Online versions

In addition to this format, the checklist is also available as an EY Intelligent Checklist. The scoping questions in the EY Intelligent Checklist allow the checklist to be made specific to an entity's annual financial statements. It is essential that the scoping questions are carefully assessed to avoid inappropriate scoping of the checklist.

IFRS as issued by the IASB - a complete set of financial statements

This checklist is designed to assist you in the preparation of financial statements in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB), and in compliance with the disclosure requirements of IFRS. Entities applying IFRS under a local endorsement mechanism must consider the relevant local effective dates.

The checklist is applicable to annual financial statements and a complete set of financial statements for an entity's interim financial report.

The checklist does not explain other accounting requirements, nor does it reflect the requirements of *IFRS for Small and Medium-Sized Entities* (SMEs) or the *IFRS Practice Statement for Management Commentary*. In some instances, to simplify the use of the checklist, disclosure requirements have been paraphrased, so you may need to refer to the standards for full details.

Applicable to a complete set of financial statements for annual and interim periods for entities with 30 June 2022 year ends

The checklist is prepared specifically for entities with a year end of 30 June 2022. Thus, for later year ends, it may not be applicable, depending on the relevant year end and whether standards and amendments that were not effective for 30 June 2022 year end have become effective for the later year end.

The checklist is updated semi-annually, reflecting standards issued by the IASB since the previous version. Prior to completing this checklist, refer to the IASB's website to ensure no other standards have been issued between the cut-off date of this checklist (28 February 2022) and the date when the financial statements are authorised for issue.

Materiality and judgement

The checklist does not address the appropriateness or clarity of the disclosures, for instance, the format and the structure of the notes and the tailoring of the information. These are matters of judgement based on the individual facts and circumstances of the entity.

IFRS sets out the minimum disclosure requirements. However, the minimum disclosure requirements only apply to the extent that the transaction, event or item to which the disclosure requirement applies, is material to the entity, as clarified in paragraph 31 of IAS 1 *Presentation of Financial Statements*. Therefore, in applying the checklist, the user should carefully assess the materiality of the information. The inclusion of disclosures of immaterial information may, in some circumstances, reduce the relevance of the financial statements. In such circumstances, it is appropriate to exclude the information.

In addition, entities are encouraged to refer to the *Practice Statement 2: Making Materiality Judgements* that was issued in 2017, which provides non-mandatory guidance to help entities making materiality judgements when preparing general purpose IFRS financial statements. It also contains guidance on the general characteristics of materiality, a four-step process that may be applied in making materiality judgements and guidance on how to make materiality judgements in specific circumstances, namely, prior period information, errors and covenants and in the context of interim reporting (including illustrative examples).

The IASB also issued *Amendments to IAS 1 and IAS 8 - Definition of Material* in 2018 in order to clarify and align the definition of material.

Additionally, the IASB issued *Amendments to IAS 1 and IFRS Practice Statement 2 - Disclosure of Accounting Policies* in 2021, in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments to IAS 1 must be applied for annual periods beginning on or after 1 January 2023 with earlier application permitted.

For more guidance on how to improve disclosure effectiveness, please refer to our publications, *Applying IFRS: Enhancing communication effectiveness (February 2017)*, *IFRS Developments Issue 124 - Disclosure Initiative - Principles of Disclosure* and *IFRS Developments Issue 187 - The Disclosure Initiative - IASB amends the accounting policy requirements*.¹

In addition to the mandatory disclosure requirements, the checklist includes (*in italics*) the IASB's recommended disclosures.

Other sources of guidance

Comment boxes that summarise and/or refer to relevant IFRS guidance regarding the scope and interpretation of certain disclosure requirements are also included. However, the checklist alone is not sufficient to provide the user with a thorough understanding of the applicable IFRS. Therefore, the checklist should be read together with the standards and interpretations themselves, as well as other relevant guidance, such as *International GAAP® 2022, Good Group (International) Limited - Illustrative financial statements (December 2021)* and *Good Group (International) Illustrative interim condensed consolidated financial statements (June 2022)*. Comparative amounts in the financial statement disclosures are always required, unless explicitly exempted by the applicable IFRS.

Identification of requirements that are applicable for the first time

To assist users of the checklist in identifying disclosure requirements that are new in the reporting period ending 30 June 2022, such requirements are marked 'New'. New requirements include requirements that are mandatory for the first time in the current reporting period, as well as those with a later effective date, but which may be adopted early. For instance, for the reporting period 1 July 2021 - 30 June 2022, *Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 - Interest Rate Benchmark Reform - Phase 2* is mandatory for the first time, and the disclosure requirements herein are marked 'New'.

Similarly, in the 'New pronouncements' section, all new requirements are marked 'New', for instance, IFRS 17 *Insurance Contracts* is marked 'New', even though it is not mandatory in the current period. To identify which disclosure requirements (among those marked 'New') are new to a particular entity, the checklist user must also consider whether mandatory and voluntary new requirements have been early-adopted in previous periods. Consequential amendments are included in the relevant sections, rather than the 'New pronouncements' section.

A list of the new pronouncements that may introduce new requirements for entities with 30 June 2022 year-end reporting is provided below. This checklist reflects IFRS in issue at 28 February 2022 that are effective for entities with year-ends of 30 June 2022.

<i>Amendments to IAS 12 - Deferred Tax related to Assets and Liabilities arising from a Single Transaction</i>	May adopt early	May 2021	1 January 2023

- 1) In December 2015, the IASB postponed the effective date of *Amendments to IFRS 10 and IAS 28 - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture* indefinitely pending the outcome of its research project on the equity method of accounting.
- 2) In September 2016, the IASB issued *Amendments to IFRS 4* to address issues arising from the different effective dates of IFRS 9 *Financial Instruments* and the new insurance contracts standard IFRS 17 *Insurance Contracts*. The amendments introduce two alternative options for entities issuing contracts within the scope of IFRS 4 *Insurance Contracts*, notably the temporary exemption approach and the overlay approach. The temporary exemption approach enables eligible entities to defer the implementation date of IFRS 9 until the effective date of IFRS 17. The overlay approach allows an entity applying IFRS 9 from 2018 onwards to remove from profit or loss the effects of some of the accounting mismatches that may occur from applying IFRS 9 before IFRS 17 is applied. In June 2020, the IASB issued *Amendments to IFRS 17* to assist entities

implementing IFRS 17. The amendments included the deferral of the effective date of IFRS 17 to 1 January 2023. The IASB also issued *Amendments to IFRS 4 - Extension of the Temporary Exemption from Applying IFRS 9* and extended the expiry date for the temporary exemption from IFRS 9 to 1 January 2023, to maintain the alignment between the expiry date of the temporary exemption from IFRS 9 and the effective date of IFRS 17:

- ▶ For an entity applying the temporary exemption approach, both comparative periods and current period information follow the disclosure requirements of IFRS 7 *Financial Instruments: Disclosures* based on IAS 39 *Financial Instruments: Recognition and Measurement*, together with certain disclosures to enable users to compare insurers applying the temporary exemption with entities applying IFRS 9 required by IFRS 4.39B
 - ▶ An insurer applying the temporary exemption from IFRS 9 is permitted to elect to apply only the requirements of IFRS 9 for the presentation in other comprehensive income (OCI) of gains and losses attributable to changes in an entity's own credit risk on financial liabilities designated as at fair value through profit or loss (FVPL). If an insurer elects to apply those requirements, it should disclose the related disclosures set out in IFRS 7
- 3) In July 2020, the IASB issued *Amendment to IAS 1 - Classification of Liabilities as Current or Non-current - Deferral of Effective Date* to defer the effective date of *Amendments to IAS 1 - Classification of Liabilities as Current or Non-current* from 1 January 2022 to 1 January 2023.

Ticking the right boxes

Each item should be answered with a tick in the appropriate column:

Yes = Disclosure has been made. Reference can be made in the 'Comments' column to the section (or page) of the financial statements in which the related disclosure has been made.

No = Disclosure has not been made. Any item marked 'No' should be explained, giving the reason for the omission on the checklist or on a separate working paper, including disclosures that are omitted because they are deemed by management to be immaterial, and also including the amounts or percentages involved, to assist in the assessment of compliance with IFRS. If the engagement team concurs that the disclosure is immaterial and does not affect the fair presentation of the financial statements, the omission of such disclosure does not represent a misstatement that requires disclosure in the SAD.

N/A = The question is not applicable to the entity, for instance, because the transaction, event, or item referred to in the question does not apply to the entity.

