Everest Group PEAK Matrix® for Multi-country Payroll (MCP) Solutions Provider 2022

Focus on EY
October 2022
Enterprises with global operations have recognized the need to make the payroll function future-ready, resilient, and standardized. They are striving to do so with the help of next-generation technology elements to deal with the increasing complexity of compliance, workforce transformation, and macroeconomic shifts brought about by COVID-19 and the Great Resignation. One way forward to achieve this goal is to explore the consolidation of payroll operations regionally or globally to reduce risks and overheads. As a result, enterprises have turned to service providers with presence in multiple geographies for assistance.

In addition, due to global talent scarcity, enterprises have found it difficult to find the right talent to run payroll operations entirely in-house. They have also realized that payroll continues to be the single source of truth for employee data and can significantly help executives shape the enterprise’s people strategies. Enterprises are now looking for service providers who can not only assist them in remaining compliant but also provide actionable data on their workforce.

In this research, we present and assess the strengths and limitations of MCP service providers featured on the Multi-country Payroll (MCP) Solutions PEAK Matrix® Assessment 2022. The assessment is based on Everest Group’s annual RFI process for the calendar year 2022, interactions with leading MCP service providers, client reference checks, and ongoing analysis of the MCP market.

In this research, we focus on:
- Everest Group’s Global Multi-country Payroll (MCP) PEAK Matrix® Assessment 2022, a comprehensive assessment of 24 service providers
- Everest Group’s EMEA Multi-country Payroll (MCP) PEAK Matrix® Assessment 2022, a comprehensive assessment of 19 service providers
- Everest Group’s APAC Multi-country Payroll (MCP) PEAK Matrix® Assessment 2022, a comprehensive assessment of 20 service providers

Providers assessed: activpayroll, ADP, Alight Solutions, Allsec, Ascent HR, BIPO, Ceridian, CloudPay, EY, iiPay, Immedis, Links International, Mercans, Neeyamo, OS HRS, Papaya Global, PayGroup, PaySpace, Ramco, Safeguard Global, SD Worx, Sopra HR, TMF Group, and Zalaris
Everest Group PEAK Matrix®

Multi-country Payroll (MCP) Solutions PEAK Matrix® Assessment 2022 – Global | EY positioned as Leader and Star Performer

1 Assessments for Ceridian, PaySpace, and Zalaris excludes service provider inputs and are based on Everest Group’s proprietary Transaction Intelligence (TI) database, provider public disclosures, and Everest Group’s interactions with buyers
2 Analysis for PayGroup excludes its acquisition by Deel and assessment for Ceridian includes its acquisition of Ascender, Excelity, and ADAM HCM

Client portfolio

MCP solutions experience

- Total number of current MCP deals (as of December 31, 2021): 6,996
- Number of payslips processed annually (as of March 31, 2022): 25 million+

MCP solutions deal spread by number of countries in scope
100% = 6,996

- Only 2 countries: 20%
- 3-5 countries: 12%
- 6-10 countries: 15%
- >10 countries: 53%

Split of payslips processed by geography
100% = 25 million+

- Europe: 51%
- North America: 12%
- Latin America: 10%
- UK: 12%
- Rest of APAC: 6%
- MEA: 5%
- ANZ: 3%

Split of MCP solutions deals by industry
100% = 6,996

- Manufacturing: 14%
- Financial services: 11%
- Retail: 10%
- Services: 9%
- Government: 10%
- Energy: 9%
- Telecom: 7%
- Others: 36%

MCP solutions deal spread by employees covered
100% = 6,996

- <3,000 employees: 24%
- 3,000-15,000 employees: 57%
- >15,000 employees: 19%

Major MCP solutions clients

Over 50% of clients are a part of the Global fortune 500 list.

1 MEA refers to Middle East and Africa
2 Others include media, technology, and consumer industry clients

### Strengths

- Ernst & Young (EY), a provider of solutions in assurance, tax, strategy, and managed payroll services under EY Payroll Operate, is a Leader on the Everest Group Global MCP PEAK Matrix® assessment 2022 and a Major Contender on the APAC MCP PEAK Matrix® assessment 2022 and the EMEA MCP PEAK Matrix® assessment 2022
- It can provide managed payroll services in 159 countries through its own delivery centers and resources. It also has the capability to provide interface, pay slips, reporting, and contact center support in over 49 languages
- EY follows a one data entry point approach to provide additional services such as wage tax compliance, mobility, compensation, payroll data analytics, and labor law as a service to create an end-to-end payroll value chain
- Its payroll command center can provide administrators a summarized view of payroll runs and status for all the countries that they are responsible for in a single dashboard. It also provides payroll and HR analytics and supports DEI use cases that include providing insights and transparency around the gender-based pay gap
- EY’s payroll command center’s workflow module can be integrated with email applications. It generates automatic notifications on payroll progress and alerts the payroll task owner to complete the activities such as payroll data input
- Its self-service portal, EY Interact, available through mobile and web applications provides the clients’ employees the ability to view their pay slips and tax documents and track pay change over a time period

