

Worldwide Corporate Tax Guide

2019

Preface

Governments worldwide continue to reform their tax codes at a historically rapid rate. Taxpayers need a current guide, such as the *Worldwide Corporate Tax Guide*, in such a shifting tax landscape, especially if they are contemplating new markets.

The content is straightforward. Chapter by chapter, from Afghanistan to Zimbabwe, we summarize corporate tax systems in more than 160 jurisdictions. The content is current on 1 January 2019, with exceptions noted.

Each chapter begins with contact information for the key people in that jurisdiction's EY offices. Symbols precede the names of individuals who hold the following functions:

- ★ National director of the listed tax specialty
- ◆ Director of the listed specialty in the local office

We then lay out the facts about the jurisdiction's corporate taxes, beginning with an at-a-glance summary. With some variation, the topics covered are taxes on corporate income and gains, determination of trading income, other significant taxes, miscellaneous matters (including foreign-exchange controls, debt-to-equity rules, transfer pricing, controlled foreign companies and anti-avoidance legislation) and treaty withholding tax rates.

At the back of the guide, you will find a list of the names and codes for all national currencies and a list of contacts for other jurisdictions.

For many years, the *Worldwide Corporate Tax Guide* has been published annually along with two companion guides on broad-based taxes: the *Worldwide Personal Tax and Immigration Guide* and the *Worldwide VAT, GST and Sales Tax Guide*. In recent years, those three have been joined by additional tax guides on more-specific topics, including the *Worldwide Estate and Inheritance Tax Guide*, the *Worldwide Transfer Pricing Reference Guide*, the *Global Oil and Gas Tax Guide*, the *Worldwide R&D Incentives Reference Guide*, the *Worldwide Digital Tax Guide* and the *Worldwide Capital and Fixed Assets Guide*.

Each of the guides represents thousands of hours of tax research. They are available free online along with timely *Global Tax Alerts* and other great publications on ey.com or in our EY Global Tax Guides app for tablets.

You can keep up with the latest updates at ey.com/GlobalTaxGuides, and find out more about the app at ey.com/TaxGuidesApp.

This material has been prepared for general informational purposes only and is not intended to be relied upon as accounting, tax or other professional advice. Please refer to your advisors for specific advice.

About EY's Tax Services

Your business will only succeed if you build it on a strong foundation and grow it in a sustainable way. At EY, we believe that managing your tax obligations responsibly and proactively can make a critical difference. Our 50,000 talented tax professionals, in more than 150 countries, give you technical knowledge, business experience, consistency and an unwavering commitment to quality service — wherever you are and whatever tax services you need.

EY Global Tax Desk Network

EY has over the last 30 years made a significant investment in building a Global Tax Desk Network. It consists of a highly integrated team of more than 200 professionals spanning approximately 45 countries. The purpose of the Tax Desk Network is to enable home-country tax experience to be integrated within other jurisdictions and provide services across several of our tax disciplines from hubs in the United States, Brazil, Europe, and Asia-Pacific and China. The Global Tax Desk Network offers clients a tremendous resource – accessible, timely and integrated tax-planning advice on cross-border investments, providing them worldwide with a forum for information and idea exchange as well as offering cross-disciplinary tax workshops for multinationals. Our Global Tax Desk Network can be contacted at the numbers listed below.

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Business Receipts Tax Rate (%)	4/5/10 (a)
Withholding Tax (%) (b)	
Dividends	20 (b)
Interest	20 (b)
Royalties from Patents, Know-how, etc.	20 (b)
Commissions	20 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (c)

- (a) This tax is imposed on total gross revenue before deductions. It is a deductible expense in computing taxable income.
- (b) This withholding tax is considered a final settlement of the tax liability.
- (c) Losses can be generally carried forward in equal proportions to each of the following three years. Unrestricted loss carryforwards are allowed for specified companies.

B. Taxes on corporate income and gains

Corporate income tax. Companies that are resident in Afghanistan are subject to tax on their worldwide income. Tax is levied on the total amount of income earned during the tax period.

Tax rates. The corporate income tax rate is 20%.

Certain types of income are subject to final withholding taxes. For information regarding these taxes, see *Withholding taxes*.

Business receipts tax. Business receipts tax (BRT) is imposed at various rates on total gross revenue before deductions. BRT is a deductible expense in computing taxable income for the same tax year. BRT is imposed at rates of 4%, 5% or 10% of the gross

receipts, depending on the nature of the business and/or category of the receipt.

In addition, importers of goods are subject to advance BRT at a rate of 4% at the time of import. The Customs Office collects the BRT. This tax is treated as an advance payment against the eventual BRT of the importer based on its receipts from the sale of goods.

The BRT return must be filed and BRT must be paid on a quarterly basis within 15 days after the end of the quarter.

BRT does not apply to the following categories of income:

- Interest income
- Fees earned from banking transactions
- Proceeds of futures contracts whether settled in cash or otherwise
- Insurance or reinsurance premiums
- Distributions received by shareholders with respect to their interests in the company
- Exports of goods and services
- Salaries, dividends, royalties and other payments that are subject to withholding tax
- Income received from the rent or lease of residential property to a natural person if the tenant uses the property for residential purposes for more than six months of the tax year
- Income of persons not having a business license that are taxed at fixed rates (see *Fixed tax scheme*)

Fixed tax scheme. For certain categories of income and persons, the Afghanistan Income Tax Law (AITL) provides for a fixed tax scheme under which taxpayers are required to pay a fixed tax during the year instead of income tax and BRT. The fixed tax applies to income received by importers and contractors that do not hold a business license in Afghanistan for the supply of goods and services, transporters, entertainers and natural persons deriving business income below certain limits. The amount of the tax varies, depending on the category of income and the person deriving the income.

Tax incentives. Some of the significant tax incentives available in Afghanistan are described in the following paragraphs.

Income derived from the operation of aircraft under the flag of a foreign country and income derived by the aircraft's staff is exempt from tax if the foreign country grants a similar exemption to aircraft under the flag of Afghanistan and the aircraft's staff.

Organizations that are established under the laws of Afghanistan and operate exclusively for educational, cultural, literary, scientific or charitable purposes are exempt from income tax.

Income derived from agricultural or livestock production is not subject to income tax.

Grants, gifts and awards of the state, foreign governments, international organizations, or nonprofit organizations for contributions to science, art, literature, social progress or international understanding are exempt from income tax.

Scholarships, fellowships and grants for professional and technical training are exempt from income tax.

The above incentives are subject to a private ruling obtained from the Ministry of Finance (MoF) of the Government of Afghanistan.

Capital gains and losses. Gains arising from the sale, exchange or transfer of capital assets, including depreciable assets, shares of stock and trades or businesses, are included in taxable income. However, gains derived from the sale or transfer of movable or immovable property acquired by inheritance are not included in taxable income.

Legal persons transferring movable or immovable property must pay a 1% tax on the amount received or receivable with respect to the transfer of ownership of such property. The tax paid may be used as a credit against tax payable when the tax return is filed.

Losses incurred on the sale or exchange of capital assets used in a trade or business are deductible from the taxable income in the tax year of the sale or exchange if the gain from such sale or exchange would have been taxable.

Losses incurred on the sale or exchange of shares of stock may be offset only against gains from the sale or exchange of shares of stock in the same year. If the gains exceed the losses from such transactions, the excess is taxable. However, if the losses exceed the gains, the excess is not deductible.

Administration

Standard tax year and special tax years or periods. Afghanistan follows a period of 12 months of the solar year as its tax year (that is, 21 or 22 December in a calendar year to 20 or 21 December of the following calendar year). If a legal person wishes to use a 12-month period other than the solar period as its tax year, it may apply to the MoF in writing and provide the reasons for the change. The MoF may grant such application if it is justifiable and if it fulfills the criteria provided in the income tax manual.

Annual income tax return. The income tax return, together with the balance sheet, must be filed within three months following the end of the tax year (that is, by 20 March of the next tax year).

Withholding taxes. A withholding tax is an interim tax payment that may or may not be the final tax liability. Amounts withheld that are not final taxes are credited against the eventual tax liability of the taxpayer for the relevant year.

The following are the rates of significant withholding taxes under the Afghanistan income tax law.

Type of payment	Rate (%)
Rent for immovable property used for commercial, industrial and other economic purposes	10/15 (a)
Salaries and wages	2/10/20 (b)
Payments for imports by importers that have a business license	2 (c)
Payments for imports by importers that do not have a business license	3 (d)

Type of payment	Rate (%)
Payment of advance BRT at import stage	4 (e)
Payments for the providing of goods, material, construction and services under contracts to government agencies, municipalities, state entities, private entities and other persons	
To persons having a business license	2 (f)
To persons not having a business license	7 (g)
Dividends	20 (g)
Interest	20 (g)
Royalties	20 (g)
Prizes	20 (g)
Rewards	20 (g)

- (a) The rate depends on the monthly rent.
 (b) The rate depends on the monthly salary.
 (c) The tax is calculated based on the assessed value of the imported goods including customs duty and is collected by the customs office where the customs duty is paid. This is treated as a tax credit against the tax liability for the year. See the discussion of the BRT in *Business Receipts Tax*.
 (d) This 3% tax paid at the import stage on the total cost including customs duties. It is a fixed tax in lieu of an income tax.
 (e) This advance BRT may be credited against the quarterly or annual BRT liability.
 (f) This is an advance tax that may be credited against the ultimate annual corporate tax liability.
 (g) This is a final withholding tax.

Interest and penalties. A legal person that fails to file a tax return by the due date without reasonable cause is subject to additional income tax of AFN100 per day (effective from 23 September 2013).

In addition, if a person fails to pay the tax by the due date, penalties may be imposed at a rate of 0.1% per day of the tax that is delayed or defaulted. If no tax is paid, an additional tax of 10% may be imposed in addition to the 0.1% penalty.

A person that is determined to have evaded income tax may be required to pay the income tax due and the following additional tax:

- In the first instance, additional tax of double the evaded tax
- In the second instance, additional tax of double the evaded tax and termination of the person's business activity by order of the court

A person that fails to withhold tax from payments without reasonable cause may also be subject to additional tax of 10% of the tax liability in addition to disallowance of the expense for the purpose of computation of taxable income.

Dividends. A company paying a dividend must withhold tax at a rate of 20% of the gross amount. Dividends are regarded as Afghanistan-source if they are received from resident companies operating in Afghanistan.

If a branch in Afghanistan of a nonresident person pays or incurs an amount to the head office or any person connected to the nonresident person, that amount is also treated as a dividend.

Dividends paid in cash, from which tax has been deducted at source, are allowed as deductions for the computation of taxable income of the payers of the dividends. However, such deductions are not allowed to branch offices in Afghanistan making payments of dividends to their head offices and other affiliates.

Dividends paid in the form of securities for shares or loans of a similar nature are not deductible from the income of corporations or limited liability companies.

Foreign tax credit. If a resident person derives income from more than one foreign country, proportionate foreign tax credit is allowed against income from each country.

C. Determination of taxable income

General. Taxable income of natural and legal persons equals the total of all receipts less those exemptions and deductions authorized under the law. The determination of taxable income is generally based on the company's financial statements, subject to certain adjustments for the exclusion of exempt income and unallowable expenses.

Business expenses incurred during a tax year or in one of the preceding three tax years are deductible for purposes of calculating taxable income.

Inventories. Inventory for a tax year is valued at the lower of cost or market value of the inventory on hand at the end of the year. All taxpayers engaged in manufacturing, trading or other businesses must value inventories in accordance with the method prescribed by the MoF.

Tax depreciation. Depreciation of movable and immovable property (except agricultural land) used in a trade or business or held for the production of income is allowed as an expense. The total depreciation deductions for property may not exceed the cost of the property to the taxpayer.

A person is not entitled to claim depreciation for that part of the cost of an asset that corresponds to a payment for which the person failed to withhold tax.

Enterprises registered under the Law on Domestic and Foreign Private Investment in Afghanistan are entitled to a deduction for the depreciation of buildings and other depreciable assets over the following time periods:

- Buildings: four years
- Other depreciable assets: two years

Depreciation is calculated using the straight-line method, in equal proportions. However, if a depreciable asset is held by the enterprise for less than half of the year, depreciation is calculated and deducted for half of the year. If a depreciable asset is held for more than half of the year, depreciation is calculated and allowed for one year.

Net operating losses incurred by a taxpayer on account of depreciation may be carried forward by the enterprise until such loss is fully offset. However, to claim such offset, the enterprise must be

an approved enterprise under the Law on Domestic and Foreign Private Investment.

Depreciation and expenditure that relate to a period covered by a tax exemption or to a period before an enterprise becomes an approved enterprise for the first time cannot be included in the calculation of a net operating loss.

Relief for losses. A corporation or limited liability company that incurs a net operating loss in a tax year may deduct the loss from its taxable income of the following three years in equal proportions.

A net operating loss from activities to generate income from a source outside Afghanistan may only be carried forward and deducted from taxable income from such activities and may not be deducted from taxable income from a source in Afghanistan.

Net operating losses incurred by approved enterprises in a tax year based on legal and accounting records may be carried forward as a deduction from taxable income in each subsequent year until the loss is fully set off.

D. Other significant taxes

Afghanistan currently does not impose value-added tax or goods and services tax.

The Afghanistan government has imposed a telecom service fee at a rate of 10% of the amount recharged on all types of telephone service users.

Customs duties apply to the import of goods.

E. Miscellaneous matters

Foreign-exchange controls. In general, remittances in foreign currency are regulated and are required to be converted to afghanis (AFN) at the established rate of the Da Afghanistan Bank, which is the central bank of Afghanistan. In certain cases in which the Da Afghanistan Bank does not trade for a particular currency, the currency is first converted into US dollars and then into afghanis.

Anti-avoidance rules. All transactions between connected persons are expected to be carried out at an arm's length. If transactions are not conducted on an arm's-length basis, the tax authorities may determine the arm's-length standard under prescribed methodologies. These methods are similar to the methods as available under the commentary to the Organisation for Economic Co-operation and Development model convention.

If a person enters into any transaction or arrangement with the intent to cause reduction of liability to pay tax, the MoF may disregard such transaction or arrangement and assess all persons affected by the transaction or arrangement as if the disregarded transaction or arrangement had not taken place.

F. US and North Atlantic Treaty Organization agreements

On 30 September 2014, Afghanistan signed a Bilateral Security Agreement with the government of the United States and a Status of Force Agreement for North Atlantic Treaty Organization

(NATO) forces. These agreements, which entered into force on 1 January 2015, replaced all previous agreements applicable until 31 December 2014 (including the bilateral agreement between Afghanistan and the United States in the form of Diplomatic Notes exchanged between the countries and the Military and Technical Assistance Agreement entered into with International Security Assistance Forces) and amended the previously offered exemptions for NATO foreign and local contractors and subcontractors.

Exemptions available under these agreements are subject to private rulings obtained from the MoF. In addition, the agreements generally do not provide exemptions from the obligation to withhold tax from all payments to employees (local nationals and other individuals not covered by the exemptions), vendors, suppliers, service providers, lessors of premises and other persons, as required under the local tax laws.

B. Taxes on corporate income and gains

Corporate income tax. Albanian companies are companies that are incorporated in Albania or have their place of effective

management in Albania. They are subject to corporate income tax on their worldwide income. Foreign companies are subject to tax on profits generated from activities performed through a permanent establishment in the country and on income from Albanian sources.

Rates of corporate tax. The corporate income tax rate is 15% for taxpayers with annual turnover exceeding ALL14 million (approximately EUR113,000) and 5% for taxpayers with annual turnover from ALL8 million (approximately EUR65,000) to ALL14 million (approximately EUR113,000).

Small businesses (taxpayers with annual turnover ranging from ALL5 million to ALL8 million (approximately EUR40,000 to EUR65,000) are subject to a reduced profit tax rate of 5%. Simplified profit tax of ALL0 applies to micro-businesses with annual turnover below ALL5 million (approximately EUR40,000).

Tax incentives. Tax incentives in Albania are described below.

The corporate income tax rate is 5% for software production and development companies. Effective from 1 January 2019, the reduced corporate income tax rate of 5% also applies to agricultural cooperatives and agrotourism businesses that are awarded the status of “certified agrotourism entity” on or before until 31 December 2021. They benefit from the reduced corporate income tax rate of 5% for a 10-year period following their certification.

Investment in and operation of internationally recognized 4- or 5-star hotels and resorts that are awarded a special status by the Council of Ministers are exempt from corporate income tax for a 10-year period starting from the commencement of the economic activity, but no later than 3 years from the award of the special status. This exemption applies to 4- or 5-star hotels and resorts that are awarded the special status in or before December 2024.

Capital gains and losses. Capital gains derived from the disposal of assets, including shares, are subject to tax at the standard rate of 15%. Capital losses are deductible for tax purposes.

Effective from 1 January 2019, capital gains derived by nonresidents from the alienation of immovable property located in Albania, exploitation and other rights regarding minerals, hydrocarbons and other natural resources in Albania and information related to these rights are taxed in Albania. Also, capital gains derived by nonresidents from the alienation of shares deriving more than 50% of their value at any time during the last 365 days, directly or indirectly, from immovable property located in Albania or from any the above-mentioned rights or information are taxed in Albania.

Administration. The tax year is the calendar year.

Taxpayers subject to corporate income tax make advance payments of corporate income tax on a quarterly basis. The payments must be made by 30 March for January through March, by 30 June for April through June, by 30 September for July through September and by 30 December for October through December. However, taxpayers may opt to make monthly advance payments of corporate income tax by the 15th day of each month. Newly

established companies involved in production activities are not required to make quarterly advance payments for either a period of six months or the period until the end of the fiscal year, whichever is shorter.

The advance payments for January through March are calculated based on the corporate income tax of the tax year before the preceding tax year. The advance payments for April through December are calculated based on the corporate income tax of the preceding tax year. The tax rate for the calculation of the advance payment is 15%. If the company demonstrates to the tax authorities that the taxable income in the current year will be substantially lower than the taxable income of the reference period, the tax authorities may decide to decrease the advance payments. If the tax authorities approve the taxpayer's request for the reduction of the corporate advance payments and at year-end the corporate tax liability exceeds the amount of advance payments by more than 10%, default interest is applied to the difference. If the tax authorities determine that the taxable income of the current year will be increased by more than 10%, compared with the taxable income realized in the reference period, they may decide to increase the advance payments. Companies that generated losses in the reference years make advance payments based on their taxable profit projections for the current year.

By 31 March, companies must file the annual tax return and pay the corporate tax due for the tax year less advance payments made. A 10 February deadline applies to taxpayers subject to the reduced profit tax regime.

Taxpayers subject to the simplified profit tax regime make advance payments of profit tax (see *Rates of corporate tax*) on a quarterly basis. The payments must be made by 20 April for January through March, by 20 July for April through June, by 20 October for July through September and by 20 December for October through December. Taxpayers with turnover of ALL5 million to ALL8 million are provided with tax stamps for each payment made during the year (total of four). Taxpayers must place the tax stamps in the upper corner of their National Business Centre (Tax Identification Number) certificate.

Companies not complying with the filing and payment deadlines described above are subject to interest and penalties. Late tax payments are subject to interest at a rate of 120% of the interbanking loan interest rate published by Bank of Albania. The interest is not deductible for corporate income tax purposes. Late tax payments and inaccurate tax return filings are charged with a penalty of 0.06% of the amount of the unpaid tax liability and contribution for each day of delay, capped at 21.9%. In addition, a penalty of ALL10,000 for taxpayers subject to corporate income tax or ALL5,000 for other taxpayers can be assessed if the tax return is not filed by the due date. If the unreported tax liability results from tax evasion, the penalty is 100% of the unpaid liability.

Capital gains derived from the transfer of shares or voting rights deriving more than 50% of their value, directly or indirectly, from immovable property located in Albania, exploitation and other rights regarding minerals, hydrocarbons and other natural resources in Albania or from information related to these rights

are taxed at the level of the Albanian taxpayer, to the extent that the taxpayer meets both of the following conditions:

- It is subject to a direct or indirect change of ownership by more than 20%.
- It has an average turnover of ALL500 million for the last three years.

The tax liability is computed on the difference between the fair value and cost of the underlying asset, apportioned to the ownership change percentage. This is a final tax, and the transferor of shares is exempt from taxation on capital gains. If there is a capital gain and if the Albanian taxpayer is not liable to pay tax in accordance with the above rule, the obligation rests with the transferor of shares.

A nonresident person that is subject to capital gain taxation in Albania must declare the capital gains and pay the tax liability by submitting an annual income tax return by 31 March of the following year.

The Albanian taxpayer should also report these ownership changes with the tax authorities to the extent that the change is more than 20% for all types of companies and more than 10% for companies whose shares derive more than 50% of their value at any time during the last 365 days, directly or indirectly, from immovable property located in Albania or from exploitation and other rights regarding natural resources and information related to these rights.

Failure to comply with these reporting obligations is subject to heavy penalties.

Dividends. Dividends paid by Albanian companies to resident and nonresident individuals and to foreign entities are subject to withholding tax at a rate of 8% unless the rate is reduced under an applicable double tax treaty (see Section F). Dividends received by Albanian companies are exempt from tax.

Foreign tax relief. Foreign direct tax on income and gains of an Albanian resident company may be credited against the corporate tax on the same profits. The foreign tax relief cannot exceed the Albanian corporate income tax charged on the same profits. If a company receives income from a country with which Albania has entered into a double tax treaty, other forms of foreign tax relief may apply, as stipulated in the provisions of the treaty.

C. Determination of trading income

General. The assessment is based on the financial statements prepared in accordance with the local standards or International Financial Reporting Standards (IFRS), subject to certain adjustments for tax purposes as specified in the Albanian Tax Code and other supplementary legal acts.

All necessary and reasonable expenses incurred for the business activity that are properly documented are deductible, except for the following:

- In-kind compensation.
- Wages and salaries not paid through the banking system.
- Write-off of debts if all legal means for their collection have not been exhausted.

- Expenses for cross-border technical services and consultancy and management fees if the corresponding withholding tax has not been paid by 20 January of the year following the year in which the service is provided, regardless of whether the payment of the invoice is made. In case of tax treaty protection, the restriction above does not apply, and the provisions of the applicable treaty apply.

Other types of expenses may be deducted up to a ceiling. These expenses include, but are not limited to, the following:

- Representative and entertainment expenses are deductible up to 0.3% of annual turnover.
- Production waste and losses, including losses from impairment, are deductible to the extent provided by the relevant legislation.
- Sponsorships are generally deductible up to 3% of the income before tax and up to 5% for media-related sponsorships.
- Per diems are deductible up to ALL3,000 per day for traveling inside Albania and up to EUR60 per day for traveling abroad, to the extent that the annual total of per diems is less than 50% of the annual gross salary budget.
- Interest is deductible only to the extent that the rate does not exceed the average interest rate published by Bank of Albania and that the amount of the debt does not exceed four times the equity. Effective from 1 January 2018, for related-party loans, the net interest expense balance (that is, the difference between the interest expenses and interest revenues, exceeding 30% of earnings before interest, tax, depreciation and amortization [EBITDA]) is not deductible for the tax period. Such interest not deductible in the current period can be carried forward to future tax periods, provided that a change of 50% in the entity's ownership does not occur. Such limitation does not apply to banks, other financial institutions that are not banks, insurance companies and leasing companies.
- Costs of improvements and maintenance are fully deductible in the year in which they are incurred to the extent that they do not exceed 15% of the remaining value of the asset.
- Expenses settled in cash are tax deductible if they do not exceed ALL150,000 (approximately EUR1,150).
- Voluntary pension contributions made by employers in favor of their employees to professional pension plans are tax deductible up to an amount of ALL250,000 (approximately EUR1,920) per year.

Inventories. The inventory valuation rules stipulated in the accounting law also apply for tax purposes. Inventory is valued at historical cost, which is determined by using the weighted average, first-in, first-out (FIFO) or other specified methods. The method must be applied consistently. Changes in the method must be reflected in the books of the company.

Provisions. Companies may not deduct provisions, except for certain levels of special reserves specified by regulations regarding insurance companies and provisions of financial service companies created in compliance with International Financial Reporting Standards and certified by external auditors.

Tax depreciation. Buildings are depreciated separately for tax purposes using the declining-balance method at a rate of 5%. If the remaining value of the assets at the beginning of a tax period

is less than 3% of their historic acquisition cost, the entire remaining balance is recognized as a tax-deductible expense in that tax period.

Intangible assets are depreciated using the straight-line method at a rate of 15%.

Other assets are depreciated in groups, using the declining-balance method. The applicable rates are 25% for computers, information systems and software, and 20% for all other fixed assets. If the remaining value of the assets at the beginning of a tax period is less than 10% of their historic acquisition cost, the entire remaining balance is recognized as a tax-deductible expense in that tax period.

Relief for losses. Losses may be carried forward for three consecutive years. However, if a change of 50% in the entity's ownership occurs, the remaining losses are forfeited. Loss carrybacks are not allowed.

Groups of companies. Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or other group relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; exempt supplies include leases of land, supplies of buildings (optional) and financial services	
Standard rate	20%
Reduced rate for supplies of certain public transport vehicles	10%
Reduced rate for certain services, accommodation and restaurant (except for drinks) supplies from companies having the status of "agritourism certified entity," advertisement services from audiovisual media and supplies of books of any type	6%
Exports of goods and supplies of services relating to international transportation	0%
Real estate property tax	
Buildings	
Buildings used for business purposes; rate applied to value of building	0.2%
Buildings under construction; rate applied to value of the construction surface of buildings that have not been completed as per the time frame stipulated in the construction permit received	0.06%
Agricultural land	ALL700 to ALL5,600 per hectare
Plots of land	ALL0.14 to ALL20 per square meter
Social security contributions, on monthly salary up to ALL105,850; paid by	

Nature of tax	Rate
Employer	15%
Employee	9.5%
Health insurance contributions on monthly gross salary; paid by	
Employer	1.7%
Employee	1.7%
Excise duties imposed on specified goods (tobacco products, coffee, alcoholic beverages, petrol, diesel, fuel, kerosene and lubricants); the tax is calculated as a specific amount per unit	Various
Consumption tax for petrol, gas, oil and coal	ALL27 per liter

E. Miscellaneous matters

Foreign-exchange controls. Albania has a free foreign-exchange market. The Albanian currency, the lek (ALL), is fully convertible internally.

Residents and nonresidents may open foreign-currency accounts in Albanian banks or foreign banks authorized to operate in Albania. Residents may also open accounts in banks located abroad. All entities must properly document all of their money transfers to comply with the regulations of Bank of Albania. No limits are imposed on the amount of foreign currency that may be brought into Albania. Hard-currency earnings may be repatriated after the deduction of any withholding tax.

Transfer pricing. Albanian transfer-pricing rules were introduced in June 2014 and are aligned with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines of 2010. Under these rules, taxpayers engaged in controlled transactions are required to maintain transfer-pricing documentation, which must be submitted within 30 days following the tax authorities' request. Failure to prepare transfer-pricing documentation is not sanctioned with penalties, but fulfilling the requirement protects the taxpayer from the assessment of penalties in the event of transfer-pricing-related audit adjustments. Such penalties equal 0.06% of the amount of the unpaid liability for each day of delay, capped at 21.9% (equivalent of 365 days).

Only cross-border and controlled transactions are subject to the transfer-pricing rules. Consequently, domestic transactions are not subject to the rules. Controlled transactions are transactions between related parties, dealings between a permanent establishment and its head office, and transactions with an entity resident in a tax-haven jurisdiction. Two persons are considered related parties if either one of them participates directly or indirectly in the management, control or capital of the other, or the same person(s) participate(s) directly or indirectly in the management, control or capital of the two parties; that is, the same person owns 50% or more of the share capital of the other person or effectively controls the business decisions of the other person.

The transfer-pricing rules refer to the application of the most appropriate method among the OECD transfer-pricing methods, which are comparable uncontrolled price, resale price, cost-plus, transactional net margin and profit-split. If it can be proved that

none of the approved methods can be reasonably applied, taxpayers are allowed to use other more appropriate methods.

Taxpayers are required to submit by 31 March of the following year a Controlled Transaction Notice, which lists the intercompany transactions and the transfer-pricing methods applied to these transactions, if their controlled transactions, including loan balances, exceed in aggregate ALL50 million (approximately EUR363,000).

Failure to timely submit the Controlled Transaction Notice subjects the taxpayer to a penalty of ALL10,000 (approximately EUR70) for each month of delay.

In October 2018, the Albanian government approved the agreement with the OECD for Albania to join the Inclusive Framework on Base Erosion and Profit Shifting.

Debt-to-equity rules. Albanian tax law includes thin-capitalization rules with respect to the deduction of interest on loans, which apply if the debt-to-equity ratio exceeds 4:1. The ratio applies to all debts owed to related and unrelated parties as well as to loans obtained from financial institutions. However, the limitation does not apply to banks and insurance and leasing companies. For related-party loans, the net interest expense balance (that is, the difference between the interest expenses and interest revenues, exceeding 30% of EBITDA) is not deductible. Such interest not deductible in the current period can be carried forward to future tax periods, provided that a change of 50% in the entity's ownership does not occur.

F. Treaty withholding tax rates

Albania has entered into tax treaties with several countries. In October 2018, the Albanian Council of Ministers approved for Albania to become a signatory jurisdiction and party to the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument, or MLI), announcing that Albania will enter its reservations and observations. The rates of withholding tax in Albania's tax treaties are described in the following table.

	Dividends	Interest	Royalties
	%	%	%
Austria	5/15 (a)	5 (b)	5

- (a) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
- (b) Interest on government and central bank loans is exempt from withholding tax.
- (c) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 50% of the payer and that has invested at least USD250,000 in the capital of the payer. The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the payer. The 15% rate applies to other dividends.
- (d) The 5% rate applies to interest paid on loans granted by banks or other financial institutions. The 10% rate applies in all other cases.
- (e) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 75% of the capital of the payer. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The 10% rate applies to other dividends.
- (f) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
- (g) The 0% rate applies if the beneficial owner of the dividends is a government, a government institution or an agency of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer. The 10% rate applies to other dividends.
- (h) The 0% rate applies if the beneficial owner of the dividend is a government, a government institution or an agency of the other contracting state. The 5% rate applies to other dividends.
- (i) The 5% rate applies if the beneficial owner of the dividend is a company that holds directly at least 25% of the capital of the payer or is a pension scheme. The 10% rate applies to other dividends.

Albania has signed tax treaties with India and Luxembourg, but these treaties have not yet entered into force.

Net Operating Losses (Years)	
Carryback	0
Carryforward	4

(a) For details regarding these rates, see Section B.

(b) The higher rate applies to payments to nonresident individuals or companies.

B. Taxes on corporate income and gains

Corporate income tax. The following companies are subject to corporate income tax (Impôt sur le Bénéfice des Sociétés, or IBS):

- Resident companies (those incorporated in Algeria)
- Nonresident companies that have a permanent establishment in Algeria

In general, IBS is levied on income realized in Algeria, which includes the following:

- Income derived from trading activities carried out by companies
- Income of representative agents of companies

- Income of companies that do not have an establishment or a representative agent but realize a complete cycle of commercial activities

Tax rates. The following are the IBS rates:

- 19% for companies carrying out production activities
- 23% for companies engaged in the construction sector and tourism
- 26% for companies carrying out other activities, such as importation and resale in the same condition

If a company engages in more than one of the above activities, it should prepare an analytical accounting so that it can apply the appropriate rate to each activity. Otherwise, the 26% rate applies.

Tax incentives. Law No. 16-09 relating to the development of investments, which amended Law 01-03, provides for different levels of investment incentives applicable to national and foreign investments made in the production of goods and services, and investments made within the framework of the granting of a license and/or a concession.

For purposes of the above law, investments include the following:

- Acquisition of assets included in the creation of new activities, capacity of production extension, rehabilitation and restructuring
- Participation in the share capital of an Algerian company

Before the investments are made, they must be registered with the National Agency for Investment Development (Agence Nationale pour le Développement des Investissements, or ANDI) to benefit from the incentives discussed below. Investments of DZD5 billion or more, as well as those that serve particular interest of the national economy are subject to the prior decision of the National Investment Council.

The advantages granted by the ANDI to investors depend on the investment's structure, as provided by Law 16-09.

Common advantages for all eligible investments. The advantages described below apply to national and foreign investments made in the activities of production of goods and services as well as investments made within the framework of the granting of a license and/or a concession.

For investment projects in northern areas, during the setting up of their investments, companies may benefit from the following advantages:

- Exemption from customs duties on imported equipment directly involved in the investment setup
- Exemption from value-added tax (VAT) on goods and services directly involved in the investment setup
- Exemption from property transfer tax and land publication fees on all property acquisitions made within the framework of the registered investment
- Exemption from registration duties, land publication fees and state-owned property remuneration, for granted built and unbuilt property assigned to the investment setup
- Ninety percent deduction on the annual rental fee amount set by the government property authority for the investment setup period

- Exemption from land tax on real estate within the framework of the investment for a period of 10 years from the acquisition date
- Exemption from registration duties on acts of incorporation and capital increases

When operating in northern areas, companies may be granted the following advantages for three years:

- IBS exemption
- Tax on professional activity (see Section D) exemption
- 50% deduction on the annual rental fee amount set by the state property department

For investment projects in southern areas (the highlands and areas whose development requires a particular contribution of the state), during the setting up of their investments, companies may benefit from the following advantages:

- Exemption from customs duties on imported goods directly involved in the investment setup.
- Exemption from VAT on goods and services directly involved in the investment setup, whether they are imported or purchased on the local market.
- Exemption from transfer tax payable on real estate acquisitions made within the framework of the investment.
- Exemption from registration fees, land advertisement tax and the state-owned property remuneration on built and unbuilt properties granted for the investment projects' setup. This benefit applies for the minimum duration of the granted concession.
- Partial or total support by the state, after the ANDI's assessment of expenditures concerning infrastructure works needed for the setup of the investment.
- Exemption from land tax on real estate within the framework of the investment for a period of 10 years from the acquisition date.
- Exemption from registration duties on acts of incorporations and capital increases.
- Reduction of the annual rental fee amount set by the state property department, on the land concession for the investment projects' setup, in the following amounts:
 - A symbolic dinar per square meter is paid for a period of 10 years and 50% of the annual rental fee amount is paid beyond this period for investments located in localities within the highlands and other areas whose development requires a special contribution of the state.
 - A symbolic dinar per square meter is paid for a period of 15 years and 50% of the annual rental fee amount is paid beyond this period for investment projects implemented in the regions of the south.

During the investment exploitation period in southern areas, companies may be granted the following advantages for 10 years:

- IBS exemption
- Tax on professional activity (see Section D) exemption
- Fifty percent deduction on the annual rental fee amount set by the state property department

Additional advantages for privileged and jobs-creating activities. Particular tax and financial incentives are available under

legislation for tourist, industrial and agricultural activities, which cannot be cumulated with the advantages of Law No. 16-09 provisions. The investor benefits from the most advantageous incentive measure.

For investments that are set up in areas to be promoted and that are generating more than 100 permanent jobs, the duration of the tax exemption during the investment exploitation period is five years.

Exceptional advantages to investments serving a particular interest of the national economy. The following advantages are available to investments serving a particular interest of the national economy during the investment setup period:

- All the common advantages for the setup period
- Granting, according to the legislation in force, of exemptions or reduction of customs duties, taxes and other impositions with fiscal character and subsidies, aids or financial supports, and benefiting from any facilitation measures likely to be introduced
- After the National Investment Council agreement is signed, the possibility of the setup period advantages being transferred from the investor to contracting parties in charge of the investment setup for the investor

The following advantages are available to investments serving a particular interest of the national economy during the investment-exploitation period:

- Extension for a period of up to 10 years, of the duration of the common advantages granted during the exploitation period
- Granting of a duty-free purchase scheme for goods and materials used in the production of goods benefiting from the VAT exemption
- Granting for a period not exceeding five years exemptions or reductions of duties and taxes, including VAT, applied on the prices of goods produced within the framework of emerging industrial activities

Capital gains. Capital gains are included in ordinary income and taxed at the applicable IBS rate.

Capital gains derived from the sale of fixed assets are taxed differently, depending on whether they are short-term capital gains (on assets held for three years or less) or long-term capital gains (on assets held for more than three years).

The following percentages of capital gains derived from the partial or total sale of assets within the framework of industrial, commercial, agriculture or professional activities are included in taxable profits:

- 35% of long-term capital gains
- 70% of short-term capital gains

Capital gains derived from the sale of shares realized by nationals are taxed at a rate of 15%.

Unless otherwise provided by a double tax treaty, nonresident individuals and companies that derive capital gains from the sale of shares of an Algerian entity are subject to a final withholding tax at a rate of 20%.

Administration. An annual tax return must be filed with the tax administration within four months after the end of the financial year. Foreign companies carrying out activities in Algeria through a permanent establishment are subject to the same filing obligations as companies incorporated in Algeria. These obligations include the filing of an annual corporate tax return (IBS return, named G4 form or G4 Bis form), by 30 April of each year.

The IBS is generally paid in three down payments from 20 February to 20 March, from 20 May to 20 June and from 20 October to 20 November of the year following the financial year, if profit has been realized and used for the base of tax calculation. The amount of each down payment is equal to 30% of the IBS due on profits realized during the last closed financial year.

Permanent establishments of foreign companies must make an IBS down payment equal to 0.5% of the amounts billed every month. When filing the annual IBS return, these IBS down payments are offset against the IBS due.

Certain listed documents must be attached to the IBS return, including the balance sheet and a summary of the profit-and-loss account.

Taxes withheld at source and those paid in cash must be declared on a monthly tax return ("G 50" form). These taxes include the following:

- Personal income tax (Impôt sur le Revenu Global, or IRG)
- Withholding tax due on passive income and remuneration paid to nonresident service suppliers
- TAP
- IBS down payments
- VAT

This form must be filed within 20 days following the end of the month of payment of the relevant remuneration together with the payment of the related taxes.

Dividends. Dividends paid are subject to a 15% withholding tax, subject to double tax treaties.

Royalties. Unless otherwise provided by double tax treaties, a 24% withholding tax is imposed on royalties and remuneration for services paid to nonresident entities.

For contracts relating to the use of computer software, a tax allowance at a rate of 80% is applicable on the amount of the royalties. Consequently, the effective rate of the withholding tax is 4.8%.

A tax allowance at a rate of 60% is applied to the amount of the rent amount paid under an international leasing contract. As a result, the effective rate of the withholding tax is 9.6%.

For royalties benefiting from allowances, VAT must be paid in addition to withholding tax.

Foreign tax relief. The Algerian Direct Tax Code does not provide for foreign tax relief.

C. Determination of taxable income

General. The computation of taxable income is based on financial statements prepared according to generally accepted accounting principles, provided they are not incompatible with the provisions of the Algerian Direct Tax Code.

Taxable income is determined on the basis of profits and losses. Taxable income includes operating income and “extraordinary income,” such as capital gains, gains from the revaluation of business assets and subventions, subject to certain exclusions and business incentives.

In the determination of taxable income, any expenditure that is wholly, exclusively and necessarily incurred for the purposes of the exploitation of the business and the generation of income is deductible from gross income.

Financial expenses related to overseas loans, royalties, technical assistance fees and other fees payable in foreign currencies may be deducted for tax purposes during only the financial year of their effective payment.

Certain expenses are not deductible for tax purposes, including the following:

- Expenses, costs and rents of any type that are not directly assigned to operations (for example, premises leased for accommodation of members of the company’s management)
- Fines, interest on late payments and penalties, interest and increases in duties as a result of defaults or insufficiencies in tax returns or payments
- Gifts (except those for advertisements, the value of which does not exceed DZD500 per beneficiary)
- Subsidies or donations except those made to humanitarian organizations or associations or those made to nonprofit research organizations up to DZD1 million
- Restaurant, hotel and entertainment expenses not directly linked to the business
- Expenses paid in cash in the case of an invoice exceeding DZD300,000

Inventories. Inventories are valued at cost in accordance with the new Algerian accounting and financial system.

Provisions. Provisions are generally deductible for income tax purposes if they satisfy the following conditions:

- They are established for losses or charges that are clearly identified and likely to occur.
- They are recorded both in the books and financial statements.
- They are listed on the statement of reserves attached to the annual tax return.

Reserves or the portion of them that are not used in accordance with their intended purposes or no longer have a purpose in the following financial year must be added back to the income in such financial year. Abusive establishment of provisions may result in the provisions being added back to taxable income and related penalties applied.

Depreciation. Under the Algerian Direct Tax Code, depreciation of fixed assets must be calculated in accordance with the following:

- Generally accepted limits
- Applicable practices for each type of industry, business or operations
- Rules provided in tax laws with respect to the depreciation system

The following are the three depreciation methods:

- Straight-line method
- Progressive method
- Declining-balance method

The straight-line method is the standard method, while progressive or declining-balance methods may alternatively be used on election.

Under the Algerian Direct Tax Code, the basis of computation of deductible depreciation is limited for private passenger-type vehicles to a purchase value of DZD1 million. This cap of DZD1 million does not apply if such vehicles constitute the main object of the company's activities.

Relief for losses. Tax losses may be carried forward four years. They cannot be carried back.

Groups of companies. Under the Algerian Direct Tax Code, related companies subject to IBS may elect to form a tax-consolidated group. The parent company must make the election for this regime for a four-year period and the election must be accepted by the affiliated companies.

The group tax consolidation regime is based on the consolidation of the balance sheets of the related companies with the parent company.

A tax consolidation group may consist of an Algerian parent company and Algerian subsidiaries in which the parent company owns directly at least 90% of the capital if both of the following conditions are satisfied:

- The capital of the parent company is not owned partially or totally by the subsidiaries.
- 90% or more of the parent company is not owned by another company eligible to be a parent company.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
VAT; standard rate	19
Tax on professional activity	
General rates	1/2
Transport by pipeline of hydrocarbons	3
Apprenticeship tax	1
Training tax	1
Social security contributions (total rate of 35%); paid by	
Employer	26
Employees	9

Nature of tax	Rate (%)
Registration duties	
On sales of shares in stock companies and private limited companies	2.5
On sales of goodwill	5

E. Miscellaneous matters

Foreign-exchange controls. The currency in Algeria is the dinar (DZD).

Foreign-exchange regulations in Algeria are based on the principle of non-convertibility of Algerian dinars outside Algeria.

Payments or transfers made with respect to regular transactions within the meaning of Algerian regulations (including foreign-trade transactions involving goods and services) are free, provided that certain conditions are fulfilled (particularly the bank domiciliation [the procedure under which a local party registers a contract with a local bank] and the delivery of a transfer certificate by the tax authorities). Algerian accredited intermediary banks must operate these transactions.

Dividends, profits and net proceeds from investments or the liquidation of investments can also be freely transferred outside Algeria, subject to compliance with certain requirements (particularly, the delivery of a transfer certificate by the tax authorities.

The realization of foreign investments, directly or in partnership, except for share capital, must be financed through Algerian financing institutions.

Foreign loans from foreign banks are prohibited in Algeria. However, an exception is provided for foreign financing through a current-account contribution by a foreign shareholder. Executive Decree No. 13-320 of 26 September 2013 determines the terms and conditions for a current-account contribution by a foreign shareholder.

Nonresidents may open bank accounts in Algerian dinars and/or in foreign currencies at Algerian accredited intermediary banks. These bank accounts are subject to specific conditions on opening and operation.

Transfer pricing. Under the Algerian tax rules, for Algerian taxpayers that are owned or controlled by an enterprise located in Algeria or outside Algeria or that own or control an enterprise located in Algeria or outside Algeria, the income indirectly transferred to the related enterprise, either through an increase or decrease of purchase or sale price or through any other means, may be added back to the Algerian taxpayer's taxable income. In the absence of any relevant information for the reassessment of tax, the taxable income is determined by comparison with income of similar enterprises that are regularly operated.

Transfer-pricing documentation requirements. On request of the tax authorities, in the framework of a tax audit, enterprises or companies operating in Algeria and undertaking cross-border and domestic transactions with related parties are required to

provide their transfer-pricing documentation within 30 days from the date of the notification. Failure to answer or providing an insufficient answer triggers a 25% penalty per fiscal year calculated on the basis of the transfer-pricing reassessments resulting from the tax audit.

In addition, certain Algerian-based taxpayers (mainly companies belonging to foreign international groups, legal entities or businesses operating in the hydrocarbon industry) must file transfer-pricing documentation with their annual tax returns to the tax authorities. The lack of documentation or insufficient documentation at the time of the tax return filing triggers a DZD2 million tax penalty, and in the case of a tax audit, an additional penalty of 25% of deemed transferred profits applies.

Corporate Income Tax Rate (%)	30 (a)(b)
Capital Gains Tax Rate (%)	30 (c)
Branch Tax Rate (%)	30 (a)(b)
Withholding Tax (%)	
Dividends	10 (d)
Interest	5/10/15 (e)
Royalties	10
Payments for Services	6.5 (f)
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (g)

- (a) Income from certain activities, such as agriculture, forestry and cattle raising, is subject to tax at a rate of 15%. Mining activities are subject to tax at a rate of 25%. Oil and gas companies are subject to Petroleum Income Tax rather than Industrial Tax (corporate income tax). See Section B.
- (b) Tax exemptions or tax reductions are available under the Private Investment Law as well as specific legislation for micro, small- and medium-sized companies. For details, see Section B.
- (c) Gains derived from the sale of securities that are not subject to corporate income tax or personal income tax are subject to tax at a rate of 10%. If such gains are derived from treasury bills, treasury bonds and titles issued by the Angolan Central Bank (Banco Nacional de Angola, or BNA) with a maturity of at least three years or from shares of listed companies, a 50% tax relief may apply.

- (d) Certain dividends are exempt from tax (see Section B). A 5% rate applies to dividends paid by listed companies during a five-year period beginning on 19 November 2014.
- (e) In general, interest is subject to a 15% rate. However, certain interest, such as interest on shareholders loans, corporate bonds, bank deposits, treasury bills, treasury bonds and titles issued by the BNA is subject to a 10% rate. Interest on treasury bills and treasury bonds and titles issued by the BNA is subject to a reduced rate of 5% if the maturity is at least three years.
- (f) Some exceptions are available.
- (g) Mining companies may carry forward losses for seven years, up to a limit of 50% of the turnover.

B. Taxes on corporate income and gains

Corporate income tax. Companies carrying out industrial and commercial activities in Angola are subject to Industrial Tax (corporate income tax).

An Angolan company, which is a company that has its head office or effective place of management and control in Angola, is subject to Industrial Tax on its worldwide profits.

Foreign entities with a permanent establishment in Angola are subject to Industrial Tax only on profits imputed to the permanent establishment. The tax law provides a force of attraction principle for permanent establishments.

All companies, regardless of whether they have a permanent establishment in Angola, are subject to Industrial Withholding Tax on services supplied to entities established in Angola for tax purposes (for details, see *Rates of corporate tax*).

Industrial Tax taxpayers are classified into the following two groups of taxation:

- Group A: Companies with a share capital exceeding AOA2 million and with turnover exceeding AOA500 million, as well as permanent establishments of nonresident companies, public companies, associations and foundations.
- Group B: Companies with a share capital not exceeding AOA2 million and with turnover not exceeding AOA500 million. As a general rule, companies that do not fall into Group A are classified by default into Group B, unless a specific request is made.

Rates of corporate tax. The standard Industrial Tax rate is 30%.

Income from certain activities, such as agriculture, forestry and cattle raising, is subject to a reduced tax rate of 15%.

A new Private Investment Law was recently approved as Law No. 10/18 of 26 June 2018. This new law provides that no minimum amount is required for foreign or domestic (national) investments.

Benefits and incentives vary according to the type of regime to which the investment project is subject and the investment zones, among other factors.

The standard regime provides, among other benefits, a reduction of 20% on the final and provisional assessment rates for Industrial Tax purposes, and a 25% reduction on the Investment Income Tax rate on dividends. Both benefits have a duration of two years.

The special regime applies to investment projects in priority industry sectors. The benefits vary in accordance with the respective location, and include, among others, the following:

- Reduction of the Industrial Tax rate by a percentage ranging from 20% to 80%, for a period varying from two to eight years
- Fifty percent increase of the depreciation rates for an eight-year period
- Reduction of the Investment Income Tax rate on dividends and profits distributed or remitted, by a percentage ranging from 25% and 80%, for a period from two to eight years

The following are the priority sectors:

- Education, technical and professional training, higher education, scientific research and innovation
- Agriculture, food and agro-industry
- Specialized health services
- Reforestation, industrial transformation of forest resources and forestry
- Textiles, clothing and footwear
- Hotel and tourism
- Construction, public works, telecommunications and information technology
- Airport and railway infrastructure
- Production and distribution of electricity
- Sanitation and solid waste treatment

The following are the four investment zones:

- Zone A: Province of Luanda, the capital municipalities of the Provinces of Benguela and Huíla, and the municipality of Lobito
- Zone B: Provinces of Bié, Bengo, Cuanza-Norte, Cuanza-Sul, Huambo, Namibe and the other municipalities of Benguela and Huíla
- Zone C: Provinces of Cuando Cubango, Cunene, Lunda-Norte, Luanda-Sul, Malanje, Moxico, Uíge and Zaire
- Zone D: Province of Cabinda

Withholding tax. All companies, regardless of whether they have a permanent establishment in Angola, are subject to withholding tax on payments received for services rendered. The withholding tax applies regardless of whether the services are rendered in or outside Angola. The rate of the withholding tax is 6.5%.

The following services are excluded from withholding tax:

- Teaching and similar services
- Health services
- Services for which the amount paid does not exceed AOA20,000
- Passenger transportation services
- Lease of machinery and equipment subject to Investment Income Tax

A similar exclusion applies to financial and insurance intermediation services, hotel and similar services, and telecommunication services, if the service provider has a taxable presence in Angola. For local service providers, withholding tax does not apply to documented recharges between related parties. Payments for raw materials, parts and other materials are also excluded from the withholding tax base if the service provider has a taxable presence in Angola.

The payer must withhold the tax from each payment and remit the withholding tax to the Angolan government. The tax withheld is considered to be a payment on account if the recipient has a residence, head office or permanent establishment in Angola. Excess withholding tax can be carried forward for five years. Otherwise, the tax is final.

Special taxation regimes. Income from oil and gas extraction is subject to Petroleum Income Tax at a total rate of 50% (under production-sharing agreements) or 65.75% (under other types of joint ventures). Angolan companies benefit from a reduced Petroleum Income Tax rate equivalent to that of Industrial Tax. In addition, companies engaged in exploration for and production of Petroleum oil, gas and similar products must pay Petroleum Production Tax at a total rate of 20%. Petroleum Transaction Tax and a Surface Surcharge may also be levied at rates of 70% and USD300 per square kilometer, respectively. Petroleum Production Tax and Petroleum Transaction Tax are not payable under production-sharing agreements.

Contracts, such as production-sharing agreements, between oil and gas companies and the Angolan government generally override the Petroleum Production Tax and Petroleum Transaction Tax and may set forth different taxes and applicable rates.

Additional taxes and charges apply within the oil and gas and mining industries. Also, specific tax rules apply to the liquefied natural gas project, including withholding tax exemptions on certain interest, dividends, royalties and services income.

Capital gains. Capital gains on profits derived from the sale of fixed assets are subject to Industrial Tax at the regular tax rate of 30%. Capital gains on shares or other instruments generating investment income that is not taxable for Industrial Tax or personal income tax purposes are subject to Investment Income Tax at a rate of 10%.

However, a 50% relief is available for capital gains derived from listed shares or from corporate bonds, other securities, treasury bonds, treasury bills and BNA securities, if they are negotiated in a regulated market and if their maturity is of at least three years.

Administration. The tax year is the calendar year.

All companies engaging in activities in Angola must register with the tax department to obtain a taxpayer number.

Companies, including foreign companies with a permanent establishment in Angola, must file an annual Industrial Tax return, together with their financial statements and other documentation, by the end of April (Group B taxpayers) or May (Group A taxpayers) of the following year.

Companies must make an advance payment of Industrial Tax in July or August, depending on the type of taxpayer. The advance payment corresponds to 2% of the turnover derived from the sale of goods and services not subject to Industrial Tax withholdings during the first six months of the tax year.

Penalties are imposed for a failure to file tax returns and other required documents. If, on the final assessment, the tax authorities

determine that a further payment is required and that the taxpayer is at fault, a penalty of up to 35% and compensatory interest at a rate of 1% per month or fraction of a month is imposed, in addition to the unpaid tax. Late payment interest also applies to non-payment of the above tax debt.

Dividends. Companies are not subject to Industrial Tax on the gross amount of dividends received if the dividends have been subject to Investment Income Tax.

The 10% Investment Income Tax, which is withheld at source, is imposed on dividends.

The Investment Income Tax Code contains a participation exemption measure. Under this measure, the 10% withholding tax exemption applies to dividends received by Angolan parent companies from Angolan subsidiaries, subject to minimum 25% and one-year holding requirements.

Foreign tax relief. In general, no relief is granted for foreign taxes paid by Angolan taxpayers.

C. Determination of trading income

General. Taxable income is the income reported in companies' financial statements, subject to certain adjustments. Expenses considered indispensable in the production of income and the maintenance of a production unit are deductible. The following expenses, among others, are not deductible and are added back to taxable income for Industrial Tax purposes:

- Provisions and depreciation deemed to be unlawful, excessive or unauthorized by the tax authorities
- Bad or irrecoverable debts
- Interest on shareholders loans
- Angolan personal income tax, social security contributions due from the employer, Investment Income Tax and Urban Property Tax
- Costs associated with rented property
- Costs related to previous years
- Donations not covered by the Law of Patronage
- Non-documented expenses and improperly documented expenses
- Confidential expenses (an expense is considered a confidential expense if no valid documentation legally supports the expense and if its nature, function or origin are not materially justifiable)
- Fines and penalties

Rental income subject to Urban Property Tax and income subject to Investment Income Tax is excluded from the computation of the Industrial Tax base.

Stand-alone tax for certain expenses that are nondeductible for Industrial Tax purposes. Certain expenses that are nondeductible for Industrial Tax purposes are subject to a stand-alone tax, effective from 2017. This tax applies to improperly documented expenses (2%), non-documented expenses (4%), confidential expenses (30%, or 50% in certain situations) and donations not made in accordance with the Law of Patronage (15%).

Inventories. Inventories may be valued by any currently acceptable method provided that the method is consistently applied and is based on documented purchase prices.

Provisions. Provisions for the following items are allowable:

- Bad debts up to 4% (for the annual allowance regarding the booking of a new provision or the increasing of a previous balance) or 10% (accumulated balance) of clients' receivables, if, among other requirements, such credits have been legally claimed and are due for more than six months and if steps to collect the claim have been undertaken
- Provisions imposed by the public regulatory authorities of financial, insurance and gambling businesses
- Litigation processes regarding facts underlying the litigation claims that would represent costs of that year
- Depreciation in the value of inventory, provided that it does not exceed 0.5% to 3% in the current year (depending on the nature of the activity), up to a limit that can vary between 2.5% and 12% of the value of the inventory

Tax depreciation. Depreciation rates are provided in the law. The following are some of the applicable rates.

Asset	Rate (%)
Vehicles	16.67 to 25
Office buildings	4
Industrial buildings	4 or 6
Machinery, equipment and devices	12.5 to 33.33
Furniture	8.33 to 50

These rates may vary depending on the industry sector.

Relief for losses. Companies may carry forward tax losses for three years. This period is increased to seven years for mining companies (up to a limit of 50% of the turnover). No carryback is allowed.

Groups of companies. The Large Taxpayers Statute entered into force in October 2013. It establishes that Angolan Large Taxpayers that are integrated in a group of companies may be taxed on the sum of the taxable results obtained by the entities included in the group. For such purpose, a special request through a specific official form (Modelo 5) must be submitted to the tax authorities by the end of February following the tax year for which the application of this special regime is requested. The Chief of the Large Taxpayer's Tax Office must expressly approve this request and, accordingly, the application of the group taxation regime.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Training levy, on oil and gas exploration and production companies and their subcontractors	
Production companies and companies engaged in refining and processing of petroleum	USD0.15 per barrel
Companies owning a prospecting license	USD100,000 a year
Exploration companies	USD300,000 a year

Nature of tax	Rate
Subcontractors under a contract with a term exceeding one year (levied on annual gross income) and entities engaged in the storage, transport, distribution and trading of petroleum (levied on revenue derived from such activities)	0.5%
Stamp duty	
On the amount of receipts	1%
On the acquisition of real estate	0.3%
On leasing and subleasing of real estate	0.1%/0.4%
On company's capital	0.1%
On guarantees	0.1% to 0.3%
On financing	0.1% to 0.5%
On financial leasing of real estate	0.3%
On leasing of movable property	0.4%
On imports	1%
On certain exports	0.5%
Consumption tax; rate varies according to type of good and service	2% to 80%
Custom duties on imports	2% to 50%
Customs emoluments	2%
Urban Property Tax; imposed on 60% of the gross rent	25%
Urban Property Transfer Tax	2%
Social security contributions, on salaries and additional remuneration; the contributions are not payable by expatriates working in Angola if they make contributions to the social security scheme or a similar scheme in their home countries; paid by	
Employer	8%
Employee	3%
Special Contribution on Invisible Exchange Transactions; applicable to payments for services provided by nonresident entities under technical assistance or management contracts	10%

It is expected that a value-added tax (VAT) will enter into force in 2019. Parliament is discussing a draft law. It is expected that the VAT will have a 14% rate.

E. Miscellaneous matters

Foreign-exchange controls. The Ministry of Economy, together with the BNA, supervises all foreign-exchange operations. Commercial banks usually act as intermediaries of companies to obtain clearance from the BNA.

The BNA issued Bank Order No. 13/13, of 31 July 2013, which was published in the *Official Gazette* of 6 August 2013. This order sets out the new foreign-exchange procedures to be adopted with respect to current invisible operations. Notwithstanding the foreign exchange integrated reporting system (SINOC), to simplify the monitoring procedures regarding the current invisible operations, the order establishes the following new thresholds for transactions that do not require prior approval by the BNA:

- Transactions amounting up to AOA300 million or the equivalent in another currency carried out by oil and gas service providers
- Other transactions up to AOA100 million or the equivalent in another currency

Operations with a value exceeding the above mentioned thresholds must be cleared in advance by the BNA.

In general, repatriation of profits is allowed for approved foreign-investment projects if certain requirements are met. In certain cases, a time schedule for repatriation of profits may be imposed.

However, the oil and gas sector is subject to a specific foreign-exchange control regime, which aims primarily to establish uniform treatment in this sector by replacing the multiple exchange regimes that have been applied to oil and gas upstream companies operating in Angola, thereby providing fair treatment to all investors.

These foreign-exchange control rules cover the trade of goods, current invisible operations (according to the Angolan National Bank Instructive, these operations are services, royalties, interest, travel costs and salaries) and capital movements arising from the prospecting, exploration, evaluation, development and production of crude oil and natural gas.

For purposes of the rules, exchange operations encompass the following:

- Purchase and sale of foreign currency
- Opening of foreign currency bank accounts in Angola by resident or nonresident entities and the transactions carried out through these bank accounts
- Opening of national currency bank accounts in Angola by nonresident entities and the transactions carried out through these bank accounts
- Settlement of all transactions of goods, current invisible operations and capital movements

Thin-capitalization rules. No thin-capitalization rules are in effect in Angola. However, interest on shareholders' loans is not deductible for Industrial Tax purposes.

Anti-avoidance legislation. The arm's-length principle applies in Angola. Consequently, the tax authorities may adjust the taxable income derived from transactions between related parties.

Related-party transactions. The Large Taxpayers Statute contains specific rules governing "special relations" between taxpayers, which entered into force in October 2013. Under this regime, a special relationship is deemed to occur if one entity exercises, directly or indirectly, a significant influence on the management decisions of another entity. The law also establishes that a Large Taxpayer that has annual turnover exceeding AOA7 billion at the date of closing the accounts must prepare and submit a transfer-pricing file to the Angolan tax authorities. This transfer-pricing file, which must be prepared on an annual basis, must detail the relationships and prices established by the Large Taxpayers with the companies and entities with which they have "special relations." The transfer-pricing file must be submitted by the end of

the sixth month following the year-end to which the file relates. With respect to the economic analysis of the transactions, the new regime provides for the application of the following methods only:

- Comparable uncontrolled price method
- Resale-minus method
- Cost-plus method

Invoice requirements. Effective from 1 December 2013, new requirements are imposed with respect to the keeping and archiving invoices or equivalent documents by individuals or legal entities with their domicile, registered office, effective management or permanent establishment in Angola. A new regime has been approved and will enter into force in April 2019. It adjusts the invoicing requirements in anticipation of the expected entry into force of the VAT (see Section D). It introduces the requirement of certified invoicing software.

Tax-neutrality regime for mergers and demergers. A tax-neutrality regime for mergers and demergers has been introduced for Industrial Tax purposes at the level of the merged or spun-off companies, but not at the level of the respective shareholders. However, this regime applies only to companies that are classified as Large Taxpayers in the Large Taxpayers Statute (see *Groups of companies* in Section C).

F. Tax treaties

Angola does not currently have any tax treaties in force. However, it recently signed a tax treaty with Portugal.

Angola has entered into an agreement with Portugal on the reciprocal promotion and protection of investments. However, this agreement does not provide any specific tax benefits.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	0/15/30 (b)
Branch Tax Rate (%)	30 (a)
Withholding Tax (%)	
Dividends	0/7/35 (c)
Interest	15.05/35 (d)
Royalties from Patents, Know-how, etc.	21/28/31.5 (d)
Branch Remittance Tax	0/7/35 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The corporate income tax rate is 30% for fiscal years starting 1 January 2018 to 31 December 2019, and 25% for fiscal years starting 1 January 2020 and onward.
- (b) The 15% rate generally applies to capital gains derived by foreign residents from sales of shares, quotas and other participations in entities. Capital gains derived by foreign residents from listed shares and corporate and government bonds, under certain circumstances, can benefit from an exemption. Argentine corporate residents are subject to the regular 30% corporate rate.
- (c) A 7% dividend withholding tax rate applies to dividends paid out of profits accrued during fiscal years starting from 1 January 2018 to 31 December 2019. The rate will be 13% for dividends paid out of profits accrued in fiscal years starting from 1 January 2020 and onward. The above-mentioned rates apply to distributions made to resident individuals or foreign investors, while distributions to resident corporate taxpayers are not subject to withholding. A 0% dividend withholding tax rate generally applies to dividends paid out of profits accrued during fiscal years that started before 1 January 2018; however, in these cases, a 35% withholding tax (known as “equalization tax”) is triggered if the distribution exceeds the after-tax accumulated taxable income of the taxpayer.
- (d) These are final withholding taxes imposed on nonresidents only. For details concerning the rates, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are taxed on worldwide income. Any profits, including capital gains, are taxable. Companies incorporated in Argentina and branches of foreign companies are considered to be resident companies.

Rates of corporate tax. Corporate tax is payable at a rate of 30%.

Capital gains. Capital gains derived by tax-resident companies are included in taxable income and taxed at the regular corporate tax rate. Capital gains derived by foreign residents from the sale, exchange, barter or disposal of unlisted shares, quotas, participations in entities and titles are subject to a 15% tax (indirect sales are included under certain conditions). This tax may be calculated on actual net income or on 90% presumed income, thereby resulting in an effective 13.5% tax on the sale price.

Capital gains derived by foreign residents from the transfer of listed shares are covered by an exemption, to the extent that the investor is not resident in, and the funds do not arise from, “non-cooperating” jurisdictions.

Administration. The tax year for a company is its accounting year. Companies are required to make 10 advance payments of corporate income tax. The first payment is equal to 25% of the preceding year’s tax and the other payments are each equal to 8.33% of such tax. The payments are due monthly beginning in the sixth month after the end of the accounting year. The due dates depend on the company’s taxpayer registration number.

Companies must file their tax returns and pay any balance due by a specified date in the fifth month after their accounting year. If the payment is late, interest is charged.

Dividends. The dividend withholding tax rates are 7% for profits accrued during fiscal years starting from 1 January 2018 to 31 December 2019, and 13% for profits accrued in fiscal years starting from 1 January 2020 and onward. The above-mentioned rates apply to distributions made to resident individuals or foreign investors, while distributions to resident corporate taxpayers

are not subject to withholding tax. A 0% dividend withholding tax rate generally applies for profits accrued during fiscal years that started before 1 January 2018; however, in these cases, a 35% withholding tax (known as “equalization tax”) is triggered if the distribution exceeds the after-tax accumulated taxable income of the taxpayer.

Withholding taxes on interest and royalties. Final withholding taxes are imposed on interest and royalties paid to nonresidents.

A withholding tax rate of 15.05% applies to the following types of interest payments:

- Interest on loans obtained by Argentine financial entities
- Interest on loans granted by foreign financial entities located in the following jurisdictions:
 - Jurisdictions not considered to be low- or no-tax jurisdictions under Argentine rules
 - Jurisdictions that have signed exchange-of-information agreements with Argentina and have internal rules providing that no banking, stock market or other secrecy regulations can be applied to requests for information by the Argentine tax authorities
- Interest on loans for the importation of movable assets, except automobiles, if the loan is granted by the supplier of the goods

The withholding tax rate for all other interest payments to nonresidents is 35%.

The general withholding tax rate for royalties is 31.5%. If certain requirements are satisfied, a 21% rate may apply to technical assistance payments and a 28% rate may apply to certain royalties.

Foreign tax relief. Resident companies may credit foreign income taxes against their Argentine tax liability, up to the amount of the increase in that liability resulting from the inclusion of foreign-source income in the tax base.

Direct and indirect foreign tax credits are available. To qualify for an indirect foreign tax credit, an Argentine company must own directly at least 25% of a first-tier subsidiary’s shares. In addition, for a foreign tax credit regarding a second-tier subsidiary, an Argentine company must have an indirect ownership interest of at least 15%. The credit does not apply below the second tier.

C. Determination of trading income

General. Tax is applied to taxable income, which is the accounting profit earned in the tax period after adjustments provided for by the tax law. Exemptions are usually insignificant.

Expenses are deductible to the extent incurred in producing taxable income, subject to certain restrictions and limitations, including, among others, those applicable to the following:

- Representation expenses
- Directors’ fees
- Royalties for patents and trademarks paid to nonresidents

Depreciation, rental payments and all other automobile expenses, such as license fees, insurance, fuel and maintenance, are also deductible, subject to certain restrictions. In general, certain limitations apply to the deductibility of interest payments to foreign related entities (see Section E).

Any expense incurred by an Argentine company in favor of a foreign related party that is deemed Argentine-source income for the recipient of the payment can be deducted for tax purposes in the year of accrual only if the payment is made by the date when the income tax return for that year is due. Otherwise, such expenses must be deducted in the year of payment. This limitation also applies to expenses paid to individuals or entities located in “non-cooperating” or “low- or no-tax” jurisdictions, regardless of whether they are related parties.

Foreign-exchange losses. Foreign-currency gains and losses arising from customary business transactions are normally treated as business income or expenses for the year in which the exchange fluctuation occurs. In the case of debts with related parties, foreign-exchange losses are subject to the same deduction restrictions as interest.

Inventories. Stock is valued according to procedures established by the tax law, which result in values nearly equal to its market value or replacement cost at the end of the tax period, depending on the type of goods.

Provisions. A provision for bad debts is allowed. However, it must be computed according to rules prescribed by the tax law.

Depreciation. Tangible assets may be depreciated using the straight-line method over the assets’ expected lives. A method based on effective use may also be acceptable. In general, buildings are depreciated at an annual rate of 2%. However, a higher rate may be acceptable if it is established that, because of the materials used to construct the building, the expected useful life is less than 50 years. The law does not specify rates for movable assets. Intangible property may be depreciated only if it has a limited life based on its characteristics. Certain assets, such as goodwill and trade names, may not be depreciated.

Inflationary adjustment. Adjustment for inflation is allowed in accordance with the following rules:

- Inflation adjustment of new acquisitions and investments carried out from 1 January 2018 and onward.
- Application of an integral inflation adjustment mechanism for fiscal years beginning on or after 1 January 2018 if the variation of the Consumer Price Index supplied by the National Institute of Statistics and Censuses is higher than 100% for the 36-month period before the end of the fiscal period. For the first three years (2018, 2019 and 2020), special thresholds of 55%, 30% and 15% have been established.

Revaluation option. Argentine-resident individuals and companies have the option to re-evaluate for tax purposes their assets located in Argentina that generate taxable income. The revaluation option applies for the first fiscal period that ends after 30 December 2017 (for example, for fiscal periods ending on 31 December, the revaluation option applies to the year-end of 31 December 2017).

The new tax value of the assets is determined by applying a “revaluation factor,” to the tax value originally determined in each year or period of the asset’s acquisition or construction. In the case of immovable or movable property qualifying as fixed

assets, the value may be determined by an independent appraiser under certain conditions.

In addition, the law imposes a one-time special tax on the amount of the revaluation. The applicable rate varies depending on the assets revalued. The following are the rates:

- Real estate (regarded as capital assets): 8%
- Real estate (regarded as inventories): 15%
- Shares, quotas and other participations in Argentine companies owned by resident individuals: 5%
- All other assets (except inventories and cars, which may not be revalued): 10%

Relief for losses. Tax losses may be carried forward for five tax periods. Losses resulting from sales of shares or from foreign-source activities may offset only the same type of income. Loss carrybacks are not permitted.

Except for hedge transactions, losses resulting from the rights contained in derivative instruments or contracts may offset only the net income generated by such rights during the fiscal year in which the losses were incurred or in the following five fiscal years. For this purpose, a transaction or contract involving derivatives is considered a hedge transaction if its purpose is to reduce the impact of future fluctuations in market prices or fees on the results of the primary economic activities of the hedging company.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods delivered and services rendered in Argentina, on services rendered outside Argentina that are used or exploited in Argentina, and on imports	
Standard rate	21
Other rates	2.5/5/10.5/27
Tax on financial transactions; generally imposed on debits and credits with respect to checking accounts; a portion of the tax may be creditable against other taxes	
General rate	0.6
Other rates	0.05/0.075/0.1/ 0.25/0.5/1.2
Various local taxes on gross receipts, real estate and other items	Various
Social security taxes (including medical care contributions), on monthly salaries; paid by employer; a portion may be creditable against VAT; the creditable portion varies depending on where the employees render services	24/26.4
(the rates of the social security taxes will gradually converge to 19.5% in 2022; the creditability will be gradually reduced to 0% in 2022)	

Nature of tax	Rate (%)
Export duties on goods; general rate; other rates apply to certain exports (oil, grains and others)	12 (with a maximum of ARS3 or ARS4 per dollar depending on the product)
Export duties on services	12 (with a maximum of ARS4 per US dollar)
Tax on personal assets; imposed on all legal persons and individuals domiciled abroad holding ownership interests in Argentine companies; tax is calculated based on the equity value of the Argentine company; tax is paid by the Argentine company, but the company may recover the tax paid from the foreign shareholder	0.25

E. Miscellaneous matters

Foreign-exchange controls. Since December 2015, the Executive Branch and the Central Bank have issued regulations to provide flexibility for the foreign-exchange controls to simplify the access to the Argentine foreign-exchange market.

Interest deductibility limitation. Under general principles, transactions between related parties must be made on an arm's-length basis.

The Argentine income tax law establishes a limit for the deduction of interest arising from financial loans granted by related parties. The limit equals 30% of earnings before interest, taxes, depreciation and amortization (EBITDA) or a certain amount to be determined by the Executive Branch, whichever is higher. The limit each year is increased by the amount unused (if applicable) in the prior three years. In addition, if certain interest was not deductible in a given year due to the application of the limitation, it can be carried forward for five fiscal years. For this purpose, interest includes foreign-exchange differences.

The law provides exemptions from the deduction limit for certain situations (for example, the interest is derived on loans obtained by Argentine banks and financial trusts or the beneficiary of the interest has been subject to tax on such income in accordance with the Argentine income tax law). In addition, the limitation does not apply to situations in which it is proved that the ratio of interest to EBITDA of the Argentine borrower is equal to or lower than the same ratio for its economic group with respect to debt with unrelated lenders for the same fiscal year.

Transfer pricing. The Argentine law includes transfer-pricing rules that generally apply to transactions between related parties. In addition, transactions between unrelated parties may also be subject to these rules. Transactions with entities and individuals located in "non-cooperating" or "low- or no-tax" jurisdictions are deemed to be not carried out at arm's length.

In addition, the Argentine law includes rules on analyzing transactions involving the import or export of goods with the participation of a foreign intermediary that is not the actual importer at destination or exporter at origin, respectively, if at least one of the foreign parties involved (that is, the intermediary, importer or exporter) is a related party. In these cases, the law requires proof that the foreign intermediary's remuneration is in line with the risks it assumes, the functions it carries out and the assets involved.

The law provides for the following transfer-pricing methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Transactional net margin method

For exports of goods with known prices and with the intervention of an intermediary that is related, or located in "non-cooperating" or "low- or no-tax" jurisdictions, the income tax law requires the Argentine exporter to file the agreements supporting the transactions with the federal tax authorities (Administración Federal de Ingresos Públicos, or AFIP). If the agreements are not filed, the Argentine-source income from the export is determined considering the known prices on the date the goods are loaded into the transportation vehicle, with appropriate comparability adjustments, if applicable.

F. Treaty withholding tax rates

Some of Argentina's tax treaties establish maximum tax rates lower than those under general tax law. To benefit from a reduced treaty withholding tax rate, certain formal requirements must be met. The following table shows the lower of the treaty rate and the rate under domestic tax law.