		Disclosure made			Comments

Compliance with International Financial Reporting Standards						
5	IAS 1.15 IAS 1.17 IAS 1.112	Does the entity provide additional disclosures if the requirements in IFRSs are insufficient to enable users to understand the impact of particular transactions, other events, and conditions on the entity's financial position and financial performance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IFRS 5.5B	For instance, additional disclosures about non-current assets (or disposal groups) classified as held for sale or discontinued operations (beyond those required specifically by IFRS 5 <i>Non-current Assets Held for Sale and Discontinued Operations</i> or other IFRSs) may be necessary to comply with this requirement.				
6	IAS 1.16	Does the entity disclose an explicit and unreserved statement of compliance with IFRSs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IAS 1.16	The entity does not describe financial statements as complying with IFRSs unless they comply with all the requirements of IFRSs. In some jurisdictions, additional disclosure requirements apply, which, as long as they do not conflict with IFRSs, would not disqualify a statement of compliance with IFRSs. Similarly, in certain jurisdictions, the applicable standards may be the same as under IFRSs, but may be the subject of a regulatory approval or endorsement mechanism before they become effective. Entities in these jurisdictions may only refer to compliance with IFRSs as issued by the IASB if the applicable version of IFRSs endorsed and complied with is consistent with IFRS. This is for instance the case in the EU, where entities comply with "IFRSs as endorsed by the EU" and not "IFRSs (as issued by the IASB)".				
7	IAS 1.19 IAS 1.20	In the extremely rare circumstances in which management concludes that compliance with a requirement in an IFRS would be so misleading that it would conflict with the objective of financial statements set out in the <i>Conceptual Framework</i> , and departs from that requirement (if the relevant regulatory framework requires or otherwise does not prohibit such a departure), does the entity disclose:				
		a. That management concluded that the financial statements present fairly the entity's financial position, financial performance and cash flows	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. That it complies with applicable IFRSs, except that it departs from a requirement of an IFRS to achieve a fair presentation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. The title of the IFRS from which the entity departs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		d. The nature of the departure	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		e. The treatment that the IFRS would require	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		f. The reason why that treatment would be so misleading in the circumstances that it would conflict with the objective of financial statements set out in the <i>Conceptual Framework</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		g. The treatment adopted	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		h. For each period presented, the financial impact of the departure on each item in the financial statements that would have been reported in complying with the requirement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
8	IAS 1.21 IAS 1.20	If the entity departed from a requirement of an IFRS in a prior period, and the departure affects the amounts recognised in the financial statements for the current reporting period, does the entity disclose:				
		a. The title of the IFRS from which the entity has departed	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The nature of the departure	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. The treatment that the IFRS would require	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		d. The reason why that treatment would be so misleading in the circumstances that it would conflict with the objective	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

		Disclosure made			Comments	
		Yes	No	N/A		
		of financial statements set out in the <i>Conceptual Framework</i>				
		e. The treatment adopted	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		f. For each period presented, the financial impact of the departure on each item in the financial statements that would have been reported in complying with the requirement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
9	IAS 1.23	In the extremely rare circumstances in which management concludes that compliance with a requirement in an IFRS would be so misleading that it would conflict with the objective of financial statements set out in the <i>Conceptual Framework</i> , but the relevant regulatory framework prohibits departure from the requirement, does the entity, to the maximum extent possible, reduce the perceived misleading aspects of compliance by disclosing all of the following:				
		a. The title of the IFRS in question	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The nature of the requirement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. The reason why management concluded that complying with that requirement is so misleading in the circumstances that it conflicts with the objective of financial statements set out in the <i>Conceptual Framework</i>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		d. For each period presented, the adjustments to each item in the financial statements that management concluded would be necessary to achieve a fair presentation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		Going concern				
	IAS 1.25 IAS 10.14	The entity does not prepare its financial statements on a going concern basis if management determines after the reporting period (or earlier) either that it intends to liquidate the entity or to cease trading, or that it has no realistic alternative but to do so.				
10	IAS 1.25	Does the entity disclose material uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
11	IAS 1.25	If the financial statements are not prepared on a going concern basis, does the entity disclose:				
		a. The fact that the financial statements are not prepared on a going concern basis	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The basis on which the financial statements are prepared	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. The reason why the entity is not regarded as a going concern	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		Frequency of reporting				
12	IAS 1.36	If the end of the entity's reporting period changes and the annual financial statements are presented for a period longer or shorter than one year, does the entity disclose:				
		a. The reporting period covered by the financial statements	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The reason for using longer or shorter periods	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. The fact that amounts presented in the financial statements are not entirely comparable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		Comparative information				
13	IAS 1.38	Does the entity present comparative information for the previous period for all amounts reported in the current period's financial statements, unless an IFRS permits or requires otherwise	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
14	IAS 1.38	Does the entity include comparative information for narrative and descriptive information, if it is relevant to an understanding of the current reporting period's financial statements	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
15	IAS 1.41	If the presentation or classification of items in the financial statements is amended and comparative amounts are reclassified (unless the reclassification cannot be applied after making every reasonable effort to do so), does the entity disclose:				

		Disclosure made			Comments	
		Yes	No	N/A		
		a. The nature of the reclassification	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The amount of each item or class of items that is reclassified	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. The reason for the reclassification	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
16	IAS 1.42	If the entity cannot reclassify comparative amounts after making every reasonable effort to do so, does the entity disclose:				
		a. The reason for not reclassifying the amounts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The nature of the adjustments that would have been made if the amounts were reclassified	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
17	IAS 1.38A	Does the entity present, as a minimum, two statements of financial position, two statements of profit or loss and other comprehensive income, two separate statements of profit or loss (if presented), two statements of cash flows and two statements of changes in equity, and related notes	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IAS 1.38B	In some cases, narrative information provided in the financial statements for the preceding period(s) continues to be relevant in the current period.				
18	IAS 1.38C	When an entity voluntarily presents comparative information in addition to the minimum comparative financial statements required by IFRSs, does the entity present related note information for those additional statements	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IAS 1.38C	An entity may present comparative information in addition to the minimum comparative financial statements required by IFRSs, as long as that information is prepared in accordance with IFRSs. This comparative information may consist of one or more statements referred to in IAS 1.10, but need not comprise a complete set of financial statements.				
	IAS 1.38D	For example, an entity may present a third statement of profit or loss and other comprehensive income (thereby presenting the current period, the preceding period and one additional comparative period). However, the entity is not required to present a third statement of financial position, a third statement of cash flows or a third statement of changes in equity (i.e., an additional financial statement comparative). The entity is required to present, in the notes to the financial statements, the comparative information related to that additional statement of profit or loss and other comprehensive income.				
19	IAS 1.40B	In the circumstances described in IAS 1.40A, does the entity present three statements of financial position as at:				
		a. The end of the current period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The end of the preceding period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. The beginning of the preceding period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IAS 1.40A	An entity must present a third statement of financial position as at the beginning of the preceding period in addition to the minimum comparative financial statements required in IAS 1.38A if:				
		a. It applies an accounting policy retrospectively, makes a retrospective restatement of items in its financial statements or reclassifies items in its financial statements				
		b. The retrospective application, retrospective restatement or the reclassification has a material effect on the information in the statement of financial position at the beginning of the preceding period				
20	IAS 1.40C	When an entity is required to present an additional statement of financial position in accordance with IAS 1.40A, does the entity disclose the information required by IAS 1.41-44 and IAS 8	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IAS 1.40C	However, it need not present the related notes to the opening statement of financial position as at the beginning of the preceding period.				

			Disclosure made			Comments
			Yes	No	N/A	
21	IAS 1.40D	When an entity presents an opening statement of financial position in accordance with IAS 1.40A, is the date of this statement the beginning of the preceding period even if additional comparative information is presented in terms of IAS 1.38C	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Consistency of presentation						
22	IAS 1.45	Does the entity retain in the financial statements from one period to the next:

IFRS 1.27	IAS 8 <i>Accounting Policies, Changes in Accounting Estimates and Errors</i> does not deal with changes in accounting policies that occur when an entity first adopts IFRS or to changes in those policies until after it presents its first IFRS financial statements. IFRS 1.27A	If, during the period covered by its first IFRS financial statements, an entity changes its accounting policies or its use of the exemptions contained in this IFRS, it must explain the changes between its first IFRS interim financial report and its first IFRS financial statements, in accordance with IFRS 1.23, and it shall update the reconciliations required by paragraph 24(a) and (b). The requirements for entities that present interim financial reports under IAS 34 <i>Interim Financial Reporting</i> for part of the period covered by its first IFRS financial statements are included in the section on Interim Reporting, which contains all disclosure requirements related to interim reporting. 		a. The main factors and influences determining performance, including:

		▶ The entity's response to those changes and their effect	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

However, in either of those circumstances, the entity may need to disclose information

		Key estimation assumptions			
144	IAS 1.125	Does the entity disclose key assumptions about the future, and other sources of key estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year			<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
	IFRS 5.5B	Additional disclosures beyond what is required by other standards may be necessary to comply with this requirement. For instance, additional disclosures about non-current assets (or disposal groups) classified as held for sale or discontinued operations (beyond those required specifically by IFRS 5 or other IFRS) may be necessary to comply with this requirement.			
145	IAS 1.125	For the assets and liabilities in IAS 1.125 above, does the entity disclose:			
		a. Their nature	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. Their carrying amount as at the end of the reporting period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IAS 1.129	An entity presents the disclosures under IAS 1.125 in a manner that helps users of financial statements to understand management's judgements about the future. The nature and extent of the disclosure varies according to the nature of the assumption and other circumstances. Examples of the types of disclosures made are:			
		a. The nature of the assumption or other estimation uncertainty			
		b. The sensitivity of carrying amounts to the methods, assumptions and estimates underlying their calculation, including the reasons for the sensitivity			
		c. The expected resolution of an uncertainty and the range of reasonably possible outcomes within the next financial year for the carrying amounts of the assets and liabilities affected			
		d. The changes made to past assumptions concerning those assets and liabilities, if the uncertainty remains unresolved			
		Examples of key assumptions are:			
		a. Future changes in salaries			
		b. Future changes in prices affecting other costs			
		c. Risk adjustments to cash flows			
		d. Risk adjustments to discount rates			
	IAS 1.133	Some key assumptions referred to in IAS 1.125 also require disclosures under other IFRS. For example, IAS 37 requires disclosure, in certain circumstances, of major assumptions concerning future events affecting classes of provisions.			
		IFRS 13 Fair Value Measurement requires disclosure of significant assumptions (including the valuation technique(s) and inputs) the entity uses when measuring the fair values of assets and liabilities that are carried at fair value.			
		Capital			
146	IAS 1.134	Does the entity disclose information that enables users of its financial statements to evaluate the entity's objectives, policies and processes for managing capital			<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
147	IAS 1.135	Does the entity disclose the following, based on the information provided internally to the entity's key management personnel:			
		a. Qualitative information about its objectives, policies and processes for managing capital, including (but not limited to):			
		▶ A description of what it manages as capital	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		<ul style="list-style-type: none"> ▶ If the entity is subject to externally imposed capital requirements, the nature of those requirements and how those requirements are incorporated into the management of capital ▶ How it is meeting its objectives for managing capital 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. Summary quantitative data about what it manages as capital	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IAS 1.135		Some entities regard some financial liabilities (for example, some forms of subordinated debt) as part of capital. Other entities regard capital as excluding some components of equity (for example, components arising from cash flow hedges).				
		c. Any changes in (a) and (b) from the previous period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		d. Whether during the period it complied with any externally imposed capital requirements to which it is subject	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		e. If the entity did not comply with the externally imposed capital requirements to which it is subject, the consequences of such non-compliance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IAS 1.136		The entity may manage capital in many ways and be subject to many different capital requirements. For example, a conglomerate may include entities that undertake insurance activities and banking activities, and those entities may operate in several jurisdictions. If an aggregate disclosure of capital requirements and how the entity manages capital would not provide useful information or distorts a financial statement user's understanding of an entity's capital resources, the entity discloses separate information for each capital requirement to which the entity is subject.				
IAS 1.135(a)(ii)		Externally imposed capital requirements referred to in IAS 1.135(a)(ii) only reflect capital requirements imposed by a regulator or a prudential supervisor. Capital requirements, as imposed by a bank or creditor are considered a contractual obligation and are therefore not in the scope of IAS 1.135(a)(ii).

