IFRS Core Tools

IFRS Update of standards and interpretations in issue at 30 June 2022

Building a better working world

Contents

Introduction

Entities reporting under International Financial Reporting Standards (IFRS) continue to face a steady flow of new standards and interpretations. The resulting changes range from significant amendments of fundamental principles to some minor changes from the annual improvements process (AIP). They will affect different areas of accounting, such as recognition, measurement, presentation and disclosure.

Some of the changes have implications that go beyond matters of accounting, also potentially impacting the information systems of many entities. Furthermore, the changes may impact business decisions, such as the creation of joint arrangements or the structuring of particular transactions.

The challenge for preparers is to gain an understanding of what lies ahead.

Purpose of this publication

This publication provides an overview of the upcoming changes in standards and interpretations (pronouncements). It also provides an update on selected active projects. It does not attempt to provide an in-depth analysis or discussion of the topics. Rather, the objective is to highlight key aspects of these changes. Reference should be made to the text of the pronouncements before taking any decisions or actions.

This publication consists of three sections:

Section 1 provides a high-level overview of the key requirements of each pronouncement issued by the International Accounting Standards Board (IASB or the Board) and the IFRS Interpretations Committee (IFRS IC) as at 30 June 2022 that will be effective for the first-time for reporting periods ended at that date or thereafter. This overview provides a summary of the transitional requirements and a brief discussion of the potential impact that the changes may have on an entity's financial statements.

A table comparing mandatory application for different year ends is presented at the beginning of Section 1. In the table, the pronouncements are presented in order of their effective dates. Note that many pronouncements contain provisions that would allow entities to adopt in earlier periods.

When a standard or interpretation has been issued but has yet to be applied by an entity, IAS 8 *Accounting Policies, Changes in Accounting Estimates and* Errors requires the entity to either disclose any known (or reasonably estimable) information relevant to understanding the possible impact that the new pronouncement will have on the financial statements, or indicate the reason for not doing so. The table at the beginning of Section 1 is helpful in identifying the pronouncements that fall within the scope of this disclosure requirement.

Section 2 provides a summary of the agenda decisions published in the *IFRIC Update*[1] since 1 April 2022. For agenda decisions published before 1 April 2022, please refer to previous editions of *IFRS Update*. In some agenda decisions, the IFRS IC refers to the existing pronouncements that provide adequate guidance. These agenda decisions provide a view on the application of the pronouncements and fall within 'other accounting literature and accepted industry practices' in paragraph 12 of IAS 8. IFRS standards are required to be applied reflecting the explanatory material contained in agenda decisions.

Section 3 summarises the key features of selected active projects of the IASB. The 'Key projects' addressed are those initiated with the objective of issuing new standards and those involving overarching considerations across a number of standards. 'Other projects' include proposed amendments with narrower applicability. Generally, only those projects that have reached the exposure draft stage are included, but, in selected cases, significant projects that have not yet reached the exposure draft stage are also highlighted.

[1] The *IFRIC Update* is available on the IASB's website at http://www.ifrs.org/news-and-events/updates/ifric-updates

IFRS Core Tools

EY's *IFRS Core Tools*[2] provide the starting point for assessing the impact of changes to IFRS. Our *IFRS Core Tools* include a number of practical building blocks that can help the user to navigate the changing landscape of IFRS. In addition to *IFRS Update*, EY's *IFRS Core Tools* include the publications described below.

International GAAP® Disclosure Checklist

Our 2022 edition of *International GAAP® Disclosure Checklist* captures disclosure requirements applicable to periods ended 30 June 2022, and disclosures that are permitted to be adopted early. Our 2022 edition of International *GAAP® Disclosure Checklist for Interim Condensed Financial Statements* captures disclosure requirements applicable to interim reports of entities with a year-end of 31 December 2022, and disclosures that are permitted to be adopted early. These disclosure requirements are for all pronouncements issued as at 28 February 2022. This tool assists preparers to comply with the presentation and disclosure requirements of IFRS in their interim and year-end IFRS financial statements. Previous editions of this tool for earlier period ends are available on EY's *IFRS Core Tools* webpage.

Good Group (International) Limited

Good Group (International) Limited is a set of illustrative financial statements, incorporating presentation and disclosure requirements that are in issue as at 30 June 2021 and effective for the year ended 31 December 2021. *Good Group (International) Limited – Illustrative interim condensed financial statements* for the period ended 30 June 2022, based on IFRS in issue at 28 February 2022, supplements *Good Group (International) Limited – Illustrative financial statements*. Among other things, these illustrative financial statements can assist in understanding the impact accounting changes may have on the financial statements.

Good Group (International) Limited is supplemented by illustrative financial statements that are aimed at specific sectors and circumstances. These include:

- Good Group (International) Limited – Alternative Format
- Good Group (International) Limited – Agriculture: Supplement to Illustrative Consolidated Financial Statements
- Good First-time Adopter (International) Limited
- Good Investment Fund Limited (Equity)
- Good Investment Fund Limited (Liability)
- Good Real Estate Group (International) Limited
- Good Mining (International) Limited
- Good Petroleum (International) Limited
- Good Bank (International) Limited
- Good Insurance (International) Limited
- Good Life Insurance (International) Limited
- Good General Insurance (International) Limited

Also available from EY:

Other EY publications

References to other EY publications that contain further details and discussion on these topics are included throughout the *IFRS Update*, all of which can be downloaded from our website.[2]

International GAAP® 2022[3]

Our *International GAAP® 2022* is a comprehensive guide to interpreting and implementing IFRS.[4] It includes pronouncements mentioned in this publication that were issued prior to September 2021, and it provides examples that illustrate how the requirements of those pronouncements are applied.

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture - Amendments to IFRS 10 and IAS 28	8	Note 1												

* Effective for annual periods beginning on or after this date.

** Assuming that an entity has not early adopted the pronouncement according to specific provisions in the standard, interpretation or amendment.

*** In July 2021, the Board tentatively decided to defer the effective date of the 2020 amendments to no earlier than 1 January 2024.

Note 1: In December 2015, the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting.

IFRS 17 *Insurance Contracts*

Effective for annual periods beginning on or after 1 January 2023.

Background

In May 2017, the IASB issued IFRS 17 *Insurance Contracts*, a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, IFRS 17 will replace IFRS 4 *Insurance Contracts*.

In June 2020, the IASB issued amendments to IFRS 17. These amendments included changing the effective date to 2023.

In September 2017, the Board established a Transition Resource Group (TRG) for IFRS 17 to analyse implementation-related questions. The TRG met four times and while no further meetings have been scheduled, the TRG submission process remains open for stakeholders to send in questions they believe meet the TRG submission criteria.

Scope

IFRS 17 applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

Key requirements

The overall objective of IFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers.