	Dividends (a)	Interest (c)	Royalties (c)
	%	%	%
Australia	10/15 (b)	0/12	10/15
Belgium	10/15 (b)	0/12	3/5/10/15 (d)
Bolivia	35	15.05/35	21/28/31.5 (g)
Brazil	10/35 (b)	15	10/15 (e)
Canada	10/15 (b)	0/12.5	3/5/10/15 (d)
Chile	10/15 (b)	4/12/15	3/10/15
Denmark	10/15 (b)	0/12	3/5/10/15 (d)
Finland	10/15 (b)	0/15	3/5/10/15 (d)
France	15	15.05/20	18
Germany	15	10/15	15
Italy	15	15.05/20	10/18 (f)
Mexico	10/15 (b)	0/12	10/15
Netherlands	10/15 (b)	0/12	3/5/10/15 (d)
Norway	10/15 (b)	0/12	3/5/10/15 (d)
Russian Federation	10/15 (b)	15	15
Spain	10/15 (b)	0/12	3/5/10/15 (d)
Sweden	10/15 (b)	0/12	3/5/10/15 (d)
Switzerland	10/15 (b)	0/12	3/5/10/15 (d)

	Dividends (a) %	Interest (c) %	Royalties (c) %
United Kingdom	10/15 (b)	0/12	3/5/10/15 (d)
Uruguay	35	15.05/35	21/28/31.5 (g)
Non-treaty jurisdictions	35	15.05/35 (f)	21/28/31.5 (g)

- (a) The rates shown in the table apply only if the corresponding domestic withholding rate is higher than the tax treaty rate. According to the domestic law, the dividend withholding tax rate is 7% for profits accrued during fiscal years starting from 1 January 2018 to 31 December 2019. A 0% dividend withholding tax rate generally applies for profits accrued during previous fiscal years; however, in these cases, a 35% withholding tax (known as “equalization tax”) may be triggered if the distribution exceeds the after-tax accumulated taxable income of the taxpayer.
- (b) These treaties establish maximum rates of 10% or 15%. The 10% rate applies if the beneficial owner of the dividend is a company that controls, directly or indirectly, at least 25% of the voting power of the payer. The 15% rate applies to other cases.
- (c) The rates listed are the lower of the treaty or statutory rates. For details concerning the domestic rates, see Section B.
- (d) In general, the rates apply to the following categories of payments:
- 3% for the use of, or right to use, news
 - 5% for the use of, or right to use, copyrights of literary, dramatic, musical or other artistic works (but not royalties with respect to motion picture films and works on film or videotape or other means of production for use in connection with television)
 - 10% for the use of, or right to use, industrial, commercial or scientific equipment or patents, trademarks, designs, models, secret formulas or processes, or for the use of or information concerning scientific experience, including payments for the rendering of technical assistance
 - 15% for other royalties
- These categories may differ slightly from treaty to treaty.
- (e) The 15% rate applies to royalties for the use of, or right to use, trademarks. The 10% rate applies to other royalties, under certain conditions.
- (f) The 10% rate applies to royalties for the use of, or right to use, copyrights of literary, artistic or scientific works. The 18% rate applies to other royalties.
- (g) For details concerning these rates, see Section B.

Because of the rapidly changing economic situation in Armenia, changes are expected to be made to the tax law of Armenia. As a result, readers should obtain updated information before engaging in transactions.

B. Taxes on corporate income and gains

Corporate income tax. Resident and nonresident entities pay corporate income tax in Armenia. Resident organizations are organizations that are state registered in Armenia. Nonresident organizations are organizations established in foreign countries. Resident entities are taxed on their worldwide income, which consists of income received from sources in and outside Armenia. Nonresident entities are taxed on Armenian-source income only.

Income earned through a permanent establishment in Armenia, net of tax-deductible expenses, is taxed at the regular corporate income tax rate of 20%. A permanent establishment is defined as

a fixed place of business activities in Armenia recognized by the tax authorities through which the enterprise wholly or partly carries on its business. It generally includes organizations or natural persons who represent foreign legal entities conducting commercial activities in Armenia. Domestic tax law and double tax treaties list activities that do not result in a taxable permanent establishment. Foreign legal entities deriving income from the source in Armenia without a permanent establishment are subject to withholding tax on their Armenian-source income at a rate of 5%, 10% or 20% (see the withholding tax rates in Section A).

Armenian law allows foreign investment in various forms, including investment through wholly or partially foreign-owned subsidiaries, share participations in joint stock companies and joint ventures with Armenian legal entities and citizens, permanent establishments and other types of presence.

Tax rates. The regular corporate income tax rate is 20%. For investment funds, the corporate income tax rate is 0.01% of net assets.

Capital gains. No separate capital gains tax is imposed in Armenia. Realized capital gains are included in taxable income and are subject to tax at the regular corporate income tax rate.

Realized capital losses can be carried forward together with other losses and be offset against taxable income of future tax years.

Administration. The tax year is the calendar year.

Both Armenian and foreign legal entities conducting business activities in Armenia through a permanent establishment must make advance payments of corporate income tax during the year. They must make quarterly advance payments, in the amount of 20% of the actual amount of the corporate income tax for the preceding year, by the 20th day of the last month of the quarter. Both Armenian and foreign legal entities conducting business activities in Armenia through a permanent establishment can make quarterly advance payments of corporate income tax in the amount of 2% of revenues from the provision of goods and rendering of services during the preceding quarter, if they had submitted an application to tax authorities to choose the alternative method for making advance payments of corporate income tax before 20 March of the current tax year.

If the total sum of advance payments exceeds the tax due for the tax year and if the taxpayer applies for a refund, the excess is refunded to the taxpayer. However, in practice, refunds are rare, and accordingly, taxpayers apply overpayments against future tax liabilities.

The annual corporate income tax calculation must be filed and submitted to the Tax Inspectorate by 20 April of the year following the tax year. The corporate income tax must be paid to the state budget by 20 April of the year following the tax year.

Fines are charged on late tax payments at a rate of 0.075% of the tax due for each day of delay, up to a maximum of 730 days. If the taxpayer fails to submit the corporate income tax declaration to the Tax Inspectorate by the due date, a penalty equal to 5% of the

total amount of calculated tax is imposed on the taxpayer for each 15-day period. The total amount of the penalties cannot exceed the total amount of the principal tax liability. For the underreporting of taxable income, a penalty equal to 50% of the underreported amount is assessed to the taxpayer.

Dividends. Dividend withholding tax at a rate of 10% is imposed on dividends paid from Armenian sources to nonresident legal entities.

Dividends are considered to be paid on the date of the shareholders' decision on distribution of dividends from the reporting year's net profit. This rule applies to dividends attributable to periods after 1 January 2017.

Dividends paid to individuals who are citizens of Armenia are subject to 5% personal income tax. Dividends paid to individuals who are foreign citizens are subject to 10% personal income tax. These taxes are withheld at source.

Dividends paid to resident legal entities are not subject to withholding tax. Dividends received by resident taxpayers from participations in the equity of other legal entities or enterprises that do not have the status of a legal entity are not subject to tax.

Interest. Interest withholding tax at a rate of 10% is imposed on interest paid from Armenian sources to individuals and nonresident legal entities. Armenian legal entities receiving interest payments include such payments in their taxable income and are subject to tax on these payments at the normal corporate income tax rate.

Foreign tax relief. The amount of corporate income tax withheld from Armenian residents in foreign countries in accordance with the laws of the foreign countries is credited against the corporate income tax payable in Armenia. However, the amount of the credit may not exceed the amount of the corporate income tax payable in Armenia on the income received in the foreign country. If the amount of the credit exceeds the corporate income tax liability for the tax year, the excess amount may be credited against the corporate income tax in subsequent tax years.

C. Determination of taxable income

General. Taxable income is defined as a positive difference between gross income of the taxpayer and all deductions allowed by the law.

Gross income comprises all revenues of the taxpayer received in the reporting year, except for revenues that are not treated as income according to the law. Gross income includes the following:

- Trading income
- Capital gains
- Income from financial activities
- Gratuitously received assets and income from discounts or remissions of liabilities
- Other items of income

Income received in foreign currency is converted into drams at the daily exchange rate determined by the Central Bank of Armenia for the date of receipt of the income.

Deductible expenses include all documentary supported expenses. However, certain expenses are nondeductible or partially nondeductible for tax purposes.

Nondeductible expenses include, among others, the following:

- Fines, penalties and other proprietary sanctions transferred to the state and municipal budgets
- Assets provided, works performed and services provided free of charge and remitted (forgiven) debts
- Depreciation expenses of fixed assets owned by the taxpayer that are provided under finance leases
- Expenses related to the obtaining of income that is deductible from gross income
- Amount of value-added tax (VAT), excise tax and environmental tax that is offset (deducted) in accordance with the procedure established by the Republic of Armenia Tax Code
- The amount of VAT and excise tax calculated and paid in accordance with the procedure established by the Republic of Armenia Tax Code for goods delivered, works performed or services provided free of charge or at a substantially lower value
- For taxpayers other than banks and credit organizations, interest paid on loans and borrowings if such borrowings or loans are provided by the taxpayers to third parties free of interest
- Payments made by taxpayers for leased assets if the assets are provided by them to third parties for free-of-charge use

Partially nondeductible expenses include, among others, the following:

- Expenses for business trips outside Armenia that exceed 5% of the gross income for the tax year. The limit of 5% is not taken into account in the tax year of registration.
- Representative expenses exceeding 0.5% (but not more than AMD5 million) of the gross income for the tax year. The limit of 0.5% is not taken into account in the tax year of registration.
- Fees paid by the taxpayer for management services received from nonresident companies and individuals not having a permanent establishment in Armenia, exceeding 2% of the taxpayer's gross income for the reporting year. This measure does not apply to management services rendered to resident companies by their nonresident founders if the companies are engaged in innovative activities in the information technology and computer technique fields, as well as management services rendered to resident companies within the framework of international credit agreements.
- Payments made by the employer for an employee that are within the terms of voluntary pension insurance in accordance with the legislation and that exceed 7.5% of the employee's remuneration.
- Amounts of financial aid, food provided to individuals, costs for organization of social and cultural events and similar expenses, exceeding 0.25% of the taxable income for the tax

year. If there is no gross income during the tax year, the limit is 1% of the total salaries and payments accrued during the tax year.

- Interest paid on loans and borrowings to the extent that it exceeds twice the bank interest rate defined by the Central Bank of Armenia (currently the deduction is limited to a rate of 24%).
- For taxpayers other than banks and credit organizations, the amount of interest payable on borrowings from entities other than banks and credit organizations in excess of twice the positive amount of equity on the last day of the tax year.
- For banks and credit organizations, the amount of interest payable on borrowings from entities other than banks and credit organizations in excess of nine times the positive amount of equity on the last day of the tax year.
- For taxpayers other than banks and credit organizations, the part of interest paid on loans and borrowings that exceeds the amount of interest on loans and borrowings received by them from lending the same amount to other taxpayers.
- The part of payments made by taxpayers for leased assets that exceeds the payments received by them for providing the same assets to other taxpayers under subleases.

To calculate taxable income, the taxpayer must account for income and expenses on an accrual basis. Income and expenses are accounted for, respectively, from the moment of the acquisition of the right to receive such income or to recognize the expenses, regardless of the actual period of the deriving of such income or the making of such payments.

Inventories. Inventories are valued at acquisition cost. Costs for storage and transportation must be included in the value of inventory. The first-in, first-out (FIFO) method may be used to value inventory.

Provisions. Bad debts are deductible in accordance with the procedure established by the government of Armenia. Banks, lending organizations, investment companies and insurance companies may deduct bad debts in accordance with the procedure established jointly by the authorized body of the government of Armenia and the Central Bank of Armenia.

In addition, the gross income of banks, lending organizations, stock funds, investment companies or insurance companies may be reduced by a reserve for possible losses in accordance with the procedure established jointly by the authorized body of the government of Armenia and the Central Bank of Armenia.

Tax depreciation. Depreciation (amortization) allowances for fixed and intangible assets are deductible for tax purposes in accordance with the terms and conditions provided by the Republic of Armenia Tax Code.

The annual amount of depreciation (amortization) allowances of fixed and intangible assets is calculated by dividing the acquisition cost or revalued cost (the revaluation is carried out according to the procedure established by the law) of fixed and intangible assets by the number of years in the depreciation period for the appropriate group of fixed assets or for intangible assets. The following are the minimum depreciation periods.

Group	Assets	Minimum depreciation period (years)
1	Buildings and constructions of hotels, boarding houses, rest homes, sanitariums and educational institutions	10
2	Other buildings, constructions and transmission devices	20
3	Production equipment	5
4	Robot equipment and assembly lines	3
5	Computational and communication devices and computers	1
6	Other fixed assets, including growing cattle, perennial plants, and investments intended for improving the land	8

For purposes of the determination of taxable income, taxpayers may choose a depreciation period for fixed assets other than the periods mentioned in the above table, but the chosen period may not be less than one of the above-mentioned periods for the appropriate group.

Fixed and intangible assets with a value up to AMD50,000 are depreciated in the tax year of their acquisition.

Intangible assets are amortized over their useful economic lives. If it is impossible to determine the useful life of an intangible asset, the minimum amortization period for the asset is set at 10 years, but it may not exceed the period of the taxpayer's activity.

Under the law, land cannot be depreciated.

Relief for losses. Enterprises may carry forward a loss incurred in a tax year to the following five years. Losses may not be carried back.

Groups of companies. Armenian law does not contain any measures allowing members of a group to offset profits and losses.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on the delivery of goods and rendering of services, free or partially free consumption, the importation of goods through the "Release for Domestic Consumption" customs procedure and the importation of goods from the Eurasian Economic Union, with the exception of cases specified by law; reverse-charge VAT is imposed on entrepreneurial activities subject to VAT that are performed in Armenia by foreign entities (including the import of goods to be used by such entities)	0/20

Nature of tax	Rate (%)
Excise tax; imposed on certain goods (tobacco products, alcoholic beverages, petrol, diesel fuel and motor oils imported or produced in Armenia as well as natural gas filled in gas stations); the tax is calculated as a specified amount per unit or as a certain percentage of the price of goods subject to excise tax	Various
Real estate tax; generally imposed at local (municipal) level	
Buildings and constructions; tax base is cadastral value	0.1 to 1
Land; tax base is cadastral value or calculated net income	0.5 to 1
Vehicles tax; tax base is traction-motor power	Various

E. Foreign-exchange controls

The Armenian currency is the dram (AMD). The dram is a non-convertible currency outside Armenia. Enterprises may buy or sell foreign currencies through specialized entities in Armenia (banks, branches of foreign banks operating in Armenia, credit organizations, payment and settlement organizations, foreign-currency dealers and brokers licensed by the Central Bank of Armenia, foreign-currency exchange offices and foreign-currency auction organizers).

Armenia does not impose restrictive currency-control regulations. Individuals and enterprises may open bank accounts abroad without any restriction if they declare such accounts with the tax authorities. In general, all transactions performed in Armenia between resident legal entities or individuals must be performed in Armenian drams. Transactions between resident legal entities or private entrepreneurs and nonresident legal entities or private entrepreneurs may be conducted in other currencies.

F. Treaty withholding tax rates

Armenia has entered into tax treaties with 46 countries. The following table lists the withholding tax rates under these treaties. In general, if the withholding tax rate provided in a treaty exceeds the rate provided by the Republic of Armenia Tax Code, the domestic rate applies.

	Dividends %	Interest (1) %	Royalties %
Austria	5/15 (a)	0/10 (v)	5
Belarus	10/15 (b)	10	10
Belgium	5/15 (a)	0/10 (v)	8
Bulgaria	5/10	5/10 (ff)	5/10 (gg)
Canada	5/15 (d)	10	10
Czech Republic	10	5/10 (e)	5/10 (f)
China (mainland)	5/10 (g)	10	10
Croatia	0/10 (h)	10	5
Cyprus	0/5 (x)	5	5
Estonia	5/15 (i)	10	10
Finland	5/15 (i)	5	5/10 (j)
France	5/15 (k)	0/10 (v)	5/10 (l)
Georgia	5/10 (g)	10	5
Germany	7/10 (hh)	5	6

	Dividends	Interest (1)	Royalties
	%	%	%
Greece	10	10	5

Non-treaty jurisdictions	10	10	10

- (1) In several treaties, a 0% rate applies to interest paid to governmental entities, political or administrative-territorial subdivisions, local authorities, central banks or financial institutions owned or controlled by the government. This provision is not reflected in the rates shown in the table.
- (a) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (b) The 10% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (c) The 5% rate applies if the actual owner of the dividends is a company that has invested in the payer more than USD100,000 (or the equivalent amount in Armenian currency). The 10% rate applies in all other cases.
- (d) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends and if the capital invested by the beneficial owner exceeds USD100,000 (or the equivalent amount in Armenian currency) on the date of declaration of the dividends. The 15% rate applies in all other cases.
- (e) The 5% rate applies to interest on loans or credits granted by banks. The 10% rate applies in all other cases.
- (f) The 5% rate applies to royalties for the use of, or the right of use, literary, artistic or scientific works, including television or radio content (films and compact discs). The 10% rate applies in all other cases.
- (g) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital (assets) of the company paying the dividends. The 10% rate applies in all other cases.

- (h) The 0% rate applies if the actual owner of the dividends is a company that directly or indirectly holds at least 25% of the capital of the company paying the dividends for a minimum period of two years before the payment of the dividends and if the dividends are not subject to tax in Croatia. The 10% rate applies in all other cases.
- (i) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the assets of the company paying the dividends. The 15% rate applies in all other cases.
- (j) The 5% rate applies to the royalties for the use of, or the right of use, computer software, patents, trademarks, designs or models, plans or secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies in all other cases.
- (k) The 5% rate applies if the actual owner of the dividends is a company that directly or indirectly holds at least 10% of the assets of the company paying the dividends. The 15% rate applies in all other cases.
- (l) The 5% rate applies to the royalties for the use of, or the right to use, copyrights. The 10% rate applies in all other cases.
- (m) The 10% rate applies if the actual owner of the dividends is a company (other than a partnership) that owns at least 25% of the assets of the company paying the dividends. The 15% rate applies in all other cases.
- (n) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends for a minimum period of 12 months before the date of declaration of the dividends and if the capital invested by the beneficial owner exceeds USD100,000 or the equivalent amount in Armenian currency. The 10% rate applies in all other cases.
- (o) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (p) The 0% rate applies if the profits out of which the dividends are paid have been effectively taxed at the normal rate for profits tax and if the dividends are exempt from tax in the hands of the company receiving such dividends. The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 15% rate applies to dividends in all other cases.
- (q) The 5% rate applies if the capital invested by the actual owner of the dividends exceeds USD100,000. The 10% rate applies in all other cases.
- (r) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 25% of the assets of the company paying the dividends. The 10% rate applies in all other cases.
- (s) The 5% rate applies if the actual owner of the dividends is a company that directly holds at least 25% of the share capital of the company paying the dividends. The 10% rate applies in all other cases.
- (t) The 5% rate applies if the actual owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and if the capital invested by the beneficial owner exceeds CHF200,000 (or the equivalent amount in Armenian currency) on the date of receipt of the dividends. The 15% rate applies in all other cases.
- (u) The 5% rate applies if the actual owner of the dividends is a company that owns at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (v) The 0% rate applies to interest connected to sales on credit of industrial, commercial or scientific equipment or business assets, and to interest on loans granted by banking enterprises.
- (w) The 0% rate applies to the interest on loans granted by banking enterprises. The 10% rate applies in all other cases.
- (x) The 0% rate applies if the capital invested by the actual owner of the dividends exceeds EUR150,000. The 5% rate applies in all other cases.
- (y) The 0% rate applies if all of the following conditions are satisfied:
- The beneficial owner of the dividends is a resident of the other contracting state.
 - The beneficial owner of the dividends has held, directly or indirectly, at least 25% of the capital of the company paying the dividends for at least two years before the date of such payment.
 - Such dividends are not liable to profit tax in the other contracting state.
- (z) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting. The 10% rate applies in all other cases.

- (aa) The 0% rate applies if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the beneficial owner of the dividends satisfies all of the following conditions:
- It is a company that is a resident of the other contracting state.
 - It holds, directly or indirectly, at least 25% of the share capital of the company paying the dividends at the date of payment of the dividends.
 - It has invested at least GBP1 million (or the equivalent amount in any other currency) in the share capital of the company paying the dividends at the date of payment of the dividends.
- The 15% rate applies if dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6 by an investment vehicle that distributes most of this income annually and if such vehicle's income from this immovable property is exempted from tax. The 10% rate applies in all other cases.
- (bb) The 0% rate applies if the beneficial owner is a company (other than a partnership) that satisfies the following conditions:
- It holds directly at least 25% of the capital of the company paying the dividends.
 - It owned the holding for a period of at least two years before it made the claim for the 0% rate.
 - In the contracting state in which the company is resident, the company is relieved from tax on dividends by an exemption or would, but for this measure in the tax treaty, be entirely relieved by a credit for tax paid with respect to dividends paid by the company paying the dividends.
- The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (cc) The 5% rate applies if interest is paid with respect to loans granted by banking enterprises. The 10% rate applies in all other cases.
- (dd) The 5% rate applies if the actual owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (ee) The 0% rate applies if the beneficial owner is a company (other than a partnership) that satisfies the following conditions:
- It holds at least 25% of the capital or the voting power of the company paying the dividends.
 - It has owned the holding for a period of at least two years before it made the claim.
 - The dividends are exempt from tax in its hands.
- The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital or the voting power of the company paying the dividends. The 15% rate applies in all other cases.
- (ff) The 5% rate applies to interest on loans or credit granted by banks or financial institutions. The 10% rate applies in all other cases.
- (gg) The 5% rate applies to royalties received as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting. The 10% rate applies in all other cases.
- (hh) The 7% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (ii) The 5% rate applies if the interest is paid in connection with a loan or a credit granted by a bank. The 10% rate applies in all other cases.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25
Branch Tax Rate (%)	25
Withholding Tax (%)	
Dividends	0/5/10 (a)
Interest	0
Royalties from Patents, Know-how, etc.	0
Foreign-Exchange Commission	1.3 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The 0% rate applies to dividends paid to resident holding companies. The 5% rate applies to dividends paid to nonresident publicly traded companies and to dividends paid on qualifying shareholdings under applicable tax treaties. The 10% rate applies in all other circumstances.
- (b) A foreign-exchange commission is imposed on all payments by residents to nonresidents. The commission is withheld by banks on behalf of the Central Bank of Aruba.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on resident and nonresident entities. A domestic entity is an entity that is established in Aruba or incorporated under Aruban law.

Tax is levied on total profits earned from all sources during the company's accounting period. "Profit" means the total of net gains, under any name or in any form. Branches of foreign entities are taxed on Aruban-source income, such as profits earned through a permanent establishment.

Permanent establishment. A permanent establishment is deemed to exist in Aruba in the case of the following:

- A permanent representative in Aruba.
- A foreign enterprise that builds, installs, maintains, cleans or repairs capital assets on Aruba for more than 30 days. These 30 days include, among others, days spent on the technical preparation and cleaning up of the site.

Rate of corporate income tax. The corporate income tax rate is 25%.

Special tax regimes for certain companies. Special tax regimes available for certain companies in Aruba are described below.

Free-Zone Companies. Companies operating in the free zone are subject to corporate income tax at a rate of 2% on profits derived from their qualifying activities and to a free-zone facility charge of up to 1% on their annual gross turnover. The free zone is a defined territory in which no import duties are levied if the goods are not imported for use in the domestic market. In addition, the following benefits are available to free-zone companies:

- Free-zone companies are not subject to turnover tax with respect to the delivery of goods outside Aruba and the rendering of services to persons outside Aruba.
- Free-zone companies could be exempted from the foreign-exchange commission on request.
- A 0% dividend withholding tax rate applies.

Imputation Payment Companies. Imputation Payment Companies (IPCs) were subject to the regular corporate tax rate (see *Rates of corporate income tax*). Under the IPC regime, part of the corporate income tax paid by a company was remitted to its shareholders in the form of an imputation payment. The IPC regime was available to all companies conducting qualifying activities such as hotel, financing, licensing or investment activities. The IPC regime was abolished as of 2016. However, existing IPCs can continue making use of this regime until 2026.

Special Purpose Companies. Special Purpose Companies (SPCs) were introduced as of 2016. In principle, qualifying SPCs are subject to a corporate income tax rate of 10%. However, for companies performing qualifying hotel operations, the applicable corporate tax rate can be 10%, 12% or 15%. In addition, SPCs are exempt from dividend withholding tax. SPCs may engage only in the following qualifying activities (in some cases, they must meet certain additional requirements):

- Hotel operations
- Aviation operations
- Shipping operations
- Generation of sustainable energy
- Activities that enhance the knowledge economy
- Scientific activities
- Insuring special entrepreneurial risks (activities of captive insurance companies)

- Financing that is different from the financing offered by credit institutions
- Making portfolio investments (other than in real estate)
- Holding of shares and participation rights

Aruba Exempt Companies. An Aruba Exempt Company is exempt from corporate income tax and withholding tax on dividends paid if it performs one of the following activities:

- Financing (if the company does not qualify as a credit institution)
- Investing, other than in real estate
- Holding of shares and participation rights

Fiscal transparency. Aruban limited liability companies can opt for fiscal transparency for Aruban corporate income tax and dividend withholding tax purposes within one month after incorporation. If fiscal transparency is granted, the limited liability company is treated as a partnership for Aruba income tax, corporate income tax and dividend withholding tax purposes; that is, only the partners can be taxed in Aruba on Aruban-source income.

It is also possible to obtain an advance ruling from the local tax authorities on the treatment of the local presence.

Branch profits tax. Branches of foreign companies are taxed at the same rate as resident companies. No additional withholding taxes are imposed on remittances of profits.

Capital gains. Capital gains are taxed as ordinary income. However, certain capital gains are exempt from corporate income tax under the participation exemption (see *Participation exemption*).

Administration. In principle, the corporate income tax return for the preceding accounting period must be filed and the corresponding corporate income tax due must be simultaneously paid within five months after the end of the accounting period.

Dividends. A 10% withholding tax is imposed on dividends distributed to nonresidents. The rate is reduced to 5% for dividends distributed to publicly traded companies. A 0% rate applies to dividends distributed to resident companies that qualify for the benefits of the participation exemption.

The Tax Regulation for the Kingdom of the Netherlands provides for special dividend withholding tax rates (see Section E).

Participation exemption. Aruban resident companies are exempt from corporate income tax on dividends and capital gains derived from shares with respect to qualifying participations. A qualifying foreign participation must satisfy both of the following conditions:

- The shares must not be held as inventory or as a portfolio investment.
- The participation must be subject to a tax on profits.

Foreign tax relief. Foreign tax relief is available through the Tax Regulation for the Kingdom of the Netherlands. Foreign tax relief is also available under the state decree for the avoidance of double taxation.

C. Determination of trading income

General. Commercial profits must be calculated in accordance with “sound business practice” and generally accepted accounting standards.

Inventories. Inventories are generally valued using the historical-cost, first-in, first-out (FIFO) or weighted average methods.

Depreciation. Depreciation may be calculated by the straight-line, declining-balance or flexible methods.

D. Miscellaneous matters

Foreign-exchange controls. The Central Bank of Aruba regulates the foreign-exchange market and carries out the necessary transactions as executor of exchange policy. Remittances abroad require an exchange license issued by the Central Bank of Aruba.

Debt-to-equity rules. Aruba does not impose a debt-to-equity ratio.

Controlled foreign companies. Aruba does not have specific controlled foreign company legislation. However, numerous measures limit tax deductions related to intercompany transactions that are not at arm’s length and intercompany transactions with low-taxed entities.

Transfer pricing. If a company or individual participates, directly or indirectly, in the management, supervision or the capital of two or more corporate entities, the conditions that apply to the supply of goods and the rendering of services between these related entities must be at arm’s length. These conditions are similar to the conditions that would have applied in transactions with unrelated parties. Information to substantiate arm’s-length transactions must include, among other items, the following:

- The agreement between the entities
- Transfer-pricing method that was chosen and why it was chosen
- How the consideration was determined

E. Tax treaties

Provisions for double tax relief are included in the Tax Regulation for the Kingdom of the Netherlands. These provisions avoid double taxation between the countries of the Kingdom of the Netherlands (Aruba, Curaçao, the Netherlands [including Bonaire, Sint Eustatius and Saba; these islands are known as the BES-Islands] and Sint Maarten) regarding taxes on income, capital and other items.

Under the Tax Regulation for the Kingdom of the Netherlands, the general withholding tax rate of 10% on dividend distributions from an entity resident in Aruba may be reduced to the following rates:

- 7.5% if the recipient of the dividends is a company that has capital divided in shares and that has a share interest in the nominal paid-up capital of the Aruba entity of at least 25%
- 5% if such recipient of the dividends is also subject to tax on profit at a rate of at least 5.5%

Effective from 10 October 2010, the Netherlands Antilles (which consisted of five island territories in the Caribbean Sea) was dissolved as a country. As a result, the island territories of Curaçao and St. Maarten became autonomous countries within the Dutch Kingdom. The island territories of Bonaire, St. Eustatius and Saba (BES-Islands) have become a part of the Netherlands as extraordinary overseas municipalities.

The Tax Regulation for the Kingdom of the Netherlands remains in place until bilateral tax treaties have been concluded between the countries in the Dutch Kingdom.

Aruba has entered into tax information exchange agreements with Antigua and Barbuda, Argentina, Australia, the Bahamas, Bermuda, the British Virgin Islands, Canada, the Cayman Islands, Denmark, the Faroe Islands, Finland, France, Greenland, Iceland, Mexico, Norway, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States.

Aruba is recognized by the Organisation for Economic Co-operation and Development as a jurisdiction that has substantially implemented the internationally agreed tax standard and, as such, is white listed.

Australia is reforming its tax system through various tax reform initiatives, and a Federal election is due in 2019. As a result, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (a)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	
Franked	0 (b)
Unfranked	30 (c)
Conduit Foreign Income	0 (d)
Interest	
General	10 (e)

Interest Paid by Australian Branch of Foreign Bank to Parent	5 (f)
Interest (Debentures, State and Federal Bonds and Offshore Banking Units)	0 (g)
Royalties from Patents, Know-how, etc.	30 (h)
Construction and Related Activities	5 (i)
Fund Payments from Managed Investment Trusts	15 (j)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Indefinite

- (a) From the 2018-19 income year, a 27.5% company tax rate applies to eligible companies with less than AUD50 million of turnover. The corporate income tax rate for these companies will decrease to 26% by 2020-21 and 25% from 2021-22.
- (b) Franking of dividends is explained in Section B.
- (c) This is a final tax that is imposed on payments to nonresidents only. A reduced rate (in recent treaties, reduced rates typically are 0%, 5% or 15%, depending on the level of ownership) applies to residents in treaty countries.
- (d) An exemption from dividend withholding tax applies to the part of the unfranked dividends that is declared in the distribution statement to be conduit foreign income.
- (e) In general, this is a final withholding tax that is imposed on payments to nonresidents only. However, withholding tax is imposed in certain circumstances on interest paid to residents carrying on business overseas through a permanent establishment (branch). Modern Australian tax treaties exempt government and unrelated financial institutions from withholding tax.
- (f) Interest paid by an Australian branch of a foreign bank to its parent is subject to a rate of 5% on the notional interest rate based on the London Interbank Offered Rate (LIBOR).
- (g) Unilateral exemptions from interest withholding tax are provided for certain publicly offered debentures, for state and federal government bonds and for offshore borrowing by offshore banking units.
- (h) In general, this is a final withholding tax imposed on royalties paid to nonresidents. A reduced rate may apply to residents of treaty countries (the rate is 5% in recent treaties).
- (i) The filing of an Australian tax return to obtain a refund may be required if this withholding results in an overpayment of tax. A variation of the rate to mitigate the adverse cash flow impact is available to certain taxpayers that have previously filed tax returns in Australia.
- (j) Managed investment trusts that hold only energy-efficient commercial buildings constructed on or after 1 July 2012 may be eligible for a 10% withholding tax rate.

B. Taxes on corporate income and gains

Corporate income tax. An Australian resident corporation is subject to income tax on its non-exempt worldwide income. A non-resident corporation is subject to Australian tax only on Australian-source income.

Corporations incorporated in Australia are residents of Australia for income tax purposes, as are corporations carrying on business in Australia with either their central management and control in Australia or their voting power controlled by Australian residents.

Guidelines from the Australian Taxation Office (ATO) cover the application of the central management control test of company residency for foreign-incorporated companies. Relevant factors include the high-level decision-making process of the boards, virtual decision-making and evidence of the decision-making.

For corporations, capital gains are taxed at the relevant corporate income tax rate.

Income of nonresident corporations from Australian sources is similarly taxable if it is not subject to withholding tax or treaty protection. However, a nonresident corporation not operating in Australia through a permanent establishment is generally subject to tax only on Australian-source passive income, such as rent, interest, royalties and dividends.

Rates of corporate tax. The standard tax rate for resident corporations is 30%.

A 27.5% rate applies to base rate entities. These are defined as corporate tax entities with no more than 80% of their assessable income being passive income and with an aggregate turnover of less than AUD25 million for 2017-18 (and thereafter AUD50 million). The base rate entities tax rate will be reduced to 26% by 2020-21 and 25% from 2021-22.

Resource taxation

Petroleum resources. The Petroleum Resource Rent Tax (PRRT) is imposed at a rate of 40% on project profits from the extraction of non-renewable petroleum resources. The PRRT applies to onshore and offshore petroleum projects. Some changes will apply from 1 July 2019 after a government-initiated review into the PRRT, crude oil excise and associated Commonwealth royalties. These changes include the following:

- PRRT will apply only to offshore projects in Commonwealth waters.
- Reduced uplift rates for carried-forward expenditure (limiting the scope for excessive compounding of deductions) will apply for general and exploration deductions.
- Other administrative changes will be introduced.

An exposure draft law to implement some of the changes has been released for consultation. A review of the gas transfer-pricing regime is expected to result in a discussion paper in 2019.

Minerals exploration. The Junior Minerals Exploration Incentive (JMEI) enables eligible companies to generate tax credits by giving up a portion of their tax losses from greenfield mineral exploration expenditure, which can then be distributed to shareholders. Tax credits can only be generated for shares of stock issued in that income year. The scheme applies until 30 June 2021 and Australia-wide credit limits include AUD25 million (2018-19 income year) and AUD30 million (2019-20).

Costs of acquiring exploration rights or information first used for exploration that are not eligible for an immediate deduction are depreciated over the lesser of 15 years or the effective life of the mine.

Carbon-pricing mechanism. Effective from 1 July 2014, the previous carbon-pricing mechanism was replaced by a Direct Action Plan.

Capital gains

Income and capital gains. Australia's tax law distinguishes income (revenue) gains and losses from capital gains and losses,

using principles from case law. Broadly, capital gains and losses are not assessable or deductible under the ordinary income tax rules.

However, the capital gains tax (CGT) provisions in the tax law may apply. The CGT provisions apply to gains and losses from designated CGT events. For corporations, capital gains are taxed at the relevant corporate income tax rate. Designated CGT events include disposals of assets, grants of options and leases, and events arising from the tax-consolidation rules (see Section C).

For CGT purposes, capital gains are calculated by identifying the capital proceeds (money received or receivable or the market value of property received or receivable) with respect to the CGT event and deducting the cost base. CGT gains are reduced by amounts that are otherwise assessable.

Special rules apply to assets acquired before 20 September 1985.

CGT deferrals (rollovers). CGT rollover relief may be elected for various transfers, restructures and takeovers, including scrip takeovers. The effect of the relief is to defer taxation until a subsequent disposal or CGT event, if further rollover relief is not available. Transfers within a tax-consolidated group are ignored for tax purposes (see Section C).

Capital losses are deductible only from taxable capital gains; they are not deductible from ordinary income. However, ordinary or trading losses are deductible from net taxable capital gains.

Foreign residents and CGT. Foreign residents are subject to CGT if an asset is “taxable Australian property,” which includes broadly the following:

- Taxable Australian real property: real property located in Australia including a leasehold interest in land, or mining and quarrying or prospecting rights, if the minerals, petroleum or quarry materials are located in Australia.
- Indirect Australian real property interest: broadly, a non-portfolio interest in an Australian or foreign entity if more than 50% of the market value of the entity’s assets relates to assets that are taxable Australian real property. Integrity rules to prevent the double counting of intercompany assets apply to consolidated and multiple-entry consolidated groups (see *Tax consolidation* in Section C).
- The business assets of an Australian permanent establishment.

Purchasers obligation for 12.5% non-final withholding to support foreign resident CGT regime. Purchasers are required, broadly, to make a non-final 12.5% foreign resident CGT withholding with respect to the purchase of certain direct or indirect taxable Australian property from foreign residents. The rules apply to direct real property transactions with a value of AUD750,000 or more, to certain indirect property transactions including company and trust interests and to options and rights to acquire such property or interests. Australian resident vendors of direct property must provide an ATO clearance certificate to not be subject to withholding. These rules must be factored into all acquisition and disposal processes and allow for rate variations and declarations in some cases.

CGT participation exemption for disposals of shares in foreign companies. The capital gain or capital loss derived by a company from the disposal of shares in a foreign company may be partly or wholly disregarded to the extent that the foreign company has an underlying active business, if the holder company held a direct voting interest in the foreign company of at least 10% for a period of at least 12 months in the 2 years before the disposal. This participation exemption can also reduce the attributable income arising from the disposal of shares owned by a controlled foreign company in another foreign company (see Section E).

Venture capital. Venture capital investment concessions provide a 20% nonrefundable tax offset on investments in eligible innovation companies, capped at AUD200,000 per investor per year and a CGT exemption up to 10 years (provided that investments are held for at least three years).

Investors receive a 10% nonrefundable tax offset on capital invested in registered Early Stage Venture Capital Limited Partnerships (ESVCLPs).

Startup financial technology businesses can also access the venture capital investment tax concessions.

Administration. The Australian tax year ends on 30 June. For corporate taxpayers with accounting periods ending on other dates, the tax authorities may agree to use a substituted accounting period (SAP).

In general, companies with an income year-end of 30 June must file an annual income tax return by the following 15 January. Companies granted permission to adopt a SAP must file their returns by the 15th day of the 7th month after the end of their income year.

Under a pay-as-you-go installment system, companies with turnover of AUD20 million or less continue to make quarterly payments of income tax within 21 days after the end of each quarter of the tax year. The amount of each installment is based on the income earned in the quarter. The installment obligations for larger companies with turnover in excess of AUD20 million involve monthly payments.

Some recent developments affecting certain corporate tax entities with respect to public disclosures of their tax positions and their tax-governance processes are outlined below.

ATO reporting of selected tax data for larger companies. The ATO is required to publicly report selected tax data for all corporate entities paying PRRT and selected income tax data for large corporate entities (turnover exceeding AUD100 million [AUD200 million for Australian majority-owned private companies]). The ATO reports are made, broadly, in December and cover the data for the tax returns filed in the year ended 30 June of the preceding year. Some companies might want to consider supplementary disclosures in their own communications channels.

Voluntary Tax Transparency Code. The Australian government encourages larger companies to adopt a Voluntary Tax Transparency Code (TTC) for income years ending on or after

3 May 2016, to promote public understanding of businesses' compliance with Australia's tax laws. The TTC, developed by the Board of Taxation, is a set of principles and minimum standards to guide disclosure of tax information by businesses. The disclosures vary by companies' size, with larger businesses to consider, in addition to reconciliations of accounting to tax aggregates, their tax policy, strategy, governance, total tax contribution and foreign related-party dealings. Business groups are encouraging companies to consider compliance, and over 150 companies are listed on the public catalogue of signatories.

Some companies to file General Purpose Financial Statements. Significant global entity companies (global turnover greater than AUD1 billion) with an Australian presence that do not file General Purpose Financial Statements (GPFS) with the Australian Securities and Investments Commission (ASIC) are required to file GPFS with the ATO. The ATO is then required to forward such GPFS to the ASIC. A bill before parliament proposes to broaden the definition of a significant global entity from 1 July 2018.

Dividends. Dividends paid by Australian resident companies are franked with an imputation credit (franking credit) to the extent that Australian corporate income tax has been paid by the company on the income being distributed. Tax rules constrain companies from streaming imputation credits to those shareholders that can make the most use of the credits, at the expense of other shareholders.

A company may select its preferred level of franking with reference to its existing and expected franking account surplus and the rate at which it franked earlier distributions. However, under the "benchmark rule" for private companies, all distributions made within a franking period must generally be franked to the same extent.

The franking credit is intended to equal the tax paid by the paying entity. For base rate entities benefiting from the reduced corporate rate, the imputation rules require these companies to determine whether they frank at 27.5% or 30%, based on the prior year's passive income and aggregated turnover.

The consequences of receiving a franked dividend vary depending on the nature of the recipient shareholder.

A New Zealand company may choose to maintain an Australian franking account and attach Australian franking credits to dividends paid to Australian resident shareholders, for Australian company tax paid on that income.

Resident corporate shareholders. Franked distributions received by resident companies from other Australian resident companies are effectively received free from tax. A resident company receiving franked distributions grosses up the dividend amount received by the amount of its franking credit, and includes the grossed-up amount in its assessable income. The recipient company is entitled to a tax offset (rebate) equal to the amount of the franking credit on the distribution received that may be used against its own tax payable. In addition, the recipient company is allowed a franking

credit in its own franking account; the franking credit may be distributed to its own shareholders.

A resident company is subject to tax on unfranked dividends received, but special rules apply for certain income passed to non-resident shareholders (see *Nonresident shareholders: corporate and non-corporate*).

If a company's entitlement to a tax offset exceeds its tax payable, it can convert the excess franking offset into an equivalent amount of tax loss. The tax loss may then be carried forward indefinitely for deduction in subsequent years.

Resident individual shareholders. The shareholder includes the dividend received plus the full imputation credit in assessable income. The imputation credit can be offset against personal tax assessed in the same year. Excess credits relating to dividends received are refunded to the shareholder.

Nonresident shareholders: corporate and non-corporate. Issues relevant to dividends and foreign shareholders include the following:

- Franked dividends paid to nonresidents are free from dividend withholding tax.
- Refunds of imputation credits are not available for nonresidents.
- A deduction may be available under dividend flow-through rules if an Australian company wholly owned by a nonresident company receives unfranked non-portfolio dividends (from holdings of at least 10% of the voting power in the company paying the dividends) and pays an unfranked non-portfolio dividend to its nonresident parent. Various conditions must be satisfied, and anti-avoidance rules apply.
- "Conduit foreign income" that flows through Australian companies to foreign investors may also achieve flow-through treatment. Broadly, "conduit foreign income" is foreign-source income earned by an Australian company that is not taxed in Australia. A conduit income distribution that an Australian corporate tax entity makes to a foreign resident is not subject to dividend withholding tax and is not assessable income, to the extent that the entity declares it to be conduit foreign income.

Foreign tax relief. Australian residents are subject to Australian tax on their worldwide income, but they may receive a foreign income tax offset (FITO) for foreign taxes paid on foreign-source income included in assessable income. FITOs must be used in the year in which the related foreign-source income is included in assessable income. Otherwise, they are lost without having provided any relief from double taxation. For controlled foreign companies (CFCs; see Section E), a modified system applies.

C. Determination of trading income

General. Taxable income is defined as assessable income less deductions. Assessable income includes ordinary income and statutory income (specifically listed in the tax law as being assessable income). Non-cash business benefits may be included as income in certain circumstances.

Australia's tax law distinguishes income (revenue) gains and losses from capital gains and losses, using principles from case

law. Broadly, capital gains and losses are not assessable or deductible under the ordinary income tax rules; however, the capital gains provisions in the tax law may apply (see Section B).

Broadly, the following types of income are not included in assessable income:

- Profits from foreign branches of Australian companies (other than, broadly, income that would be attributable under the CFC rules, see Section E).
- Amounts paid out of income previously taxed under the CFC rules (see Section E).
- Foreign equity distributions received by Australian corporate entities on participation interests. This covers dividends or non-share dividends received from a foreign company with respect to an interest in a company classified as equity under Australian tax rules, subject to a 10% participation requirement. Such distributions received through interposed entities, such as trusts and partnerships, may now also be eligible.

Expenses. Expenses are deductible to the extent they are incurred in gaining or producing assessable income or are necessarily incurred in carrying on a business for the purpose of gaining or producing assessable income. Provisions for amounts not “incurred” (this term is not defined in the law) during the year, such as leave entitlements of employees, are generally not deductible until payments are made.

Expenses of a capital nature (except business black hole expenditure; see *Five-year deduction for black hole business expenditure*) and those incurred in the production of exempt income are not deductible. Apportionment of expenses having dual purposes is possible.

Fringe benefits tax (see Section D) is deductible. Entertainment expenses are not deductible unless they represent fringe benefits provided to employees. Penalties and fines are not deductible.

Under commercial debt forgiveness rules, the net amount of debts forgiven during an income year reduces the debtor’s accumulated revenue tax losses, capital losses, certain undeducted expenditure and cost bases of assets.

Research and development. A tax credit system applies for research and development (R&D) expenditure. The incentives apply to companies incorporated in Australia for R&D conducted in Australia. The location of ownership of the resulting intellectual property is not a barrier to a tax concession.

Core and supporting R&D activities must be registered under the new R&D tax credit system. Supporting R&D activities must be directly related to core R&D activities. Activities that result in the production of goods or services are eligible only if they are undertaken for the dominant (or sole) purpose of supporting the core R&D activity (the “dominant purpose” test).

Eligible expenditure in excess of AUD20,000 is prima facie not deductible but gives rise to the following:

- For large companies, nonrefundable tax credits of 38.5%. R&D expenditure claims are capped at AUD100 million per taxpayer and, for expenditure above AUD100 million, companies can claim a 30% tax offset.

- For companies with group turnover of less than AUD20 million, refundable tax credits of 43.5%.

The above turnover thresholds also apply to local companies conducting foreign-owned R&D.

Significant R&D changes were announced in the 2018 Federal Budget. These changes will apply in relation to assessments for income years beginning on or after 1 July 2018, but had not been legislated as of 31 December 2018. They include the following:

- R&D entities with aggregate turnover of AUD20 million or more will be entitled to an R&D tax offset equal to their corporate tax rate plus a premium based on the level of their incremental R&D intensity for their R&D expenditure at a sliding scale. R&D intensity is calculated as national R&D deductions of the R&D entity divided by expenditure. Several tiers of R&D intensity ranges and corresponding R&D premiums are proposed.
- Companies eligible for the refundable R&D tax offset will be entitled to a 13.5% R&D premium linked to the company's corporate tax rate (in effect, a rate cut of 2.5%).
- The refundable tax offset will be capped at AUD4 million (excluding clinical trials).

Debt and equity classification. Specific debt-and-equity rules focus on economic substance rather than on legal form. If the debt test is satisfied, a financing arrangement is generally treated as debt, regardless of whether the arrangement could also satisfy the test for equity. The test is complex and extends well beyond an examination of whether a borrower has a non-contingent obligation to repay an amount of principal.

The debt or equity classification affects the taxation of dividends (including the imputation requirements), payments received from nonresident entities, thin-capitalization regime, dividend and interest withholding taxes and related measures, but does not limit the operation of the transfer-pricing rules.

Hybrid mismatch rules. Australia introduced a law to adopt the Organisation for Economic Co-operation and Development (OECD) hybrid mismatch rules. The measures in the law apply to income years beginning on or after 1 January 2019. Broadly, they prevent entities liable to income tax in Australia from being able to avoid income taxation or obtain a double non-taxation benefit, by exploiting differences between the tax treatment of entities and instruments across different countries. However, the imported mismatch rule (other than when an importing payment is made under a structured arrangement) will apply to income years beginning on or after 1 January 2020. Imported mismatches are mismatches whereby receipts are sheltered from tax directly or indirectly by hybrid outcomes elsewhere in a group of entities or a chain of transactions.

Financial arrangements. Extensive rules deal with the taxation of "financial arrangements" (as defined) for specified taxpayers.

The default methods are accruals and realization methods. These are supplemented by various methods available at a taxpayer's election, using accounting approaches with respect to certain financial arrangements. The elective accounting methods include hedge

treatment, fair-value reporting, retranslation for foreign-currency arrangements and, in certain cases, use of the values in financial reports for the financial arrangements.

Individuals are not mandatorily covered by these rules. Superannuation entities must apply the rules if the value of their assets exceeds AUD100 million. Approved deposit-taking institutions or securitization vehicles must apply the rules if their aggregate turnover exceeds AUD20 million. All other entities must apply the rules if either their aggregate turnover exceeds AUD100 million or if the value of their assets exceeds AUD300 million. Taxpayers not covered by the rules can nevertheless elect to apply the rules.

Foreign-exchange gains and losses. Rules for the tax treatment of foreign-currency gains and losses provide broadly the following:

- Foreign-currency gains and losses are brought to account when realized, regardless of whether an actual conversion into Australian currency occurs.
- Foreign-currency gains and losses generally have a revenue character.
- Specific translation rules apply to payments, receipts, rights and obligations denominated or expressed in a foreign currency.
- Functional-currency rules allow an entity that operates predominantly in a foreign currency to determine its income and expenses in that currency, with the net results being translated into Australian currency for the purposes of calculating its Australian income tax liability.

Inventories. In determining trading income, inventories may be valued at cost, market-selling value (the current selling value of an article of trading stock in the taxpayer's trading market) or replacement price, at the taxpayer's option. The last-in, first-out (LIFO) method may not be used. If the cost method is elected, inventories must be valued using the full-absorption cost method.

Bad and doubtful debts. Provisions for doubtful trading debts are not deductible until the debt, having been previously brought to account as assessable income, becomes bad and is written off during an income year.

Capital allowances (depreciation)

Uniform capital allowance regime. Capital allowance rules allow a deduction for the decline in value of a "depreciating asset" held during the year.

A "depreciating asset" is defined as an asset with a limited effective life that may be expected to decline in value over the time it is used. Land, trading stock and intangible assets not specifically included in the regime are not considered to be depreciating assets.

The depreciation rate for a depreciating asset depends on the effective life of the asset. Taxpayers may choose to use either the default effective life determined by the tax authorities or their own reasonable estimate of the effective life. A taxpayer may choose to recalculate the effective life of a depreciating asset if the effective life that was originally selected is no longer accurate because of market, technological or other factors.

Taxpayer re-estimation of effective life is not available for certain intangible assets; the law prescribes their effective lives (for

example, 15 years for registered designs or 20 years for standard patents). Statutory life caps that result in accelerated rates are provided for certain assets used in the oil and gas, petroleum, agricultural, and transport industries, as well as for Australian-registered ships.

Taxpayers may choose the prime cost method (straight-line method) or the double diminishing value method (200% of the straight-line rate) for calculating the tax-deductible depreciation for all depreciating assets except intangible assets. For certain intangible assets, the prime cost method must be used.

The cost of a depreciating asset is generally the amount paid by the taxpayer plus further costs incurred while the taxpayer holds the asset. The depreciable cost of a motor car is subject to a maximum “luxury car” limit (AUD57,581 for the 2018-19 income year).

Pooling of assets may be chosen for pool assets costing more than AUD300 but less than AUD1,000 as well as assets that have been depreciated to less than AUD1,000. The pool balance is depreciable at a rate of 37.5% (18.75% for additions during the year), applying the declining-balance method. If the choice is not exercised, the relevant assets are depreciated based on their respective effective lives.

Software development expenditure may be allocated to a software development pool. Beginning in the year following the year of the expenditure, the expenditure is deductible at a rate of 30% per year for three years, followed by a 10% rate in the final year.

Construction of buildings. Capital expenditure on the construction of buildings and structural improvements may be eligible for an annual deduction of either 2.5% or 4% of the construction expenditure, depending on the type of structure and the date on which construction began. The 2.5% rate applies to construction begun after 15 September 1987.

Disposals of depreciable assets. For assets other than buildings, if the proceeds received on the disposal of an asset exceed its adjustable value, the excess is included in taxable income. If the proceeds received on the disposal of an asset are less than its adjustable value, a deductible balancing adjustment is allowed.

Five-year deduction for black hole business expenditure. Certain types of business expenditure of a capital nature may be deducted under the capital allowance regime to the extent that the expenditure is not taken into account elsewhere in the income tax law and is not expressly nondeductible for tax purposes. This type of expenditure is known as “black hole business expenditure.” The deduction is available on a straight-line basis over five years. Expenditure qualifying for the deduction includes expenditure to establish or alter a business structure, expenditure to raise equity and expenditure in an unsuccessful takeover attempt or takeover defense. Eligible small business taxpayers are entitled to an immediate deduction for certain startup costs.

Relief for losses. Tax losses may be carried forward indefinitely against assessable income derived during succeeding years. A loss is generated after adding back net exempt income.

To claim a deduction for past losses, companies must satisfy either a continuity of ownership test (more than one-half of voting, dividend and capital rights) or a same business test. A modified continuity of ownership test applies to widely held companies. The modified rules simplify the application of the continuity test by making it unnecessary to trace the ultimate owners of shares held by certain intermediaries and small shareholdings. A bill before parliament introduces an alternative, more flexible “similar business test,” with respect to losses incurred in income years beginning on or after 1 July 2015.

Losses are generally not transferable to other group members other than within a tax-consolidated group (see *Tax consolidation*).

Designated infrastructure projects loss concessions. Companies that only carry on activities for certain designated infrastructure projects are not required to test the recoupment of losses incurred in the 2012–13 and following income years under the continuity of ownership or same business tests. The losses are also increased by the long-term government bond rate. Projects must be designated by Infrastructure Australia by 30 June 2018, and a cap of AUD25 billion on the value for all projects applies.

Tax consolidation. Tax consolidation is available for groups of wholly owned companies and eligible trusts and partnerships that elect to consolidate. Australian resident holding (head) companies and their wholly owned Australian resident subsidiary members of the group are taxed on a consolidated basis. Consolidation is desirable because no grouping concessions (such as the ability to transfer losses to other group members) are otherwise provided.

The head company becomes the taxpayer, and each subsidiary member of the group is treated as if it were a division of the head company. Transactions between members of a consolidated group are generally disregarded for Australian income tax purposes. The head company assumes the income tax liability and the associated income tax compliance obligations of the group.

Tax consolidation is also available for Australian entities that are wholly owned by a single foreign holding company. The resulting group is referred to as a multiple-entry company (MEC) group, which includes the Tier-1 companies (Australian resident companies directly owned by a foreign member of the group) and their wholly owned Australian resident subsidiaries. A Tier-1 company is selected as the head company. The types of entities that may be subsidiary members of an MEC group are generally the same as those for a consolidated group.

The consolidation rules are very significant for merger and acquisition and restructuring transactions. If a tax consolidated group acquires a “joining entity,” the tax cost base of the underlying assets of the joining entity is reset, under complex rules, which can affect the tax treatment of those assets (including the calculation of any tax deductions with respect to such assets). If an entity leaves a consolidated group, the group’s cost base of shares in the leaving entity is reset under specific exit rules. MEC groups are subject to cost base pooling rules to determine the cost base of shares in Tier-1 companies.

The tax-consolidation rules have been subject to various complex ongoing changes affecting ongoing tax positions. Notably, the treatment of rights to future income and residual assets when an entity joins a consolidated group was altered in 2010, and these changes were heavily modified in 2012 (transitional rules preserve aspects of the 2010 changes for some groups).

The government has proposed (not yet legislated as of December 2017) the following further integrity measures for consolidation loopholes affecting acquisitions and divestments:

- Preventing a double benefit from deductible liabilities held by a “joining entity”
- Disregarding deferred tax liabilities from the allocable cost amount calculation
- Removing anomalies when an entity holding securitized assets joins or leaves a consolidated group
- Preventing unintended benefits when a foreign resident ceases to hold membership interests in a joining entity (churning measure)
- Clarifying outcomes when an entity holding financial arrangements leaves a consolidated group (Taxation of Financial Arrangements measure)
- Clarifying treatment of intra-group liabilities when an entity leaves a consolidated group (value-shifting measure)
- Loss-integrity rule for eligible Tier-1 companies that join multiple MEC groups

Assets that are subject to the taxation of financial arrangements rules (see *Financial arrangements*) are subject to separate tax consolidation interaction rules. These complex rules may affect transactions and reorganizations.

Demergers. Tax relief is available if eligible company or fixed-trust groups divide into two separately owned entities. The demerging company (or fixed trust) must dispose of at least 80% of its ownership interests in the demerged entity, and the underlying ownership interests must not change because of the demerger. The rules provide investors optional CGT rollover relief, as well as dividend exemptions, which are available at the option of the demerging entity. The demerger group is also provided with limited CGT relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and services tax	10
Fringe benefits tax on non-cash employee benefits	47
Payroll taxes paid by employers (vary by state)	4.75 to 6.85

Customs duty is levied on imports of various products into Australia. Other significant taxes include stamp duty and land tax.

E. Miscellaneous matters

General anti-avoidance regime. Australia’s general income tax anti-avoidance regime (GAAR, or Part IVA) has been expanded by the following measures focused at significant multinational businesses:

- Multinational Anti-Avoidance Law targeting certain schemes to avoid Australian permanent establishments
- Diverted Profits Tax targeting certain international schemes with insufficient economic substance

Part IVA generally applies if, taking into account eight specified matters, it is determined that the dominant purpose of the parties entering into a scheme was to enable the taxpayer to obtain a tax benefit. If the Commissioner of Taxation makes a Part IVA determination, the tax benefit is denied, and significant penalties may be imposed.

Multinational Anti-Avoidance Law. The Multinational Anti-Avoidance Law (MAAL) expanded Part IVA, effective from 1 January 2016. Broadly, the MAAL allows the Commissioner of Taxation to potentially target schemes entered into by significant global entities (SGEs; currently, with global turnover greater than AUD1 billion) if all of the following apply:

- A foreign entity makes a supply of certain goods or services to an Australian customer.
- Activities are undertaken directly in Australia in connection with the supply by an Australian entity or permanent establishment that is an associate of or commercially dependent on the foreign entity.
- The foreign entity making the supply derives income, some or all of which is not attributable to an Australian permanent establishment of the foreign entity.
- Taking into account the relevant factors, it can be concluded that a principal purpose of the transaction is the enabling of a relevant taxpayer to obtain an Australian tax benefit and/or reduce tax liabilities arising under foreign law, including some deferrals of foreign taxes. A principal purpose is a lower threshold than the dominant purpose discussed in *General anti-avoidance regime*. Relevant factors include the role of the parties in the value chain and their capacity, staffing and resources to carry out their designated functions (to distinguish the parties from insubstantial parties).

Diverted Profits Tax. The Diverted Profits Tax (DPT) expanded Part IVA for income years beginning on or after 1 July 2017, targeting SGEs that divert certain profits from Australia as outlined below (a bill before parliament proposes to broaden the definition of a SGE from 1 July 2018). If the Commissioner of Taxation issues a potential DPT assessment, tax is payable on the amount of the diverted profits at a penalty rate of 40%. The DPT applies, broadly, if the following conditions are satisfied:

- The relevant Australian entity or permanent establishment is an SGE for the year of income.
- A scheme exists, and the Australian taxpayer obtains a tax benefit in connection with the scheme (considering reasonable alternative situations).
- A foreign entity that is an associate of the relevant taxpayer entered into the scheme or is otherwise connected to the scheme.
- It is concluded that the scheme (or any part of a scheme) was carried out for a principal purpose of enabling the relevant taxpayer (and/or associate) to obtain a tax benefit, or both to obtain a tax benefit and reduce a foreign tax liability of an associate.

Exclusions apply if it is concluded that one of the following tests applies:

- The relevant Australian entity has income of less than AUD25 million.
- The increase of the foreign tax liability is equal to or exceeds 80% of the tax that would have otherwise been paid in Australia.
- The profit derived by each covered entity reasonably reflects the economic substance of the entity's activities in connection with the scheme.

A limited exclusion applies for some entities that carry on predominately passive activities (for example, managed-investment trusts, pension funds, sovereign-wealth funds and selected collective-investment vehicles). Extensive ATO protocols and approvals are required to be met before the issuance of a DPT assessment.

Transfer pricing. Australia's transfer-pricing rules, updated in recent years, include measures to ensure that Australian taxable income associated with cross-border transactions is based on arm's-length prices. Several methods for determining the arm's-length price are available. The ATO provides guidance in a binding tax ruling on the appropriate methods, and taxpayers can enter into Advance Pricing Arrangements.

For transactions with parties entitled to benefit from foreign tax treaties, the law confirms the ATO view that Australia's tax treaties provide a separate and unconstrained transfer pricing taxing power.

The OECD transfer-pricing guidance material was incorporated into domestic law from 1 July 2016.

Australia's transfer-pricing rules are integrated into the self-assessment regime and require broad and timely documentation. The risk of transfer-pricing adjustments is magnified for companies that are involved in significant intragroup financing arrangements or business restructurings or that have losses or low levels of profits. Significant aspects include the following:

- The onus is on the Public Officer who signs the income tax return to confirm that the actual conditions are in line with arm's-length conditions. If the actual and arm's-length conditions do not align and if a transfer-pricing benefit is received, the taxpayer must adjust taxable income, tax losses or other tax attributes. Penalties apply for a false or misleading statement.
- As a basic rule, the arm's-length conditions should be based on the form and substance of the actual commercial or financial relations. However, documentation must address reconstruction, which refers to situations in which the transactions or arrangements actually entered into are ignored and (in some cases) other transactions or arrangements are substituted.
- Taxpayers are treated as not having a reasonably arguable position with respect to any international related-party transaction that is not appropriately documented at the time of the filing of the tax return. A transfer-pricing adjustment with respect to such undocumented transactions attracts a penalty of at least 25%. The penalties are doubled for income years beginning on or after 1 July 2015 for tax-avoidance and profit-shifting schemes,

with respect to groups that have global turnover of greater than AUD1 billion. It is essential that appropriate transfer-pricing documentation be in place to have a reasonably arguable position.

- Adjustments can only be within seven years of the date on which the ATO gives the notice of assessment.

For business income tax returns, the International Dealings Schedule requires detailed disclosures designed to flag potential risk areas.

ATO transfer pricing practical compliance guides and risk ratings. The ATO strongly emphasizes transfer-pricing issues in relation to international business transactions. It has issued practical compliance guidelines (PCGs), which cover numerous cross-border transactions, to assist taxpayers in identifying if their conditions and pricing are likely to have a low risk of ATO examination (green zone) through to a high risk of ATO scrutiny (red zone). PCGs cover related-party debt including derivatives, offshore marketing, non-core procurement and shipping hubs, as well as inbound distribution arrangements.

Country-by-Country Reporting. Multinational SGEs are required to prepare and file the following with the ATO:

- A Country-by-Country Report (CbCR) in line with the OECD standards
- A Master File in line with the OECD standards
- A Local File with requirements that include providing electronic copies of related-party agreements

A bill before parliament proposes to broaden the definition of a SGE and adjust Country-by-Country reporting obligations to apply only to a “country-by-country reporting entity” from 1 July 2018.

Increased penalties for SGEs. Increased penalties for SGEs are calculated by multiplying the base penalty amount by 500. Although these heavy penalties were introduced to ensure compliance with new GPFS requirements (see *Requirement for some companies to file General Purpose Financial Statements* in Section B) or the filing of documents required for CbCR, they can also apply to failure to file any ATO-approved form required to be filed by a SGE (for example, a tax return or activity statement), subject to ATO discretion to remit penalties. For example, an SGE filing an income tax return up to 28 days late risks a late filing penalty of AUD105,000, or up to AUD525,000 if it is more than 112 days late. A bill before parliament proposes to broaden the definition of a SGE from 1 July 2019 for penalty purposes.

Debt-to-equity (thin-capitalization) rules. Thin-capitalization measures apply to the total debt of Australian operations of multinational groups (including foreign and domestic related-party and third-party debt). In addition, the transfer-pricing measures may affect the deductions available for related-party debt.

Thin-capitalization. The thin-capitalization measures apply to the following:

- Foreign-controlled Australian entities and foreign entities that either invest directly into Australia or operate a business through an Australian branch (inward investing entities)

- Australian entities that control foreign entities or operate a business through an overseas branch (outward investing entities)

Exceptions to the thin-capitalization rules apply in either of the following circumstances:

- The total debt deductions of the taxpayer are AUD2 million or less for the year of income.
- Australian assets account for 90% or more of total assets of outward investing entities (that are not also inward investing entities).

Debt deductions are partially denied if the company's adjusted average debt exceeds the maximum allowable debt.

In most cases, the maximum allowable debt is calculated by reference to the safe harbor debt amount. The safe harbor debt amount approximates a debt-to-equity ratio of 1.5:1 (or 60% debt-to-total-assets ratio). Separate methodologies apply to financial institutions or consolidated groups with at least one member classified as a financial entity.

Taxpayers can also determine the maximum allowable debt by reference to an arm's-length debt amount that is based on what amount an independent party would have borrowed from an independent lender. This determination requires the consideration of several factors.

Under changes that apply to income years beginning on or after 1 July 2019, companies will no longer be able to revalue assets for the purpose of the safe harbor thin-capitalization test if the asset value is not contained in their financial statements. Transitional measures apply to valuations in place as of 8 May 2018. Foreign-controlled Australian consolidated entities and MEC groups that control a foreign entity will be treated as both outward and inward investment vehicles from 1 July 2019, and as a result, cannot access tests (such as the worldwide gearing test for outward investors) that were only intended for outward investors.

Inward investors can also determine the maximum allowable debt of an Australian entity by reference to the group's worldwide gearing debt amount.

A bill before parliament proposes to amend the thin-capitalization measures to restrict the use of multi-tiered gearing structures involving flow-through entities, which can create large debt deductions with low withholding taxes, from 1 July 2018. It is proposed that the ownership threshold to be an "associate entity" be reduced from 50% to 10% and, in determining the arm's-length debt amount, that an entity be required to consider the debt-to-equity ratios of any entities in which the entity has a direct or indirect interest that are relevant to the considerations of an independent lender or borrower.

Transfer pricing. The transfer-pricing provisions apply to the pricing of related-party debt, even if an arrangement complies with the thin-capitalization rules. The ATO can substitute a hypothetical arm's-length capital structure to set an arm's-length interest rate if the amount of debt is considered not to be arm's length, even if the taxpayer is within the thin-capitalization safe harbor debt levels.

Cross-border related-party financing arrangements. ATO guidance sets out the ATO's compliance approach with respect to cross-border related-party financing arrangements. This guidance provides a self-assessment tool for taxpayers to determine their risk profiles, and the taxpayer determination must be disclosed broadly to the ATO. The guidance applies, effective from 1 July 2017. A second draft schedule to the guidance is to apply from 1 January 2019 and sets out 14 specific risk indicators for cross-border related-party derivative arrangements used to hedge or manage the economic exposure of a company or group of companies. Further schedules on zero-interest rate loans and the arm's-length debt test are expected to be released in 2019.

Controlled foreign companies. A foreign company is a CFC if five or fewer Australian residents hold at least 50% of the company or have de facto control of it, or if a single Australian entity holds a 40% interest in the company, unless it is established that actual control does not exist.

The tainted income of a CFC is attributed to its Australian resident owners, which are required to include such income in their assessable income. In general, the tainted income of a CFC is its passive income and income from certain related-party transactions.

Income is generally not attributable if the CFC passes an active-income test. To pass this test, the CFC's tainted income may not exceed 5% of the CFC's gross turnover.

Whether an amount earned by a CFC is attributable to Australian residents depends on the country in which the CFC is resident. The CFC rules identify "listed countries," which have tax systems that are considered to be closely comparable to the Australian system. The following are the "listed countries":

- Canada
- France
- Germany
- Japan
- New Zealand
- United Kingdom
- United States

All other countries are "unlisted countries."

Certain amounts are unconditionally attributed regardless of whether the CFC is resident in a listed or unlisted country.

If a CFC resident in a listed country fails the active-income test, its attributable income includes "adjusted tainted income," which is eligible designated concession income prescribed by the regulations on a country-by-country basis. This income includes items such as income subject to tonnage taxation or concessionally taxed capital gains.

If a CFC resident in an unlisted country fails the active-income test, its attributable income includes all of its adjusted tainted income, such as passive income (including tainted interest, rental or royalty income) and tainted sales or services income.

Income derived by a CFC is exempt from Australian income tax if it is remitted as dividends or non-share dividends made with

respect to an interest in the company classified as equity under Australian tax rules to an Australian company.

Foreign investment fund rules. Foreign investment fund (FIF) rules dealing with attribution of income related to certain non-controlling interests were repealed and last applied to the 2009–10 income year. The FIF rules were to be replaced by a narrowly defined anti-avoidance measure targeting “interest-like returns in certain foreign entities,” but this project has not progressed.

Value shifting. A general value-shifting regime applies to counter certain transactions involving non-arm’s-length dealings between associated entities that depress the value of assets for certain income tax and CGT purposes.

Withholding taxes. Interest, dividends and royalties paid to non-residents are subject to Australian withholding tax (also, see Section F for treaty withholding tax rates).

The 10% withholding tax rate on interest is generally the same as the rate prescribed by Australia’s treaties (see Section F). However, modern treaties provide for a 0% rate for government and unrelated financial institutions. The interest paid by an Australian branch of a foreign bank to its parent is subject to a rate of 5% of the notional interest paid by the branch on internal funds of the foreign bank entity; the notional interest is limited by reference to the LIBOR. Unilateral exemptions from interest withholding tax are provided for certain publicly offered debentures, state and federal government bonds and offshore borrowing by offshore banking units. The ATO has expressed concerns about financing arrangements involving related-party foreign currency-denominated financing with related-party cross-currency interest rate swaps to reduce withholding taxes.

For dividends paid, the withholding tax rate of 30% applies only to the unfranked portion of the dividend. A reduced rate applies if dividends are paid to residents of treaty countries. An exemption from dividend withholding tax applies to the part of the unfranked dividends that is declared in the distribution statement to be conduit foreign income.

A final withholding tax at a rate of 30% is imposed on gross royalties paid to nonresidents. The withholding tax rate is typically reduced under a double tax treaty.

A concessional withholding tax regime applies to distributions by eligible managed investment trusts (MITs) to nonresidents, other than distributions of dividends, interest and royalties. The withholding tax rate is 30%, but a reduced 15% rate applies if the nonresident’s address or place of payment is in a country that is listed in the regulations as an “information exchange country” (see *Countries listed as “information exchange countries”*). MITs that hold only newly constructed energy efficient commercial buildings may be eligible for a 10% withholding tax rate.

A bill before parliament proposes to deny the concessional MIT withholding tax rates for certain cross-stapled structure income (see *Companies “stapled” to trusts and sovereign wealth funds*) and for funds with trading trust income or income from residential housing (other than “affordable housing”) or agricultural land

investments, from 1 July 2019, with transitional rules. In addition, new conditions will apply when accessing foreign pension fund withholding tax exemptions and tax exemptions for sovereign wealth funds will be codified and limited, also from 1 July 2019.

An optional attribution managed investment trust (AMIT) regime uses an “attribution model” to determine tax distributions from MITs that meet certain criteria. Specific rules deal with how this system interacts with withholding tax obligations.

Australian investment manager regime (IMR) rules allow certain foreign managed funds that have wide membership or use Australian fund managers, and their nonresident investors to qualify for income exemptions for certain income from qualifying investments (in particular, the income exemptions do not apply to income subject to withholding taxes).

Countries listed as “information exchange countries.” The concessional withholding tax rates for eligible MITs are restricted to investors in jurisdictions listed in the relevant regulation as an “information exchange country.” Until recently, the regulation listed 60 jurisdictions, but as of 1 January 2019, another 54 were added, including the treaty jurisdictions of Austria, Chile, the Philippines, Switzerland and Turkey, which were previously not listed, and financial services centers, such as Lichtenstein and Luxembourg, leaving the Hong Kong Special Administrative Region (SAR) as one of the very few jurisdictions not listed.

Common Reporting Standard. Australia adopted the international Common Reporting Standard (CRS) to apply to financial institutions, such as banks, asset managers, funds, custodians and certain insurance companies, from 1 July 2017 and to later calendar years. The exchange of information with foreign tax authorities has commenced.

Foreign-exchange controls. The Financial Transaction Reports Act 1988 requires each currency transaction involving the physical transfer of notes and coins in excess of AUD10,000 (or foreign-currency equivalent) between Australian residents and overseas residents, as well as all international telegraphic and electronic fund transfers, to be reported to the Australian Transaction Reports and Analysis Centre. This information is then available to the Commissioner of Taxation, Federal Police, Australian Customs Service and other prescribed law enforcement agencies.

Companies “stapled” to trusts and sovereign wealth funds. Structures using companies and linked trusts (“stapled structures” with similar investors) have long been accepted in the real estate sector. Certain trusts flow eligible income through to lower-taxed investors and foreign entities benefiting from the 15% MIT withholding tax rules; stapled companies generate trading income for the same investors, after deducting cross-staple payments to the trusts. These structures spread in recent years to other sectors including infrastructure. ATO and government concern resulted in the inclusion of integrity measures in a bill before parliament to apply from 1 July 2019. These measures will limit access to the lower MIT withholding tax rate for certain stapled structures income, with substantial transitional rules for certain existing infrastructure projects and a rolling 15-year

exemption for approved “nationally significant” infrastructure projects.

Stronger focus of the Foreign Investment Review Board on tax issues. The Foreign Investment Review Board (FIRB) approval process for relevant foreign investments involves tax issues, and the ATO is playing a greater role. For approvals since 2016, the national interest test contains eight standard tax conditions plus possible additional conditions that may be imposed if a significant tax risk is identified by the FIRB and ATO. The expanded requirements do not only affect new foreign investment; they may also affect current inbound investors undertaking certain reorganizations. They increase the role of tax discussions in FIRB approval processes and may add time, particularly if the ATO requires further actions.

Multilateral Instrument to update Australia’s tax treaties. Australia has ratified the Multilateral Instrument (MLI), and deposited final positions adopted with the OECD. As of 1 January 2019, the MLI will commence to alter Australia’s covered tax arrangements.

Taxation of the digital economy. An Australian Treasury 2018 discussion paper explored implications of the digital economy for the corporate tax system but did not provide any recommendations or express a clear preference for any measure for taxing the digital economy either on a long-term structural basis or an interim basis.

F. Treaty withholding tax rates

The table below provides treaty withholding tax rates for dividends, interest and royalties paid by Australian companies to non-residents.

Under Australian domestic law, certain dividends and interest payments to nonresidents are exempt from withholding tax.

For dividends, Australian domestic law provides that no withholding tax is imposed on dividends to the extent they are franked under Australia’s imputation system introduced in 1987 (see Sections B and E). Some of Australia’s double tax treaties specifically refer to withholding taxes imposed on franked dividends in some circumstances but, under the domestic tax law, dividend withholding tax is not imposed with respect to franked dividends.

For interest, Australia does not impose withholding tax on interest paid to nonresidents on certain publicly offered company debentures or on interest paid on state and federal government bonds. No withholding tax is imposed on interest paid on offshore borrowings by offshore banking units.