Therefore, it does not control the investee when it exercises its decision-making authority. Thus, sometimes a principal's power may be held and exercisable by an agent, but on behalf of the principal. A decision maker is not an agent simply because other parties can benefit from the decisions that it makes.

Members' shares in co-operative entities and similar instruments (IFRIC 2)					
IFRIC 2.5 IFRIC 2.8		The contractual right of the holder of a financial instrument (including members' shares in co-operative entities) to request redemption does not, in itself, require a financial instrument to be classified as a financial liability. Rather, the entity must consider all of the terms and conditions of the financial instrument in determining its classification as a financial liability or equity. Those terms and conditions include relevant local laws, regulations and the entity's governing charter in effect at the date of classification that can impose various types of prohibitions on the redemption of members' shares.			
270	IFRIC 2.13	If a change in the redemption prohibition of members' shares leads to a transfer between financial liabilities and equity, does the entity disclose separately the amount, timing and reason for the transfer			<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Events after the reporting period					
271	IAS 10.19	Do the disclosures in the financial statements reflect information received after the reporting period that relates to conditions that existed at the end of the reporting period			<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
272	IAS 10.21 IAS 10.22 IAS 1.76	If non-adjusting events after the reporting period are material, and, thus, non-disclosures could reasonably be expected to influence decisions that the primary users of general purpose financial statements have taken on the basis of those financial statements, which provide financial information about a specific reporting entity, does the entity disclose the following for each material category of non-adjusting events after the reporting period (IAS 10.22 provides examples of such events):			
		a. The nature of the event	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. An estimate of its financial effect, or a statement that such an estimate cannot be made	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
In addition, please note that disclosure might be required if applicable in other sections of this checklist as under IFRS 3.B66 (regarding post year-end acquisitions), IAS 33.64 (regarding post year-end earnings per share changes due to capitalisation, share split, bonus issue, reverse share split), and IFRS 5.12 (regarding non-current assets (or disposal groups) held for sale post year-end).					
Fair value measurement					
IFRS 13.5 IFRS 13.6		IFRS 13 specifies how to measure fair value, when fair value (and measures based on fair value, such as fair value less costs to sell) is required or permitted by another IFRS. Such fair value measurements may be recognised in the statement of financial position or disclosed in the notes to the financial statements (for example, the comparison of carrying value and fair value required by IFRS 7). IFRS 13 applies when another IFRS requires or permits measurement(s) or disclosure(s) of fair value, except for:			
		a. Share-based payment transactions within the scope of IFRS 2 <i>Share-based Payment</i>			

		Disclosure made			Comments		
		Yes	No	N/A			
	IFRS 13.7	<p>b. Leasing transactions accounted for in accordance with IFRS 16 <i>Leases</i></p> <p>c. Measurements that have some similarities to fair value, but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36</p> <p>IFRS 13 also requires disclosures about fair value measurements. If fair value is measured in accordance with IFRS 13 after initial recognition (whether recognised or only disclosed), the disclosure requirements in IFRS 13 will apply, unless IFRS 13 provides a specific exemption. The disclosures required by IFRS 13 are not required for the following:</p> <p>a. Plan assets measured at fair value in accordance with IAS 19</p> <p>b. Retirement benefit plan investments measured at fair value in accordance with IAS 26 <i>Accounting and Reporting by Retirement Benefit Plans</i></p> <p>c. Assets for which recoverable amount is fair value less costs of disposal in accordance with IAS 36</p>					
		Disclosure objectives					
273	IFRS 13.91	<p>Does the entity disclose information that helps users of its financial statements assess both of the following:</p> <p>a. For assets and liabilities that are measured at fair value on a recurring or non-recurring basis in the statement of financial position after initial recognition, the valuation techniques and inputs used to develop those measurements</p> <p>b. For recurring fair value measurements using significant unobservable inputs (Level 3), the effect of the measurements on profit or loss or other comprehensive income for the period</p>			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 13.92	<p>To meet the objectives of IFRS 13.91, an entity is required to consider all of the following:</p> <ul style="list-style-type: none"> ▶ The level of detail necessary to satisfy the disclosure requirements ▶ How much emphasis to place on each of the various requirements ▶ How much aggregation or disaggregation to undertake ▶ Whether users of financial statements need additional information to evaluate the quantitative information disclosed 			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
274	IFRS 13.92	<p>If the disclosures provided in accordance with IFRS 13 and other IFRSs are insufficient to meet the objectives in IFRS 13.91, does the entity disclose additional information in order to meet those objectives</p>			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 13.93	<p>In addition, IFRS 13.93 establishes the minimum disclosure requirements for fair value measurements (and those based on fair value) that are recognised in the statement of financial position after initial recognition. The requirements vary depending on whether the fair value measurements are recurring or non-recurring and their categorisation within the fair value hierarchy (i.e., Level 1, 2 or 3).</p> <p>In order to determine the appropriate categorisation of a fair value measurement (as a whole) within the hierarchy, an entity determines the categorisation of the inputs used to measure fair value and categorisation of the fair value measurement (as a whole)</p> <p>(i) Categorisation of the inputs in the fair value hierarchy: IFRS 13's fair value hierarchy categorises inputs to valuation techniques into the following levels, based on their observability:</p>					