In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies, IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of IFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

The main features of the new accounting model for insurance contracts are as follows:

- The measurement of the present value of future cash flows, incorporating an explicit risk adjustment, remeasured every reporting period (the fulfilment cash flows)
- A Contractual Service Margin (CSM) that is equal and opposite to any day one gain in the fulfilment cash flows of a group of contracts, representing the unearned profit of the insurance contracts to be recognised in profit or loss based on insurance contract services provided over the coverage period.
- Certain changes in the expected present value of future cash flows are adjusted against the CSM and thereby recognised in profit or loss over the remaining coverage period
- The effect of changes in discount rates will be reported in either profit or loss or other comprehensive income, determined by an accounting policy choice
- The presentation of insurance revenue and insurance service expenses in the statement of comprehensive income based on the concept of services provided during the period
- Amounts that are paid to a policyholder in all circumstances, regardless of whether an insured event occurs (non-distinct investment components) are not presented in the income statement, but are recognised directly on the balance sheet
- Insurance services results (earned revenue less incurred claims) are presented separately from the insurance finance income or expense
- A loss-recovery component of the asset for the remaining coverage of a group of reinsurance contracts held is determined and recorded in profit or loss when an entity recognises a recovery of a loss on initial recognition of an onerous group of underlying issued contracts as well as for subsequent measurement of the recovery of those losses
- Entities should present separately in the statement of financial position, the carrying amounts of portfolios of insurance contracts issued that are assets and those that are liabilities, with the same requirement applying to portfolios of reinsurance contracts held
- Extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts

Transition

IFRS 17 is effective for reporting periods starting on or after 1 January 2023, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 *Financial Instruments* on or before the date it first applies IFRS 17.

The Board decided on a retrospective approach for estimating the CSM on the transition date. However, if full retrospective application, as defined by IAS 8 for a group of insurance contracts, is impracticable, an entity is required to choose one of the following two alternatives:

- *Modified retrospective approach* - based on reasonable and supportable information available without undue cost and effort to the entity, certain modifications are applied to the extent full retrospective application is not possible, but still with the objective to achieve the closest possible outcome to retrospective application
- *Fair value approach* - the CSM is determined as the positive difference between the fair value determined in accordance with IFRS 13 *Fair Value Measurement* and the fulfilment cash flows (any negative difference would be recognised in retained earnings at the transition date)

Both the modified retrospective approach and the fair value approach provide transitional reliefs for determining the grouping of contracts. If an entity cannot obtain reasonable and supportable information necessary to apply the modified retrospective approach, it is required to apply the fair value approach.

Impact

IFRS 17, together with IFRS 9, will result in profound changes to the accounting in IFRS financial statements for insurance companies. This will have a significant impact on data, systems and processes used to produce information for financial reporting purposes. The new model is likely to have a significant impact on the profit and total equity of some insurance entities, resulting in increased volatility compared to today's models. Key performance indicators will also likely be affected.

Finalisation of the amendment to IFRS 17

In December 2021, the IASB amended IFRS 17 to add a transition option for a "classification overlay" to address possible accounting mismatches between financial assets and insurance contract liabilities in the comparative information presented on initial application of IFRS 17.

If an entity elects to apply the classification overlay, it can only do so for comparative periods to which it applies IFRS 17 (i.e., from transition date to the date of initial application of IFRS 17).

Reference to the Conceptual Framework – Amendments to IFRS 3

Effective for annual periods beginning on or after 1 January 2022.

Key requirements

In May 2020, the IASB issued *Amendments to IFRS 3 Business Combinations - Reference to the Conceptual Framework*. The amendments are intended to replace a reference to a previous version of the IASB's *Conceptual Framework* (the 1989 *Framework*) with a reference to the current version issued in March 2018 (the *Conceptual Framework*) without significantly changing its requirements.

The amendments add an exception to the recognition principle of IFRS 3 to avoid the issue of potential 'day 2' gains or losses arising for liabilities and contingent liabilities that would be within the scope of IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* or IFRIC 21 *Levies*, if incurred separately. The exception requires entities to apply the criteria in IAS 37 or IFRIC 21, respectively, instead of the *Conceptual Framework*, to determine whether a present obligation exists at the acquisition date.

At the same time, the amendments add a new paragraph to IFRS 3 to clarify that contingent assets do not qualify for recognition at the acquisition date.

Transition

The amendments must be applied prospectively. Earlier application is permitted if, at the same time or earlier, an entity also applies all of the amendments contained in the *Amendments to References to the Conceptual Framework in IFRS Standards* (March 2018).

Impact

The amendments are intended to update a reference to the *Conceptual Framework* without significantly changing requirements of IFRS 3. The amendments will promote consistency in financial reporting and avoid potential confusion from having more than one version of the *Conceptual Framework* in use.

Other EY publications

EYG No. 003151-20Gbl

Property, Plant and Equipment: Proceeds before Intended Use – Amendments to IAS 16

Effective for annual periods beginning on or after 1 January 2022

Key requirements

The amendment prohibits entities from deducting from the cost of an item of property, plant and equipment (PP&E), any proceeds of the sale of items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the costs of producing those items, in profit or loss.

Transition

The amendment must be applied retrospectively only to items of PP&E made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

There is no transition relief for first-time adopters.

Onerous Contracts – Costs of Fulfilling a Contract – Amendments to IAS 37

Effective for annual periods beginning on or after 1 January 2022.

Key requirements

In May 2020, the IASB issued amendments to IAS 37 to specify which costs an entity needs to include when assessing whether a contract is onerous or loss-making.

The amendments apply a 'directly related cost approach'. The costs that relate directly to a contract to provide goods or services include both incremental costs (e.g., the costs of direct labour and materials) and an allocation of costs directly related to contract activities (e.g., depreciation of equipment used to fulfil the contract as well as costs of contract management and supervision). General and administrative costs do not relate directly to a contract and are excluded unless they are explicitly chargeable to the counterparty under the contract.

Transition

The amendments must be applied prospectively to contracts for which an entity has not yet fulfilled all of its obligations at the beginning of the annual reporting period in which it first applies the amendments (the date of initial application). Earlier application is permitted and must be disclosed.

Impact

The amendments are intended to provide clarity and help ensure consistent application of the standard. Entities that previously applied the incremental cost approach will see provisions increase to reflect the inclusion of costs related directly to contract activities, whilst entities that previously recognised contract loss provisions using the guidance from the former standard, IAS 11 *Construction Contracts*, will be required to exclude the allocation of indirect overheads from their provisions. Judgement will be required in determining which costs are 'directly related to contract activities', but we believe that guidance in IFRS 15 *Revenue from Contracts with Customers* will be relevant.

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture – Amendments to IFRS 10 and IAS 28

In December 2015, the IASB decided to defer the effective date of the amendments until such time as it has finalised any amendments that result from its research project on the equity method. Early application of the amendments is still permitted.

Key requirements

The amendments address the conflict between IFRS 10 *Consolidated Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures* in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture.

The amendments clarify that a full gain or loss is recognised when a transfer to an associate or joint venture involves a business as defined in IFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognised only to the extent of unrelated investors' interests in the associate or joint venture.

Transition

The amendments must be applied prospectively. Early application is permitted and must be disclosed.

Impact

The amendments are intended to eliminate diversity in practice and give preparers a consistent set of principles to apply for such transactions. However, the application of the definition of a business is judgemental and entities need to consider the definition carefully in such transactions.

Classification of Liabilities as Current or Non-current - Amendments to IAS 1

Effective for annual periods beginning on or after 1 January 2023.

Key requirements

In January 2020, the Board issued amendments to paragraphs 69 to 76 of IAS 1 *Presentation of Financial Statements* to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification

Right to defer settlement

The Board decided that if an entity's right to defer settlement of a liability is subject to the entity complying with specified conditions, the entity has a right to defer settlement of the liability at the end of the reporting period if it complies with those conditions at that date.

Existence at the end of the reporting period

The amendments also clarify that the requirement for the right to exist at the end of the reporting period applies regardless of whether the lender tests for compliance at that date or at a later date.