	Unfranked dividends	Interest	Royalties
	%	%	%
Argentina	10/15 (b)	12	10/15 (c)

Vietnam	15	10	10
Non-treaty jurisdictions	30	10	30

- (a) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 0% or 5%, if the beneficial owner of the dividends is a company that holds at least 80% or 10%, respectively, of the voting power in the payer. In all other cases, the rate is generally 15%.
- (b) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 10% for franked dividends paid to a person holding directly at least 10% of the voting power in the payer). To the extent dividends are unfranked, the withholding tax rate is 15%, regardless of voting power.
- (c) The 10% rate applies to specified types of royalties.
- (d) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 25%, or 15% if a tax rebate or credit is granted against Australian tax to the beneficial owner of the dividends.
- (e) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for dividends paid out of fully taxed profits if the recipient is a company that

- holds directly at least 10% of the capital of the payer). To the extent dividends are unfranked, the withholding tax rate is 15%, regardless of voting power.
- (f) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 20% rate applies to dividends paid to a company that holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies if the condition described in the preceding sentence is satisfied and if the payer is engaged in an industrial undertaking.
 - (g) The 0% rate applies to government institutions and unrelated financial institutions.
 - (h) The 10% rate applies if any of the following conditions are satisfied:
 - The recipient is a bank or insurance company.
 - The interest is derived from bonds and securities traded on a recognized securities market.
 - The payer is a bank or the purchaser of machinery and equipment with respect to a sale on credit.
 - (i) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 0% rate applies if the recipient of the dividends is a company holding directly at least 10% of the voting power in the payer, and the 15% rate applies in all other cases.
 - (j) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for dividends paid out of fully taxed profits to a company that holds at least 10% of the capital of the payer and that has invested at least AUD700,000 [or the equivalent in Russian rubles] in the payer). To the extent dividends are unfranked, the withholding tax is 15%, regardless of voting power.
 - (k) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for franked dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer). To the extent dividends are unfranked, the rate is 15%, regardless of voting power.
 - (l) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 5% for franked dividends). To the extent dividends are unfranked, the rate is 15%.
 - (m) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a rate of up to 10% for franked dividends). To the extent dividends are unfranked, the rate is 15%.
 - (n) The 10% rate applies to interest derived by financial institutions or insurance companies.
 - (o) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate is 0% or 5% if the recipient holds at least 80% or 10%, respectively, of the voting power in the payer and 10% in other cases. However, a 15% withholding tax rate applies to fund payments from managed investment trusts but, under Australian law, this rate is reduced to 10% for funds payments by clean building managed investment trusts.
 - (p) The withholding tax rates listed in the table apply to income derived by non-residents on or after 1 January 2015.
 - (q) Australia does not impose withholding tax on dividends to the extent they are franked (notwithstanding that the treaty provides for a 0% rate if the dividends paid out of profits that have borne the full company tax and if the recipient is a company that holds directly at least 10% of the voting power of the payer). To the extent dividends are unfranked, the rate is 15%, or it is 5% if the dividends are paid to a company that holds at least 10% of the voting power of the payer.
 - (r) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rate on unfranked dividends is 15%, or 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting power of the company paying the dividend.
 - (s) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 5% rate applies to dividends paid by a company that is resident in Australia to a company (other than a partnership) that holds directly at least 10% of the voting power in the company paying the dividends. The 15% rate applies in all other cases.
 - (t) Australia is renegotiating its double tax treaty with the United Kingdom. An exemption from withholding tax for interest payments to related financial institutions is one area for potential change. However, further details are not yet available.
 - (u) These countries are not currently listed as “information exchange countries” (see Section E).

- (v) Interest derived from the investment of official reserve assets by the government of a contracting state, its central bank or a bank performing central banking functions in that state is exempt from tax in the other contracting state. The 10% rate applies in all other cases.
- (w) Australia has most-favored-nation clauses in its treaties with Austria, Finland, France, Italy, Korea (South), Malaysia, the Netherlands, Norway and Switzerland. Under the most-favored-nation clause, Australia and the other treaty country must try to renegotiate their tax treaties if the withholding tax rates in another of Australia's tax treaties are lower.
- (x) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 0% rate applies if the recipient holds at least 80% of the payer or if the dividends are paid with respect to portfolio investments by government bodies including government investment funds. The 5% rate applies if the recipient holds at least 10% of the payer. The 15% rate applies to other dividends.
- (y) The 0% rate applies to interest paid to government institutions and unrelated financial institutions. The 10% rate applies in all other cases.
- (z) The withholding tax rates listed in the table apply to income derived on or after 1 April 2013.
- (aa) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the 5% rate applies if the recipient beneficially owns at least 10% of the voting power in the company paying the dividends. The 15% rate applies in all other cases.
- (bb) The 5% rate applies if the recipient is a financial institution that is unrelated to and dealing wholly independently with the payer. The 10% rate applies in all other cases.
- (cc) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (dd) An amending protocol to the treaty signed on 16 December 2011 entered into force on 2 April 2013. It updates various aspects of the agreement including cross-border services, source-country taxation and assistance in collection of taxes. However, it does not contain any changes to withholding tax rates.
- (ee) Australia and Switzerland signed a revised tax treaty, which entered into force on 14 October 2014. It applies to withholding taxes on income that is derived by a resident of Switzerland on or after 1 January 2015.
- (ff) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, a 0% rate applies to dividends paid to the following:
- Publicly listed companies or subsidiaries thereof, and unlisted companies in certain circumstances, that hold 80% or more of the paying company
 - Complying Australian superannuation funds and tax-exempt Swiss pension schemes that did not hold more than 10% of the direct voting power or capital in the company, respectively, during the preceding 12-month period
- The 5% rate applies to dividends paid to companies that hold 10% or more of the paying company. The 15% rate applies in all other cases.
- (gg) Under the revised treaty, the 0% rate applies to interest paid to the following:
- Bodies exercising governmental functions and banks performing central banking functions
 - Banks that are unrelated to, and dealing independently with, the payer
 - Complying Australian superannuation funds and tax-exempt Swiss pension schemes
- The 10% rate applies in all other cases.
- (hh) Under the revised treaty, royalties are taxed in the source (of the royalty) country at a rate of up to 5%. The revised definition of "royalties" in the revised tax treaty excludes the right to use industrial, commercial or scientific equipment from the definition, and accordingly, may lower the costs for companies that lease such equipment.
- (ii) The revised treaty between Australia and Germany entered into force on 7 December 2016 and applies for withholding taxes from 1 January 2017.
- (jj) Australia does not impose withholding tax on dividends to the extent they are franked. To the extent dividends are unfranked, the rates are 0% if the recipient holds at least 80% of the voting power in the payer for at least 12 months, 5% if the recipient holds at least 10% for at least 6 months (including the date of payment) and 10% in other cases. However, a 15% withholding tax rate applies to fund payments from managed investment trusts but, under Australian law, this rate is reduced to 10% for funds payments by clean building managed investment trusts.

- (kk) The 0% rate applies if the interest is derived by bodies exercising governmental functions or performing central banking functions or by financial institutions unrelated to and dealing wholly independently with the payer. The 10% rate applies in all other cases.

Australia announced its intention to begin negotiations on a double tax treaty with Israel.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25
Withholding Tax (%)	
Dividends	25/27.5 (b)
Interest (from Bank Deposits and Securities only)	0/25 (c)
Royalties from Patents, Know-how, etc.	20 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (e)

- (a) This rate applies to distributed and undistributed profits.
 (b) In general, this withholding tax applies to dividends paid to residents and nonresidents. An Austrian corporation is generally required to withhold tax at a rate of 27.5%. However, if the distributing company has evidence of the corporate status of the investor, it may withhold tax at a rate of 25% (see Section B). Certain dividends paid to Austrian and European Union (EU) companies are exempt from tax (see Section B). In addition, a reduction in or relief from dividend withholding tax may be possible under double tax treaties.
 (c) For details, see Section B.
 (d) This withholding tax applies to nonresidents.
 (e) The offset of loss carryforwards against taxable income is limited to 75% of taxable income in most cases (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. In general, all companies resident in Austria and foreign companies with Austria-source income are subject to corporate income tax. (For the scope of income subject to tax, see *Foreign tax relief*.) A company is resident in Austria if it has its legal seat or its effective place of management in Austria.

Rates of corporate income tax. The corporate tax rate is generally 25%.

All companies, including those incurring tax losses, are subject to the minimum tax. In general, the minimum tax is EUR1,750 for an Austrian private limited company (Gesellschaft mit besch-

raenkter Haftung, or GmbH), EUR3,500 for a stock corporation (Aktiengesellschaft, or AG) and EUR6,000 for a European stock corporation (Societas Europea, or SE). For banks and insurance companies, the minimum tax is EUR5,452. Minimum tax may be credited against corporate tax payable in future years.

A reduced minimum tax applies to newly formed Austrian private limited companies incorporated after 30 June 2013. For such companies, the minimum tax is EUR500 per year for the first five years and EUR1,000 for the following five years. This is known as the “foundation privilege.”

Participation exemptions. The Austrian tax law provides for national and international participation exemptions.

National. Dividends (including hidden profit distributions) received by an Austrian company from another Austrian company are exempt from corporate income tax (no minimum holding is required). Capital gains derived from the sale of shares in Austrian companies are treated as ordinary income and are subject to tax at the regular corporate tax rate. In general, capital losses on and depreciation of the participation may be deducted from taxable income, spread over a period of seven years.

International participation. An Austrian company is entitled to the international participation exemption if it holds at least 10% of the share capital of a foreign corporation that is comparable to an Austrian corporation for more than one year. The one-year holding period begins with the acquisition of the participation. The international participation exemption applies to dividends and capital gains.

A decrease in the value of an international participation is generally not tax deductible, but an Austrian company can irrevocably opt for such tax deductibility in the annual tax return for the year of acquisition. If this irrevocable option is exercised, capital gains are subject to tax, and decreases in value and capital losses are tax deductible. In general, capital losses and depreciation of the participation may then be deducted from the taxable income, spread over a period of seven years. In the event of insolvency or liquidation, final losses may be deducted even if the option for tax effectiveness was not exercised. The option does not affect the tax treatment of dividends.

International portfolio participation. Dividends from participations that do not meet the criteria for international participations are subject to the general corporate income tax rate of 25%. However, shareholdings in EU corporations, certain European Economic Area (EEA) corporations (currently only Liechtenstein and Norway) and corporations that are resident in third countries and that have agreed to exchange tax information qualify as international portfolio participations. Dividends from such international portfolio participations are exempt from tax. Capital gains (and losses) are tax-effective (the treatment corresponds to the treatment of national participations).

Controlled foreign company and anti-abuse rules. On 1 January 2019, new controlled foreign company (CFC) rules entered into force. For details about the CFC rules and anti-abuse rules, see *Controlled foreign companies and anti-abuse rules* in Section E.

Hybrid financing. Dividends from international participations (including portfolio participations) are not exempt from tax in Austria if such payments are deductible for tax purposes in the country of the distributing company.

Expenses. Business expenses are generally deductible. However, an exception applies to expenses that are related to tax-free income. Although dividends from national and international participations and portfolio participations are tax-free under the Austrian participation exemption, interest incurred on the acquisition of such participations is deductible for tax purposes. However, interest from debt raised to finance the acquisition of participations from affiliates is generally not deductible. In addition, interest and royalty payments to domestic and foreign-affiliated corporations are not tax deductible if the income of the recipient corporation is not subject to tax or taxed at a (nominal or effective) rate of less than 10%. If the recipient corporation is not the beneficial owner, the taxation of the beneficial owner is relevant. An exception applies to payments to entities that meet the EU law privileges for risk capital measures, which are contained in Regulation (EU) No. 345/2013 of the European Parliament and of the Council of 17 April 2013 on European venture capital funds. If these specific rules of EU law are fulfilled and if the income of the recipient corporation is taxed at a rate of less than 10%, interest and royalty payments to domestic and foreign affiliated corporations remain deductible for tax purposes.

Capital gains. Capital gains derived from sales of shares in Austrian companies are treated as ordinary income and are subject to tax at the regular corporate tax rate. Capital gains derived from sales of shares in non-Austrian companies may be exempt from tax under the international participation exemption; otherwise, they are treated as ordinary income and subject to tax at the regular corporate tax rate.

Withholding taxes on dividends and interest

Dividends. Effective from 1 January 2016, the general withholding tax rate for dividends is 27.5% if the distribution does not constitute a repayment of capital. The withholding tax rate may be reduced to 25% if the investor is a corporation. In practice, this means that if the distributing entity lacks information on the status of an investor (corporate or individual), the 27.5% rate applies. In general, the 27.5% rate applies to dividends paid with respect to portfolio investments, including those paid to corporate investors. If the person required to withhold has information that the investor is a corporation, the 25% tax rate can be applied at source (for example, intercompany dividends). If 27.5% is withheld, corporate investors may reduce their tax burden in Austria to 25% in an assessment and refund procedure, based on their corporate status.

However, this withholding tax does not apply to dividends (other than hidden profit distributions) paid to either of the following:

- An Austrian parent company (fulfilling certain criteria) holding directly or indirectly an interest of at least 10% in the distributing company.
- A parent company (fulfilling certain criteria) resident in another EU country holding directly or indirectly an interest of at least 10% in the distributing company for at least one year.

Furthermore, the withholding tax rate may be reduced for dividends paid to foreign shareholders in accordance with double tax treaties. Depending on the situation, this reduction may be in the form of an upfront reduction at source or a refund of withholding tax.

For dividends paid to parent companies resident in the EU or EEA (if the EEA country grants full administrative assistance; currently only Liechtenstein and Norway meet this condition) that are subject to tax in Austria, Austrian withholding tax is refunded if the shareholder can prove that the withholding tax cannot be credited in the state of residence of the shareholder under tax treaty law.

Interest. Interest paid on loans (for example, intercompany loans) is generally not subject to withholding tax in Austria. A 27.5% withholding tax is imposed on interest income paid by Austrian banks, Austrian branches of foreign banks or Austrian paying agents. An exception from the 27.5% rate applies to interest on bank savings and other non-securitized loans from banks (except for compensation payments and lending fees), which are subject to a 25% tax rate. Interest paid to nonresident companies is generally exempt from Austrian withholding tax if certain evidence is provided. In addition, interest income is exempt from withholding tax if the debtor has neither an ordinary residence nor a registered office in Austria and if it is not a domestic branch of a foreign bank. EU withholding tax is abolished, effective from January 2017.

Interest income earned by a company engaged in business in Austria through a permanent establishment is considered business income and must be included in the taxable income of the permanent establishment. For such companies, the withholding tax (if due) is credited against the corporate income tax. If the withholding tax exceeds the tax due, it is refunded. The withholding tax is not imposed if a declaration of exemption stating that the interest is taxed as business income is filed with the Austrian bank.

Administration. In principle, the Austrian tax year corresponds to the calendar year. However, other fiscal years are possible. The tax base is the income earned in the fiscal year ending in the respective calendar year. Annual tax returns must be filed by 30 April (30 June, if submitted electronically) of the following calendar year. Extensions may be granted. A general extension to 31 March (or 30 April) of the second following year is usually granted if a taxpayer is represented by a certified tax advisor (tax returns may be requested earlier by the tax office).

Companies are required to make prepayments of corporate income tax. The amount is generally based on the (indexed) amount of tax payable for the preceding year, and payment must be made in equal quarterly installments on 15 February, 15 May, 15 August and 15 November.

Interest is levied on the amount by which the final tax for the year exceeds the total of the advance payments if this amount is paid after 30 September of the year following the tax year. To prevent interest, companies may pay the amount due as an additional

advance payment by 30 September of the year following the tax year.

Foreign tax relief. In general, resident companies are taxed in Austria on their worldwide income, regardless of where that income is sourced. However, the following exceptions exist:

- The Finance Ministry may, at its discretion, allow certain types of income that have their source in countries with which Austria has not entered into a double tax treaty to be excluded from the Austrian tax computation, or it may allow foreign taxes paid to be credited against Austrian corporate income tax. Under a decree of the Ministry of Finance, an exemption is granted in case of active income and taxation of at least 15%. Otherwise, only a credit of foreign taxes is allowed.
- Income earned in countries with which Austria has a double tax treaty is taxable or exempt, depending on the treaty.
- Dividends and capital gains derived from participations of 10% or more in foreign subsidiaries can be exempt from corporate income tax under the international participation exemption (see *Participation exemptions*).
- Dividends from foreign portfolio shareholdings in companies resident in countries that have agreed to exchange tax information are exempt from tax unless the subsidiary is low-taxed (see *Participation exemptions*).

C. Determination of trading income

General. In general, taxable income is based on the profit or loss shown in the financial statements prepared in accordance with Austrian generally accepted accounting principles. The financial statement profit or loss must be adjusted in accordance with special rules set forth in the tax acts. Taxable income is calculated as follows.

Profit per financial statements	X
+ Nondeductible taxes (such as corporate income tax)	X
+ Nondeductible expenses (such as donations, lump-sum accruals and certain interest)	X
– Special allowances and nontaxable income (intercompany dividends and loss carryforwards*)	<u>(X)</u>
= Taxable income	<u>X</u>

* The offset of loss carryforwards against taxable income is limited to 75% of taxable income in most cases.

Inventories. In determining trading income, inventories must be valued at the lower of cost or market value. Cost may, at the taxpayer's option, be determined using any of the following methods:

- Historical cost
- Average cost
- First-in, first-out (FIFO)
- Under certain circumstances, last-in, first-out (LIFO)

The highest-in, first-out (HIFO) method is not allowed.

Provisions. Accruals for severance payments and pension costs are allowable to a limited extent. Accruals for corporate income tax and lump-sum accruals are not deductible for tax purposes.

Provisions with a term of 12 months or more are subject to a mandatory fixed discounting rate of 3.5%, except for accruals for severance payments and pension costs, which are tax deductible to the extent of 100% of their tax value.

Depreciation. In general, depreciable assets are depreciated over the average useful life. For certain assets, such as buildings and passenger cars, the tax law provides depreciation rates. The following are some of the applicable annual rates.

Asset	Rate (%)
Buildings	1.5/2.5*
Office equipment	10 to 25
Motor vehicles	12.5
Plant and machinery	10 to 20

* The rate of 1.5% applies to buildings that are leased for residential use.

Research and development. Companies may claim a research and development (R&D) bonus (cash payment) equal to 14% of certain expenses for research and experimental development (according to the Frascati manual, these expenses consist of material costs, labor costs, energy costs and attributed interest). The R&D must be conducted by an Austrian company in Austria or by an Austrian permanent establishment of a foreign company.

Relief for losses. Losses incurred by resident companies may be carried forward without time limit. The offset of loss carryforwards against taxable income is in most cases limited to 75% of the taxable income. The remaining balance of the loss carryforward may be offset against income in future years, subject to the same 75% limitation.

The loss carryforward is attributable to the corporation, not to the shareholders. Consequently, a change in shareholders does not affect the loss carryforward, provided no corresponding substantial change in the business and management of the company occurs. Losses may not be carried back. Foreign companies with permanent establishments in Austria may claim tax losses only under certain circumstances.

Groups of companies. The group taxation regime allows parent and subsidiaries to consolidate their taxable income. Under the Austrian law, the head of the tax group must be an Austrian corporate entity or branch of an EU/EEA corporate entity that has held more than 50% of the capital and voting rights in the subsidiary since the beginning of the subsidiary's fiscal year. The shareholding can be direct, or it can be held indirectly through a partnership or a group member. Only corporations (not partnerships) qualify as group members. If the holding requirement is satisfied, 100% of the taxable income (profit or loss) of domestic group members is allocated to the taxable income of the group parent, regardless of the percentage of the shareholding in the subsidiary. No actual profit or loss transfer takes place (only an agreement on the split of the tax burden is required). The tax group must exist for at least three full financial years. Otherwise, retroactive taxation on a stand-alone basis applies.

Group taxation also allows a cross-border tax consolidation if the foreign subsidiary is directly held by an Austrian parent (first foreign tier) and if the type of entity is comparable to an Austrian

corporation from a company law perspective. Effective from 1 March 2014, certain companies are excluded from the group taxation regime. Only corporations resident in the EU and in countries with which Austria has agreed on comprehensive administrative assistance can be included in a tax group. The Austrian Ministry of Finance has published a list of all qualifying third countries.

Foreign losses must be recalculated under Austrian tax law. In addition, the deductibility of foreign losses is limited to the lower of the amount according to Austrian tax law and actual losses calculated under foreign tax law. Losses from foreign group members can be deducted from the Austrian tax base in proportion to the shareholding only. Beginning with the 2015 tax year, the utilization of losses of foreign group members is limited to 75% of the domestic group income. Excess losses are included in the loss carryforwards for subsequent years. Profits of a foreign group member are generally not included in the Austrian group parent's income.

To avoid double utilization of losses of a foreign group member, foreign losses that have been deducted from income of the Austrian group shareholder are added to the Austrian profit if the losses can be offset in the foreign jurisdiction at a subsequent time. Consequently, if the foreign country uses the losses in subsequent years (as part of a loss carryforward), the tax base in Austria is increased by that amount in order to prevent a double dip of losses. Foreign losses must also be added to the Austrian income tax base if the foreign subsidiary leaves the group. A recapture is also required if a significant reduction occurs in the size of the foreign subsidiary's business. This measure is designed to prevent dormant foreign entities from remaining in the group to avoid the recapture of foreign losses. Relief for capital losses is provided only in the event of a liquidation or insolvency.

Depreciation to the fair market value of a participation within the group is tax-neutral.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard	20
Reduced	10/13
Payroll taxes, paid by employer	
Family allowance fund; varies by state	4.24 to 4.32
Community tax	3
Real estate sales tax (including 1.1% registration fee)	4.6
Stamp duties, on certain legal transactions, such as leases and hire contracts	0.8 to 2

E. Miscellaneous matters

Foreign-exchange controls. No restrictions are imposed on the transfer of nominal share capital, interest and the remittance of dividends and branch profits. Royalties, technical service fees

and similar payments may be remitted freely, but routine documentation may be required.

Debt-to-equity rules. Austrian tax law does not provide special debt-to-equity rules. Although, in general, shareholders are free to determine whether to finance their company with equity or loans, the tax authorities may reclassify loans granted by shareholders, loans granted by group companies, and loans granted by third parties guaranteed by group companies as equity, if funds are transferred under legal or economic circumstances that typify equity contributions, such as the following:

- The equity of the company is insufficient to satisfy the solvency requirements of the company, and the loan replaces equity from an economic point of view.
- The company's debt-to-equity ratio is significantly below the industry average.
- The company is unable to obtain any loans from third parties, such as banks.
- The loan conveys rights similar to shareholder rights, such as profit participations.

If a loan is reclassified (for example, during a tax audit), interest is not deductible for tax purposes and withholding tax on hidden profit distributions may become due. Capital duty was abolished, effective from 1 January 2016.

Transfer pricing. Austria has accepted the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines and published a summary of the interpretation of the OECD guidelines by the Austrian tax administration in 2010. Under these guidelines, all transactions with related parties must be conducted at arm's length. If a transaction is considered not to be at arm's length, the transaction price is adjusted for corporate income tax purposes. This adjustment may be deemed to be a hidden profit distribution subject to withholding tax or a capital contribution.

In 2016, Austria introduced the Transfer Pricing Documentation Law (TPDL), which follows the three-tier documentation approach consisting of a Country-by-Country Report (CbCR), the master file and the local file. The master file and local file must be prepared if an Austrian constituent entity generated over EUR50 million turnover in the two preceding fiscal years. A CbCR must be prepared if the whole multinational group exceeded a threshold of consolidated turnover of EUR750 million in the preceding fiscal year. By the last day of the fiscal year for which a CbCR is prepared, each Austrian constituent entity of a multinational group exceeding the threshold must inform the competent Austrian tax office of the entity that is preparing or filing the CbCR and where this entity is a resident. An Austrian entity that does not reach the threshold for filing a master file and a local file still must file a master file if the multinational group is required to prepare one by another country. In addition, the TPDL clarifies that documentation obligations existing in addition to the TPDL (for example, accounting and filing obligations imposed by the Austrian Federal Fiscal Code [FFC]) are not affected by the TPDL. Therefore, it is strongly suggested that constituent entities resident in Austria of multinational groups that do not exceed the stipulated turnover of the TPDL prepare

Transfer Pricing Documentation Reports in accordance with the FFC.

Controlled foreign companies and anti-abuse rules. On 1 January 2019, new CFC rules entered into force. The CFC regime (in line with the EU Anti-Tax Avoidance Directive [ATAD]) applies if more than one-third of the income of a low-taxed foreign company is passive income and if the entity is lacking sufficient economic functions and substance.

Passive income is defined in line with the ATAD as consisting of the following:

- Interest or other income from financial assets
- Royalties and other income from intellectual property
- Dividends and capital gains from the disposal of shares, insofar as they would have been taxable at the level of the Austrian shareholder
- Income from capital leasing
- Income from activity as an insurance company, bank and other financial activities
- Income from invoicing companies, which derive income by selling goods and services that generate no or little economic value from and to affiliated companies

Low taxation means that the effective actual tax burden of the foreign company does not exceed 12.5%. The basis of assessment for the tax burden must be calculated according to Austrian tax law and compared to the actual foreign tax paid. For purposes of the CFC regime, low taxation does not exist if the low taxation stems only from a shorter depreciation period or a more favorable use of losses under the foreign tax law.

An Austrian company controls a foreign company if it holds alone or together with an associated entity directly or indirectly a participation of more than 50% in the foreign company. An associated entity is an entity in which the Austrian entity holds directly or indirectly a participation of at least 25%, as well as any entity that is held by the same entity or person that owns directly or indirectly a participation of at least 25% of the Austrian entity and the other entity. If more than a one-third of the income of a low-taxed controlled foreign entity is passive income, the passive income is attributed to its controlling entity or entities to the extent of their participation, unless the foreign entity carries out substantial economic activity based on personnel, equipment, assets and premises. Foreign tax on the attributed passive income can be credited against the Austrian tax.

In addition, the tax exemptions for international participations and international portfolio participations (see Section B) do not apply if the participation is in a company that generates mostly passive income and is located in a low-tax country (low taxation as defined in the CFC regime). Instead, they are taxed at the general Austrian corporate income tax rate of 25%. For international participations and international portfolio participations of at least 5%, foreign tax is credited (switchover to credit method). If the income has already been attributed to the Austrian controlling entity according to the CFC rules, no switchover to the credit method is allowed.

F. Treaty withholding tax rates

The following summary is intended purely for orientation purposes; it does not reflect the various special provisions of individual treaties or the withholding tax regulations in domestic tax law.

A General.

B Dividends received from subsidiary company. Shareholding required varies from 10% to 95%, but generally is 25%.

C General.

D Mortgages.

E General.

F Royalties from 50% subsidiary.

- (a) Under domestic tax law, a 25% withholding tax is imposed only on interest income from bank deposits and securities. However, interest paid to nonresidents is generally not subject to withholding tax. For details, see Section B.
- (b) No reduced rate applies.
- (c) No withholding tax is imposed, but the income is subject to tax at the regular corporate rate.
- (d) Austria is honoring the USSR treaty with respect to the republics comprising the Commonwealth of Independent States (CIS), except for those republics that have entered into tax treaties with Austria. Austria has entered into tax treaties with Armenia, Azerbaijan, Belarus, Kazakhstan, Kyrgyzstan, Moldova, the Russian Federation, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. The withholding tax rates under these treaties are listed in the above table.
- (e) Interest paid by banks is subject to a 4.95% withholding tax.
- (f) Trademark royalties are subject to a 25% withholding tax. The withholding tax rate is 15% for royalties paid for literary, artistic and scientific items.
- (g) The rate is 10% for royalties paid for the use of films or other means of production used for radio or television.
- (h) The 5% rate applies if the participation of the recipient of the dividends exceeds USD250,000. The 10% rate applies if the participation of the recipient of the dividends exceeds USD100,000 but does not exceed USD250,000.
- (i) The rate is 5% for royalties paid for technologies not older than three years.
- (j) The rate is 0% for royalties paid for literary, artistic and scientific items.
- (k) Royalties paid for computer software, patents and know-how are exempt if the royalties are taxed in the state of residence of the recipient.
- (l) The rate is 5% for royalties paid to licensors engaged in industrial production.
- (m) This rate applies to dividends received from a 10%-subsidiary.
- (n) The rate is 2% for amounts paid for the use of commercial or scientific equipment.
- (o) The rate is 20% for dividends paid by non-industrial Pakistani corporations.
- (p) The rate is 10% for royalties paid for literary, artistic and scientific items.
- (q) The 5% rate applies to amounts paid for the use of industrial or scientific equipment.
- (r) The 5% rate applies to dividends received from a 25%-subsidiary; the 10% rate applies to dividends received from a 10%-subsidiary.
- (s) The rate is 10% for interest paid to a bank if the interest arises from the transacting of bank business and if the recipient is the beneficiary of the interest.
- (t) The 5% rate applies to participations of at least 70%. The 10% rate applies to participations of at least 25%.
- (u) The rate is 7.5% for technical services.
- (v) The rate is reduced to 10% for interest received from a bank. Interest on loans granted by the Österreichische Kontrollbank to promote exports or similar institutions in Turkey is subject to a withholding tax rate of 5%.
- (w) A shareholding of at least 5% is required.
- (x) The 10% rate applies to industrial royalties.
- (y) See Section B.
- (z) The 5% rate applies to interest derived from loans granted by banks and insurance companies, and bonds or securities that are regularly and substantially traded on a recognized securities market, as well as to interest on sales on credit paid by the purchaser of machinery and equipment to a beneficial owner that is the seller of the machinery and equipment.
- (aa) The 5% rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment.

- (bb) No withholding tax is imposed if any of the following circumstances exist:
- The interest is paid to the government of the other contracting state, or a political subdivision, a local authority or the central bank thereof.
 - The interest is paid by the government of the other contracting state, or a political subdivision, a local authority or the Central Bank thereof.
 - The interest is paid to a pension fund or similar arrangement that is a resident of the other contracting state.
 - The interest is paid to a resident of the other contracting state on corporate bonds that are traded on a stock exchange in the first-mentioned state (state of source) and that were issued by a company that is a resident of that state.
 - The interest is paid with respect to a loan, debt claim or credit that is owed to or made, provided, guaranteed or insured by the first-mentioned state (state of source), or political subdivision, local authority or export financing agency thereof.
- (cc) In general, no withholding tax is imposed. However, in the case of Austria, income derived from debt claims carrying a right to participate in profits, including income derived from profit-participating loans and profit-participating bonds, may also be taxed in Austria according to the laws of Austria if it arises in Austria; in the case of Japan, interest arising in Japan that is determined by reference to receipts, sales, income, profits or other cash flow of the debtor or a related person, to any change in the value of any property of the debtor or a related person, to any dividend, partnership distribution or similar payment made by the debtor or a related person, or to any other interest similar to such interest arising in Japan may also be taxed in Japan according to the laws of Japan.
- (dd) Kosovo and Austria have signed the tax treaty, but the ratification process of the treaty has not yet been completed.

The tax treaty with Argentina was suspended by Argentina, effective from 1 January 2009.

Austria signed and ratified the Multilateral Instrument in 2017. It entered into force in 2018.

Because of the rapidly evolving economic situation in Azerbaijan, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Profits Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Permanent Representation Tax Rate (%)	20
Withholding Tax (%)	
Dividends	10 (a)
Interest or Financial Lease Payments	10 (b)
Royalties from Patents, Know-how, etc.	14 (a)
Management Fees	10 (c)
Income from International Transportation and Telecommunication Services	6 (c)
Insurance Payments	4 (c)
Payments of other Azerbaijani-Source Income to Foreign Companies	10 (c)
Payments to Companies Incorporated in Countries with a Preferential Tax Regime	10 (c)(d)
Transfers of Funds to Accounts Created in the Electronic Wallets of Nonresidents	10 (c)(e)
Branch Remittance Tax	10 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) These are final withholding taxes applicable to payments to Azerbaijani and foreign legal entities.
- (b) This is a final withholding tax applicable to payments to Azerbaijani and foreign legal entities, excluding Azerbaijani banks and leasing entities, and foreign banks and leasing entities operating in Azerbaijan through a permanent representation.
- (c) This is a final withholding tax applicable to payments to foreign legal entities.
- (d) Direct or indirect payments made by residents of Azerbaijan or permanent establishments of nonresidents located in Azerbaijan to legal entities incorporated or registered in countries with a preferential tax regime are considered to be income from an Azerbaijani source and are subject to a 10% withholding tax on the gross amounts of the payments. The list of countries with a preferential tax regime is approved by the President of the Republic of Azerbaijan on an annual basis.

- (e) Transfers of funds to accounts created in the electronic wallets of nonresidents (online payment systems) by residents of Azerbaijan are subject to a 10% withholding tax. This tax must be withheld by a local bank, branch of a foreign bank located in Azerbaijan or national postal operator from the residents making the transfers.

B. Taxes on corporate income and gains

Corporate profit tax. Enterprises carrying on activities in Azerbaijan, including enterprises with foreign investment, joint ventures and legal entities operating through a permanent representation, are subject to tax.

Azerbaijani resident legal entities are subject to tax on their worldwide income. For tax purposes, Azerbaijani resident legal entities are entities incorporated in Azerbaijan and entities that have their effective management located in Azerbaijan, including 100%-owned subsidiaries of foreign companies.

Nonresident legal entities are subject to tax on profits earned through a permanent representation only. A permanent representation is defined as the following:

- Persons who are performing the function of a permanent establishment of a nonresident legal entity or natural person and who are authorized to conclude contracts on behalf of such nonresident entity or natural person
- A bureau, office or agency
- A location where activities are carried out relating to the development of natural resources
- The rendering of consultation services
- A fixed base used for entrepreneurial activities for a cumulative amount of 90 days during any 12-month period

The Azerbaijan Law on the Protection of Foreign Investments allows foreign investment in various forms, including investment through 100% foreign-owned subsidiaries, share participations in joint stock companies and in joint ventures with Azerbaijani legal entities and citizens, permanent representations and other types of participations.

Tax rate. All entities operating in Azerbaijan are subject to corporate profit tax at a rate of 20%.

Capital gains. Capital gains are included in taxable income and taxed at the regular rate.

Administration. The tax year is the calendar year. The tax year for newly created enterprises or permanent representations of foreign legal entities runs from the date of formation through 31 December of the year of formation.

All entities operating in Azerbaijan must make advance payments of corporate profit tax by the 15th day following the end of each quarter. Each advance payment must equal at least one-quarter of the profit tax liability for the prior tax year. Alternatively, the amounts of the advance payments may be determined by multiplying the company's revenues for the quarter by the company's effective tax rate for the prior year. The effective tax rate is equal to tax as a percentage of revenues.

If, at the end of the tax year, it is determined that the total of the advance payments exceeds the tax due for the year, the excess may be credited against future tax obligations or refunded. In practice,

however, the tax authorities rarely, if ever, issue refunds. Consequently, entities generally credit overpayments against future taxes.

Dividends. Dividends paid are subject to income tax withholding at a rate of 10%. This is considered a final tax and companies do not include the dividends in taxable profits.

Foreign tax relief. Foreign income tax paid by taxpayers in Azerbaijan on income derived from sources outside Azerbaijan may be credited against Azerbaijani tax imposed on the same income, limited to the amount of Azerbaijani tax imposed on such income. In determining the amount of the allowable foreign tax credit, it is unclear if a limitation based on the country of source is imposed or if all foreign-source income is pooled.

C. Determination of trading income

General. Taxable profit is determined by computing the profit or loss from business activities and then adding income from non-trading operations, such as leasing income and capital gains, but excluding dividends received. Income received in foreign currency is converted into manats (AZN) at the daily exchange rate determined by the Central Bank of Azerbaijan.

Statutory norms limit the deductions for certain categories of expenses, such as business travel expenses, repair expenses, interest paid on foreign borrowings and interest paid between related parties. Expenses for meals and entertainment as well as for the providing of food and housing to employees are disallowed except for companies providing therapeutic nourishment items, milk and similar products to their employees. Such deductions will be allowed within norms, which have not yet been introduced by the government.

Foreign legal entities doing business through a permanent representation in Azerbaijan are taxed on actual profits. If actual profits cannot be determined, the tax authorities may determine taxable profits based on either income or expenses, with a deemed profit margin of 20%.

Tax depreciation. Fixed assets, other than buildings, are subject to depreciation by a group method. Under this method, fixed assets are allocated to groups, and the groups are depreciated in aggregate. Depreciation rates, which are specified by law, are applied to the aggregate book values for each of the groups. The depreciable balance for a group is reduced by the depreciation accrued for the year by the group. If any assets of a group are sold during the year, the depreciable balance of the group is reduced by the residual value of such assets. The profit or loss on the sale of such assets is separately determined.

An acquisition of assets under a finance lease is treated as a loan from the lessor to the lessee and a purchase of assets by the lessee. The lessee may then claim depreciation on the assets.

Relief for losses. An enterprise incurring a loss in a tax year may carry forward the loss to the following five years, without limitation on the amount, to offset the profit in such following years.

Groups of companies. There are no provisions permitting related enterprises to offset profits and losses among members of a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods sold and services rendered, in Azerbaijan; the tax law contains specific rules for determining when services are deemed to be provided in Azerbaijan; Azerbaijani taxpayers that make payments to entities that are not registered taxpayers in Azerbaijan for services provided in Azerbaijan must calculate VAT on the payments	18
Assets tax, on the annual average net book value of fixed assets or the market price of the asset if the insurance value of assets exceeds the net book value	1
Import tariffs	0 to 15

E. Miscellaneous matters

Foreign-exchange controls. The manat (AZN) is a non-convertible currency outside Azerbaijan. Enterprises may buy or sell foreign currency through authorized banks or foreign-exchange offices in Azerbaijan.

To receive foreign-currency income in Azerbaijan, an enterprise must obtain a license issued by the Central Bank of Azerbaijan.

Transfer pricing. Recent legislative amendments to the Tax Code of the Republic of Azerbaijan introduced transfer-pricing rules, effective from 1 January 2017. These rules are conceptually based on the arm's-length principle outlined in the transfer-pricing guidelines developed by Organisation for Economic Co-operation and Development (OECD). The new rules apply to Controlled Transactions, as defined in the rules. The following are Controlled Transactions:

- Transactions between residents of Azerbaijan and related parties of such residents, as defined in the Tax Code
- Transactions between permanent establishments of nonresidents and such nonresidents, as well as representative offices, branches and other establishments of such nonresidents in other countries and any other persons located in other countries that are related parties of such nonresidents
- Transactions between residents of Azerbaijan and/or permanent establishments of nonresidents in Azerbaijan and persons incorporated or registered under the laws of the jurisdictions recognized as preferential tax regime countries under the laws of Azerbaijan

Controlled Transactions are subject to reporting requirements if the company's annual turnover exceeds AZN500,000 (approximately USD294,100). Reporting is achieved through the submission of a Notification on Controlled Transactions by 31 March of the year following the reporting year.

Controlled Transactions can be subject to review by the tax authorities largely based on arm's-length principles assuming a comparability analysis under five transfer-pricing methods that

are outlined in OECD transfer-pricing guidelines and recognized in local transfer-pricing rules, subject to certain specific provisions. These provisions in the local transfer-pricing rules must be considered while performing the comparability analysis.

If the tax authorities make a price correction during the on-site tax audit, the additional tax accrual could be subject to 50% financial sanction.

F. Treaty withholding tax rates

Azerbaijan currently considers none of the tax treaties of the former USSR to be in force, except for the tax treaty between the USSR and Japan. This treaty is kept in force based on a separate exchange of diplomatic notes between the Ministries of Foreign Affairs and ratification by the Azerbaijan parliament. Azerbaijan has entered into tax treaties with various countries.

The withholding rates under Azerbaijan's ratified treaties are listed below. Because of recent reductions in domestic withholding tax rates, the tax treaties may now specify rates that are the same as, or in excess of, domestic rates and, consequently, offer little or no savings with respect to withholding taxes. The rates in the table reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends	Interest	Royalties

Business Tax Advisory

Bill Bailey (*resident in
Hamilton, Bermuda*) +1 (441) 294-5319
Email: bill.bailey@bm.ey.com

A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

B. Taxes on corporate income and gains

No taxes are levied on corporate income or capital gains.

C. License fees and other duties

Business license fees. For corporations designated as residents for exchange-control purposes, their business revenue in the Bahamas is subject to an annual license fee, which varies according to annual revenue or turnover. Businesses that have annual turnover not exceeding BSD50,000 are required to pay a business license fee of BSD100. If the turnover exceeds BSD50,000 per year, the fee varies from 0.5% to 1.25%, based on the business annual revenue or turnover.

The occasional business license fee is BSD25, and the temporary business license fee equals 1.5% of gross turnover.

As an anti-tax avoidance measure, a subsidiary in the Bahamas is subject to the same business license tax rate as is its parent in the Bahamas.

The deadline for submission of business license renewal applications is 31 January of each year.

Business license fees must be paid by 31 March each year, and proof of payment of real property tax must be produced before the license is issued.

Corporations regulated by specific legislation may not be subject to this fee.

Bank and trust company license fees. Offshore banks and trust companies licensed under the Bank and Trust Companies Regulation Act are subject to business license fees, which vary depending on the value of the assets under management. The annual business license fees range from BSD450,000 to BSD3,750,000 per license. In addition, banks and trusts are subject to tax at a rate of 3% of turnover.

International business companies. International business companies (IBCs) pay an annual license fee based on authorized capital. Government fees related to the creation of an IBC equal BSD400 for capital up to BSD50,000 and BSD1,200 for capital over BSD50,000. IBCs are subject to value-added tax (VAT). They are exempt from all other taxes and stamp duties for a period of 20 years, other than transactions involving real estate in the Bahamas. IBCs are normally created through service providers that charge separate fees for their services.

Limited duration companies. Limited duration companies (LDCs) pay an application fee of BSD850 and an annual license fee based on authorized capital. LDCs may be classified as partnerships for US tax purposes. By complying with certain formalities, an existing IBC may change its status to an LDC.

Insurance companies. Insurance companies that are incorporated in the Bahamas pay stamp tax on authorized capital (for details, see Section D). They also pay the fees described below.

Resident insurance companies that write local business pay an initial registration fee of BSD1,000.

Restricted offshore insurance companies pay an initial registration fee of BSD2,500 and an annual fee of BSD2,500 in subsequent years. Unrestricted companies pay an initial registration fee of BSD3,500 and an annual fee of BSD3,500 in subsequent years. Offshore insurance companies also pay an annual fee of BSD1,000 for each licensed resident insurance manager who provides underwriting as a service. Offshore insurance companies are exempt from all other taxes for a period of 20 years from the date of registration.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); charged on any taxable supply of goods and services, as well as importations; applied at the standard rate, unless an exception applies such as a zero-rating or a VAT exemption; standard and zero-rated supplies allow input VAT recovery on purchases made, but VAT exemption results in input VAT being a cost; the legislation provides limited exceptions; VAT registration is mandatory for a person or business making taxable supplies or taxable importations and having turnover exceeding BSD100,000 in any period of 12 months or less; the legislation also provides for voluntary registration; standard rate	12%

Nature of tax	Rate
Customs duties, on imported items; exemptions may be granted to businesses licensed under certain legislation; rate varies by type of item	Various
Stamp duty (some of the most common)	
On property conveyances; rate depends on selling price (because of the implementation of VAT, the rate is a combination of VAT and stamp duty)	2.5% to 10%
On an assignment or transfer of personalty or realty	
Up to BSD100,000	2.5%
BSD100,001 and above	10%
On a resolution increasing the capital of a domestic limited company; for every BSD50,000 or fraction thereof	BSD10
Repatriation out of substantial profits generated in the Bahamas by trading concerns; tax is imposed on each transfer of funds exceeding BSD500,000 per year if the transfer represents dividends, profits or payments for services rendered by a related party	
Repatriated foreign currency	5%
Repatriated Bahamian dollars	1.5%
Leasing, subleasing or licensing of marina slips; tax rate applied to value	
BSD0 to BSD100,000	2.5%
BSD100,001 and above	10%
Real property tax; application of tax varies depending on appraised value, location, nationality of owner and development of property; imposed on different categories at progressive rates	Various
National insurance contributions on weekly wages up to BSD670 or on monthly wages up to BSD2,903; paid by	
Employer	5.9%
Employee	3.9%

E. Foreign-exchange controls

Corporations doing business in the Bahamas fall into the categories of resident or nonresident.

A resident company is a company that deals in or holds assets in the Bahamas. Business is carried out in Bahamian dollars. All transactions requiring foreign currency need prior approval of the Central Bank of the Bahamas to convert Bahamian dollars into another currency.

A nonresident company is one whose shareholders are not designated residents of the Bahamas and whose principal business activity takes place outside the Bahamas. Bank accounts in all currencies other than the Bahamian dollar can be operated free of any exchange controls. Shares of nonresident companies incorporated under the Companies Act cannot be transferred without the prior permission of the Central Bank of the Bahamas.

Exchange-control regulations generally do not apply to companies incorporated under the International Business Companies Act.

Nonresident companies are subject to an annual fee of BSD300.

F. Tax treaties

The Bahamas does not have any existing tax treaties. The Bahamas has entered into tax information exchange agreements with various countries.

On 3 November 2014, the Bahamas and the United States signed and released a Model 1 Intergovernmental Agreement (IGA) for the implementation of the US Foreign Account Tax Compliance Act (FATCA).

The Bahamas has committed to adopting the Organisation for Economic Co-operation and Development Common Reporting Standard (CRS). Reporting Financial Institutions were expected to report to The Bahamas Competent Authority by 31 August 2018 for the reporting year ended 31 December 2017. The reporting deadline will be 31 July in subsequent years.

Bahamas institutions are now required to comply with both FATCA and CRS in accordance with the Bahamas tax law regulations that are enacted.

A. At a glance

Corporate Income Tax Rate (%)	0*
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

* Oil and gas companies are subject to a special income tax (see Section B).

B. Taxes on corporate income and gains

Except for the income tax levied on oil and gas companies, no taxes are levied on corporate income or gains. Oil and gas companies are subject to tax on income derived from the sale of finished or semifinished products manufactured from natural hydrocarbons in Bahrain and from the sale of such raw materials if produced from the ground in Bahrain. The rate of tax is 46%.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); effective from 1 January 2019; the scope of VAT includes supplies of all goods and services made in Bahrain as well as imports; certain supplies are zero-rated or exempt	
Standard rate	5%

Nature of tax	Rate
<p>Customs duties; effective from 1 January 2003, the customs duties of the Gulf Cooperation Council (GCC) countries (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates) are unified; Bahrain applies the unified tariff in accordance with the Harmonized System codes, issued by the World Customs Organization (WCO); under the unified customs tariff, for all products, except for tobacco and tobacco-related products, customs duties are calculated by applying percentage rates; for tobacco and tobacco-related products, the customs duty equals the higher of an amount calculated by applying a rate of at least 100% to the value of the product or an amount based on the quantity or weight; in general, products are divided into four groups</p>	
Rates for the four groups	Free duty/ 5%/ 20%/100%/125%
Rates for the four groups	Free duty/ 5%/100%/125%
Social insurance contributions; payable on compensation of up to BHD4,000 per month for each employee	
Pension fund contributions; applicable to base salaries of Bahraini nationals	
Employer	9%
Employee	6%
Insurance against employment injuries; payable by employers; applicable to base salaries of Bahraini nationals and expatriates	3%
Unemployment insurance; payable by employees; applicable to Bahraini nationals and expatriates	1%
Municipal tax; payable by companies and individuals renting property in Bahrain; the tax rate varies according to the nature of the property and the payer of the utilities (that is, landlord or tenant)	7% to 10%
Foreign workers levy; payable monthly by all private and public companies with respect to each employed expatriate	BHD5 for the first five expatriate employees and BHD10 for each additional expatriate employee
Excise duty; effective from 30 December 2017; imposed on goods harmful to human health and the environment that are listed by the GCC Financial and Economic Cooperation Committee	
Carbonated drinks	50%
Energy drinks	100%
Tobacco	100%

D. Miscellaneous matters

Foreign-exchange controls. Bahrain does not impose foreign-exchange controls.

Base Erosion and Profit Shifting. On 11 May 2018, the Organisation for Economic Co-operation and Development (OECD) announced that Bahrain has joined the Base Erosion and Profit Shifting (BEPS) Inclusive Framework (BEPS IF). As a member jurisdiction of the BEPS IF, Bahrain is now a BEPS Associate and will be able to work alongside the OECD and G20 countries on developing standards on BEPS-related issues and the implementation of monitoring processes.

As a BEPS Associate, Bahrain is now committed to implementing the minimum standards of the BEPS plan, which are Action 5, 6, 13 and 14. As a result, legislative amendments are likely to be introduced in the near future.

E. Tax treaties

Bahrain has entered into tax treaties with Algeria, Austria, Bangladesh, Barbados, Belarus, Belgium, Bermuda, Brunei Darussalam, Bulgaria, China, Cyprus, the Czech Republic, Egypt, Estonia, France, Georgia, Hungary, Iran, Ireland, Isle of Man, Jordan, Korea (South), Lebanon, Luxembourg, Malaysia, Malta, Mexico, Morocco, the Netherlands, Pakistan, Philippines, Portugal, Seychelles, Singapore, Sri Lanka, Sudan, Syria, Tajikistan, Thailand, Turkey, Turkmenistan, the United Kingdom, Uzbekistan and Yemen.

In addition, Bahrain has initialed agreements with Guernsey, Liechtenstein, Spain and Switzerland. It is currently in negotiations with the Hong Kong Special Administrative Region, Jersey, Kyrgyzstan and Latvia.

- (a) For other corporate income tax rates, see *Rates of corporate tax* in Section B.
- (b) A surcharge of 2.5% is imposed on the business income of manufacturers of cigarettes, bidi, zarda, gul and other tobacco products.
- (c) A Tax Identification Number (TIN) is a unique number assigned to a taxpayer in Bangladesh on registration with the Bangladesh tax authorities. The TIN is a unique 12-digit code allotted to each person. The TIN is a mandatory requirement for filing a tax return in Bangladesh. If an income recipient fails to furnish its TIN, tax must be withheld at a rate of 50% higher of the rate specified in the relevant provision of the Income Tax Ordinance, 1984 (the Tax Ordinance).
- (d) Taxes withheld from dividends, interest, royalties and technical services fees paid to nonresidents are treated as a minimum discharge of tax liability on such income under the domestic tax laws and no refunds, adjustments or set-

offs of such taxes are permitted. The Tax Ordinance provides that in determining corporate income tax liability in Bangladesh, a nonresident company may apply the domestic tax rate or the tax treaty rate, whichever is more beneficial to the nonresident.

- (e) For residents, the withholding tax rate on royalties and technical services fees is 10% if the base amount does not exceed BDT2,500,000 and 12% if the base amount exceeds BDT2,500,000. For this purpose, the base amount is the higher of the contract value, the bill or invoice amount, or the payment amount.
- (f) Only business losses may be carried forward. Unabsorbed depreciation may be carried forward indefinitely to offset taxable profits in subsequent years.

B. Taxes on corporate income and gains

Corporate income tax. For corporate income tax purposes, a “company” means a company as defined in the Companies Act.

For Bangladesh income tax purposes, company income comprises the following:

- Income from house property
- Income from a business or profession
- Capital gains
- Agricultural income
- Income from other sources

A company is considered to be resident for tax purposes if it is a Bangladeshi company (that is, the company registered in Bangladesh or if a company’s control and management of its affairs is situated wholly in Bangladesh in that year).

A company resident in Bangladesh is subject to tax on its worldwide income, unless the income is specifically exempt. A company not resident in Bangladesh is subject to Bangladesh tax on Bangladesh-source income and on income received in Bangladesh.

Rates of corporate tax. The following are the corporate income tax rates in Bangladesh.

Nature of company	Rate (%)
Resident companies	
Publicly traded companies	
General rate	25
Banks, insurance companies and financial institutions	37.5
Cigarette manufacturing companies	45
Non-publicly traded companies (private limited companies)	
General rate	35
Banks, insurance companies and financial institutions	40
Mobile phone operator companies	45
Nonresident companies	35*

* A branch profit tax is imposed on profit remittances of nonresident companies.

The Tax Ordinance provides that in determining corporate tax liability in Bangladesh, a nonresident company may apply either Bangladesh domestic tax law or an applicable tax treaty, whichever is more beneficial to such nonresident.

Tax incentives. Tax incentives available in Bangladesh are described below.

Tax holidays or exemptions are available for the following:

- Newly set-up industrial undertakings
- Identifiable expansion units
- Physical infrastructure facilities (for example, water treatment plants, solar energy plants and compressed natural gas and liquefied natural gas transmission and terminal lines)
- Computer data entry and software development
- Tourist industries, depending on location
- Independent private sector power companies

Fifty percent of the income of a taxpayer (other than a company not registered in Bangladesh) attributable to export sales is exempt from tax. This exemption does not apply to a taxpayer enjoying a tax exemption or rate reduction by a notification made under the Tax Ordinance.

A reduced tax rate of 12% applies to the business income of a company engaged in the business of the manufacturing of knitwear or woven garments for the purpose of export. If the company has obtained a green building certification, the tax rate is 10%.

A company registered under the Companies Act that is engaged in garment production, including thread production, dyeing, finishing, coning, cloth making and printing, may qualify for a reduced tax rate of 15% on the income earned by them from these activities.

Capital gains arising from the sale of government securities are exempt from tax.

Capital gains arising from the transfer of land or buildings to a new company registered under the Companies Act are exempt from tax if the whole amount is invested in the equity of the company.

Income from the export of handicraft from June 2008 to 2019 is exempt from tax.

Income from the business of certain information technology services, such as software development, information technology process outsourcing, information technology support and software maintenance services, and cybersecurity services, is exempt from tax.

Tax exemptions. The following types of income are exempt from tax:

- Dividend income from a listed company up to BDT25,000 (annually)
- Dividend income received by a company resident in Bangladesh if the company distributing such taxed dividend has maintained a separate account for the taxed dividend
- Income from a mutual fund or unit fund up to BDT25,000 (annually)
- Interest on tax-free government securities

Minimum tax. The tax deducted or collected under specified sections of the Tax Ordinance is considered minimum tax.

The minimum tax for companies with annual gross receipts of more than BDT5 million are calculated by applying the following percentages to the annual gross receipts.

Type of company	Percentage
Manufacturers of cigarettes, bidi, chewing tobacco, smokeless tobacco or other tobacco products	1%
Mobile phone operators	0.75%
All other companies	0.6%

The rate of minimum tax for industrial undertakings engaged in the manufacturing of goods is 0.1% of gross receipts for the first three years of production.

If the taxpayer has income that is exempt from tax or is subject to a reduced rate, special rules apply.

If the regular tax is higher than the minimum tax, the regular tax is payable.

No refunds, adjustments or setoffs of minimum tax is allowed.

Capital gains. Capital gains derived from the transfer of capital assets is taxable at a rate of 15%.

Capital assets include property of any kind held by a taxpayer, regardless of whether the asset is connected to a taxpayer's business or profession, with the exception of the following:

- Any stock in trade (not stocks and shares)
- Personal effects

The transfer of a share in a company that is not a resident of Bangladesh is deemed to be the transfer of an asset located in Bangladesh to the extent that the value of the share transferred is directly or indirectly attributable to the value of any assets in Bangladesh.

In computing capital gains, deductions are made from the sales proceeds or the fair market price (whichever is higher) of the capital assets.

Capital gains arising on shares listed in the stock exchange are taxable at a rate of 15% for nonresidents. However, no tax is payable by nonresidents with respect to profits and gains arising from transfers of stock or shares of public limited companies, as defined in the Companies Act, if such nonresidents are entitled to a similar exemption in the nonresident's home country.

Capital losses can be carried forward and set off against income from capital gains derived during the next six successive tax years.

The tax deducted by the local custodian (at a rate of 15%) from capital gains of nonresident investors is generally deemed to be the minimum tax applicable to such nonresidents in Bangladesh. Consequently, such nonresidents are not subject to any other compliance obligations, such as tax registration and filing of an income tax return.

Withholding tax. Payment to resident companies are subject to the following withholding taxes.

Payment	Rate (%)
Dividends	20
Interest	10
Royalties and fees for technical services	10/12 (a)
Payments on the supply of goods and the execution of contracts	2 to 7 (b)
Other miscellaneous services not specifically mentioned in the Tax Ordinance	10/12 (a)

(a) The 10% rate applies if the amount of the payment does not exceed BDT2,500,000. The 12% rate applies to other payments.

(b) The applicable rate depends on the amount of the payments.

Payments to nonresident companies are subject to the following withholding taxes.

Payment	Rate (%)
Dividends	20
Interest	20
Royalties and fees for technical services	20
Supply of goods and execution of contract	7.5
Payments for services not mentioned above	20
Any other payments	30

Taxes withheld from the income of nonresidents is the minimum tax liability for such payments, and no refunds, adjustment or setoffs of such taxes are allowed.

If a nonresident believes that because of a tax treaty or any other reason, the nonresident is not liable to pay any tax in Bangladesh, or is liable to pay tax at a reduced rate, the Bangladeshi tax authorities may issue a certificate to the effect that the payments to the nonresident shall be made without any deduction or, in applicable cases, with a deduction at reduced rate as mentioned in the certificate.

Administration

Tax year. Under the Tax Ordinance, the mandatory income year is the 12-month period commencing from the first day of July of the relevant year. However, for the purpose of consolidation of accounts, if a subsidiary company or a liaison or branch office in Bangladesh desires to follow the financial year of its parent company, the approval of the Jurisdictional Tax Officer is required.

Income tax filing and payment process. The Tax Ordinance requires that the income tax return be filed by the 15th day of the 7th month following end of income year (or 15 September following the end of the income year if such 15th day falls before 15 September). Consequently, companies with an income year running from 1 July through 30 June must file the income tax return by 15 January of the subsequent year.

On request, the return filing date may be extended up to four months with the approval of the tax authority.

A nonresident company without a permanent establishment in Bangladesh is exempt from the obligation of filing an annual income tax return in Bangladesh.

Advance payment of tax. Every taxpayer is required to pay advance tax in four equal installments on 15 September,

15 December, 15 March and 15 June of each year if the most recently assessed income exceeded BDT400,000. A penalty and interest are imposed for default in payment of an installment of advance tax.

Foreign tax relief. Foreign tax relief for the avoidance of double taxation is governed by tax treaties with several countries. If no such treaties apply, resident companies may claim a foreign tax credit for the foreign tax paid under domestic law provisions.

The amount of the credit allowed for foreign tax against Bangladesh tax with respect to any type of income may not exceed the amount calculated by applying the average rate of such tax to the doubly taxed income.

A claim for a foreign tax credit must be made to the Deputy Commissioner of Tax of the district in which the claimant is subject to income tax.

The average rate of tax is the rate arrived at by dividing the amount of tax calculated on total income by such income.

C. Determination of trading income

General. All income classifiable under the head “Income from business or profession” is computed in accordance with the method of accounting regularly employed by the business or profession.

The company determines the income from business or profession and resulting tax liability based on its financial result reported in statutory profit and loss account, and after applying adjustments (upward and downward) as provided by the Tax Ordinance.

The tax under the head “Income from house property” is payable with respect to the annual value of any property, whether used for commercial or residential purposes, consisting of any buildings, furniture, fixtures, fittings and similar items, and lands appurtenant thereto, of which the taxpayer is the owner, other than such portions of the property as the taxpayer may occupy for the purposes of any business or profession carried on by the taxpayer, the income from which is assessable to tax under the Tax Ordinance.

Business-related expenses are deductible; capital expenditures and personal expenses are not deductible.

Expenses from which taxes are required to be withheld are not allowable as deductions until the required taxes have been withheld and paid to the government.

Salary and remuneration, other than by crossed check or bank transfer, paid to an employee having gross monthly salary of BDT15,000 or more are disallowed in determining the taxable income of the employer.

An expenditure exceeding BDT550,000 by an employer on the provision of perquisites, as defined in the domestic tax law, to an employee is disallowed in determining the taxable income of the employer.

An expenditure exceeding 10% of the net profits disclosed in the statement of accounts as “head office expenses” or “intra-group

expenses,” or under another name, by a company not incorporated in Bangladesh under the Companies Act is disallowed.

The payment of an incentive bonus exceeding 10% of the net profit disclosed in the statement of accounts is disallowed.

An expenditure for overseas traveling exceeding 1.25% of the turnover disclosed in the statement of accounts is disallowed.

Payments of royalties, technical service fees and certain other payments exceeding 10% of the net profit disclosed in the statement of accounts for the first three income years from the date of commencement of business or profession and 8% of the net profit disclosed in the statement of accounts for subsequent income years are disallowed.

Depreciation allowances. Business fixed assets that are depreciable for financial accounting purposes are also depreciable for corporate income tax purposes, subject to the tax rules discussed below.

A depreciation allowance may be claimed for any asset owned by a taxpayer and used for the purpose of the business or profession carried on by the taxpayer.

For building, machinery, plant or furniture not wholly used for the purpose of the business or profession, the depreciation allowance is restricted to the proportional part of the amount that could be claimed if such building, machinery, plant or furniture were wholly so used for such purpose.

A depreciation allowance may not be claimed for assets unless the particulars substantiating such claim are filed with the tax authority at the time of the filing of the income tax return and if such assets are used during the year.

Depreciation is calculated using the declining-balance method and is allowed on classes of assets. Depreciation rates vary according to the class of assets. The following are the general rates.

Class of asset	Rate (%)
Plant and machinery*	20
Office equipment	10
Buildings*	
General	10
Factory	20
Furniture and fittings	10
Computer and computer equipment	30
Imported computer software	10

* Subject to the fulfilment of prescribed conditions, initial depreciation equal to 10% of the actual cost is allowed in the first year with respect to buildings and 25% with respect to plant and machinery (other than ships and motor vehicles) if they are not used for hire and if they are acquired or installed after 30 June 2002.

For passenger motor vehicles or sedan cars not used for hire, the actual cost to the taxpayer is deemed not to exceed BDT2,500,000.

Relief for losses. Business losses, excluding losses resulting from unabsorbed depreciation of business assets (see below), may be

carried forward to be set off against taxable income derived from business in the following six years.

Unabsorbed depreciation may be carried forward indefinitely to be set off against taxable income of subsequent years.

Losses under the heading “Capital Gains” (that is, resulting from transfers of capital assets) may not be set off against other income, but may be carried forward for six years to be set off against capital gains.

D. Tax for owners of private motor cars

The tax authorities collect advance tax on the registration or renewal of fitness of cars (in the case of vehicles, the transport authorities issue a certificate mentioning the duration for which the vehicles are legally permitted to be used) in the following amounts.

The following are the amounts of the tax for cars and jeeps, which are based on engine capacity.

Engine capacity	Amount of tax (BDT)
Not exceeding 1,500 cc	15,000
More than 1,500 cc but not more than 2,000 cc	30,000
More than 2,000 cc but not more than 2,500 cc	50,000
More than 2,500 cc but not more than 3,000 cc	75,000
More than 3,000 cc but not more than 3,500 cc	100,000
More than 3,500 cc	125,000

The amount of the tax for a microbus is BDT20,000.

The tax is 50% higher for persons who own more than one car in their name or in a joint name. The minimum tax liability for such persons subject to regular income tax is at least equal to the tax collected for the motor car. Tax collected above that amount is not refunded. Cars owned by specific persons are exempt from this tax.

E. Miscellaneous matters

Foreign-exchange controls. All cross-border transactions with nonresidents are subject to foreign-exchange controls contained in the Foreign Exchange Management Act.

Transfer pricing. Under the transfer-pricing rules, the amount of any income or expenditure arising from an international transaction must be determined based on the arm’s-length price.

For this purpose, an international transaction is a transaction between associated enterprises, either or both of which are non-residents, in any nature of purchase, sale or lease of tangible or intangible assets, provision of service, lending or borrowing of money, or any other transaction having a bearing on the profits, income, losses, assets, financial position or economic value of the enterprise.

Under the transfer-pricing rules, companies having international transactions with associated enterprises must determine the arm’s-length price and maintain certain documents if the value of the transactions exceeds BDT30 million in a year. Such companies

also need to submit statements of international transactions to the tax authority with the annual income tax return, regardless of the volume of the international transactions. If any transaction is determined not to be at an arm's-length price, the tax authority may determine the price.

A report of chartered accountants or chartered cost and management accountants may be required on notice of the Deputy Commissioner of Taxes in writing if the value of international transactions exceeds BDT30 million in the books during the income year.

F. Treaty withholding tax rates

The table below contains the withholding tax rates that apply to dividends, interest and royalties paid from Bangladesh to non-residents under the tax treaties in force as of the time of writing. If the treaty provides for a rate lower than the domestic rate, the reduced treaty rate may be applied at source.

	Dividends		Interest (a) %	Royalties %
	A %	B %		
Belgium	15	15	15	10
Canada	15	15	15	10
China	10	10	10	10

A Individuals and companies

B Qualifying companies

- (a) Some of the treaties provide for an exemption or a reduced rate for certain types of interest, such as interest paid to public bodies and financial institutions, including specified financial institutions, or interest with respect to sales on credit or approved transactions. Such exemptions are not reflected in this column.
- (b) The rate applies to dividends paid to a beneficial owner that is a company holding directly at least 10% of the capital of the payer.
- (c) The rate applies to dividends paid to a beneficial owner that is a company holding directly at least 25% of the capital of the payer.
- (d) The lower rate applies to interest derived by a bank or other financial institution (including an insurance company).
- (e) The rate applies to dividends paid to a beneficial owner that is a company owning at least 25% of the voting shares of the payer during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
- (f) The lower rate applies if interest is paid with respect to a sale on credit of industrial, commercial or scientific equipment.
- (g) A most-favored-nation clause applies. Under this clause, if Bangladesh enters into a tax treaty with another country subsequent to entering into the treaty with Mauritius and if this treaty provides for a lower rate for dividends than the 10% rate specified under the treaty with Mauritius, such lower rate applies under the Mauritius treaty.
- (h) The domestic rate applies. The treaty does not provide a reduced rate.
- (i) Interest related to the construction of industrial, commercial or scientific installations or public works is exempt. The 7.5% rate applies to interest received by a bank or other financial institution (including an insurance company), as long as the Netherlands does not levy a withholding tax on interest.
- (j) The rate applies to dividends paid to a beneficial owner that is a company holding directly at least 20% of the capital of the payer.
- (k) A most-favored-nation clause may apply with respect to royalties.
- (l) The rate applies to dividends paid to a beneficial owner that is a company owning at least 3% of the shares of the payer.
- (m) The lower rate applies to interest derived by a bank or other financial institution (including an insurance company) and interest paid with respect to a sale on credit of industrial, commercial or scientific equipment or merchandise.

Barbados is 1 of 102 countries that have signed on to the Organisation of Economic Co-operation and Development (OECD) Inclusive Framework on Base Erosion and Profit Shifting (BEPS). As a result, the government of Barbados proposed several amendments to its tax regime to take effect on 1 January 2019, including converging its domestic and international tax rate and abolishing or amending several pieces of legislation to implement its revised tax regime. Because all of the proposed changes have not yet been legislated, readers should obtain updated information before engaging in transactions.

- (a) These rates apply to all domestic companies, including branches of nonresident companies. For details regarding these rates, see *Rates of corporate tax* in Section B.
- (b) These rates are under review and are subject to change.
- (c) This is a final tax.

B. Taxes on corporate income and gains

Corporate income tax. Companies and societies with restricted liability that are resident in Barbados are subject to corporation tax. Resident and domiciled companies are subject to corporation tax on their worldwide income, regardless of whether the income is remitted to Barbados. Resident companies that are not domiciled in Barbados are subject to corporation tax on income derived from Barbados and income from foreign sources to the extent that such foreign income is remitted to Barbados. Nonresident companies carrying on business through a branch pay tax on Barbados-source income only. Income is considered to be Barbados-source if the property that constitutes the source is physically located in Barbados.

A company is considered to be resident in Barbados if its management and control are located in Barbados. The domicile of a company is based on the country of incorporation. Consequently, a company incorporated in Barbados is domiciled there.

Rates of corporate tax. All domestic companies, including branches of nonresident companies, are subject to tax at the following rates:

- Taxable income up to USD500,000: 5.5%
- Taxable income between USD500,000 to USD10 million: 3%
- Taxable income between USD10 million and USD15 million: 2.5%
- Taxable income over USD15 million: 1%

Income derived from Barbados government securities by domestic companies is taxed at a rate of 12.5%.

A branch operating in Barbados pays an additional 5% on its after-tax profits if those profits are remitted or deemed to be remitted to the branch's head office.

International Business Companies and International Societies licensed before 17 October 2017 and corporate entities carrying on business in the international insurance sector qualify for

grandfathering to 30 June 2021. After this date, the applicable tax rate for grandfathered entities will change to the new domestic rates listed above.

The following are the tax rates for companies grandfathered in the International Business and Financial Services Sector.

Types of companies	Rate (%)
International Business Companies	2.5 reducing to 1 (a)
International Banks	2.5 reducing to 1 (a)
International Societies with Restricted Liability	2.5 reducing to 1 (a)
Exempt Insurance Companies	0
Exempt Insurance Management Companies	0
Qualifying Insurance Companies	
General insurance	1.75 (b)
Life insurance	0.35 (b)

(a) These rates are effective for the 2019 income year and subsequent income years until the end of the grandfathering period on 30 June 2021.

(b) This is the minimum effective tax rate.

No tax is required to be withheld from the payment of dividends, interest, royalties, management fees and rents if paid to nonresidents by companies operating as grandfathered entities in the International Business and Financial Services Sector.

Insurance sector. Effective from 1 January 2019, the following three classes of licenses for the insurance sector came into existence:

- Class 1: Insurance companies that restrict the business underwritten by them to related-party business. These insurance companies are taxed at a rate of 0%.
- Class 2: Insurance companies that can underwrite risks of third parties. These companies are taxed at a rate of 2%.
- Class 3: This class includes entities, such as brokers, intermediaries, insurance management companies and insurance holding companies. These entities are taxed at a rate of 2%.

Tax incentives. Tax incentives available in Barbados are described below.

Foreign Currency Permit. Effective from 1 January 2019, all entities that earn 100% of their income in foreign currency are entitled to apply for a Foreign Currency Permit, which provides the following benefits:

- Exemption from exchange controls
- Reduced stamp duty and certain property transfer tax exemptions
- Exemption from payment of value-added tax and duties on the importation of plant, machinery and raw materials
- Income tax concessions for specifically qualified individuals

Small Business Development Act. Under the Small Business Development Act, small businesses qualify for the following tax benefits:

- Corporation tax rate of 15% (this rate is under review and may change)
- Exemption from withholding tax on dividends or interest paid

- Exemption from import duty on plant and equipment
- Exemption from stamp duty on the execution and registration of financial documents

Only income directly related to the business qualifies for the above tax benefits.

To qualify as a small business, a company must meet the following requirements:

- Its authorized capital does not exceed BBD1 million.
- Its annual sales do not exceed BBD2 million.
- It does not have more than 25 employees.
- It is not a wholly owned or majority-owned subsidiary in a group of companies.

Tourism Development Act. Under the Tourism Development Act, duty-free and income tax concessions are available for approved tourism projects and certain tourism entities. These concessions include the following:

- Exemption from the payment of customs duty on specified items
- Tax deduction equal to 100% of expenditure incurred with respect to the development of a tourism product, tourism research, an apprenticeship scheme or the organization and hosting of tourism exhibitions and trade fairs
- Offset of approved capital expenditure against assessable income
- An investment tax credit (subject to conditions)
- Exemption from withholding tax on dividends paid to shareholders

Special Development Areas Act. Under the Special Development Areas Act, persons carrying out work in designated special development areas in Barbados, as well as persons financing such work, are entitled to certain tax relief. An approved developer is entitled to a reduced corporation tax rate of 15% and exemption from certain taxes, such as the following:

- Import duty, environmental levy and value-added tax on inputs for the construction of new buildings and the renovation or refurbishment of existing buildings
- Charges on the repatriation of interest and capital
- Land tax on the improved value of land
- Property transfer tax on the initial purchase of property

Renewable Energy Incentives. Persons engaged in the development, manufacturing, installation or repair of renewable energy systems and energy-efficient products may be entitled to one or more of the following tax benefits if the required criteria are met:

- Ten-year income tax holiday
- Tax deduction of 150% for the following expenditure with respect to the generation, supply and sale of renewable energy, or the installation or supply of renewable energy systems or energy-efficient products:
 - Interest paid on loans with respect to the construction or upgrading of a property
 - Expenditure on the training of staff
 - Expenditure on the marketing of products
 - Expenditure on research and development
- Ten-year exemption from withholding tax on dividends paid to shareholders

In addition, interest earned by financial intermediaries from financing the development, manufacturing and installation of renewable energy systems and energy-efficient products is exempt from tax for 10 years.

Capital gains. Capital gains are not taxed in Barbados.

Administration. The fiscal (income) year is the period for which the accounts of the business are normally prepared. Tax is calculated on the profits for the accounting period that ends during the fiscal year.

A corporation is required to determine its own tax liability and to prepare and file a corporation tax return. Corporations with year-ends from 1 January to 30 September must prepay tax by 15 September and file their returns by 15 March of the following year. If the year-end is after 30 September, the tax must be prepaid on 15 December of the income year and on the following 15 March. The return is filed 15 June of the year following the income year. Each tax prepayment must be 50% of the previous year's tax. Any balance of tax due is paid when the return is filed. Tax returns may be filed using the Barbados Revenue Authority's electronic filing system.

The Revenue Commissioner of the Barbados Revenue Authority may levy a penalty of BBD500 plus 5% of tax payable for failure to file a return. A further penalty of 5% and interest of 1% a month is charged failure to pay any tax payable. If a person fails to make a required prepayment of tax, a penalty of 10% and interest of 0.5% a month is charged on the amount of the prepayment.

Dividends. Dividends received by a resident company from another resident company are not taxable.

Dividends received from a nonresident company are not subject to tax in Barbados if the Barbados company owns 10% or more of the share capital of the nonresident company and if the shareholding in the nonresident company is not held as a portfolio investment.

Foreign tax relief. A tax credit is allowed for taxes paid to foreign jurisdictions by Barbados resident companies on profits, income or gains earned from such foreign jurisdictions, regardless of whether Barbados has entered into a double tax treaty with the foreign jurisdiction. This credit is allowed up to the amount of the Barbados taxes payable on the income. The foreign tax credit is not permitted to reduce the total tax payable by an entity in Barbados for an income year to less than 1% of its taxable income for that income year. An underlying tax credit is also allowed with respect to foreign dividends if the Barbados company owns at least 10% of the capital of the foreign company. Some form of unilateral relief may be granted on income arising from British Commonwealth countries that provide reciprocal relief.