		Disclosure made			Comments
		Yes	No	N/A	
IFRS 13.App. A	Level 1 inputs: Quoted prices (that are unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date				
	Level 2 inputs: Inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly				
IFRS 13.73	Level 3 inputs: Unobservable inputs for the asset or liability				
IFRS 13.75	(ii) Categorisation of the fair value measurement (as a whole) in the fair value hierarchy: A fair value measurement (as a whole) is categorised within the fair value hierarchy, based on the lowest level input that is significant to the entire measurement (Level 1 inputs being the highest and Level 3 inputs, the lowest). For measures based on fair value (such as fair value less costs to sell), this determination does not consider the 'costs to sell'. When measured based on quoted prices in an active market (that are unadjusted) for identical assets or liabilities, fair value measurement is categorised within Level 1. When measured using valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable, the fair value measurement as a whole is categorised within Level 2. When measured using valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable, the fair value measurement as a whole is categorised within Level 3.				
Accounting policies					
275	IFRS 13.95 IFRS 13.93(c)	Does the entity disclose its policy for determining when transfers between levels of the fair value hierarchy are deemed to have occurred	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 13.93(e) (iv)	IFRS 13.95 requires that an entity determine (and consistently follow) its policy for determining when transfers between levels in the fair value hierarchy are deemed to have occurred. The policy for the timing of recognising transfers is required to be the same for transfers into and out of levels. Examples of such policies include: (a) The date of the event, or change in circumstances, that caused the transfer (b) The beginning of the reporting period (c) The end of the reporting period			
276	IFRS 13.96 IFRS 13.48 IFRS 13.51	If an entity makes an accounting policy decision to use the exception in IFRS 13.48, does the entity disclose that policy, including its policy for allocating bid-ask spread adjustments and credit adjustments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 13.48-52	If an entity that holds a group of financial assets and financial liabilities is exposed to market risks (as defined in IFRS 7) and to the credit risk (as defined in IFRS 7) of each of the counterparties and manages that group of assets and liabilities on the basis of its net exposure, IFRS 13.48 permits the use of a measurement exception for measuring fair value, provided the criteria set out in IFRS 13.49 are met. Under this exception, an entity measures the fair value of the group of financial assets and liabilities consistently with how market participants would price the net risk exposure at the measurement date. Please note that the exception does not affect financial statement presentation requirements. In addition, the reference to financial assets and financial liabilities in IFRS 13.48 to 51 should be read as applying to all contracts within the scope of, and accounted for, under IFRS 9, regardless of whether they meet the definitions of financial assets or financial liabilities in IAS 32.			
Class of assets and liabilities					
277	IFRS 13.94	Does the entity classify assets and liabilities under the scope of IFRS 13 based on both: a. The nature, characteristics and risks of the asset or liability	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		Disclosure made			Comments			
		Yes	No	N/A				
		b. The level of the fair value hierarchy within which the fair value measurement is categorised						
IFRS 13.94		<div style="border: 1px solid black; padding: 5px;"> <p>The number of classes of assets and liabilities may need to be greater for fair value measurements categorised within Level 3 because those measurements have a greater degree of uncertainty and subjectivity. Determining the appropriate classes of assets and liabilities requires judgement and often may require more disaggregation than the line items presented in the statement of financial position. Note: If another IFRS specifies the class for an asset or liability, an entity may use that class when providing the disclosures required by IFRS 13, provided that class meets IFRS 13's requirements for determining classes.</p> </div>			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
278	IFRS 13.94	Does the entity provide sufficient information to permit reconciliation between the classes of assets and liabilities and the line items presented in the statement of financial position			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Fair value disclosures								
General								
279	IFRS 13.99	Does the entity present the quantitative disclosures required by IFRS 13 in tabular format, unless another format is more appropriate			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
280	IFRS 13.98	For a liability measured at fair value and issued with an inseparable third-party credit enhancement, does the entity disclose the existence of that credit enhancement and whether it is reflected in the fair value measurement of the liability			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Assets and liabilities not measured at fair value, but for which fair value is disclosed								
281	IFRS 13.97	For each class of assets and liabilities not measured at fair value in the statement of financial position, but for which fair value is disclosed, does the entity disclose:						
	IFRS 13.93(b)	a. The level of fair value hierarchy within which the fair value measurement(s) are categorised in their entirety			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IFRS 13.93(d)	b. For fair value measurement(s) categorised within Levels 2 and 3 of the fair value hierarchy:						
		▶ A description of the valuation technique(s) and the inputs used in the measurement			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		▶ If there has been a change in valuation technique, that change and the reason(s) for making it			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IFRS 13.93(i)	c. If the highest and best use of a non-financial asset differs from its current use, that fact and why the non-financial asset is being used in a manner that differs from its highest and best use			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Recurring fair value measurements of assets and liabilities								
	IFRS 13.93(a)	<div style="border: 1px solid black; padding: 5px;"> <p>Recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position at the end of each reporting period. Non-recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position in particular circumstances (e.g., when an entity measures an asset held for sale at fair value less costs to sell in accordance with IFRS 5 because the asset's fair value less costs to sell is lower than its carrying amount).</p> </div>						
282	IFRS 13.93	For each class of assets and liabilities that are measured at fair value on a recurring basis in the statement of financial position after initial recognition, does the entity disclose:						
		a. The fair value measurement at the end of the reporting period			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	▶ If there has been a change in valuation technique, that change and the reason(s) for making it	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	▶ For fair value measurements categorised within Level 3 of the fair value hierarchy, quantitative information about the significant unobservable inputs used in the fair value measurement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 13.93(d)	An entity is not required to create quantitative information to comply with this disclosure requirement if significant unobservable inputs are not developed by the entity when measuring fair value (e.g., when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.				
	e. For fair value measurements categorised within Level 3 of the fair value hierarchy, a reconciliation from the opening balances to the closing balances disclosing separately changes during the period attributable to the following:				
	▶ Total gains and losses recognised during the period in profit or loss, and the line item(s) in profit or loss in which those gains or losses are recognised	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	▶ Total gains and losses recognised during the period in other comprehensive income, and the line item(s) in other comprehensive income in which those gains or losses are recognised	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	▶ Purchases, sales, issues and settlements (each disclosed separately)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	f. For total gains and losses recognised during the period in profit or loss in accordance with IFRS 13.93(e)(i) (see e. above), the amount that is attributable to the change in unrealised gains or losses relating to those assets and liabilities held at the end of the period, and the line item(s) in profit or loss in which those unrealised gains or losses are recognised	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	g. For fair value measurements categorised within Level 3 of the fair value hierarchy, a description of the valuation processes used by the entity (including, for example, how an entity decides its valuation policies and procedures and analyses changes in fair value measurements from period to period)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	h. For fair value measurements categorised within Level 3 of the fair value hierarchy:				
	▶ A narrative description of the sensitivity if a change in an unobservable input (including at a minimum those unobservable inputs disclosed in accordance with IFRS 13.93(d), see d. above) to a different amount might result in a significantly higher or lower fair value measurement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

IFRS 13 Appendix A	The highest and best use of a non-financial asset is the use by market participants that would maximise the value of the asset or the group of assets and liabilities (e.g., a business) within which the asset would be used.					
Non-recurring fair value measurements of assets and liabilities						
IFRS 13.93(a)	Non-recurring fair value measurements of assets or liabilities are those that other IFRSs require or permit in the statement of financial position in particular circumstances (e.g., when an entity measures an asset held for sale at fair value less costs to sell in accordance with IFRS 5 because the asset's fair value less costs to sell is lower than its carrying amount).

Financial guarantee contracts					
IFRS 9 Appendix A		A financial guarantee contract is defined as a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.			
284	IAS 1.117	Does the entity disclose its accounting policy for financial guarantee contracts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
285	IFRS 7.39	Does the entity disclose a maturity analysis for non-derivative financial liabilities (including issued financial guarantee contracts) that shows the remaining contractual maturities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B11C(c)		For issued financial guarantee contracts the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.			
286	IFRS 7.B10(c)	Does the entity disclose maximum credit risk exposure relating to financial guarantee contracts at the maximum amount the entity could have to pay if the guarantee is called on (which may be significantly greater than the amount recognised as a liability)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Financial Instruments					
IFRS 9.7.2.16		Items in this section set out the disclosure requirements if the entity adopts IFRS 9 <i>Financial Instruments</i> (2014). If an entity prepares interim financial reports in accordance with IAS 34, it need not apply the requirements in IFRS 9 to interim periods prior to the date of initial application if it is impracticable (as defined in IAS 8).			
Financial instruments					
287	IFRS 7.6	If disclosures are required by class of financial instrument, does the entity:			
		a. Group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. Provide sufficient information to permit reconciliation to the relevant items in the statement of financial position	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
IFRS 7.B1 - B3		IFRS 7.6 requires the entity to group financial instruments into classes that are appropriate to the nature of the information disclosed and that take into account the characteristics of those financial instruments. These classes are determined by the entity and, as such, are distinct from the categories of financial instruments specified in IFRS 9. In determining classes of financial instruments, an entity, at minimum: a. Distinguishes between instruments measured at amortised cost from those measured at fair value b. Treats as a separate class or classes those financial instruments outside the scope of this IFRS The entity decides how much detail it provides to satisfy the requirements, how much emphasis it places on different aspects of the requirements, and how it aggregates information to display the overall picture without combining information with different characteristics, in the light of its circumstances. It is necessary to balance between excessive detail and obscuring important information as a result of too much aggregation. For example, an entity must not obscure important information by including it among a large amount of insignificant detail. Similarly, an entity must not aggregate information so that it obscures important differences between individual transactions or associated risks.

Transfers of financial assets						
300	IFRS 7.42A	Does the entity present the disclosures required by IFRS 7.42B-42H in a single note in its financial statements	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
301	IFRS 7.42B	Does the entity disclose information that enables users of its financial statements:				
		a. To understand the relationship between transferred financial assets that are not derecognised in their entirety and the associated liabilities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. To evaluate the nature of, and risks associated with, the entity's continuing involvement in derecognised financial assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IFRS 7.42A	<p>The disclosures required by IFRS 7.42B-42H relating to transferred financial assets supplement the other disclosure requirements of IFRS 7. The entity provides these disclosures for all transferred financial assets that are not derecognised and for any continuing involvement in a transferred asset, existing at the reporting date, irrespective of when the related transfer transaction occurred.</p> <p>For these disclosures, an entity transfers all or part of a financial asset (the transferred financial asset), if it either:</p> <p>a Transfers the contractual rights to receive the cash flows of that financial asset</p> <p>Or</p> <p>b. Retains the contractual rights to receive the cash flows of that financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients in an arrangement (commonly referred to as a 'pass-through arrangement')</p> <p>Note: the meaning of 'transfer' in IFRS 7 differs from that in IFRS 9 with respect to pass-through arrangements. In particular, for pass-through arrangements to qualify as transfers under IFRS 9, all three conditions in IFRS 9.3.2.5 (commonly referred to as the pass-through conditions) need to be met. In contrast, pass-through conditions need not be met for pass-through arrangements to be within the scope of IFRS 7. Accordingly, an arrangement whereby a reporting entity (including any consolidated structured entity) issues notes payable to investors that are contractually referenced to specified assets, and are non-recourse to the group, falls within the scope of these disclosure requirements, irrespective of whether such an arrangement meets all the IFRS 9 pass-through conditions.</p>				
Transferred financial assets that are not derecognised in their entirety						
302	IFRS 7.42D	To meet the objectives in IFRS 7.42B(a) above, does the entity disclose for each class of transferred financial assets that are not derecognised in their entirety:				
		a. The nature of the transferred assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The nature of the risks and rewards of ownership to which the entity remains exposed	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	▶ The fair value of the associated liabilities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
	▶ The net position	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
	e. When the entity continues to recognise all of the transferred assets, the carrying amounts of the transferred assets and the associated liabilities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
IFRS 9.3.2.6(c) (ii) IFRS 9.3.2.16	f. When the entity continues to recognise the assets to the extent of its continuing involvement:					
	▶ The total carrying amount of the original assets before the transfer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
	▶ The carrying amount of the assets that the entity continues to recognise	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
	▶ The carrying amount of the associated liabilities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
IFRS 7.B32	These disclosures are required at each reporting date at which the entity continues to recognise the transferred financial asset, regardless of when the transfer occurred.					
	Transferred financial assets that are derecognised in their entirety					
IFRS 7.42C	For the purpose of applying the disclosure requirements of IFRS 7.42E-42H, an entity has continuing involvement in a transferred financial asset if, as part of the transfer, the entity retains any of the contractual rights or obligations inherent in the transferred financial asset or obtains any new contractual rights or obligations relating to the transferred financial asset. The following do not constitute continuing involvement:					
	a. Normal representations and warranties relating to fraudulent transfer and concepts of reasonableness, good faith and fair dealings that could invalidate a transfer as a result of legal action					
	b. Forward, option and other contracts to reacquire the transferred financial asset for which the contract price (or exercise price) is the fair value of the transferred financial asset					
	c. An arrangement whereby an entity retains the contractual rights to receive the cash flows of a financial asset, but assumes a contractual obligation to pay the cash flows to one or more entities and the conditions in IFRS 9.3.2.5(a)-(c) are met					
IFRS 7.B29 IFRS 7.B30 IFRS 7.B30A IFRS 7.B31	The assessment of continuing involvement in a transferred financial asset for the purpose of the disclosure requirements of IFRS 7.42E-42H is made at the level of the reporting entity.					
IFRS 7.B33	IFRS 7.42E-42H requires qualitative and quantitative disclosures for each type of continuing involvement in derecognised financial assets. An entity aggregates its continuing involvement into types that are representative of its exposure to risks. For example, by type of financial instrument (e.g., guarantees or call options) or by type of transfer (e.g., factoring of receivables, securitisations and secured lending).					
303	IFRS 7.42E IFRS 9.3.2.6 (a) IFRS 9.3.2.6(c) (i)	To meet the objectives in IFRS 7.42B(b), when the entity derecognises transferred financial assets in their entirety, but has continuing involvement in them, does the entity disclose for each type of continuing involvement at the reporting date:				
	a. The carrying amount of the assets and liabilities that are recognised in the entity's statement of financial position and represent the entity's continuing involvement in the derecognised financial assets, and the line items in which those assets and liabilities are recognised	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		