Management expectations

IAS 1.75A has been added to clarify that the 'classification of a liability is unaffected by the likelihood that the entity will exercise its right to defer settlement of the liability for at least twelve months after the reporting period'. That is, management's intention to settle in the short run does not impact the classification. This applies even if settlement has occurred when the financial statements are authorised for issuance.

Meaning of the term 'settlement'

The Board added two new paragraphs (paragraphs 76A and 76B) to IAS 1 to clarify what is meant by 'settlement' of a liability. The Board concluded that it was important to link the settlement of the liability with the outflow of resources of the entity.

Settlement by way of an entity's own equity instruments is considered settlement for the purpose of classification of liabilities as current or non-current, with one exception.

In cases where a conversion option is classified as a liability or part of a liability, the transfer of equity instruments would constitute settlement of the liability for the purpose of classifying it as current or non-current. Only if the conversion option itself is classified as an equity instrument would settlement by way of own equity instruments be disregarded when determining whether the liability is current or non-current.

Unchanged from the current standard, a rollover of a borrowing is considered the extension of an existing liability and is therefore not considered to represent 'settlement'.

Transition and impact

Many entities will find themselves already in compliance with the amendments. However, entities need to consider whether some of the amendments may impact their current practice. Entities need to carefully consider whether there are any aspects of the amendments that suggest that terms of their existing loan agreements should be renegotiated. In this context, it is important to highlight that the amendments must be applied retrospectively.

Proposed amendments

In November 2021, the Board published an exposure draft in which it proposed that if a right to defer settlement for at least twelve months is subject to an entity complying with conditions after the reporting date, those conditions do not affect whether the right to defer settlement exists at the reporting date for the purpose of classifying a liability as current or non-current. Additional presentation and disclosure requirements would be applicable in such circumstances, including presenting non-current liabilities that are subject to covenants to be complied with within twelve months after the reporting period, separately in the statement of financial position.

Furthermore, the Board proposed to defer the effective date to no earlier than 1 January 2024 (from 1 January 2023).

In June 2022, the Board discussed the feedback on the exposure draft and the direction of the project. The Board will discuss the effective date of the proposed amendments, as well as their compliance with applicable due process steps, at a future meeting. The next milestone is for the Board to issue the amendments, which is expected in Q4 2022.

Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2

Effective for annual periods beginning on or after 1 January 2023.

Key requirements

In February 2021, the Board issued amendments to IAS 1 and IFRS Practice Statement 2 *Making Materiality Judgements* (the PS), in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures.

The amendments aim to help entities provide accounting policy disclosures that are more useful by:

- Replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies

And

- Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

Replacement of the term 'significant' with 'material'

In the absence of a definition of the term 'significant' in IFRS, the Board decided to replace it with 'material' in the context of disclosing accounting policy information. 'Material' is a defined term in IFRS and is widely understood by the users of financial statements, according to the Board.

In assessing the materiality of accounting policy information, entities need to consider both the size of the transactions, other events or conditions and the nature of them.

Examples of circumstances in which an entity is likely to consider accounting policy information to be material have been added.

Disclosure of standardised information

Although standardised information is less useful to users than entity-specific accounting policy information, the Board agreed that, in some circumstances, standardised accounting policy information may be needed for users to understand other material information in the financial statements. In those situations, standardised accounting policy information is material, and should be disclosed.

The amendments to the PS also provide examples of situations when generic or standardised information summarising or duplicating the requirements of IFRS may be considered material accounting policy information.

Transition

Earlier application of the amendments to IAS 1 is permitted as long as this fact is disclosed.

Since the amendments to the PS provide non-mandatory guidance on the application of the definition of material to accounting policy information, the Board concluded that transition requirements and an effective date for these amendments were not necessary.

Impact

The amendments may impact the accounting policy disclosures of entities. Determining whether accounting policies are material or not requires use of judgement. Therefore, entities are encouraged to revisit their accounting policy information disclosures to ensure consistency with the amended standard.

Entities should carefully consider whether 'standardised information, or information that only duplicates or summarises the requirements of the IFRSs' is material information and, if not, whether it should be removed from the accounting policy disclosures to enhance the usefulness of the financial statements.

Other EY publications

IFRS Developments Issue 187: The Disclosure Initiative - IASB amends the accounting policy requirements (February 2021) EYG No. 001327-21Gbl

Definition of Accounting Estimates - Amendments to IAS 8

Effective for annual periods beginning on or after 1 January 2023.

Key requirements

In February 2021, the Board issued amendments to IAS 8, in which it introduces a new definition of 'accounting estimates'.

The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

Changes in accounting estimates

The amended standard clarifies that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors.

The previous definition of a change in accounting estimate specified that changes in accounting estimates may result from new information or new developments. Therefore, such changes are not corrections of errors. This aspect of the definition was retained by the Board.

Illustrative examples

The amendments include two illustrative examples to help stakeholders understand how to apply the new definition of accounting estimates.

Transition

The amendments apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of the effective date. Earlier application is permitted.

Impact

The amendments are intended to provide preparers of financial statements with greater clarity as to the definition of accounting estimates, particularly in terms of the difference between accounting estimates and accounting policies. Although the amendments are not expected to have a material impact on entities' financial statements, they should provide helpful guidance for entities in determining whether changes are to be treated as changes in estimates, changes in policies, or errors.

Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to IAS 12

Effective for annual periods beginning on or after 1 January 2023.

Key requirements

In May 2021, the Board issued amendments to IAS 12, which narrow the scope of the initial recognition exception under IAS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences.

Determining the tax base of assets and liabilities

The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognised in the financial statements (and interest expense) or to the related asset component (and interest expense). This judgement is important in determining whether any temporary differences exist on initial recognition of the asset and liability.

Changes to the initial recognition exception

Under the amendments, the initial recognition exception does not apply to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. It only applies if the recognition of a lease asset and lease liability (or decommissioning liability and decommissioning asset component) give rise to taxable and deductible temporary differences that are not equal.

Nevertheless, it is possible that the resulting deferred tax assets and liabilities are not equal (e.g., if the entity is unable to benefit from the tax deductions or if different tax rates apply to the taxable and deductible temporary differences). In such cases, which the Board expects to occur infrequently, an entity would need to account for the difference between the deferred tax asset and liability in profit or loss.

Transition

An entity should apply the amendments to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, at the beginning of the earliest comparative period presented, it should also recognise a deferred tax asset (provided that sufficient taxable profit is available) and a deferred tax liability for all deductible and taxable temporary differences associated with leases and decommissioning obligations.

Improvements to International Financial Reporting Standards

Key requirements

The IASB's annual improvements process deals with non-urgent, but necessary, clarifications and amendments to IFRS.