C. Determination of trading income

General. Taxable income is determined on the basis of accounts prepared in accordance with International Financial Reporting

Standards, subject to specific adjustments identified in the Income Tax Act.

Inventories. The authorities generally accept a method of valuation of inventory that conforms to standard accounting practice in the trade or business, provided it is applied consistently. Average cost or first-in, first-out (FIFO) are the generally accepted methods.

Provisions. Reserves or provisions of a general nature for doubtful accounts receivable are not allowable. However, write-offs of specific amounts or balances are generally allowed.

Tax depreciation. Depreciation and amortization reported in the financial statements are not allowed as deductions in calculating taxable income. However, a company may claim capital allowances. Annual allowances of between 5% and 33 $\frac{1}{3}$ % are given on the original cost of fixed assets, calculated on a straight-line basis. An annual allowance of 100% is granted with respect to capital expenditure on software. Fifty percent of expenditure on intellectual property is deductible over a 10-year period. In addition, 20% of expenditure on energy audits and the retrofitting of buildings or on the installation of systems to provide electricity from sources other than fossil fuels is deductible over a period of 5 years.

Relief for losses. Losses may be carried forward seven years to offset income derived in those years. Tax losses may be offset against only 50% of taxable income. Losses may not be carried back.

Groups of companies. Group relief is not available.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on the supply of goods and services in Barbados and on goods imported into Barbados	
Standard rate	17.5
Hotel accommodation and supplies related to tourism	7.5
Mobile voice, data and text messaging services	22
Basic food items and exports of goods and services	0
Excise tax, on imports of vehicles; this tax is imposed in addition to the VAT	46.95 to 120
Import duty	5 to 20
National insurance contributions, on monthly insurable earnings up to BBD4,820; paid by	
Employer	12.75
Employee	11.1
Self-employed individual	17.1

E. Miscellaneous matters

Foreign-exchange controls. Foreign-exchange controls in Barbados are administered by the Central Bank, which considers all

applications. Certain transactions and routine commercial matters are delegated to the commercial banks. The Central Bank generally allows the repatriation of funds previously registered as an investment if it has been established that all local tax liabilities have been met. Certain types of entities operating in the International Business and Financial Services Sector, such as offshore banks, exempt (captive) insurance companies, international business companies and international societies with restricted liability, are effectively exempt from foreign-exchange controls with respect to their offshore activities, provided that the entity has been grandfathered under these regimes as discussed in *Rates of corporate tax* in Section B. Entities that hold a Foreign Currency Permit (see *Foreign Currency Permit* in Section B) are also exempted from foreign-exchange controls.

Debt-to-equity rules. No thin-capitalization rules are imposed in Barbados.

Anti-avoidance legislation. Anti-avoidance provisions may be applied to transactions between related persons that are not carried out at arm's length and to artificial transactions if the primary purpose of the transaction is the reduction of taxable income.

F. Treaty withholding tax rates

The withholding tax rates in the table below apply to payments made to nonresidents of Barbados under the various treaties entered into by Barbados. The treaty rates indicated below represent the maximum rates under the treaties. However, if a lower domestic tax rate exists, the lower rate should be applied. The domestic withholding tax rates are under review and may be subject to change. No tax is withheld from dividends, interest, royalties and management fees paid to nonresidents by International Business Companies or International Societies with Restricted Liability if they are operating as grandfathered entities in the International Business and Financial Services Sector. In addition, International Banks and Exempt (Captive) Insurance Companies are exempt from the payment of withholding tax on dividends and interest if they are operating as grandfathered entities in the International Business and Financial Services Sector. For further details regarding this sector, see *Rates of corporate tax* in Section B.

- (a) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends.
- (b) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends.
- (c) The Caribbean Community and Common Market (CARICOM) multilateral treaty has been entered into by 10 member states of CARICOM. The treaty follows a source-based model of taxation, with double tax relief typically provided in the form of an income exemption in the state of residence.
- (d) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- (e) This treaty has been ratified by Barbados only. Consequently, the provisions of the treaty are not yet in effect.
- (f) The rate is reduced to 5% if the interest is derived by a bank that is resident in Ghana.
- (g) The rate is reduced to 0% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months before the decision to distribute the dividends.
- (h) The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 5% of the capital of the payer of the dividends.
- (i) The term “royalties” includes payments derived from the alienation of rights or property that are contingent on the productivity, use or disposition of such property.
- (j) The rate is reduced to 0% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends and if the recipient of the dividends is a company resident in the Netherlands that is not subject to Netherlands company tax on the dividends.
- (k) The rate is reduced to 0% for royalties paid for the use of, or the right to use, literary, artistic or scientific works, including royalties with respect to cinematographic films, and films, discs or tapes for radio or television broadcasting.
- (l) The rate equals 75% of the statutory nominal rate applicable at the time of the dividend distribution. It is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends.
- (m) The rate is reduced to 5% if the interest is derived by a bank that is resident in Panama.
- (n) The treaty does not contain an interest article. Consequently, the normal tax rate applies.
- (o) The rate is 15% for royalties paid for motion picture or television films.
- (p) The rate is reduced to 5% for interest paid to banks.
- (q) The rate is reduced to 0% if the dividends are paid out of income earned from foreign sources.

- (r) The treaty language is unclear and may be read either as providing an exemption from Barbados withholding tax, or as providing no restriction of Barbados withholding tax. The government has not yet issued guidance as to the correct interpretation.
- (s) The rate is reduced to 5% if the beneficial owner of the dividends is a company that directly owns at least 25% of the capital of the company paying the dividends.
- (t) The rate is reduced to 0% if the beneficial owner of the dividends is a company that directly owns at least 25% of the capital of the company paying the dividends.
- (u) The rate is reduced to 5% for royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for radio or television broadcasting.
- (v) The rate is reduced to 0% if the interest is paid to the government of the other contracting state or any agency or instrumentality thereof, including the central bank of that contracting state (subject to certain restrictions).

- (a) The 18% rate is the standard profits tax rate. The 25% rate applies to profits of banks and insurance companies. Certain activities are subject to special tax rates and tax incentives are available. For details, see Section B.
- (b) The 18% rate is the standard profits tax rate. The 25% rate applies to profits of banks and insurance companies.
- (c) Withholding tax applies to income derived from sources in Belarus by foreign legal entities that do not carry out business activities in Belarus through a permanent establishment. Withholding tax rates may be reduced or eliminated under applicable double tax treaties. For a table of treaty withholding tax rates, see Section F.
- (d) This withholding tax applies to income derived from debt obligations, such as borrowings or loans, that are not formalized by securities. Exemption is available for certain public debts and certain types of bonds. Interest from certain loans is exempt from withholding tax.
- (e) The Tax Code specifies the types of income subject to withholding tax.

B. Taxes on corporate income and gains

Corporate profits tax. Companies incorporated in Belarus are subject to corporate profits tax on their worldwide income. Non-residents that carry out business activities in Belarus through a permanent establishment are subject to the corporate profits tax only on the income derived from their activities carried out in Belarus through such permanent establishment.

Income derived from sources in Belarus by nonresidents that do not carry out business activities in Belarus through a permanent

establishment is subject to withholding tax. For withholding tax rates, see Sections A and F.

Rates of corporate profits tax. The standard corporate profits tax rate is 18%. A 25% rate applies to profits of banks and insurance companies.

Reduced tax rates apply to the following types of income:

- Profits of producers of high-technology products: 10%
- Dividends paid to Belarusian companies: 12% (6% and 0% rates apply if the profit was not distributed but was used to develop the dividend-paying company in the previous three and five years, respectively)
- Profits of science and technology parks, technology-transfer centers, and residents of science and technology parks (except for corporate profits tax that is calculated, withheld and remitted by a tax agent): 10%

Tax exemptions and reductions. Belarus offers various tax exemptions and reductions. Some of these exemptions and reductions are summarized below.

Certain types of income are not subject to tax, including dividends accruing to the following:

- Belarusian societies of disabled people, Belarusian societies of deaf people, Belarusian societies of sight-disabled people (for dividends received from unitary enterprises [commercial organizations that do not have shares or participatory interests] owned by these Belarusian societies)
- Venture organizations and Belarusian innovation funds (for dividends received from innovation organizations)

If certain conditions are met, profits subject to tax can be decreased by amounts used to finance state social objects (including educational, health care, sports and religious organizations) or used for construction of sports facilities, up to 10% of taxable profits.

Profits derived from certain business activities are exempted from the tax, including the following:

- Manufacturing of food products for infants
- Sales of high-technology goods produced by the company according to the list issued by the government, as agreed to by the President of Belarus, if the revenue from these sales is more than 50% of the company's gross revenue
- Sales of innovative goods produced by the company according to the list issued by the government
- Transactions with government securities, securities of the national Bank of the Republic of Belarus and some other securities

All the benefits described above can be claimed only if special conditions and procedures are met and, in certain circumstances, if special state permits are received.

Free-economic zones. A free-economic zone (FEZ) is located in each of the six regional centers of Belarus (Brest, Gomel, Grodno, Minsk, Mogilev and Vitebsk). Profits derived from sales of goods (works and services) produced by FEZ residents are exempt from profits tax if they satisfy one of the following conditions:

- They are sold to other FEZ residents.
- They are exported outside Belarus.

- They are sold from storage sites or exhibitions located outside Belarus. In all other cases, the standard profits tax rate applies.

Special tax regimes. Belarus has several tax regimes, which are summarized below.

Simplified system of taxation. Business entities may pay a unified tax under a simplified system of taxation. Business entities that pay the unified tax are not subject to corporate profits tax, and under certain conditions, to value-added tax (VAT) (and some other taxes). Under this system, the tax due is either 5% of gross revenues or, if the business entity continues to pay VAT, 3% of gross revenues. Certain types of non-operating income are subject to a 16% rate.

Unified tax on agricultural producers. Agricultural producers may pay a unified tax at a rate of 1% of gross revenues from the sale of goods (works and services) and other property and income derived from non-sales transactions. An agricultural entity can pay the unified tax if its annual gross revenue consists of at least 50% of revenue from the sale of its own manufactured crop products (excluding flowers and ornamental plants), livestock products, fish breeding and bee breeding products.

Tax on gambling industry. Gambling (except for lotteries) is subject to fixed tax rates, depending on the number of items of operational equipment used (for example, gambling tables, slot machines and gambling equipment used to register betting). The positive difference between the amount of received bids and the composed winning fund (fund to be paid to the winner) is subject to additional gambling tax at a rate of 4%.

Tax on income generated by lottery sales. Lottery sales are subject to an 8% tax rate on the gross revenue less the awarded prize fund.

Tax on electronic interactive games. The tax base for the tax on electronic interactive games equals the difference between the amount of revenue from electronic interactive games and the composed winning fund (fund to be paid to the winner). The tax rate is 8%. Revenue from electronic interactive games is exempt from corporate profits tax. Turnover received from stakes (bets) with respect to the holding of electronic interactive games is exempt from VAT.

Tax on imputed income. Providers of car maintenance and repair services are subject to 5% tax on imputed income. The tax base for the tax on imputed income is calculated by multiplying the average monthly number of employees by the monthly basic profitability of car maintenance and repair services per employee.

Taxation of commercial organizations and individual entrepreneurs engaged in retail trade and catering in rural areas and small towns. Until 31 December 2022, individual entrepreneurs and commercial organizations that perform retail trade or food services in rural areas and individual entrepreneurs and micro companies (companies with an average number of employees of less than 15 for a month) that perform food and consumer services in small towns may enjoy special tax benefits with respect to these activities, such as a reduced corporate profits tax rate of 6% and an exemption from VAT.

Taxation of residents of the High Technologies Park. The High Technologies Park has a special regime that should be in force until 1 January 2049. Park residents are exempt from taxes and other obligatory payments to the state budget and state non-budget funds with respect to revenue derived from the sale of goods (works, services and property rights for intellectual property) except for some specific cases (for example, income from sales of securities and dividends received from sources outside Belarus are subject to a 9% profits tax rate). Business entities operating in the park may engage only in the high technology activities set forth in the Decree of the President of Belarus, “Concerning the Park of High Technologies.”

Special tax benefits to parties that apply blockchain technologies. Until 1 January 2023, parties that apply blockchain technologies are exempt from corporate profits tax with respect to profits derived from the disposal of digital signs (tokens) by exchanging them for other digital signs (tokens). In the same period, turnover related to the disposal of tokens is exempt from VAT.

China-Belarus Industrial Park (The Great Stone). The China-Belarus Industrial Park (The Great Stone; CBIP) was created in 2012 as a territory with free-economic zone policies that encompass tax and other benefits, special rules for the use of land and other natural resources, and free customs zone procedures. A special tax regime is granted for 50 years. The following are the main tax aspects of the tax regime for CBIP residents:

- Corporate profits tax from the realization of their own manufactured goods (works and services) produced in the CBIP for 10 years from the period in which profits first arose. After the end of the 10-year period, residents of the CBIP apply half the general corporate profits tax rate (currently, the general corporate profits tax rate is 18%) during the whole period for which the special regime remains in effect.
- Zero percent tax rate on dividends paid by CBIP residents to their shareholders or participants, for five years since the first accrual of dividends.
- Withholding tax at 5% until 1 January 2027 on remuneration received by foreign companies with no permanent establishment in Belarus from CBIP residents for the rights to information relating to industrial, commercial or scientific expertise, including know-how, licenses, patents, drawings, useful models, schemes, formulas, industrial prototypes and processes.
- Real estate tax on buildings and constructions located in the CBIP.
- Land tax on land located in the CBIP.

Capital gains. Capital gains derived from the alienation of equity interests in the charter capital of Belarusian companies are taxed at a standard corporate profits tax rate of 18%. A 25% rate applies to profits of banks and insurance companies.

Capital gains derived by nonresidents without a permanent establishment in Belarus are subject to a 12% withholding tax, unless otherwise provided in a double tax treaty.

Administration. The basic tax reporting period is the calendar quarter. The tax return for the first, second and third quarters must be filed by the 20th day of the month following the respective reporting quarter. The tax return for the fourth quarter must be

filed by 20 March of the year following the tax period (calendar year). In general, the corporate profits tax must be paid by the 22nd day of the month following the reporting quarter.

Corporate profits tax for the fourth quarter must be paid by 22 December in an amount equal to two-thirds of the tax payable in the third quarter, with subsequent additional payment or reduction not later than 22 March of the year following the tax period (calendar year).

Non-payment or incomplete payment of tax is subject to a fine of 40% of the unpaid tax but not less than 10 basic units (approximately EUR100 or USD115). A fine for a company's official late submission of the tax return can be up to 10 basic units. In addition to these fines, a penalty is applied for every day of delay in tax payment. The penalty is assessed on the basis of the refinance rate established by the National Bank of the Republic of Belarus (currently, 10%).

Dividends. Dividends paid to foreign legal entities without a permanent establishment in Belarus are subject to a 12% withholding tax, unless otherwise provided by a double tax treaty. The distribution of dividends to resident companies is subject to corporate profits tax.

Foreign tax relief. A tax credit for foreign tax paid by, or withheld from, a Belarusian taxpayer is granted on submission to the local tax authorities of a certificate issued by the competent authorities of the foreign country that confirms the amount of tax paid (withheld) in that foreign state.

C. Determination of taxable profits

General. Taxable profits are based on the financial statements prepared according to the accounting standards of Belarus. The taxable profits are determined by adjusting the profits reported in the financial statements by items stipulated by the Tax Code. Adjustments relate to special income and expense items and usually act to restrict tax-deductible expenses. For example, travel expenses are deductible within certain limits. The list of deductible expenses is open, but may include only economically justified expenses.

Expenses are not economically justified and nondeductible in the following cases:

- The taxpayer does not actually receive goods (works and services), intangible assets or property rights.
- The taxpayer purchases works and services from an individual entrepreneur who is an employee of the taxpayer and whose job duties include these works and services.
- The taxpayer (excluding a stock company) purchases works and services from another company (excluding a stock company) that is a founder (participant) of the taxpayer or vice versa, if the job duties of an employee of the taxpayer include these works and services.

The taxpayer can deduct certain expenses in a total amount not exceeding 1% of revenue (representational expenses, overdue interest on loans, annual bonuses to employees, remuneration of members of the board of directors and some other expenses).

Special rules determine the taxable profits of banks and insurance companies.

Inventories. Inventories are carried at actual cost. The allowed accounting methods for determining cost value are cost of each unit, average cost and valuation price, including first-in, first-out (FIFO).

Provisions. Banks can establish deductible provisions for unrecoverable loans and securities. The National Bank of the Republic of Belarus regulates the establishment of such provisions.

Taxpayers can deduct doubtful debt provisions (depending on the date of the receivables' origin) in a total amount not exceeding 5% of revenue.

Tax depreciation. The amount of depreciation reported in the financial statements may be deducted for tax purposes if the fixed assets are used in an entrepreneurial activity.

Investment deduction. On the acquisition and/or reconstruction of tangible assets, a taxpayer can immediately deduct a percentage of the initial value of the assets (value of investments for reconstruction) for corporate profits tax purposes. The following are the percentages:

- Buildings and structures: not more than 15%
- Machinery and equipment and certain transport vehicles: not more than 30%

The investment deduction does not reduce the base for calculation of the depreciation deduction for tax purposes, which is defined as the initial cost of the asset.

Relief for losses. Belarusian tax law contains loss carryforward rules under which losses can be carried forward to the following 10 years, beginning with those incurred in 2011. Losses are carried forward in groups of operations against identical types of income. The following are the groups:

- First group: operations with financial derivatives and securities
- Second group: alienation of fixed assets, construction-in-progress sites and uninstalled equipment

The remaining losses are carried forward regardless of the operations and activities in which they were incurred. To apply the loss carryforward rules, a company must maintain separate accounting and keep documents confirming the amount of losses.

The Belarusian tax law does not provide for loss carrybacks.

Groups of companies. The Belarusian tax law does not provide for tax groups. Each legal entity is a separate taxpayer.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	20
Sales of specified products (for example, goods for children and foods)	10

Nature of tax	Rate (%)
Exports of goods and services	0
Excise duties; imposed at fixed amounts per unit of goods (specific rates) or as a percentage of the value of goods (ad valorem rates); levied on various products (alcohol, tobacco products, certain types of fuel and other items)	Various
Payroll taxes	
Social fund contributions	
Paid by the employer	34
Withheld from employee	1
Personal income tax; withheld from employee	13
Land tax; annual tax imposed at fixed amount per hectare of land area	Various
Ecological tax; imposed at fixed amount per units of various contaminants	Various
Asset tax; annual tax imposed on real estate, including construction-in-progress	1
Local taxes and duties	Various
Offshore levy; imposed on payments or transfers of cash by residents to nonresidents registered in tax havens; paid by residents	15

E. Miscellaneous matters

Foreign-exchange controls. The Belarusian ruble (BYN) has limited convertibility. The Council of Ministers of the Republic of Belarus, the National Bank of the Republic of Belarus, The State Control Committee and State Customs are the currency regulation and control bodies in Belarus.

Belarus imposes detailed and severe currency control regulations. These regulations impose restrictions, controls and special reporting with respect to transactions involving the use of foreign and national currency, as well as to settlements with nonresidents.

Debt-to-equity ratios. Domestic thin-capitalization rules limit the deductibility of expenses relating to controlled debt owed to a founder (participant) company or individual owning (directly or indirectly) more than 20% of the shares (participatory interests), a related party of this founder (participant) or other persons specified by the Tax Code.

Controlled debt to a founder (participant) is subject to thin-capitalization rules if the debt-to-equity ratio is 3:1. This ratio is 1:1 for Belarusian companies manufacturing excisable goods.

Controlled debt to a foreign founder (participant) includes the total indebtedness, which consists of, among other items, amounts with respect to marketing, consulting, information services, loans received, fines and other sanction charges.

Thin-capitalization rules do not apply to banks or insurance companies or to lessors or landlords if they receive rental payments (lease payments) exceeding 50% of their total revenue from the sale of goods (works and services) and property rights, as well as income from renting and leasing operations.

Transfer pricing. The tax authorities may control prices set in the following types of transactions:

- Foreign trade transactions with related parties, if the total value of the transactions with one counterparty exceeds BYN400,000 (for large taxpayers, BYN2 million) in a calendar year
- Foreign trade transactions with offshore zone residents, if the total value of the transactions with one counterparty exceeds BYN400,000 in a calendar year
- Trade transactions with Belarusian related parties, if the total value of the transactions with one counterparty exceeds BYN400,000 (for large taxpayers, BYN2 million) in a calendar year and if these related parties are exempted from taxation as a result of the application of a special tax regime or similar rulings
- Trade transactions related to the sale or purchase of immovable property if the counterparty is a related party or a person applying a special tax regime
- Foreign trade transactions related to sale or purchase of strategic goods on the list approved by the government, if the total value of the transactions with one counterparty exceeds BYN2 million in a calendar year

The comparability of prices to market prices is reviewed only for the purpose of calculating corporate profits tax, and the prices are adjusted only if this will increase the tax. The following methods are used to determine for tax purposes the conformity of transaction prices to market prices:

- Comparable market price method
- Resale price method
- Cost-plus method
- Comparable profits method
- Profit-split method

A taxpayer must prepare transfer-pricing documentation on an annual basis with respect to foreign trade transactions with related parties (if the taxpayer is a large taxpayer) and with respect to foreign trade transactions related to the sale or purchase of strategic goods on the list approved by the government. Other taxpayers must submit the economic justification for the applied price if requested by the tax authorities. Taxpayers entering into transactions in an amount exceeding BYN2 million and large taxpayers may conclude advance-pricing agreements with the Tax and Duties Ministry of the Republic of Belarus.

F. Tax treaties

Belarus has entered into double tax treaties with Armenia, Austria, Azerbaijan, Bahrain, Bangladesh, Belgium, Bulgaria, China, Croatia, Cyprus, the Czech Republic, Ecuador, Egypt, Estonia, Finland, Georgia, Germany, the Hong Kong Special Administrative Region (SAR), Hungary, India, Indonesia, Iran, Ireland, Israel, Italy, Kazakhstan, Korea (North), Korea (South), Kyrgyzstan, Kuwait, Laos, Latvia, Lebanon, Lithuania, Macedonia, Moldova, Mongolia, the Netherlands, Oman, Pakistan, Poland, Qatar, Romania, the Russian Federation, Saudi Arabia, Singapore, the Slovak Republic, Slovenia, South Africa, Sri Lanka, Sweden, Switzerland, Syria, Tajikistan, Thailand, Turkey, Turkmenistan, Ukraine, the United Arab Emirates, the

United Kingdom, Uzbekistan, Venezuela, Vietnam and Yugoslavia (applied to Serbia).

Belarus honors several of the double tax treaties entered into by the former USSR, including treaties with Denmark, France, Japan, Malaysia, Spain and the United States. The Ministry of Taxes and Duties has indicated that the treaties with Canada and Norway are no longer effective.

Belarus has also signed a double tax treaty with Libya and a new double tax treaty with Spain, but these treaties have not yet entered into force.

The following table presents the withholding tax rates under Belarusian tax treaties and under the former USSR's treaties honored by Belarus.

	Dividends	Interest	Royalties
	%	%	%

- (a) The 10% rate applies if the recipient is the actual owner of the dividends and owns at least 30% of the capital of the company that pays the dividends. Otherwise, a 12% rate applies.
- (b) The 5% rate applies if the recipient is the actual owner of dividends and owns at least 30% of the capital of the company that pays the dividends. The 10% rate applies in other cases if the recipient is the actual owner of dividends. Otherwise, the 12% rate applies. Dividends are not taxed if the actual owner is a company (other than a partnership) owning 100% of the capital of the company paying the dividends, if the dividends are derived from income from industrial or manufacturing activities, farming, forestry or fishing activities, or tourism (including restaurants and hotels) and if this income is not exempt from tax.
- (c) The 3% rate applies if the recipient is the actual owner of royalties paid for the use of or grant of the right to use patents or secret formulas or processes, or for information on industrial, business or scientific experience. The 5% rate applies if the recipient is the actual owner of royalties for the use of or grant of the right to use of industrial, business or scientific equipment. In all other cases, the 10% rate applies if the recipient is the actual owner of the royalties. Otherwise, the 15% rate applies.
- (d) The 5% rate applies if the recipient is the actual owner of the dividends and has invested at least ECU200,000 in the equity of the company that pays the income. The 10% rate applies if the recipient is the actual owner of the dividends and owns at least 25% of the capital of the company that pays the dividends. Otherwise, the 12% rate applies.

- (e) The 5% rate applies if the recipient of income is the owner of at least 25% of the capital of the company that pays the dividends. Otherwise, the 12% rate applies.
- (f) The 3% rate applies to amounts paid for the use of or grant of the right of use of patents, trademarks, designs, models, plans, or secret formulas or processes, or for information on industrial, business or scientific experience. The 5% rate applies to amounts paid for the use of or grant of the right to use industrial, business or scientific equipment (including road transport vehicles). The 10% rate applies to amounts paid for the use of or grant of the right to use copyrights of works of literature, art or science, including cinematographic films, as well as for films or recordings used in television or radio programs. Otherwise, the 15% rate applies.
- (g) The 10% rate applies if the recipient is the actual owner of the dividends and owns at least 25% of the capital of the company that pays the income. Otherwise, the 12% rate applies. Under the Pakistan and Turkey treaties, the recipient does not need to be the actual owner of the dividends to apply the 10% rate.
- (h) The 8% rate applies if the recipient is the actual owner of the interest. Otherwise, the 10% rate applies.
- (i) The 5% rate applies to amounts paid for the use of copyrights of works of literature, art or science, including cinematographic films, as well as for films or recordings and other means for the transmission of images or sound. The 10% rate applies to amounts paid for patents, trademarks, designs, charts, models, plans or secret formulas or processes, for information on industrial, business or scientific experience, for the use of or cession of the right to use industrial, business or scientific equipment, or for transport vehicles. Otherwise, the 15% rate applies.
- (j) The 5% rate applies if the actual owner of the dividends is a company owning USD100,000 or more in the company that pays the dividends. The 10% rate applies in all other cases if the recipient is the actual owner of dividends. Otherwise, the 12% rate applies.
- (k) The 5% rate applies to amounts paid for the use of or grant of the right to use copyrights of scientific works, patents, trademarks, designs, models, plans, or secret formulas or processes, for the right to use information on industrial, business or scientific equipment or transport vehicles, or for information on industrial, business or scientific experience. The 10% rate applies to amounts paid for the use of or grant of the right to use copyrights for works of literature or art, including cinematographic films as well as films or recordings used in television or radio programs. Otherwise, the 15% rate applies.
- (l) The 0% rate applies if the recipient of the interest income is the government, a government body or a company that is fully owned by the state. The 5% rate applies if the recipient of the interest income is a bank or other financial institution. Otherwise, the 10% rate applies.
- (m) The 5% rate applies if the recipient is the actual owner of the royalties paid for industrial, business or scientific equipment or transport vehicles. The 10% rate applies in all other cases if the recipient is the actual owner of the royalties. Otherwise, the 15% rate applies.
- (n) The 0% rate applies to amounts paid for the use of or grant of the right to use copyrights of works of literature, art or science, including cinematographic films, as well as for films or recordings used in television or radio programs. The 10% rate applies to amounts paid for the use of or grant of the right to use patents, trademarks, designs, charts, models, plans or secret formulas or processes, for information on industrial, business or scientific experience, and for the use of or grant of the right to use industrial, business or scientific equipment. Otherwise, the 15% rate applies.
- (o) The 10% rate applies if the recipient is the actual owner of royalties paid for the use of or grant of the right to use patents, trademarks, designs, models, plans, secret formulas or processes, or copyrights of scientific works, for the use of or grant of the right to use industrial, business or scientific equipment, and for the use of or grant of the right to use information on industrial, business or scientific experience. Otherwise, the 15% rate applies.
- (p) The 0% rate applies if any of the following circumstances exist:
- The interest income is derived from the sale on credit of industrial, commercial or scientific equipment.
 - The recipient of the interest income is the government, the central bank, local government bodies or financial institutions performing state functions, or the interest is paid on loans that are guaranteed or indirectly financed by such bodies or institutions.
- (q) Belarus abides by the double tax treaty between the former USSR and this state. The table shows the tax rates under such treaty.
- (r) The 0% rate applies to interest on bank and commercial loans. Otherwise, the 10% rate applies.
- (s) The 0% rate applies to interest on government-guaranteed loans.

- (t) The 0% rate applies if the recipient of the interest income recipient is a government, a local government body or the central bank. The 5% rate applies if the recipient and the actual owner of interest income is a bank or other financial institution or if the interest is paid with respect to sale on credit of industrial, business or scientific equipment. Otherwise, the 10% rate applies.
- (u) The 0% rate applies if the recipient of the interest income is a government, local government body, central bank or other financial institution that is wholly owned by the state. Otherwise, the 10% rate applies.
- (v) The 0% rate applies if the recipient of the interest income is the government or the central bank (in the case of Turkey, the 0% rate also applies to interest accruing in Belarus and paid by Eximbank of Turkey on loans for the purchase of industrial, business, commercial, medical or scientific equipment. Otherwise, the higher rates apply.
- (w) The 0% rate applies if either of the following conditions is met:
- The dividend recipient owns more than 50% of the dividend-paying company's capital, provided that the dividend recipient's contribution to the company's capital is at least ECU250,000.
 - The dividend recipient owns over 25% of the dividend-paying company's capital, and its contribution to the company's capital is guaranteed or insured by the government.
- (x) The 0% rate applies if the actual owner of the dividends is the government, the central bank, other government agencies or financial institutions. The 5% rate applies if the recipient is the actual owner of dividends. Otherwise, the 12% rate applies.
- (y) The 0% rate applies to amounts paid for the use of or cession of the right to use copyrights of works of literature, music, art or science, except for cinematographic films, as well as for films or recordings used in television or radio programs. Otherwise, the 5% rate applies.
- (z) The 0% rate applies if one of the following circumstances exist:
- The loan is approved by the government.
 - The interest is charged with respect to the sale on credit of industrial, medical or scientific equipment and related services.
 - A loan intended to promote exports that involves the delivery of industrial, medical or scientific equipment and related services is granted, insured or guaranteed by the state.
- Otherwise, the 10% rate applies.
- (aa) The 0% rate applies if one of the following requirements is met:
- The loan is approved by the government.
 - The interest is received with respect to the sale on credit of industrial, commercial, medical or scientific equipment.
 - The interest is paid on state securities.
- The 5% rate applies to interest income relating to bank loans. The 8% rate applies if the recipient is the actual owner of the interest income. Otherwise, the 10% rate applies.
- (bb) The 0% rate applies if the loan is approved by the government.
- (cc) The 5% rate applies to amounts paid for the use of copyrights of works of literature, art or science (except for cinematographic films) or for the right to use industrial, commercial or scientific equipment or transport vehicles. The 10% rate applies if the recipient is the actual owner of the royalties. Otherwise, the 15% rate applies.
- (dd) The 5% rate applies if the recipient is the actual owner of the income, owns over 20% of the dividend-paying company's capital and has made a contribution of at least EUR81,806.70. Otherwise, the 12% rate applies.
- (ee) The 0% rate applies if any of the following circumstances exist:
- The interest originates in Belarus and is paid to the government of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the Deutsche Finanzierungsgesellschaft für Beteiligungen in Entwicklungsländern.
 - The interest income is received with respect to loans secured by export loan guarantees (Hermes-Deckung) provided by the German government.
 - The recipient of the interest income is the government or central bank of Belarus.
 - The recipient is the actual owner of interest that is paid with respect to the sale on credit of industrial, business or scientific equipment.
- The 5% rate applies if the recipient is the actual owner of the interest income. Otherwise, the 10% rate applies.
- (ff) The 3% rate applies if the recipient is the actual owner of royalties paid for the use of or cession of the right to use copyrights of scientific works, patents, trademarks, designs, models, plans or secret formulas or processes, or for the right to use information regarding industrial, commercial or research experience. The 5% rate applies if the recipient is the actual owner

of royalties for the use of or cession of the right to use copyrights of works of literature and art, including cinematographic films, as well as films or recordings used in television or radio programs, or for the use of or cession of the right to use all types of equipment and transport vehicles. Otherwise, the 15% rate applies.

- (gg) The 0% rate applies if any of the following circumstances exist:
- The loan is approved by the government.
 - The recipient of the interest income is the government, local authorities or the central bank.
 - The interest is paid with respect to a lending or a loan guaranteed or insured by state companies with a view to promoting exports and is associated with the delivery of industrial, commercial, medical or scientific equipment (including Österreichische Kontrollbank Aktiengesellschaft).
- The 5% rate applies if the recipient is the actual owner of the interest income. Otherwise, the 10% rate applies.
- (hh) The 0% rate applies if the recipient of the interest income is the government, the central bank, the Finnish Fund for Industrial Cooperation (FINNFUND) or the Finnish export credit agency (FINNVERA). The 5% rate applies if the recipient of the interest income is the actual owner of the interest income. Otherwise, the 10% rate applies.
- (ii) The 0% rate applies if the income recipient is the government, the central bank, the State General Reserve Fund of Oman or a company that fully or largely belongs to the state. The 5% rate applies if the recipient is the actual owner of the income. Otherwise, the higher rate applies.
- (jj) The 5% rate applies if the recipient of the dividends is the actual owner of the income and owns at least 25% of the capital of the company paying the income. The 10% rate applies in all other cases if the recipient is the actual owner of income. Otherwise, the 12% rate applies.
- (kk) The 0% rate applies if the recipient is the actual owner of the interest income and if one of the following requirements is met:
- The recipient of the interest income is the government, a state body, the central bank or a company that fully or largely belongs to the state.
 - The interest is paid on a government-guaranteed loan.
 - The interest is paid on a loan that is intended to promote exports and that is connected with the delivery of equipment and transport vehicles by an enterprise of the other treaty state.
 - The interest is paid with respect to the sale on credit of equipment and transport vehicles.
- Otherwise, the higher rate applies.
- (ll) The 5% rate applies if the recipient is the actual owner of royalties received for the use of or cession of the right to use copyrights of works of science or computer applications, or for the use of or cession of the right to use equipment and transport vehicles. The 10% rate applies if the recipient is the actual owner of the royalties. Otherwise, the 15% rate applies.
- (mm) The 0% rate applies any of the following circumstances exist:
- The interest is paid by the government or a state body.
 - The interest is paid to the government, a government body, a local agency or body (including a financial institution) that fully belongs to the state or a government body.
 - The interest is paid to another agency or body (including a financial institution) on a loan granted due to the application of an interstate treaty.
- The 8% rate applies if the recipient is the actual owner of the interest income. Otherwise, the 10% rate applies.
- (nn) The 0% rate applies to interest on loans granted to the government or the central bank. Otherwise, the 10% rate applies.
- (oo) The 0% rate applies to dividends paid to any of the following:
- The National Treasury Management Agency of Ireland
 - The National Reserve Pension Fund of Ireland
 - A company, including an agency or an institution, that fully or partially belongs to the state
- The 5% rate applies if the recipient is the actual owner of the dividends and owns at least 25% of the dividend-paying company's capital. The 10% rate applies in all other cases if the recipient is the actual owner of the dividends. Otherwise, the 12% rate applies.
- (pp) The 0% rate applies if the payer or the payee of the interest income is the government, a political and administrative division, a local government body or the central bank. Otherwise, the 5% rate applies.
- (qq) The 0% rate applies to interest paid to the government, the central bank or institutions whose capital belongs fully to the state or local government bodies. Otherwise, the 10% rate applies.
- (rr) The 0% rate applies if any of the following circumstances exist:

- The payer or the payee of the interest income is the government, a political and administrative division, a local government body or the central bank.
- The loan is approved by the government.
- The loan is granted and guaranteed by the state financial body to promote exports and the lending is provided or guaranteed on preferential terms.
- The loan is granted by a bank to promote exports.
- The interest is paid on a debt that arises with respect to the sale on credit of industrial, business or scientific equipment.

The 5% rate applies if the recipient is the actual owner of the interest income. Otherwise, the 10% rate applies.

- (ss) The 0% rate applies if either of the following circumstances exists:
- The interest is paid to the state, a local government body, the central bank or a financial institution that fully belongs to the state.
 - The interest is paid on a loan that is guaranteed, insured or indirectly financed by the government, a local government body, the central bank or a financial institution that fully belongs to the state.
- Otherwise, the 10% rate applies.
- (tt) The 10% rate applies if the recipient is the actual owner of the royalties. Otherwise, the 15% rate applies.
- (uu) The 5% rate applies if the recipient is the actual owner of the royalties. Otherwise, the 15% rate applies.
- (vv) The 0% rate applies if the recipient of the interest income is the government, a local government body, the central bank or other government company or financial institution. Otherwise, the higher rate applies.
- (ww) The 10% rate applies if the recipient is the actual owner of dividends. Otherwise, the 12% rate applies.

- (yy) The 0% rate applies if any of the following circumstances exists:
- The payer or the payee of the interest income is the government, a political and administrative division, a local government body or the central bank.
 - A loan is approved by the government.
 - A loan is provided, guaranteed or insured by the government, the central bank or other body under state control.
 - A loan is provided or guaranteed by a financial institution to promote development.
 - The interest is paid on a loan or lending with respect to the acquisition of industrial, business, commercial, medical or scientific equipment.
- Otherwise, the higher rate applies.
- (zz) The 6% rate applies if the recipient is the actual owner of the royalties. Otherwise, the 15% rate applies.
- (aaa) The 5% rate applies if the actual owner of the dividends is a company that directly owns at least 20% of the capital of the company paying the dividends. The 10% rate applies if the recipient is the actual owner of dividends. Otherwise, the 12% rate applies.
- (bbb) The 0% rate applies if the actual owner of interest income is one of the following:
- The government of Belarus
 - National Bank of Belarus
 - A Belarusian local government body
 - The government of Laos
 - Bank of Laos
 - A Laotian local government body
- The 8% rate applies if the recipient is the actual owner of the interest income. Otherwise, the 10% rate applies.
- (ccc) The 0% rate applies to dividends received by the following:
- The government of Belarus.
 - National Bank of Belarus.
 - A legal body in Belarus.
 - An institution wholly or predominantly owned by the government of Belarus. A list of such institutions may be approved from time to time by the government of Belarus or bodies authorized thereby and by a competent Singaporean body.
 - The government of Singapore.
 - Monetary Authority of Singapore (central bank).
 - Government of Singapore Investment Corporation.
 - A legal body in Singapore.

- An institution wholly or predominantly owned by the government of Singapore. A list of such institutions may be approved from time to time by a competent Singaporean body, the government of Belarus or bodies authorized by the government of Belarus.

The 5% rate applies to dividends received by the actual owner of the dividends. Otherwise, the 12% rate applies.

(ddd) The 0% rate applies to dividends received by the following:

- The government of Belarus.
- National Bank of Belarus.
- A legal body in Belarus.
- A bank in Belarus.
- An institution wholly or predominantly owned by the government of Belarus. A list of such institutions may be approved from time to time by the government of Belarus or bodies authorized thereby and by a competent Singaporean body.
- The government of Singapore.
- Monetary Authority of Singapore (central bank).
- Government of Singapore Investment Corporation.
- A legal body in Singapore.
- A bank in Singapore.
- An institution wholly or predominantly owned by the government of Singapore. A list of such institutions may be approved from time to time by a competent Singaporean body and the government of Belarus or bodies authorized thereby.

The 5% rate applies to interest received by the actual owner of the interest income. Otherwise, the 10% rate applies.

(eee) The 7.5% rate applies if the actual owner of the dividends is a company that directly owns at least 25% of the capital of the company paying the dividends. The 10% rate applies if the recipient is the actual owner of dividends. Otherwise, the 12% rate applies.

(fff) The 0% rate applies if the actual owner of the interest income is one of the following:

- The government or a local government body.
- The national (central) bank.
- Financial organizations (institutions) that are wholly owned by the government. A list of such organizations (institutions) may be approved from time to time by the governments of the treaty states or bodies authorized thereby.

Otherwise, the 10% rate applies.

(ggg) The 10% rate applies if the recipient is the actual owner of the dividends and owns at least 10% of the capital of the company paying the dividends. Otherwise, the 12% rate applies.

(hhh) The 0% rate applies to interest received by the government or a local government body, the national bank or an organization or institution wholly or predominantly owned by the government. The 5% rate applies to interest received by the actual owner of the interest income. Otherwise, the 10% rate applies.

(iii) The 5% rate applies if the recipient is the actual owner of the dividends. Otherwise, the 12% rate applies.

(jjj) The 7.5% rate applies if the recipient is the actual owner of the income. Otherwise, the higher rate applies.

(kkk) The 0% rate applies if the interest is paid to the actual owner of the interest income and if one of the following circumstances exists:

- The interest is paid to the government, central bank or any other organization that fully or largely belongs to the state, including an agency or institution.
- The interest is paid to the National Treasury Management Agency of Ireland.
- The interest is paid to the National Pension Reserve Fund of Ireland.
- The interest is paid on a debt that arises from a loan approved by the government.
- The interest is paid on a debt that arises with respect to a sale on credit of any items or industrial, business, medical or scientific equipment.

The 5% rate applies if the recipient is the actual owner of the interest. Otherwise, the 10% rate applies.

(lll) The 0% rate applies if the actual owner of the interest is the government, the central bank, a statutory body, a bank, or any institution wholly or mainly owned by the government of a contracting state that may be agreed on from time to time by the competent authorities. The 5% rate applies if the recipient is the actual owner of the interest. Otherwise, the 10% rate applies.

- (mmm) The 5% rate applies if the recipient is the actual owner of the dividends, and the recipient owns not less than 25% of the charter fund of the company paying the dividends. Otherwise, the 10% rate applies.
- (nnn) The 10% rate applies if the recipient is the actual owner of the interest income. The 0% rate applies if the recipient is the actual owner of the interest income and if the interest income is paid to one of the following:
- The government, an administrative subdivision of the government or a government authority.
 - The national bank.
 - A financial organization owned by the government. A list of such organizations may be agreed on by the governments of Belarus and Ecuador.
- (ooo) The 5% rate applies if the recipient is the actual owner of the dividends. The 0% rate applies if the dividends are paid to the actual owner and if the dividends are paid to one of the following:
- The government of Belarus or the Hong Kong SAR.
 - The national bank of Belarus.
 - The Bank of Development of the Republic of Belarus, which is a joint stock company.
 - An entity wholly or partially owned by the government of Belarus or the Hong Kong SAR. A list of such entities may be agreed on by the jurisdictions.
 - The currency administration of the Hong Kong SAR.
 - A currency fund resident in the Hong Kong SAR.
- (ppp) The 5% rate applies if the interest income is paid to the actual owner. The 0% rate applies if the interest income is paid to the actual owner and if the interest income is paid to one of the following:
- The government of Belarus or the Hong Kong SAR.
 - The national bank of Belarus.
 - The Bank of Development of the Republic of Belarus, which is a joint stock company.
 - An entity wholly or partially owned by the government of Belarus or the Hong Kong SAR. A list of such entities may be agreed on by the jurisdictions.
 - The currency administration of the Hong Kong SAR.
 - The currency fund (in the case of the Hong Kong SAR).
- (qqq) The 3% rate applies if the royalties are paid to the actual owner of the income for the use of aircraft or for the granting of the right to the use of aircraft. The 5% rate applies if the royalties are paid to the actual owner of the income.
- (rrr) The 0% rate applies to interest on loans granted to the government, a local government body or the central bank. Otherwise, the 10% rate applies.

A. At a glance

Corporate Income Tax Rate (%)	29 (a)(b)
Capital Gains Tax Rate (%)	25/29 (b)(c)
Branch Tax Rate (%)	29 (b)
Withholding Tax (%)	
Dividends	5/10/15/17/20/30 (d)
Interest	15/30 (e)
Royalties from Patents, Know-how, etc.	30
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (f)

- (a) For further details, see Section B.
 (b) In addition, a 2% surtax (crisis contribution) is imposed. This surtax will be abolished in 2020.
 (c) Certain capital gains are exempt from tax (see Section B).
 (d) The standard withholding tax rate for dividends is 30%. For further details, see Section B.
 (e) The standard withholding tax rate for interest is 30%.
 (f) For further details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their annual worldwide income. Nonresident companies are subject to tax on their annual Belgian-source income only. A company is resident in Belgium if its central management or its registered address is located in Belgium.

Rates of corporate income tax. As of the 2018 financial year, the corporate rate is 29%, lowered to 25% as of the 2020 financial year. A reduced rate of 20% on the first EUR100,000 of taxable income applies to small companies, as defined under corporate law. Above this amount, the normal rate applies. One of the principal conditions for the reduced rate is that the company must pay an annual remuneration of at least EUR45,000 to at least one director. For salaries lower than EUR45,000, the salary should at least be equal to the taxable income. The minimum salary requirement does not apply to startup companies incorporated less than four years prior to 1 January of the tax year. In addition to the applicable rates, a surtax (crisis contribution) of 2% is levied. As of the 2020 financial year, the surtax will be abolished.

Notional interest deduction. Belgian companies and Belgian branches of nonresident companies may deduct a deemed interest expense in connection with qualifying equity. This deduction is known as the notional interest deduction (NID). As of the 2019 tax year, the NID is calculated on the incremental adjusted equity in excess of the average equity of the preceding five years. Qualifying equity is no longer determined at the end of the tax period, but at the beginning of the tax period (for the current and five preceding tax periods). To prevent potential abuse and duplication of tax benefits, certain items must be deducted from the equity, such as the fiscal net value of own shares, the fiscal net value of financial fixed assets qualifying as “participations and other shares” and the fiscal net value of shares issued by investment companies. Current year adjustments to the latter items are no longer required.

Equity allocated to foreign branches and foreign real estate qualifies for the NID. However, in such case, this portion of the NID must be imputed first on that foreign-source income. Only excess NID relating to branches and real estate located in the European Economic Area (EEA) can be effectively used against Belgian taxable income.

For the 2019 tax year, the rates are 0.746% for large companies and 1.246% for small companies. For the 2020 tax year, the NID rate is set at 0.726% (1.246% for small companies). The deduction may not be carried forward in the event of a loss, but other limitations on the carryforward also apply (see *Limitation on certain tax deductions* in Section C).

Tax regime for the diamond industry. Belgian tax law provides for a special lump-sum tax regime for the diamond industry.

The gross taxable result of the company equals 2.1% of the diamond trade turnover. This taxable result is subsequently subject to the application of the common corporate tax rules.

However, the net taxable result cannot be lower than 0.55% of the diamond trade turnover.

The special tax regime is subject to the condition that the company manager's salary paid during the tax period be higher than a certain threshold (also depending on the diamond trade turnover of the company).

Tax incentive for audiovisual investments. Belgian tax law includes a tax incentive to attract investments of Belgian companies or branches in audiovisual productions.

Framework agreements concluded after 31 December 2014 are subject to a legal regime, under which investors may deduct 356% (2019 tax year) or 421% (2020 tax year) of their investment from their tax base. Therefore, the investor can recover 105.3% (356% x 29.58%) for the 2019 tax year or 125.46% (421% x 29.8%) for the 2020 tax year of the investment directly through a reduction of its corporate income tax.

The incentive requires a tax-shelter certificate issued by the tax authorities, which is to be requested by the production company as soon as the production is finalized. The certificate provides the following:

- It guarantees that the invested amounts flow to the production company to a maximum extent.
- It confirms that the production company complies with all legal conditions.
- It guarantees the tax exemption on behalf of the investor.
- It determines the "tax value" of the project.

Companies planning to invest in a European audiovisual production (to be recognized by the competent departments of the French, Flemish or German communities) and who want to benefit from the tax incentive must conclude a framework agreement with a qualifying audiovisual production company (including a television channel). In this framework agreement, the expected tax value for the production, which is based on the budgeted production expenses (direct as well as indirect expenses, including expenses incurred up to six months before the conclusion of the framework agreement), needs to be included. The estimated tax exemption is based on this tax value. The framework agreement needs to be notified to the tax authorities within one month after it is signed.

The investors are entitled to an exemption of 356% (2019 tax year) or 421% (2020 tax year) of the invested funds. The invested amounts do not create a receivable, nor exploitation rights linked to the underlying project. The invested amount is irrevocably paid to the production company (as an expense; the expense as such is not tax deductible) and is not regarded as an asset. Except for commercial gifts with limited value (under reference of value-added tax [VAT] legislation), no other economic or financial benefit can be granted to the investor.

However, the exemption in a given tax year remains limited to a maximum of 50% of the investor's increase of taxable reserves (mainly the net accounting profit before application of the tax-shelter exemption but after deduction of distributed dividends and other tax corrections) during that same tax year, with an absolute maximum of EUR750,000.

In principle, the exemption is granted in the year in which the framework agreement is concluded or the payments are made. Excess exemptions (exemptions that could not be used based on the above maximum) can be carried forward to the end of the fourth tax period following the year in which the framework agreement is signed. The invested amounts must be effectively paid to the production company within three months after the contract has been signed.

The initial exemption is granted in conditionally and provisionally. In addition to the conditions mentioned above, the following are the most noteworthy conditions:

- In the financial statements of the investor, the exempt amounts must be recorded in an “unavailable reserve,” which needs to be maintained until the date the tax-shelter certificate is received.
- For a specific project, the exemption is limited to 172% of the expected final tax value of the tax-shelter certificate as specified in the framework agreement.

The exemption only becomes final when the tax-shelter certificate confirming the tax value of the investment is issued and sent to the tax authorities of the investor as an enclosure to the investor’s corporate income tax return. The certificate needs to be received by the investor by 31 December of the fourth year following the year in which the framework agreement is signed.

In addition, the final exemption is only granted to the extent that the tax value of the certificate corresponds to the value that was included in the agreement and to the extent that the limits and maximum amounts per tax period are respected. If the tax-shelter exemption is claimed incorrectly, corporate income tax on the difference becomes due, increased with late payment interest.

For the period between the first payment after the conclusion of the framework agreement and the receipt of the tax-shelter certificate, interest can be granted. This period is legally limited to 18 months, and the maximum interest rate that is allowed is fixed at the 12-month Euribor (increased by 450 basis points).

Tax incentive for stage art performances. The tax incentive for audiovisual investments also applies to “European stage art performances” (productions recognized as such by the competent authorities of the French-, Flemish- or German-speaking communities).

To qualify, the production expenses must be incurred within a maximum time limit of 24 months since the date of the signing of the framework agreement and no later than one month after the premiere of the stage art performance. Expenses incurred before the signing of the framework agreement are not considered eligible production expenses (in contrast to the audiovisual productions’ time frame of six months).

In addition, as is the case for audiovisual productions, limitations apply with respect to the maximum amount that can be financed through tax-shelter funding. This amount is calculated based upon the eligible direct and indirect expenses incurred in Belgium and/or the EEA.

From the investor’s side, the same limitations apply with respect to the maximum amount of the exemption in a given tax year (an

absolute maximum of EUR750,000 per year and limited to 50% of the increase in taxable income). In this respect, investments in audiovisual productions and stage art performances should be counted together and offset against these limitations.

The entity that is using the tax-shelter funding is subject to corporate income tax. This is particularly important for entities (such as nonprofit organizations) that are in principle only subject to a so-called legal entity tax. These entities are subject to corporate income tax in the tax year in which the first framework agreement is concluded and in the three following tax years.

Tax incentives for startups. Tax incentives for startups are described below.

Tax shelter regime for equity investments in startups. The tax shelter for equity investments in startups is designed to encourage individuals to invest in new shares of startups on incorporation or within four years after incorporation, as well as in shares in qualifying regulated starter funds. For investments in startups that qualify as small companies and for investments in starter funds, the personal income tax reduction amounts to 30% of a maximum investment of EUR100,000 per tax period. The rate is 45% for investments in startups that qualify as “micro-undertakings,” as defined in EU accounting directive 2013/34. The total amount of qualifying investments may not exceed EUR250,000 per startup. The incentive applies only to cash investments that represent a maximum of 30% of the capital of the startup. The shares must be held for at least four years. Individuals who at the moment of the investment are part of the company’s management are excluded.

As of the 2019 tax year (financial years starting on or after 1 January 2018, a deduction of 25% of the invested amount is introduced for investments in growth companies, following almost the same rules (equity increase, contribution in cash, issuance of new shares, holding period of four years and certain other rules).

Tax exemption for loans to startups through crowdfunding. Individuals benefit from a tax exemption for interest on loans through a regulated crowdfunding platform for a maximum amount of loans per taxpayer per year of EUR15,000. The loan must have a maturity of at least four years. The exemption applies to loans to companies as well as to individuals who meet the criteria for small companies and who are registered for maximum of 48 months at the Crossroads Bank for Enterprises. The tax exemption does not apply to refinancing loans.

Partial payroll tax exemption for startups. Belgian law provides for a partial payroll tax exemption to decrease the wage costs for startups. The incentive applies to companies and to individual employers who are registered for a maximum of 48 months at the Crossroads Bank for Enterprises, starting from the first day of the month following the registration. If the startup meets the criteria for small companies, the exemption rate is 10%. The exemption rate is 20% for “micro-undertakings,” as defined in EU accounting directive 2013/34.

Capital gains. Capital gains derived from the disposal of tangible and intangible assets are taxed at the ordinary rate. Tax deferral is possible if certain conditions are met.

Capital gains on shares are exempt if all of the following conditions are met:

- The subject-to-tax (STT) requirement for the application of the dividend-received deduction (DRD) is met (see *Dividends*).
- The minimum holding requirement (uninterrupted period or at least one year) of the DRD is met (see *Dividends*).
- As of the 2019 tax year (taxable periods starting on or after 1 January 2018), the minimum shareholding requirement of at least 10% or EUR2,500,000 is met.

Also, as of the 2019 tax year, the special tax rate of 0.412% is abolished. If the STT requirements are not met, the ordinary tax rate applies. If the STT and minimum shareholding requirement are met, but the holding period requirement is not met, a 25% (excluding the crisis surtax) tax rate applies.

A reduced rate of 12.5% (plus 2% crisis surcharge) is applicable to capital gains on shares in companies holding real estate (unless the general anti-avoidance rule applies). Any capital losses on these shares are generally not tax deductible, except to the extent of the loss of fiscally paid-up capital in a liquidation.

Capital gains realized on an exchange of shares in a tax-neutral restructuring are exempt from tax under certain conditions.

Administration. A tax year refers to the year following the financial year if the financial year ends on 31 December. If the financial year ends before 31 December, the tax year refers to the year in which the financial year closes. Consequently, the 2019 tax year relates to a financial year ending between and including 31 December 2018 and 30 December 2019.

To avoid a surcharge, tax must be paid in advance in quarterly installments. As of the 2019 tax year (taxable periods starting on or after 1 January 2018), a surcharge of 6.75% applies. For a calendar-year taxpayer, the quarterly installments are generally due on 10 April, 10 July, 10 October and 20 December.

The balance of tax payable is due within two months after receipt of the notice of assessment.

Reporting obligation for payments to tax havens. Both resident and nonresident companies are required to report all direct or indirect payments (regardless whether these payments are expenses) in excess of EUR100,000 made to beneficiaries with an address or financial account in “tax havens” or low-tax jurisdictions that do not “effectively or substantially” meet the Organisation for Economic Co-operation and Development (OECD) standard on transparency and exchange of information (so-called “non-compliant jurisdictions”).

For the purpose of this obligation, “tax havens” are defined as non-EEA countries that meet any of the following conditions:

- They have a nominal corporate tax rate below 10%.
- They do not levy corporate income tax on domestic income or on foreign income (offshore tax regimes).
- They have an effective corporate tax rate on foreign income of less than 15%.

Payments to non-compliant jurisdictions must be reported if they were made during the period in which the jurisdiction was non-compliant. The rules apply to payments to the following:

- Branches located in a tax haven, but with a head office in a listed state
- Permanent establishments located in such jurisdictions
- Bank accounts managed by or held with individuals or permanent establishments located in such jurisdictions
- Accounts managed by or held with credit institutions or their permanent establishments located in such jurisdictions

A specific reporting obligation for financial institutions requires financial institutions to automatically and periodically notify their operations with and payments to tax havens.

The payments must be reported on a special form, which must be annexed to the annual corporate income tax return. These payments are tax deductible only if they relate to real and genuine transactions and if they are made to persons that are not artificial constructions.

Advance rulings. An advance decision in tax matters (tax ruling) is a unilateral written decision by the Belgian tax authorities at the request of a (potential) taxpayer about the application of the tax law in a specific situation that has not yet occurred, as described by the taxpayer. The purpose of such a ruling is to provide upfront certainty to the taxpayer.

The tax authorities must respond to a ruling request within a three-month period, which may be extended by mutual agreement. A ruling may be valid for a period of five years.

However, advance rulings are not issued in certain circumstances such as the following:

- Transactions that have already been implemented or that are in a tax litigation phase
- Transactions that lack economic substance in Belgium
- Transactions, essential parts of which involve tax havens that do not cooperate with the OECD

Ruling requests filed with the Belgian tax authorities that relate to multinational investments and transactions must disclose other ruling requests filed in EU or treaty countries regarding the same matters.

In principle, the advance rulings are published.

Dividends. As the 2019 tax year (taxable periods starting on or after 1 January 2018), a 100% DRD applies to dividends received by a qualifying Belgian company or Belgian branch. To qualify for the DRD, dividends must meet all of the following requirements:

- The recipient company (shareholder) must own a minimum participation of 10% of the share capital or a participation with an acquisition value of at least EUR2,500,000.
- The shares must be held by the shareholder (in full ownership) for an uninterrupted period of at least one year.
- The company distributing the dividends must be a normally taxed company.

In the case of insufficient profits, the excess DRD can be carried forward indefinitely to the extent that it relates to qualifying

dividends. However, a general limitation on certain tax deductions, including the carried forward excess DRD applies (see *Limitation on certain tax deductions* in Section C). In addition, limitations may apply in cases of restructurings and changes of control.

The standard withholding tax rate for dividends is 30%, but exemptions and reduced withholding tax rates are applicable under Belgian law or tax treaties.

As a consequence of the implementation of the European Union (EU) Parent-Subsidiary Directive, no withholding tax is due on dividends distributed to a Belgian company or a company, resident of another EU member state or a country with which Belgium has concluded a tax treaty containing an exchange-of-information clause, that owns at least 10% of the shares for an uninterrupted period of one year.

A 30% withholding tax is also imposed in the event of the liquidation of a company.

However, small and medium-sized enterprises (SMEs) may allocate all or a part of their taxed profits to a liquidation reserve, booked to a separate account, at a tax charge of 10%. If the liquidation reserve is maintained until the liquidation of the company, no additional tax is levied on these funds. The distribution of the funds to the shareholders before the liquidation of the company is subject to an additional but favorable withholding tax rate of 5% (distribution of a dividend after five years following the last day of the tax period in which the reserve is formed), 17% or 20% (distribution within five years).

As of 1 January 2018, capital reductions, as well as qualifying reimbursements of share premiums and profit certificates, are pro rata allocated to the paid-in capital and to the reserves. The portion allocated to the reserves is considered a dividend for tax purposes that is in principle subject to withholding tax. That portion is first allocated to the taxed reserves (whether or not incorporated in capital; no withholding tax is imposed) and then to the tax-exempt reserves (if any) incorporated in capital. Therefore, to the extent taxed reserves are available, the tax-exempt reserves (if any) are not affected. Non-distributable reserves and other (non-incorporated) tax-exempt reserves (for example, provisions) fall out of scope of this new pro rata rule.

Foreign tax relief. Income derived from a permanent establishment abroad may be exempt under the provisions of a tax treaty. A Belgian company that receives foreign-source interest income and royalties subject to a foreign withholding tax can claim a foreign tax credit in Belgium if certain conditions are satisfied. The maximum foreign tax credit that may be claimed equals ¹⁵/₈₅ of the net income at the border.

C. Determination of trading income

General. Taxable income is based on income reported in the annual financial statements and includes all gains, profits, costs, dividends, interest, royalties and other types of income.

Certain business expenses are not deductible for tax purposes, such as certain car expenses, 31% of restaurant expenses and 50% of entertainment expenses.

Limitation on certain tax deductions. The use of certain deductions is limited to EUR1 million plus 70% of the taxable income in excess of EUR1 million. Therefore, 30% of the tax base in excess of EUR1 million cannot be offset and is a minimum tax base. The limitation applies to the following:

- Carried forward tax losses
- Carried forward DRD
- Carried forward innovation income deduction
- Carried forward NID (calculated before the 2019 tax year) (see *Notional interest deduction* in Section B)
- Incremental NID (calculated as of the 2019 tax year)

However, other deductions can be applied without the limitation, including the following:

- Nontaxable items (for example, gifts and exemptions in accordance with double tax treaties)
- Current year DRD
- Patent income deduction
- Current year innovation deduction
- Current year and carried forward investment deduction
- Group contributions in the context of the new tax consolidation regime (as of the 2020 tax year [financial years starting on or after 1 January 2019])

The limitation does not apply to startup companies for the first four tax years.

Inventories. Stock values may not exceed the lower of cost or market value; cost is defined as the purchase price of raw materials plus direct and indirect production costs. However, the inclusion of indirect production costs is optional. Accepted valuation methods are first-in, first-out (FIFO); last-in, first-out (LIFO); and weighted average. Valuation of stocks at replacement cost is not allowed.

Provisions. Provisions for liabilities and charges are exempt from tax if they relate to contractual, legal or regulatory obligations existing at the end of the financial year. This new rule applies only for provisions and additions as of 2018 and for additions as of 2018 to provisions recorded before 2018.

Depreciation. In principle, depreciation rates are determined based on the anticipated useful economic life of the assets. The following straight-line rates are generally accepted.

Asset	Rate (%)
Office buildings	3
Industrial buildings	5
Chemical plants	8 to 12.5
Machinery and equipment (including information technology)	10 to 20
Office furniture and equipment	10 to 15
Rolling stock (motor vehicles)	20 to 33
Small tools	33 to 100

The declining-balance method and accelerated depreciation are also allowed under certain circumstances. For assets with an amortization period of less than five years, the annual depreciation rate under the declining-balance method may not exceed 40% of the acquisition value. However, the accelerated depreciation method will be abolished as of 1 January 2020.

Audiovisual investments must be amortized using the straight-line or declining-balance method, with no minimum amortization period. R&D investments must be amortized for tax purposes using the straight-line method over a period of at least three years. All other intangible assets must be amortized for tax purposes using the straight-line method over a period of at least five years.

Investment deduction. A 13.5% investment deduction is available for specific investments and under certain conditions (for example, investments in environmentally friendly R&D, energy savings and related patents). A company can opt for a spread investment deduction of 20.5% (2019 tax year) and can accordingly deduct each year 20.5% of the annual amortization. For SMEs, an increased investment deduction of 20% is applicable for investments made between 1 January 2018 and 31 December 2019. These companies are also entitled to an investment deduction of 13.5% with respect to investments in fixed digital assets, such as payment systems and cybersecurity systems and a 20.5% investment deduction for security-related investments.

If the company has insufficient taxable income, the investment deduction may be carried forward.

For investments in R&D, a company can irrevocably opt for a tax credit instead of a deduction at the same rate as the investment deduction. As opposed to the investment deduction, this tax credit is effectively paid out if a company has insufficient taxable income for five consecutive tax years.

Tax incentives exist for investment in Belgian audiovisual works (see Section B) and for the shipping industry (tonnage tax).

Innovation deduction. The OECD required Belgium to abolish the patent income deduction (PID) and replace it with a Base Erosion and Profit Shifting (BEPS)-compliant regime. Under the PID regime, Belgian companies or permanent establishments of non-resident companies were allowed to deduct 80% of the income derived from royalties and intellectual property.

The new innovation deduction introduced by the law of 2 February 2017 applies retroactively as of 1 July 2016. Under a grandfathering clause in the law, for patent income earned up to 30 June 2021 with respect to self-developed patents requested before 1 July 2016 and approved patents and licenses acquired before 1 July 2016, the PID regime is still applicable until 30 June 2021.

Under the new regime, the taxpayer should be owner, co-owner, licensee, usufruct or (economic) rights holder of intellectual property (IP) rights. The regime (under conditions) applies to, among others, patents, medicinal products, software and plant-variety rights.

The income derived from the qualifying IP should be included in the Belgian tax base and should be at arm's length. The following is the equation for calculating the innovation deduction:

$$\text{Innovation deduction} = \text{Net IP income} \times \text{nexus ratio} \times 85\%$$

In the above equation, "net IP income" means the income after deduction of overall expenditures incurred for the development or acquisition of the IP right to the extent included in expenses. In addition, a recapture of prior year expenses (incurred after 30 June 2016) up to seven years is possible.

The following is the "nexus ratio":

$$\frac{\text{Qualifying expenditures} \times 130\%}{\text{Overall expenditures}}$$

"Qualifying expenditures" relate to R&D expenditures incurred by the taxpayer, including outsourcing to unrelated parties and excluding expenditures for the acquisition of IP or outsourcing to related parties.

The following are other significant features of the innovation deduction:

- Carryforward of unused innovation deductions to subsequent tax periods (however, see *Limitation on certain tax deductions*)
- Tax neutrality in the context of reorganizations
- Possible combination with other R&D incentives
- No R&D center requirement
- No limitations in time or amounts

Relief for losses. In general, companies may carry forward tax losses without limitations. However, a general limitation on certain deductions, including carried forward tax losses, applies (see *Limitation on certain tax deductions*) and certain limitations may apply in cases of restructurings and changes of control.

Tax losses cannot be carried back.

Groups of companies. As of the 2020 tax year (financial years starting on or after 1 January 2019), new rules of group taxation are applicable. Under this new regime, a group company that is in a taxpaying position can make a tax-deductible group contribution to another group company that is in a loss position. This group contribution is taxable in the hands of the receiving group company and may be offset with the available tax loss. The receiving group company with losses is remunerated for the use of its tax loss by the contributing company.

Group contributions are available for Belgian resident companies and Belgian establishments that are part of the same group. They may be made between parents and subsidiaries with direct 90% participation and between sister companies with a direct joint 90% parent in Belgium or a treaty jurisdiction. The minimum participation must have been maintained for an uninterrupted period of at least five years as of 1 January of the fourth calendar year before the tax year.

Application of the new regime is subject to conditions and certain formalities must be fulfilled.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, standard rate	21
Social security contributions, on gross salary	
Employer (approximately)	35
Employee	13.07
Real estate tax; rate depends on location (allowed as a deductible expense for corporate income tax purposes)	Various
Environmental tax; rate depends on the location and the activity or product; tax is not deductible for corporate income tax purposes	Various
Registration duties, on contributions to companies	0
Registration duties on the transfer of immovable property	10/12.5

E. Miscellaneous matters

Foreign-exchange controls. Payments and transfers do not require prior authorization. However, for statistical purposes, financial institutions are required to report all transactions with foreign countries to the National Bank of Belgium. Resident individual enterprises are also subject to this reporting obligation if they conclude the transactions through nonresident institutions or directly.

Transfer pricing. The Belgian Income Tax Code (ITC) contains anti-avoidance provisions that relate to specific aspects of transfer pricing. “Abnormal and gratuitous advantages” granted by a Belgian enterprise are added to the tax base of the Belgian enterprise, unless the advantages are directly or indirectly part of the taxable income of the recipient in Belgium. The ITC also contains anti-avoidance provisions concerning royalties, interest on loans and other items, as well as a provision on the transfer of certain types of assets abroad. Under these provisions, the taxpayer must demonstrate the bona fide nature of the transaction.

Multinationals must fulfill documentation requirements (Master File, Local File and Country-by-Country Reporting) for financial years beginning on or after 1 January 2016.

F. Treaty withholding tax rates

The rates in the table below reflect the lower of the treaty rate and the rate under domestic tax law on outbound dividends. Belgium provides an exemption from dividend withholding tax for companies located in countries with which Belgium has entered into a tax treaty. The exemption is subject to the same conditions as those contained in the EU Parent-Subsidiary Directive. However, the treaty must contain an exchange-of-information clause. As a result, certain countries are excluded.

In reaction to the OECD’s position regarding the application of Article 26 (exchange of information) of the model convention in treaties entered into by Belgium, Belgium began renegotiating all treaties in 2009. This has resulted in more than 40 new treaties (the vast majority of which have not yet become effective). It is

expected that most of these treaties will enter into effect in the upcoming years. In some cases, the negotiations are limited to the exchange of information only. For certain treaties, other articles are also included in the negotiations.

Non-treaty jurisdictions	30	30	30	30

- (a) Reduced rates apply to outbound dividends if the recipient holds directly or indirectly the level of participation indicated in the treaty. The level of participation is generally 25% of the capital or voting power, unless stated otherwise in a footnote.
- (b) As a consequence of the implementation of the EU Parent-Subsidiary Directive, no withholding tax is due on dividends distributed to a Belgian company or a company, resident of another EU member state or a country with which Belgium has concluded a tax treaty containing an exchange-of-information clause, that owns at least 10% of the shares for an uninterrupted period of one year.
- (c) The lower rate applies conditionally to interest paid on commercial debt claims and to banks.
- (d) The lower rate applies to copyright royalties (excluding royalties with respect to copyrights on films and certain other items).
- (e) A most-favored-nation clause may be applicable.
- (f) The rates are 3% for news items, 5% on copyrights (excluding copyrights on films and certain other items) and 10% on computer software, patents, trademarks, equipment leasing and know-how.
- (g) The minimum holding requirement is 10%.
- (h) The 10% rate applies if the Austrian company owns more than 50% of the capital in the Belgian company.
- (i) The rate is 5% if either of the following circumstances exist:
- The Azerbaijani company owns at least 30% of the capital in the Belgian company and has invested at least USD500,000 in that company.
 - The Azerbaijani company has invested at least USD10 million in the Belgian company.
- The rate is 10% if the Azerbaijani company owns at least 10% of the capital in the Belgian company and has invested at least USD75,000 in that company.
- (j) The 0% rate applies to interest on commercial debt claims.
- (k) The 0% rate applies to copyright royalties with respect to films and certain other items.
- (l) The tax treaty between Belgium and the former Yugoslavia is applicable.
- (m) The 10% rate applies to copyright royalties with respect to films and certain other items. The 20% rate applies to royalties with respect to trademarks and commercial names. The 15% rate applies to other royalties.
- (n) The lower rate applies conditionally to interest on bank deposits.
- (o) The lower rate applies to royalties with respect to copyrights (excluding copyrights on films and certain other items), computer software, patents and know-how.
- (p) The minimum holding requirement is 10% for an uninterrupted period of 12 months.
- (q) The 5% rate applies to interest on loans granted by banks and insurance companies, and interest on bonds or securities that are regularly and substantially traded on a regulated securities market.
- (r) The rates under the treaty are in principle 5% and 15%, but by application of the most-favored-nation clause, the applicable rate can differ (tax treaties with Australia and Japan).
- (s) The rates under the treaty are in principle 5% and 10%, but by application of the most-favored-nation clause, the applicable rate can be 2% (Chile-Japan tax treaty).
- (t) The rate under the treaty is 10%, but by application of the most-favored-nation clause, the applicable rate can differ (tax treaties between the Czech Republic and the Slovak Republic, and between Austria and Belgium).
- (u) The rate under the treaty is 15%, but by application of the most-favored-nation clause, the applicable rate can differ (China-Ecuador tax treaty).
- (v) The 25% rate applies to royalties with respect to trademarks.
- (w) The rates under the treaty are 5% (equipment leasing) and 10%, but by application of the most-favored nation clause, the rates can be reduced to 0% for royalties (as defined).
- (x) The lower rate applies to interest on current accounts and on advance payments between banks.
- (y) The 5% rate applies if the beneficial owner is an enterprise of Georgia.
- (z) Consult the tax treaty for more information.
- (aa) The 0% rate applies if the Hong Kong Special Administrative Region (SAR) company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months. The 5% rate applies if the Hong Kong SAR company owns directly at least 10% of the capital in the Belgian company.
- (bb) The rate under the treaty is 20%, but by application of the most-favored-nation clause, the applicable rate can differ.

- (cc) Effective from 1 January 2020, a new tax treaty will apply between Belgium and Japan. Under the new tax treaty, the general withholding tax rate for dividends will be 10%. This rate will be reduced to 0% if the beneficial owner is a company that satisfies either of the following conditions:
- It has owned directly or indirectly at least 10% of the voting power of the paying company for at least six months ending on the date on which entitlement to the dividends is determined (excluding dividends that are deductible in computing the taxable income of the company paying the dividends in its resident state).
 - It is a qualifying pension fund.
- The general withholding tax for interest will be 10%. This rate can be conditionally reduced to 0% (for application of the lower rate, consult the tax treaty). A 0% withholding tax rate will apply to royalties.
- (dd) This rate applies to dividends paid to the Kuwaiti government or to a company that is at least 25%-owned by the Kuwaiti government.
- (ee) The tax treaty between Belgium and the former USSR applies.
- (ff) The rates for royalties under the treaty are 5% for equipment leasing and 10% in all other cases. A most-favored-nation clause may be applicable under which the rate is reduced to 0% (Japan-Latvia tax treaty).
- (gg) The rates for royalties under the treaty are 5% for equipment leasing and 10% in all other cases. A most-favored-nation clause may be applicable under which the rate is reduced to 0% (Japan-Lithuania tax treaty).
- (hh) The minimum holding requirement is 25% or a purchase price of at least EUR6,197,338.
- (ii) The 0% rate applies if the Macedonian company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months. The 5% rate applies in the case of a 10% shareholding.
- (jj) The domestic rate applies, unless the interest is paid by an enterprise engaged in an industrial undertaking. In that case, the rate may not exceed 10%.
- (kk) The domestic rate applies to artistic copyright royalties (including royalties with respect to films and certain other items). For other royalties, the rate may not exceed 10%.
- (ll) The lower rate applies to dividends paid to the following:
- A company that holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months
 - A qualifying pension fund
- (mm) The minimum holding requirement is 25%.
- (nn) The 5% rate applies conditionally if the beneficial owner is a pension fund.
- (oo) The 0% rate applies if the beneficial owner is either of the following:
- A company that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months
 - A Norwegian political subdivision or local authority, the Central Bank of Norway, the Norwegian Government Pension Fund Global, a statutory body or any institution wholly or mainly owned by the government of Norway, or a political subdivision or local authority thereof.
- (pp) The lower rate applies if a company in Pakistan is engaged in an industrial undertaking and pays dividends to a Belgian company of which it owns not less than 20% of the voting shares.
- (qq) The rate is 0% royalties on copyrights (excluding royalties with respect to films and certain other items.). The rate is 15% with respect to royalties on know-how.
- (rr) The 0% rate applies to interest on government bonds or on guaranteed or insured loans or credits.
- (ss) Belgium and Poland signed a protocol on 14 April 2014, which is effective from 1 January 2019. This protocol modifies the rules for taxing dividends that a company resident in one country pays to a resident of the other country (effective from 1 January 2019).
- (tt) The 0% rate applies to dividends paid to the following:
- A Polish company that owns directly at least 10% of the capital of the Belgian company for a for an uninterrupted period of at least 24 months
 - A qualifying pension fund
- (uu) The 0% rate applies to interest on loans granted by banking enterprises, excluding loans represented by bearer securities, and to interest paid to qualifying pension funds.
- (vv) The 0% rate applies if the Rwanda company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months and does not enjoy the benefit of special measures to promote economic development.

