialists.

**Over 4x growth for change specialists**
The number of employees trained in Agile and DevOps is expected to
increase approximately 23% in the workforce, more than four times the
average 5% growth in overall provider headcount.

**Skills solving for talent and employee experience reflect a firm focus on change, leading with agile, data, and DEI specialists**

Source: Advisories and Providers in the HFS Employee Experience Services Top 10 Report
Employee-centricity does not necessitate leadership through the HR function; day-to-day employee experience crosses all teams, functions, and business units. So, who should lead employee experience, and where should that capability reside?

Organizations must blow up the archaic leadership mindset to stay relevant in this post-pandemic reality.

These are the roles—and leadership traits—that will make companies much more in tune with their strategic needs and align them to their business operations.
Ambitious organizations are creating leadership roles to support experience-centricity (continued)

According to author Simon Sinek in his book *The Infinite Game*, people look to leadership to serve and protect and to “set up their organizations to succeed beyond their lifetimes.” In the modern landscape, most organizations place an unbalanced focus on near-term results, but business is no finite endeavor.

The CEO should be the leader who drives an *infinite mindset* across the organization

**The Chief Transformation Officer** must link the front and back offices and ensure processes run smoothly across functions to deliver the data and outcomes the organization needs.

**The Chief Customer Experience Officer** lives and breathes the world of the customers and obsesses with how to engage them as effectively as possible—right across the entire customer life-cycle.

**The Chief Employee Experience Officer** is responsible for making the company a great, energizing place to work, where staff of all backgrounds, ages, experience levels and cultures are energized by the values and desired outcomes of the firm.

**The Chief Partner Experience Officer** must become a prominent leader in the organization. The need to collaborate with entities across the entire customer value chain has never been so prominent. Partners play critical roles in providing cohesive, 360-degree customer experience.
Partners have the consultative skills to understand and articulate the needs of clients; however, enterprises are finding gaps in their ability to operationalize the strategy.

Enterprises are looking for innovation throughout their partners’ ecosystems to bring a diversity of specialists to proactively support their needs:

- To connect the vision and strategy through all relationship and delivery levels of their partners’ teams.
- To connect to peers across functions, industries, and initiatives through their partners’ client organizations.
- To connect to subject matter experts through their partners’ technology partners.
- To connection to academics and analyst organizations to further validate the problem statement and approaches to solutions and services.

Clients want partners to bring a diverse set of specialists to the table to proactively support their needs.

Sources of data

This Top 10 research report relies on myriad data sources to support our methodology and help HFS obtain a well-rounded perspective on the capabilities of participating organizations covered in this study. Sources are as follows:

**RFIs and briefings**
Each participating vendor completed a detailed RFI.
HFS conducted vendor briefings with executives from each vendor.

**Reference checks**
We conducted reference checks with 55 active clients of study participants via phone-based interviews and surveys.

**HFS vendor ratings**
Each year, HFS fields multiple demand-side surveys in which we include detailed vendor rating questions. For this study, we leveraged our fresh from the field HFS Pulse Study data featuring data from 600 enterprise client executive responses.

**Other data sources**
Public information such as press releases, web sites, etc.
Ongoing interactions, briefings, virtual events, etc., with in-scope vendors and their clients and partners.
How we assessed service providers for the employee experience services Top 10 report

The study evaluates the employee experience services capabilities of service providers based on execution, innovation, voice of the customer (VOC), and a new criteria for 2021, alignment with the HFS OneOffice model—our vision for digital transformation. Details include:

**Execution**
- **Breadth and depth**: Formalized employee experience capabilities and offerings, employee experience value chain capabilities.
- **Scale of employee experience services business**: Employee experience resources, geographic coverage, number of clients, scale of client engagements.
- **Growth of employee experience services**: Year-on-year revenue growth, client growth, resource growth, growth of engagements.

**Innovation**
- **Strategy and vision**: Clear articulation of value proposition, go-to-market strategy, and vision for employee experience services. Ability to address demand drivers and key client challenges.
- **Platforms, proprietary tools, and internal delivery**: In-house tools, platforms, frameworks, methodologies, and internal delivery of employee experience capabilities.
- **Co-innovation and collaboration ecosystem**: Identifiable investments and acquisitions. Collaborative approaches with clients, co-innovation centers, and creative commercial models.

**OneOffice alignment**
- **OneOffice scope**: Ability to help EX clients break silos and connect the front, middle, and back offices and align employees to customers with experience and skills.
- **OneOffice skills**: Cultivation of OneOffice skills internally and with clients, with a focus on driving digital fluency both internally and externally.
- **One face to the customer**: Vendor’s ability to represent its full capabilities to its clients.

**Voice of the customer**
- **Reference checks**: Direct feedback from enterprise clients via reference check interviews and surveys.
- **HFS voice of the customer vendor rating data**: Ratings by active clients of in-scope service providers.
- **Referenceability**: Provision of references and reference responsiveness.

<tr>
<td>Ability to help clients drive EX: Government-regulated center for nuclear engineering management—Designed and delivered multiyear, blended learning capability to embed behavioral change in support of making the organization “Safer, Sooner.” Outcomes: 90% of learners are confident they will change behavior, 92% of learners feel they’ve come away with useful learnings or realizations, and there was an 18% increase in how helpful people find communications from senior management. Large ($7.25 billion) regional American retail bank—Assessed the racial equity of talent process and practices with a specific focus on the black-employee experience across the full talent value chain, conducted a holistic and data-driven analysis of biases (both conscious and unconscious), and created a 24-month implementation plan to close operational gaps and mitigate risks uncovered as part of the evaluation. Outcomes: Embedded culture and belonging elements in each of the five assessment levers: talent acquisition, performance management, rewards and recognition, career pathways and leadership development, and succession planning.</td>
<td>• EY has developed innovative methods to re-skill talent at scale for certain clients, with data at the core. Developing industry-specific solutions based on recent client successes would be powerful.</td>

About the authors
Phil Fersht is widely recognized as the world’s leading independent analyst focused on the alignment of business operations and technology spanning more than two decades. He has a global reputation for calling out the big trends, being unafraid to share his honest views, and driving a narrative on the technology and business services industries that shape many leadership decisions. His reputation drove him to establish HFS Research in 2010. Fersht coined the term “OneOffice” in 2016 to describe HFS Research’s vision for future business operations amidst the impact of cloud, automation, AI, and disruptive digital business models.

Sarah Little acts as Vice President, Content and Strategy, CEO’s Office, focusing on big industry themes such as leadership, culture, employee experience, and skills for the future of work.

Sarah joined HFS in 2012 and has worked across functions and roles, supporting the CEO on key projects for internal and client delivery. Sarah has spent her career driving the interplay between business, marketing, and technology and holds a Bachelor of Arts degree in Digital Media Studies from the University of Denver.
About HFS

Insight. Inspiration. Impact.

HFS is a unique analyst organization that combines deep visionary expertise with rapid demand side analysis of the Global 2000. Its outlook for the future is admired across the global technology and business operations industries. Its analysts are respected for their no-nonsense insights based on demand side data and engagements with industry practitioners.

HFS Research introduced the world to terms such as "RPA" (Robotic Process Automation) in 2012 and more recently, the HFS OneOffice™. The HFS mission is to provide visionary insight into the major innovations impacting business operations such as Automation, Artificial Intelligence, Blockchain, Internet of Things, Digital Business Models and Smart Analytics.