2018-2020 cycle (issued in May 2020)

The following is a summary of the amendments from the 2018-2020 annual improvements cycle:

IFRS 1 *First-time Adoption of International Financial Reporting Standards*	**Subsidiary as a first-time adopter** ▸ The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported in the parent's consolidated financial statements, based on the parent's date of transition to IFRS, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1. ▸ An entity applies the amendment for annual reporting periods beginning on or after 1 January 2022. Earlier application is permitted.
IFRS 9 *Financial Instruments*	**Fees in the '10 per cent' test for derecognition of financial liabilities** ▸ The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf. There is no similar amendment proposed for IAS 39. ▸ An entity applies the amendment to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment. ▸ An entity applies the amendment for annual reporting periods beginning on or after 1 January 2022. Earlier application is permitted.
Illustrative Examples accompanying IFRS 16 *Leases*	**Lease incentives** ▸ The amendment removes the illustration of payments from the lessor relating to leasehold improvements in Illustrative Example 13 accompanying IFRS 16. This removes potential confusion regarding the treatment of lease incentives when applying IFRS 16.
IAS 41 *Agriculture*	**Taxation in fair value measurements** ▸ The amendment removes the requirement in paragraph 22 of IAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of IAS 41. ▸ An entity applies the amendment to fair value measurements on or after the beginning of the first annual reporting period beginning on or after 1 January 2022. Earlier application is permitted.

Section 2: Items not taken onto the IFRS Interpretations Committee's agenda in Q2 2022

Certain items deliberated by the IFRS IC are published within the 'Interpretations Committee agenda decisions' section of the IASB's *IFRIC Update*. Agenda decisions are issues that the IFRS IC decides not to add to its agenda and include the reasons for not doing so. For some of these items, the IFRS IC includes further information and explanatory material about how the standards should be applied. This guidance does not constitute an interpretation, but rather, provides additional information on the issues raised and the IFRS IC's views on how the standards and current interpretations are to be applied. Before an agenda decision is published, the Board is asked whether it objects to the agenda decision. If four or more Board members object, the agenda decision will not be published and the Board decides how to proceed.

Whilst agenda decisions (including any explanatory material contained within them) do not add to or change requirements in IFRS standards, the explanatory material derives its authority from IFRS standards. Accordingly, an entity is required to apply IFRS standards, reflecting the explanatory material in an applicable agenda decision.

The table below summarises the topics that the IFRS IC decided not to take onto its agenda for the period from 1 April 2022 (since the previous edition of *IFRS Update*) to 30 June 2022. For agenda decisions published before 1 April 2022, please refer to previous editions of *IFRS Update*. All items considered by the IFRS IC during its meetings, as well as the full text of its conclusions, can be found in the *IFRIC Update* on the IASB's website.[5]

According to the IFRS IC, 'the process for publishing an agenda decision might often result in explanatory material that provides new information that was not otherwise available and could not otherwise reasonably have been expected to be obtained. Because of this, an entity might determine that it needs to change an accounting policy as a result of an agenda decision. The Board expects that an entity would be entitled to sufficient time to make that determination and implement any change (for example, an entity may need to obtain new information or adapt its systems to implement a change).'

Final date considered	Issue	Summary of reasons given for not adding the issue to the IFRS IC's agenda
April 2022	Demand Deposits with Restrictions on Use arising from a Contract with a Third Party (IAS 7 *Statement of Cash Flow*)	The IFRS IC received a request about whether an entity includes a demand deposit as a component of cash and cash equivalents in its statements of cash flows and financial position when the demand deposit is subject to contractual restrictions on use agreed with a third party. In the fact pattern described in the request, the entity: a. Holds a demand deposit whose terms and conditions do not prevent the entity from accessing the amounts held in it (that is, were the entity to request any amount from the deposit, it would receive that amount on demand); and b. Has a contractual obligation with a third party to keep a specified amount of cash in that separate demand deposit and to use the cash only for specified purposes. If the entity were to use the amounts held in the demand deposit for purposes other than those agreed with the third party, the entity would be in breach of its contractual obligation. **Cash and cash equivalents in the statement of cash flows** The IFRS IC noted that the question in the request is about whether the demand deposit meets the definition of 'cash' in IAS 7. Paragraph 6 of IAS 7 defines 'cash' by stating that it 'comprises cash on hand and demand deposits.' IAS 7 includes no requirements for whether an item qualifies as cash beyond the definition itself. IAS 7 and IAS 1 *Presentation of Financial Statements* indicate that amounts included in cash and cash equivalents may be subject to restrictions, namely: a. Paragraph 48 of IAS 7 requires an entity to disclose information about 'significant cash and cash equivalent balances held by the entity that are not available for use by the group'; and

[5] The *IFRIC Update* is available at http://www.ifrs.org/news-and-events/updates/ifric-updates/.

Final date considered	Issue	Summary of reasons given for not adding the issue to the IFRS IC's agenda
		b. Paragraph 66(d) of IAS 1 requires an entity to classify as current an asset that is 'cash or a cash equivalent (as defined in IAS 7) unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period'. The IFRS IC concluded that restrictions on the use of a demand deposit arising from a contract with a third party do not result in the deposit no longer being cash, unless those restrictions change the nature of the deposit in a way that it would no longer meet the definition of cash in IAS 7. In the fact pattern described in the request, the contractual restrictions on the use of the amounts held in the demand deposit do not change the nature of the deposit — the entity can access those amounts on demand. Therefore, the IFRS IC concluded that the entity includes the demand deposit as a component of 'cash and cash equivalents' in its statement of cash flows. **Presentation in the statement of financial position** Paragraph 54(i) of IAS 1 requires an entity to include a line item in its statement of financial position that presents the amount of 'cash and cash equivalents'. Paragraph 55 of IAS 1 states 'an entity shall present additional line items (including by disaggregating the line items listed in paragraph 54) … in the statement of financial position when such presentation is relevant to an understanding of the entity's financial position'. Therefore, the IFRS IC concluded that, in the fact pattern described in the request, the entity presents the demand deposit as cash and cash equivalents in its statement of financial position. When relevant to an understanding of its financial position, the entity would disaggregate the 'cash and cash equivalents' line item and present the demand deposit separately in an additional line item. An entity that presents assets as current or non-current would classify the demand deposit as current applying paragraph 66(d) of IAS 1, unless the demand deposit is 'restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period'. **Disclosures** Paragraph 45 of IAS 7 states that 'an entity shall disclose the components of cash and cash equivalents…'. Applying this requirement, in the fact pattern described in the request, the entity discloses the demand deposit as a component of cash and cash equivalents. The entity also considers whether to disclose additional information: a. In the context of the requirements in IFRS 7 *Financial Instruments: Disclosures* about liquidity risk arising from financial instruments and how an entity manages that risk; and b. If the information it provides in applying the disclosure requirements in IAS 7 and IFRS 7 is insufficient to enable users of financial statements to understand the impact of the restrictions on the entity's financial position (paragraph 31 of IAS 1). The IFRS IC concluded that the principles and requirements in IFRS accounting standards provide an adequate basis for an entity to determine whether to include demand deposits subject to contractual restrictions on use agreed with a third party as a component of cash and cash equivalents in its statements of cash flows and financial position.
May 2022	Principal versus Agent: Software Reseller (IFRS 15	The IFRS IC received a request asking whether, in applying IFRS 15, a reseller of software licences is a principal or agent. In the fact pattern described in the