- (ww) The lower rate applies if both of the following conditions are satisfied:
- The Rwanda company holds directly or indirectly at least 35% of the capital in the Belgian company.
 - The amount of the loan(s) granted by the Rwanda company does not exceed the amount of the equity of the Belgian company.
- (xx) The 0% rate applies if the San Marino company has owned directly at least 25% of the capital in the Belgian company continuously for at least 12 months. The 5% rate applies if the San Marino company has owned directly at least 10% but less than 25% of the capital in the Belgian company continuously for at least 12 months.
- (yy) The 0% rate applies if the company receiving the dividends holds shares representing directly at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months. The 5% rate applies if the company receiving the dividends holds directly at least 10% of the capital of the company paying the dividends.
- (zz) In the case of equipment leasing, the 5% rate is levied on 60% of the gross amount of the royalties.
- (aaa) The 0% rate applies to dividends paid to the following:
- A Swiss company that owns directly at least 10% of the capital of the Belgian company for an uninterrupted period of at least 12 months
 - A pension fund
- (bbb) The 0% rate applies to interest on loans and credits granted by a company and to interest paid to a pension fund.
- (ccc) The 10% rate applies to interest paid to a financial institution.
- (ddd) Under the protocol to the treaty, the rate is 5% dividends paid to Turkish companies provided that the dividends received by a Belgian company from a Turkish company are exempt, which is currently the case (the general participation exemption). Otherwise, the treaty rate is 15% if the Turkish company owns directly at least 10% of the capital of the Belgian company and 20% in other cases.
- (eee) The minimum holding requirement is 20%.
- (fff) The higher rate applies to copyright royalties (including royalties with respect to copyrights on films and certain other items).
- (ggg) The 0% rate applies to payments to financial institutions and public bodies.
- (hhh) The higher rate applies to dividends paid out of income derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempted from tax.
- (iii) The lower rate applies to dividends paid to the following:
- A company that holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months
 - A pension scheme (conditionally)
- (jii) The 0% rate applies to interest paid on loans or credits granted by an enterprise to another enterprise and to interest paid to pension funds.
- (kkk) The 0% rate applies if the United States company owns at least 80% of the voting power in the Belgian company for a 12-month period ending on the date on which the dividends are declared. The 5% rate applies if the United States company owns directly at least 10% of the voting power in the Belgian company.
- (lll) The 15% rate applies to interest on profit-sharing bonds.
- (mmm) The 0% rate applies to interest paid to pension funds in the context of administering or monitoring pension schemes.
- (nnn) The 5% rate applies if the Vietnamese company owns directly or indirectly at least 50% of the capital in the Belgian company. The 10% rate applies if the Vietnamese company owns directly or indirectly at least 25%, but less than 50%, of the capital of the in the Belgian company.
- (ooo) The 5% rate applies to royalties on patents and industrial and scientific know-how. The 10% rate applies to royalties on trademarks and commercial know-how.

G. New legislation

Important changes to the Belgian corporate tax law contained in new legislation are discussed below.

Reporting obligation for remunerations paid or attributed by foreign entities (mostly share-based incentive programs). As from 1 March 2019, Belgium introduced a withholding tax obligation for all Belgian employers with respect to remuneration paid or

granted by a foreign parent company or affiliate. Due to the filing dates, the reporting requirements will apply as from 1 January 2019.

Interest limitation rule. As part of the Belgian corporate tax reform, Belgium implemented the EU Anti-Tax Avoidance Directive (ATAD), which resulted in the introduction of a new interest limitation rule into Belgian legislation. The transposition of the interest limitation rule was initially scheduled for 2020. However, the entry into force of the interest limitation rule was brought forward to 2019 (financial years starting on or after 1 January 2019) in order to fully comply with the ATAD and to avoid potential action from the European Commission.

Under the new interest limitation rule, the tax deductibility of net interest charges is limited to the higher of the following:

- 30% of the taxable earnings before interest, taxes, depreciation and amortization (EBITDA) of the Belgian company/establishment.
- Minimum threshold of EUR3 million. The EUR3 million threshold is the total amount for all Belgian group companies/establishments and should be dividend proportionally between all the Belgian group companies/establishments based on an allocation key (determined by Royal Decree).

Controlled foreign companies. As of the 2019 income year, Belgium introduced new controlled foreign company (CFC) legislation, which targets artificial constructions set up with the essential purpose of obtaining a tax advantage (that is, when profit is shifted from a Belgian entity for the benefit of the CFC [for example, profit that the CFC obtained based on assets and risks owned or assumed by the CFC while the significant people functions related to those assets and risks are actually performed by the Belgian taxpayer]).

According to the new legislation, non-distributed profits realized by a CFC in the context of non-genuine arrangements (determined on a transfer-pricing basis — ATAD “Option B”) will be added to the tax base of the Belgian parent if it holds at least 50% of the CFC and if the CFC is subject to tax at a rate lower than 12.5%.

A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

B. Taxes on corporate income and gains

Bermuda does not impose income, withholding or capital gains taxes.

C. Fees and other taxes

Annual fee. An annual government fee, based on the assessable capital, is imposed on companies. The following is a schedule of the fees for exempted companies (see Section D).

Capital of company		Annual fee BMD
Exceeding BMD	Not exceeding BMD	
0	12,000	1,995
12,000	120,000	4,070
120,000	1,200,000	6,275
1,200,000	12,000,000	8,360
12,000,000	100,000,000	10,455
100,000,000	500,000,000	18,670
500,000,000	—	31,120

Certain types of entities are not subject to the annual fee described above. These entities are required to pay the following annual fees.

Entity	Annual fee (BMD)
Overseas (Permit) company whose principal business is Finance, insurance or operation of an open-end mutual fund	4,125

Entity	Annual fee (BMD)
Any other business	1,995
Exempt company parent of a wholly owned exempted company carrying on insurance business	1,995
Unit trust management company	2,905
Exempted and overseas partnerships	2,235
Segregated accounts companies	250

Payroll tax. Payroll tax is imposed on all employers on the remuneration paid in their business. Taxable remuneration equals the sum of wages, salaries and benefits paid in cash or in kind to employees for services rendered during the tax period.

For payroll tax compliance purposes, the fiscal year in Bermuda runs from 1 April through 31 March.

The Payroll Tax Amendment Act 2017 took effect on 1 April 2017. It increases the tax cap on gross earnings from BMD750,000 to BMD900,000, effective from 1 April 2017. It also changes the structure of the payroll tax into the following two separate portions:

- Employer portion
- Employee portion

These two portions must be calculated separately and reported by employers on the quarterly payroll tax returns. The sum of the two portions is the total payroll tax payable.

The employers remain responsible for the payment of both portions. However, they have the option of deducting the employee portion from employee remuneration in full or in part.

The employers are responsible for calculating the full employee portion regardless of whether they deduct it from the employees.

The following are the payroll tax rates for the employer portion, which are based on gross annual remuneration:

- Annual payroll greater than BMD1 million: 10.25%
- Annual payroll from BMD500,001 to BMD1 million: 9%
- Annual payroll from BMD200,000 to BMD500,000: 7%
- Annual payroll less than BMD200,000: 1.75%

Effective from 1 April 2017, the employee portion of payroll tax is a separate amount and must be calculated separately from the employer portion.

Although as noted above, employers have the option to deduct the employee portion of payroll tax from employee remuneration, the responsibility to pay the full amount of tax (employer and employee portions) to the Office of the Tax Commissioner still rests with the employers.

For the period of 1 July 2017 through 31 August 2018, the employee portion is calculated using the following marginal tax rate structure:

- On the first BMD48,000 of annual payroll: 4.75%
- On the next BMD48,000: 5.75%
- On the next BMD139,000: 7.75%
- Thereafter: 8.75%

Effective from 1 April 2018, the employee portion is calculated using the following marginal tax rate structure:

- On the first BMD48,000 of annual payroll: 4%
- On the next BMD48,000: 6.5%
- On the next BMD139,000: 7.75%
- Thereafter: 8.75%

Items exempt from the payroll tax base include employers' contributions to social insurance, the Hospital Insurance Plan, approved retirement plans, hospital and health schemes, life insurance schemes, and workers' compensation schemes.

Social security. All employers and employees must contribute to the national insurance scheme. The social insurance contribution rate is BMD71.84 per employee per week (based on a 52-week year). The cost is typically shared equally between the employee and the employer. As a result, BMD179.60 is generally deducted from each employee's monthly paycheck in a five-week month and BMD143.68 is deducted from each employee's monthly paycheck in a four-week month. This amount, together with the employer's matching contribution, is remitted to the Bermuda Social Insurance Department.

Incorporation fees. The Bermuda Monetary Authority charge for an application to register a company is BMD305. The government fee for registering a memorandum of association is BMD90.

Financial Services Tax. Effective from 1 April 2017, Financial Services Tax (FST) is imposed on the following financial services providers:

- Banks: 0.02% on consolidated gross assets at the end of a tax period
- Domestic insurers: 2.5% of gross premiums written in a tax period, excluding premiums relating solely to health insurance
- Money service businesses: 1% of aggregated income and outgoing money transmission volume in a tax period

For purposes of the FST, the tax period is each period of three calendar months beginning with the months of April, May and June 2017.

Every financial services provider subject to FST must within 30 days after the end of each tax period submit to the Office of the Tax Commissioner a return specifying the consolidated gross assets, gross premiums or aggregated income, and outgoing money transmission volume and pay the FST due with respect to that tax period.

General Services Tax. Under a proposal, a General Services Tax (GST) would be levied on turnover from the provision of most services by service providers to the public. It is proposed that the GST would be levied at a rate of 5%. This proposed tax would not be implemented until 1 April 2019, at the earliest. Notable exceptions to the GST would be in the sectors of banking, insurance and health care. Small service providers would also be exempt from GST.

D. Stamp duty

Stamp duty is charged on various legal instruments, including those detailed below.

Conveyance or transfer on sale of land or property. The following are the rates of stamp duty for the sale of Bermuda land or property:

- On the first BMD100,000 of the amount or value, or any part thereof: 2%
- On the next BMD400,000 of the amount or value, or any part thereof: 3%
- On the next BMD500,000 of the amount or value, or any part thereof: 4%
- On the next BMD500,000 of the amount or value or any part thereof: 6%
- Amount in excess of BMD1,500,000: 7%

For non-Bermuda property, the rate is 1%.

Lease or agreement for lease. If property is granted in consideration for rent, the following are the amounts of stamp duty:

Monthly amount or value in rent BMD	Stamp duty BMD
Under 1,200	75
1,200 or more but under 1,500	100
1,500 or more but under 2,500	150
2,500 or more but under 3,500	200
3,500 or more but under 5,000	300
5,000 or more	400

E. Miscellaneous matters

Types of companies. The limited liability company is the most common form of business entity in Bermuda. Limited liability companies may be local, exempted or permit, as described below.

Local companies. Local companies are required to have at least 60% of their issued share capital beneficially owned and controlled by Bermudians. Because this type of company is usually formed for the benefit of residents of Bermuda, the local companies may transact business worldwide or in Bermuda only.

Exempted companies. An exempted company is the most common form used by international businesses to transact business from Bermuda. Exempted companies are exempted from the requirement imposed on local companies that at least 60% of the equity be owned and controlled by Bermudians, as provided for by the Companies Act of 1981. In general, exempted companies may not compete with local companies in the Bermuda market nor own real estate in Bermuda. However, they may carry on business outside Bermuda or with other exempted undertakings in Bermuda. Examples of exempted companies include investment holding companies, trading companies, mutual fund companies, insurance companies and foreign sales corporations.

Permit overseas companies. Permit overseas companies are companies incorporated in jurisdictions other than Bermuda, but have a permit to transact business from Bermuda. Permits are obtained through a license granted by the Ministry of Finance. An example

of a permit overseas company is a ship-owning company that is incorporated and has ships registered in another country, but by permit conducts business from Bermuda.

Exempted Undertakings Tax Protection Act, 1966. Under the Exempted Undertakings Tax Protection Act, 1966, as amended, all exempted undertakings in Bermuda, such as exempted and permit companies, partnerships and unit trusts, may apply for an undertaking by the government that taxation introduced in Bermuda will not apply to the exempted company until 28 March 2016. Under a recent amendment to this act, the assurance of tax-neutrality is extended from 28 March 2016 until 31 March 2035 if proper application is made with the Registrar of Companies and if a fee of BMD160 is paid.

Foreign-exchange controls. Exempted companies and permit companies are designated as nonresident for exchange control purposes. The nonresident designation allows these entities to operate free of exchange control regulations and enables them, without reference to the Bermuda Monetary Authority, to make payments of dividends, distribute capital, open and maintain foreign bank accounts, maintain bank accounts in any currency and purchase securities. However, the issuance and transfer of shares and the change of beneficial ownership of shares in a Bermuda exempted company must be approved by the Bermuda Monetary Authority. The remittance and repatriation of funds by exempted companies and permit companies are not subject to exchange controls. Similarly, trust settlements on behalf of nonresidents are generally free from exchange controls. Under the Exchange Control Act 1972 and the Exchange Control Regulations 1973, certain exchange controls apply to Bermuda residents and to local companies. No capital or exchange control regulations apply to nonresidents.

The Bermuda dollar (BMD) is pegged to the US dollar at an equal exchange rate, and the two currencies are used interchangeably in Bermuda.

The Bermuda-dollar accounts of residents and local companies are subject to a 1% tax on the purchase of a foreign currency.

Transfer of shares. Although the consent of the Bermuda Monetary Authority is ordinarily required for the issue or transfer of any share or security, blanket permission for share issues and transfers may be granted, such as for publicly traded securities.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25
Withholding Tax (%) (b)	
Dividends	12.5
Interest	12.5
Royalties	12.5
Professional Services	12.5 (c)
Branch Remittance Tax	12.5
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (d)

(a) See Section B.

(b) A 12.5% withholding tax is imposed on all payments of Bolivian-source income to foreign beneficiaries (see Section B).

- (c) This withholding tax applies to services fees received for specified professional services, including consulting, expert services, and technical, commercial or other advice.
- (d) A Bolivian-source loss incurred in a year may be carried forward to offset taxable income derived in the following three years. Loss carryforwards are not subject to inflation adjustment. For the oil and mining production sector and new projects with a minimum capital investment of BOB1 million, the carryforward period is five years. On the reorganization of companies, the carryforward period is four years.

B. Taxes on corporate income and gains

Corporate income tax. Bolivian companies and foreign companies with permanent establishments in Bolivia are subject to income tax on their Bolivian-source income.

Rates of corporate tax. The standard rate of corporate income tax is 25%.

Mining operations. Act No. 535 (New Mining Code), dated 28 May 2014, confirms the additional rate of corporate income tax of 12.5% (previously established by Act. No. 3787, dated 24 November 2007). This additional rate applies to additional taxable profits resulting from favorable price conditions for minerals and metals. The following are significant aspects of this additional rate:

- The 12.5% tax rate applies if mineral and metal quotations are equal or higher than the base quotations established by law.
- The 12.5% tax does not apply to taxable profits attributable to sales that have lower quotations than the base quotations.

The tax referred to above must be paid on a monthly basis. The date of payment depends on the last digit of the Tax Identification Number. The monthly payments are considered advance payments of the tax determined at the end of the year. If the total of the advance payments is less than the amount determined at the end of the year, this difference must be paid. If the total of the advance payments exceeds the amount determined at the end of the year, the difference can be claimed as a tax credit against the standard corporate income tax for the year or the additional amount of corporate income tax for the following year.

Surtax. A 25% surtax is imposed on net income derived from mining, reduced by the following two special deductions:

- A percentage of up to 33%, which varies according to the type of business, of accumulated investment in exploration, development, assets that qualify for environmental incentives and environmental protection, which is directly related to mining extractive activities performed after the 1991 tax year.
- 45% of net income derived from non-renewable natural resource extractive activities. This deduction is limited to BOB275 million. This amount is to be adjusted annually to reflect changes in the Unidad de Fomento de Vivienda (UFV) for each extracting operation (the last update was in 1999). The UFV is an index published by the Statistics National Institute (INE) that reflects changes in Consumer Prices Index (IPC).

For mineral-producing companies, the net income for an extraction operation is the value of the commercialized product in the mining market.

Hydrocarbon Direct Tax. The Hydrocarbon Direct Tax is imposed at a rate of 32% on hydrocarbon production in oil wells located in Bolivia. The Hydrocarbon Direct Tax is calculated and paid in the same manner as the 18% royal prerogatives, which apply to all extractive fields. The 18% royal prerogatives consist of the following:

- A regional royal prerogative equal to 11% of the gross hydrocarbon production from oil wells, which is paid to the region where the hydrocarbons are produced
- A national royal prerogative equal to 1% of the gross hydrocarbon production, which is paid to Beni and Pando
- An amount equal to 6% of the gross hydrocarbon production in oil wells, which is paid to the National Treasury after the deduction of the necessary amounts for the management of the contracts

Capital gains. In general, capital gains are taxed in Bolivia. However, capital gains derived from transactions on the Bolivian Stock Exchange are exempt from tax.

Administration. The law specifies the following tax year-ends, which vary according to the type of business.

Business	Tax year-end
Industry (including oil and gas)	31 March
Agriculture and agribusiness	30 June
Mining	30 September
All other businesses	31 December

Annual tax returns and financial statements must be filed with the Internal Revenue Service (IRS) and income tax paid within 120 days after the end of the tax year. Advance payments are not required except for mining companies, which must make payments of income tax when they export minerals or metals.

Debts owed to and credits due from the state are adjusted to reflect changes in the UFV (see *Rates of corporate tax*).

Fines and interest charges apply to late tax payments and other non-compliance with tax obligations. The IRS publishes interest rates for late tax payments.

The tax code provides that fraud exists if a tax debt exceeds an amount equal to 10,000 UFV, calculated as of the date of determination of the fraud.

Under Act No. 812, dated 30 June 2016, the statute of limitation for tax audits is eight years.

The statute of limitation period may be increased by two years if the entity does not comply with the obligation to register or registers under a different tax regime.

Withholding taxes. Local entities, including Bolivian permanent establishments of foreign companies, that pay Bolivian-source income to foreign beneficiaries must withhold 12.5% of the amounts paid. For this purpose, Bolivian-source income includes all dividends, interest payments, branch remittances, royalties, professional service fees (includes consulting, expert services, and

technical, commercial or other advice), commissions and other income. In general, Bolivian-source income is income that is derived from assets located, placed or economically used in Bolivia, or from activities developed in Bolivia. This rule applies regardless of the nationality, address, or residence of the recipient of the income or the parties involved in the activities, or where the relevant contract is executed.

For dividends paid by Bolivian companies, the withholding tax is payable when the dividends are actually paid, remitted or credited. However, branch profits are deemed remitted when the corporate income tax return is due (120 days after the end of the tax year; see *Administration*).

Dividends. The 12.5% withholding tax on payments to foreign beneficiaries applies to dividends paid by Bolivian companies (see *Withholding taxes*). Dividends received from Bolivian companies subject to Bolivian corporate income tax are not taxed.

Foreign tax relief. The Bolivian tax code does not provide foreign tax relief.

C. Determination of taxable income

General. Taxable income is the income reported in the companies' financial statements prepared in accordance with generally accepted accounting principles in Bolivia, subject to certain adjustments for tax purposes. In general, all expenses necessary to generate income and to maintain the existence of the company (for example, contributions to regulatory-supervisory organizations, contributions for social benefits and certain national and municipal taxes) are deductible. Donations and other gratuitous transfers to nonprofit organizations that are exempt from income tax may be deducted up to a maximum limit of 10% of taxable income derived in the year of the donation or gratuitous transfer.

Certain expenses are not deductible, including the following:

- Personal withdrawals by owners or partners
- Corporate income tax
- Bonuses and other benefits that are not paid to employees within the time period in which the annual form must be presented for the year of payment
- Interest paid to related parties, to the extent it exceeds, for foreign loans, the London Interbank Offered Rate, plus 3%, or, for local loans, the official lending rate. In addition, interest paid to related parties may not exceed 30% of the interest paid to third parties

Royalties paid with respect to mining activities are creditable or deductible, depending on the price of the minerals and subject to certain limits established by law.

Revenue and expenses are reflected in the year they are accrued.

Documentation for deduction of expenses. To deduct expenses in an amount of BOB50,000 or greater, the taxpayer must have payment supports issued by a financial intermediation entity regulated by the Authority of Supervision of the Financial System

(Autoridad de Supervisión del Sistema Financiero, or ASFI). These documents must have the following information:

- Financial institution (issuer) business name
- Transaction or operation number
- Transaction date
- Transaction amount

In June 2015, the IRS issued Normative Resolution No. 10-0017-15, which states that payment supports of transactions equal or greater than BOB50,000 (the Banking Report) must be prepared on an annual basis and must be sent to the IRS between the fifth and ninth day of the following February; the due date depends on the last digit of the taxpayer's Tax Identification Number. Until June 2015, these reports were filed on a monthly basis. Exceptionally for the period from July 2015 to December 2015, the Banking Report must cover a semester (six-month) period. For 2016 and subsequent years, the Banking Report must be prepared for the entire year.

Inventories. Inventories are valued at the lower of market value or replacement cost.

Provisions. Provisions and reserves are not deductible for tax purposes, with the exception of the following:

- Technical reserves in insurance companies
- Mandatory provisions for financial entities
- Severance provisions
- Bad debt provisions
- Provisions for environmental restoration

To claim deductions, certain conditions must be satisfied.

Depreciation and amortization. Fixed assets are generally depreciated using the straight-line method at rates specified by law. The following are some of the annual depreciation rates.

Assets	Rate (%)
Buildings	2.5
Machinery, equipment and installations	12.5
Vehicles	20
Furniture and office equipment	10
Computer equipment	25

Trademarks and similar intangible assets may be amortized in five years if they are valued using the purchase price.

Depreciation charges resulting from changes in value based on professional appraisals carried out after 31 December 1994 are not deductible for tax purposes.

Groups of companies. Groups of companies may not file consolidated returns in Bolivia.

Relief for losses. A Bolivian-source loss incurred in a year may be carried forward to offset taxable income derived in the following three years. Loss carryforwards are not subject to inflation adjustment. For the oil and mining production sector and new projects with a minimum capital investment of BOB1 million, the carryforward period is five years. On the reorganization of companies, the carryforward period is four years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), on all sales of goods and services and on imports; VAT on capital goods imported by companies in the agriculture and cattle raising industries and non-extractive industries that will be used to produce goods for export may be deferred for up to 3 years if an advance payment of 10% is made	13%
Transactions Tax, on gross revenue; corporate income tax from the preceding year may be credited against Transactions Tax; sales of a limited liability partnership's capital quota are exempt	3%
Real estate tax, imposed annually on the assigned value of real property and vehicles	Various
Excise tax, on the production or importation of specified goods	
Beer	BOB3.73 per liter plus 1%
Wine	BOB3.43 per liter plus 5%
Tobacco products; rate applied on the price	50% to 55%
Vehicles; rate applied on the price	5% to 50%
Special Tax on Hydrocarbons and Derived Products; prices that include the tax rate as of December 2018	
Vehicular natural gas	BOB1.66 per cubic meter
Petroleum liquid gas	BOB2.25 per kilogram
Special gasoline	BOB3.74 per liter
Premium gasoline	BOB4.79 per liter
Aviation gasoline	BOB4.57 per liter
Kerosene	BOB2.72 per liter
National jet fuel	BOB2.77 per liter
Fuel oil	BOB3.72 per liter
Mining royalty; imposed on gross revenue; rates vary according to the type of mineral	Various
Financial Transactions Tax (ITF); imposed on the amounts of debits and credits to savings and checking accounts; ITF is not deductible for purposes of any other tax; the ITF Act was effective from 13 April 2012 for a period of three years; however, in July 2015, the Bolivian government issued Act No. 713, which extended the term of the ITF until 31 December 2018 and introduced increasing rates for each year; certain items are exempt including transactions regarding savings accounts in US dollars	

Nature of tax	Rate
if the available balance is not greater than USD2,000, savings accounts in local currency or in UFV, securities transactions and payments resulting from foreign remittances; tax is withheld by banks and other financial institutions and other entities carrying out transactions in payment system; rates under Act No. 713	
2015	0.15%
2016	0.20%
2017	0.25%
2018	0.30%
(It is expected that at the end of December 2018, the Bolivian government will again extend the term of the ITF and the rate could change.)	
Additional financial aliquot (tax rate) for corporate income tax; applicable to banking and nonbanking institutions regulated by the ASFI; tax applicable if return on equity exceeds 6%; tax is neither offsettable nor deductible	25%
Social security contributions	
Employer	
Health care; on monthly gross revenue per employee	10%
Housing fund; on monthly gross revenue per employee	2%
Professional risk insurance; on monthly gross revenue per employee	1.71%
Solidarity Fund	3%
Solidarity Fund for mining entities	2%
Employees	
Retirement fund	10%
Common risk insurance	1.71%
Solidarity Fund (fixed contribution)	0.5%
Solidarity Fund (variable and cumulative contribution)	
Difference between the total salary and BOB35,000	10%
Difference between the total salary and BOB25,000	5%
Difference between the total salary and BOB13,000	1%
Christmas bonus (Aguinaldo); general paid between 1 December and 20 December each year; if employment is less than a year, the bonus is reduced pro rata	One month's salary
Second Christmas bonus (second Aguinaldo); must be paid if Bolivian gross domestic product increases by more than 4.5%	One month's salary
Termination compensation; bonus for termination of employment; amount depends on length of employment and whether the employee was fired or resigned	Various

E. Miscellaneous matters

Foreign-exchange controls. The Bolivian currency is the boliviano (BOB).

No restrictions are imposed on foreign-exchange transactions, including the repatriation of capital and the remittance of dividends and royalties abroad. A system of free-floating exchange rates exists in Bolivia. No special registration requirements apply to foreign investment.

The current exchange rate is BOB6.96 = USD1.

Transfer pricing. In July 2014, Act No. 549 introduced a transfer-pricing regime in Bolivia, effective from the 2015 fiscal year. Under this regime, commercial and/or financial transactions performed between related parties must be valued using the arm's-length principle. The transactions must be valued as if they were performed between unrelated parties in comparable markets.

The following methods may be used to value transactions between related parties:

- Comparable uncontrolled price
- Resale price
- Cost-plus
- Profit-split
- Transactional net margin
- Notorious price in transparent markets (applicable to the import or export of commodities)

For this purpose, the IRS may verify if the transactions are valued according to the above methods and make any adjustments or revaluation if the agreed value, regardless of the adopted legal form, does not conform to the economic reality or causes lower taxation in Bolivia.

In April 2015, the IRS issued Normative Resolution No. 10-008-15, which imposes the following obligations:

- If annual operations with related parties are greater than BOB15 million (USD2,155,172), a transfer-pricing study and Form No. 601 must be delivered to the IRS.
- If annual operations with related parties are between BOB7,500,000 (USD1,077,586) and BOB15 million (USD2,155,172), only Form No. 601 must be delivered to the IRS.
- If annual operations with related parties are less than BOB7,500,000 (USD1,077,586), the company must retain information to demonstrate that the operations were made at market values.

In January 2017, the IRS issued Normative Resolution No. 101700000001, which establishes a tax-haven list that includes 76 "low tax countries and regions." This list was updated in March 2018 by Normative Resolution No. 101800000006, and now includes 82 "low tax countries and regions." Parties from these jurisdictions must be considered related parties if any commercial or financial transaction occurs with them.

Reorganizations. Profits arising from company reorganizations, which are mergers, divisions or transformations, are not subject

to corporate income tax. Regulations on reorganizations are expected to be issued in the near future.

F. Tax treaties

Bolivia has entered into tax treaties with Argentina, France, Germany, Spain, Sweden and the United Kingdom. It has also signed the Andean Pact, which includes a tax treaty, with Colombia, Ecuador and Peru. However, the government is reviewing these treaties to determine whether they accomplish new government policies. As a result, these treaties may be ratified or revoked.

On December 2017, Normative Resolution No. 1017000030 implemented a procedure and requirements for applying tax-treaty benefits. The Tax Residence Certificate of the foreign company must be obtained, and the local company must report transactions subject to any benefit to the tax authority through the applicable web page.

Bonaire, Sint Eustatius and Saba (BES-Islands; extraordinary overseas municipalities of the Netherlands)

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. A new tax regime applies to the BES-Islands, effective from 1 January 2011. The following chapter provides information on taxation in the BES-Islands only. Chapters on Curaçao and Sint Maarten appear in this guide.

A. At a glance

Profit Tax	– (a)
Capital Gains Tax	– (a)
Real Estate Tax Rate (%)	10/17.5 (b)
Yield Tax Rate (%)	5 (c)

- (a) The BES-Islands do not have a profit tax or capital gains tax.
- (b) The profit is fixed at 4% of the fair market value of the real estate. The standard rate of the real estate tax is 17.5% of the fixed profit. Consequently, in principle, the effective annual tax rate is 0.7% of the fair market value of the real estate. A reduced rate of 10% applies to hotels, unless the hotel is owned by an individual. Consequently, the effective annual tax rate with respect to hotels is 0.4%. This real estate tax applies if an entity using the real estate, by virtue of ownership, possession or a limited right, is deemed to be resident in the BES-Islands. If the entity is deemed to be resident in the Netherlands, the Dutch corporate income tax and the Dutch dividend withholding tax apply instead. For further details, see Section B.
- (c) This tax applies if the entity from which distributions of profits are derived is deemed to be resident in the BES-Islands. If the entity is deemed to be resident in the Netherlands, the Dutch corporate income tax and the Dutch dividend withholding tax apply instead. For further details, see Section B.

B. Taxes on corporate income and gains

New BES-Islands tax regime. Effective from 1 January 2011, a new tax regime applies in the BES-Islands. This tax regime does not include a profit tax. A yield tax and a real estate tax have been introduced in the BES-Islands to replace the profit tax.

Residency fiction. The yield tax and real estate tax mentioned above are not automatically applicable as a result of a residency fiction. In principle, all entities established on the BES-Islands are deemed to be established in the Netherlands for tax purposes and accordingly subject to Dutch corporate income tax (up to 25%) and Dutch dividend withholding tax (in principle, 15%). For details on the Dutch taxes, see the chapter on the Netherlands in this guide.

However, on request, entities that have sufficient nexus with the BES-Islands may be subject to the fiscal system of the BES-Islands. In such case, no Dutch corporate income tax applies, but the yield tax and real estate tax apply. Entities are deemed to have sufficient nexus with the BES-Islands if any of the following circumstances exist:

- The entity is a foundation or trust that is a resident of the BES-Islands.
- The entity has been admitted to a special trade and service depot.
- On request, the entity has obtained a ruling from the tax authorities that, for tax purposes, the entity is deemed to be a resident of the BES-Islands. A request for such a ruling should be made with the tax authorities within six months after the beginning of the calendar year.

The ruling referred to above is issued in the following cases:

- The assets of the entity in the BES-Islands consist of less than 50% of mobile assets, including, among other portfolio investments, participations and cash.

- An entity that does not meet the requirement above can still obtain a ruling if it employs at least three residents of the BES-Islands that manage the entity's assets and if it has at its disposal business premises in the BES-Islands for a period of at least 24 months with a value of at least USD50,000.
- The entity is a holding company that holds at least 95% of the shares in an entity that is admitted to a special trade and service depot or already has obtained such a ruling.
- The entity has a small business with a turnover of no more than USD80,000, the assets of the company in general do not exceed USD200,000, and the company does not carry out financial services, insurance or trust (fiduciary) activities.

Yield tax. The yield tax is levied on distributions (in whatever form) of profits by entities resident in the BES-Islands. The rate of the yield tax is 5%. The entity making the distribution acts as withholding agent. Interest and royalty payments are not subject to the yield tax. The yield tax is not levied on the remittances of profits by branches to their foreign head offices.

Real estate tax. The real estate tax is levied on gains derived from real estate located in the BES-Islands. The real estate tax is levied on a taxpayer (person or entity) that, at the beginning of the year, has the use of real estate by virtue of ownership, possession or a limited right.

The profit is fixed at 4% of the fair market value of the real estate. The rate of the real estate tax is 17.5% of the fixed profit. Consequently, the effective annual tax rate is 0.7% of the fair market value of the real estate. A reduced rate of 10% applies to hotels, unless the hotel is owned by an individual. Consequently, the effective annual tax rate with respect to hotels is 0.4%. The value of the real estate is determined by the Tax Inspector. The value is set at the beginning of the period for which the value is determined and is in principle determined for five consecutive calendar years.

Real estate tax is not levied on owner-occupied homes, real estate included in the business assets of a privately run enterprise (that is not operating in the form of an entity) and real estate with a value of less than USD50,000, if the person having use of the real estate is a resident of the BES-Islands.

In addition, entities that are deemed to be residents of the Netherlands (see *Residency fiction*) are exempt from real estate tax.

Administration

Real estate tax. The real estate tax is levied over a period of one calendar year. The Tax Inspector imposes a tax assessment, and the filing of a tax return is not required.

Yield tax. The withholding agent must withhold the yield tax at the time the profit distribution is put at the disposal of the recipient. The withholding agent must file a quarterly tax return and remit the yield tax due within 15 days after the end of the quarter. The tax return does not need to be filed for periods in which no distributions take place.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
General expenditure tax; levied on the delivery of manufactured goods in the BES-Islands by a manufacturer as part of its business, on the rendering of services in the BES-Islands by an entrepreneur as part of its business and on imports of goods	
Bonaire	
Delivery of goods (different rates apply to passenger cars)	8
Insurance	7
Other taxable activities	6
St. Eustatius and Saba	
Delivery of goods (different rates apply to passenger cars)	6
Insurance	5
Other taxable activities	4
Real estate transfer tax	5
Customs duties	0

D. Tax treaties

The Dutch treaty network does not apply to entities deemed to be residents of the BES-Islands. However, the Dutch standard treaty does not exclude entities deemed to be residents of the Netherlands (by the residency fiction) from the application of the treaty.

Provisions for double tax relief are included in the Tax Regulation for the Netherlands. Under a measure in the Tax Regulation for the Netherlands, on request, dividend distributions by a qualifying Dutch subsidiary to its BES-Islands parent company can be exempt from Dutch dividend withholding tax.

A. At a glance

Corporate Income Tax Rate (%)	22 (a)
Capital Gains Tax Rate (%)	22 (b)
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	7.5
Interest	15
Royalties	15
Management and Technical Fees	15
Payments under Construction Contracts	3 (c)
Brokerage Commission	10 (d)
Rent Paid for Use of Buildings and Land	5 (d)
Purchases of Livestock	4 (e)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) For approved manufacturing companies, the rate is 15%.
 (b) See Section B.
 (c) This tax is imposed on gross receipts derived from construction contracts. This tax is an advance payment that may be offset against the actual tax due.
 (d) This tax is an advance payment that may be offset against the actual tax due.
 (e) This withholding tax applies to payments for purchases of livestock for slaughter or for feeding for slaughter.

B. Taxes on corporate income and gains

Corporate income tax. All companies operating in Botswana are subject to tax on earnings in Botswana.

Rates of corporate tax. The corporate tax rate for companies other than manufacturing companies is 22%. Approved manufacturing companies are subject to tax at a reduced tax rate of 15%.

The tax rate for a branch is 30%. Botswana does not impose a branch remittance tax.

International Financial Services Centre (IFSC) companies (as defined) are taxed at a rate of 15%.

Diamond-mining companies are taxed in accordance with tax agreements entered into by the companies with the government. Other mining companies are taxed at a rate of 22% or at a rate determined by a formula, whichever is higher. The following is the formula:

$$x = \frac{70 - \frac{1,500}{x}}{\frac{\text{Taxable income}}{\text{Gross income}}} \times 100$$

Capital gains. The capital gains tax applies to gains on the sale of capital assets of a business carried on in Botswana and on the sale of corporate shares and debentures of private companies.

For computing gains on sales of immovable property acquired before 1 July 1982, the cost of acquisition and improvements is first increased by a 10% rate, compounded for each complete 12-month period from the date of acquisition to 1 July 1982. It is then indexed for inflation from 1 July 1982 to the date of sale. For computing gains on immovable property acquired on or after 1 July 1982, the cost of acquisition and improvements is indexed for inflation during the period of ownership.

Only 75% of the gain derived from the sale of shares is subject to capital gains tax. Gains on the sale of shares held for at least one year that are listed on the Botswana Stock Exchange are exempt from capital gains tax if the shares are actually traded on the Botswana Stock Exchange or if the company has released for trading 49% or more of its equity shares on the Botswana Stock Exchange. Sales of shares in IFSC companies are exempt from capital gains tax.

Taxable capital gains are subject to tax at a rate of 22% for resident companies and 30% for nonresident companies.

Administration. The tax year ends on 30 June. Companies are taxed on the profits reported in their latest completed accounting period.

Under an advance payment of tax and self-assessment system, companies must estimate their tax in advance and pay the estimated tax in four equal quarterly installments. The first payment is due three months after the beginning of the accounting period and the subsequent payments are due at the end of every subsequent three-month period. Tax returns must be filed, and any balance of tax due must be paid, within four months of the end of the tax year,

or in the case of a company with an accounting period that is different from the tax year, within four months from the end of such accounting period. Underpayments and late payments are subject to interest at a rate of 1.5% per month or part of a month (compounded).

Dividends. A withholding tax of 7.5% is imposed on dividends paid to residents and nonresidents. It is a final tax.

Dividends distributed by investment or similar companies are exempt from tax if they are paid out of dividends received that suffered withholding tax.

C. Determination of trading income

General. Taxable income is net income reported in the financial statements, modified by certain provisions of the tax law. Expenses are deductible to the extent incurred in producing assessable income.

The rules for determining taxable income for an IFSC company are different from those for a normal company.

Collective-investment undertakings (as defined) are subject to tax on their undistributed income only.

Inventories. For tax purposes, inventory is valued at the lower of cost or net realizable value.

Provisions. Specific identifiable provisions are allowable for tax purposes; general provisions are not allowed.

Depreciation. Depreciation is computed using the straight-line method. Official rates vary according to the type of asset. The following are some of the official straight-line rates.

Asset	Rate (%)
Industrial buildings	2.5*
Commercial buildings	2.5
Office equipment	10
Motor vehicles	25
Plant and machinery	15 to 25

* An initial allowance of 25% is also granted.

Capital allowances are subject to recapture on the sale of an asset to the extent that the sales proceeds exceed the tax value after depreciation.

Mining companies may deduct 100% of their mining capital expenditure (as defined) in the year in which the expenditure is incurred.

Relief for losses. In general, tax losses may be carried forward for five years. Mining and prospecting losses may be carried forward indefinitely.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on almost all supplies of goods and services consumed in Botswana	12

Nature of tax	Rate (%)
Capital transfer tax, paid by the recipient on all gratuitous receipts of property, corporate shares and inheritances, less allowable deductions	12.5

E. Miscellaneous matters

Foreign-exchange controls. No foreign-exchange controls are imposed in Botswana. However, certain forms must be completed for statistical purposes.

Transfer pricing. Botswana introduced transfer-pricing legislation in December 2018. The effective date of the legislation has not yet been announced, and the transfer-pricing regulations are still to be published.

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %	Management and technical fees %
Barbados	5/7.5 (e)	10	10	10 (f)
France	5/7.5 (a)	10	10	7.5
India	10 (c)	10	10	10
Mauritius	5/7.5 (b)	12	12.5	15
Mozambique	10/12 (c)	10	10	10
Namibia	10 (c)	10	10	15
Russian Federation	5/10 (i)	10	10	10
Seychelles	5/7.5 (g)	7.5	10	10
South Africa	10 (c)	10	10	10
Sweden	7.5 (d)	15 (d)	15 (d)	15
United Kingdom	5/7.5 (h)	10	10	7.5
Zimbabwe	5/7.5 (g)	10	10	10
Non-treaty jurisdictions	7.5	15	15	15

- (a) The 5% rate applies if the recipient is a company that holds at least 25% of the share capital of the payer.
- (b) The 5% rate applies if the recipient holds at least 25% of the shares of the payer.
- (c) The domestic rate of 7.5% applies because the treaty rate is higher than the domestic rate.
- (d) If a lower rate is negotiated with any other state in a future treaty, such rate also applies under the Sweden treaty.
- (e) The 5% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 7.5% rate applies in all other cases.
- (f) If a lower rate is negotiated with any other state in a future treaty, such rate also applies under the Barbados treaty.
- (g) The 5% rate applies if the recipient is a company that holds at least 25% of the capital of the payer of the dividends. The 7.5% rate applies in all other cases.
- (h) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 25% of the voting power in the company paying the dividends. The 7.5% rate applies in all other cases.
- (i) The 5% rate applies if the recipient holds at least 25% of the shares of the payer. A 7.5% rate applies in all other cases (although the treaty provides for a 10% rate in all other cases, the domestic rate of 7.5% applies because it is lower than the treaty rate of 10%).

Carryforward	Unlimited (i)

- (a) A 10% surtax is also levied (see Section B). As detailed in Section B, a Social Contribution Tax (SCT) is also imposed at the general rate of 9%. In view of the surtax and the SCT, the corporate income tax (CIT) rate in Brazil is generally considered to be 34%.
- (b) Under Law 13,259/16, which applies to capital gains derived by Brazilian individuals, effective from 2017, the capital gains tax rate is increased from a 15% flat rate to a progressive rate system with rates ranging from 15% to 22.5%. According to Normative Instruction 1732/17, such increased rates also apply to capital gains derived by nonresident companies and individuals. A 25% rate applies to nonresidents located in low-tax jurisdictions.
- (c) The withholding tax is imposed on payments, credits, deliveries or remittances abroad, and on the use of amounts in Brazil for the benefit of nonresidents.
- (d) The withholding tax rate may increase to 25% if the recipient is resident in a blacklisted jurisdiction, which means a jurisdiction that taxes income at a rate lower than 20% (or 17% if the jurisdiction or regime complies with the international standards of tax transparency) and/or the jurisdiction's legislation does not allow access to information on the shareholders of legal entities or on the effective beneficiaries of income of nonresidents.
- (e) A 10% Contribution for Intervention in the Economic Domain (Contribuição de Intervenção no Domínio Econômico, or CIDE) is imposed on royalties and on technical and administrative service payments. CIDE is payable by the Brazilian payer, and it is not a withholding tax.
- (f) The withholding tax rate may increase to 25%, depending on the type of service rendered.
- (g) Based on interpretations of tax treaties by the Brazilian tax authorities, it may be possible to claim that withholding income tax is not due on payments for technical services to Austria, Finland, France, Japan and Sweden.
- (h) Imports of services generally also trigger the Social Integration Program (PIS) tax and the Social Security Financing Contribution (COFINS), at a combined rate of 9.25%, as well as the Municipal Tax on Services (ISS), which is imposed at rates ranging from 2% to 5%, depending on the municipality and the service.
- (i) For details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. Brazilian resident companies are subject to CIT on their worldwide income. Companies resident in Brazil are those incorporated under the Brazilian laws and managed in Brazil.

Foreign branches, agencies or representative offices of Brazilian companies are also subject to Brazilian tax on their income earned overseas. In general, foreign-source losses may not offset Brazilian-source income. A foreign tax credit is available (see *Foreign tax relief*).

In addition to CIT, SCT is imposed on worldwide income (see *Rates of tax*).

Rates of tax

Corporate income tax. The basic rate of CIT is 15%, increased by a surtax of 10% on annual taxable profits exceeding BRL240,000 (approximately USD62,000).

Exemption from, or reduction of, CIT is granted to businesses in certain underdeveloped areas.

Social Contribution Tax. SCT is levied at a general rate of 9%. For financial institutions, private insurance companies and capitalization companies, the SCT rate was 20% until 2018, while for credit unions, the SCT rate was 17% until 2018. Such increased rates are reduced to 15% as of 2019.

SCT is not deductible in calculating CIT. The tax bases for SCT and CIT are basically the same. The total effective tax rate on corporate profits is 34% (25% CIT [including the 10% surtax] plus 9% SCT).

Losses for SCT purposes are subject to the same tax rules applicable to losses for CIT purposes.

Capital gains. Capital gains are treated as ordinary income for Brazilian resident companies and, accordingly, are subject to CIT and SCT.

Capital gains derived by nonresidents on shares and other assets located in Brazil are subject to capital gains tax at progressive rates ranging from 15% to 22.5%.

Such increased rates result from Law 13,259/16, which refers only to the capital gains tax rate for Brazilian individuals but is generally applied to nonresident companies and individuals. In Normative Instruction 1732/17, the Brazilian tax authorities confirmed their understanding that the progressive rates also apply to nonresidents.

A 25% rate applies to nonresidents located in blacklisted jurisdictions.

Administration

Filing and payment. The fiscal year is the calendar year. In general, companies must file returns in an electronic format by the last working day of July of the following year. Extensions to file returns are generally not available.

Effective from the 2014 calendar year, income tax returns were replaced by a new electronic filing called Escrituração Contábil-Fiscal (ECF), which must be submitted to by the end of July of the following calendar year.

Companies may elect to pay CIT and SCT on an annual or quarterly basis. In general, this election may not be changed during the calendar year. Companies that elect the annual basis must make advance monthly payments of CIT and SCT. The advance payments are equal to the income tax applicable to either the company's actual taxable income or the company's income calculated in accordance with an estimated method, whichever is lower.

For monthly payments of CIT that are calculated based on the estimated method, the tax base is generally 8% of the company's

gross income. Different percentages apply to specific industries, such as the following:

- 16% for financial institutions and transportation services
- 32% for services in general
- 1.6% for gas distribution

For the purpose of computing the advance income tax payments, the applicable rate is 15%. An additional 10% rate is applied to monthly taxable income in excess of BRL20,000 (approximately USD5,200).

The tax base for monthly estimated payments of SCT is generally 12% of gross income plus capital gains and other income, including financial income. This percentage is increased to 32% for service companies. SCT payments must be made at the same time as the income tax payments. The applicable tax rate is generally 9%.

The difference between the tax shown on the annual tax return and the amounts paid in advance must be paid by the last working day of March following the end of the fiscal year. If the amounts paid in advance exceed the tax shown on the annual tax return, the excess may be used to offset the tax due in a month following the fiscal year-end. A refund may be requested from the tax authorities within five years of the tax payment.

Alternatively, companies may pay tax quarterly based on actual quarterly income, computed under the accrual method.

Interest and penalties for late payments. The late payment of taxes is generally subject to the following:

- Interest calculated at the rate applicable to the Special Liquidation and Custody System (Sistema Especial de Liquidação e Custódia, or SELIC), which is published each month by the government
- A daily fine of 0.33% of the tax due, up to a maximum penalty of 20% of the tax due (excluding interest)

In general, assessments resulting from a tax audit are subject to a penalty of 75% on the tax due. The penalty increases to 150% in the case of fraud. These penalties can be reduced by 50% if the payment is made by the last day of the appeal period (other penalty reductions are available during the appeal process). In such case, the effective penalty is 37.5%.

Dividends. Withholding tax is not imposed on dividends paid to residents and nonresidents out of profits generated on or after 1 January 1996.

For earnings recognized in 2014, the excess of dividends paid based on the statutory financial statements over the dividends determined under a “tax balance sheet” is subject to tax. A 15% withholding tax applies to such excess dividends paid to nonresidents. Dividends generated before 2014 are not subject to tax even if they are in excess of the dividends determined under the “tax balance sheet.” Dividends generated after 2014 are not subject to tax because the concept of “tax balance sheet” has ceased to exist.

Brazilian companies are allowed to pay a “deductible dividend,” which is called interest on net equity (INE), to their shareholders. INE is calculated by applying a benchmark interest rate called Taxa de Juros de Longo Prazo (TJLP) to the net equity of the

Brazilian company, followed by certain adjustments provided by the tax law. INE is treated as deductible interest for tax purposes, which is subject to a 15% withholding tax when paid to residents and nonresidents. A 25% rate applies to nonresidents located in blacklisted jurisdictions. Payments to Brazilian residents are fully taxable and are also subject to the PIS tax and the COFINS. (For details regarding the PIS tax and COFINS, see Section D.)

Foreign tax relief. A foreign tax credit is available to Brazilian companies on income taxes paid overseas. In general, the foreign tax credit is limited to the amount of Brazilian CIT and SCT on the foreign-source income. Compliance with certain formalities is required to support the foreign tax credit.

C. Determination of taxable income

General. CIT and SCT are due on a company's taxable income, which is the net book income, as adjusted by the tax law. In general, operating expenses are deductible if the following conditions are satisfied: they are necessary, usual and common to the company's activity; they are actually incurred; and they are supported by proper documentation. However, the following expenses, among others, are not deductible:

- Expenses related to fixed assets, including financial and operating lease payments, depreciation and amortization, if the assets are not directly used in the production or commercialization of products and services.
- Fringe benefits furnished to shareholders and officers if the beneficiaries are not identified and individualized (a 35% [effective rate of 53.84%] withholding tax is imposed on such payments). Neither the fringe benefits nor the withholding tax is deductible.
- Donations in general, gifts and other non-compulsory payments.

Simplified methods are available for calculating the tax liability applicable to small businesses.

Inventories. Companies that have an integrated cost system must value inventory for tax purposes at the lower of cost or market value, using either the average cost or the first-in, first-out (FIFO) method. Direct cost and last-in, first-out (LIFO) methods cannot be used. In general, companies that do not have an integrated cost system must value finished products at 70% of the highest sales price of the product sold in the tax period. Work-in-process must be valued at either 80% of the finished product cost or 1.5 times the highest cost of the material content. Supermarkets and similar enterprises that sell a large number of goods may use a specific system for inventory valuation based on periodic and simplified counting.

Provisions. In general, the only deductible provisions are those for vacation pay and the 13th month salary (annual bonus).

Depreciation. Fixed assets may be depreciated using the straight-line method at rates provided by the Brazilian tax authorities. The following are some of the annual depreciation rates:

- Real estate assets: 4%
- Machinery and equipment: 10%
- Vehicles: 20%
- Computer hardware and software: 20%

Companies that operate two work shifts per day may depreciate machinery and equipment at 1.5 times the normal rate. If the company operates three shifts, it may double the normal rate.

For accounting purposes, companies may calculate depreciation at different rates (taking into account International Financial Reporting Standards [IFRS] criteria, which can affect, in addition to depreciation rates, inventory and other items).

Tax losses. Tax losses may be carried forward indefinitely, but can only offset up to 30% of the company's taxable income for a tax period. No carryback is allowed.

Tax losses may be jeopardized if a company experiences a change in business activity and ownership control between the period in which losses were generated and the period in which losses would otherwise be used to offset taxable income. In general, non-operating tax losses can be offset only against non-operating gains if certain conditions are met. In a corporate restructuring involving a merger, the tax losses of the merged company must be forgone.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
State value-added tax (ICMS)	0 to 25
General rate for intrastate transactions	17/20
General rate for interstate transactions	12
General rate for interstate resale transactions involving imported goods	4
Transactions in which taxpayers located in the South or Southeast (except for Espírito Santo State) regions that remit goods and services taxable under ICMS to taxpayers resident in the states of the North, Northeast or Centre-West regions or Espírito Santo State	7
Exports	Exempt
Federal value-added tax (IPI); the top rate applies to luxury or superfluous goods, such as alcoholic beverages and cigarettes	0 to 330
Tax on Financial Operations (IOF); imposed on credit transactions, foreign-exchange transactions, insurance operations and financial investments	
Loan operations	
Daily rate (maximum annual rate of 1.5%)	0.0041
Additional rate	0.38
Foreign-exchange transactions	0.38 to 6.38
Insurance operations	0.38 to 7.38
Financial investments	Various
Social Integration Program (PIS) tax; levied on gross income at a rate of 1.65%; the tax is a non-cumulative (VAT-type) tax for certain taxpayers; under the non-cumulative regime, some companies are subject to the "single-phase" regime, with the manufacturer being responsible for the contribution collection, usually at a higher rate	

Nature of tax	Rate (%)
(2.1% for pharmaceuticals; 2.2% cosmetics and 2.3% auto parts); certain companies, including local financial institutions and companies that manufacture goods in the Manaus Free Trade Zone, are subject to the cumulative regime and make the contribution at a 0.65% rate; the tax is also levied on imports of goods at a rate of 2.1% and on services at a rate of 1.65%, in most cases; however, for certain imported goods, different rates apply; in certain cases, the rate is reduced to 0%	0/0.65/1.65/2.1 to 3.52
Social Security Financing Contribution (COFINS); levied on gross income at a rate of 7.6%; the tax is a non-cumulative (VAT-type) tax for certain taxpayers; under the non-cumulative regime, some companies are subject to the "single-phase" regime, with the manufacturer being responsible for the contribution collection, usually at a higher rate (9.9% for pharmaceuticals; 10.3% for cosmetics and 10.8% for auto parts); certain companies, including local financial institutions and companies that manufacture goods in the Manaus Free Trade Zone, are subject to the cumulative regime and make the contribution at a 3% rate; the tax is also levied on imports of goods at a rate of 9.65% and on services at a rate of 7.6%, in most cases; however, for certain imported goods, different rates apply; in certain cases, the rate is reduced to 0%	0/3/7.6/9.65 to 16.48
Municipal Tax on Services (ISS)	2 to 5
Social security contributions (INSS), on monthly salary; paid by	
Employer	Approximately 28.8
Employee; rate varies depending on amount of remuneration (amount of employee contribution may not exceed BRL621.04 [approximately USD160] a month)	8 to 11
Severance Pay Indemnity Fund (FGTS), on monthly salary	8
Withholding tax on local payments of professional service fees (creditable by the recipient against income tax)	Up to 27.5
Contribution for development of cinematographic and video phonographic works (Condecine); in general, tax rate applied to amounts paid to producers, distributors and intermediaries abroad for the exploitation of cinematographic and video phonographic works	11

E. Miscellaneous matters

Foreign investment. As a general rule, all foreign investments, such as equity or debt investments, must be registered with the

Central Bank of Brazil (BACEN) to assure the payment of dividends, principal and interest, or the repatriation of capital. Nonresidents holding assets and rights in Brazil, such as equity investments, portfolio investments and debt investments, must be registered with the Brazilian tax authorities. On registration, the nonresidents obtain a tax identification number (CNPJ for entities or CPF for individuals). Failure to comply with the foreign-exchange regulations and associated requirements is subject to significant penalties. This particularly applies to evasion, false statements and private offsetting transactions.

Contracts for the supply of technology and technical services with the transfer of technology, and for the use of trademarks and patents between residents and nonresidents must be registered with the National Institute of Industrial Property (INPI). To allow Brazilian companies to pay and deduct the royalties up to the amounts prescribed by law, it must also be registered under the Financial Operations Registration – ROF module of the Electronic Declaratory Registration (RDE) of BACEN's electronic system (SISBACEN).

Transfer pricing. Brazilian transfer-pricing rules apply only to cross-border transactions entered into between Brazilian companies and foreign related parties. A transaction entered into between a Brazilian company and a resident of a low-tax jurisdiction or a resident in a jurisdiction with a privileged tax regime is also subject to the transfer-pricing rules, even if the parties are not related. In general, Brazilian transfer-pricing rules do not follow the transfer-pricing guidelines outlined in the Organisation for Economic Co-operation and Development (OECD) Model Convention and the US rules. For example, Brazilian transfer-pricing rules adopt fixed-profit margins on transactions carried out between related parties. Safe harbor measures may be applied to Brazilian exports.

Low-tax jurisdiction and privileged tax regime. The Brazilian low-tax jurisdiction (LTJ) list (black list) and privileged tax regime (PTR) list (gray list) are contained in regulations issued by the Brazilian tax authorities. New definitions of LTJ and PTR were introduced in 2015 and in 2016. In 2016, Ireland was added to the black list, and Austria holding companies without substantial economic activity were added to the gray list. In addition, new rules on the meaning of substantial economic activity were issued in 2016. As of 2018, Costa Rica, Madeira and Singapore were removed from the black list; however, specific regimes in all three jurisdictions were added to the gray list.

Thin-capitalization. Under thin-capitalization rules, interest expense arising from a financial arrangement with a related party is deductible only if the related Brazilian borrower does not exceed a debt-to-net equity ratio of 2:1. In addition, interest expense arising from a financing arrangement executed with a party established in a LTJ or benefiting from a PTR is deductible only if the Brazilian borrower does not have a debt-to-net equity ratio of greater than 0.3:1.

Controlled foreign companies. Profits realized by a controlled foreign company (CFC) of a Brazilian company are subject to income taxation on 31 December of each year regardless of any

actual distribution by the CFC. Law 12,973/2014 introduced a new CFC regime. Under the new regime, qualifying CFCs are taxed on an entity-by-entity basis (that is, individually regardless of the design of the corporate structure outside of Brazil). If certain conditions are met, a tax consolidation of CFCs can be performed at the level of the Brazilian shareholder, through which the accounting losses of a qualifying CFC may offset taxable income of another CFC.

The earnings of CFC entities whose business is connected to oil and gas activities are exempt from tax in Brazil. Foreign tax credits of CFCs can be used against Brazilian corporate income tax, limited to the Brazilian corporate income tax due on CFC income. Under regulations issued by the Brazilian tax authorities (Normative Instruction 1,520/2014), the Brazilian shareholder can elect which non-Brazilian entities are subject to tax consolidation. Qualifying non-CFC entities are subject to tax in Brazil on an actual or deemed dividend distribution to a Brazilian shareholder. A deemed credit of 9% of the CFC income subject to tax in Brazil is available for qualifying entities.

The Brazilian corporate income tax on CFC income may be subject to installment payments over a period of eight years (12.5% payment per year), but the deferred tax liability is subject to adjustment based on London Interbank Offered Rate plus the US dollar currency exchange variation.

Digital bookkeeping. The Public System of Digital Bookkeeping (Sistema Público de Escrituração Digital, or SPED) is a unified electronic storage of accounting and tax bookkeeping. It is intended to replace bookkeeping prepared on paper and to unify the preparation, storage, and certification requirements of the Board of Trade and of the tax authorities at the municipal, state and federal levels. Most companies are now required to comply with the SPED.

International Financial Reporting Standards. Law 11,638/07 introduced changes to the Brazilian Corporate Law (Law 6,404/76) with respect to the preparation of financial statements for corporations as well as for large companies, regardless of whether they are organized as corporations. This law represents a major step in the process toward harmonization of Brazilian GAAP with IFRS. Under this law, which took effect on 1 January 2008, large companies must prepare their financial statements under new Brazilian GAAP, which is consistent with IFRS principles.

This harmonization process was not intended to generate any tax consequences in Brazil. Consequently, the Brazilian IRS issued guidance on achieving such tax neutrality (called the Transitional Tax Regime). Effective from 2015, Law 12,973/2014 revokes the Transitional Tax Regime by realigning the income tax rules with the accounting rules (Brazilian GAAP), unless otherwise prescribed by the tax law. The early adoption of Law 12,973/2014 for the 2014 calendar year was optional.

Foreign trade of services integrated system. The Brazilian tax authorities require the reporting of inbound and outbound services and intangible transactions outlined in Brazilian Services Codification (Nomenclatura Brasileira de Serviços, Intangíveis e

Outras Operações que Produzam Variações no Patrimônio, or NBS) through an integrated system with the Brazilian IRS, named Integrated Foreign Trade System for Foreign Services, Intangibles and other Transactions (Sistema Integrado de Comércio Exterior de Serviços, Intangíveis e Outras Operações que Produzam Variações no Patrimônio, or SISCOSEV).

Special tax benefits. The Brazilian government has issued laws providing tax incentives to increase investments in Brazil. The following are the main programs:

- Law 11,196/2005: tax benefits for investments in infrastructure and research and development (R&D)
- Special Tax Regime for the Renewal and Expansion of Port Structures (Regime Tributário para Incentivo à Modernização e à Ampliação da Estrutura Portuária, or REPORTO): suspension of IPI, PIS, COFINS and import tax for investments in ports, warehousing and surveillance and monitoring systems

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends %	Interest %	Royalties (k) %
Argentina	0 (n)	15 (d)(n)	10/15 (n)

Turkey	0	15 (q)	15 (i)
Ukraine	0	15 (d)	15
Venezuela	0	15 (d)	15
Non-treaty jurisdictions	0	15 (j)	15 (j)

- (a) The withholding rate is 10% for interest on certain bank loans with a minimum term of seven years.
- (b) The withholding rate is 10% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, excluding cinematographic films and films or tapes for television or radio broadcasting, produced by a resident of a contracting state.
- (c) The withholding rate is 10% for royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works or for the use of, or the right to use, cinematographic films or television or radio films or tapes produced by a resident of a contracting state.
- (d) Interest paid to the government of the other contracting state, a political subdivision thereof or an agency (including a financial institution) wholly owned by that government or political subdivision is exempt from tax.
- (e) The withholding rate is 15% for royalties with respect to copyrights of cinematographic films and films or tapes for radio or television broadcasting.
- (f) The withholding rate is 10% for interest on certain long-term (at least 10 years) bank loans.
- (g) The withholding rate is 10% for interest on certain long-term (at least eight years) bank loans.
- (h) Brazil is honoring the Czechoslovakia treaty with respect to the Czech and Slovak Republics.
- (i) This rate applies to royalties related to the use of, or the right to use, trademarks. For other royalties, including payments for technical assistance and technical services, the rate is 10%.
- (j) The withholding tax rate may increase to 25% if the recipient is resident in a low-tax jurisdiction or benefits from a privileged tax regime (see Section E).
- (k) The tax treaties do not apply to the CIDE (see footnote [d] to Section A).
- (l) The withholding tax rate is 25% for royalties paid for the use of trademarks.
- (m) The withholding tax rate is 20% for royalties paid for the use of trademarks.
- (n) Argentina and Brazil signed a protocol amending the treaty, which entered into force on 1 January 2019. The protocol provides for new maximum rates for dividends (10% and 15%), interest (15%) and royalties (10% and 15%), as well as other changes. The previous wording of the treaty did not provide a maximum rate for royalties, but provided that the domestic rate applied.
- (o) The withholding rate is 15% for royalties for the use of, or the right to use, trademarks.
- (p) The withholding tax rate applicable to royalties was reduced as a result of the most favorable clause contained in the protocol to the treaty. This clause provides for a rate reduction if a future treaty establishes a lower rate. Because of the treaty between Brazil and Israel, the withholding tax rate on royalties was reduced to 10% (except for trademark royalties).
- (q) Interest paid from Turkey to the Brazilian government, Central Bank of Brazil or the National Economic and Social Development Bank (BNDES) are exempt from Turkish tax. Interest paid from Brazil to the Turkish government, the Central Bank of the Republic of Turkey (Türkiye Cumhuriyet Merkez Bankası) or the Turkish Bank of Exportation and Importation (Eximbank) are exempt from Brazilian tax.
- (r) The protocols of these treaties do not expressly classify payments for technical services as royalties. Based on recent interpretations of the Brazilian tax authorities, it may be possible to claim that technical services fees paid to beneficiaries located in these countries are not subject to withholding income tax.
- (s) The treaty between Brazil and the Russian Federation is effective from 1 January 2018.

In 2018, Brazil signed double tax treaties with Singapore, Switzerland and United Arab Emirates, for which internal approval measures are still pending. Therefore, they are not yet in force.

A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	0

B. Taxes on corporate income and gains

The BVI Business Companies Act, 2004 (BVI BC Act) entered into force on 1 January 2005. Under the BVI BC Act, companies incorporated under the British Virgin Islands (BVI) Companies Act are exempt from all taxes provided under the BVI Income Tax Ordinance. The BVI BC Act is essentially an amalgamation of the International Business Companies (IBC) Act and the BVI Companies Act, which contained a regime under which all domestic companies incorporated in the BVI were governed. In addition, on 1 January 2007, all International Business Companies on the companies register in the BVI were automatically reregistered under the BVI BC Act and, consequently, the IBC Act was repealed in full.

All Business Companies (BCs) are statutorily exempt from BVI taxes. However, such companies must pay an annual license fee (see Section C). In general, a BC may not transact business with persons resident in the BVI or own interests in real property located in the BVI unless it obtains the relevant trade license from the BVI government. In addition, a BC may not carry on business as a bank, trust company, insurance company or reinsurance company without a license from the BVI Financial Services Commission.

C. Other taxes

Payroll tax. Payroll tax is imposed on every employer and self-employed person who carries on business in the BVI. The tax rates are 10% for Class 1 employers and 14% for Class 2 employers. The tax is applied to the remuneration paid or deemed to be paid, 8% of which may be reclaimed and paid by the employees or deemed employees. Class 1 employers are those meeting the following conditions:

- Payroll during the financial year that does not exceed USD150,000
- Annual turnover that does not exceed USD300,000
- A total of seven or less employees and deemed employees

All employers not falling within the Class 1 category are deemed to be Class 2 employers.

The first USD10,000 of actual remuneration paid to an employee, deemed employee or self-employed person is exempt from tax.

Social tax. Social tax requires both the employer and employee contribute to the mandatory National Insurance Scheme. The total contribution rate is 8.5%, of which 4.5% is paid by the employer and the remaining 4% can be passed on to the employees. These contributions are based on the amount of weekly wages up to a maximum of USD815 or monthly wages up to a maximum of USD3,531.67. The maximum insurable earnings is USD42,380.

National health insurance. BVI implemented a new national health insurance regime, effective from 1 January 2016. This regime requires employers and employees to pay 3.75% each on the employees' monthly income. The maximum income on which national health insurance premiums is assessed is two times the upper wage limit for social security contributions, which currently equals USD7,063.34 per month. Consequently, the maximum amount payable monthly by employees and employers is USD264.88 each. Employees are also required to contribute an additional 3.75% on behalf of an unemployed spouse.

D. Fees and stamp duties

The following table summarizes the fees and stamp duties payable in the BVI.

Nature of fees and duties	Rate
Annual license fees	
BCs incorporated under the BVI BC Act, with authorized share capital of	
Up to USD50,000 or foreign-currency equivalent or authorized to issue up to 50,000 shares	USD350
Exceeding USD50,000 or foreign-currency equivalent or authorized to issue more than 50,000 shares	USD1,100
Restricted Purpose Company	USD5,000
General banking license	USD50,000
Restricted Class I banking license	USD32,000
Restricted Class II banking license	USD32,000
Insurance company license	Up to USD10,000
Class I trust license	USD16,000
Class II trust license	USD14,000
Class III trust license	USD12,000
Restricted Class II trust license	USD1,000 to USD3,000
Restricted Class III trust license	USD500
Stamp duties, on various instruments and transfers of ownership	
Real estate, on higher of consideration or market value	

Nature of fees and duties	Rate
Sales to belongers (individuals born in the BVI or those granted BVI status and BVI companies that are at least 67% owned by such persons and do not have any non-belongers as directors)	4%
Sales to non-belongers	12%
Other instruments and transfers	0.2% to 5%

E. Miscellaneous matters

Foreign-exchange controls. The BVI does not have any foreign-exchange control regulations.

European Union Savings Tax Directive. As a result of the BVI's status as a British Overseas Territory, it is required to comply with the requirements of the European Union (EU) Savings Tax Directive (the Directive). Banks and other paying agents in the BVI must exchange certain information pertaining to EU residents.

Under the Mutual Legal Assistance (Tax Matters) (Automatic Exchange of Information) Order, 2011, effective from 1 January 2012, the former 35% withholding option under the Directive is no longer applicable because the BVI transitioned to the automatic exchange-of-information option instead of the withholding-tax option under the Directive. This order provides that BVI-based paying agents are no longer subject to the withholding tax option as a means of complying with the Directive. Instead, BVI institutions must disclose the minimum information to the BVI Inland Revenue, which in turn complies with the information-exchange policy under the Directive.

On 24 March 2014, the EU revised the Directive to strengthen the existing rules on exchange of information on savings income. The principal changes to the Directive are the following:

- A look-through approach based on “customer due diligence,” which prevents individuals from circumventing the Directive by using an interposed legal person located in certain non-EU countries
- Enhanced rules aimed at preventing individuals from circumventing the Directive by using an interposed legal person located in an EU member state
- Extending the scope of the Directive to include financial products that have similar characteristics to debt claims
- Inclusion of income obtained through undertakings for collective investment in transferable securities authorized by Directive 85/611/EEC (UCITS)

F. Tax treaties

Although the United Kingdom's double tax treaties with Japan and Switzerland have been extended to the BVI, these treaties are not used in practice. The BVI has not entered into any other tax treaties. However, the BVI has entered into 28 tax information exchange agreements with various jurisdictions, including Canada, China, Japan and the United States, and with 16 European countries, including France, Germany, Ireland, the Netherlands and the United Kingdom.

On 28 November 2013, the BVI and the United Kingdom signed an intergovernmental agreement (IGA) to enable the exchange of information for tax purposes, including on an automatic basis.

On 30 June 2014, the BVI and the U.S. Treasury signed and released a Model 1 IGA for the implementation of the US Foreign Account Tax Compliance Act (FATCA).

All BVI institutions must comply with FATCA and UK Crown Dependencies and Overseas Territories (CDOT) regulations. In addition, if required, they must report to the BVI International Tax Authority via the authority's Automatic Exchange of Information website. As a result of the introduction of the Common Reporting Standard (CRS; see below), it is expected that the requirement for reporting in compliance with the above-mentioned UK CDOT regulations will no longer be needed after 2017.

The BVI was an early adopter of the CRS. The BVI recently issued its initial CRS regulations, which took effect on 1 January 2016. The first reporting for the 2016 tax year was due by the end of July 2017. The expected deadline for future years is 31 May. All BVI institutions must comply with the CRS.

A. At a glance

Corporate Income Tax Rate (%)	18.5 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	18.5 (a)
Withholding Tax (%) (b)	
Dividends	0
Interest	2.5
Royalties	10
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	6

(a) This is the standard rate. The rate of petroleum income tax is 55%.

(b) For a listing of withholding taxes, see Section D.

B. Taxes on corporate income and gains

Corporate income tax. Limited companies, regardless of whether they are incorporated overseas or locally or are registered as a branch of a foreign company, are subject to a tax on income accruing in, derived from or received in Brunei Darussalam.

Branches of foreign companies are taxed on their profits arising in Brunei Darussalam at the same rates as corporations.

Rate of corporate income tax. The income tax rate is 18.5% for resident and nonresident companies, except for those engaged in petroleum operations. The rate of petroleum income tax is 55%.

The first BND100,000 of chargeable income is taxed at a reduced rate of one quarter of the full rate, while the next BND150,000 is taxed at half the full rate. The balance of chargeable income is taxed at the full rate. For a new company, the first BND100,000 of chargeable income is exempt from tax. This exemption applies for a company's first three consecutive years of assessment.

Certain enterprises and industries may be exempted from taxation if they are considered essential for the development of the country.

Companies that have gross sales or turnover of BND1 million or less are exempted from corporate income tax or charged with a 0% corporate income tax.

Capital gains. Capital gains are not taxed. Capital losses are not deductible. However, if assets have been acquired for resale rather than for a company's use, any profit from the sale is regarded as taxable income.

Administration. The tax year is the calendar year.

Tax returns must be filed by electronic means.

Corporations must file an annual tax return by 30 June of each year and pay any tax due by the same date. Corporations must also file an Estimated Chargeable Income (ECI) return within three months after their accounting year-end if they are unable to file their annual tax return within this period. Any tax due under an ECI return must be paid by the due date for filing the ECI return. If tax is paid under an ECI return, the tax is adjusted accordingly in the annual tax return. In general, extensions of time are not granted.

Foreign tax relief. Foreign income that is not received in Brunei Darussalam is free from tax. Brunei Darussalam has entered into double tax treaties with Bahrain, China, Hong Kong Special Administrative Region (SAR), Indonesia, Japan, Korea (South), Kuwait, Laos, Luxembourg, Malaysia, Oman, Pakistan, Qatar, Singapore, the United Arab Emirates, the United Kingdom and Vietnam. Brunei Darussalam has signed double tax treaties with other countries, but these treaties have not yet been ratified. Both resident and nonresident companies may also apply for unilateral relief on income arising from British Commonwealth countries offering reciprocal relief. However, the maximum relief cannot exceed half the Brunei Darussalam rate.

C. Determination of trading income

General. The following sources of income are subject to tax:

- Gains or profits from any trade, business, profession or vocation
- Gains or profits from employment
- Net annual value of land and improvements occupied or used rent-free for residential or enjoyment purposes
- Dividends, interest or discounts
- Pensions, charges or annuities
- Rents, royalties, premiums and any other profits arising from property

In computing taxable income, normal business expenses may be deducted.

Interest expenses are allowed as a deduction only if the loan generating the charge is used for the production of taxable income.

Provisions. Provisions for debts are generally tax-deductible only if they are made against specific bad debts and if evidence indicates that the debts may not be recoverable.

Tax depreciation. Depreciation charged in the financial accounts is not deductible for tax purposes. Instead, capital allowances (tax depreciation) are permitted.

Industrial buildings. An initial allowance of 40% of the qualifying expenditure is given on industrial buildings in the year of expenditure, with a further annual allowance of 20% of qualifying expenditure provided on a straight-line basis until the total expenditure is written off.

Plant and machinery. An initial allowance of 40% of the cost of plant or machinery is given on the qualifying expenditure, and an annual allowance is given on the declining value of the asset. Effective from 1 January 2016, the rates of the annual allowance for all types of assets were changed to 25%. Alternatively, a company may choose to write off such expenditure over three years on a straight-line basis. For plant and machinery not exceeding BND2,000 per item, a company may choose to write off such expenditure fully in the year of acquisition subject to an aggregate cap of BND30,000 per year. For computer and office automation equipment, a company may also choose to write off such assets fully in the year of acquisition.

Effective from 1 January 2014, the capital allowance rate was increased to 150% for assets categorized as plant and machinery for companies in the manufacturing sector. This capital allowance applies only to plant and machinery installed between 1 January 2014 and 31 December 2019.