		Disclosure made			Comments
		Yes	No	N/A	
	b. The fair value of the assets and liabilities that represent the entity's continuing involvement in the derecognised financial assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	c. The amount that best represents the entity's maximum exposure to loss from its continuing involvement in the derecognised financial assets, and how the maximum exposure to loss is determined	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	d. The undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee for the transferred assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	Examples of cash outflows to repurchase the derecognised financial assets include the strike price in an option agreement or the repurchase price in a repurchase agreement. If the cash outflow is variable, then the amounts disclosed are based on the conditions that exist at each reporting date.				
IFRS 7.B34	e. A maturity analysis of the undiscounted cash outflows that would or may be required to repurchase the derecognised financial assets or other amounts payable to the transferee in respect of the transferred assets, showing the remaining contractual maturities of the entity's continuing involvement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 7.B34	The maturity analysis should distinguish cash flows that are required to be paid (e.g., forward contracts), cash flows that the entity may be required to pay (e.g., written put options) and cash flows that the entity might choose to pay (e.g., purchased call options).				
IFRS 7.B35	The entity uses its judgement to determine an appropriate number of time bands in preparing the maturity analysis.				
IFRS 7.B36	If there is a range of possible maturities, the cash flows are included on the basis of the earliest date on which the entity can be required or is permitted to pay.				
IFRS 7.B37	f. Qualitative information that explains and supports the quantitative disclosures in (a)-(e), that includes a description of:				
	▶ The derecognised financial assets and the nature and purpose of the continuing involvement retained after transferring those assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	▶ The risks to which an entity is exposed, including:				
	▶ A description of how the entity manages the risk inherent in its continuing involvement in the derecognised financial assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	▶ Whether the entity is required to bear losses before other parties, and the ranking and amounts of losses borne by parties whose interests rank lower than the entity's interest in the asset (i.e., its continuing involvement in the asset)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	▶ A description of any triggers associated with obligations to provide financial support or to repurchase a transferred financial asset	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 7.42F	An entity may aggregate the information required by IFRS 7.42E above for a particular asset if the entity has more than one type of continuing involvement in that derecognised financial asset, and report it under one type of continuing involvement.				
304	IFRS 7.42G	Does the entity disclose, for each reporting period for which a statement of comprehensive income is presented, for each type of continuing involvement:			
	IFRS 7.B38	a. The gain or loss recognised at the date of transfer of the assets, including:			
		▶ Whether that gain or loss on derecognition arose because the fair values of the components of the previously recognised asset (i.e., the interest in the asset derecognised and the interest retained by the entity) were different from the fair value of the previously recognised asset as a whole	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		Disclosure made			Comments

		<ul style="list-style-type: none"> ▶ If that gain or loss on derecognition arose because the fair values of the components of the previously recognised asset were different from the fair value of the previously recognised asset as a whole, whether the fair value measurements included significant inputs that were not based on observable market data 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. Income and expenses recognised, both in the reporting period and cumulatively, from the entity's continuing involvement (for example, fair value changes in derivative instruments)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. If the total amount of proceeds from transfer activity (that qualifies for derecognition) in a reporting period is not evenly distributed throughout the reporting period (for example, if a substantial proportion of the total amount of transfer activity takes place in the closing days of a reporting period):				
		<ul style="list-style-type: none"> ▶ When the greatest transfer activity took place within that reporting period (for example, the last five days before the end of the reporting period) 	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		Supplementary information				
305	IFRS 7.42H IFRS 7.B39	Does the entity disclose any additional information that it considers necessary to meet the disclosure objectives of IFRS 7.42B above	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		Collateral				
306	IFRS 7.14 IFRS 9.3.2.23 (a)	Does the entity disclose:				
		a. The carrying amount of financial assets pledged as collateral for liabilities or contingent liabilities, including amounts reclassified in accordance with IFRS 9.3.2.23(a)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The terms and conditions relating to the pledge	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IFRS 9.3.2.23 (a)	<p>If a transferor provides non-cash collateral (such as debt or equity instruments) to the transferee, the accounting for the collateral by the transferor and the transferee depends on whether the transferee has the right to sell or repledge the collateral and whether the transferor has defaulted. If the transferee has the right by contract or custom to sell or repledge the collateral, then the transferor reclassifies that asset in its statement of financial position (for example, as a loaned asset, pledged equity instrument or repurchase receivable) separately from other assets.</p> <p>Some transactions involving the provision of non-cash financial collateral may be considered transfers that fall within the scope of IFRS 7.42D (e.g., non-cash collateral transferred in a repo). This would normally be the case when: (a) the transferee's rights to control the asset are not conditional on the transferor's default. This is often evidenced by the transfer of legal ownership and/or the transferee's ability to re-sell or re-pledge the financial asset; or (b) when the arrangement is considered a pass-through arrangement.</p> <p>Collateral pledged or received subject to a netting arrangement would also fall within the scope of the offsetting disclosures irrespective of whether or not the collateral meets the offsetting criteria.</p>				
307	IFRS 7.15	If the entity holds collateral (of financial or non-financial assets) and may sell or repledge the collateral in the absence of default by the owner of the collateral, does the entity disclose:				
		a. The fair value of the collateral held	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		b. The fair value of any such collateral sold or repledged, and whether the entity has an obligation to return it	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

308	IFRS 7.16A	Does the entity disclose the loss allowance for a debt instrument measured at fair value through other comprehensive income in the notes to the financial statements		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	IFRS 7.16A	The carrying amount of financial assets measured at fair value through other comprehensive income in accordance with IFRS 9.4.1.2A is not reduced by a loss allowance and an entity should not present the loss allowance separately in the statement of financial position as a reduction of the carrying amount of the financial asset.					
		Compound financial instruments with multiple embedded derivatives					
309	IFRS 7.17	If the entity issued an instrument that contains both a liability and an equity component and the instrument has multiple embedded derivatives whose values are interdependent (such as a callable convertible debt instrument), does the entity disclose the existence of those features		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		Defaults and breaches					
310	IFRS 7.18	For loans payable recognised at the end of the reporting period, does the entity disclose:					
		a. Details of any defaults during the period of principal, interest, sinking fund, or redemption terms of those loans payable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
		b. The carrying amount of the loans payable in default at the end of the reporting period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
		c. Whether the default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>		
311	IFRS 7.19	If, during the reporting period, there are breaches of loan agreement terms other than those described in IFRS 7.18, does the entity disclose the same information as required by IFRS 7.18 if those breaches permit the lender to demand accelerated repayment (unless the breaches were remedied, or the terms of the loan were renegotiated, on or before the end of the reporting period)		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		Statement of comprehensive income					
		Items of income, expense, gains and losses

		Hedge accounting				
322	<i>IFRS 7.21A</i>	Does the entity apply the disclosure requirements in IFRS 7.21B-24F for those risk exposures that an entity hedges and for which it elects to apply hedge accounting. Hedge accounting disclosures must provide information about:

	<i>IFRS 7.21B</i>	An entity must present the required disclosures in a single note or separate section in its financial statements. However, an entity need not duplicate information that is already presented elsewhere, provided that it is incorporated by cross-reference from the financial statements to some other statement, such as a management commentary or risk report that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete.				
	<i>IFRS 7.21D</i>	To meet the objectives of paragraph 21A, an entity must (except as otherwise specified below) determine how much detail to disclose, how much emphasis to place on different aspects of the disclosure requirements, the appropriate level of aggregation or disaggregation, and whether users of financial statements need additional explanations to evaluate the quantitative information disclosed. However, an entity must use the same level of aggregation or disaggregation that it uses for the disclosure requirements of related information in IFRS 9 and IFRS 13.				
	<i>IFRS 7.21C</i>	When paragraphs 22A-24F require the entity to separate by risk category the information disclosed, the entity must determine each risk category on the basis of the risk exposures it decides to hedge and for which hedge accounting is applied. The entity must determine risk categories consistently for all hedge accounting disclosures.				
323	<i>IFRS 7.22A</i>	Does the entity explain its risk management strategy for each risk category of risk exposures that it decides to hedge and for which hedge accounting is applied. This explanation should enable users of financial statements to evaluate (for example):				
		a. How each risk arises	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