Final date considered	Issue	Summary of reasons given for not adding the issue to the IFRS IC's agenda
	Revenue from Contracts with Customers)	request: a. The reseller has a distribution agreement with a software manufacturer that: i. gives the reseller the right to grant (sell) the manufacturer's standard software licences to customers; ii. requires the reseller to provide pre-sales advice to each customer — before the sale of the software licences — to identify the type and number of software licences that would meet the customer's needs; and iii. provides the reseller with discretion in pricing the software licences for sale to customers. b. If the customer decides: i. to buy no software licences, it pays nothing. The reseller and the customer do not enter into an agreement; and ii. to buy a specified type and number of software licences, the reseller negotiates the selling price with the customer, places an order with the software manufacturer on behalf of the customer (and pays the manufacturer), and invoices the customer for the agreed price. c. The software manufacturer provides the customer with the software licences ordered — issued in the customer's name — via a software portal and with the key necessary for activation. The software manufacturer and the customer enter into an agreement specifying the customer's right to use the software, a warranty covering the software's functionality and the term of the licence. d. If the reseller advises the customer to order an incorrect type or number of software licences (that fails to meet the customer's needs), the customer may not accept the licences. The reseller is unable to return unaccepted licences to the software manufacturer or sell them to another customer. Applicable requirements in IFRS 15 — Principal versus agent considerations Paragraphs B34–B38 set out a framework to determine whether an entity is a principal or agent. When another party is involved in providing goods or services to a customer, an entity determines whether the nature of its promise is a performance obligation either to provide the specified goods or services itself (the entity is a principal) or to arrange for those goods or services to be provided by the other party (the entity is an agent). Paragraph B34A states that determining the nature of its promise requires an entity to: a. Identify the specified goods or services to be provided to the customer. A specified good or service is a distinct good or service (or a distinct bundle of goods or services) to be provided to the customer (paragraph B34); and b. Assess whether it controls each specified good or service before that good or service is transferred to the customer. An entity is a principal if it controls the specified good or service before that good or service is transferred to a customer (paragraph B35). An entity that is an agent does not control the specified good or service provided by another party before that good or service is transferred to the customer (paragraph B36).

Final date considered	Issue	Summary of reasons given for not adding the issue to the IFRS IC's agenda
		Identifying the specified goods or services to be provided to the customer The first step in identifying the specified goods or services to be provided to the customer is to assess the goods or services promised in the contract with the customer. A contract with a customer generally explicitly states the goods or services that an entity promises to provide to a customer. However, the contract may also include promises that are implied by an entity's customary business practices, published policies or specific statements if, at the time of entering into the contract, those promises create a valid expectation of the customer that the entity will transfer a good or service to the customer (paragraph 24). Having assessed the goods or services promised in the contract with the customer, an entity then identifies, applying paragraphs 27–30, each distinct good or service (or distinct bundle of goods or services) to be provided to the customer. *Assessing whether an entity controls each specified good or service before that good or service is transferred to the customer* When another party is involved in providing goods or services to a customer, paragraph B35A sets out the circumstances in which an entity is a principal, one of which is when the entity obtains control of a good or another asset from the other party that it then transfers to the customer. Control of an asset refers to the ability to direct the use, and obtain substantially all, of the remaining benefits from the asset. Control of an asset includes the ability to prevent other entities from directing the use of, and obtaining the benefits from, an asset (paragraph 33). Paragraph B37 sets out indicators to help an entity determine whether it is a principal or agent. Such indicators include, but are not limited to: (a) primary responsibility for fulfilling the promise to provide the specified good or service; (b) inventory risk before the specified good or service has been transferred to the customer or after transfer of control to the customer; and (c) discretion in establishing the price for the specified good or service. The indicators may be more or less relevant to the assessment of control depending on the nature of the specified good or service and the terms and conditions of the contract, and different indicators may provide more persuasive evidence in different contracts (paragraph B37A). **Applying IFRS 15 to the fact pattern described in the request** *Identifying the specified goods or services to be provided to the customer* In the fact pattern described in the request, the reseller's contract with the customer includes an explicit promise to provide a specified type and number of standard software licences to the customer. The IFRS IC observed that the pre-sales advice the reseller provides — under the distribution agreement between the software manufacturer and the reseller — is not an implicit promise in the contract with the customer. At the time of entering into the contract with the customer, the reseller has already provided the advice. There is no further advice to be provided by the reseller and the advice already provided will not be transferred to the customer after contract inception. Consequently, at the time of entering into the contract with the customer, the customer has is no valid expectation that the reseller will transfer

Final date considered	Issue	Summary of reasons given for not adding the issue to the IFRS IC's agenda
		a good or service to i other than the standard software licences. Accordingly, the IFRS IC concluded that, in the fact pattern described in the request, the promised goods in the reseller's contract with the customer are the standard software licences. Because the standard software licences are the only promised goods in the contract with the customer, they are distinct goods to be provided to the customer. Those licences are, therefore, the specified goods to be provided to the customer as described in paragraph B34A(a). *Assessing whether the reseller controls the standard software licences before they are transferred to the customer* In the fact pattern described in the request, the reseller assesses whether it obtains control of the standard software licences from the software manufacturer before they are transferred to the customer. That assessment of control requires consideration of the specific facts and circumstances, which include the terms and conditions of the contracts between the reseller and the customer, the reseller and the software manufacturer, and the software manufacturer and the customer. If, after applying the principles and requirements on control in IFRS 15, it is unclear whether the reseller is principal or agent, the reseller considers the indicators in paragraph B37 in assessing whether it obtains control of the standard software licences from the software manufacturer before they are transferred to the customer. In the fact pattern described in the request, the IFRS IC observed that: a. The software licences provided to the customer exist only after the reseller places an order with the software manufacturer and the software manufacturer issues the software licences in the customer's name. The software manufacturer is responsible for the software's functionality, as well as for issuing and activating the licences. The software manufacturer is, therefore, responsible in those respects for fulfilling the promise to provide the licences to the customer (paragraph B37(a)). b. The reseller is the party that engages with the customer before and after the software licences are provided to the customer, taking responsibility for unaccepted licences. The reseller is, therefore, responsible in those respects for fulfilling the promise to provide the licences to the customer (paragraph B37(a)). c. The reseller does not obtain a pool of software licences before entering into the contract with the customer and cannot, for example, direct the software licences to another customer. As such, the reseller has no inventory risk before the licences are provided to the customer, but then has inventory risk until the customer accepts the licences (paragraph B37(b)). d. The reseller has discretion in establishing the price for the software licences (paragraph B37(c)). Pricing discretion may be less relevant to the assessment of control if, for example, the market for the software licences is such that the reseller, in effect, has limited flexibility in establishing the price. The IFRS IC observed that the conclusion as to whether the reseller is a principal or agent depends on the specific facts and circumstances, including the terms and conditions of the relevant contracts. The reseller would apply judgement in making its overall assessment of whether it is a principal or agent, including considering the relevance of the indicators to the assessment of control and the

Final date considered	Issue	Summary of reasons given for not adding the issue to the IFRS IC's agenda
		degree to which they provide evidence of control of the standard software licences before they are transferred to the customer, within the context of the framework and requirements set out in paragraphs B34–B38 of IFRS 15. The IFRS IC also observed that the reseller would disclose: (a) material accounting policy information in accordance with IAS 1; and (b) information required by IFRS 15, including about its performance obligations (paragraph 119) and the judgements made in applying IFRS 15 that significantly affect the determination of the amount and timing of revenue from contracts with customers (paragraph 123). The IFRS IC concluded that the principles and requirements in IFRS accounting standards provide an adequate basis for a reseller to determine whether, in the fact pattern described in the request, it is a principal or agent for the standard software licences provided to a customer.