Mining. All expenditure incurred in connection with the working of a mine or other source of mineral deposit of a wasting nature is considered qualifying mining expenditure. An initial allowance of 10% of the qualifying expenditure is given in the year of expenditure, with annual depletion allowances deductible over the life of the mine. These are determined by multiplying the residue of the capital expenditure by the greater of 20% and the following fraction:

$$\frac{\text{Output for the year}}{\text{Output for the year plus estimated future output}}$$

Disposals. When an asset is sold, scrapped or destroyed, a balancing allowance or charge is made, based on the difference between the disposal price and the depreciated value on disposal. The balancing charge may be deferred if the plant and machinery disposed of are replaced by similar assets.

Relief for losses. Losses may be carried forward for up to six years to offset future profits. Continuity of trade or ownership is not required to carry forward losses. Losses in one trade or business may be set off against other sources of income for the same year of assessment.

Unabsorbed capital allowances may be carried forward indefinitely, provided the company continues to carry on the same trade or business.

Groups of companies. No special rules or reliefs apply to groups of companies; each company is taxed on its own income as appropriate.

D. Domestic and treaty withholding tax rates

Brunei Darussalam's domestic tax law imposes withholding tax on various payments made to nonresident persons, which include companies and bodies of persons. A company is considered to be a nonresident company if the control and management of its business are not exercised in Brunei Darussalam. The following are the withholding tax rates.

Type of payment	Rate (%)
Interest, commissions, fees or other payments with respect to loans or indebtedness	2.5
Royalties or other lump-sum payments for the use of movable properties	10
Payments for the use of, or the right to use, scientific, technical, industrial or commercial knowledge or information	10
Technical assistance and service fees	10
Management fees	10
Rent or other payments for the use of movable properties	10
Nonresident directors' remuneration	10

The above withholding tax rates may be reduced under tax treaties. Brunei Darussalam has entered into double tax treaties with Bahrain, China, the Hong Kong SAR, Indonesia, Japan, Korea (South), Kuwait, Laos, Luxembourg, Malaysia, Oman, Pakistan, Qatar, Singapore, the United Arab Emirates, the United Kingdom and Vietnam.

Brunei Darussalam has signed double tax treaties with other countries, but these treaties have not yet been ratified.

A. At a glance

Corporate Income Tax Rate (%)	10
Capital Gains Tax Rate (%)	10 (a)
Branch Tax Rate (%)	10
Withholding Tax (%) (b)	
Dividends	5 (c)(d)
Interest	0/10 (e)(f)(g)
Royalties from Patents, Know-how, etc.	0/10 (e)(f)
Fees for Technical Services	10 (f)
Rent and Payments Under Lease, Franchising and Factoring Agreements Derived from Sources in Bulgaria	10 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) Capital gains derived from the sale of shares, rights and government bonds through the Bulgarian stock market or stock exchanges in European Union (EU) or European Economic Area (EEA) countries are exempt from tax.
- (b) An EU/EEA recipient of Bulgarian-source income that is subject to withholding tax may claim a deduction for expenses incurred in earning that income by filing an annual corporate income tax return. The return must be filed by 31 December of the year following the year of accrual of the income.
- (c) This tax does not apply to payments to entities that are resident for tax purposes in Bulgaria or EU/EEA countries (no requirements for participation percentage and minimum holding period are imposed). However, under the general anti-tax avoidance rule provided in the domestic corporate income tax law, no exemption from withholding tax is granted to an arrangement or a series of arrangements that, taking into account all of the relevant facts and circumstances, are not genuine and result in tax avoidance.
- (d) This rate may be reduced by tax treaties for dividends distributed to entities not resident for tax purposes in EU/EEA countries.
- (e) The zero rate applies to Bulgarian-source interest or royalties income accrued to EU associated companies (a minimum holding of 25% of the share capital must be maintained for at least two years) if the income recipient is its beneficial owner. The exemption from tax does not apply to income accrued on hybrid financial instruments. The zero rate is disallowed if the Bulgarian-source payment is, in substance, a profit distribution or capital decrease or aims at tax avoidance or tax evasion.
- (f) This tax applies to payments to nonresidents only and may be reduced in accordance with an applicable tax treaty.
- (g) Interest on debt (other than government or municipality bonds) extended to the Bulgarian state or a municipality is exempt from withholding tax. Interest income on bonds or other debt instruments issued by Bulgarian resident companies, the Bulgarian state or municipalities on a regulated EU/EEA market is exempt from withholding tax. The exemptions mentioned in the two preceding sentences are granted to all corporate investors, regardless of their tax residency. Interest income paid to nonresident issuers of bonds or other debt instruments is not subject to withholding tax in Bulgaria if all of the following conditions are met:
 - The issuer of these bonds or debt instruments is a tax resident of an EU/EEA member state.
 - The purpose for the issuance of the bonds or other debt instruments is that the proceeds will be used for granting a loan to a Bulgarian tax resident company.
 - The bonds or other debt instruments are issued on a regulated market in Bulgaria or another EU/EEA member state.

B. Taxes on corporate income and gains

Corporate income tax. Bulgarian companies are subject to corporate tax on their worldwide income. Bulgarian companies are companies incorporated in Bulgaria. Foreign companies are taxed in Bulgaria on their profits generated from activities conducted through a permanent establishment in the country and on income from Bulgarian sources.

Rates of corporate tax. The corporate tax rate is 10%.

A 10% tax is imposed on certain expenses, such as employee-related, in-kind fringe benefits and representation-related expenses, thereby increasing the effective tax rate for companies incurring such expenses (see Section D).

Capital gains and losses. Capital gains from disposals of assets, including shares, derived by Bulgarian tax residents are included in the current year tax base and are subject to tax at the standard corporate tax rate of 10%. No rollover relief is provided. Capital losses are deductible for tax purposes.

Capital gains derived from the sale of shares, rights and government bonds through the Bulgarian stock market or stock exchanges in EU/EEA countries are exempt from tax. Similarly,

losses from the sale of shares, rights and government bonds through such stock exchanges are not deductible for tax purposes.

Administration. The tax year is the calendar year. Annual tax returns must be filed by 31 March of the year following the tax year. The tax return must be accompanied by an activity report for statistical purposes. Taxpayers that did not carry on business activity during the respective year are not required to submit annual tax returns and activity reports.

Companies subject to tax must make advance payments of tax. Only persons that have net sales revenue from the preceding year in excess of BGN3 million must make monthly advance payments. Newly established companies and companies with sales of less than BGN300,000 for the preceding tax year are not required to make advance payments. These taxable persons may opt for quarterly advance payments. Companies with sales ranging from BGN300,000 to BGN3 million for the preceding tax year are subject to quarterly advance corporate tax payments. The tax base for the monthly advance payments is one-twelfth of the company's forecasted annual taxable income for the tax year. The tax base of the quarterly advance payments is one-fourth of the company's forecasted annual taxable income for the tax year. The tax rate for calculating the advance payments is 10%.

The monthly advance payments for January, February and March are due on 15 April of the current tax year. For the months from April through December, the monthly advance payments are due on the 15th day of the respective month. The quarterly advance payments for the first and second quarters are due on the 15th day after the end of the respective quarter. For the third quarter, the advance payment is due on 15 December. No quarterly payment is required for the last quarter. Companies must pay the corporate tax due for the tax year, less the advance installments, by 31 March of the following year.

In the case of errors (including accounting errors) related to the prior year for which the tax return was filed, companies can file a one-off corrective corporate income tax return by 30 September of the year.

The tax on certain expenses (see Section D) is payable on an annual basis by 31 March of the following year.

Dividends. A 5% withholding tax is imposed on dividends paid by Bulgarian companies to companies resident for tax purposes in non-EU/EEA countries, as well as on hidden profit distributions to residents of EU/EEA countries.

Remittances of profits by branches to their home countries are not subject to withholding tax.

Foreign tax relief. Bulgarian companies are entitled to a tax credit for identical or similar foreign taxes imposed abroad. The tax credit is limited to the amount of the Bulgarian tax that would have been paid in Bulgaria on the income subject to the foreign tax. In addition, a per-country limitation applies. Bulgarian tax treaties normally provide an exemption from Bulgarian taxation for income from foreign real estate and foreign permanent establishments.

C. Determination of taxable income

General. Taxable income is based on annual accounts prepared in accordance with International Financial Reporting Standards (IFRS) or, for small and medium-sized enterprises, Bulgarian accounting standards. However, taxable income does not equal the profit shown in the accounts, because certain adjustments to revenue and expenses are required for tax purposes with respect to items such as accrual for bonuses, unused leave, depreciation and impairment of assets.

The write-down of assets as a result of impairment is not deductible for tax purposes. The loss is deductible on realization.

Inventories. All cost methods that are applicable under IFRS may be used for tax purposes. For manufacturing entities, the quantity of raw material exceeding the usual quantity of raw materials required for the production of a particular unit is treated as avoidance of taxation and is subject to adjustment for tax purposes.

Provisions. Impairments and write-offs of receivables are not deductible for tax purposes until their materialization or the expiration of the five-year statute of limitation to pursue the claim at court. This rule does not apply to financial institutions, which may deduct impairments and write-offs of receivables in the year in which they are booked. Provisions for payables are not deductible for tax purposes until their materialization.

Tax depreciation. The law provides the following maximum tax depreciation rates for categories of assets.

Category	Assets	Rate (%)
1	Buildings, facilities, communication devices, electricity carriers and communication lines	4
2	Machines, manufacturing equipment and other equipment	30 (a)
3	Transportation vehicles, excluding automobiles, road coverings and aircraft runways	10
4	Computers, software and the right to use software, and mobile phones	50
5	Automobiles	25
6	Intangibles and other tangible assets that are legally protected for a limited time period	– (b)
7	Other tangible assets	15

(a) The rate may increase to as high as 50% for new machines for investment purposes.

(b) The depreciation rate is determined by dividing 100 by the number of years of the legal restriction. The maximum rate is 33⅓%.

The Corporate Income Tax Act contains measures requiring companies to prepare tax depreciation plans.

Goodwill arising from business combinations is not treated as a depreciable asset for tax purposes.

Relief for losses. Tax losses may be carried forward for five years. Losses may not be carried back.

Groups of companies. Bulgarian law does not include measures for filing consolidated returns or relieving losses within a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on all domestic supplies of goods and services, imports and intra-EU acquisitions in Bulgaria	20
Tax on expenses; imposed on payers for representation and social expenses and for fringe benefits resulting from the provision of company assets and personnel to employees, directors and shareholders; the amount of the representation and social expenses is not subject to tax in the hands of the recipient; companies have the option to apply the 10% tax on corporate expenses triggered by the personal use of company assets and personnel by employees, directors and shareholders or to treat them as fringe benefits taxed at the personal level; companies must choose the method for taxation in their annual corporate tax return	10
Real estate property tax; rate varies by municipality	0.01 to 0.45
Real estate transfer tax; rate varies by municipality	0.1 to 3

E. Miscellaneous matters

Foreign-exchange controls. The Bulgarian currency is the leva (BGN). The exchange rate of the leva against the euro (EUR) is fixed at BGN1.95583 = EUR1.

Bulgaria does not impose foreign-exchange controls. However, some reporting requirements exist.

Each business transaction between local and foreign persons that involves financial credits or direct investment of a local company or sole proprietor abroad, must be declared for statistical purposes to the Bulgarian National Bank (BNB) within 15 days after the date of the transaction.

Under the Foreign Exchange Act, bank payments of up to BGN30,000 may be made freely after the payer declares the purpose of the payments. For payments over BGN30,000, certain requirements must be satisfied, including the submission of certain documents to the bank.

The act does not restrict the amount of foreign currency that may be purchased or imported into Bulgaria. Bulgarian and foreign individuals may export foreign currency of up to the equivalent of EUR10,000 without filing a declaration. The individual must file a declaration for exports exceeding EUR10,000. For exports of cash exceeding EUR15,000 or the equivalent in another currency, the customs authorities should check in the National

Revenue Agency's system to determine whether the individual has any outstanding tax liabilities.

Debt-to-equity rules. An interest-limitation rule and thin-capitalization provisions regulate the deductibility of interest expenses, as well as other expenses related to loans.

As of 2019, the interest-limitation rule is applied to corporate taxpayers that incur net interest and other borrowing costs exceeding BGN3 million for the calendar year. The tax deduction of such costs is limited to 30% of the respective entity's tax-adjusted earnings before interest, tax, depreciation and amortization (EBITDA). The borrowing costs include the following:

- Interest on all types of debt arrangements, regardless of the creditor status
- Interest-like items, such as depreciation of real estate that includes capitalized borrowing cost and currency losses

All taxpayers (including those below the threshold of BGN3 million) should also adhere to the thin-capitalization regime. This regime is triggered when a company's total debt exceeds three times its equity (both figures should be calculated as an average of the opening and closing balances for the year).

Thin-capitalization provisions regulate the deductibility of interest expenses related to certain transactions, such as the following:

- Nonbank loans from related and unrelated parties
- Financial leases entered into with related parties
- Bank loans obtained from related parties or guaranteed by related parties

The tax deductibility for the net amount of the regulated interest expenses subject to the thin-capitalization provisions (after deduction of any interest income) is limited to 75% of earnings before interest and tax (EBIT). If the financial result before taking into account the interest expense is a loss, the entire amount of the interest expense is not deductible.

Taxpayers that are both thinly capitalized and that have net borrowing costs of more than BGN3 million should apply both tests and limit their deduction to the outcome that is more restrictive.

The interest not deducted under both regimes can be carried forward indefinitely.

Hidden distributions of profit. Adjustments to taxable income as a result of violations of the arm's-length principle are treated as hidden distributions of profit. The definition of hidden profit distribution also includes the following:

- Amounts not related to the business activity
- Amounts exceeding the customary market levels for both expenses accrued and amounts paid or distributed in any form in favor of shareholders, partners or persons related to them, excluding dividends
- Interest on certain hybrid instruments (debt contracts that, subject to a specific test provided for in the Corporate Income Tax Act, seem to be more akin to equity)

Hidden distributions are treated like dividends. Accordingly, they are disallowed for corporate income tax purposes and subject to a 5% withholding tax (if distributed to nonresidents).

In addition, an administrative sanction in the amount of 20% of the distributed amount is imposed. However, voluntary disclosure of hidden profit distributions in the annual corporate income tax return relieves taxpayers of this penalty.

F. Treaty withholding tax rates

The rates of withholding tax in Bulgaria's tax treaties are described in the following table.

	Dividends (y) %	Interest (ss) %	Royalties %
Albania	5/15 (h)	10	10
Algeria	10	10	10
Armenia	5/10 (m)	5/10 (ll)	5/10 (mm)
Austria	0/5 (tt)	0/5 (uu)	5 (vv)
Azerbaijan	8	0/7 (dd)	5/10 (ee)
Bahrain	0/5 (nn)	5	0/5 (oo)
Belarus	10	10	10
Belgium	10	10	5
Canada	10/15 (n)	0/10 (aaa)	10
China (mainland)	10	10	7/10 (a)
Croatia	5	5	0
Cyprus	5/10 (r)	7	10
Czech Republic	10	10	10

Korea (South)	5/10 (j)	0/10 (eee)	5
Kuwait	0/5 (v)	5	10
Latvia	5/10 (b)	5	5/7 (w)
Lebanon	5	7	5
Lithuania	0/10 (aa)	10	10
Luxembourg	5/15 (h)	0/10 (kk)	5
Macedonia	5/15 (p)	0/10 (hh)	10
Malta	0 (g)	0	10
Moldova	5/15 (h)	10	10
Mongolia	10	10	10
Morocco	7/10 (q)	10	10

	Dividends (y) %	Interest (ss) %	Royalties %
Netherlands (fff)	5/15 (i)	0	0/5 (pp)
Norway	0/5/15 (hhh)	0/5 (iii)	5
Poland	10	10	5
Portugal	10/15 (ddd)	10	10
Qatar	0	0/3 (ww)	5
Romania	5	0/5 (ggg)	5
Russian Federation	15	15	15
Singapore	5	5	5
Slovak Republic	10	10	10
Slovenia	5/10 (b)	5	5/10 (x)
South Africa	5/15 (h)	5	5/10 (z)
Spain	5/15 (i)	0	0
Sweden	10	0	5
Switzerland	10 (xx)	5 (yy)	0
Syria	10	10	18
Thailand	10	10/15 (s)	5/15 (t)
Turkey	10/15 (o)	10	10
Ukraine	5/15 (i)	10	10
United Arab Emirates	0/5 (ii)	0/2 (jj)	0/5 (jj)
United Kingdom	0/5/15 (jjj)	5 (kkk)	5
United States	0/5/10 (bb)	0/5/10 (cc)	5
Uzbekistan	10	0/10 (xx)	10
Vietnam	15	10	15
Yugoslavia	5/15 (h)	10	10
Zimbabwe	10/20 (k)	10	10
Non-treaty jurisdictions	5	10	10

- (a) The 7% rate applies to royalties for the right to use industrial, commercial and scientific equipment; the 10% rate applies to other royalties.
- (b) The 5% rate applies if the beneficial owner is a company, other than a partnership, holding directly more than 25% of the capital of the payer.
- (c) This rate applies to dividends paid from Finland to Bulgaria. The treaty does not provide a withholding rate for dividends paid from Bulgaria to Finland.
- (d) The 5% rate applies to royalties for specified types of intellectual property. The rate for other royalties is 0%.
- (e) The 5% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds directly at least 15% of the capital of the payer; the 15% rate applies to other dividends.
- (f) The 10% rate applies if the recipient is a legal person owning at least 25% of the voting shares of the payer for at least six months before the end of the accounting period for which the distribution of profits is made. The 15% rate applies to other dividends.
- (g) The rate is 0% for dividends paid from Bulgaria to Malta. For dividends paid from Malta to Bulgaria, the withholding tax is the lower of 30% of the gross dividend or the tax imposed on the profits out of which the dividends are paid.
- (h) The 5% rate applies if the recipient is a company owning directly at least 25% of the capital of the payer; the 15% rate applies to other dividends.
- (i) The 5% rate applies if the recipient is a company, other than a general partnership, owning directly at least 25% of the payer. The 15% rate applies to other dividends.
- (j) The 5% rate applies if the recipient is a company that is the beneficial owner of the dividends and holds at least 15% of the capital of the payer. The 10% rate applies to other dividends.
- (k) The 10% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer. The 20% rate applies to other dividends.
- (l) The Bulgarian Council of Ministers authorized the signing of a new tax treaty between Bulgaria and Italy. After the new treaty is signed, enters into force and takes effect, it will replace the 1988 income and capital tax treaty between the countries.

- (m) The 5% rate applies if the beneficial owner of the dividends has invested at least USD100,000 or an equivalent amount in another currency in the capital of the payer. The 10% rate applies to other dividends.
- (n) The rate of 10% applies to dividends paid by a Canadian investment company, of which at least 10% of the voting shares are controlled directly or indirectly by a foreign company. The 15% rate applies to other dividends.
- (o) The 10% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds at least 25% of the payer. The 15% rate applies to other dividends.
- (p) The 5% rate applies if the beneficial owner of the dividends is a company, other than a partnership, holding directly at least 25% of the payer. The 15% rate applies to other dividends.
- (q) The 7% rate applies if the beneficial owner of the dividends is a company, other than a partnership, holding directly at least 15% of the capital of the payer. The 10% rate applies to other dividends.
- (r) The 5% rate applies if the recipient is a company owning directly at least 25% of the payer. The 10% rate applies to other dividends.
- (s) The 10% rate applies to interest paid to financial institutions, including insurance companies. The 15% rate applies to other interest payments.
- (t) The 5% rate applies to royalties received for the use of, or the right to use, copyrights. The 15% rate applies to other royalties.
- (u) The 5% rate applies to interest on loans from banks or financial institutions. The 10% rate applies to other interest payments.
- (v) The 0% rate applies if the beneficial owner is a company, other than a partnership, holding directly more than 25% of the capital of the payer.
- (w) The 7% rate applies to royalties received for the use of, or the right to use, copyrights, patents, logos, models, plans, secret formulas or processes. The 5% rate applies to other royalties.
- (x) The 5% rate applies to royalties received for the use of, or the right to use, copyrights (except for cinematographic movies), or scientific, commercial or industrial equipment. The 10% rate applies to other royalties.
- (y) A 0% rate applies to dividends paid to entities from EU countries if certain conditions are satisfied.
- (z) The 5% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of cultural, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television) and to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (aa) The 0% rate applies if the beneficial owner of the dividends is a company, other than a general partnership, that holds at least 10% of the payer. The 10% rate applies to other dividends.
- (bb) The 5% rate applies if the beneficial owner is a company that owns directly at least 10% of the voting stock of the company paying the dividends. The 0% rate applies if the beneficial owner is a pension fund resident for tax purposes in the United States. Other conditions must also be observed.
- (cc) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is an institution wholly owned by the state.
 - The beneficial owner is a financial institution, provided the interest is not paid with respect to a back-to-back loan.
 - The beneficial owner is a pension fund, provided that the interest is not derived from the carrying on of a business, directly or indirectly, by such pension fund.
 - The interest concerns debt claims guaranteed, insured or financed by the state.
- The 10% rate applies to the following payments:
- Contingent interest arising in the United States that does not qualify as portfolio interest under US law
 - Interest arising in Bulgaria that is determined with reference to receipts, sales, income, profits or other cash flow of the debtor or a related person, to a change in the value of any property of the debtor or a related person or to a dividend, partnership distribution or similar payment made by the debtor or a related person
- The 5% rate applies to other cases.
- (dd) The 0% rate applies if either of the following applies:
- The payer or the recipient of the interest is the government, an administrative territorial subdivision or a local authority thereof, the national bank of either contracting state, the state or the State Oil Fund of Azerbaijan.
 - The interest is paid with respect to a loan guaranteed by any of the institutions mentioned in the first bullet.
- The 7% rate applies to other cases.

- (ee) The 5% rate applies to royalties received for the use of patents, designs or models, plans, secret formulas or processes, or for information, regarding industrial, commercial and scientific experience (know-how). The 10% rate applies in all other cases.
- (ff) The 0% rate applies if the beneficial owner of the dividends is a company holding directly at least 10% of the capital of the payer. The 5% rate applies in all other cases.
- (gg) The 0% rate applies if any of the following circumstances exists:
- The interest is paid to the government, local authority or the central bank of a contracting state.
 - The interest is paid on a loan granted, insured or guaranteed by any of the institutions mentioned in the first bullet.
 - The interest is paid with respect to the sale on credit of industrial, commercial or scientific equipment.
 - The interest is paid on a loan granted by a bank.
- (hh) The 0% rate applies to interest originating from one of the contracting states that is paid to the government or the central bank of the other state.
- (ii) The 0% rate applies if the beneficial owner of the income derived from one of the contracting states is any of the following:
- The other state or a political subdivision, local government, local authority or the central bank of the other state
 - The Abu Dhabi Investment Authority, Abu Dhabi Investment Council, International Petroleum Investment Company or any other institution created by the government, a political subdivision, a local authority or a local government of the other state, which is recognized as an integral part of the government, as agreed in an exchange of letters between the competent authorities of the contracting states
- (jj) The 0% rate applies to income originating from one of the contracting states that is paid to any of the following:
- The other state, a political subdivision, a local government, a local authority or the central bank of the other state
 - The Abu Dhabi Investment Authority, Dubai Investment Office, International Petroleum Investment Company, Abu Dhabi Investment Council or any other institution created by the government, a political subdivision, a local authority or a local government of the other state, which is recognized as an integral part of the government, as agreed through the exchange of letters between the competent authorities of the contracting states
- (kk) The 0% rate applies if any of the following circumstances exists:
- The interest is paid with respect to the sale on credit of industrial, commercial or scientific equipment.
 - The interest is paid with respect to the sale on credit of goods or merchandise delivered by an enterprise to another enterprise.
 - The interest is paid on a loan, not represented by bearer shares, granted by a financial institution or by the government.
- (ll) The 5% rate applies to interest paid on loans granted by banks or financial institutions.
- (mm) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting.
- (nn) The 0% rate applies to dividends paid to the government, a local authority, statutory body, agency, the national bank or a wholly owned company of a contracting state.
- (oo) The 0% rate applies to royalties paid to the government, a local authority, statutory body, agency, the national bank or a wholly owned company of a contracting state.
- (pp) The 0% rate applies as long as the Netherlands' tax laws do not levy a tax at source on royalties.
- (qq) The 5% rate applies if the recipient of the income owns at least 10% of the capital of the company paying the dividends.
- (rr) The 0% rate applies to interest paid on the following loans:
- Loans granted or guaranteed by the Bulgarian government or municipal and state institutions
 - Loans guaranteed by Germany with respect to exports or foreign direct investment or granted by the government of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the Deutsche Investitions- und Entwicklungsgesellschaft
 - Loans related to the sale on credit of equipment and merchandise
 - Loans granted by banks
- (ss) A 0% rate (unless explicitly indicated otherwise in the table) broadly applies to interest paid to governments, statutory bodies or central banks. Under

- certain treaties, it may also extend to other financial institutions and/or local authorities, subject to explicit reference in the respective double tax treaty.
- (tt) A 0% rate applies to dividends distributed to Austrian companies. A 5% rate applies to distributions to partnerships and in all other cases.
- (uu) A 0% rate applies to interest paid on the following loans:
- Loans granted by banks
 - Loans granted to the government of Austria or to the government of Bulgaria
 - Loans granted, insured or guaranteed by the Oesterreichische Kontrollbank AG or any comparable Bulgarian institution for purposes of promoting exports
 - Loans granted in connection with the sale on credit of industrial, commercial or scientific equipment.
- A 5% rate applies in all other cases.
- (vv) A 5% rate applies to royalties.
- (ww) The 0% rate applies to interest paid on loans granted by the Bulgarian National Bank, the Qatar Central Bank, the Qatar Investment Fund, the capital pension authority of Qatar, administrative authorities, the Qatar Development Bank, other financial institutions wholly owned by the government of Qatar and other banks or institutions mutually agreed on by the contracting states.
- (xx) A 0% rate applies to dividends distributed to the following beneficial owners:
- Resident companies holding directly at least 10% of the capital in the company paying the dividend for at least one year before the payment of the dividend
 - Pension schemes
 - The central bank of the other contracting state
- A 10% rate will apply to distributions to partnerships and in all other cases.
- (yy) A 0% rate applies to interest paid on loans granted by the Bulgarian National Bank or, in the case of Uzbekistan, by the Central Bank or the National Bank of the Foreign Economic Activity of the Republic of Uzbekistan, or any other similar financial institution as agreed through an exchange of letters between the competent authorities of the contracting states.
- (zz) A 0% rate applies to interest paid on the following loans:
- Loans related to the sale on credit of equipment, merchandise or services
 - Loans granted by financial institutions
 - Loans granted to pension schemes
 - Loans granted to the government of Bulgaria or the government of Switzerland, a political subdivision or local authority, or the central bank of Bulgaria or Switzerland
 - Loans granted by a company to a company of the other contracting state if such company has directly held 10% of the capital for at least one year before the payment of the interest or if both companies are held by a third company and such company has directly held at least 10% of the capital of the first company and 10% of the capital of the second company, for at least one year before the payment of the interest
- (aaa) The 0% rate applies to interest paid on the following loans:
- Bonds or similar obligations of the government, political subdivisions or local authorities
 - Loans granted by the government or state-owned central banks
 - Loans and credits made, guaranteed or insured by the Export Development Corporation
 - Loans made, guaranteed or insured by the Bulgarian National Bank, the Bulgarian Foreign Trade Bank or other entity as agreed through an exchange of letters between the competent authorities of the contracting states
- (bbb) The 0% rate applies to interest paid on the following loans:
- Loans granted by the government, political subdivisions, local authorities or the central banks
 - Loans and credits extended or endorsed by the Bulgarian Foreign Trade Bank and the Export-Import Bank of India (Exim Bank) to the extent such interest is attributable to financing of exports and imports only, as well as by other institutions in charge of public financing of external trade
 - Loans and credits extended or endorsed by other persons to the extent that the loan or credit is approved by the government
- (ccc) The 15% rate applies to royalties relating to copyrights of literary, artistic or scientific works, other than cinematographic films or films or tapes used for radio or television broadcasting. The 20% rate applies to other royalties and technical service fees.
- (ddd) The 10% rate applies if the beneficial owner held directly 25% of the capital of the paying entity for an uninterrupted period of at least two years before the payment of the dividend.

- (eee) The 0% rate applies to interest paid on the following loans:
- Loans granted by the government, political subdivisions, local authorities or the central banks
 - Loans or credits made or guaranteed by the Export Import Bank of Korea and Korea Development Bank, as well as by the Bulgarian Foreign Trade Bank, or any other institution as agreed through an exchange of letters between the competent authorities of the contracting states
 - Loans related to the sale on credit of industrial, commercial or scientific equipment
- (fff) The existing treaty is being renegotiated.
- (ggg) The 0% rate applies if the interest income is accrued and beneficially owned by the state, a local authority, the central bank or other state-owned institution or bank or if the loan receivable is guaranteed, insured or financed by an institution that is wholly owned by the state.
- (hhh) The 0% rate applies if the Bulgarian-source dividends are distributed to the Central Bank of Norway, the global government pension fund or an institution in which the government participation is more than 75%. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The rate is 15% in all other cases.
- (iii) The rate is 0% for interest on the following loans:
- Loans granted by a bank, the government, a political subdivision or local authority
 - Loans granted, insured or guaranteed by a governmental institution for the purpose of promoting exports or loans in connection with the sale on credit of industrial, commercial or scientific equipment
- (jjj) The 0% rate applies to dividends distributed to companies and pension funds. The 15% rate applies if the dividends are paid out of income (including gains) derived directly or indirectly from immovable property by investment vehicles. In all other cases, the withholding tax rate is 5%.
- (kkk) The rate is 5% for interest on loans other than loans granted by financial institutions or pension schemes, the government, a political subdivision or local authority, loans by the central bank, loans between associated companies (that is, a direct holding relationship of at least 10% was maintained for at least one year before the payment of the interest) and loans in connection with the sale on credit of any equipment, merchandise or services.

A treaty between Bulgaria and Bosnia and Herzegovina with respect to taxes on income has been initialed.

A. At a glance

Tax on Income Rate (%)	20
Capital Gains Tax Rate (%)	20
Withholding Tax (%) (a)	
Dividends	14
Interest	14
Royalties	14
Income from Movable and Immovable Property	14
Technical, Management and Service Fees	14
Insurance Premiums	14 (b)
Branch Remittance Tax	14
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (c)

(a) These withholding tax rates apply to payments to nonresidents only. For a listing of withholding taxes applicable to payments to resident taxpayers, see Section B.

(b) This does not apply to reinsurance.

(c) See Section C.

B. Taxes on corporate income and gains

Tax on income. Tax on Income (ToI) is calculated on taxable income inclusive of capital gains and passive income, such as interest, royalties and rent.

The ToI is imposed on the worldwide income of resident taxpayers. It is imposed on the Cambodian-source income of nonresident taxpayers. For companies, resident taxpayers are enterprises organized, managed or having a principal place of business in Cambodia. A company that is not a resident taxpayer and that receives income from a Cambodian source is considered to be a nonresident taxpayer.

ToI rates. The standard rate of ToI for legal persons is 20%.

A tax rate of 30% applies to income derived from oil or natural gas production sharing contracts and from the exploitation of natural resources including timber, ore, gold and precious stones.

A tax rate of 5% is imposed on the gross premium income of insurance companies providing insurance or reinsurance products for property or other risks. However, insurance companies providing life insurance or reinsurance in the form of a savings product are taxed at a rate of 20%.

Minimum tax. Minimum tax is a separate annual tax imposed at a rate of 1% of annual turnover inclusive of all taxes, except value-added tax (VAT). If the ToI liability exceeds the amount of the minimum tax, the taxpayer is not liable for the minimum tax. If taxpayers' accounting records meet the criteria set by the tax authority for the maintenance of proper accounting records, these taxpayers are exempt from the minimum tax.

Additional Income Tax on Dividend Distribution. The Additional Income Tax on Dividend Distribution (AITDD) is imposed on the distribution of retained earnings to local and overseas shareholders. The AITDD is payable by the distributing company. The AITDD rate varies according to the rate of ToI that was imposed on the retained earnings. The following are the rates of the AITDD.

Rate of ToI (%)	Amount of AITDD
0	Dividend x 20/100
20	0
30	0

Investment incentives. A Qualified Investment Project (QIP) registered and approved by the Council for the Development of Cambodia is entitled to the incentives described below.

An exemption from ToI applies to the trigger period plus the three-year priority period. The trigger period begins on the date of final registration and ends on the earlier of the end of the third year after the first revenue is earned or the end of the year preceding the year in which the first taxable income is earned. The priority period, which is specified in the Finance Law and varies by project, may have a duration of up to three years. The taxpayer is also entitled to an exemption from the minimum tax if it is confirmed by the tax authorities that the taxpayer is maintaining proper accounting records.

QIPs are also eligible for import duty exemption with respect to the importation of production equipment, construction materials, raw materials, intermediate goods and accessories that serve production.

Capital gains. All realized gains (including capital gains) are considered to be income. Tax on capital gains is not separately imposed in Cambodia. Capital gains derived from the disposal of fixed assets are treated as ordinary income and generally taxed at the standard ToI rate of 20%.

Administration. Resident taxpayers must file annual ToI or minimum tax returns within three months after the end of the tax year.

Resident taxpayers must make monthly prepayments of ToI, which are each equal to 1% of monthly turnover inclusive of all taxes, except VAT. The prepayments must be made by the 20th day of the month following the month in which the tax liability arose. The tax payment can be used to offset the annual ToI or minimum tax liability. Prepayments of ToI are not required during the period of exemption from ToI.

Dividends. Dividends paid to nonresident taxpayers are subject to withholding tax at a rate of 14%.

Withholding taxes

Payments to resident taxpayers. Resident taxpayers carrying on business in Cambodia must withhold tax from payments made to other resident taxpayers at the following rates.

Payment	Rate (%)
Interest paid to recipients other than domestic banks and saving institutions	15
Interest paid on non-fixed term saving accounts by domestic banks or saving institutions	4
Interest paid on fixed-term saving accounts by domestic banks or saving institutions	6
Royalties	15
Rent paid for movable and immovable property (except for subleasing with proper registration)	10
Payments to individuals for services, including management, consulting and similar services	15

Payments to nonresident taxpayers. Resident taxpayers must withhold tax at a rate of 14% on payments to nonresidents that earn Cambodian-source income, which is defined to include the following:

- Interest paid by resident enterprises, resident pass-through entities or Cambodian governmental institutions
- Dividends distributed by resident taxpayers
- Income from services performed in Cambodia
- Compensation for management and technical services (not defined) paid by resident persons
- Income from movable or immovable property, if the property is located in Cambodia
- Royalties from the use of, or the right to use, intangible property paid by residents or by nonresidents through a permanent establishment that the nonresident maintains in Cambodia
- Gains from sales of immovable property located in Cambodia or from transfers of interests in immovable property located in Cambodia
- Insurance premiums paid on the insurance of risks in Cambodia
- Gains from the sale of movable property that is part of the business property of a permanent establishment maintained by a nonresident taxpayer in Cambodia
- Income from business activities carried on by nonresidents through a permanent establishment in Cambodia (branch remittance tax)

In general, the above withholding taxes are considered a final tax. However, the withholding tax on rent paid to registered resident taxpayers may be offset against the resident taxpayers' ToI liability.

If withholding tax is not withheld from the recipient, it is borne by the payer. Accordingly, the withholding tax is not deductible for purposes of the ToI.

Withholding tax returns and payments. Resident taxpayers must submit withholding tax returns and remit withholding taxes to the tax authorities by the 20th day of the following month.

Foreign tax relief. Cambodia allows a credit against the ToI for foreign taxes paid on foreign-source income if supporting documentation exists.

C. Determination of trading income

General. Taxable income equals the difference between total income and allowed expenses that are incurred to carry on the business.

Allowable deductions include most expenses incurred in the course of carrying on a business enterprise with certain limitations. These limitations include the following:

- The deduction of charitable contributions to specified organizations is limited to 5% of taxable income before deducting the amount of the charitable contributions.
- Depreciation is allowed as a deduction in accordance with rates and methods set forth in the tax regulations.
- Deductions for interest are limited to interest income plus 50% of taxable income excluding interest income and expenses. The disallowed interest may be carried forward to subsequent years and deducted subject to the same limitations (also, see *Special rules for loans*).

Non deductible expenses include the following:

- Expenses incurred on activities generally considered to be amusement, recreation, entertainment or on the use of any means with respect to such activities
- Losses on direct or indirect sales or exchanges of property between related parties
- Penalties, additional tax and late payment interest imposed for violation of the tax regulations
- Donations, grants or subsidies made to other than specified organizations

Special rules for loans. According to Cambodia's tax regulations, a limitation of interest rates on loans obtained from banks and other enterprises should be determined in accordance with the following rules:

- For loans from third parties, the interest rate should not exceed 120% of the market rate at the time of the loan transaction.
- Before 21 August 2018, for loans from related parties, the interest rate should not exceed the market rate at the time of loan transaction.
- Effective from 21 August 2018, for loans from related parties, the interest rate is required to be at arm's length.

In this context, the term “market rate” is the average interest rate on loans from at least five of the largest commercial banks in Cambodia to their customers. The market rate is published annually by the General Department of Taxation (GDT) in January or February for the preceding year. Interest costs relating to an interest rate higher than the rate quoted by the GDT are not deductible for ToI purposes.

The 2017 market interest rate for US dollar-denominated loans was 9.31% per year. The market interest rate for loans denominated in Khmer riel (KHR) for 2017 was 12.12% per year. The 2018 market interest rate for US dollar-denominated loans was 8.35% per year. Furthermore, the market interest rate for KHR-denominated loans for 2018 was 9.44% per year.

For loans referred to in the first two bullets above, the taxpayer is required to notify and submit the agreements and other supporting documents to the tax authorities within 30 days after entering into the transaction. If the taxpayer fails to notify the tax authorities by providing it with the supporting documents, the loan amount may be added to the taxpayer’s taxable income for that year.

For loans referred to in the third bullet above, a copy of the loan agreement is not required to be submitted to the GDT. However, the taxpayer is required to maintain supporting documents (for example, the loan agreement and transfer-pricing documents) to provide to the GDT on request.

In addition, deductions for interest are limited to 50% of taxpayer’s net, non-interest income, plus interest income, if any. Any disallowed interest may be carried forward and a deduction claimed in subsequent years, subject to the same limitations.

Provisions. Provisions for losses or expenses that have not occurred are not allowed for tax purposes even if the incurrence of such losses or expenses is probable. However, domestic banks or savings institutions may establish provisions for bad debts within the threshold provided by the GDT.

Tax depreciation and amortization. The tax regulations divide fixed assets into four classes for purposes of depreciation and specify the depreciation methods and rates for the classes. The following are the classes.

Classes	Assets	Method	Rate (%)
1	Building and structures	Straight-line	5
2	Computers, electronic information systems, software and data handling equipment	Declining-balance	50
3	Automobiles, trucks, and office furniture and equipment	Declining-balance	25
4	Other tangible property	Declining-balance	20

A QIP (see Section B) may apply a special depreciation rate of 40% in the year of purchase or in the first year the tangible assets

are placed into operation, if later. If the enterprise elects to use the exemption period for the ToI, the special depreciation rate does not apply.

Intangible assets with a limited useful life, such as patents, copyrights, drawings, models, and franchises, can be amortized over their useful life on a straight-line basis. If the life of intangible assets cannot be determined, the assets are amortized using the straight-line method at a rate of 10%.

Relief for losses. Losses can be carried forward to offset future taxable income for the following five years. The carryback of losses is not allowed.

The carryforward of losses is subject to restrictions including continuity of ownership and conducting the same business activities.

Groups of companies. Cambodia does not allow consolidated tax filing or provide other group tax relief.

D. Other significant taxes

Value-added tax. Resident taxpayers providing taxable supplies must register for VAT. Taxable supplies include supplies of goods or services by taxable persons in Cambodia.

The standard rate of VAT is 10%. A 0% rate of VAT applies to exports of goods and services including international transportation of passengers and goods and services with respect to such transportation. It also applies to enterprises in supporting industries and subcontractors that supply certain goods and services to exporters.

The tax law specifies certain nontaxable supplies.

A resident taxpayer must complete the registration for VAT within 30 days after the date on which it becomes a taxable person. The filing of the VAT returns and payment of VAT must be made by the 20th day of the following month.

Other taxes. Cambodia imposed various other taxes, including the following:

- Specific Tax on Certain Merchandises and Service
- Tax for Public Lighting
- Accommodation Tax
- Patent Tax
- Registration Tax (property transfer tax)
- Fiscal Stamp Tax
- Tax on Immovable Property
- Tax on Unused Land
- Tax on Means of Transportation

E. Foreign-exchange controls

The Cambodian currency is the Khmer riel (KHR).

Cambodia does not impose any restrictions on the purchase of foreign currencies through authorized financial institutions.

F. Tax treaties

Double tax treaties with Brunei Darussalam, China, Singapore, Thailand and Vietnam. have been ratified and have been in force

since 1 January 2018 for Singapore and Thailand and since 1 January 2019 for Brunei Darussalam, China and Vietnam. Cambodia has also signed a double tax treaty with Indonesia, which has not yet been ratified. The treaties reduce the withholding tax rate from 14% to 10% on dividends, interest and royalties paid to treaty-country residents. An application to apply treaty relief must be made to the Cambodian tax authorities.

A. At a glance

Corporate Income Tax Rate (%)	33 (a)
Capital Gains Tax Rate (%)	5/16.5/33 (b)
Branch Tax Rate (%)	33 (a)
Withholding Tax (%)	
Dividends	16.5 (c)(d)
Interest	0/16.5 (e)
Royalties from Patents, Know-how, etc.	15
Petroleum Subcontractors	15 (f)
Fees for Technical Services, Digital Services and Professional Activities, Public Procurement, and Ad Hoc Material Services from Abroad	2 to 15 (g)
Specific Payments to Resident Individuals or Companies	5.5 (h)
Branch Remittance Tax	16.5
Net Operating Losses (Years)	
Carryback	0
Carryforward	4

- (a) The minimum tax is generally 2.2% or 5.5% of turnover, or 15.4% of the gross margin. For further details, see Section B.
- (b) In certain circumstances, the tax is deferred or reduced (see Section B). Capital gains realized in Cameroon or abroad from the direct or indirect transfer of stocks, bonds and other capital shares of enterprises located in Cameroon are taxed at a rate of 16.5%. Capital gains on the sale of real estate are taxed at a rate of 5%.
- (c) This withholding tax also applies to directors' fees, nondeductible expenses and adjustments of profits following a tax examination. The withholding tax also applies to allowances granted to members of commissions, ad hoc or permanent committees and to members of public, semipublic, regional or local bodies.
- (d) This withholding tax applies to residents and nonresidents.

- (e) Interest on savings of up to XAF10 million is exempt from withholding tax. Interest on state bonds is exempt from corporate income tax and the tax on movable capital (this tax is withheld at a rate of 16.5% from income on shares and negotiable bonds and from certain other income). The 2014 Financial Law confirms that interest on loans paid to nonresident lenders or creditors is exempt from withholding tax. Special income tax applies to all types of deliveries that are part of public contracts or orders and that are paid for by state, regional or local authorities, public institutions, public corporations or semi-public companies, or that are paid for through external financing. The rate is 15%, which is withheld at source.
- (f) An optional final withholding tax is available for petroleum contractors and subcontractors of oil companies (foreign companies in Cameroon that have contracted with petroleum companies established in Cameroon). The rate of this special tax (TSR) is fixed at 15% of turnover. The 2011 Financial Law extended this tax regime to foreign individuals or companies that carry out activities on a casual (day-to-day) basis in Cameroon, subject to the prior authorization of the Director General of Taxation, issued on written request of the service providers (companies) or authorized clients. The 2016 Financial Law extended this tax regime to remuneration for technical assistance services, equipment rental and equipment, and all services provided to oil companies during the research and development (R&D) phase, with the exception of services provided at cost by an affiliated company during the R&D phase. Petroleum subcontractors admitted to the TSR regime must maintain supporting documentation that enables the tracing of the relevant tax bases. They must also display on all of their bills the gross amounts of the transactions, the TSR to be deducted at source, their customers and the net amount to be paid.
- (g) This withholding tax applies to nonresidents. The 2012 Financial Law provides that this tax also applies to “software,” which is defined as computer applications and programs relating to the operation or functioning of an enterprise. The 2017 Finance Law provides that the general rate of 15% applies to all remuneration subject to this tax except for the following:
- Remuneration for ad hoc material services (defined in the 2011 Finance Law) paid to non-domiciled companies without a permanent establishment in Cameroon carrying out economic activities there, which is subject to an average rate of 10%
 - Remuneration under public procurement for successful bidders not domiciled in Cameroon, which is subject to a reduced rate of 5%
 - Remuneration paid by Cameroonian shipping companies for leasing and chartering vessels, for leasing space on foreign vessels and for commissions paid to port agents abroad, which are all subject to a super reduced rate of 2%
- (h) This withholding tax applies to fees, commissions, emoluments and remuneration for services that are paid to resident individuals or companies. These payments include the following:
- Payments made to persons in the self-employed professions, such as consultants, experts, architects, physicians, auditors in charge of damages, trade intermediaries and salesmen
 - Payments made to magistrates and representatives of the law (attorneys, bailiffs and notaries)
 - Payments made to forwarding agents, customs brokers, stevedores, accounting firms and internet service providers.
- The withholding tax does not apply to payments made for services related to transport, bank interest, insurance premiums and commissions, air ticket expenses and commissions, and water, electricity and telephone expenses. The 10% surtax applies to the withholding tax rate of 5%, resulting in a total withholding tax rate of 5.5%.

B. Taxes on corporate income and gains

Corporate income tax. Income tax in Cameroon is imposed on undertakings deemed to be operating in Cameroon, which are the following:

- Undertakings headquartered in Cameroon or with an effective management office in Cameroon
- Undertakings that have a permanent establishment in Cameroon
- Undertakings that have a dependent representative in Cameroon

The profits of undertakings that do not fulfill the conditions referred to above are taxed in Cameroon if they carry out activities that form a full business cycle in Cameroon.

Tax rates. The regular corporate income tax rate is 30% (plus a 10% additional council tax). For companies operating under the real earnings tax regime, the minimum tax payable is 2% (plus 10% additional council tax) of monthly gross sales (turnover). For production companies in the milling sector, the minimum tax payable is 2% (plus 10% additional council tax) of monthly gross sales after a 50% rebate. However, for companies subject to the real earnings tax regime that are in the administered margin sectors, which are the distribution of petroleum, domestic gas, milling, pharmaceutical and press products, the minimum tax payable is 14% (plus 10% additional council tax) of the gross margin. Effective from 1 January 2018, these companies can opt for the minimum tax at 2% (plus 10% additional council tax) of monthly gross sales. This option is irrevocable over the year and is tacitly renewed for subsequent years until renunciation. It must be notified no later than 31 January by a simple letter to the center of affiliation (the tax center responsible for the assessment, control and recovery of all taxes, duties, and other fiscal and quasi-fiscal charges of companies within its jurisdiction). The minimum tax payable is 5.5% for companies under the simplified tax regime. For non-registered companies, the minimum tax payable is 10%. This rate is increased to 20% for forestry companies if they do not justify an operating permit issued by the competent authority. The 2018 Financial Law introduced a minimum tax of 5% (plus a 10% additional council tax) withheld at source for public procurements under XAF5 million, regardless of the provider's tax regime. The minimum tax is creditable against corporate tax due for the current financial year.

Profits realized in Cameroon by branches of foreign companies are presumed to be distributed and are consequently subject to a branch withholding tax of 16.5% on after-tax income. This rate is subject to reduction by treaty.

Deductions at source or advance payments apply to all purchases and importations by traders, including the following:

- Purchases and importations by traders including those subject to the flat rate tax regime
- Purchases of goods by traders from manufacturers, farmers, importers, wholesalers, retail-wholesalers and forestry operators
- Purchases of petroleum products by petrol station owners
- Purchases of staple products by exporters
- Purchases and importations by enterprises that do not hold the taxpayer's card (non-registered enterprises)

Exceptions to the advance payment rule apply to the following:

- Importation of goods by traders under the Specialized Management Units of the Directorate General of Taxation
- Purchases of goods by the state, councils and persons living abroad
- Purchases by registered industrialists for the operation of their enterprises if they are assessed under the real earnings tax regime
- Local purchases of petroleum products by marketers registered in the active taxpayer logbook of the large taxpayers' unit

The following are the applicable tax rates for advance payments:

- 2% of the amount of operations realized by traders under the real earnings tax regime.
- 5% of the amount of operations realized by registered traders subject to the flat rate tax regime.
- 5% of the amount of operations realized by traders under the simplified tax regime.
- 10% of the amount of operations realized by registered importers that are subject to the flat tax regime and by enterprises without a taxpayer's card.
- 14% of the gross margin for the purchase of goods with a regulated profit margin.
- 15% of the amount of operations realized by taxpayers engaging in import operations that do not have a taxpayer's card. This rate is increased to 20% if the taxpayer makes sales under customs.

The above rates are added to the sales price or customs value of the goods purchased. The advance payments are calculated without the council surtax of 10%. For persons subject to corporate income tax, advance payments are creditable against their future monthly tax installments or minimum tax.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies depending on the nature of the project and the level of investments.

Investment incentives. The law of 18 April 2013 introduced investment incentives, which are summarized below.

Installation phase. Incentives that are available during the installation phase (five years after the issuance of the approval) include exemption from registration duties, transfer duties, customs duties and value-added tax for certain items.

Operational phase. Incentives available during the operational phase (10 years for all companies qualifying for the incentives) include exemptions or reductions with respect to minimum tax, corporate tax, customs duties on certain items and other specified taxes and fees.

In addition, companies may carry forward losses to the fifth year following the year in which the losses are incurred.

Capital gains. Capital gains are taxed at a rate of 16.5%, subject to tax treaties. Capital gains include gains on the sale of real estate, corporate shares and business assets. Capital gains on the sale of real estate are taxed at a rate of 5%. However, the tax on capital gains can be deferred or eliminated in the event of a merger.

Capital gains realized in Cameroon or abroad from the direct or indirect transfer of stocks, bonds and other capital shares of enterprises located in Cameroon are subject to tax.

If the business is totally or partially transferred or discontinued (such as in the event of a merger, liquidation or sale of the business), only one-half of the net capital gains is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased.

Capital gains realized on the Cameroonian stock market are exempt from corporate income tax and the tax on movable capital. However, under the 2014 Financial Law, capital gains realized in Cameroon or abroad that are derived from the direct or indirect sale of shares by an individual or corporate entity holding an exploitation or exploration permit for natural resources extracted from the Cameroonian subsoil are subject to income tax on the gains.

Administration. The fiscal year runs from 1 January to 31 December. However, companies that started operating during the six-month period before the prescribed closing date can report their first results at the end of the fiscal year following the fiscal year in which they began activities.

Corporate income tax must be paid by the deadline for filing the tax return. Companies must file their income tax return by 15 March of the year following the fiscal year.

Enterprises falling under a specialized management unit are required to transmit their annual tax returns electronically through the computer system set up by the tax administration. The late filing of a nil monthly or annual return or a return with credit after an official warning is subject to a fixed fine of XAF1 million. Without prejudice to other penalties provided for in the Manual of Tax Procedures, the late filing of the annual tax return is subject to the following non-discountable fixed fines:

- XAF5 million for taxpayers falling under the large taxpayers' unit
- XAF1 million for taxpayers falling under the medium-sized taxpayers' unit
- XAF250,000 for taxpayers falling under divisional tax centers

Late returns are subject to interest of 1.5% of the tax due per month of delay. In addition, late payments are subject to a penalty of 10% per month of delay, up to a maximum of 30% of the tax due, and to the following non-discountable fixed fines:

- XAF500,000 for taxes amounting from 0 to XAF5 million
- XAF2 million for taxes amounting from XAF5 million to XAF25 million
- XAF5 million for taxes amounting from XAF25 million to XAF50 million
- XAF10 million for taxes of more than XAF50 million

As of 1 January 2019, any natural or legal person regularly engaged in the audit of the accounts or the tax review of a public or private entity must communicate a report of its work to the tax administration, no later than the 15th of the month following the end of its duty. A failure to satisfy this requirement is subject to payment of a fixed fine of up to XAF50 million.

Tax receivables that are at least five years old from the date of issuance of the assessment notices and for which administrative redress procedures have been exhausted may be the subject of a negotiated settlement request a period of one year beginning on 1 January 2015.

The minimum tax is paid in accordance with the same rules applicable to the payment of corporate income tax. Manufacturers, farmers, wholesalers, retail-wholesalers, forestry operators, petrol

station owners and exporters must pay to the tax authorities the advance payment of tax on purchases by the 15th day of the month following the month of the purchase (for further details regarding advance payments, see *Tax rates*).

Dividends. Dividends paid to residents in Cameroon are subject to a 16.5% withholding tax (15% plus the 10% council surtax). Resident recipients must include the gross dividend in taxable income, but they receive a corresponding 16.5% tax credit to prevent double taxation. Dividends paid to nonresidents are subject to a 16.5% withholding tax, which is a final tax.

A parent corporation may exclude up to 90% of the dividends received from a 25%-owned subsidiary if the parent company and the subsidiary have their registered office in a Central African Economic and Monetary Community (CEMAC) country (Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea and Gabon). In this case, however, no withholding tax credit is allowed. Instead, the tax can be offset against any withholding tax due on its own dividend distributions.

Foreign tax relief. In general, foreign tax credits are not allowed; income of residents and nonresidents subject to foreign tax that is not exempt from Cameroonian tax under the territoriality principle is taxable, net of the foreign tax. The French tax treaty, however, provides a tax credit that corresponds to withholding tax on passive income.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the OHADA (organization for the harmonization of business law in French-speaking Africa) standard statements.

Business expenses are generally deductible unless specifically excluded by law or by the provisions of an international convention. Expenses that are not deductible include the following:

- Head office overhead, research costs and technical, financial and administrative assistance fees paid to residents or nonresidents that exceed any of the following:
 - 5% of taxable profits for ordinary law companies before their deduction
 - 2.5% of turnover for public works projects
 - 7.5% of turnover for design and engineering services
- Royalties from patents, brands, models or designs paid to a non-CEMAC corporation participating directly or indirectly in the management of, or owning shares in, the Cameroonian corporation are the deductible up to an overall limit of 2.5% of taxable income before the deduction of the expenses.
- Rent expense for movable equipment paid to a shareholder that manages the company in fact or by right and holds, directly or indirectly, more than 10% of the capital.
- Losses related to bad debts that do not comply with the enforcement measures provided in the OHADA Uniform Act relating to the organization of simplified procedures for collection and enforcement.
- Losses related to damages noted and validated in the presence of approved tax agent.

- Losses resulting from misappropriation by a shareholder or manager of the company, or losses attributable to the negligence of management.
- Liberalities, gifts and subsidies exceeding 0.5% of the turnover of research, philanthropic, development, educational, sports, scientific, social and family institutions or bodies.
- Gifts and subsidies exceeding 5% of turnover of clubs participating in official national competitions and the bodies in charge of organizing these competitions.
- Interest paid to shareholders in excess of the central bank annual rate plus two points. Under the 2014 Financial Law, the deductibility of interest paid to shareholders owning directly or indirectly at least 25% of the capital or voting rights of the company is subject to the following two cumulative conditions:
 - Interest paid may not exceed one and one-half of the amount of real capital for all shareholders.
 - Interest paid to such affiliates may not exceed 25% of the income before income tax and deduction of such interest and depreciation.
- Commissions and brokerage fees for services on behalf of companies located in Cameroon that exceed 5% of purchased imports and sales of exports.
- Remuneration granted to wage earners that are excessive in comparison to the services rendered and that do not correspond to effective work and conventional norms.
- Amounts set aside for self-insurance.
- Certain specific charges (such as contributions other than those for retirement paid to a foreign social security organization, which are deductible up to a limit of 15%, and premium insurance paid to companies located in Cameroon for employees' retirement indemnities), gifts, subsidies and penalties (to some extent).
- Expenses paid in cash of XAF500,000 or more. The XAF500,000 limit is assessed with respect to the total amount of specific expenses recorded in the expenditures account. Accordingly, splitting an expense worth XAF500,000 into two equal parts of XAF250,000 each and paying them in cash does not result in the deductibility of the expenses. Under the 2014 Financial Law, all reimbursements of loan advances to shareholders paid in cash are treated as dividends and are accordingly subject to dividend withholding tax.
- Expenses paid to local suppliers without reference to a Cameroonian tax identification number and without an invoice that complies with the standard requirements for the deductibility of expenses.
- Remuneration paid to liberal professionals in violation of the regulations governing their respective professions.
- Expenses for services and certain purchases paid to natural persons or nonresident legal entities established in territories or states considered to be tax havens.
- Disbursements from tax havens invoiced to local companies by other companies located in or outside tax havens.

Inventories. Inventory is normally valued at the acquisition cost or at the lower of cost or market value. Cost must be determined on a weighted average cost-price method. The first-in, first-out (FIFO) method is also generally acceptable.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Insurance companies may deduct technical provisions provided by the Conférence Interafricaine des Marchés d'Assurance (CIMA) Code.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. Small equipment and other items that have a value not exceeding XAF500,000 without tax are directly accounted for as charges and considered deductible expenses.

Legal revaluation of fixed assets. The 2011 Financial Law established a regime for the legal revaluation of tangible and intangible fixed assets, regardless of whether the assets are depreciable. The revaluation must occur by 31 December 2013. The capital gain resulting from revaluation is subject to a withholding tax at a rate of 5%. This is a final tax. The 5% withholding tax is not due if the amount of the capital gain is reinvested within two financial years.

Relief for tax losses. Losses may be carried forward for four years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. The Cameroonian tax law does not provide for the fiscal integration of Cameroonian companies equivalent to a consolidated filing position.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on transactions carried out in Cameroon; certain transactions are exempt	
Standard rate	19.25
Exports	0
Business license; rate varies depending on the amount of turnover	Various
Radio-television tax, equal to the business license; payable by companies subject to the business license	Various
Registration duties, on transfers of real property or businesses	1 to 15
Payroll taxes, paid by employer	2.5
Social security contributions on an employee's annual gross salary, limited annually to XAF9,000,000, with a minimum of XAF750,000 per month	
Family allowances, paid by employer	3.7 to 7
Old age, disability and survivor's pension; paid by	
Employer	4.2
Employee	4.2

Nature of tax	Rate (%)
Social security contributions on an employee's annual gross salary for job-related accidents and diseases; paid by employer	1.75 to 5

E. Miscellaneous matters

Foreign-exchange controls. Exchange control regulations exist in Cameroon for financial transfers outside the franc zone, which is the monetary zone including France and its former overseas colonies. A CEMAC rule (No. 0200/CEMAC/UMAC/CM, dated 29 April 2000) applies to all of the CEMAC countries.

Transfer pricing. In 2012, Article M19 bis in Book II of the General Tax Code on Manual of Tax Procedures was introduced to increase the regulation and control of transfer pricing.

Under the rules, if during an accounts auditing, the administration has evidence that a company has indirectly transferred profit, the administration may request that the company provide information and documents with respect to certain items, including the following:

- Relationships between the company and one or more companies or groups established outside Cameroon
- The pricing method for industrial, commercial or financial operations in which the company engages with the related parties mentioned in the first bullet and justification for this method and the agreed consideration in these operations
- The activities carried out by the related parties mentioned in the first bullet
- The tax treatment for the company and related parties mentioned in the first bullet with respect to the operations performed with the related parties

The 2014 Financial Law requires “a detailed statement of transactions with companies which control or which are controlled by them up to 25%, in addition to other existing disclosure and documentation requirements.” In addition, the 2018 Financial Law states that these companies must “also attach documentation to justify their transfer pricing policy.”

Companies in the large taxpayers unit must transmit the following information to the tax authorities by 15 March of each year at the same time of the filing of the annual tax return:

- A statement of their shareholdings in other companies if the holdings exceed 25% of the share capital
- A detailed statement of intergroup transactions

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Canada	15/20 (a)	15/20 (a)	15/20 (a)
Central African Republic	– (c)	16.5 (b)	– (d)
Chad	– (c)	16.5 (b)	– (d)
Congo	– (c)	16.5 (b)	– (d)
Equatorial Guinea	– (c)	16.5 (b)	– (d)
France	15	16.5 (b)	7.5/15 (e)
Gabon	– (c)	16.5 (b)	– (d)

	Dividends	Interest	Royalties
	%	%	%
Morocco	10 (f)	10 (f)	10 (f)
South Africa	10/15 (g)	0/10 (h)	10
Tunisia	12	15	15
Non-treaty jurisdictions	16.5	0 (i)	15

- (a) The 15% rate applies to payments from a Cameroonian source. The 20% rate applies to payments from a Canadian source.
- (b) If from a Cameroonian source, the payments are subject to withholding tax under Cameroonian domestic tax law. See Section A.
- (c) Withholding rates are determined under the domestic tax law of the state of domicile of the payer.
- (d) Withholding tax is not imposed. The income is subject to tax in the state of the recipient.
- (e) The 7.5% rate applies to payments for financial services, accounting services and technical assistance. The 15% rate applies to other royalties.
- (f) The 10% rate applies to the gross amount of the payments.
- (g) The 10% rate applies if the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends.
- (h) Interest arising in a contracting state and paid to the government or the central bank of the other contracting state is exempt.
- (i) See footnote (e) to Section A.

A. At a glance

Federal Corporate Income Tax Rate (%)	15 (a)
Federal Capital Gains Tax Rate (%)	7.5 (a)(b)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	25 (c)
Interest	0/25 (d)
Royalties from Patents, Know-how, etc.	25 (c)
Branch Remittance Tax	25 (e)
Net Operating Losses (Years)	
Carryback	3
Carryforward	20

- (a) These 2019 rates are applied to general income that is not eligible for the manufacturing and processing deduction or the small business deduction. The calculation of the rate is discussed in Section B. Additional tax is levied by the provinces and territories of Canada, and the combined federal and provincial or territorial rates on general income may vary from approximately 25% to 31%.
- (b) 50% of capital gains is subject to tax.
- (c) Final tax applicable only to nonresidents. This rate may be reduced by a tax treaty (see Section F).
- (d) In general, no withholding tax is imposed on interest paid to payees who are dealing at arm's length with the payer. However, withholding tax at a rate of 25% typically applies to interest paid or credited to related nonresidents (the rate may be reduced by a tax treaty). Other specific exemptions or specific inclusions may apply to change the general rules noted above.
- (e) This tax is imposed in addition to the regular corporate income tax. For details, see Section B. The rate may be reduced by a tax treaty.

B. Taxes on corporate income and gains

Corporate income tax. Corporations resident in Canada (whether owned by Canadians or nonresidents) are taxed on their worldwide income from all sources, including income from business or property and net taxable capital gains. Nonresident corporations are taxed only on certain Canadian-source income. In general, a corporation is deemed to be resident in Canada if it is incorporated in Canada or has its central mind and management located there.

If a tax treaty exists between Canada and the country in which a nonresident corporation is resident, the determination of whether a nonresident is taxable in Canada may be restricted or modified, and lower rates may apply. In general, Canada's tax treaties provide that a nonresident that is resident in a treaty country is subject to

Canadian tax on income derived from carrying on business in Canada only if the nonresident has a Canadian permanent establishment.

Rates of income tax. Corporations are taxed by the federal government and by one or more provinces or territories. The basic rate of federal corporate tax for 2019 is 38%, but it is reduced to 15% by an abatement of 10 percentage points on a corporation's taxable income earned in a province or territory and a general rate reduction of 13 percentage points on a corporation's full-rate taxable income. Provincial and territorial tax rates are added to the federal tax and generally vary between 10% and 16% of taxable income.

The federal government and the provincial and territorial governments may apply lower rates of tax to active small business earnings and earnings derived from manufacturing and processing.

Nonresident corporations carrying on business in Canada through a branch are taxable at the full corporate tax rate on their net business income earned in Canada, and they must pay an additional tax (branch tax) of 25% on after-tax income, subject to an allowance for investment in Canadian property. This branch tax may be reduced by treaty.

Capital gains and losses. The taxable portion of capital gains and the deductible portion of capital losses is 50%. See Section E for details concerning the taxation of capital gains of nonresidents.

The deductible portion of capital losses (other than allowable business investment losses) in excess of taxable capital gains is termed "net capital loss" and may be carried back three years and carried forward indefinitely, but may be applied only against taxable capital gains.

Proceeds from the disposition of capital property that exceed the tax cost of such property are generally taxed as capital gains. For depreciable property, tax depreciation previously claimed that is recovered on disposition is generally fully included in income.

If control of a corporation is acquired by a person or group of persons, net capital losses incurred before the change of control cannot be deducted in a year after the acquisition of control. Also, the carryback of capital losses to years prior to such change of control is prohibited. A flow through of net capital losses is provided for on certain amalgamations and liquidations.

If a sale of what might otherwise be capital property is regarded as a sale in the course of a taxpayer's business (such as dealers in real estate, securities or art) or as an undertaking in the nature of normal trading, any resulting gain or loss is fully taxable or deductible.

Administration. A corporation's tax year usually ends on the same date as the financial statement year-end. If an acquisition of control occurs, the corporation is deemed to have a tax year ending immediately before the acquisition of control.

Corporate income tax returns are required to be filed within six months following a corporation's tax year-end. Subject to certain

exceptions, nonresident corporations must file a Canadian income tax return if they carry on business in Canada or dispose of taxable Canadian property during the tax year. Nonresident corporations claiming relief from Canadian tax under a tax treaty with another country must disclose detailed information regarding their activities in Canada.

A penalty is levied on returns that are filed late, equal to 5% of the unpaid tax at the required filing date, plus an additional 1% per month (not exceeding 12 months) of such unpaid tax for each month that the return remains unfiled. Repeat offenders may be liable for additional penalties. Nonresident corporations that are required to file Canadian tax returns may be subject to another penalty of up to CAD2,500 even if no tax is payable.

Federal and provincial corporate tax installments must be made monthly during the corporation's tax year. The remaining balance of taxes owed must be paid by the end of the second month following the tax year-end (third month for Canadian-controlled private corporations that carry on an active business and claim a small business deduction).

Interest is charged on late or deficient tax payments based on the prescribed rate. The prescribed rate can vary each quarter. A penalty may apply to late or deficient tax installments.

Dividends. In general, dividends received by one Canadian corporation from another are fully deductible. However, to prevent the use of private companies to obtain significant tax deferrals on portfolio dividend income, such corporations are subject to a special 38½% refundable tax on dividends received from portfolio investments. Additional taxes may be imposed on dividends paid on certain preference-type shares.

Dividends paid by a Canadian corporation to a Canadian resident individual are generally taxable, but the individual also receives a tax credit because the income has already been taxed within the corporation. A dividend received from a nonresident corporation that is a foreign affiliate of a Canadian taxpayer may be exempt from tax (see Section E).

Foreign tax relief. In general, taxpayers resident in Canada may deduct from their Canadian tax liability a credit for income or profits tax and for withholding tax paid to another country. The foreign tax credit is calculated separately for foreign business tax and foreign nonbusiness tax on a country-by-country basis.

If a Canadian corporation receives dividends from a foreign affiliate, the normal foreign tax credits are replaced by either a complete or partial deduction for such dividends (see Section E).

C. Determination of taxable income

General. Taxable profits are computed in accordance with generally accepted commercial principles, modified by certain statutory provisions in the Canadian Income Tax Act.

In general, only 50% of meal and entertainment expenses is deductible for income tax purposes.

Inventories. For tax purposes, inventories may be valued at the lower of cost or fair market value. The last-in, first-out (LIFO) basis is not permitted for tax purposes, despite its acceptability for accounting purposes in certain instances. Corporations may use a different inventory valuation method for tax purposes than the one used for accounting purposes.

Provisions. In general, provisions, such as warranty reserves, are not deductible for income tax purposes. Only actual expenses incurred are tax-deductible.

Depreciation and amortization. Depreciation or amortization included in financial statements is added back, and tax depreciation, generally calculated on a declining-balance basis at prescribed rates, beginning when the asset is available for use, is deducted for tax purposes. The deduction is generally limited in the first year the asset is available for use. Tax depreciation may be fully or partially claimed at the taxpayer's option.

The following are the depreciation rates under the declining-balance method for major categories of assets.

Asset	Rate (%)
Commercial and industrial buildings	4 (a)
Computers	55
Office equipment	20
Motor vehicles	30
Machinery and equipment	20 (b)

(a) Certain eligible nonresidential buildings may qualify for a rate of 6% or 10% (election required).

(b) For machinery and equipment used primarily in manufacturing and processing, the rate is generally 30%. A straight-line rate of 50% applies if the machinery and equipment is acquired after 18 March 2007 and before 2016.

Capital assets are generally pooled into various classes, but, in certain cases, a corporation may elect to include individual pieces of certain types of equipment in separate classes. In general, if an asset is disposed of, the balance of the assets in the class is reduced by the proceeds from the disposition. However, if the proceeds from the disposition of an asset exceed the tax value of the class after depreciation, the excess is recaptured and is subject to tax at the regular corporate tax rates. If the asset is the only asset in the class and if a balance remains after the proceeds are charged to the class, the balance may be deducted as a terminal loss.

On 21 November 2018, the Finance Minister presented the Fall Economic Statement and tabled a notice of ways and means motion to amend the Income Tax Act and the Income Tax Regulations. The statement introduced three key capital cost allowance acceleration measures, including full expensing for manufacturing and processing machinery and equipment, full expensing for clean energy equipment and an accelerated investment incentive. As of the date of publication, the above measures have not been enacted or substantively enacted.

Groups of companies. Canada does not allow consolidated tax reporting for related companies and does not provide relief for group losses.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax (GST), a value-added tax, applies to a broad range of goods and services	5
Harmonized Sales Tax, a value-added tax, applies to a broad range of goods and services in certain provinces	Up to 15
Part VI tax on financial institutions, effectively a minimum tax, which is reduced by income taxes paid; applies on a non-consolidated basis to capital in excess of CAD1 billion	1.25
Provincial/territorial income taxes, on taxable income allocated to jurisdictions in which corporations have permanent establishments (lower rates may apply to manufacturing or processing earnings and active small business earnings)	10 to 16
Provincial payroll taxes; varies by province; paid by employers	Up to 4.3
Canada Pension Plan, on pensionable earnings between CAD3,500 and CAD57,400 (amounts in effect for 2019)	
Employer	5.1
Employee	5.1
Self-employed individual	10.2
(The Province of Quebec offers a similar plan for residents of Quebec.)	
Employment Insurance, on insurable earnings up to a maximum of CAD53,100 (amount in effect for 2019)	
Employee	1.62
Employer (1.4 times the employee rate)	2.27
(Employment Insurance premiums for residents of the Province of Quebec are reduced, because residents of Quebec also must pay premiums for Quebec Parental Insurance. The aggregate amount for both is similar to the total Employment Insurance premiums computed with respect to persons resident outside Quebec.)	

E. Miscellaneous matters

Foreign-exchange controls. Canada does not impose foreign-exchange control restrictions.

Debt-to-equity rules. Canada imposes a thin-capitalization rule limiting the ability of nonresidents to withdraw profits through deductible interest charges. In general, these rules restrict the deductibility of interest paid or payable by a Canadian resident corporation to a specified nonresident shareholder (or to a nonresident person who does not deal at arm's length with a specified shareholder) on debts exceeding 1.5 times the Canadian resident corporation's "equity." A specified shareholder is a shareholder who, either alone or together with persons with whom the

shareholder does not deal at arm's length, owns shares that satisfy either of the following conditions:

- They give the shareholder 25% or more of the votes that could be cast at an annual meeting of shareholders.
- They have a fair market value representing 25% or more of the fair market value of all of the issued and outstanding shares of the corporation.

Canada's thin-capitalization rule applies to Canadian resident corporations, trusts, nonresidents' Canadian branches and partnerships of which a Canadian resident corporation is a member. The thin-capitalization rules may also apply to certain back-to-back (BTB) loan arrangements that would otherwise circumvent the application of the thin-capitalization rules.

In general, the BTB rules apply to arrangements whereby a non-resident corporation (parent), or a person related to the parent, of a corporation resident in Canada (Canco) grants a loan (intermediary debt) or a specified right in a particular property (specified right) to an intermediary and the intermediary debt and/or specified right is "connected to" a debt owed by Canco to the intermediary (primary debt), provided that the amount of the intermediary debt and/or fair market value of the property subject to the specified right is not less than 25% of the amount of the primary debt. When applicable, the BTB rules deem the primary debt to be a debt between Canco and the parent for thin-capitalization purposes. The rules also deem interest payments from Canco to the intermediary to be interest payments from Canco to the parent.

The BTB rules also apply to royalties and similar payments.

Foreign affiliates. A nonresident corporation is considered a foreign affiliate of a Canadian corporation if the Canadian corporation directly or indirectly owns at least 1% of any class of shares of the nonresident corporation and if the Canadian corporation and related persons directly or indirectly own together at least 10% of any class of shares of that nonresident corporation. Dividends received by a Canadian corporation from a foreign affiliate are fully deductible in Canada if the dividends are derived from active business profits earned in a country with which Canada has entered into a tax treaty or a Tax Information Exchange Agreement (TIEA). Dividends are taxable in Canada if they are derived from passive operations (with certain exceptions) or any operations in a non-treaty or non-TIEA country, with relief for foreign tax on such income.

Foreign affiliate dumping rules. Rules, commonly known as the "foreign affiliate dumping (FAD) rules," are aimed at "surplus stripping" on the part of a corporation resident in Canada (CRIC) that is controlled by a nonresident corporation. The FAD rules broadly apply to certain investments in foreign affiliates. They apply to an "investment" in a nonresident corporation (a "subject corporation") by a CRIC if the following two conditions are met:

- The subject corporation must be a foreign affiliate of the CRIC or a foreign affiliate of another corporation resident in Canada that deals at non-arm's length with the CRIC immediately after the investment is made.
- The CRIC must be controlled by a nonresident corporation (parent) at the time the investment is made.

The concept of “investment” is broadly defined and includes equity and debt investments in foreign affiliates, as well as the acquisition of shares of another corporation resident in Canada if the fair market value of all of the foreign shares owned directly or indirectly by the Canadian corporation comprises more than 75% of the total fair market value of all the properties owned by the Canadian corporation.