		Disclosure made			Comments
		Yes	No	N/A	
					b. How the entity manages each risk; this includes whether the entity hedges an item in its entirety for all risks or hedges a risk component (or components) of an item and why
					c. The extent of risk exposures that the entity manages
324	IFRS 7.22B				To meet the requirements in IFRS 7.22A, does the entity provide information that includes (but is not limited to) a description of:

					b. How the entity determines the economic relationship between the hedged item and the hedging instrument for the purpose of assessing hedge effectiveness
					c. How the entity establishes the hedge ratio and what the sources of hedge ineffectiveness are
325	IFRS 7.22C IFRS 9.6.3.7				When an entity designates a specific risk component as a hedged item (see IFRS 9.6.3.7) does the entity provide, in addition to the disclosures required by IFRS 7. 22A and 22B, qualitative or quantitative information about:
					a. How it determined the risk component that is designated as the hedged item (including a description of the nature of the relationship between the risk component and the item as a whole)
					b. How the risk component relates to the item in its entirety (e.g., the designated risk component historically covered on average 80% of the changes in fair value of the item as a whole)
326	IFRS 7.23A				Unless exempted by IFRS 7.23C, does the entity disclose, by risk category, quantitative information to allow users of its financial statements to evaluate the terms and conditions of hedging instruments and how they affect the amount, timing and uncertainty of future cash flows of the entity
327	IFRS 7.23B				To meet the requirement in IFRS 7.23A, does the entity provide a breakdown that discloses:
					a. A profile of the timing of the nominal amount of the hedging instrument
					b. If applicable, the average price or rate (e.g., strike or forward prices, etc.) of the hedging instrument
328	IFRS 7.23C				In situations in which an entity frequently resets (i.e., discontinues and restarts) hedging relationships because both the hedging instrument and the hedged item frequently change (i.e., the entity uses a dynamic process in which both the exposure and the hedging instruments used to manage that exposure do not remain the same for long – such as in the example in IFRS 9.B6.5.24(b)) the entity is exempt from providing the disclosures required by IFRS 7.23A and 23B. In such a situation, does the entity disclose:
					a. Information about the ultimate risk management strategy in relation to those hedging relationships
					b. A description of how it reflects its risk management strategy by using hedge accounting and designating those particular hedging relationships
					c. An indication of how frequently the hedging relationships are discontinued and restarted as part of the entity's process in relation to those hedging relationships
329	IFRS 7.23D				Does the entity disclose by risk category a description of the sources of hedge ineffectiveness that are expected to affect the hedging relationship during its term
330	IFRS 7.23E				If other sources of hedge ineffectiveness emerge in a hedging relationship, does the entity disclose those sources by risk category and explain the resulting hedge ineffectiveness
331	IFRS 7.23F				For cash flow hedges, does the entity disclose a description of any forecast transaction for which hedge accounting had been used in the previous period, but which is no longer expected to occur

		Nature and extent of risk arising from financial instruments			
	IFRS 7.32	The disclosures required by IFRS 7.33-42 focus on the risks that arise from financial instruments and how they have been managed. These risks typically include, but are not limited to, credit risk, liquidity risk and market risk.

Without the information incorporated by cross-reference, the financial statements are incomplete.			
	IFRS 7.32A	Qualitative disclosures in combination with quantitative disclosures enable users to gain an understanding of the nature and extent of risks arising from financial instruments and evaluate the entity's exposure to risk.

		Qualitative disclosures			
349	IFRS 7.33	For each type of risk arising from financial instruments, does the entity disclose:			
		a. The exposures to risk and how they arise	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	IFRS 7.B7 IAS 8.10	If the entity uses several methods to manage a risk or an exposure, the entity must disclose information using the method or methods that provide most relevant and reliable information. IAS 8.10 also discusses relevance and reliability.			
		b. The disclosures required by IFRS 7.35A-42 below to the extent they are not provided in accordance with (a)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		c. Concentrations of risk if not apparent from the disclosures made in accordance with (a) and (b)			
	IFRS 7.B8	For concentrations of risk, does the entity disclose:			
		▶ How management determines concentrations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ The shared characteristic that identifies each concentration (e.g., counterparty, geographical area, currency and/or market)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		▶ The amount of the risk exposure associated with all financial instruments sharing that characteristic	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	IFRS 7.B8 IFRS 7.IG18	Concentrations of risk arise from financial instruments that have similar characteristics and are affected similarly by changes in economic or other conditions. The identification of concentrations of risk requires judgement taking into account the circumstances of the entity (see IFRS 7.IG18).			
	IFRS 7.IG19	In accordance with IFRS 7.B8, disclosure of concentrations of risk includes the shared characteristic that identifies each concentration. For example, the shared characteristic may refer to geographical distribution of counterparties by groups of countries, individual countries or regions within countries.			
351	IFRS 7.35	If the quantitative data disclosed as at the end of the reporting period are unrepresentative of the entity's exposure to risk during the period, does the entity provide further information that is representative			
	IFRS 7.IG20	To meet this requirement, the entity might disclose the highest, lowest and average amount of risk to which it was exposed during the reporting period. For example, if an entity typically has a large exposure to a particular currency, but at the end of the reporting period unwinds the position, the entity might disclose a graph that shows the exposure at various times during the reporting period, or disclose the highest, lowest and average exposures.

Quantitative and qualitative information that allows users of financial statements to evaluate the amounts in the financial statements arising from expected credit losses, including changes in the amount of expected credit losses and the reasons for those changes</p> <p>c. Information about an entity's credit risk exposure (i.e., the credit risk inherent in an entity's financial assets and commitments to extend credit) including significant credit risk concentrations</p>						
	IFRS 7.35C	<p>An entity need not duplicate information that is already presented elsewhere, provided that the information is incorporated by cross-reference from the financial statements to other statements, such as a management commentary or risk report that is available to users of the financial statements on the same terms as the financial statements and at the same time. Without the information incorporated by cross-reference, the financial statements are incomplete</p>						
	IFRS 7.35D	<p>To meet the objectives in paragraph 35B, an entity shall (except as otherwise specified) consider how much detail to disclose, how much emphasis to place on different aspects of the disclosure requirements, the appropriate level of aggregation or disaggregation, and whether users of financial statements need additional explanations to evaluate the quantitative information disclosed.</p>						
352	IFRS 7.35E	<p>If the disclosures provided in accordance with IFRS 7.35F-35N are insufficient to meet the objectives in IFRS 7.35B, does the entity disclose additional information that is necessary to meet those objectives</p>			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

353	IFRS 7.35F	<p>An entity must explain its credit risk management practices and how they relate to the recognition and measurement of expected credit losses. To meet this objective, does the entity disclose information that enables users of financial statements to understand and evaluate:</p> <p>a. How an entity determined whether the credit risk of financial instruments has increased significantly since initial recognition, including, if and how:</p> <p>▶ Financial instruments are considered to have low credit risk in accordance with IFRS 9.5.5.10, including the classes of financial instruments to which it applies</p> <p>▶ The presumption in IFRS 9.5.5.11, that there have been significant increases in credit risk since initial recognition when financial assets are more than 30 days past due, has been rebutted</p> <p>b. IFRS 7.B8A	<p>IFRS 7.35F(b) requires the disclosure of information about how an entity has defined default for different financial instruments and the reasons for selecting those definitions. In accordance with IFRS 9.5.5.9, the determination of whether lifetime expected credit losses should be recognised is based on the increase in the risk of a default occurring since initial recognition. Information about an entity's definitions of default that will assist users of financial statements in understanding how an entity has applied the expected credit loss requirements in IFRS 9 may include:</p> <p>a. The qualitative and quantitative factors considered in defining default</p> <p>b. Whether different definitions have been applied to different types of financial instruments</p> <p>c. Assumptions about the cure rate (i.e., the number of financial assets that return to a performing status) after a default occurred on the financial asset</p>				
	c. How the instruments were grouped if expected credit losses were measured on a collective basis	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	d. How an entity determined that financial assets are credit-impaired financial assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	e. An entity's write-off policy, including the indicators that there is no reasonable expectation of recovery and information about the policy for financial assets that are written-off but are still subject to enforcement activity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	f. How the requirements in IFRS 9.5.5.12 for the modification of contractual cash flows of financial assets have been applied, including how an entity:				
	▶ Determines whether the credit risk on a financial asset that has been modified while the loss allowance was measured at an amount equal to lifetime expected credit losses, has improved to the extent that the loss allowance reverts to being measured at an amount equal to 12-month expected credit losses in accordance with IFRS 9.5.5.5	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	▶ Monitors the extent to which the loss allowance on financial assets meeting the criteria in (i) is subsequently remeasured at an amount equal to lifetime expected credit losses in accordance with IFRS 9.5.5.3	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 7.B8B	<p>To assist users of financial statements in evaluating an entity's restructuring and modification policies, IFRS 7.35F(f)(ii) requires the disclosure of information about how an entity monitors the extent to which the loss allowance on financial assets previously disclosed in accordance with IFRS 7.35F(f)(i) are subsequently measured at an amount equal to lifetime expected credit losses in accordance with IFRS 9.5.5.3.</p> <p>Quantitative information that will assist users in understanding the subsequent increase in credit risk of modified financial assets may include information about modified financial assets meeting the criteria in IFRS 7.35F(f)(i), for which the loss allowance has reverted to being measured at an amount equal to lifetime expected credit losses (i.e., a deterioration rate).</p>

	An entity must explain the inputs, assumptions and estimation techniques used to apply the requirements of IFRS 9.5.5. For this purpose, does the entity disclose:

IFRS 7.B8C		IFRS 7.35G(a) requires the disclosure of information about the basis of inputs and assumptions and the estimation techniques used to apply the impairment requirements in IFRS 9. An entity's assumptions and inputs used to measure expected credit losses or determine the extent of increases in credit risk since initial recognition may include information obtained from internal historical information or rating reports and assumptions about the expected life of financial instruments and the timing of the sale of collateral.				
		b. How forward-looking information has been incorporated into the determination of expected credit losses, including the use of macroeconomic information	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

355	IFRS 7.35H	To explain the changes in the loss allowance and the reasons for those changes, does the entity provide, by class of financial instrument, a reconciliation from the opening balance to the closing balance of the loss allowance, in a table, showing separately the changes during the period for:

		▶ Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		▶ Trade receivables, contract assets or lease receivables for which the loss allowances are measured in accordance with IFRS 9.5.5.15	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
		c. Financial assets that are purchased or originated credit-impaired. In addition to the reconciliation, an entity must disclose the total amount of undiscounted expected credit losses at initial recognition on financial assets initially recognised during the reporting period	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 7.B8D		In accordance with IFRS 7.35H, an entity is required to explain the reasons for the changes in the loss allowance during the period. In addition to the reconciliation from the opening balance to the closing balance of the loss allowance, it may be necessary to provide a narrative explanation of the changes. This narrative explanation may include an analysis of the reasons for changes in the loss allowance during the period, including:				
		a. The portfolio composition

		c. The severity of the expected credit losses

IFRS 7.B8F		IFRS 7.35K requires the disclosure of information that will enable users of financial statements to understand the effect of collateral and other credit enhancements on the amount of expected credit losses. An entity is neither required to disclose information about the fair value of collateral and other credit enhancements nor is it required to quantify the exact value of the collateral that was included in the calculation of expected credit losses (i.e., the loss given default).			
IFRS 7.B8G		<p>A narrative description of collateral and its effect on amounts of expected credit losses might include information about:</p> <ul style="list-style-type: none"> a. IFRS 7.35N	For trade receivables, contract assets and lease receivables to which an entity applies IFRS 9.5.5.15, the information provided in accordance with IFRS 7.35M may be based on a provision matrix (see IFRS 9.B5.5.35).				
IFRS 7.B8H	IFRS 7.35M requires the disclosure of information about an entity's credit risk exposure and significant concentrations of credit risk at the reporting date. A concentration of credit risk exists when a number of counterparties are located in a geographical region or are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. An entity should provide information that enables users of financial statements to understand whether there are groups or portfolios of financial instruments with particular features that could affect a large portion of that group of financial instruments such as concentration to particular risks. This could include, for example, loan-to-value groupings, geographical, industry or issuer-type concentrations.				
IFRS 7.B8I	The number of credit risk rating grades used to disclose the information in accordance with IFRS 7.35M must be consistent with the number that the entity reports to key management personnel for credit risk management purposes. If past due information is the only borrower-specific information available and an entity uses past due information to assess whether credit risk has increased significantly since initial recognition in accordance with IFRS 9.5.5.10, the entity must provide an analysis by past due status for those financial assets.				
IFRS 7.B8J	When an entity has measured expected credit losses on a collective basis, the entity may not be able to allocate the gross carrying amount of individual financial assets or the exposure to credit risk on loan commitments and financial guarantee contracts to the credit risk rating grades for which lifetime expected credit losses are recognised. In that case:

	IFRS 7.B9	<p>IFRS 7.36(a) requires disclosure of the amount that best represents the entity's maximum exposure to credit risk. Any impairment losses recognised in accordance with IFRS 9</p>

	IFRS 7.B11	<p>In preparing the maturity analyses in IFRS 7.39(a) and (b), the entity uses its judgement to determine appropriate time bands.</p> <p>In preparing the maturity analyses, the entity does not separate an embedded derivative from a hybrid (combined) financial instrument. For such instruments, the entity shall apply IFRS 7.39(a).</p> <p>If the counterparty has a choice of when an amount is paid, the liability is included on the earliest date on which the entity can be required to pay. For example, financial liabilities that an entity must repay on demand (such as demand deposits) are included in the earliest time band. If the entity is committed to make amounts available in instalments, each instalment is allocated to the earliest period in which the entity can be required to pay. For example, an undrawn loan commitment is included in the time band containing the earliest date on which it can be drawn down.</p> <p>For issued guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.</p> <p>The amounts in the maturity analysis are the contractual undiscounted cash flows. Some relevant examples may be gross lease liabilities (before deducting finance charges), prices specified in forward agreements to purchase financial assets for cash, net amounts for pay-floating/receive-fixed interest rate swaps for which net cash flows are exchanged, and contractual amounts to be exchanged in a derivative financial instrument (e.g., a currency swap) for which gross cash flows are exchanged and gross loan commitments. Such undiscounted cash flows differ from the amount included in the statement of financial position because the statement of financial position amount is based on discounted cash flows.</p> <p>If the amount payable is not fixed, the entity discloses the amount based on the conditions existing at the end of the reporting period. For example, if the amount payable varies with changes in an index, the amount disclosed may be based on the level of the index at the end of the reporting period.</p>

	IFRS 7.B11E				The entity discloses a maturity analysis of financial assets it holds for managing liquidity risk (e.g., financial assets that are readily saleable or expected to generate cash inflows to meet cash outflows on financial liabilities), if that information is necessary to enable users of its financial statements to evaluate the nature and extent of liquidity risk.

	Sensitivity analysis				
IFRS 7. B21	An entity must provide sensitivity analyses for the whole of its business, but may provide different types of sensitivity analyses for different classes of financial instruments.				
IFRS 7.B22	Interest rate risk Interest rate risk arises on interest-bearing financial instruments recognised in the statement of financial position (e.g., debt instruments acquired or issued) and on some financial instruments not recognised in the statement of financial position (e.g., some loan commitments).				
IFRS 7.B23-B24	Currency risk Currency risk does not arise from financial instruments that are non-monetary items or from financial instruments denominated in the functional currency. An entity discloses a sensitivity analysis for each currency to which it has significant exposure.				
IFRS 7.B25-B28	Other price risk Other price risk arises on financial instruments because of changes in, for example, commodity prices or equity prices. To comply with IFRS 7.40, the entity might disclose the effect of a decrease in a specified stock market index, commodity price, or other risk variable. For example, if an entity gives residual value guarantees that are financial instruments, the entity discloses an increase or decrease in the value of the assets to which the guarantee applies.

		<p>Two examples of financial instruments that give rise to equity price risk are a holding of equities in another entity and an investment in a trust, which, in turn, holds investments in equity instruments. The fair values of such financial instruments are affected by changes in the market price of the underlying equity instruments.</p> <p>Under IFRS 7.40(a), an entity discloses the sensitivity of profit or loss separately from the sensitivity of equity. For example, the sensitivity from instruments classified as at fair value through profit or loss is disclosed separately from the sensitivity of instruments whose changes in fair value are presented in other comprehensive income.</p> <p>Financial instruments that the entity classifies as equity instruments are not remeasured. Neither profit or loss or equity will be affected by the equity price risk of those instruments. Accordingly, no sensitivity analysis is required.</p>					
365	IFRS 7.40	Unless the entity complies with IFRS 7.41 below, does the entity disclose:					
	IFRS 7.IG33	a. 	IFRS 7.IG34	b. The methods and assumptions used in preparing the sensitivity analysis			<input type="checkbox"/>		
		c. Changes from the previous period in the methods and assumptions used and reasons for such changes			<input type="checkbox"/>		
	IFRS 7.B17	In accordance with IFRS 7.B3, the entity decides how it aggregates information to display the overall picture without combining information with the different characteristics of exposures to risks from significantly different economic environments. If the entity is exposed to only one type of market risk in only one economic environment, it does not show disaggregated information.					
	IFRS 7.B18	For the purpose of this sensitivity analysis:					
		a. Entities disclose the effect on profit or loss and equity at the end of the reporting period, assuming that a reasonably possible change in the relevant risk variable had occurred at the end of the reporting period and had been applied to the risk exposures in existence at that date. For example, if an entity has a floating rate liability at the end of the year, the entity would disclose the effect on profit or loss (i.e., interest expense) for the current year if interest rates had varied by reasonably possible amounts					
		b. Entities are not required to disclose the effect on profit or loss and equity for each change within a range of reasonably possible changes of the relevant risk variable. Disclosure of the effects of the changes at the limits of the reasonably possible range are sufficient					
	IFRS 7.B19	In determining what a reasonably possible change in the relevant risk variable is, the entity considers the following:					
		a. The economic environments in which it operates. A reasonably possible change does not include remote or worst case scenarios or stress tests. Moreover, if the rate of change in the underlying risk variable is stable, the entity need not alter the chosen reasonably possible change in the risk variable. For example, assume that interest rates are 5% and an entity determines that a fluctuation in interest rates of ±50 basis points is reasonably possible. It would disclose the effect on profit or loss and equity if interest rates were to change to 4.5% or 5.5%. In the next period, interest rates have increased to 5.5%. The entity continues to believe that interest rates may fluctuate by ±50 basis points (i.e., the rate of change in interest rates is stable). The entity discloses the effect on profit or loss and equity if interest rates were to change to 5% or 6%. The entity is not required to revise its assessment that interest rates might reasonably

If the entity uses such a sensitivity analysis, does the entity also explain:</p> <p>a. Entities might also disclose the historical observation period and weightings applied to observations within that period, an explanation of how options are dealt with in the calculations, and which volatilities and correlations (or, alternatively, Monte Carlo probability distribution simulations) are used.</p>

493	IFRS 15.105	Does the entity present any unconditional rights to consideration separately from contract assets as a receivable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