### Limitations

- EY’s current chatbot is deployed in an FAQ manner and is not configured to handle advanced use cases such as providing payroll metrics to managers or contextualizing the response based on different personas, however, it is on its roadmap to make its chatbot more advanced
- It takes a partner first strategy for the T&A module, and therefore enterprises looking for an integrated inbuilt global T&A module might not find EY’s offering ideal
- EY’s proprietary G2N engine, PEYtal is currently restricted to serving countries in the LATAM region and uses partner engines for the other countries that it supports across the globe. However, it has a strong roadmap to develop G2N engines for most countries
Everest Group PEAK Matrix® is a proprietary framework for assessment of market impact and vision & capability
Solutions PEAK Matrix® evaluation dimensions

Measures impact created in the market – captured through three subdimensions

**Market adoption**
Size and growth of deployments across the solution portfolio

**Portfolio mix**
Solution footprint across geographies, industries, and buyer size segments

**Value delivered**
Value delivered to the client based on customer feedback and other measures

Measures ability to deliver solutions successfully. This is captured through five subdimensions

**Vision and strategy**
Vision for the client and itself, future roadmap and strategy

**Technology capability**
Technical sophistication and breadth/depth across the technology suite

**Services capability**
Effectiveness and breadth/depth of services portfolios across the services suite

**Innovation and investments**
Innovation and investment in the solution suite

**Engagement and commercial model**
Progressiveness, effectiveness, and flexibility of engagement and commercial models

**Market impact**
Major Contenders

Leaders

Aspirants

Vision & capability

Value delivered to the client based on customer feedback and other measures.
Everest Group confers the Star Performers title on providers that demonstrate the most improvement over time on the PEAK Matrix®

Methodology

Everest Group selects Star Performers based on the relative YOY improvement on the PEAK Matrix.

In order to assess advances on market impact, we evaluate each service provider’s performance across a number of parameters including:
- Yearly ACV/YOY revenue growth
- # of new contract signings and extensions
- Value of new contract signings
- Improvement in portfolio mix
- Improvement in value delivered

In order to assess advances on vision and capability, we evaluate each service provider’s performance across a number of parameters including:
- Innovation
- Increase in scope of services offered
- Expansion of delivery footprint
- Technology/domain specific investments

We identify the service providers whose improvement ranks in the top quartile and award the Star Performer rating to those service providers with:
- The maximum number of top-quartile performance improvements across all of the above parameters AND
- At least one area of top-quartile improvement performance in both market success and capability advancement

The Star Performers title relates to YOY performance for a given vendor and does not reflect the overall market leadership position, which is identified as Leader, Major Contender, or Aspirant.
FAQs

Does the PEAK Matrix® assessment incorporate any subjective criteria?
Everest Group’s PEAK Matrix assessment takes an unbiased and fact-based approach that leverages provider / technology vendor RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information. In addition, we validate/fine-tune these results based on our market experience, buyer interaction, and provider/vendor briefings.

Is being a Major Contender or Aspirant on the PEAK Matrix, an unfavorable outcome?
No. The PEAK Matrix highlights and positions only the best-in-class providers / technology vendors in a particular space. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of the PEAK Matrix assessment are relevant to buyers and providers other than the PEAK Matrix positioning?
A PEAK Matrix positioning is only one aspect of Everest Group’s overall assessment. In addition to assigning a Leader, Major Contender, or Aspirant label, Everest Group highlights the distinctive capabilities and unique attributes of all the providers assessed on the PEAK Matrix. The detailed metric-level assessment and associated commentary are helpful for buyers in selecting providers/vendors for their specific requirements. They also help providers/vendors demonstrate their strengths in specific areas.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?
- Enterprise participants receive summary of key findings from the PEAK Matrix assessment
- For providers
  - The RFI process is a vital way to help us keep current on capabilities; it forms the basis for our database – without participation, it is difficult to effectively match capabilities to buyer inquiries
  - In addition, it helps the provider/vendor organization gain brand visibility through being included in our research reports

What is the process for a provider / technology vendor to leverage its PEAK Matrix positioning?
- Providers/vendors can use their PEAK Matrix positioning or Star Performer rating in multiple ways including:
  - Issue a press release declaring positioning; see our citation policies
  - Purchase a customized PEAK Matrix profile for circulation with clients, prospects, etc. The package includes the profile as well as quotes from Everest Group analysts, which can be used in PR
  - Use PEAK Matrix badges for branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with Everest Group; please contact your CD or contact us

Does the PEAK Matrix evaluation criteria change over a period of time?
PEAK Matrix assessments are designed to serve enterprises’ current and future needs. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality and to serve enterprises’ future expectations.
Everest Group is a research firm focused on strategic IT, business services, engineering services, and sourcing. Our clients include leading global companies, service providers, and investors. Clients use our services to guide their journeys to achieve heightened operational and financial performance, accelerated value delivery, and high-impact business outcomes.