If applicable, the FAD rules deem dividends to have been paid to the parent by the CRIC or will cause the paid-up capital (PUC) of the shares of the CRIC to be reduced. The rules also contain certain provisions to reduce PUC instead of triggering a deemed dividend, as well as a PUC reinstatement rule if the shares of the subject corporation (or substituted property) are later distributed (or sold) by the CRIC.

Certain exemptions limit the application of the FAD rules. For example, the rules do not apply if, broadly speaking, the business activities of the CRIC are more “closely connected” to the subject corporation than the business activities carried on by any related nonresident corporation, and if officers of the CRIC have and exercise the principal decision-making authority with respect to the investment. In addition, for the exception to apply, additional conditions need to be met regarding the officers of the CRIC. In particular, these conditions require that the officers be residents of Canada and that they work principally in Canada. In addition, the rules do not apply to certain internal reorganizations. The rules also do not apply if the debt owed by the foreign affiliate is a pertinent loan or indebtedness (PLOI). To qualify as a PLOI, the CRIC and the parent need to jointly elect to treat the debt obligation as a PLOI. In addition, the PLOI needs to generate a minimum amount of income for the CRIC in Canada (namely, interest computed based on the current government of Canada three-month Treasury bill rate plus 4%).

In view of the complex nature of the rules, taxpayers are advised to reach out to their tax advisor to determine whether they could be affected by the rules.

Passive income of controlled foreign affiliates. Any Canadian taxpayer that controls (as defined) a foreign affiliate is taxed on its share of that entity’s passive investment income (with certain exceptions) in the year such income is earned, regardless of whether such income is currently paid to the shareholder, except in certain specified circumstances. In addition, any taxpayer is taxed on its shares of any other type of income if the income is earned through a permanent establishment located in a non-treaty or non-TIEA country (except a country with which Canada has entered into negotiations for a TIEA or has sought to enter into such negotiations within the last 60 months).

Upstream loans from foreign affiliates. The upstream loan rules are essentially anti-avoidance measures that are intended to prevent taxpayers from making synthetic dividend distributions from foreign affiliates to avoid what would otherwise be an income inclusion in Canada that would not be fully offset by a corresponding dividends-received deduction as described in *Foreign affiliates*.

The rules have a very broad application. In general, Canadian taxpayers may be required to include in their income a portion of

the principal amount (referred to as the “specified amount”) of loans made to them by their foreign affiliates. In addition, Canadian taxpayers may be required to include in their income a portion of the principal amount of loans made by their foreign affiliates to certain non-arm’s-length persons (other than controlled foreign affiliates that are effectively Canadian controlled). If loans are made to other foreign affiliates, taxpayers may be required to include in their income the portion of such loans to the extent that the taxpayer’s surplus entitlement percentage (SEP) in the creditor affiliate exceeds its SEP in the borrowing affiliate. Accordingly, a loan from one foreign affiliate to another foreign affiliate that is not a Canadian controlled foreign affiliate results in an income inclusion only to the extent that the taxpayer has a lower SEP in the borrowing affiliate than in the creditor affiliate.

Similar to the domestic shareholder loan rule, exceptions exist for indebtedness repaid within two years after the date on which the indebtedness arose, provided that the repayment is not part of a series of loans or other transactions and repayments, and for indebtedness arising in the ordinary course of business of the creditor. The rules contain further transitional relief with respect to indebtedness that existed before 19 August 2011, which essentially extends the effective date of the rules with respect to such indebtedness to 19 August 2016 (because any 19 August 2011 indebtedness still outstanding at 19 August 2014 is deemed to have arisen on 19 August 2014, thereby extending the two-year period to 19 August 2016).

Upstream loan continuity rules apply to reorganizations of corporations or partnerships. These continuity rules apply to transactions and events that occur on or after 16 September 2016. However, it is possible to elect to have the rules apply as of 20 August 2011.

The income inclusion arising under the upstream loan rule may essentially be offset in whole or in part by a deduction if the taxpayer demonstrates that a hypothetical dividend paid the year the loan is made would have enjoyed a full deduction from the income of the Canadian taxpayer with respect to the exempt surplus and/or taxable (and hybrid) surplus of a foreign affiliate of the taxpayer. In addition, the rules provide for a deduction equal to amounts previously included in income in the year that the loan is eventually repaid. The rules also extend the application of the reserve mechanism in certain circumstances to include a deduction for pre-acquisition surplus dividends (essentially equivalent to returns of tax basis), but only to the extent of the taxpayer’s Canadian tax basis in the shares of the top-tier foreign affiliate. However, this particular deduction is not available if the borrower under the relevant loan is a nonresident person with whom the taxpayer does not deal at arm’s length, which for example, includes a foreign parent or sister company. As a result, this deduction is normally only available regarding upstream loans from the foreign affiliate to the Canadian taxpayer.

Cross-border cash redeployment and pooling using PLOI. As noted in *Foreign affiliate dumping rules*, the FAD rules include an elective exception for certain foreign affiliate indebtedness (PLOI). Under a corresponding amendment to the shareholder loan rules, loans will be allowed to be made without triggering deemed

dividends and withholding taxes, if they result in interest income inclusions at the higher of the prescribed rate (the prescribed rate for PLOI is equal to the three-month government of Canada treasury bill rate plus 4%) and essentially, any funding costs incurred by the CRIC to make the loan. The rules are relevant to all CRICs that are part of a foreign-based multinational group, not only to CRICs having foreign affiliates. In many cases, these proposals should facilitate commercially efficient and tax-neutral cross-border redeployments and pooling of cash among members of foreign-based multinational groups that include CRICs.

BTB rules and interest payments. As discussed in *Debt-to-equity rules*, the BTB rules apply to interest, royalties and similar payments between a person resident in Canada (Canco) and an intermediary if the following conditions are met:

- A nonresident (parent) grants a loan (intermediary debt) or a specified right with respect to a particular property (specified right) to the intermediary.
- The intermediary debt or specified right is “connected to” an outstanding debt owed by Canco.
- The amount of intermediary debt and/or fair market value of the property subject to the specified right is not less than 25% of the amount of primary debt.
- The amount of withholding tax payable by Canco is less than the amount of withholding tax that would have been payable had the interest payment been made to the parent rather than the intermediary.

If the above conditions are met, the rules will generally deem the interest payments to have been made to the parent rather than to the intermediary. In addition, specific rules will apply for determining the amount of interest deemed to have been paid to the parent.

Corporate reorganizations. In general, transactions between related corporations must be recognized at fair market value. However, some common types of domestic and foreign corporate reorganizations may be accomplished with little or no immediate Canadian tax cost.

Anti-avoidance legislation. The Canada Revenue Agency (CRA) may apply a general anti-avoidance rule to challenge transactions that it perceives to be abusive. This rule does not apply to a transaction that may reasonably be considered to have been undertaken or arranged primarily for bona fide purposes other than to obtain a tax benefit. The application of the rule may cause certain transactions to be ignored or recharacterized.

Transfer pricing. Under Canada’s transfer-pricing rules, acceptable transfer-pricing methods are those recommended by the Organisation for Economic Co-operation and Development (OECD). These methods include comparable uncontrolled price, resale price and cost-plus. Other methods may be used if the result obtained is similar to the result that would be obtained from an arm’s-length transaction. It is possible to enter into advance-pricing agreements with the CRA.

Following the OECD’s Base Erosion and Profit Shifting (BEPS) project, a Country-by-Country Report will need to be filed in a

prescribed form with the Minister of National Revenue by entities of multinational enterprises (more than EUR750 million in consolidated group revenue) for their fiscal years beginning in 2016 and future years.

Acquisition of control considerations. If control of a corporation has been acquired, the target corporation is deemed to have a year-end immediately before the acquisition of control. A new tax year begins immediately thereafter, and a new year-end may be selected by the target corporation. If an acquisition of control occurs, special rules apply to the determination and treatment of capital losses, business losses, and certain tax attributes with respect to foreign affiliates.

Capital gains realized by nonresidents. Subject to applicable tax treaties, nonresidents must pay Canadian tax on their net taxable capital gains derived from the disposition of “taxable Canadian property” (TCP). Such property includes, but is not limited to, the following:

- Real property located in Canada
- Shares of private corporations, interests in partnerships or interests in trusts that, within the preceding 60 months, derived their value principally from real or immovable property located in Canada
- Canadian resource property and timber resource property, or interests in such properties
- Shares of Canadian public corporations (in limited circumstances)
- Property used in a business carried on by the nonresident in Canada

The above definition of TCP applies for determination of TCP status after 4 March 2010.

A nonresident vendor of TCP (other than property that qualifies as excluded property) must obtain a tax clearance certificate from the CRA. To obtain such certificate, the nonresident vendor must provide the CRA with acceptable security or must pay tax on the disposition at the time of sale. For dispositions of TCP occurring after 2008, excluded property includes, among other items, property that is treaty-protected property of the vendor. In the case of a disposition between a purchaser and a seller not dealing at arm’s length, for treaty-protected property to qualify as excluded property, a notice in a prescribed form must be sent to the CRA.

The purchaser must generally withhold and remit to the Receiver General up to 25% (50% in certain circumstances) of the amount by which the cost to the purchaser of the property (other than excluded property) exceeds the amount stipulated in the CRA clearance certificate on account of the nonresident’s potential tax liability resulting from the disposition. In the absence of a clearance certificate, the purchaser must generally withhold and remit 25% of the purchase price (50% in certain circumstances). The withholding and remittance obligation is referred to as the “source deduction.” Similar requirements apply for the province of Quebec.

The purchaser remains liable for any source deduction not made in the event it is later determined that the property disposed of

does not qualify as excluded property, unless one of the safe harbor rules described below applies. The first safe harbor rule provides that a purchaser is not liable for any source deduction if the purchaser had no reason to believe that the vendor was not resident in Canada after reasonable inquiry. Similarly, a purchaser is not held liable for any source deduction if the property (disposed of after 2008) is acquired from a nonresident vendor and if all of the following conditions are satisfied:

- After reasonable inquiry, the purchaser concludes that the vendor is a resident of a country with which Canada has a tax treaty.
- The property is treaty-protected property of the vendor under the tax treaty with the particular treaty country.
- The purchaser sends a notice in a prescribed form to the CRA within 30 days after the acquisition, setting out the date of acquisition, the name and address of the nonresident vendor, a description of the property, the amount paid or payable by the purchaser of the property and the name of the particular treaty country.

In addition, the requirement for the nonresident vendor to file a Canadian tax return may be removed. In general, a nonresident vendor is exempt from filing a Canadian tax return with respect to taxable Canadian properties if the following criteria are satisfied:

- No Canadian “corporate income tax” is payable for the tax year.
- The nonresident is not currently liable to pay any Canadian tax with respect to any previous tax year.
- Each TCP that is disposed of during the year is “excluded property,” which now includes treaty-protected property in certain circumstances (see above) and property with respect to which the Minister of National Revenue has issued a nonresident clearance certificate.

Functional currency reporting. Canada has introduced rules with respect to functional currency reporting. These rules are intended to address the concerns of Canadian corporations that are required to use a currency other than the Canadian dollar as their “functional currency” for financial statement reporting purposes and the Canadian dollar for tax purposes.

In general, all Canadian taxpayers are required to use the Canadian dollar as their reporting currency for tax purposes. However, “qualifying corporations” may now elect to determine their “Canadian tax results” in their “functional currency.” In general, a “qualifying corporation” is a corporation resident in Canada (with some exceptions) that has a “functional currency” and makes an election in prescribed form. For these purposes, the taxpayer’s “functional currency” is defined as the currency of a country other than Canada if the following conditions are satisfied:

- The currency is a “qualifying currency.” A “qualifying currency” includes the US dollar, the euro, the British pound, and the Australian dollar. This is not an exhaustive list. A prescribed currency could also qualify.
- The currency is the primary currency in which the taxpayer maintains its records and books of account for financial reporting purposes.

F. Treaty withholding tax rates

As noted in Section A, in general, Canada's domestic tax law provides exemptions from Canadian withholding tax on interest paid or credited to arm's-length nonresident persons, regardless of their country of residence. In addition, withholding tax does not apply to interest that is considered "fully exempt interest," regardless of the recipient's relationship to the payer. "Fully exempt interest" generally includes the following:

- Interest paid by a government body or crown corporation
- Interest on a mortgage or hypothecary obligation with respect to real property located outside of Canada (certain conditions apply)
- Interest paid to a prescribed international institution or agency
- Deemed interest amounts pertaining to securities lending arrangements (certain conditions apply)

However, regardless of the above general rules, a 25% withholding tax applies to all "participating debt interest." "Participating debt interest" is generally interest, other than fully exempt interest, which satisfies either of the following conditions:

- It is paid or payable on an obligation, other than a prescribed obligation, and all or any portion of the interest is contingent or dependent on the use of or production from property in Canada.
- It is computed by reference to revenue, profit, cash flow, commodity price or any other similar criterion or by reference to dividends paid or payable to shareholders of any class of shares of the capital stock of a corporation.

Similarly, withholding tax applies to the following:

- Interest that is not "fully exempt interest" and is paid or payable to a person with whom the payer is not dealing at arm's length
- Interest with respect to a debt or other obligation to pay an amount to a person with whom the payer is not dealing at arm's length

Canada has introduced legislation to implement the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI). The MLI is intended to allow participating jurisdictions to modify their existing tax treaties to include measures developed under the OECD/G20 BEPS project without having to individually renegotiate those treaties. Canada signed the MLI on 7 June 2017 and expressed its intention to adopt the BEPS minimum standards on treaty abuse and improving dispute resolution, as well as mandatory binding arbitration in relation to tax treaty disputes. On 20 June 2018, the government of Canada introduced Bill C-82, an act to implement the MLI, in the House of Commons. Bill C-82 received a second reading on 15 October 2018.

The MLI does not operate to modify the application of Canada's tax treaties at the same time. For the MLI to come into effect for a particular bilateral tax treaty, both Canada and the other party to the treaty must have listed the treaty and ratified the MLI. Further, the impact of the MLI on any particular tax treaty will depend on the notifications and reservations made, as well as certain positions taken, by the parties to that treaty under the MLI.

The rates in the table below generally reflect the lower of the treaty rate and the rate under domestic tax law for dividends, interest and royalties paid from Canada to residents of various treaty countries. Certain exceptions or conditions may apply, depending on the terms of the particular treaty. The following table includes tax treaties currently in force and tax treaties that are signed but not yet in force.

Residence of recipient	Dividends %	Interest %	Royalties (b)(c) %
Algeria	15	15/0	15/0 (ii)
Argentina	15/10 (qq)	12.5/0	15/10/5/3 (sss)

- (a) A 0% rate generally applies to royalties relating to computer software.
- (b) The lower rate usually applies to royalties on cultural works or to royalties relating to computer software, patents and know-how.
- (c) Withholding tax of 25% applies if the royalties relate to the use of real or immovable property, including resource property.
- (d) The treaty provides that the lower rate applies to dividends paid to a company that controls directly or indirectly at least 10% of the voting power in the payer. Interest on certain government-assisted debt and certain other categories of interest are exempt from withholding tax.
- (e) Belarus is honoring the USSR treaty, and consequently that treaty continues to be in force with respect to Belarus. Canada has entered into tax treaties with Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, the Russian Federation, Ukraine and Uzbekistan. Canada has signed tax treaties with Azerbaijan and Armenia, but these treaties have not yet been ratified. The withholding rates under these treaties are listed in the above table. Tajikistan and Turkmenistan have announced that they are not honoring the USSR treaty, but negotiations for new treaties with these countries have not yet begun.
- (f) Mortgage interest on Egyptian property is not eligible for reduced rates under the treaty. As a result, the higher rate applies if such interest is not exempt under Canadian domestic law.
- (g) The 0% rate applies to certain copyright royalties and to royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
- (h) The 5% rate applies to dividends paid to corporate shareholders owning at least 10% of the voting shares of the Canadian company. The 15% rate applies to other dividends.
- (i) The fifth protocol to the 1980 tax treaty between Canada and the United States, which entered into force on 15 December 2008, generally provides for a gradual reduction to the withholding tax rate on interest paid or credited to non-arm's-length US residents. Under the protocol, the following withholding tax rates apply:
- 7% for interest paid during the 2008 calendar year
 - 4% for interest paid during the 2009 calendar year
 - 0% for interest paid after the 2009 calendar year
- The reduced rates retroactively apply for the entire calendar year in which the protocol was ratified (that is, effective for interest paid as early as 1 January 2008). For further information regarding the protocol, see footnote (dddd). Withholding tax is not imposed on interest paid or credited to arm's-length nonresidents after the 2007 calendar year.
- (j) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 20% of the voting power in the payer.
- (k) In general, no withholding tax is imposed on interest paid to payees who are dealing at arm's length with the payer. However, withholding tax at a rate of 25% typically applies to interest paid or credited to related nonresidents (the rate may be reduced by a tax treaty). Other specific exemptions or specific inclusions may apply to change the general rules. In addition, most copyright royalties are exempt from withholding tax.
- (l) The 6% rate applies to royalties paid on cultural works, copyrights, computer software, patents and certain types of information.
- (m) The 5% rate applies if the dividends are paid by a Canadian corporation to a French corporation that controls directly or indirectly at least 10% of the votes of the payer. The 10% rate applies if the dividends are paid by a non-resident-owned investment corporation that is a resident of Canada to a French corporation that controls directly or indirectly at least 10% of the votes of the payer. The 15% rate applies in all other cases.
- (n) The 5% rate applies to dividends paid to corporations owning at least 10% of the voting shares and capital of the payer. The 15% rate applies to other dividends. A protocol amending the tax treaty between Canada and Switzerland entered into force on 19 December 2011. The protocol provides that no tax will be withheld if a dividend is paid by a resident of a contracting state to a resident of the other contracting state that operates or administers pension or retirement plans for individuals who are resident in that other contracting state and if the dividend is not derived from the carrying on of a trade or a business.
- (o) The general rate is 15%, and payments for the use of, or the right to use, certain industrial, commercial or scientific equipment may qualify for a 10% rate.
- (p) The 0% rate applies to royalties on cultural works as well as to payments for the use of, or the right to use, computer software, patents and information concerning industrial, commercial and scientific experience.

- (q) The 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 25% of the capital of the payer. The 10% rate applies if the dividends are paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a resident of Denmark and that holds directly or indirectly at least 25% of the capital of the company paying the dividend. The 15% rate applies in all other cases.
- (r) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power of the payer.
- (s) The 5% rate applies if the beneficial owner of the dividends controls at least 70% of the voting power of the payer. The 10% rate applies if the beneficial owner of the dividends controls at least 25% but less than 70% of the voting power of the payer.
- (t) The 10% rate applies if the recipient of the dividends is a company that controls directly or indirectly at least 10% of the voting power of the payer.
- (u) The 10% rate applies if the beneficial owner of the dividends is a corporation that controls directly or indirectly at least 25% of the voting power of the payer.
- (v) The 12.5% rate applies if the recipient is a company that controls directly or indirectly at least 10% of the votes of the payer.
- (w) The 5% rate applies to dividends paid to a resident of Croatia that controls at least 10% of the voting power of the payer or that holds at least 25% of the capital of the payer.
- (x) The 5% rate applies if the beneficial corporate owner of the dividends controls directly at least 25% of the voting power of the payer of the dividends.
- (y) The 0% rate generally applies to royalties for certain cultural works and copyrights. It also applies to royalties for computer software, patents and information concerning industrial, commercial and scientific experience, if the payer and recipient are not associated persons (as defined).
- (z) The 10% rate applies to dividends paid to a company holding at least 25% of the capital of the payer.
- (aa) The 5% rate applies if the recipient of the dividends controls directly or indirectly at least 10% of the voting power of the payer. The 10% rate applies to dividends that are paid by a nonresident-owned investment corporation resident in Canada to a company that is a resident of Hungary and that controls at least 25% of the voting power in the company paying the dividends and the beneficial owner of such dividends. The 15% rate applies to all other cases.
- (bb) The 5% rate applies if the beneficial owner of the dividends is a corporation that controls directly at least 10% of the voting power of the payer or that holds directly at least 25% of the capital of the payer. The 10% rate applies to dividends paid by a nonresident-owned investment corporation resident in Canada to a beneficial owner resident in Sweden that controls directly at least 10% of the voting power, or holds at least 25% of the capital, of the corporation paying the dividends. The 15% rate applies to other dividends.
- (cc) The 0% rate applies to copyright royalties and similar payments with respect to cultural, dramatic, musical or other artistic works.
- (dd) The 5% rate applies to dividends paid to a company that owns at least 25% of the voting shares of the payer for the last six months of the accounting period for which the distribution of profits takes place.
- (ee) The 10% rate applies if the recipient is a company that controls at least 10% of the votes of the payer.
- (ff) The treaty was signed on 29 December 1998, but it is not yet in force. The 5% rate for dividends will apply if the recipient is a company that controls at least 10% of the votes of the payer. The 5% rate for royalties will apply to royalties for certain cultural works, and royalties for certain computer software, patents and know-how if the payer and the payee are not related.
- (gg) The 10% rate applies if the recipient is a company that controls at least 25% of the voting power of the payer directly or indirectly.
- (hh) The 5% rate applies if the recipient is a company that controls at least 10% of the voting power in the payer.
- (ii) The 0% rate generally applies to royalties relating to computer software or patents.
- (jj) The lower rate applies to royalties for certain cultural works, and generally to royalties for computer software, patents and know-how.
- (kk) The 5% rate applies if the beneficial owner of the dividends owns at least 25% of the capital or controls, directly or indirectly, 10% of the voting power of the payer. The 10% rate applies to dividends paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a company (other than a partnership) resident of the Netherlands and that owns at least 25% of the capital of, or controls directly or

- indirectly at least 10% of the voting power in, the company paying the dividends. The 15% rate applies to other dividends.
- (ll) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer.
 - (mm) The 5% rate applies if the recipient is a company that controls directly or indirectly at least 25% of the voting power in the payer.
 - (nn) The 10% rate applies if the recipient is a company that controls directly or indirectly at least 10% of the voting power in the payer.
 - (oo) The 5% rate applies if the recipient is a company holding directly or indirectly at least 10% of the capital of the payer.
 - (pp) The 5% rate for dividends applies if the recipient is a company that controls directly or indirectly at least 10% of the voting power in the payer.
 - (qq) The 10% rate applies if the recipient of the dividends is a company that holds directly 25% of the capital of the payer. The 15% rate applies in all other cases.
 - (rr) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer. The 15% rate applies in all other cases.
 - (ss) The 5% rate applies if the recipient of the dividends is a company that owns at least 10% of the voting shares, or at least 25% of the value of the shares, of the payer.
 - (tt) The 5% rate applies if the dividends are paid to a company that controls at least 10% of the voting power in the payer.
 - (uu) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that owns directly at least 10% of the voting stock of the payer. The 15% rate applies to other dividends.
 - (vv) The 5% rate for dividends applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the payer.
 - (ww) Under the fourth protocol to the treaty, which was signed on 21 July 2014 but is not yet in force, interest paid to an arm's-length party is exempt from withholding tax.
 - (xx) The 5% rate applies to dividends if the beneficial owner is a company that holds directly at least 10% of the voting power in the company paying the dividends.
 - (yy) The 5% rate applies to dividends paid to a company (other than a partnership) that is a beneficial owner and controls directly at least 25% of the voting power in the payer.
 - (zz) The 5% rate for dividends applies if the beneficial owner of the dividends is a company that controls at least 25% of the voting power in the payer.
 - (aaa) The 10% rate applies to royalties for the use of, or the right to use, industrial, commercial, or scientific equipment.
 - (bbb) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends. The 10% rate applies to dividends paid by a nonresident-owned investment corporation resident of Canada to a resident of the United Arab Emirates that holds directly or indirectly at least 10% of the voting power of the payer.
 - (ccc) The 5% rate applies if the beneficial owner is a company that controls directly or indirectly at least 25% of the voting power in the company paying the dividend. The 15% rate applies in all other cases.
 - (ddd) The 5% rate applies to dividends paid to a company that controls at least 10% of the voting power of the payer.
 - (eee) The 0% rate applies to royalties pertaining to certain cultural works, computer software, patents or know-how.
 - (fff) Payments for the use of computer software, patents and certain know-how are exempt.
 - (ggg) The 10% rate applies if the recipient is a company holding directly or indirectly at least 10% of the voting power of the payer.
 - (hhh) The 5% rate applies to certain royalties pertaining to certain computer software, patents or know-how.
 - (iii) The general withholding tax rate for royalties is 10%. A 5% rate applies to royalties pertaining to certain cultural works, computer software, patents and know-how.
 - (jjj) The general withholding tax for royalties is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt.
 - (kkk) The general withholding tax rate is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt.
 - (lll) The general withholding tax rate for royalties is 10%. Royalties pertaining to certain cultural works, computer software, patents and know-how are exempt from withholding tax.

- (mmm) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends.
- (nnn) The 5% rate applies to dividends paid to a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies to other dividends.
- (ooo) The 15% rate applies if the recipient is a company that holds an equity percentage of at least 10% in the payer of the dividends.
- (ppp) The 10% rate applies if the recipient is a company that controls directly or indirectly at least 25% of the voting power in the payer.
- (qqq) The 5% rate applies to royalties with respect to certain cultural works, and to royalties for certain computer software, patents and know-how if the payer and payee are not related.
- (rrr) The general withholding tax for royalties is 10%. Royalties pertaining to certain cultural works and computer software and royalties for information concerning industrial, commercial or scientific experience are exempt.
- (sss) The 3% rate applies to royalties paid for rights to use news. The 5% rate applies to royalties pertaining to certain cultural works. The 10% rate applies to royalties pertaining to patents, trademarks, designs or models, plans, secret formulas and technical assistance.
- (ttt) The general rate for royalties is 15%. The 25% rate applies to royalties pertaining to the use of trademarks.
- (uuu) The 10% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the voting power in the payer of the dividends.
- (vvv) A protocol between Canada and Spain entered into force on 29 September 2015. The rates under the protocol are reflected in the above table.
- (www) The 15% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the payer.
- (xxx) The 15% rate applies to dividends paid to a company that owns at least 10% of the voting shares of the payer during the six-month period immediately preceding the date of payment of the dividend.
- (yyy) The 5% rate applies to royalties pertaining to cultural works.
- (zzz) The 20% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 15% of the voting power in the payer.
- (aaaa) The 20% rate applies to the following:
- Patent royalties
 - Royalties for the use of, or the right to use, trademarks, motion picture films and films or videotapes for use in connection with television
 - Payments for the use of, or the right to use, industrial, commercial, scientific or harbor equipment
- (bbbb) The 7.5% rate applies to fees for technical services.
- (cccc) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly at least 25% of the capital of the payer and if the capital invested by the recipient exceeds USD100,000. The 15% rate applies in all other cases.
- (dddd) On 15 December 2008, the fifth protocol to the 1980 tax treaty between Canada and the United States entered into force. The following are amendments contained in the protocol that affect cross-border payments:
- The withholding tax on cross-border interest payments will be eliminated. The protocol provides that the withholding tax rate on interest payments is reduced to 0% (phased out over a three-year period with respect to debt between parties that are “related”). For further details, see footnote (i).
 - A “Hybrid Entity Clause” is introduced with respect to income, profits or gains derived through or from certain “fiscally transparent” entities. The protocol can extend treaty relief to income earned through certain “fiscally transparent” entities, such as limited liability corporations and certain other hybrid entities. The protocol may also deny treaty benefits with respect to income derived through or from certain “fiscally transparent” entities.
 - The protocol provides that the existing limitation on benefits (LOB) provisions, which are currently applicable for US tax purposes only, will also become operative for Canadian tax purposes. The comprehensive LOB article, designed to counter “treaty shopping” abuses, is a significant development in the Canadian tax landscape and could operate to deny treaty benefits in many situations in which treaty entitlement had never come under question, including situations in which treaty shopping was not a consideration. Consequently, an analysis is required in each case in which payments are made to an

- entity that may have non-qualifying US or Canadian owners or owners that are residents of other countries, including in certain circumstances, public companies.
- (eeee) The 0% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works.
- (ffff) A renegotiated tax treaty between Canada and Israel was signed on 21 September 2016 and entered into force on 21 December 2016. In general, for withholding taxes, the treaty is generally effective in Canada for amounts paid or credited to nonresidents on or after 1 January 2017; for other taxes, the treaty is effective for tax years beginning on or after 1 January 2017. The new tax treaty replaces the tax treaty signed on 21 July 1975.
- (gggg) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly or indirectly at least 10% of the voting power of the payer. The 15% rate applies in all other cases.
- (hhhh) The withholding tax rate is 5% for copyright royalties and other similar payments with respect to literary, dramatic or artistic works and royalties for right-to-use patents or know-how. A 10% rate applies to royalties in all other cases.
- (iiii) The 5% rate applies if, at the time the dividend is declared, the recipient is a company holding directly or indirectly at least 25% of the capital of the payer. The 15% rate applies in all other cases.
- (jjjj) The 0% rate applies to copyright royalties and similar payments with respect to the production or reproduction of cultural or artistic works (excluding royalties with respect to motion picture films and royalties with respect to works on film or videotape or other means of reproduction for use in connection with television broadcasting).
- (kkkk) The 5% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but does not include royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television), and royalties with respect to computer software, patents or information concerning industrial, commercial or scientific experience (but not including any such royalties provided in connection with rental or franchise agreements).
- (llll) The 5% rate applies if the recipient of the dividends is a company that controls directly or indirectly 25% of the voting power of the payer company that is a resident of Canada.
- (mmmm) A protocol to the tax treaty between Canada and Switzerland entered into force on 19 December 2011. It provides that interest payments made to a beneficiary in the other contracting state are not subject to withholding tax if the beneficiary is not related to the payer.
- (nnnn) The general withholding tax rate for royalties is 10%. The 5% rate applies to certain royalties pertaining to computer software and information concerning industrial, commercial or scientific experience. The withholding tax rate is 0% for copyright royalties and for similar payments with respect to literary, dramatic or artistic works.
- (oooo) The 15% rate applies if the beneficial owner of the dividends is a company that owns at least 10% of the voting power in the payer of the dividends.
- (pppp) The 0% rate applies to royalties pertaining to certain cultural works.
- (qqqq) The last paragraph of the royalties article contains a most-favored nation clause in favor of Canada.
- (rrrr) The 5% rate applies if the beneficial owner of the dividends is a corporation that holds directly at least 10% of the voting power of the payer. The 10% rate applies if the dividends are paid by a nonresident-owned investment corporation that is a resident of Canada to a beneficial owner that is a company (other than a partnership) resident in Luxembourg and that holds directly or indirectly at least 25% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (ssss) Tax treaty negotiations with the government of China began on 6 December 2010. The tax treaty is currently being renegotiated.
- (tttt) Negotiations to update the tax treaty with the United Kingdom began on 1 October 2011. On 21 July 2014, the fourth protocol to the treaty was signed, but it is not yet in force.
- (uuuu) The withholding tax rate for dividends is 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. A 15% rate applies to dividends in all other cases.

- (vvvv) A renegotiated tax treaty between Canada and New Zealand was signed on 26 June 2015 and entered into force on 1 August 2015.
- (wwww) The 5% rate applies to dividends with respect to a direct holding of 10% or more of the voting power. The 15% rate applies to other dividends.
- (xxxx) The 5% rate applies to dividends if the beneficial owner of the dividends is a company that controls at least 10% of the voting power in the payer. A 15% rate applies to other dividends.
- (yyyy) Interest on certain government or government-assisted debt is exempt from withholding tax.
- (zzzz) The 0% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works, but not including royalties with respect to the following:
- Computer software
 - Motion picture films
 - Works on film or videotape or other means of reproduction for use in connection with television broadcasting
- (aaaa) The 5% rate applies to dividends paid with respect to holdings of 10% or more of the voting power. The 15% rate applies to other dividends.
- (bbbb) The 5% rate applies to royalties for literary works, computer software, patents and information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
- (cccc) The tax treaty is currently being renegotiated.
- (dddd) The tax treaty is currently being renegotiated. The negotiations began on 26 November 18.
- (eeee) The 0% rate applies to copyright royalties and other similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works, but does not apply to royalties with respect to motion picture films and works on film or videotape or other means of reproduction for use in connection with television.
- (ffff) The tax treaty is currently being renegotiated. The negotiations began in June 2017.
- (gggg) The treaty was signed on 25 March 2010, but is not yet in force.
- (hhhh) The 10% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 20% of the capital of the payer. The 15% rate applies in all other cases.
- (iiii) The treaty was signed on 24 November 2016 but is not yet in force.

- (a) Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRPC) applies to resident companies and nonresident companies with permanent establishments (PEs) in Cape Verde. Micro- and small-sized companies can benefit from a 4% reduced rate, which is applied to their turnover. See Section B for details of other rates.

- (b) Depending on the situation, a 1% withholding tax is imposed on the consideration or a 25% tax is imposed on the capital gain. See Section B.
- (c) These rates may be reduced or eliminated by tax treaties.
- (d) The 0% rate applies to dividends distributed by companies subject to and not exempt from IRPC.
- (e) Income must be declared and is subject to the normal tax rates. Amounts withheld may be credited against IRPC due. See Section B.
- (f) A withholding tax exemption is available regarding interest from shareholder loans and corporate bonds if the shareholder is a pure holding company (*sociedade gestora de participações sociais*, or SGPS) holding a stake of at least 10% for at least one year in the affiliated company.
- (g) The 15% rate applies to most services and commissions and may be eliminated under a tax treaty.
- (h) The amount deductible each year is capped at 50% of the taxable profit for the year.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRPC) is levied on resident and nonresident entities.

Resident entities. Companies and other entities, including non-legal entities, whose principal activity is commercial, industrial or agricultural, are subject to IRPC on worldwide profits, but a foreign tax credit may reduce the amount of IRPC payable (see *Foreign tax relief*).

A 50% IRPC exemption applies to entities exclusively engaged in agricultural and fishing activities.

Companies and other entities, including non-legal entities, that do not carry out commercial, industrial or agricultural activities, are generally subject to tax on their worldwide income (for details regarding the calculation of the taxable profit of these entities, see Section C).

Nonresident entities. Companies or other entities that operate in Cape Verde through a PE are subject to IRPC on their profits attributable to the PE.

Companies or other entities without a PE in Cape Verde are subject to IRPC on their income deemed to be derived in Cape Verde.

The transfer of shares in a foreign or Cape Verdean company is subject to tax in Cape Verde if more than 50% of the assets owned by the company being transferred are composed directly or indirectly of immovable property located in Cape Verde.

For tax purposes, companies or other entities are considered to have a PE in Cape Verde if they have a fixed installation or a permanent representation in Cape Verde through which they engage in a commercial, industrial or agricultural activity. Under rules that generally conform to the Organisation for Economic Co-operation and Development (OECD) model convention, a PE may arise from, among others, the following:

- A building site or installation project, including coordination, inspection and supervision activities
- The performance of services (including consultancy) that last for more than 183 days
- The existence of a dependent agent

Double tax treaties may limit the scope of a PE in Cape Verde.

Tax rates. For 2019, IRPC is levied at the following rates.

Type of enterprise	Rate (%)
Companies or other entities with a head office or effective management control in Cape Verde, whose principal activity is commercial, industrial or agricultural	22
Micro- and small-sized companies with a head office or effective management control in Cape Verde	4
Entities other than companies with a head office or effective management control in Cape Verde, whose principal activity is not commercial, industrial or agricultural	22
PEs	22
Nonresident companies or other entities without a head office, effective management control or a PE in Cape Verde	
Income subject to withholding tax	10/20
Income not subject to withholding tax	25

Certain types of income earned by companies in the last category of companies listed above are subject to the following withholding taxes.

Type of income	Rate (%)
Interest payments	10/20
Royalties	20
Technical assistance	15
Income from shares (dividends)	0/10
Income from government bonds	10
Revenues derived from the use of, or the right to use, equipment	20
Other revenues from the application of capital	20
Payments for services rendered or used in Cape Verde	20

Applicable double tax treaties may reduce the above withholding tax rates.

A fire brigade surcharge (*imposto de incêndio*) is imposed on resident companies and nonresident companies with a PE in the municipalities of Mindelo (Island of São Vicente) and Praia (Island of Santiago). The fire brigade surcharge is applied at a rate of 2% to the taxable profit determined for IRPC purposes.

Companies licensed under the Cape Verdean International Business Centre (IBC) regime benefit from a reduced rate of IRPC. This tax benefit applies until 2030 and depends on the creation of a minimum of 10 jobs at the International Industry Center (CII) and the International Trade Center (CIC). The following are the reduced rates of IRPC:

- 5% for entities with 10 or more dependent workers
- 3.5% for entities with 20 or more dependent workers
- 2.5% for entities with 50 or more dependent workers

For companies operating in the International Services Center, the IRPC rate is 2.5% if the entity has at least four dependent workers.

The shareholders of the companies that are licensed under the IBC regime may benefit from exemptions on dividends received

and on interest derived from shareholder loans. Customs duties exemptions may also be available to entities licensed under the IBC regime.

A tonnage tax applies to entities licensed in the IBC that develop activities related to the international maritime transport of cargo and passengers, provided that the following conditions are met:

- All the ships and similar vessels owned by the taxpayer are registered in Cape Verde's International Register of Ships, and the total activity developed falls within the scope of this regime.
- At least 85% of the income results from activities with other entities installed and functioning in the IBC or with foreign entities.

The tonnage tax profit is calculated using a notional daily profit per ship based on a sliding tariff by reference to the net tonnage of the ship. The following table shows the amounts of daily taxable income.

Net tonnage	Daily taxable income for each 100 net tonnes (CVE)
Up to 1,000	646
From 1,001 to 10,000	566
From 10,001 to 25,000	307
Greater than 25,000	103

Significant incentives are also available for qualifying investment projects under the Investment Law. Qualifying projects may enjoy the following tax benefits:

- A tax credit equal to 50% of relevant investments made in the health sector, the environmental sector, creative industries, tourism or tourism promotion industry and tourism property development, air and sea transportation services and port and airport services, renewable energy production, manufacturing and installation of renewable energy equipment, scientific research and investigation, and information and communication technology development
- A tax credit equal to 30% of relevant investments made in other areas
- An exemption from municipal real estate holding tax for buildings used in the project
- An exemption from property transfer tax for buildings used in the project
- An exemption from stamp duty with respect to financing necessary for the investment project
- An exemption from customs duties for certain goods and equipment

The above-mentioned tax credits can be used in the year of investment for up to 50% of the IRPC liability. Any excess can be carried forward for 10 years.

Further incentives may be available for investment projects that have a value exceeding CVE550 million, create at least 10 jobs and are relevant for the promotion and acceleration of the development of the Cape Verdean economy.

Cape Verdean tax law also provides for significant tax exemptions and deductions concerning investments toward internationalization (reduction of IRPC rate by 50%, as well as exemptions for stamp

duty, value-added tax, customs duties, property transfer tax and legal costs, incentives in the savings and financial sector, incentives for the creation of jobs and incentives regarding training and culture). It also provides incentives for startups (temporary reduction of IRPC rate to 5%, and exemptions for stamp duty, value-added tax, customs duties and legal costs).

Profits not distributed by financial institutions to strengthen their equity may benefit from an IRPC credit.

Certain customs duties incentives are also available for fishing and industry activities, as well as for, among others, transportation activities and social communication activities.

In addition, tax benefits (IRPC, stamp duty and property transfer tax exemptions) are also available with respect to recovery and insolvency processes.

To promote the regular registration of immovable property in Cape Verde, significant stamp duty and real estate tax exemptions have been introduced.

Limitation of benefits. The amount of tax payable cannot be lower than 90% of the amount that would be assessed if the taxpayer did not benefit from certain tax incentives and deduction of tax losses carried forward.

Notional interest deduction. Companies can benefit for a six-year period from a notional interest deduction of 10% on the amount of cash contributions or conversions of loans by shareholders to share capital that occur on or after 1 January 2018. The amount to which the notional interest deduction applies is capped at CVE100 million. The deemed interest deduction is considered for the net financial expenses limitation (see *Debt-to-equity rules* in Section E).

Simplified regime of taxation. Micro- and small-sized resident companies that have annual turnover not exceeding CVE10 million or no more than 10 employees and that meet certain other conditions may opt to be taxed under a simplified regime of taxation. Companies under the simplified regime of taxation are subject to a rate of 4% levied on the turnover.

Capital gains. Capital gains derived from the sale of investment properties, tangible fixed assets, intangible assets, non-current assets held for sale and financial assets are included in taxable income subject to IRPC. The capital gain equals the difference between the sales value, net of expenses incurred on the sale, and the acquisition value, adjusted by depreciation, impairment relevant for tax purposes and an official index.

Fifty percent of the capital gains derived from disposals of certain assets held for more than one year may be exempt if the sales proceeds are invested in tangible fixed assets, intangible assets, investment property and shares during the period beginning one year before the year of the disposal and ending two years after the year of the disposal. A statement of the intention to reinvest the gain must be included in the annual tax return for the year of disposal. The remaining 50% of the net gain derived from the disposal is subject to tax in the year of the disposal.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If, by the end of the second year following the disposal no reinvestment is made, the net capital gain that remains untaxed (50%) is added to taxable profit for that year, increased by 15% and compensatory interest applies. A similar adjustment occurs if the assets in which reinvestment is made are not maintained by the taxpayer for at least two years from year-end of the tax period in which the reinvestment is made.

Losses from the transfer for consideration of shareholdings in tax-haven entities are not allowed as deductions. Losses resulting from shares are also not deductible if the seller has resulted from a transformation, including a change of the business purpose, of an entity for which such losses would not be deductible and if less than three years have elapsed since the date of transformation.

There is also an exclusion from taxable income for capital gains (or losses) realized by resident entities and nonresident entities with a PE in Cape Verde that are derived from the disposal of shares (and other equity instruments), provided the shares have been held for a period of at least 12 months. Such exclusion does not apply to capital gains realized on the transfer of shares acquired from entities domiciled or with a place of effective management in a territory subject to a more favorable tax regime.

In addition, an exemption is available for gains realized by nonresident entities without a PE in Cape Verde on the disposal of shares and other securities.

Nonresident companies that do not have a head office, effective management control or a PE in Cape Verde are taxed at a 1% rate on the sales proceeds derived from disposals of real estate, shares and other securities. In general, the tax due is paid through withholding tax. Certain gains may be taxed at a 25% rate and require filing of a tax return.

Administration. The tax year is the calendar year.

All companies engaging in activities in Cape Verde must register with the tax department to obtain a taxpayer number. Companies, including foreign companies with a PE in Cape Verde and foreign companies without a PE that had not been subject to withholding tax, must file an annual tax return, together with their financial statements and other documentation, by 31 May in the year following the tax year.

Companies with a head office, effective management control or a PE in Cape Verde must make advance payments of IRPC. Companies whose principal activity is commercial, industrial, agricultural or fishing must make payments in March, August and November of the current tax year. The tax base for the payments is 30%, 30% and 20%, respectively, of the preceding year's tax liability. The tax rate of 25% is applied to this tax base to compute the amount of the advance payment. Each advance payment cannot be lower than CVE50,000.

Companies with a head office, effective management control or a PE in Cape Verde that have adopted a financial year other than the calendar year must make estimated payments as outlined above, but in the 3rd, 7th and 11th months of their financial year.

They must file a tax return by the end of the fifth month following the end of that year.

Companies under the simplified regime of taxation must make advance payments at the end of April, at the end of October and at the end of January of the following year. The IRPC rate of 4% is applied to the preceding quarter's turnover.

If the total amount of the advance payments exceeds the tax due for the tax year, the excess may be carried forward as a tax credit against the tax payable in the following four years or refunded on the occurrence of certain events.

A nonresident company without a PE in Portugal must appoint an individual or company, resident in Cape Verde, to represent it with respect to its tax liabilities.

Penalties are imposed for the failure to file tax returns and satisfy other compliance obligations. If, on the final assessment, the tax authorities determine that a further payment is required and that the taxpayer is at fault, interest is imposed on the amount of the additional payment. Fines, which are generally based on the amount of tax due, are also imposed. If the tax due is not paid, additional interest is imposed from the date of the tax authorities' notice that an additional payment is due.

Binding rulings. The General Tax Code provides the taxpayer the possibility of obtaining a binding ruling. The binding ruling is limited to a certain time period, which is determined on a case-by-case basis by the tax authorities. The ruling is subject to the payment of a fee.

Dividends. Dividends paid by companies to residents and non-residents are generally subject to withholding tax at a rate of 10%.

On distributions to resident parent companies, the 10% withholding tax is treated as a payment on account of the final IRPC due.

A resident company or a nonresident company with a PE subject to and not exempt from IRPC may deduct 100% of dividends received from another resident company.

The above regime also applies, under similar conditions, to dividends distributed by foreign affiliates if the underlying profits have been subject to and not exempt from income tax.

If the recipient benefits from a reduced IRPC rate, the recipient may deduct only 50% of the dividends.

If a recipient qualifies for the 100% deduction, the payer of the dividends does not need to withhold tax.

A withholding tax exemption applies to dividends distributed to nonresident companies if the requirements described above are met.

Positive liquidation proceeds are treated as deemed dividends in the portion corresponding to the difference between the liquidation proceeds attributed and the associated capital contributions. Any excess is treated as a capital gain. If the amount is negative, it is treated as a capital loss. Losses from the liquidation of subsidiaries are deductible only if the shares have been held for at least three years.

Foreign tax relief. Foreign-source income is taxable in Cape Verde. However, direct foreign tax may be credited against the Cape Verdean tax liability, limited to the lower of the following amounts:

- The amount of tax incurred in the foreign country
- The amount of IRPC attributable to the foreign-source income

If an applicable double tax treaty reduces the withholding tax rates, the tax credit is limited by the applicable treaty clause. The foreign tax credit cannot be carried forward.

C. Determination of trading income

General. Taxable profit is determined according to the following rules:

- For companies with a head office or effective management control in Cape Verde that are principally engaged in commercial, agricultural or industrial activities, the taxable profit is the net accounting profit calculated in accordance with Cape Verdean generally accepted accounting principles, as adjusted by the IRPC Code.
- For companies with a head office or effective management control in Cape Verde that do not principally engage in commercial, industrial or agricultural activities, the taxable profit is the net total of revenues from various categories of income described in the Personal Tax (Imposto sobre o Rendimento das Pessoas Singulares, or IRPS) Code, less expenses.
- For PEs, the taxable profit is determined as outlined in the first bullet above. In calculating taxable profit, general administrative expenses that are attributable to the PE may be deducted as a cost if justified and acceptable to the tax authorities.

Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses are not deductible for IRPC purposes including, but not limited to, the following:

- Illicit expenses
- Depreciation and amortization claimed that exceed the rates fixed in the Cape Verdean tax law
- Provisions and impairments (except for those contained in the Cape Verdean tax law)
- IRPC, stand-alone taxes and surcharges
- Penalties and interest charges
- Improperly documented expenses
- Health or personal injury insurance premiums, and expenses or losses with respect to life insurance, contributions to pension funds or supplementary social security systems, except when they are taxed under the IPRS Code or when they are mandatory by law or contracts
- Real estate taxes (except for companies engaged in real estate trading activities)
- Expenses concerning pleasure boats and tourism airplanes, except for those allocated to public transportation companies or used for rental purposes as part of the company's normal activities

Assets under financial leases are deemed to be owned by the lessee. Consequently, the lessee may deduct only applicable tax depreciation and any interest included in the rent payments. Special rules apply to sale-and-leaseback transactions.

Thirty percent of expenses related to passenger or mixed-use vehicles, which are depreciation, rent, insurance, repairs and fuel, and 50% of representation expenses, are not deductible for tax purposes.

Although representation expenses and expenses related to private cars are deductible with some limits, they are subject to a special stand-alone tax at a rate of 10% (this stand-alone tax may not apply in certain cases).

A 10% stand-alone tax rate also applies to tax-deductible daily allowances and compensation for costs incurred by employees when traveling in their own vehicles at the service of the employer if these amounts are not charged to clients and not subject to IRPS.

Undocumented expenses are not deductible. In addition, these expenses are subject to a special stand-alone tax rate of 40%.

A stand-alone tax at a rate of 10% also applies to certain fringe benefits attributed to the employer (if the amount exceeds CVE15,000), which are gifts made to employees, sales of vehicles to employees below market value, travel expenses paid to employees if not related to the company's activities and interest-free or low-interest-rate loans to employees.

The above stand-alone taxes are imposed regardless of whether the company earns a taxable profit or suffers a tax loss in the year in which it incurs the expenses. In addition, all stand-alone tax rates are increased by 10 percentage points if the taxpayer benefits from a privileged tax regime or incurs a tax loss in two consecutive years (with some exceptions).

Inventories. Inventories must be consistently valued by any of the following criteria:

- Effective cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin
- Cost of sales of products cropped from biological assets, which is determined at the time of cropping, less the estimated costs at the point of sale, excluding transportation and other costs required to place the products in the market

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

Provisions. The following provisions, among others, are deductible:

- Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
- Inventory losses (inventory values in excess of market value)
- Technical provisions imposed on insurance companies and financial institutions by the competent Cape Verdean regulatory authorities

Depreciation. In general, depreciation is calculated using the straight-line method. The declining-balance method may be used for new tangible fixed assets other than buildings, office furniture and automobiles not used for public transport or rental. Maximum depreciation rates are established by law. If rates that are less than

50% of the official rates are used, total depreciation will not be achieved over the life of the asset. The following are the principal official straight-line rates.

Asset	Rate (%)
Commercial buildings	3
Industrial buildings	5
Office equipment	12.5 to 33.33
Motor vehicles	12.5 to 20
Plant and machinery	16.66 to 20

Companies may request the prior approval of the tax authorities for the use of depreciation methods other than straight-line or declining-balance or rates up to double the official rates. Approval is granted only if the request is justified by the company's business activities.

Relief for losses. Tax losses may be carried forward for seven years. The amount deductible each year is capped at 50% of the taxable profit for the year. Loss carrybacks are not allowed.

Companies under the simplified tax regime cannot benefit from the relief for losses. Tax loss carryforwards are forfeited if the taxpayer states a zero annual turnover and does not obtain any income from its normal business activity for two consecutive tax years.

Groups of companies. The Cape Verdean Tax Law does not provide a special tax regime for groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; levied on goods and services, other than exempt services	15%
Excise duties	
General rate	10%
Other rates	0% to 40%
Social security contributions; on salaries; paid by	
Employer	16%
Employee	8.5%
Self-employed workers	11%/19.5%
Property transfer tax; payable by purchaser	1.5%
Municipal real estate holding tax; local tax; imposed annually on the assessed tax value of the property on 31 December; tax payable by the owner of the property	1.5%
Stamp duty	
Credit operations	0.5%
Interest on bank loans and bank services	3.5%
Guarantees	0.5%
Insurance premiums	3.5%
Bills of exchange, promissory notes and other negotiable debt securities	0.5%
Notarial acts of registrations and procedures	15%
Administrative acts and contracts	CVE1,000

Nature of tax	Rate
Touristic contribution; for every overnight stay in a touristic establishment, up to a maximum of 10 nights; children under 16 years old are not subject to this contribution	CVE220 per night
Ecologic charge; imposed on some products imported or produced domestically that are non-biodegradable or made out of metal, glass or plastic; charge varies depending on the quantity or weight of the goods; payable by the local producer or importer; exemptions are available, including packing material used in medicine or for packing essential food, such as corn, rice, sugar, flour and milk	CVE2 to CVE200 per kilogram

E. Foreign-exchange controls

Foreign-exchange controls. The currency in Cape Verde is the escudo (CVE).

Cape Verde imposes foreign-exchange controls in certain situations.

Mergers and reorganizations. Mergers and other type of corporate reorganizations may be tax neutral in Cape Verde if certain conditions are met.

Controlled foreign entities. A Cape Verdean resident owning, directly or indirectly, at least 25% in the capital, voting rights or rights to income or estate of a controlled foreign entity (CFE) is subject to tax on its allocable share of the CFE's net profit or income. For computing the 25% threshold, the capital and rights owned, directly or indirectly, by related parties are also considered.

Several rules, which are based on the nature of the activity and whether the activity is predominantly directed to the Cape Verdean market, may result in the non-imputation of profits or income.

Payments by residents to nonresidents subject to a more favorable tax regime. In general, payments made by Cape Verdean residents to nonresidents subject to a more favorable tax regime as provided by the General Tax Code are not deductible for tax purposes, and the payers are subject to a stand-alone tax rate of 60%. However, these payments may be deducted and are not subject to stand-alone taxation if the payer establishes the following:

- The payments were made in real transactions.
- The payments are normal.
- The amounts of the payments are not unreasonable.

Related-party transactions. For related-party transactions (transactions between parties with a special relationship), the tax authorities may make adjustments to taxable profit that are necessary to reflect transactions on an arm's-length basis.

A special relationship is deemed to exist if one entity has the capacity, directly or indirectly, to influence in a decisive manner the

management decisions of another entity. This capacity is deemed to exist in the following relationships:

- Between one entity and its shareholders, or their spouses, ascendants or descendants, if they possess, directly or indirectly, 20% of the capital or voting rights of the entity
- Between two entities in which the same shareholders, their spouses, ascendants or descendants hold, directly or indirectly, a participation of not less than 20% of the capital or voting rights
- Between any entities bound by dominance relations
- Between a nonresident entity and its Cape Verdean PE
- Between a resident entity and an entity located in territory with a favorable tax regime according to the General Tax Code

Foreign PE profits. Transactions between the head office and a foreign PE must respect the arm's-length principle.

Debt-to-equity rules. A limitation to the deduction of interest expenses (net of interest revenues) applies. The tax deduction for net financial expenses is capped by the higher of the following amounts:

- CVE110 million
- 30% of the earnings before interest, taxes, depreciation and amortization

The nondeductible excess, as well as the unused fraction of the 30% threshold, may be carried forward to the following seven years.

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Guinea-Bissau	5	10	10
Macau SAR	10	10	10
Portugal	10	0/10*	10
Non-treaty jurisdictions	0/10	10/20	20

* The 0% rate applies to interest paid by the state of one contracting country or derived by the state of the other contracting country.

A. At a glance

Corporate Income Tax Rate (%)	0
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0

B. Taxes on corporate income and gains

The Cayman Islands does not impose taxes on income, profits, wealth or capital gains.

C. Corporate license fees

Ordinary resident company. An ordinary resident company may transact foreign and domestic business from within the Cayman Islands. A Trade and Business License is required if business is to be conducted within the Cayman Islands unless the business is exempted (see Section D). If Caymanians or persons with Cayman status do not own at least 60% of the issued share capital, hold 60% of board positions or otherwise control such a company, the company must also obtain a Local Companies (Control) Law License before it can do business in the Cayman Islands, unless the business is exempt from this requirement.

Incorporation fees range from a minimum of KYD300 to a maximum of KYD500. Annual fees range from a minimum of KYD300 to a maximum of KYD500. The fees are based on authorized capital.

Ordinary nonresident company. An ordinary nonresident company is similar to a resident company, but it is not permitted to conduct business within the Cayman Islands. However, it may transact within the Islands all matters necessary to conduct its business outside the Islands; for example, it can negotiate contracts or open bank accounts.

Incorporation fees range from a minimum of KYD575 to a maximum of KYD815. Annual fees range from a minimum of KYD675 to a maximum of KYD915. The fees are based on authorized capital.

Exempted company. An exempted company is the most common form of company used by the offshore investor. An exempted company, similar to an ordinary nonresident company, may not conduct business within the Cayman Islands, but may transact from within the Islands all the matters necessary to conduct its business outside the Islands. An exempted company has certain advantages over an ordinary resident or nonresident company, including the availability of a Tax Exemption Certificate, which make the exempted company attractive to an offshore investor. A Tax Exemption Certificate provides that no law enacted in the Cayman Islands imposing any tax on income, profits, capital gains or appreciations will apply to the exempted company and that no such tax, estate duty or inheritance tax will be payable on or with respect to the shares, debentures or other obligations (or the income derived from such instruments) of the exempted company. The exemptions provided in the certificate are for a renewable 20-year period.

Incorporation fees range from a minimum of KYD600 to a maximum of KYD2,468. Annual fees range from a minimum of KYD700 to a maximum of KYD2,568. The minimum fee applies to companies with authorized capital of up to KYD42,000; the fee increases on a sliding scale for authorized capital in excess of this amount until it reaches the maximum of KYD2,568, which applies to companies with authorized capital exceeding KYD1,640,000.

An exempted company, through its memorandum and articles of association, may be established as a company limited by shares, a company limited by guarantee or a limited duration company (LDC). LDCs may be treated by the authorities of the United States and other jurisdictions as partnerships for tax and other purposes. An exempted company is classified as an LDC if its corporate existence terminates on the happening of one or more specified events and if it has a maximum life of 30 years. If a company limited by shares has more than one share class, it may be established on the basis that some of its classes will have limited liability and some will have unlimited liability. LDCs must pay a fee of KYD200 on registration in addition to the regular fees described above.

D. Miscellaneous matters

Foreign-exchange controls. The currency of the Cayman Islands is the Cayman Islands dollar (KYD). The exchange rate of the US dollar against the Cayman Islands dollar is fixed at USD1.2 = KYD1.

The Cayman Islands has no foreign-currency exchange control regulations.

Business licenses. Unless exempted, every person or company carrying on a trade or business must have an annual license for each place where such trade or business is carried on. The amount of the fee depends on the type and location of the business, as well as on the number and type of employees.

Companies that engage in certain types of business, such as banking and insurance, may be required to be licensed or registered under relevant laws. These laws may expressly eliminate the requirement that a company obtain a Trade or Business License or a Local Companies (Control) Law License.

The following are the annual license renewal fees payable by insurance companies and banks registered in the Cayman Islands.

Insurance companies (KYD)	
Class A (locally incorporated)	75,000
Class A (approved external insurer)	75,000
Class B(I) (at least 95% of the net premiums written originate from the insurer's related business)	8,500
Class B(II) (over 50% of the net premiums written originate from the insurer's related business)	9,500
Class B(III) (50% or less of the net premiums written originate from the insurer's related business)	10,500
Banking and trust companies (KYD)	
Class A (unrestricted)	1,000,000
Class A (restricted)	300,000 or 350,000
Class B (unrestricted)	60,000 to 100,000
Class B (restricted)	37,000 or 40,000

The fees for Class B banking and trust licenses depend on the corporate structure of the relevant bank (the structures are branches, subsidiaries and private/affiliated companies) and slightly higher fees may be payable on the application and grant of the license. Restricted trust companies must pay an annual fee of KYD7,000 for a restricted trust license alone.

Mutual funds registered or licensed under the Mutual Funds Law must pay an annual license fee of KYD3,500. Mutual fund administrators must pay the following license renewal fees:

- Restricted license: KYD7,000
- Unrestricted license: KYD30,000 or KYD35,000 (depending on the number of funds under administration)

Company managers and corporate service providers licensed under the Companies Management Law must pay an annual license fee. For managers, the annual license fee ranges from KYD750 to KYD20,000 (depending on the number of companies under management), plus KYD150 per managed company. For corporate service providers, the annual license fee ranges from KYD500 to KYD10,000, plus KYD75 per company.

Stamp duties. Stamp duties are charged on transfers of real property, leases, mortgages and the execution of various other documents within the Cayman Islands. Transfer duty is payable on transfers of shares in Cayman Islands companies that hold real property in the Cayman Islands, subject to certain exemptions.

Common Reporting Standards. On 16 October 2015, the Cayman Islands published The Tax Information Authority (International Tax Compliance) (Common Reporting Standards) Regulations, 2015, for the implementation of the Common Reporting Standards (CRS) Regulations. The CRS Regulations entered into force on 1 January 2016.

Country-by-Country Reporting. The Cayman Islands has adopted Country-by-Country Reporting (CbCR) in accordance with the Base Erosion and Profit Shifting (BEPS) Action Plan. The CbCR regulations and guidelines were issued in December 2017.

E. Tax treaties

As of December 2018, the Cayman Islands has entered into bilateral tax information arrangements with Argentina, Aruba, Australia, Belgium, Brazil, Canada, China, Curaçao, the Czech Republic, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Guernsey, Iceland, India, Ireland, Isle of Man, Italy, Japan, Malta, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, Qatar, Seychelles, Sint Maarten, South Africa, Sweden, the United Kingdom and the United States.

The Cayman Islands has also entered into a double tax treaty with the United Kingdom.

On 5 November 2013, the Cayman Islands and the United Kingdom signed an intergovernmental agreement (IGA) to enable the exchange of information for tax purposes, including on an automatic basis.

On 29 November 2013, the Cayman Islands and the United States signed and released a Model 1 IGA for the implementation of the US Foreign Account Tax Compliance Act.

Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) The minimum tax equals 1.5% of turnover. For further details, see Section B.
- (b) In certain circumstances, the tax is deferred or reduced (see Section B).
- (c) An optional final withholding tax is available for CIE Petroleum Contractors and Subcontractors (foreign companies that have entered into subcontracts with oil companies registered in Chad). The rate of this final withholding tax is 25% of the net amount of the contract.
- (d) This withholding tax also applies to directors' allowances, nondeductible expenses and adjustments or reinstatements following a tax reassessment.
- (e) This withholding tax applies to residents and nonresidents.
- (f) The rate of this withholding tax is 20% if the relevant interest is paid to a resident and 25% if it is paid to a nonresident.
- (g) This withholding tax applies to payments by Chadian resident companies to nonresidents.

- (h) This withholding tax applies to payments made to individuals in the self-employed professions, trade intermediaries, door-to-door salespersons and representatives of the law (attorneys, bailiffs and notaries).
- (i) The withholding tax rate is 15% if the beneficiary of the landlord is a tax resident and 20% if the beneficiary is a tax nonresident.
- (j) The income subject to tax corresponds to the net profit after corporate income tax.

B. Taxes on corporate income and gains

Corporate income tax. Chadian companies are taxed on the territoriality principle. As a result, Chadian companies carrying on a trade or business outside Chad are not taxed in Chad on their foreign-source profits. Chadian companies are those registered in Chad, regardless of the nationalities of their shareholders or where they are managed and controlled. Foreign companies with activities in Chad are subject to Chadian corporate tax on Chadian-source profits.

Tax rates. Under the General Tax Code, the standard corporate income tax rate applicable to all companies is a flat rate of 35% of taxable income. Corporate income tax is calculated by applying the tax rate to taxable income, which is based on income reported in the audited financial statements.

Oil and gas contractors are subject to higher rates.

The minimum tax is paid on a monthly basis at a rate of 1.5% of the turnover of the previous month. The payment must be made by the 15th day of the month following the month of realization of the turnover. The minimum tax per year cannot be less than XAF1 million for small companies and XAF2 million for large companies.

Sales made by wholesale dealers to individuals are subject to withholding tax at a rate of 4%. Wholesale dealers must pay the amount due to the tax authorities by the 15th day of the following month. Purchases made by companies from individuals are also subject to withholding tax at the same rate.

Profits realized in Chad by branches of foreign companies are subject to a branch withholding tax of 20% levied on the net profit after corporate income tax.

Newly incorporated companies or new businesses conducted by existing companies can be exempt from corporate income tax for five years if they satisfy the following conditions:

- The newly incorporated company or new business must be operating in specific sectors, which are the industry, mining, agriculture, forestry and real estate sectors.
- The newly incorporated company or new business must demonstrate a particular interest for Chad development.
- The newly incorporated company or new business must not compete in any way with existing companies.
- The newly incorporated company must have a regular accounting conducted in Chad.

If the above-mentioned conditions are met, the application can be submitted to the Ministry of Finance and Budget.

Capital gains. Capital gains are taxed at the regular corporate rate. Capital gains include gains on the sale of real estate, corporate

shares and business assets. However, the tax can be deferred or eliminated in the event of a merger under certain conditions.

For a business that is totally or partially transferred or discontinued (such as through a liquidation or sale of the business), only one-third of the net capital gains is taxed if the event occurs more than five years after the beginning or purchase of the business, and only one-half of the gains is taxed if the event occurs within the five years following the beginning or purchase of the business.

Administration. The fiscal year runs from 1 January to 31 December.

Companies must file income tax returns by 30 April of the year following the fiscal year. Late returns are subject to a penalty of 1.5% per month, up to 50% of the tax due. An additional penalty of 100% or 150% applies in case of bad faith or in case of fraud discovered through a tax audit. Corporate income tax must be paid by the deadline for filing tax returns. Late payments are subject to a penalty of 2% per month of delay, excluding the application of an additional penalty.

At the same time as the filing of the annual tax return, the company is required to submit a transfer-pricing report for all transactions carried out with its head office or affiliate entities located outside Chad. Noncompliance with this transfer-pricing documentation requirement (failure to submit the report or the submission of incomplete or incorrect information) is subject to the following sanctions:

- The rejection of relevant intercompany expenses as deductible costs
- A fine of 5% of the gross amount of the concerned transactions, with a minimum of XAF50 million

Dividends. Dividends paid to resident individuals in Chad are subject to a 20% withholding tax. Resident individuals must include the gross dividend in taxable income, but they receive a corresponding 20% tax credit to prevent double taxation. Dividends received by resident companies are included in their taxable income and are subject to corporate income tax at the regular rate of 35%. Dividends paid to nonresidents are subject to a final 20% withholding tax.

The participation exemption regime may exempt up to 90% of the dividends received from a 50%-owned subsidiary if the parent company and the subsidiary have their registered offices in a Central African Economic and Monetary Community (Communauté Économique et Monétaire de l'Afrique Centrale, or CEMAC) member state. The CEMAC member states are Cameroon, Central African Republic, Chad, Congo (Republic of), Equatorial Guinea and Gabon.

Foreign tax relief. In general, foreign tax credits are not allowed. The income of residents and nonresidents subject to foreign tax that is not exempt from Chadian tax under the territoriality principle is taxable, net of the foreign tax.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the Organization for the Harmonization of Business Law in Africa

(L'Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) standard statements.

Business expenses are generally deductible unless specifically excluded by law. Expenses that are not deductible include the following:

- Head office overhead, research costs, and technical, financial and administrative assistance fees paid to nonresidents that exceed 10% of taxable profits before their deduction. This limitation does not apply to technical assistance fees related to the assembly of a factory, which are deductible in their entire amount. In addition, if the payments are made in a tax-haven country or territory, the deductible head office overhead cannot exceed 50% of the gross amount reported as a charge. The tax-haven countries and territories are jurisdictions that are defined with reference to the blacklists of non-cooperative or privileged taxation countries and territories published by the Organisation for Economic Cooperation and Development, the European Union or the Minister of Finance of Chad and that do not have a tax treaty with Chad providing for the mutual exchange of information for tax purposes. The privileged taxation countries or territories are defined as those not applying a tax on companies' revenue or those applying a tax rate lower than half of the Chadian corporate income tax rate under the common regime. Interest paid to the head office with respect to intercompany loans are included in the calculation of head office overhead deductible costs.
- Charges from transactions with related parties, if the appropriate transfer-pricing documentation is not filed.
- Rent expenses for movable equipment paid to a shareholder that manages the company in fact or by right and holds, directly or indirectly, more than 10% of the capital.
- Interest paid to shareholders in excess of the central bank annual rate plus two points.
- Commissions and brokerage fees for services on behalf of companies located in Chad that exceed 5% of purchased imports and sales of exports.
- Amounts set aside for self-insurance.
- Certain specific charges (such as contributions other than those for retirement paid to a foreign social security organization, which are deductible up to 15%, and health insurance premiums paid to companies located abroad), gifts, subsidies and penalties (to some extent).
- Expenses paid to local suppliers without reference to a Chadian tax identification number.
- Disallowed expenses, such as personal expenses, family expenses, nonbusiness-related expenses, provisions for redundancy for economic purposes and for self-insurance and unsupported expenses.

Inventories. Inventory is normally valued at the acquisition cost or at the lower of cost or market value. Cost must be determined on a weighted-average cost-price method. The first-in, first-out (FIFO) method is also generally acceptable.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or

expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Insurance companies may deduct technical provisions provided by the Conférence Interafricaine des Marchés d' Assurance (CIMA) Code to the extent that the General Tax Code does not contain any limitation for such deduction.

Credit institutions may deduct provision for bad debts. Such deduction is limited to 25% for the first year, 50% for the second year and 25% for the third year, if the concerned debt is not covered by a guarantee. If the bad debt is covered by a real guarantee, the deductibility is limited to 15% for the first year, 30% for the second year, 30% for the third year and 25% for the fourth year.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. Accordingly, if the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed for tax purposes.

Relief for tax losses. Losses may be carried forward for three years. However, losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. The Chadian tax law does not provide for the fiscal integration of Chadian companies equivalent to a consolidated filing position.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on transactions carried out in Chad; certain transactions are exempt	
Standard rate	18
Exports	0
African Union Tax; on imports from outside Africa	0.2
Business license; rate varies depending on the amount of turnover	Various
Registration duties, on transfers of real property or businesses	3 to 10
Social security contributions on an employee's annual gross salary, limited to XAF6 million	
Family allowances, paid by employer	7.5
Old age, disability and survivor's pension; paid by Employer	5
Employee	3.5
For job-related accidents; paid by employer	4
Inclusive tax; on gross salary and effective value of benefits in kind; paid by employer	7.5
Training tax; on gross salary and effective value of benefits in kind; paid by employer	1.2

E. Foreign-exchange controls

Exchange-control regulations exist in Chad for financial transfers outside the franc zone, which is the monetary zone including

France and its former overseas colonies. A CEMAC rule (No. 02/18/CEMAC/UMAC/CM, dated 21 December 2018) applies to all of the CEMAC countries.

F. Treaty withholding tax rates

Chad has a limited tax treaty network. Chad has only entered into the CEMAC multilateral tax treaty, dated 13 December 1966. Under this treaty, the following are the withholding tax rates.

	Dividends %	Interest %	Royalties %
Cameroon	20 (a)	20 (a)	– (b)
Central African Republic	20 (a)	20 (a)	– (b)
Congo (Republic of)	20 (a)	20 (a)	– (b)
Equatorial Guinea	20 (a)	20 (a)	– (b)
Gabon	20 (a)	20 (a)	– (b)
Non-treaty jurisdictions	20	25	25

- (a) Payments from a Chadian source are subject to withholding tax under Chadian domestic tax law.
- (b) Withholding tax is not levied. The income is subject to tax in the state of the recipient.

Other Fees and Compensation for Services Rendered Abroad	35 (b)
Branch Remittance Tax	35 (a)(g)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) See Section B.
- (b) The tax applies to payments to nonresidents.
- (c) The 35% tax applies to the amount of the grossed-up dividend. Up to 100% of the corporate tax paid by the company can be used as a credit against the withholding tax, depending on the tax regime of the company.
- (d) A reduced rate of 4% applies to certain interest payments including, but not limited to, interest paid on loans granted by foreign banks, insurance companies, financial institutions, and interest paid with respect to import operations.
- (e) No withholding tax is imposed on payments related to standard software if certain requirements are met. A reduced withholding tax rate of 15% applies to payments with respect to the following:
- Invention patents
 - Models
 - Industrial drawings and designs
 - Layout sketches or layouts of integrated circuits
 - New vegetable patents
 - Use or exploitation of computer programs (software)
- The reduced tax rate does not apply to payments made to companies resident in jurisdictions considered to be preferential regimes. As a result, the withholding tax rate for such payments is 30%. A reduced withholding tax rate of 20% applies to payments for television broadcasting and cinematographic materials.
- (f) A 15% rate applies to payments for engineering, technical assistance, professional and other technical services rendered in Chile or abroad. However, if the payments are being made to a company domiciled in a jurisdiction considered to be a preferential regime, the withholding tax rate is 20%. Exceptionally, payments abroad made as consideration for technical assistance may be exempted from withholding tax if ruled by Customs to be linked to the exportation of services.
- (g) The 35% tax applies to the amount of the grossed-up dividend. Up to 100% of the corporate tax paid by the branch can be used as a credit against the withholding tax, depending on the tax regime of the branch.

B. Taxes on corporate income and gains

Corporate income tax. Chilean resident corporations and branches of foreign entities are subject to income tax on their worldwide income. A resident corporation is one that is incorporated in Chile. The corporate income tax is applied to accrued net income, with the exception of foreign-source income, which is computed on a cash basis. The taxable results of foreign branches and passive income of controlled foreign corporations (see Section E) are also included in the tax base.

Rates of corporate tax. The corporate income tax rate is 25% or 27%, depending on the tax regime elected by the company. The corporate tax paid by the company is creditable against the withholding tax applicable to the distribution of profits to the company's partners or shareholders.

Dividends. Dividends or profit distributions between resident entities are not subject to tax. Dividends received from foreign subsidiaries are taxed as ordinary income. A foreign tax credit is available with respect to such dividends.

Dividends paid by a Chilean company to a nonresident entity or individual are subject to a 35% tax. However, the 25% or 27% corporate tax is creditable against the withholding tax (up to 100% of the corporate tax may be creditable depending on the tax regime of the company). This withholding tax rate is not reduced by tax treaties.

Tax regimes. Two different corporate tax regimes are available. New companies must notify the Internal Revenue Service (IRS) of their election at the moment of the start-up of their business and must remain under the elected regime for at least five years.

Attributed Income Regime. Under the Attributed Income Regime (Regime A), income received or accrued by a company is annually attributed to its shareholders or partners, regardless of the effective dividend distributions. Companies are subject to a 25% corporate income tax. The corporate income tax paid by the company is fully creditable against the tax imposed on the shareholders, resulting in a 35% overall rate in the case of nonresident owners. This regime is available only to companies entirely held by Chilean individuals or nonresidents (individuals or entities). In any case, corporations (*sociedades anónimas*, or SAs) are excluded from this regime.

Distributed Income Regime. Under the Distributed Income Regime (Regime B), shareholders or partners are taxed only on the actual distribution of dividends or profits by the company. Companies are subject to a 27% corporate income tax. Under Regime B, shareholders or partners are able to use 65% of the corporate income tax paid by the company as a credit against the withholding tax. As a result, nonresident shareholders are taxed at a 44.45% overall rate unless they are domiciled in a treaty country, in which case the corporate income tax is fully creditable.

Mining tax. A special tax on mining activities is imposed on individuals or legal entities that extract minerals subject to concession and sell these minerals in any state of production. The tax is imposed at progressive rates ranging from 0% to 14%, depending

on the amount of the sales and the operational margin of the taxpayer. The tax base is corporate income with certain adjustments.

Sales made by related mining entities are attributed to the taxpayer for purposes of determining the tax rate.