Section 3: Active IASB projects

The ability to stay current on the IASB's standard-setting activities is critical in a sea of change. The following pages summarise key features of selected active projects of the IASB, along with potential implications of the proposed standards. The 'Key projects' are those initiated with the objective of issuing new standards or that involve overarching considerations across a number of standards. 'Other projects' include proposed amendments with narrower applicability. Generally, only those projects that have reached the exposure draft stage are included, but in selected cases, projects that have not yet reached the exposure draft stage are also commented on.

Key projects

Better communication in financial reporting

Key developments to date

Background

The IASB is undertaking a broad-based initiative to explore how disclosures in IFRS financial reporting can be improved. The Board has identified implementation and research projects that will support better communication.

Disclosure initiative

In December 2014 and January 2016, amendments to IAS 1 and IAS 7 *Statement of Cash Flows*, respectively, were issued. Furthermore, the IASB released IFRS Practice Statement 2 *Making Materiality Judgement* (the PS) in September 2017 and the *Definition of Material* (Amendments to IAS 1 and IAS 8) in October 2018. In February 2021, the IASB issued amendments to IAS 1 and the PS relating to disclosure of accounting policies.

In addition, the Disclosure Initiative comprises the following projects:

Principles of disclosure

The objective of this project is to identify and better understand disclosure issues and either develop a set of new disclosure principles, or clarify the existing principles.

The IASB published a Discussion Paper (DP) in March 2017 which focused on the general disclosure requirements in IAS 1 and the concepts that were being developed in the Conceptual Framework for Financial Reporting.

After considering the feedback received on the DP, the IASB decided that improving the way disclosure requirements are developed and drafted in the standards is the most effective way to address the disclosure problem. Therefore, the Board decided to prioritise a standard-level review of certain standards (see below).

The Board has also decided to address research findings relating to accounting policy disclosures (see page 10 above), the effect of technology on financial reporting (as part of a broader project) and the use of performance measures in financial statements as part of the primary financial statements project (see below). The remaining topics in the DP will not be pursued for the time being.

Targeted standards-level review of disclosures

The IASB has added a separate project to develop guidance to help improve the way the Board drafts disclosure requirements in IFRS standards and perform a targeted standards-level review of disclosure requirements. The draft guidance developed by the Board relates to IAS 19 *Employee Benefits* and IFRS 13. The Board published an exposure draft (ED) in March 2021. The ED was open for comment until 12 January 2022.

In May 2022, the IASB discussed feedback provided in comment letters as well as preliminary views with respect to next steps.The IASB is expected to decide on project direction in Q3 2022.

Subsidiaries without Public Accountability

In January 2020, the Board decided to move the Subsidiaries that are SMEs project from the research programme to the standard-setting programme. The Board is developing a reduced disclosure IFRS standard that would apply on a voluntary basis to subsidiaries that do not have public accountability. The Board published an Exposure Draft (ED) in July 2021, which proposes to allow eligible entities to elect to apply reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in IFRS Standards. The comment period ended on 31 January 2022.

In June 2022, the IASB decided to proceed with its proposal for a new standard as set out in the ED and agreed on a project plan for developing it. The IASB will continue discussing the feedback on the ED at future meetings.

Primary financial statements

The project aims to improve the structure and content of the primary financial statements, with a focus on the statement(s) of financial performance. The project also includes requirements for management performance measures. The Board published an exposure draft in December 2019 and the comment letter period ended on 30 September 2020. Currently, the Board is redeliberating the proposals in light of the comment letters received.

Management commentary

The Board is working on a project to update IFRS Practice Statement 1 *Management Commentary*. As part of this project, the Board is considering how broader financial reporting could complement and support IFRS financial statements. The Board published an exposure draft in May 2021. The comment period closed on 23 November 2021. The IASB began considering the feedback received during its March 2022 meeting.

In April 2022, the IASB discussed the feedback received on its proposals. The IASB was not asked to make any decisions.

IFRS taxonomy

The Better Communication in Financial Reporting initiative will also consider the IFRS taxonomy. The Taxonomy enables tagging of electronic financial information and allows computers to identify, read and extract the information. This facilitates analysis and comparison. Users may create tailored reports to meet their information needs.

Impact

Several of the measures being considered by the Board are behavioural in nature, and, thus, the impact may not be easily predicted. However, the different projects have the potential to provide clarifications and guidance that will help entities prepare more tailored and effective primary financial statements and disclosures.

Other projects

The IASB has a number of projects on its work plan to amend existing standards and interpretations for specific matters. The following is a brief summary of selected projects. Refer to the IASB's website for its work plan, which includes the current status of all projects.

Other projects	Status/next steps

Financial Instruments – Accounting for Dynamic Risk Management
▸ The objective of this project is to address the specific accounting for risk management strategies relating to open portfolios rather than individual contracts. The hedge accounting requirements in IAS 39 and IFRS 9 do not provide specific solutions to the issues associated with macro hedging.
▸ The IASB intends to develop the accounting model for dynamic risk management (DRM) in the following two phases:
  ▸ The first phase will focus on developing the 'core areas' that are central to the model that are comprised of: (i) target profile (liability side); (ii) asset profile; (iii) DRM derivative instruments; and (iv) performance assessment and recycling, to shape the fundamentals of the DRM accounting model.
  ▸ The second phase will address non-core areas that are extensions of concepts developed during the first phase.
▸ The IASB has tentatively decided that key aspects of the core DRM model are:
  ▸ The model applies to the asset profile and target profile that meet the qualifying criteria on a portfolio (or percentage of portfolio) basis, consistently with the entity's risk management policies and procedures
  ▸ Core demand deposits could be included in the target profile, with certain conditions. Highly probable forecast transactions could also be eligible for inclusion in the asset profile and target profile (e.g., refinancing)
  ▸ Designation and formal documentation will be required
  ▸ Changes to designated portfolios resulting in updates to the asset profile or target profile should not represent a designation or a de-designation event, but, instead, a continuation of the existing relationship
  ▸ Entities should measure imperfect alignment on an on-going basis. Imperfect alignment may result in volatility in profit or loss
  ▸ Application of the DRM accounting model should be optional
	▸ In May 2022, the Board decided to add the Dynamic Risk Management project to its standard-setting programme. Furthermore, it will continue using the expertise of advisory bodies instead of establishing a dedicated consultative group for the project.
	▸ At a future meeting, the Board will discuss the detailed project proposal, setting out the specific areas for deliberation and a potential timeline.