		Disclosure made			Comments		
		Yes	No	N/A			
IFRS 15.108	A receivable is an entity's right to consideration that is unconditional. A right to consideration is unconditional if only the passage of time is required before payment of that consideration is due. For example, an entity would recognise a receivable if it has a present right to payment even though that amount may be subject to refund in the future. An entity must account for a receivable in accordance with IFRS 9.						
494	IFRS 15.108	Upon initial recognition of a receivable from a contract with a customer, does the entity present any difference between the measurement of the receivable in accordance with IFRS 9 and the corresponding amount of revenue as an expense (for example, as an impairment loss)		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
495	IFRS 15.107	If the entity performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, does the entity present the contract as a contract asset, excluding any amounts presented as a receivable		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 15.107	A contract asset is an entity's right to consideration in exchange for goods or services that the entity has transferred to a customer. An entity must assess a contract asset for impairment in accordance with IFRS 9. An impairment of a contract asset shall be measured, presented and disclosed on the same basis as a financial asset that is within the scope of IFRS 9 - see also IFRS15.113(b).						
496	IFRS 15.106	If a customer pays consideration, or the entity has a right to an amount of consideration that is unconditional (i.e., a receivable), before the entity transfers a good or service to the customer, does the entity present the contract as a contract liability when the payment is made or the payment is due (whichever is earlier)		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 15.106	A contract liability is an entity's obligation to transfer goods or services to a customer for which the entity has received consideration (or an amount of consideration is due) from the customer.						
497	IFRS 15.109	If the entity uses an alternative description for a contract asset, does the entity provide sufficient information for a user of the financial statements to distinguish between receivables and contract assets		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 15.109	IFRS 15 uses the terms 'contract asset' and 'contract liability', but does not prohibit an entity from using alternative descriptions in the statement of financial position for those items.						
The existence of a significant financing component in the contract							
498	IFRS 15.65	Does the entity present the effects of financing (interest revenue or interest expense) separately from revenue from contracts with customers in the statement of comprehensive income		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 15.65	Interest revenue or interest expense is recognised only to the extent that a contract asset (or receivable) or a contract liability is recognised in accounting for a contract with a customer.						
Sale with a right of return							
499	IFRS 15.B25	Does the entity present the asset for an entity's right to recover products from a customer on settling a refund liability separately from the refund liability		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
IFRS 15.B25	An asset recognised for an entity's right to recover products from a customer on settling a refund liability shall initially be measured by reference to the former carrying amount of the product (for example, inventory) less any expected costs to recover those products (including potential decreases in the value to the entity of returned products). At the end of each reporting period, an entity must update the measurement of the asset arising from changes in expectations about products to be returned.

Disclosures					
IFRS 15.110		The objective of the disclosure requirements in IFRS 15 is for an entity to disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers.			
IFRS 15.111		An entity must consider the level of detail necessary to satisfy the disclosure objective and how much emphasis to place on each of the various requirements. An entity must aggregate or disaggregate disclosures so that useful information is not obscured by either the inclusion of a large amount of insignificant detail or the aggregation of items that have substantially different characteristics.			
IFRS 15.112		An entity need not disclose information in accordance with IFRS 15 if it has provided the information in accordance with another standard.			
500	IFRS 15.110	To achieve the disclosure objective stated in IFRS 15.110, does the entity disclose qualitative and quantitative information about all of the following:			
		a. Its contracts with customers (see IFRS 15.113-122)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. The significant judgements, and changes in the judgements, made in applying IFRS 15 to those contracts (see IFRS 15.123-126)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		c. Any assets recognised from the costs to obtain or fulfil a contract with a customer in accordance with IFRS 15.91 or IFRS 15.95 (see IFRS 15.127-128)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Contracts with customers					
501	IFRS 15.113	Does the entity disclose all of the following amounts for the reporting period unless those amounts are presented separately in the statement of comprehensive income in accordance with other standards:			
		a. Revenue recognised from contracts with customers, which the entity must disclose separately from its other sources of revenue	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		b. Any impairment losses recognised (in accordance with IFRS 9) on any receivables or contract assets arising from the entity's contracts with customers, which the entity must disclose separately from impairment losses from other contracts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Disaggregation of revenue					
502	IFRS 15.114	Does the entity disaggregate revenue recognised from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors			<input type="checkbox"/>
	IFRS 15.B87	IFRS 15.114 requires an entity to disaggregate revenue from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. Consequently, the extent to which an entity's revenue is disaggregated for the purposes of this disclosure depends on the facts and circumstances that pertain to the entity's contracts with customers. Some entities may need to use more than one type of category to meet the objective in IFRS 15.114 for disaggregating revenue. Other entities may meet the objective by using only one type of category to disaggregate revenue.			
	IFRS 15.B88	When selecting the type of category (or categories) to use to disaggregate revenue, an entity must consider how information about the entity's revenue has been presented for other purposes, including all of the following:			
		a. Disclosures presented outside the financial statements (for example, in earnings releases, annual reports or investor presentations)

Each of those physical changes has a direct relationship to future economic benefits. A change in fair value of a biological asset due to harvesting is also a physical change.				
		Disclosure when fair value cannot be measured reliably				
	IAS 41.30	There is a presumption that fair value can be measured reliably for a biological asset. However, that presumption can be rebutted only on initial recognition for a biological asset for which quoted market prices are not available and for which alternative fair value measurements are determined to be clearly unreliable. In such a case, that biological asset shall be measured at its cost less any accumulated depreciation and any accumulated impairment losses. Once the fair value of such a biological asset becomes reliably measurable, an entity shall measure it at its fair value less costs to sell. Once a non-current biological asset meets the criteria to be classified as held for sale (or is included in a disposal group that is classified as held for sale) in accordance with IFRS 5, it is presumed that fair value can be measured reliably.				
536	IAS 41.54 IAS 41.30	If the entity measures biological assets at their cost less any accumulated depreciation and any accumulated impairment losses at the end of the period (because fair value cannot be measured reliably), does the entity disclose the following information for such biological assets:

IFRS 4.39A	To comply with the requirements to disclose information about the sensitivity to insurance risk does the entity disclose either:

Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts (Amendments to IFRS 4)					
IFRS 4.20A IFRS 4.35B	Items in this section set out the presentation and disclosure requirements if the entity adopts either the temporary exemption from IFRS 9 (2014) or the overlay approach applying <i>IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts</i> issued in September 2016. The temporary exemption enables eligible entities to defer the implementation date of IFRS 9 until annual reporting periods beginning on or after 1 January 2023. The overlay approach allows an entity applying IFRS 9 from 2018 onwards to remove from profit or loss the effects of some of the accounting mismatches that may occur from applying IFRS 9 before IFRS 17 is applied.

		IFRS 17.127	Concentrations of financial risk might arise, for example, from interest-rate guarantees that come into effect at the same level for a large number of contracts. Concentrations of financial risk might also arise from concentrations of non-financial risk, for example, if an entity provides product liability protection to pharmaceutical companies and also holds investments in those companies.				
			Insurance and market risks—sensitivity analysis				
New	655	IFRS 17.128	An entity shall disclose information about sensitivities to changes in risk variable arising from contracts within the scope of IFRS 17. To comply with this requirement, does it disclose:				
			a. A sensitivity analysis that shows how profit or loss and equity would have been affected by changes in risk variable that were reasonably possible at the end of the reporting period:				
			▶ For insurance risk—showing the effect for insurance contracts issued, before and after risk mitigation by reinsurance contracts held	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			▶ For each type of market risk – in a way that explains the relationship between the sensitivities to changes in risk variable arising from insurance contracts and those arising from financial assets held by the entity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			b. The methods and assumptions used in preparing the sensitivity analysis	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

New	656	IFRS 17.129	If an entity prepares a sensitivity analysis that shows how amounts different from those specified in IFRS 17.128(a) are affected by changes in risk variable and uses that sensitivity analysis to manage risks arising from contracts within the scope of IFRS 17, in place of the analysis specified in IFRS 17.128(a), does it also disclose:				
			a. An explanation of both the method used in preparing such a sensitivity analysis and the main parameters and assumptions underlying the information provided	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			b. An explanation of the objective of the method used and any limitations that may result in the information provided	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

		IFRS 17.130	The disclosure about claims development shall start with the period when the earliest material claim(s) arose and for which there is still uncertainty about the amount and timing of the claims payments at the end of the reporting period, but the disclosure is not required to start more than 10 years before the end of the reporting period. The entity is not required to disclose information about the development of claims for which uncertainty about the amount and timing of the claims payments is typically resolved within one year.

			a. The amount that best represents its maximum exposure to credit risk at the end of the reporting period, separately for insurance contracts issued and reinsurance contracts held	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			b. Information about the credit quality of reinsurance contracts held that are assets	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Liquidity risk – other information							
New	660	IFRS 17.132	For liquidity risk arising from contracts within the scope of IFRS 17, does the entity disclose:				
			a. A description of how it manages the liquidity risk	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			b. Separate maturity analyses for portfolios of insurance contracts issued that are liabilities and portfolios of reinsurance contracts held that are liabilities that show, as a minimum, net cash flows of the portfolios for each of the first five years after the reporting date and, in aggregate, beyond the first five years	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
			An entity is not required to include in these analyses liabilities for remaining coverage measured applying IFRS 17.55-59 and 69-70A. The analyses may take the form of:				
			a. An analysis, by estimated timing, of the remaining contractual undiscounted net cash flows				
			Or				
			b. An analysis, by estimated timing, of the estimates of the present value of the future cash flows				
			c. The amounts that are payable on demand, explaining the relationship between such amounts and the carrying amount of the related portfolios of contracts, if not disclosed applying IFRS 17.132(b)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