Other projects	Status/next steps
▸ In May 2022, the Board tentatively decided that the mechanics of the DRM model would require designated derivatives to be measured at fair value in the statement of financial position and outlined which amounts to recognise and where to recognise them in financial statements.	
Availability of a Refund (Amendments to IFRIC 14) ▸ The proposed amendments to IFRIC 14 *IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction* address whether the powers of other parties (e.g., trustees) affect an entity's right to a refund of a surplus in a defined benefit plan.	▸ An ED was issued in June 2015. ▸ In September 2017, the Board tentatively decided to perform further work to assess whether it can establish a more principles-based approach in IFRIC 14 for an entity to assess the availability of a refund of a surplus. ▸ In February 2022, the Board reviewed the project's prospects for progress and concluded that these prospects are limited. Therefore, the Board decided to withdraw the project from its work plan.
Financial Instruments with Characteristics of Equity (FICE) ▸ The objective of the project is to improve the information that entities provide in their financial statements about financial instruments they have issued by: ▸ Investigating challenges with the classification of financial instruments applying IAS 32 *Financial Instruments: Presentation* And ▸ Considering how to address those challenges through clearer principles for classification and enhanced requirements for presentation and disclosure ▸ The IASB published the Discussion Paper *Financial Instruments with Characteristics of Equity* in June 2018. ▸ In September 2019, taking into account the feedback received on the Discussion Paper, the Board tentatively decided to explore making clarifying amendments to IAS 32 to address common accounting challenges that arise in practice when applying IAS 32. ▸ In October 2019, the Board discussed the project plan for the FICE project. In particular, the Board discussed the practice issues that it could address in the scope of the project and an indicative project timeline outlining the expected commencement of Board deliberations on each issue.	▸ In April 2020, the Board continued their discussions on how to clarify the principles for classifying financial instruments settled in an entity's own equity instruments. The Board tentatively decided that for a derivative on own equity to meet the fixed-for-fixed condition, the number of functional currency units to be exchanged with each underlying equity instrument must be fixed or only vary with: ▸ Allowable preservation adjustments Or ▸ Allowable passage of time adjustments ▸ The Board met in April and May 2021 to discuss the addition of disclosure requirements to IFRS 7. The Board tentatively decided to require disclosure of: ▸ The nature and priority of claims against an entity that arise from financial instruments; and ▸ The terms and conditions for priority on liquidation for particular financial instruments ▸ The finalised requirements will be incorporated into IFRS 7

Other projects	Status/next steps
▸ The Board is seeking to limit changes to classification outcomes to those in which sufficient evidence exists that such a change would provide more useful information to users of financial statements. In addition, the Board intends to further develop some of the presentation and disclosure proposals explored in the Discussion Paper.	▸ In December 2021, the Board tentatively decided to propose amendments to IAS 32: ▸ To clarify that financial instruments with contingent settlement provisions may be compound instruments. The liability component of such instruments, which would require immediate settlement if a contingent event occurs, is measured at the full amount of the conditional obligation. Payments at the discretion of the issuer are recognised in equity, even when the proceeds are initially allocated to the liability component of a compound instrument ▸ To specify that 'liquidation' is the process of permanently ceasing operations, and assessing whether a contract term is 'not genuine' includes more than the probability of occurrence ▸ To require classification as debt or equity by considering: i) contractual terms that are in addition to, or more specific than, those established by law; and ii) applicable laws that prevent the enforceability of a right or obligation ▸ In February 2022, the Board discussed the classification of a financial instrument with a contractual obligation to deliver cash (or to settle it in such a way that it would be a financial liability) at the discretion of the issuer's shareholders: ▸ The Board tentatively decided to explore a factors-based approach to help an entity apply judgement when classifying these types of financial instruments as financial liabilities or as equity. ▸ In March 2022, the Board discussed when a modification could require the reclassification of a financial liability to equity, or vice versa. No decisions were taken. ▸ In June 2022, the Board discussed the reclassification of financial instruments as financial liabilities or equity when the substance of the contract changes without a modification to the contract. The Board tentatively decided to prohibit reclassifications other than

Other projects	Status/next steps
	for changes in the substance of the contractual terms arising from changes in circumstance outside the contract. ▶ Many of the components of the project have now been discussed and have been tentatively agreed. The remaining topics are planned to be discussed in the remainder of 2022, but a potential date for the issue of an Exposure Draft has yet been set.

Lease liability in a sale and leaseback
▶ The IASB intends to amend IFRS 16 to specify the method a seller-lessee uses in initially measuring the right-of-use asset and liability arising in a sale and leaseback transaction and how the seller-lessee subsequently measures that liability.
▶ The proposed amendment applies to sale and leaseback transactions in which, applying paragraph 99 of IFRS 16, the transfer of the asset satisfies the requirements to be accounted for as a sale of the asset.
	▶ The Board issued an exposure draft of the proposed amendment in November 2020 which was open for comment until 29 March 2021.
	▶ In May 2021, the Board considered the feedback received on the exposure draft.
	▶ In December 2021, the Board tentatively decided to change the proposals in the exposure draft, as follows:
	  ▶ Not to prescribe how, at the commencement date, a seller-lessee determines the proportion of the previous carrying amount of the asset that relates to the right of use the seller-lessee retains
	  ▶ To require the seller-lessee to subsequently measure the leaseback liability applying paragraphs 36–46 of IFRS 16
	  ▶ To specify, for the purposes of applying paragraphs 36–46, the term 'lease payments' may not be as defined in Appendix A to IFRS 16. Instead, the seller-lessee would apply the term 'lease payments' or 'revised lease payments' in such a manner that it does not recognise any amount of the gain or loss that relates to the right of use retained to the extent that the right of use is retained
	  ▶ In February 2022, the Board tentatively decided on transition requirements and effective date. The Board also decided that the amendments do not require re-exposure
	▶ The Board expects to issue the amendments in Q3 2022.

Other projects	Status/next steps
Lack of Exchangeability (Amendments to IAS 21) ▸ The IASB intends to amend IAS 21 *The Effects of Changes in Foreign Exchange Rates* to address the spot exchange rate an entity uses when a currency lacks exchangeability. ▸ The proposed amendments would (a) define exchangeability and thus a lack of exchangeability; and (b) specify how an entity determines the spot exchange rate when a currency lacks exchangeability.	▸ The exposure draft was issued in April 2021, which was open for comment until 1 September 2021. In January 2022, the Board discussed a summary of feedback on the exposure draft. The Board will consider the project's direction at a future meeting.

Business Combinations: Disclosures, Goodwill and Impairment
▸ Based on the feedback received during the Post-implementation Review of IFRS 3, the Board decided to begin a research project to explore possible improvements to IFRS 3 and IAS 36 *Impairment of Assets*.
▸ In March 2020, the IASB published the Discussion Paper (DP) *Business Combinations: Disclosures, Goodwill and Impairment*. The Board's preliminary views are that it:
  ▸ Should develop proposals to enhance the disclosure objectives and requirements in IFRS 3 to improve the information provided to investors about an acquisition and its subsequent performance
  ▸ Cannot design a different impairment test for cash-generating units containing goodwill that is significantly more effective than the impairment test in IAS 36 at recognising impairment losses on goodwill on a timely basis and at a reasonable cost
  ▸ Should not reintroduce amortisation of goodwill
  ▸ Should develop a proposal to help investors better understand entities' financial positions by requiring them to present on their balance sheets the amount of total equity excluding goodwill
  ▸ Should develop proposals intended to reduce the cost and complexity of performing the impairment test by:
    ▸ Providing entities with relief from having to perform an annual quantitative impairment test for cash-generating units containing goodwill if there is no indication that an impairment may have occurred
    ▸ Extending the same relief to entities for intangible assets with indefinite useful lives and intangible assets not yet available for use
  ▸ Should develop proposals intended to reduce cost and complexity, and to provide more useful and understandable information by simplifying the requirements for estimating value in use by:
    ▸ Removing the restriction on including cash flows from a future uncommitted restructuring or from improving or enhancing an asset's performance
    ▸ Permitting the use of post-tax cash flows and post-tax discount rates
	▸ The DP was issued in March 2020 and was open for comment until 31 December 2020. In June 2021, the Board tentatively decided to make no changes to the project's scope. The Board will continue its redeliberations at a future meeting. The Board expects to decide the direction of the project in Q4 2022.

Other projects	Status/next steps
▸ Should not change the range of identifiable intangible assets recognised separately from goodwill in an acquisition	
Business Combinations under Common Control ▸ In November 2020, the IASB published the Discussion Paper (DP) *Business Combinations under Common Control*. The DP identifies two methods of accounting for business combinations under common control (BCUCC) by a receiving entity. The key proposals are: ▸ That the acquisition method should, in principle, be applied to those BCUCC that affect non-controlling shareholders of the receiving entity and that a single book-value method should be applied to all other BCUCC, subject to the following: ▸ The optional exemption from the acquisition method: a receiving entity should be permitted to use a book-value method if it has informed all of its non-controlling shareholders that it proposes to use this method, and they have not objected. ▸ The exception from the acquisition method: a receiving entity should be required to use a book-value method if all of its non-controlling shareholders are the entity's related parties as defined in IAS 24 *Related Party Disclosures*. ▸ The acquisition method should be applied according to IFRS 3 but considering that the consideration may not be at arm's length and may lead to a distribution of or contribution to equity. ▸ A book-value method, measuring the assets and liabilities received using the transferred entity's book values, should be applied to all BCUCC that do not affect non-controlling shareholders. When applying the book-value method, the receiving entity should measure consideration paid in assets at the receiving entity's book values of those assets at the combination date or if by assuming liabilities at the amount determined at the combination date using the IFRS Standards applicable for initial recognition of a liability of that type.	▸ The DP was issued in November 2020. The comment period closed on 1 September 2021 and the IASB began considering the feedback received at its December 2021 meeting. ▸ The IASB will continue to redeliberate the project proposals at future meetings.
Rate-regulated Activities ▸ In January 2021, the IASB published the Exposure Draft (ED) *Regulatory Assets and Regulatory Liabilities*. The ED sets out proposals for the recognition, measurement, presentation and disclosure of regulatory assets, regulatory liabilities, regulatory income and regulatory expense. The key proposals are: ▸ Regulatory assets and regulatory liabilities exist due to a regulatory agreement that determines the regulated rate in such a way that some, or all, of the total allowed compensation for goods or services supplied in one period is charged to customers in a different period.	▸ The ED was issued in January 2021 and was open for comment until 30 July 2021. ▸ In November 2021, the IASB completed its discussion of the feedback received. ▸ In December 2021, the IASB agreed with the proposed plan for redeliberations.

Other projects	Status/next steps
▶ An entity recognises its regulatory assets and regulatory liabilities existing at the end of the reporting period and its regulatory income and expense arising during the reporting period. ▶ If it is uncertain whether a regulatory asset or regulatory liability exists, an entity will recognise that regulatory asset or regulatory liability if it is 'more likely than not' that it exists. ▶ An entity measures regulatory assets and regulatory liabilities at historical cost using estimates of future cash flows by applying a cash-flow-based measurement technique. ▶ In predicting uncertainty, an entity can use either the 'most likely amount' and 'expected value' methods. All regulatory income or regulatory expense should be presented as a separate line item immediately below revenue.	▶ In February 2022, the Board started redeliberating specific topics relating to determining whether a regulatory agreement is within the scope of the proposals and the definition of a regulator. ▶ The Board tentatively decided that the standard will include the existence of a regulator as part of the conditions necessary for a regulatory asset or a regulatory liability to exist. ▶ In May 2022, the Board tentatively decided to clarify interaction of the scope of the proposals with IFRS 15 and IFRS 9.
Supplier Finance Arrangements ▶ In December 2020, the Board published the IFRS Interpretations Committee's Agenda Decision *Supply Chain Financing Arrangements – Reverse Factoring*. Subsequently, the Board met in June 2021 and decided to add a narrow-scope standard-setting project to its work plan, with the aim to develop disclosure requirements for supplier finance arrangements. The Board decided to propose amending IAS 7 *Statement of Cash Flows* and I FRS 7 *Financial Instruments: Disclosures* to that effect. ▶ In November 2021, the IASB published the Exposure Draft *(ED) Supplier finance arrangements*. The ED proposes to introduce new disclosure requirements to enhance the transparency of supplier finance arrangements and their effects on an entity's' liabilities and cash flows.	▶ The ED was issued in November 2021 and was open for comment until 28 March 2022. The next milestone is for the Board to consider the feedback, which is expected in July 2022.
Post-implementation Review, IFRS 9 Financial Instruments Classification and Measurement ▶ In September 2021, the Board published a Request for Information (RFI) for its Post Implementation Review (PIR) of the Classification and Measurement (C&M) requirements of IFRS 9. The RFI divided the PIR into six broad topics on which the Board asked for feedback: ▶ Business model for managing financial assets ▶ Contractual cash flow characteristics ▶ Equity instruments and other comprehensive income ▶ Financial liabilities and own credit ▶ Modifications to contractual cash flows ▶ Amortised cost and the effective interest method ▶ Transition	▶ ▶ In April 2022, the Board discussed the feedback received in response to the RFI along with initial thinking on the issues associated with the contractual cash flows characteristics (otherwise known as the SPPI test). ▶ In May 2022, the Board decided to start a standard-setting project to clarify particular aspects of the requirements in IFRS 9 for assessing the contractual cash flow characteristics of a financial asset. ▶ In June 2022 the IASB considered feedback received in response to the RFI on equity instruments for which the entity has elected to present fair value changes through other comprehensive income. The Board will continue its discussions.

Other projects	Status/next steps
- Other matters - The IASB will undertake a post implementation review of the remaining two elements of IFRS 9, impairment and hedge accounting, at a later stage. - There is a growing volume of loans whose interest rate may vary depending on the borrower's performance against certain Environmental, Social or Governance (ESG) targets. The issue is whether this feature means that the loan does not meet the SPPI (Solely Payments of Principal and Interest) criteria, if the effect is neither trivial nor can be viewed as compensation for the credit risk of that particular asset. In May 2022, the Board agreed that this is a high priority area which should be addressed as soon as possible. - IFRS 9 contains guidance on when so-called Contractually Linked Instruments (CLIs) are viewed as satisfying the SPPI criteria. In May 2022, the Board assigned a medium priority to this area as it is not considered to be pervasive for entities' financial statements. It will be addressed as part of general standard setting activity in relation to the SPPI test.	

The table below sets out the estimated timeline for the remaining projects on the IASB's agenda as at the end of June 2022.

IASB projects	Next milestone	Expected date
Research projects		
Extractive Activities	Decide Project Direction	July 2022
Equity Method	Decide Project Direction	–
Standard-setting and related projects		
Second Comprehensive Review of the IFRS for SMEs Standard	Exposure Draft	September 2022
Maintenance projects		
Provisions – Targeted Improvements	Decide Project Direction	–

EY | Building a better working world

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets.

Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. Information about how EY collects and uses personal data and a description of the rights individuals have under data protection legislation are available via ey.com/privacy. EY member firms do not practice law where prohibited by local laws. For more information about our organization, please visit ey.com.

About EY's International Financial Reporting Standards Group
A global set of accounting standards provides the global economy with one measure to assess and compare the performance of companies. For companies applying or transitioning to International Financial Reporting Standards (IFRS), authoritative and timely guidance is essential as the standards continue to change. The impact stretches beyond accounting and reporting to the key business decisions you make. We have developed extensive global resources – people and knowledge – to support our clients applying IFRS and to help our client teams. Because we understand that you need a tailored service as much as consistent methodologies, we work to give you the benefit of our deep subject matter knowledge, our broad sector experience and the latest insights from our work worldwide.