The mining tax is imposed in addition to the income tax. However, the mining tax may be deducted as an expense for income tax purposes for the year in which the tax is due.

Capital gains. In general, capital gains realized by foreign investors are subject to a 35% overall tax.

Sales of shares of companies listed on the stock exchange are exempt from income tax under certain conditions. Under certain double tax treaties, the tax rate on capital gains may be reduced to 20%, 17% or 16%.

Indirect transfers of Chilean shares are subject to capital gains tax at a rate of 35% if a nonresident entity transfers its indirect interest in Chile under either of the following conditions:

- The nonresident seller transfers at least 10% of its shares in the indirect holding entity and either of the following circumstances exists:
 - At least 20% of the fair market value of the total shares held by the seller derives from the fair market value of the Chilean underlying assets.
 - If, at the date of the transfer, the fair market value of Chilean underlying assets is equal to or greater than approximately USD180 million proportionally.
- The seller is incorporated in a jurisdiction considered preferential (with certain exceptions).

Limitations apply to the measure if the indirect transfer is made within a group reorganization process and if no capital gains are triggered.

Administration. All accounting periods in Chile must end on 31 December. Income taxes must be paid during the month of April.

Provisional monthly payments on account of final annual income tax are due on the 12th day of each month.

Foreign tax relief. A foreign tax credit may be claimed up to a limit of 25%, 27%, 32% or 35% of the foreign-source income, depending on the nature of the income and the existence of a double tax treaty.

C. Determination of trading income

General. Taxable income, determined in accordance with generally accepted accounting principles, includes all profits, with the exception of specified items that are not considered income for tax purposes.

In general, all necessary expenses for producing income, sustained and justified, may be deducted to determine taxable income. However, expenses related to automobiles are not deductible. Interest associated with investment in Chilean companies is deductible for corporate tax purposes.

Payments to related parties of royalties and interest, for freight, insurance, and leases and of the types of income indicated in Article 59 of the Income Tax Law can only be deducted on a cash basis if the following requirements are met:

- The applicable withholding tax, if any, is declared and paid.
- The remittance of funds abroad is effectively made.

In addition, royalty payments to a related party abroad (a relationship strictly for the purposes of the application of this rule) may be subject to additional deductibility restrictions.

Inventories. For inventory valuation, the first-in, first-out (FIFO) method and the weighted average cost method are accepted by law. A corresponding monetary correction must be added to cost.

Monetary correction. The Income Tax Law contains monetary adjustment rules. These rules, known as monetary correction, require taxpayers to revalue certain assets and liabilities annually based on the changes reflected in the consumer price index (CPI) and in foreign-exchange rates. The different indices that are used to adjust assets and liabilities may result in taxable profits or losses.

The following adjustments must be made for monetary correction purposes:

- The initial net value of fixed tangible assets is restated based on the change in the CPI, which is fixed monthly by the National Statistical Service. Depreciation is computed on the value of the assets after restatement.
- Inventories existing at the balance-sheet date are restated to their replacement cost.
- Credits, rights and liabilities that are in a foreign currency or linked to price indices are adjusted based on the change in the foreign-exchange rate or the relevant index. Investments in foreign entities are treated as foreign-currency denominated assets.

Depreciation. Depreciation must be calculated using the straight-line method. The tax authority has established the following normal periods of depreciation.

Manufacturing industry and trade	Years
Machinery	15
Heavy tools	8
Light tools	3
General installations	10
Trucks	7
Cars, pickups, station wagons and buses	7
Computers, computer systems, peripherals and similar items	6
Building and mining industries	Years
Solid buildings	80
Semisolid buildings	20 to 50
Buildings of light materials	10
Bulldozers, tractors, Caterpillars and other machines employed in heavy construction	8
Drilling equipment, internal combustion engines, soldering equipment and similar equipment	6
Machines employed in mining activities (general rate)	9

Annual depreciation rates must be applied after the revaluation of fixed assets according to the rules of monetary correction (see *Monetary correction*). Accelerated depreciation may be applied to new or imported fixed assets and to imported fixed assets with normal useful lives of three years or more. The accelerated method allows the calculation of depreciation based on a useful life for an asset equivalent to one-third of the normal useful life established by the Chilean tax authorities. However, accelerated depreciation may be used only in determining trading income for corporate tax purposes.

Immediate depreciation is available for micro-companies and small-sized companies, while medium-sized companies can benefit from depreciation rates of up to 1/10 of the useful life.

Relief for losses. Losses may be carried forward without a time limit. If a qualified change of ownership occurs, accumulated tax losses may not be deducted from income generated after the ownership change.

The carryback of losses is not available.

D. Value-added tax

Value-added tax (VAT) applies to sales and other transactions regarding tangible personal property, as well as to payments for certain services. It also applies to the habitual sale of real estate. The general tax rate is 19%. VAT is imposed under a credit-debit system.

E. Miscellaneous matters

Foreign-exchange controls. The Central Bank of Chile must be informed of all transactions exceeding USD10,000. Other annual information requirements are imposed.

Taxpayers must report annually (by a sworn statement that must be filed each year) their permanent investments in foreign companies, investments in foreign branches and details regarding their foreign-source income.

Individuals or entities domiciled or resident in Chile must inform the Chilean IRS if they become trustees or administrators of trusts created in accordance with foreign law.

Transfer pricing. Chilean transfer-pricing regulations are in line with the Organisation for Economic Co-operation and Development (OECD) guidelines.

Acceptable transfer-pricing methods include the following:

- Comparable uncontrolled price
- Resale price
- Cost-plus
- Profit-split
- Transactional net margin

Any other method may be used if none of the above methods applies to the transaction. The most suitable method should be used, taking into account the facts and circumstances of each related-party transaction.

Taxpayers must file an annual sworn statement identifying related-party transactions and transfer-pricing methods, and providing other information requested by the Chilean IRS through regulations. In addition, taxpayers must keep all relevant information supporting compliance with the transfer-pricing rules.

County-by-Country (CbC) regulations have been in force in Chile since 2017.

Debt-to-equity rules. Excess indebtedness exists if the “debt” of a Chilean entity exceeds three times its tax equity (*capital propio tributario*; financial equity with certain adjustments). “Debt” includes all debt, regardless of whether it is foreign or local or related or unrelated, as well as the debt at the level of the company’s permanent establishments abroad.

If excess indebtedness is triggered, a 35% surtax applies on interest if both of the following circumstances exist:

- The interest is paid abroad due to related-party debt.
- The interest benefits from a reduced withholding tax rate (4% under domestic law or tax treaty rate).

In this case, the applied withholding tax may be used as a credit by the Chilean debtor who must bear the 35% penalty tax. The concept of relationship also includes any type of guarantee.

Controlled foreign corporations. In general, foreign-source income is taxed on a cash basis. However, under the controlled foreign corporation (CFC) rules, Chilean resident taxpayers are taxed on an accrual basis on passive income received or accrued by a CFC.

Under the CFC rules, passive income includes the following:

- Dividends or profit distributions from non-controlled entities
- Interest (unless the controlled entity is a bank or financial institution)
- Royalties
- Capital gains
- Income from the lease of real property (unless the exploitation of real property is the principal activity of the controlled entity)
- Income from the assignment of certain assets
- Specified Chilean-source income

Control of a foreign entity is deemed to exist in any of the following circumstances:

- 50% or more of the capital, profit or voting rights is directly or indirectly owned by a Chilean taxpayer.
- The Chilean taxpayer has a decisive influence on the administration of the foreign entity.
- The foreign entity is domiciled in a country or territory with a preferential tax regime, unless proven otherwise (that is, a foreign entity is deemed controlled if it is domiciled in a tax haven or preferred jurisdiction, unless the Chilean taxpayer demonstrates that it does not control it).

F. Treaty withholding tax rates

The table below lists the withholding tax rates under the Chilean treaties in force. All of these treaties are based on the OECD model convention.

	Dividends	Interest (f)	Patent and know-how royalties
	%	%	%
Argentina	10/15 (a)	4/12/15 (b)	3/10/15
Australia	15 (a)	4/15 (b)	5/10 (c)

Non-treaty jurisdictions	35 (f)	4/35 (g)	15/30 (e)

(a) With respect to Chile, the treaty withholding tax rates for dividends do not apply to the 35% withholding tax applicable under domestic law as long as the corporate tax is creditable against the withholding tax.

(b) These treaties have a most-favored nation (MFN) clause with respect to interest.

(c) These treaties have an MFN clause with respect to royalties. In the case of the Peru treaty, the clause applies after a five-year period beginning on the effective date of the Chile-Peru treaty.

(d) The rates have been expressly ratified by respective countries as a result of the applicability of an MFN clause.

(e) The withholding tax rate is reduced to 15% for payments with respect to the following:

- Invention patents
- Models
- Industrial drawings and designs
- Layout sketches or layouts of integrated circuits
- New vegetable patents
- The use or exploitation of computer programs (software)

The reduced tax rate does not apply to payments made to companies resident in jurisdictions considered to be preferential regimes. The withholding tax rate for such payments is 30%.

- (f) The 35% tax applies to the amount of the grossed-up dividend. Up to 100% of the corporate tax paid by the Chilean company is creditable against the withholding tax borne by the nonresident shareholder, depending on the tax regime of the Chilean company.
- (g) Under Chilean domestic law, a reduced 4% tax rate applies to the following interest payments:
 - Interest paid on loans granted by foreign banks, financial institutions and insurance companies
 - Interest paid on bonds
 - Interest paid with respect to import operations

Chile has signed a tax treaty with the United States, which is awaiting ratification by the United States.

Email: cong-c.zhang@cn.ey.com

This chapter refers only to the taxation of entities under the tax laws of the Mainland China tax jurisdictions.

A. At a glance

Corporate Income Tax Rate (%)	25
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25
Withholding Tax (%) (b)	
Dividends	10 (c)
Interest	10
Royalties from Patents, Know-how, etc.	10
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5/10 (d)

- (a) Capital gains derived by foreign enterprises from disposals of interests in foreign investment enterprises are subject to a final withholding tax of 10% instead of income tax. This rate may be reduced by applicable tax treaties.
- (b) The statutory rate is 20%, which is reduced to 10% by the Enterprise Income Tax Law Implementation Regulations.
- (c) Effective from 1 January 2017, foreign investors are eligible for dividend withholding tax deferral treatment if they directly reinvest the attributable or distributable profits from its Chinese tax resident investees or portfolio companies in China, subject to meeting certain required conditions (see Section B).
- (d) Effective from 1 January 2018, for qualifying High and New Technology Enterprises (HNTEs) and technology-based small and medium-sized enterprises, the time period for carrying forward net operating losses can be extended to 10 years (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. Corporate residents of China are taxed on their worldwide income, including income from business operations, investment and other sources. A foreign tax credit is allowed for income taxes paid in other countries. This credit is capped at the China income tax payable on the same income calculated under the corporate income tax law.

In general, a company is regarded as tax resident in China if it is incorporated in China or effectively managed in China. “Effective management” is defined as overall management and control over

the production, business, personnel, accounting, and assets of a company.

Nonresident companies are taxed on China-source income only. However, if the nonresident company has an establishment in China, non-China source income effectively connected with the China establishment is also taxed.

The term “establishment” is broadly defined to include the following:

- A place of management
- A branch
- An office
- A factory
- A workshop
- A mine or an oil and gas well or any other place of extraction of natural resources
- A building site
- A construction, assembly, installation or exploration project
- A place for the provision of labor services
- A business agent

Rates of corporate tax. The statutory rate of enterprise income tax is 25%. The withholding tax rate on passive income (including dividends, interest, royalties and capital gains) of non-China tax residents is 10%.

A reduced tax rate applies to the following enterprises, subject to the satisfaction of certain conditions:

- 20% rate and 50% reduction of annual taxable income for qualifying small and less-profitable enterprises, provided that they have annual taxable income not exceeding CNY1 million for the period of 1 January 2018 through 31 December 2020. Before 1 January 2018, the threshold was CNY500,000.
- 15% for HNTes.
- 15% for qualifying Technologically Advanced Service Companies nationwide (effective from 1 January 2017). Effective from 1 January 2018, companies engaging in the service trade should refer to the Scope of Recognition of Technology Advanced Services for Service Trade as stipulated in the attachment of Circular Caishui [2018] No. 44.
- 10% for key software enterprises, key animation and comics enterprises and integrated circuit designing enterprises.
- 15% for western region enterprises and enterprises in Ganzhou in Jiangxi Province engaging in and deriving 70% of their total income from certain encouraged industries as stipulated in a new western region catalog (from 1 October 2014 to 2020).
- 15% for qualifying enterprises that are registered in the Guangdong Hengqin New Area (Hengqin), the Fujian Pingtan Comprehensive Pilot Zone (Pingtan) or the Qianhai Shenzhen-Hong Kong Modern Service Industry Cooperation Zone (Qianhai) (for further details, see below).

Tax incentives. A five-year tax holiday (exemption for the first two years and 50% reduction for the next three years) is granted to newly established and qualified HNTes that are incorporated after 1 January 2008 and that are located in the Shanghai Pudong New Area or one of the five Special Economic Zones (SEZs),

which are Hainan Province, Shantou, Shenzhen and Zhuhai in the Guangdong Province, and Xiamen in the Fujian Province. A five-year tax holiday also applies to qualifying software enterprises, animation and comics enterprises, integrated circuit designing enterprises and qualified integrated circuit production enterprises (or qualified projects in which investments are made on or after 1 January 2018). For qualified integrated circuit production enterprises (or qualified projects), the tax holiday can be extended to 10 years (exemption for the first 5 years and 50% reduction for the next 5 years) under certain conditions. The 5-year or 10-year tax holiday starts from the tax year in which a qualifying enterprise begins making profits or when a qualifying project generates its first business operating income. If a software enterprise, animation and comics enterprise or integrated circuit designing or production enterprise cannot satisfy the relevant requirements in a profit-making tax year, the enterprise enjoys the remaining tax holiday from its initial tax year in which it satisfies the relevant requirements. If a qualifying integrated circuit designing enterprise did not have its first profit-making year by 2017, it lost its eligibility for the above tax holiday and must pay corporate income tax at the 25% statutory rate.

During the period from 2010 to 2020, certain specified industries in selected areas of Xinjiang, such as agriculture and forestry, irrigation, coal production and related industries, electricity, new energy, oil and gas, production of certain metals and related industries, petrochemical, pharmaceutical, transportation, modern logistics, environmental protection and resources conservation, can also benefit from a five-year tax holiday based on the statutory rate of 25%. A five-year exemption applies to qualifying enterprises located in the Kashi and Huoerguosi Special Economic Development Zones of Xinjiang.

During the period of 1 January 2014 through 31 December 2020, enterprises that are established in Hengqin, Pingtan or Qianhai (the covered areas) and that engage in encouraged industries can be subject to a reduced corporate income tax rate of 15%. Enterprises engaging in encouraged industries are enterprises that satisfy the following conditions:

- They have their core businesses in the covered area.
- Their businesses relate to industries and projects stipulated in preferential corporate income tax catalogs.
- Their income derived from such core businesses account for more than 70% of their total income.

If enterprises have establishments both inside and outside the covered areas, only the income attributable to establishments inside the covered areas is eligible for the preferential corporate income tax rate of 15%. In determining whether enterprises meet the above-mentioned conditions for preferential corporate income tax rates, only their establishments inside the covered areas are counted; their establishments outside the covered areas are not considered.

From 1 January 2018 through 31 December 2020, China temporarily has raised the general pretax super deductions rate from 150% to 175% on an expanded scope of qualifying research and development expenditures (RDEs) incurred by China tax resident enterprises during the year; alternatively, if related qualifying

RDEs are incurred for developing intangible assets, the companies may amortize the capitalized intangible assets based on 175% (also increased from the general super deduction rate of 150%) of the actual cost incurred on developing the intangible assets. Previously, the 175% super deduction rate was eligible only to qualified technology-based small and medium-sized enterprises from 1 January 2017 through 31 December 2019.

Effective 1 January 2018, when an enterprise outsources its research and development (R&D) activities to overseas entities (not including overseas individuals), the enterprise as consignor is eligible for a 50% super deduction (75% super deduction during the period of 1 January 2018 through 31 December 2020) based on 80% of expenses incurred for the R&D activities outsourced to overseas entities, provided that the expenses do not exceed two-thirds of the enterprise's total eligible R&D expenses incurred domestically. The actual amount of R&D expenses should be determined in accordance with the arm's-length principle. If the consignor and consignee are related parties, the consignee should provide the consignor with detailed R&D expense statements. The corporate income tax super deduction for expenses incurred for outsourcing R&D activities to overseas entities was not allowed under the old prior rules.

Other tax incentives are available to enterprises engaged in industries, projects, or activities encouraged by national policies. The incentives granted to these encouraged industries, projects and activities typically include the following:

- Income from agriculture, forestry, animal husbandry and fishery projects is eligible for a full tax exemption or 50% reduction of tax, depending on the type of projects.
- Income from infrastructure projects is eligible for a full tax exemption for the first three years and a 50% reduction of tax for the next three years beginning with the first income-generating year. If certain requirements are met, enterprises that invest in a qualifying public infrastructure project and are approved to perform the project in phases are allowed to calculate the corporate income tax based on the taxable income of each phase and enjoy the tax holiday for different phases of the project separately.
- Income from environmental protection or water or energy conservation projects is eligible for a full tax exemption for the first three years and 50% reduction of tax for the following three years.
- Income from technology transfer is eligible for a tax exemption for the first CNY5 million and a 50% reduction for the amount over that threshold.
- 200% of qualified wages for disabled people can be tax deductible.
- A venture capital company that makes equity investments in qualifying fledgling science and technology enterprises (QFSTEs) for at least 2 years (or 24 months) may offset 70% of its investments against its taxable income. Any excess amount can be carried forward and offset against the taxable income in the subsequent tax years.
- A corporate partner of limited partnership venture capital companies (LPVCCs) that makes equity investments in QFSTEs for at least 2 years (or 24 months) may offset 70% of its investments against its taxable income generated from the LPVCC.

Any excess amount can be carried forward and offset against the taxable income generated from the LPVCC by the corporate partner in the following tax years.

- Income derived from recycling business is eligible for a 10% reduction in calculating taxable income.
- 10% of the cost incurred in purchasing environmental protection, water and energy saving or production safety equipment can be credited against income tax payable for the year of the purchase.

Capital gains and losses. In general, capital gains and losses are treated in the same manner as other taxable income and losses, and are taxed at the normal income tax rate of 25%. However, China-source capital gains derived by nonresident enterprises, such as gains from the disposal of a foreign investment enterprise (FIE), are subject to a 10% withholding tax. In addition to income tax, real property gains tax is imposed on gains derived from transfers of real properties (see Section D).

Administration. The tax year in China is the calendar year.

An annual corporate income tax return, together with audited financial statements issued by a certified public accountant registered in China and a set of annual reporting forms for related-party transactions, is due within five months after the end of the tax year. Enterprises must settle all outstanding tax liabilities within the same period.

In addition, enterprises must also file quarterly provisional corporate income tax returns within 15 days after the end of each quarter, together with payments of provisional tax based on actual profits. If an enterprise has difficulty in filing a provisional tax return based on the actual quarterly profits, it may pay tax based on estimated profits. The estimated profits are normally computed by reference to one-quarter of the enterprise's actual taxable profits for the preceding year. Otherwise, they are computed under other methods approved by the tax bureau.

Late filing or late payment triggers a surcharge of 0.05% per day and a discretionary penalty of 50% to 500% of the unpaid tax liabilities. For adjustments made under anti-avoidance provisions, such as adjustments with respect to transfer pricing, thin capitalization and controlled-foreign corporations (see Section E), an interest charge is imposed on a daily basis, beginning on 1 June of the year following the tax year to which the tax underpayment is related and ending on the day the tax underpayment is settled. This charge is based on the renminbi yuan (CNY) loan base rate published by the People's Bank of China (PBOC) plus 5%. If contemporaneous documentation and other prescribed documentation are provided or if the contemporaneous documentation is not needed in accordance with the relevant regulations but other relevant documents are provided as required by the tax authorities, the interest charge may be reduced to an amount based only on the CNY loan-based rate published by the PBOC.

Effective from 1 January 2015, the administrative approval requirements for tax incentives were removed and replaced by a record-filing mechanism.

Dividends. Profits of FIEs distributed as dividends are subject to withholding tax at a rate of 10% (this rate may be reduced under a tax treaty or arrangement) when the dividends are actually paid. Effective from 1 November 2015, the investor may determine and enjoy the treaty benefits itself when filing a tax return or making a withholding declaration through a withholding agent, and accept the subsequent post-filing administration from the in-charge tax authorities. Dividends paid between qualified resident companies may be exempted. For this purpose, resident companies are qualified if one tax resident has made a direct investment in the other tax resident. Dividends attributable to publicly traded shares are also treated as tax-exempt investment income if the holding period of the shares is longer than 12 months.

Effective 1 January 2017, if a foreign investor makes an investment directly with the profits that it obtains from a Chinese resident enterprise in an investment project in one of the designated encouraged industries listed under the Foreign Investment Industrial Guidance Catalogue and/or the Catalogue of Priority Industries for Foreign Investments in the Central and Western Regions, the withholding tax deferral policy applies, provided that certain requirements are fulfilled. Effective from 1 January 2018, the qualified application scope for dividend withholding tax deferral policy is expanded from encouraged industries to all non-prohibited industries. If the foreign investor recovers the investment by means of equity transfer, repurchase, liquidation or other ways from a direct investment that has enjoyed benefits from the withholding tax deferral policy, it must declare and pay the deferred tax amount to the tax authority within seven days after actually receiving the relevant payments.

Foreign tax relief. A tax credit is allowed for foreign income taxes paid, or indirectly borne, by China resident enterprises, but the credit is generally limited to the amount of China corporate income tax payable on the foreign-source portion of an enterprise's worldwide taxable income. A nonresident enterprise with an establishment or place of business (generally referred to as a permanent establishment [PE]) in China that derives foreign-source income effectively connected to the PE can also claim a tax credit for income taxes paid in foreign jurisdictions, but the credit is limited to China corporate income tax payable on such income. Excess foreign tax credits may be carried forward for a period of five years. Effective from 1 January 2017, Chinese companies may claim an indirect foreign tax credit with respect to five tiers of controlled overseas subsidiaries (previously three tiers). Also, effective from the 2017 tax year, Chinese companies may adopt a comprehensive basis instead of the current country-by-country basis to calculate its foreign tax credit limit. The comprehensive basis is perceived to be more favorable to taxpayers than the country-by-country basis in many cases. Under the country-by-country method, the tax credit limit for each country is calculated by apportioning the total income tax on worldwide taxable income through the application of an apportionment ratio of the taxable income sourced in the relevant country to worldwide taxable income. Under the comprehensive method, the tax credit limit is calculated based on the taxable income derived from all foreign jurisdictions. The enterprise may not change the method within five years after adopting one of the methods.

C. Determination of trading income

General. Taxable income is defined as total revenue less the following:

- Non-taxable income
- Tax-exempt income
- Allowable deductions
- Tax losses

No major differences exist between tax and accounting methods for income computation purposes. Dividends, bonuses, interest, royalties, rent and other income are included in taxable income.

In general, all necessary and reasonable expenses incurred in carrying on a business are deductible for tax purposes. However, specified limits apply to the deductibility of advertisement expenses, entertainment expenses, union fees, employee welfare costs, employee education expenses, commissions and handling fees, supplementary pensions and supplementary medical insurance. Charitable donations of up to 12% of the total annual profit are deductible. Effective from 1 January 2017, charitable donations exceeding the deduction limitation can be carried forward for up to three years following the year in which the charitable donations are made for future deduction.

Management fees paid between enterprises, rental and royalty fees paid between business units of an enterprise, and interest paid between business units of nonbank enterprises are not deductible. Interest paid on related-party borrowing that does not meet debt-to-equity ratio rules (see Section E) may not be deductible. Other nondeductible expenses include the following:

- Sponsorship expenses
- Dividends and returns on equity investments
- Income tax payments including penalties and surcharges
- Donations not fulfilling prescribed requirements
- Provisions not yet approved
- Other expenses not related to production or business operations

For an establishment in China of an enterprise that is not a resident for tax purposes, reasonable expenses allocated from the overseas head office are deductible if these expenses are incurred by the head office for the production or business operations of such establishment and are supported by proper documents issued by the head office.

Inventories. For tax purposes, the cost of inventories is determined in accordance with the following rules:

- The cost of inventories that are paid for in cash is the sum of the purchase price and the related taxes and charges actually paid.
- The cost of inventories that are not paid for in cash is determined based on the fair market value of the consideration and the related taxes and charges actually paid.
- The cost of agricultural products generated from biological assets (for example, animals or woods) is determined based on the necessary raw material, labor and relevant overhead expenditure actually incurred.

Cost may be determined on a first-in, first-out (FIFO), weighted average, or specific identification basis. The last-in, first-out (LIFO) basis is not acceptable for tax purposes. The method chosen must be applied consistently.

Provisions. Provisions that have not been approved by the tax authorities are generally not deductible. These include various provisions and allowances for asset impairment and risk reserves.

Tax depreciation. Depreciation of tangible assets is generally computed using the straight-line method. The following are minimum useful lives for various assets.

Asset	Years
Buildings and structures	20
Aircraft, trains, vessels, machinery, equipment and other production plants	10
Appliances, tools, furniture and other assets related to production and business operations	5
Means of transport other than aircraft, trains and vessels	4
Electronic equipment	3
Productive biological assets in the nature of trees	10
Productive biological assets in the nature of livestock	3
Acquired software (subject to approval)	2

Accelerated depreciation is allowed with respect to certain fixed assets subject to rapid technological obsolescence and fixed assets exposed to constant shock and erosion. A qualified company can follow either the general depreciation rule or the accelerated depreciation rule.

Enterprises engaging in six specific industries may adopt a shortened depreciation life or accelerated depreciation method for corporate income tax purposes for fixed assets acquired on or after 1 January 2014. An additional four specific industries were added to the list, and enterprises in these industries are eligible to choose either a shortened depreciation life or accelerated depreciation method, effective from 1 January 2015.

Small and micro-sized enterprises engaging in the 10 specific industries mentioned above can claim a deduction for corporate income tax purposes in the year of acquisition for the cost of devices and equipment with a unit value not exceeding CNY1 million that are acquired on or after 1 January 2014 and used for R&D, as well as for production and business operations; these enterprises are no longer required to depreciate the fixed assets mentioned above over their useful lives. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.) For those fixed assets with a unit value exceeding CNY1 million, the above enterprises may adopt a shortened depreciation life or accelerated depreciation methods for corporate income tax purposes.

Enterprises in various industries can claim a deduction for corporate income tax purposes in the year of acquisition for the cost of devices and equipment with a unit value not exceeding CNY1 million that are acquired on or after 1 January 2014 and used for R&D purposes only; these enterprises are no longer required to depreciate these fixed assets over their useful lives. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.) For fixed assets with a unit value exceeding CNY1 million, the above

enterprises may adopt a shortened depreciation life or accelerated depreciation methods for corporate income tax purposes.

Enterprises in various industries can claim a deduction for corporate income tax purposes in the year of acquisition for the cost of fixed assets with a unit value not exceeding CNY5,000. Enterprises are no longer required to depreciate these fixed assets over their useful lives. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.)

Effective from 1 January 2018 to 31 December 2020, an enterprise may claim a deduction for corporate income tax purposes in the year of acquisition for the cost of newly acquired equipment or appliances (referring to any fixed assets except for real estate or constructions) if the unit value of the equipment or appliance does not exceed CNY5 million. (For accounting purposes, the entire cost must still be depreciated over several years in accordance with accounting rules.) If an enterprise acquires any equipment or appliance with a unit value exceeding CNY5 million, the taxpayer may still choose the general depreciation method or the accelerated depreciation methods according to the old tax rules mentioned above.

Intangible assets, including technical know-how, patents and trademarks, are amortized over the contractual term or over a period of no less than 10 years if a time period is not specified. Self-developed goodwill cannot be amortized or deducted. Acquired goodwill is deductible only if the entire business is transferred or liquidated.

Relief for losses. Tax losses may be carried forward for up to five years. Effective from 1 January 2018, qualifying HNTes and technology-based small and medium-sized enterprises may carry forward for 10 years for future deduction the losses incurred in the five years preceding the year in which the enterprises gain the qualification, to the extent that the losses have not yet been offset. Carrybacks are not allowed.

Groups of companies. In general, consolidated returns of enterprises are not allowed, and all companies must file separate tax returns, unless specifically approved by government authorities. Tax resident enterprises in China must adopt combined filing for units (branches and establishments without legal person status) operating in different areas of China. On approval by the relevant tax authorities, nonresident enterprises that have two or more establishments in China may select a main establishment to file a combined tax return.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate (rate implemented from 1 May 2018)	16
Rate on specified products (primarily basic necessities), agricultural products and utility services (rate implemented from 1 May 2018)	10

Nature of tax	Rate (%)
<p>Nationwide VAT pilot reform, effective from 1 May 2016, with expanded scope to cover the construction industry, real estate industry, finance industry and lifestyle services industry (China Business Tax has been phased out)</p> <p>Leasing of tangible properties (rate implemented from 1 May 2018)</p>	16
<p>Transportation services, postal services, basic telecommunication services, construction services, immovable property (operating and financial) leasing services, sales of immovable property and transfers of land-use rights (rate implemented from 1 May 2018)</p>	10
<p>Modern services (including R&D and technology services, information and technology services, cultural and creative services, logistics auxiliary services, verification and consulting services, radio, film and television services, business supporting services and other modern services), value-added telecommunication services, financial services (including loan services, financial services with direct service charges, insurance services and trading of financial instruments), lifestyle services (including cultural and sports services, education and medical services, tourism and entertainment services, catering and accommodation services, residents, daily services and other life services) and sales of intangible assets other than land-use rights</p>	6
<p>Other reduced levy rates (applicable to small-scale VAT payers other than those in the real estate industry and the construction industry [3%] or general VAT payers in the real estate industry and construction industry who choose to adopt the simplified computation method [5%]; a levy rate of 5% can be chosen for the supply of certain services)</p>	3/5
<p>International transportation and space transportation services, some specific cross-border VAT-payable supplies conducted by domestic entities or individuals for overseas entities that are consumed entirely outside China (the entities or individuals can elect the VAT exemption instead of the 0% rate)</p>	0
<p>Postal and collection and delivery services and insurance services provided for the exportation of goods, specified supplies of services and intangible assets that are provided to foreign entities and consumed entirely outside China, international transportation services provided by non-transport operating carriers (transportation operators that enter into transportation service agreements with their customers, charging freight and assuming carriers' responsibilities, and then subcontract the transportation services to real carriers that perform the transportation services for the customers), financial services</p>	

Nature of tax	Rate (%)
with direct service charges provided between foreign entities that are not related to any goods, intangible assets or real estate in China (VAT previously paid on the purchase of raw materials, parts and taxable services that are used in the production of export goods or in the provision of certain export services is refundable; applicable refund rates depend on types of goods or services that are exported.)	Exempt
Consumption tax (CT); on the production and importation of certain luxury items, such as cigarettes, gasoline, alcoholic beverages, jewelry, high-end cosmetics (including high-end beauty and makeup cosmetics, high-end skin care cosmetics and cosmetics sets), motor vehicles, motor vehicle tires, golf balls and equipment, luxury watches and yachts	Various
Real property gains tax; imposed on real property transfers (after various deductions)	30 to 60
City construction tax; based on indirect taxes (including VAT and CT) actually paid	
Taxpayers located in urban areas	7
Taxpayers located in county or township areas	3
Taxpayers located in rural areas	1
Education surcharge (ES); based on indirect taxes (including VAT and CT) actually paid	3
Local education surcharge (LES); based on indirect taxes (including VAT and CT) actually paid	2

E. Miscellaneous matters

Foreign-exchange controls. In general, the Chinese government permits the free convertibility of current account items of China incorporated enterprises. Current account items are defined as transactions occurring daily that involve international receipts and payments. Current account foreign-exchange receipts and payments include trading receipts and payments, service receipts and payments, unilateral transfers and dividends paid from after-tax profits.

Recently, China has been further relaxing its foreign-exchange controls in phases by permitting settlement in renminbi yuans (CNY) for all cross-border transactions that were allowed to be settled in foreign currency, including cross-border trades in commodities, services and other current account items, as well as certain capital account items, on a nationwide basis and then extending the CNY settlement to both inbound and outbound transactions. Remittances of dividends to foreign investors and other items including income derived from share transfers, capital reductions, liquidations and early withdrawals of investments may be settled in renminbi yuans.

Remittances of dividends and profits. Remittances of after-tax profits or dividends to foreign investors in FIEs must be supported by written resolutions of the board of directors and audited financial statements, and may not be made until a tax clearance is issued by the tax authorities.

Remittances of interest and principal. Interest payments on foreign loans are considered current account items. In general, after performing a tax-record filing with the tax authorities, these payments may be made through the enterprise's special foreign-exchange bank account or through conversion at designated foreign-exchange banks.

Since 13 May 2013, enterprises are not required to submit any formal application to the State Administration for Foreign Exchange for the approval of principal repayments. In general, the enterprise may repay the principal from its special foreign-exchange bank account or through conversion at designated foreign-exchange banks.

Remittances of royalties and fees. Instead of applying for tax clearance for settling outbound payments that exceed USD50,000, effective from 1 September 2013, enterprises can file a record with the in-charge tax authorities by submitting copies of contracts (stamped by the official seal) together with registration forms before making payments of royalties and fees, either out of the enterprise's special foreign-exchange bank account or through currency conversion and payment at a designated foreign-exchange bank. With respect to royalties, the investor may determine and enjoy the treaty benefits when filing a tax return or making a withholding declaration through a withholding agent, and accept the subsequent post-filing administration from the in-charge tax authorities. Proper documentation (such as royalty agreements, invoices and other tax and business documents) is required for all payments of royalties and fees.

Debt-to-equity requirements. For FIEs in China, the following debt-to-equity ratios are applicable for the purpose of obtaining foreign-currency loans from foreign parties (including foreign related parties) and meeting corporate law requirements:

- For investment projects of up to USD3 million, the capital contribution must equal or exceed 70% of the total investment.
- For investment projects of over USD3 million but not exceeding USD10 million, the minimum capital requirement is 50% of the total investment, but not less than USD2,100,000.
- For investment projects of over USD10 million but not exceeding USD30 million, the minimum capital requirement is 40% of the total investment, but not less than USD5 million.
- For investment projects in excess of USD30 million, the minimum capital requirement is 33.3% of the total investment, but not less than USD12 million.

The New Law provides for a separate set of debt-to-equity rules for tax purposes. Subject to certain exceptions, in general, the debt-to-equity ratio for financial institutions is 5:1 and the ratio for non-financial institutions is 2:1. The interest expense on funds loaned by a related party that exceed the maximum debt calculated under the debt-to-equity ratio is not deductible for tax purposes.

In addition, the deduction of expenses on a loan from an investor may be limited if the investor has not yet paid up its committed investment capital. The nondeductible interest expense is calculated by apportioning the total interest expenses based on the ratio of the outstanding capital commitment to the total loan balance.

Transfer pricing. China has introduced transfer-pricing rules under which all amounts paid or charged in business transactions between related parties must be determined based on an arm's-length standard. If the parties fail to meet this requirement, the tax bureau may make reasonable adjustments by using one of the following methods:

- Comparable uncontrolled price (CUP)
- Resale price method (RPM)
- Cost-plus method (CPM)
- Transactional net margin method (TNMM)
- Profit split method (PSM)
- Other methods, including asset valuation methods, such as the cost-based method, market-based method and income-based method, and other methods that are consistent with the arm's-length principle

On 29 June 2016, the State Administration of Taxation (SAT) issued SAT Notice [2016] No. 42 (Bulletin 42), replacing the following items of 2009's Implementation Measures for Special Tax Adjustments (Trial Version; Guoshuifa [2009] No. 2 (Circular 2):

- Chapter 2: Related-Party Transaction (RPT) Reporting
- Chapter 3: Documentation Requirements
- Article 74: Cost Sharing Agreements (CSAs) Documentation
- Article 89: Thin Capitalization Documentation

It also replaced the Annual RPT Forms of Enterprises of the People's Republic of China (Guoshuifa [2008] No. 114), governing RPT disclosure in annual income tax filings. The provisions in Bulletin 42 apply for the 2016 fiscal year and thereafter.

Chinese enterprises must disclose RPTs in RPT forms, which should be submitted to the in-charge tax bureau together with the annual tax return by the due date for the annual return (that is, before 31 May of the following year).

Bulletin 42 replaces Circular Guoshuifa [2008] No. 114 and introduces significant new disclosure requirements with respect to RPTs. The major changes introduced by Bulletin 42 are described below.

RPT forms disclosure. Bulletin 42 increases the number of disclosure forms from 9 to 22, including the following:

- Reporting Entity Information Form
- Summary of Annual Related Party Transaction Forms
- Related Party Relationship Form
- Ownership Transfer of Tangible Asset Transaction Form
- Ownership Transfer of Intangible Asset Transaction Form
- Use Right Transfer of Tangible Asset Transaction Form
- Use Right Transfer of Intangible Asset Transaction Form
- Financial Assets Transaction Form
- Financing Transaction Form
- Related Party Service Transaction Form
- Equity Investment Form
- CSA Form
- Outbound Payment Form
- Overseas Related Party Information Form
- Financial Analysis Form of Annual Affiliated Transactions between Enterprises (unconsolidated)

- Financial Analysis Form of Annual Affiliated Transactions between Enterprises (consolidated)
- Three forms related to Country-by-Country Reporting (CbCR) (the CbCR forms need to be completed in both Chinese and English)

Documentation structure. Bulletin 42 adopts the three-tiered documentation structure set out in the final reports under Action 13 of the Organisation for Economic Co-operation and Development (OECD) Base Erosion Profit Shifting (BEPS) Action Plan.

This structure consists of a CbCR (disclosed as part of the RPT Forms), a Master File and a Local File. In addition, special item files are required for taxpayers entering or implementing CSAs or falling under the thin-capitalization requirements.

Taxpayers that meet the conditions outlined below need to prepare a Master File and a Local File.

A Master File is required if annual RPTs exceed CNY1 billion, or if any cross-border RPTs occur and the entity's ultimate parent already prepares a Master File.

A Local File is required if RPTs during the year meet any of the following conditions:

- Annual RPTs of physical goods exceed CNY200 million (in the case of toll manufacturing [toll manufacturing refers to an arrangement under which raw materials or component parts are mainly purchased in the name of a foreign principal for use by a Chinese manufacturer in the production of finished goods], the value is based on annual import and export prices for customs purposes)
- Annual RPTs involving the transfer of financial assets exceed CNY100 million
- Annual RPTs involving the transfer of rights to intangibles exceed CNY100 million
- Annual RPTs of other types (for example, related-party service transactions, royalties for use of intangibles and related-party financing transactions) in aggregate exceed CNY40 million

Taxpayers that only deal with domestic related parties can be exempted from preparing the Master File, the Local File and any special item file.

Local Files and special item files are not required for RPTs that are covered under an Advance Pricing Agreement (APA). Furthermore, the amount of these covered transactions is not included when calculating Local File thresholds.

Bulletin 42 provides that resident enterprises that meet one of the following criteria should submit CbCR:

- The resident enterprise is the ultimate parent company of the multinational enterprise group, and total revenue of all kinds from the last fiscal year's consolidated financial statement was over CNY5,500,000,000.
- The resident enterprise is designated to submit CbCR by the multinational enterprise group.

If multinational enterprises are required to prepare CbCR according to relevant provisions of other countries' laws, the Chinese tax authorities can ask for CbCR from the Chinese subsidiaries when

undertaking a special tax investigation under the following circumstances:

- The multinational enterprise has not submitted a CbCR to any country.
- The multinational enterprise has submitted a CbCR to another country, but China has not established an Information Exchange Mechanism with the country.
- The multinational enterprise has submitted a CbCR to another country, and China has established an Information Exchange Mechanism with that country, but CbCR has not in fact been successfully exchanged with China.

Bulletin 42 stipulates the deadline for the Master File is 12 months after the close of the financial year of the ultimate parent company; the deadline for the Local File and any special item file is 30 June of the year following the close of the financial year.

Bulletin 42 provides that contemporaneous documentation should be submitted to the tax authorities within 30 days on the request of the tax authorities.

Taxpayers may apply for APAs in China. An APA is an agreement between a taxpayer and one or more tax authorities regarding how transfer prices will be calculated in the future. Effective from 1 December 2016, SAT Bulletin Gonggao [2016] No. 64 (Bulletin 64) governs the administration of APAs in China. The APA process has the following six steps:

- Pre-filing meeting
- Intention discussion
- Analysis and evaluation
- Formal application
- Negotiation and conclusion of the arrangement
- Execution monitoring

In contrast to Circular 2, Bulletin 64 does not allow the pre-filing meeting to be anonymous and does not specify the time periods between each of the steps. It is noteworthy that extensive interactions between the taxpayer and the tax authorities occur well before the APA application is formally accepted. Taxpayers must be prepared to perform significant analysis and provide extensive documentation during the process.

Bulletin 64 makes numerous references to the analysis of the value chain and of Location Specific Advantages (LSAs), such as location savings and market premiums. This is in keeping with the contemporaneous documentation requirements that the SAT put in place under Bulletin 42. Bulletin 64 provides that the role of LSAs is one of the topics for discussion at pre-filing meetings. Both value-chain analysis and analysis of LSAs are required elements of the draft application materials submitted before the intention discussion.

On 17 March 2017, the SAT issued SAT Bulletin [2017] No. 6 (Bulletin 6), “Supervisory Measures for Special Tax Investigation Adjustments and Mutual Agreement Procedures.” Bulletin 6 entered into force on 1 May 2017.

Bulletin 6 contains long-awaited guidance on the application of the arm's-length principle, including guidance with respect to intangible property transactions, intercompany service transactions, location-specific advantages, transfer-pricing methods and various procedural matters. Detailed guidance on mutual agreement procedures (MAPs) under double taxation treaties is provided.

Bulletin 6 reflects the importance that the SAT places on double taxation treaties and on the international consensus that has developed over the course of the BEPS project led by the OECD. Bulletin 6 moves Chinese transfer-pricing rules and proposed rules into closer alignment with the new international standards developed during the BEPS project in a number of aspects.

Anti-avoidance rules. The general anti-avoidance rules (GAAR) apply to transactions if the transactions may be considered to have been undertaken or arranged primarily for other than bona fide purposes and if the sole and dominant purpose for a company to enter into such transactions was the obtaining of tax benefits. The Administration Measures of GAAR, which are procedural guidelines on the application of the GAAR, are effective from 1 February 2015.

Controlled foreign corporations. The corporate income tax law contains controlled foreign corporation (CFC) rules, which are designed to counter income deferral strategies. A resident company that holds an interest in a CFC incorporated in a jurisdiction with an effective tax rate of lower than 12.5% may be taxed on its share of profits of the CFC, regardless of whether a dividend has been declared. A nonresident company is considered to be controlled by a China resident company if either of the following conditions is satisfied:

- The China resident company directly or indirectly holds 10% or more of the voting shares in the nonresident company and jointly holds an interest of 50% or more in the nonresident company.
- The China resident company exercises effective control over the nonresident company by means of shares, capital, business operations, purchases and sales or other mechanisms.

China has issued a white list showing jurisdictions that are not subject to CFC rules, including Australia, Canada, France, Germany, India, Italy, Japan, New Zealand, Norway, South Africa, the United Kingdom and the United States. The CFC rules do not apply if one of the following conditions is satisfied:

- The CFC is located in one of the jurisdictions in the white list.
- The CFC carries out substantial and positive business activities.
- The CFC reports an annual profit of CNY5 million or less.

F. Treaty withholding tax rates

The following table provides Chinese withholding tax rates for dividends, interest and royalties paid from Mainland China to residents of various treaty countries and arrangement jurisdictions (Hong Kong and Macau SARs). The rates reflect the lower of the treaty rate and the rate under domestic law. The following table is for general guidance only.

	Dividends	Interest	Royalties

- (a) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (b) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (c) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.

- (d) The 7% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.
- (e) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends and that has invested more than EUR2 million in the capital of the company paying the dividends. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends and that has invested more than EUR100,000 in the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (f) The 5% rate applies if the beneficial owner of the dividends is a company that, before the moment of the payment of the dividends, directly held for an uninterrupted period of at least 12 months at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (g) The 5% rate applies to interest paid to banks. The 10% rate applies to other interest payments.
- (h) The 7% rate applies to interest paid to banks or financial institutions. The 10% rate applies to other interest payments.
- (i) Payments for the use of industrial, commercial or scientific equipment are taxed on the basis of 60% of the gross payments. Consequently, the effective rate for such payments is 6%.
- (j) Payments for the use of industrial, commercial or scientific equipment are taxed on the basis of 70% of the gross payments. Consequently, the effective rate for such payments is 7%.
- (k) The 7% rate applies to royalties paid for the use of, or the right to use, industrial, commercial and scientific equipment. The 10% rate applies to other royalties.
- (l) The 5% rate applies to royalties paid for technical or economic studies or for technical assistance. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works including cinematographic films, films or tapes for radio or television broadcasting, patents, trademarks, designs or models, plans, or secret formulas or processes, or for the use of, or the right to use, industrial, commercial or scientific experience.
- (m) China is honoring the Czechoslovakia treaty with respect to the Slovak Republic until a new treaty is signed.
- (n) After the partition of the former Yugoslavia, China is honoring the double tax treaty with the former Yugoslavia with respect to Bosnia and Herzegovina.
- (o) China entered into a treaty with the Federal Republic of Yugoslavia. It has been indicated that China considers Serbia to have inherited the Yugoslavia treaty and that China is also honoring the treaty with respect to Montenegro. However, it is suggested that taxpayers check with the relevant tax authorities before relying on this treaty.
- (p) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends. The 15% rate applies if the dividends are paid out of income or gains derived directly or indirectly from immovable property and such income or gains from such immovable property is exempted from tax. The 10% rate applies to other dividends.
- (q) The tax treaty with Romania entered into force on 4 July 2016 and applies to income derived on or after 1 January 2018.
- (r) On 10 March 2014, the SAT released SAT Announcement [2014] No. 16, which announced that the new tax treaty with Ecuador and its protocol, which were signed on 21 January 2013, entered into force on 6 March 2014. The Ecuador treaty and its protocol apply to income derived on or after 1 January 2015. The withholding tax rates under the new treaty are reflected in the table. In addition, the protocol states that the term "interest" also includes other income treated as income from money lent by the tax law of the contracting state in which the income arises if the income is from some type of debt-claim. In the case of divergence of interpretation, the contracting states must resort to the mutual-agreement procedure.
- (s) The 5% rate applies to royalties paid to aircraft and ship leasing businesses. The 7% rate applies to other royalties.
- (t) The 4% rate applies to interest paid to banks, insurance companies and other financial institutions. The 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest payments.
- (u) The 2% rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies to other royalties.

- (v) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital, valued at least EUR80,000, of the company paying the dividends. The 10% rate applies to other dividends.
- (w) The 2.5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 25% of the company paying the dividends. The 7.5% rate applies to other dividends.

Mainland China has signed tax treaties with Uganda (11 January 2012), Botswana (11 April 2012), Kenya (21 September 2017), Gabon (1 September 2018), the Republic of Congo (5 September 2018), Angola (9 October 2018), and Argentina (2 December 2018) and signed a new tax treaty with Spain (28 November 2018), but these treaties have not yet been ratified. On 25 August 2015, Mainland China signed a double tax agreement with Taiwan, which has not yet been ratified.

A. At a glance

Corporate Income Tax Rate (%)	33 (a)
Capital Gains Tax Rate (%)	10
Branch Tax Rate (%)	33 (a)
Withholding Tax (%)	
Dividends	0/7.5/15 (b)
Interest	0/5/15/20 (c)
Royalties	20
Technical Services, Technical Assistance and Consulting Services	20
Management and Direction (Overhead) Charges	33
Branch Remittance Tax	7.5 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	12 (e)

- (a) The income tax rate for 2019 is 33%. This rate will gradually decrease to 32% for 2020, 31% for 2021 and 30% for 2022 and future years. Financial institutions with taxable income of more than 120,000 tax units (approximately USD1,300,000) are subject to tax at rates of 37% for 2019, 35% for 2020, 34% for 2021 and 30% for 2022 and future years.
- (b) Dividends paid to nonresidents are subject to a 7.5% dividend withholding tax. In the case of dividends paid to resident individuals, the dividend tax rate is 0% or 15%, depending on the amount distributed. In addition, if the dividends are paid to nonresidents out of profits that were not subject to tax at the corporate level, a recapture tax applies at a rate of 33% for 2019, 32% for 2020, 31% for 2021 and 30% for 2022 and future years; in this case, the 7.5% dividend tax is applied to the amount of the distribution after it is reduced by the recapture tax. A 7.5% dividend tax on distributions between Colombian companies applies from 1 January 2019 (for further details, see *Dividends* in Section B).
- (c) Interest paid or accrued on loans payable to foreign entities is generally subject to a 20% withholding tax. Interest paid on loans that have a term equal or greater than one year is subject to a 15% withholding tax. Interest paid on loans that have a term equal or greater than eight years and that are related to certain infrastructure projects are subject to a 5% withholding tax. Interest paid by Colombian financial institutions and interest paid by Colombian residents to foreign entities with respect to certain international trade operations are deemed to be foreign-source income and are accordingly exempt from withholding tax. Certain qualified loans executed before 31 December 2010 do not generate Colombian-source income. As a result, interest on such loans is exempt from withholding tax.
- (d) The remittances of profits out of a branch are subject to the same tax treatment as dividends. Consequently, if the distribution is made out of profits that were not subject to tax at the entity level, a recapture tax applies (33% for 2019, 32% for 2020, 31% for 2021 and 30% for 2022 and future years). In

this case, the dividend tax (7.5%) is applied to the amount of the distribution after it is reduced by the recapture tax.

- (e) For net operating losses generated until 2016, a grandfathering rule allows an unlimited carryforward.

B. Taxes on corporate income and gains

Corporate income tax. National corporations are taxed on worldwide income and capital gains. National corporations are corporations that have their principal domicile in Colombia or are organized under Colombian law or that during the respective tax year or period have their effective place of management in Colombia (holding board meetings in Colombia is not enough to qualify as a national company).

Foreign companies that obtain more than 80% of their income (other than passive income) in the jurisdiction of incorporation are not considered to have their effective place of management in Colombia. These companies are known as “80% Foreign Income Companies.” Foreign companies that have issued stock or bonds in the Colombian stock exchange or in a recognized foreign stock exchange are not considered to have their effective place of management in Colombia. The subsidiaries of such companies are also not considered to have their effective place of management in Colombia to the extent they are consolidated in the financial statements of its parent; however, such subsidiaries can elect to be treated as a national corporation unless they are 80% Foreign Income Companies.

Branches of foreign corporations and permanent establishments are taxed on attributable worldwide income and capital gains. Attribution is generally based on accounting records, which should be supported by an analysis of functions, assets, risks and personnel.

Indirect transfers of Colombian assets or shares are subject to income tax in Colombia if the Colombian assets or shares account for 20% or more of the book or fair market value of a foreign entity that is being transferred.

Corporate income tax rates. The standard corporate income tax rate is 33% for 2019. This rate will decrease to 32% for 2020, 31% for 2021 and for 30% for 2022 and future years. Financial institutions with taxable income of more than 120,000 tax units (approximately USD1,300,000) are subject to tax at rates of 37% for 2019, 35% for 2020, 34% for 2021 and 30% for 2022 and future years.

Foreign companies receiving Colombian-source income that is not attributable to a branch office or PE and that is not fully taxable through withholding tax are subject to income tax at the above-mentioned rates.

A reduced corporate income tax rate of 20% applies to legal entities qualified as Industrial Users of Goods and/or Services in a free-trade zone. No surtax applies to these taxpayers. Commercial Users in a free-trade zone are subject to the general corporate income tax rate.

Subject to certain conditions and requirements, a special reduced rate of 9% applies to certain activities, such as some services in

new or refurbished hotels and new projects involving theme parks, ecotourism parks, agritourism and nautical docks.

Certain tax credits are available (see *Foreign tax relief*).

Colombian Holding Company regime. The Colombian Holding Company (CHC) regime applies to Colombian entities as long as they comply with the following requirements:

- They hold at least 10% of the capital of two or more Colombian or foreign entities during at least 12 months.
- They have three or more employees and have human and material resources in Colombia.

To be included in the CHC regime, a request must be made to the tax authority.

Dividends distributed by foreign entities to CHCs are not taxed. Dividends distributed by CHCs to Colombian residents are taxed, but dividends distributed to nonresidents are not taxed.

Income derived from the sale of shares or quotas in a CHC is generally exempt from income tax on the portion that relates to activities performed abroad.

Mega investments. Taxpayers that generate at least 250 jobs and invest 30 million tax units or more (approximately USD320 million) over 5 years are considered to be engaged in mega investment projects. They may obtain the following special benefits during the subsequent 20 years:

- They are subject to a reduced income tax rate of 27%.
- They may depreciate fixed assets during a minimum of two years (regardless of the asset's productive life).
- Presumptive income is not applicable.
- Equity tax is not applicable.
- The 7.5% dividend tax is not applicable.

Oil and gas projects may not be considered mega investment projects.

Capital gains. The following gains are considered capital gains, which are subject to tax at a rate of 10%:

- Gains on the transfer of fixed assets owned for more than two years
- Gains resulting from the receipt of liquidation proceeds of corporations in excess of capital contributed if the corporation existed for at least two years

Administration. The tax year is the calendar year.

Each year, the Colombian government sets the due dates for the filing of income tax returns and payment of taxes due. Tax payments are made in three installments between February and June for Larger Taxpayers (large corporations, according to conditions set by the tax authorities) and in two installments between April and June for other legal entities.

Interest on the late payment of taxes is accrued at the daily effective rate of usury certified by the Superintendency of Finance for the consumption credits, less two points. A penalty for late filing is levied on the amount of tax assessed in the corresponding tax return at a rate of 5% or 10% for each month or a fraction thereof.

The penalty for late filing cannot exceed 100% or 200% of the difference of the tax to be paid or the balance in favor, depending on the timing of the filing. The penalty for amending a return may be 10% or 20% of the difference between the amount shown on the original tax return and the correct amount, depending on the timing of the amendment.

Under certain circumstances, the applicable tax penalty can be reduced.

Dividends. Distributions of dividends to nonresidents are subject to dividends tax at a rate of 7.5%. The dividends tax rate for resident individuals is 0% or 15%, depending on the amount of the distribution. Effective from 1 January 2019, a 7.5% dividend tax applies to distributions between Colombian companies. This dividend tax is charged only on the first distribution of dividends between Colombian entities, and may be credited against the dividend tax due once the ultimate Colombian company (the last Colombian company in an ownership chain) makes a distribution to its shareholders (nonresident entity or individual shareholders or Colombian resident individual shareholders). The dividend tax on local distributions does not apply if the Colombian companies are part of a registered economic group or the distribution is to a Colombian entity qualifying for the new CHC regime.

In addition, if the dividend distribution is made out of profits that were not taxed at the entity level, the distribution is subject to withholding tax at the applicable corporate income tax rate of the specific period of the distribution (recapture tax). For 2019, the recapture tax rate is 33%. In this case, the 7.5% dividends tax applies to the distributed amount after it is reduced by the recapture tax.

If the profits subject to tax at the corporate level in a given year are higher than the commercial profits of that year, the difference can be carried back for two years or carried forward for five years to offset the profits of such periods, in order to reduce or eliminate the amount of the distribution subject to the recapture tax. This carryforward or carryback should not reduce the amount of the distribution to residents and nonresidents subject to the dividends tax of 7.5% (or the 0% or 15% dividends tax applicable for distributions to resident individuals).

Foreign tax relief. For national corporations and resident individuals, a credit for foreign taxes paid on foreign-source income is granted, up to the amount of Colombian corporate income tax payable on the foreign-source income.

An indirect tax credit is also granted for foreign taxes paid on income at the level of the foreign company that is distributing corresponding dividends to Colombian shareholders or quota holders. This tax credit equals the amount resulting from the application of the effective income tax rate of the foreign company to the amount of distributed dividends. The sum of the direct tax credit and indirect tax credit may not exceed the corporate income tax payable in Colombia on such dividends.

To be entitled to the direct and indirect tax credit, the domestic taxpayer must prove that the corresponding tax was effectively paid in each relevant jurisdiction. In addition, for the indirect tax

credit, the investments must be qualified as fixed assets for the taxpayer. Consequently, indirect tax credits cannot be claimed on portfolio investments.

The tax credit may be claimed in the tax year in which the foreign tax is paid or in any of the following years.

C. Determination of taxable income

General. Taxable income is determined in accordance with the following calculation: gross income, minus non-taxable income, returns, rebates and discounts, equals net income, minus costs and expenses, equals taxable income. In the first instance, such values must be determined in accordance with the Colombian generally accepted accounting principles, which generally follow International Financial Reporting Standards and are subject to several adjustments provided in the tax rules.

In general, to be deductible, expenses must be related to the activity that generates taxable income and must be proportional and necessary with respect to the productive activity of the taxpayer. Some limitations and prohibitions may apply to the deductibility of certain expenses.

In determining taxable income, taxpayers may deduct all paid taxes related to their economic activity, except for certain items such as the debit tax (only 50% is deductible, regardless of whether the tax relates to an income-producing activity) and the equity tax, which is not deductible.

In addition, taxpayers can claim 50% (100% from 2022) of paid industry and commerce tax as a credit against their income tax liability.

Payments to entities resident outside Colombia are deductible if they meet the general rules above and, for expenses related to Colombian-source income, if the applicable withholding tax is paid. In general, if no withholding tax applies, the expenses are allowed as deductions, up to a maximum of 15% of the taxpayer's net income before taking into account all costs and expenses abroad not subject to Colombian withholding tax. Costs or expenses incurred abroad that are related to foreign-source income subject to income tax in Colombia are deductible if the general requirements are met, even if withholding tax is not imposed, and the 15% limitation mentioned above does not apply.

Royalty payments between related parties for the use of intangibles that were formed in Colombia and royalty payments related to the acquisition of finished goods are not deductible. However, in the latter case, deductibility can be accepted to the extent it is established that the royalty is not already included in the value of the acquired finished good.

Interest and other financial expenses resulting from liabilities owed to foreign related companies are deductible if they comply with the transfer-pricing rules (see Section E) and thin-capitalization provisions.

Payments made to foreign related parties that comply with the transfer-pricing rules (see Section E) may be deductible even if no income tax withholding is required. However, the 15% limitation described above applies to such payments.

Management and direction (overhead) expenses are deductible for Colombian tax purposes if all of the following conditions are satisfied:

- They are related to services rendered.
- The withholding tax has been applied.
- They are supported by transfer-pricing studies.

Income generated from the following activities is exempt from income tax (specific requirements, conditions and limitations apply in each case):

- Income received from another country in the Andean Community (Bolivia, Ecuador and Peru)
- Certain entrepreneurial, creative and technological activities (so-called orange economy)
- Certain agricultural activities
- Energy generated from nontraditional sources
- Construction and financing of low-income housing
- Certain new forest plantations
- Fluvial transportation services

Presumptive income. Under the Colombian tax law, the tax base for corporate income tax purposes is the higher of actual taxable income (see *General*) or minimum presumptive income, which is equal to 1.5% of the net equity as of 31 December of the preceding tax year. For 2021 and future years, the presumptive income rate will be reduced to 0%. Certain assets may be excluded from this calculation, and certain taxpayers are not required to calculate presumptive income.

The amount of income tax payable after tax credits may not be less than 75% of the income tax determined under the presumptive income rules, before taking into account tax credits.

Inventories. Inventories are generally valued using the permanent or periodic inventory methods.

Provisions. Provisions are not allowed as deductions in determining taxable income, except for provisions for accounts receivables, which are subject to special tax rules.

Depreciation. Depreciation for tax purposes should follow the depreciation for accounting purposes. However, the annual depreciation rate for tax purposes cannot exceed certain percentages, depending on the type of asset.

If machinery and equipment are used daily in 16-hour shifts, the taxpayer may request an additional 25% on the depreciation rate. If the use exceeds 16 hours, proportional additional depreciation can be requested. Land is generally not depreciable or amortizable.

The balance of the assets pending to be depreciated as of 31 December 2016 should be depreciated under the old rules applicable before 2017.

Amortization. In general, amortization of ordinary and necessary investments used for the purposes of the business is allowed under certain requirements. The amortization of the investments should be made during the time that the related income is expected to be earned, but the amortization period may not be less than five years.

Advance payments should be amortizable as the prepaid services are received.

Acquired identifiable intangibles can be generally amortized to the extent they have a useful limited life. Certain limitations on amortization may apply to identifiable intangibles acquired from related parties.

Goodwill is not amortizable.

Amortizable costs and expenses for the oil industry can be amortized using the units-of-production method. If investments in exploration are unsuccessful, the costs and expenses may be claimed as deductions in the year in which this is determined or in the following two years. Investments made between 2017 and 2027 with respect to the evaluation and exploration stages are amortizable using a five-year, straight-line method.

Assets and investments pending to be amortized as of 31 December 2016 should be amortized under the old rules applicable before 2017.

Relief for tax losses. Tax losses may be carried forward for 12 years. Tax losses generated up to 2016 can be carried forward with no time limitation.

Restrictions apply to the transfer of losses in mergers or spin-offs (tax-free events for the participating companies for Colombian tax purposes if certain requirements are observed). The surviving entity can offset losses originated in the merged entities, but only up to the percentage of the equity participation of the merged entity in the surviving entity's equity. Similar rules apply to spin-offs of companies.

The special treatment of tax losses in mergers and spin-offs applies only if the economic activity of the companies involved remains the same after the merger or spin-off occurs.

Tax losses generated do not affect the entity's presumptive income for the respective tax year.

Inflation adjustment. An optional tax readjustment of fixed assets may be applied. This readjustment is calculated by applying the percentage certified by the government for the adjustment of the tax unit. The readjustment affects the tax basis for the transfer of fixed assets, presumptive income and the determination of taxable net equity. Although the inflation adjustments were eliminated, the accumulated inflation adjustments can be depreciated.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; imposed, unless expressly excluded by law, on sales of tangible assets and intangibles related to industrial property, on imports of movable tangible assets and on most services rendered in Colombia or from abroad to a Colombian recipient of the services	19%
General rate	19%
Basic products, such as coffee and wheat	5%

Nature of tax	Rate
National consumption tax	
Imposed on, among other items, food services in restaurants, mobile phone services and certain cars	4% to 16%
Imposed on the sale of real estate with a value in excess of 26,800 tax units	2%
Equity tax; imposed for 2019, 2020 and 2021 on taxpayers with equity above COP5 billion (approximately USD1,500,000) as of 1 January 2019; nonresident entities and individuals pay this tax only on their assets owned in Colombia; nonresident entities are not subject to the tax on shares in Colombian companies, accounts receivable from Colombian debtors, certain portfolio investments and financial lease agreements; Colombian resident individuals are subject to tax on their worldwide equity; Colombian entities are not subject to the equity tax	1%
Normalization tax; imposed for 2019 only on taxpayers with unreported assets and nonexistent liabilities (liabilities that were made up) with respect to a tax return; tax rate may be reduced by half if the taxpayer repatriates the assets before the end of 2019 and keeps them in Colombia for at least two years	13%
National consumption tax, imposed on, among others items, food services in restaurants, mobile phone services and certain cars	4% to 16%
Industry and commerce tax; a municipal tax on annual or bimonthly net revenue (other tax periods may apply, depending on the jurisdiction); rates vary depending on the company's activity and municipality; tax effectively paid during the year is a 100% deductible expense for income tax purposes	
Bogotá	0.414% to 1.38%
Municipalities other than Bogotá	0.2% to 1%
Signs and Posters Tax; imposed on enterprises with advertisements in public places; tax rate applied to the industry and commerce tax due	15%
Tax on Visible Advertisement Hoardings; imposed on each advertisement on hoardings or billboards with a size equal to or larger than 8 square meters (86,111 square feet)	5 minimum wages
(The minimum wage for 2019 is COP828,116 [approximately USD260].)	
Debit tax (financial transactions tax); imposed on the amount of each financial transaction, such as disposals of funds from savings accounts, current bank accounts and deposit accounts, which involve cash withdrawals by checks and through other mechanisms, and on the amount of certain accounting entries	0.4%

Nature of tax	Rate
Social security contributions and payroll taxes Pension (foreigners who remain in Colombia in accordance with an employment agreement may voluntarily enroll in the pensions system); contributions calculated on the monthly ordinary salary of the employee; if the monthly salary is more than 25 times the minimum wage, contributions to the social security regime are calculated on a maximum base of 25 minimum wages; for employees earning integral (all-inclusive) salary, 70% of the salary is the base, but the maximum limit described above applies	
Employer	12%
Employee	4%
Health; contribution calculated on the monthly ordinary salary of the employee; subject to the same maximum limitation and integral salary rules as the pension contributions	
Employer	8.5%
Employee	4%
(Employers are not required to pay the 8.5% health contribution for employees earning less than 10 minimum legal wages	
Solidarity Fund; payable by employer on the monthly ordinary salary of the employee; contribution required only for employees who earn a monthly salary greater than 4 minimum wages; subject to same maximum limitation and integral salary rules as pension contributions; rates vary according to the amount of monthly salary earned by employee	
Employees earning up to 16 minimum wages	1%
Employees earning between 16 and 17 minimum wages	1.2%
Employees earning between 17 and 18 minimum wages	1.4%
Employees earning between 18 and 19 minimum wages	1.6%
Employees earning between 19 and 20 minimum wages	1.8%
Employees earning between 20 and 25 minimum wages	2%
Labor risk; payable by employer on monthly ordinary salary; rate depends on a legally established scale based on the degree of risk represented by the economic activity of the company; the Social Security office makes the classification at the time of enrollment; subject to same maximum limitation and integral salary rules as pension contributions	0.348% to 8.7%

Nature of tax	Rate
Payroll taxes to National Learning Service (SENA), Colombian Family Welfare Institute (ICBF) and Family Compensation Fund; payable by employer on the monthly ordinary salary earned by the employee; no ceiling applies; subject to same integral salary rules as pension contributions; reduced and progressive rates apply to small businesses (Employers are not required to pay the SENA [2%] and ICBF [3%] contributions with respect to employees earning less than 10 minimum legal wages. However, for these employees, employers are still required to pay the Compensation Fund contribution [4%.])	9%
Custom duty, on Cost, Insurance, Freight (CIF) value; general rates	0% to 15%
Real estate tax; municipal tax imposed on the ownership of land or immovable property; tax rate is applied to the commercial value of the property; rate set by the municipality and varies according to the location and use of the property; general range of rates	0.1% to 3.3%

E. Miscellaneous matters

Foreign-exchange controls. Colombia has a flexible foreign-exchange regime. However, the foreign-exchange regulation provides that some operations must be channeled through the foreign-exchange market (controlled operations). These operations have special reporting procedures and obligations. Any other operation is considered a free-market operation and consequently channeling through the foreign-exchange market is not mandatory. The following are the controlled operations:

- Foreign loans
- Foreign investment in Colombia and Colombian investment abroad
- Foreign-trade operations (imports and export of goods)
- Derivatives transactions
- Endorsements and warranties

The operations under the controlled exchange market must be channeled through authorized foreign-exchange intermediaries (financial institutions and commercial banks) or compensation accounts (foreign bank accounts that are registered with the Colombian Central Bank [(Banco de la República de Colombia)]).

Exchange operations that are not covered by the controlled market are conducted through the free market. These operations include the purchase of foreign currency that is used to open free-market bank accounts abroad.

Foreign investors may receive abroad, without limitation, annual profits derived from an investment that is registered with the Colombian Central Bank. This operation must be reported to the Colombian Central Bank within the legal term and the report must follow the procedures set forth in the law.

Nonresident individuals are not allowed to grant foreign loans to Colombian residents. However, some exceptions to this prohibition applies. The loans must be registered with a foreign-exchange intermediary and the cash flow of foreign currency related to the foreign loans must be channeled. These loans can be stipulated, disbursed and paid in Colombian or foreign currency, as agreed by the parties.

Controlled foreign companies. The controlled foreign company (CFC) regime applies to Colombian tax residents (individuals or entities) that directly or indirectly hold an interest equal to or greater than 10% of the capital or of the profits of a foreign entity that is considered a CFC.

CFCs are corporations, as well as investment vehicles, such as trusts, collective-investment funds, and private interest foundations, which meet the conditions to be considered a related party for transfer-pricing purposes.

For income tax purposes, Colombian taxpayers should immediately recognize the net profits of the CFC derived from passive income, in proportion to their participation in the CFC's capital or profits, without the need to wait to receive a distribution of profits in Colombia.

Under this regime, passive income generally includes the following:

- Dividend and profit distributions from a company or investment vehicle
- Interest
- Income derived from the exploitation of intangibles
- Income originated from the sale of assets that generates passive income
- Income from the sale or lease of immovable property
- Income derived from the sale or purchase of tangible goods acquired from (or sold to) a related party if the manufacturing and consumption of the goods occurs in a jurisdiction different from the one in which the CFC is located or is tax resident
- Income from the performance of certain services in a jurisdiction different from the one in which the CFC is located or is tax resident

A Colombian tax resident that recognizes taxable income under the application of the CFC regime may request a tax credit for taxes paid abroad with respect to the passive income.

Dividends and benefits that are distributed by a CFC and that have been already taxed in Colombia, should be considered non-taxable income for the Colombian taxpayer.

Debt-to-equity rules. Interest paid on loans with related parties that in average exceeds a 3:1 debt-to-equity ratio is not deductible. For this purpose, the equity taken into account is the taxpayer's net equity for the preceding year, and the debt taken into account is debt that accrues interest.

Transfer pricing. The transfer-pricing regime includes several of the methods contained in the Organisation for Economic Co-

operation and Development (OECD) rules. Significant aspects of the transfer-pricing system in Colombia include the following:

- All events that create economic linkage are specifically mentioned in the tax code.
- The rules do not cover local operations between related companies established in Colombia, except for transactions between local entities and free-trade zone users.
- Parties that have gross equity exceeding 100,000 tax units as of the last day of the tax year or gross revenues for the year in excess of 61,000 tax units must prepare and file transfer-pricing information returns.
- For supporting documentation purposes, transactions above a 45,000 tax unit threshold, by type of transaction, are subject to transfer-pricing analysis. For financing transactions with related parties, the amount of the debt must be considered when determining the total transaction amount.
- Transactions with residents or those domiciled in tax havens are subject to transfer-pricing analysis if the amount, by type of transaction, exceeds 10,000 tax units. The tax haven jurisdiction list is issued by the Colombian government.
- Penalties are imposed for not meeting filing requirements, submitting erroneous or incomplete reports or failing to meet other requirements.

Transfer-pricing documentation includes the Local File and the Master File with the multinational group's global relevant information.

In addition, for multinational groups with a Colombian parent entity, a Country-by-Country Report (CbCR) must be completed under the following circumstances:

- The parent is resident in Colombia.
- The parent has affiliates, subsidiaries, branches or PEs abroad.
- The parent is not a subsidiary of another entity resident abroad.
- The parent is required to prepare, submit and disclose consolidated financial statements.
- The parent has annual consolidated revenue equal to or exceeding 81 million tax units.

A non-Colombian parent can designate an entity resident in Colombia or a resident abroad with a PE in Colombia as the responsible party for providing the CbCR to the Colombian tax authority.

Colombian taxpayers that do not provide a CbCR must file a notification indicating which entity of the multinational group is providing this report and the jurisdiction in which the report is being provided.

Anti-abuse rules. Under anti-abuse rules, tax abuse is defined as the use or implementation of a transaction or several transactions without apparent commercial or economic purpose and with the aim of obtaining a tax benefit.

The tax authority can recharacterize any abusive transaction. It is understood that a transaction has no commercial or economic purpose if the following circumstances exist:

- The transaction is developed in a way that is not economically or commercially reasonable.

- The transaction gives rise to a high tax benefit that is not in line with the economic or business risks assumed by the taxpayer.
- The legal agreement is not aligned with the real will of the parties.

F. Tax treaties

Colombia has entered into a multilateral tax treaty with Bolivia, Ecuador and Peru, which follows the source criteria. In addition, Colombia has double tax treaties in effect with Canada, Chile, the Czech Republic, India, Korea (South), Mexico, Portugal, Spain and Switzerland, which are based on the OECD model convention.

Colombia has entered into tax treaties covering certain international air transportation services with several countries, including Argentina, Brazil, France, Germany, Italy, Panama, Turkey, the United States and Venezuela.

Colombia has also signed double tax treaties with France, Italy, Japan, the United Arab Emirates and the United Kingdom, which are not yet in effect.

The following table presents the withholding tax rates for dividends, interest and royalties under the Canada, Chile, Czech Republic, India, Korea (South), Mexico, Portugal, Spain and Switzerland treaties.

	Dividends %	Interest %	Royalties %
Canada	5/15	5/10	10
Chile	0/7/33 (a)	5/15	10
Czech Republic	5/15/25	0/10	10
India	5/15	0/5/10	10
Korea (South)	5/10/15	0/5/10	10
Mexico	0/33	5/10	10
Portugal	10/33	0/10	10
Spain	0/5/33 (a)	0/5/10	10
Switzerland	0/15	0/5/10	10
Non-treaty jurisdictions (b)	7.5/33	0/15/20	20

(a) Dividends that are not taxed at a corporate level are subject to a tax rate of 33% (for 2019) at the shareholder level. However, the 33% rate may be reduced if the dividends are exempt from income tax at the corporate level and are reinvested for a three-year term.

(b) For details regarding these rates, see Section A.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30
Branch Tax Rate (%)	30
Withholding Tax (%) (b)	
Dividends	20 (b)
Interest	20 (c)
Royalties	20 (d)
Services	14 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (f)

- (a) The corporate income tax rate is 30% for mining companies. Under the 2019 Finance Law, the corporate income tax rate is now reduced to 30% for all companies registered in the Democratic Republic of Congo (DRC).
- (b) The rate of dividend withholding tax for mining companies is 10%. A dividend withholding tax applies to branches. The rates of this tax are 8% for public limited liability companies and 10% for other limited liability companies.
- (c) Under the amended Mining Code, dated 9 March 2018, interest on loans abroad to mining companies is not subject to withholding tax if the following conditions are satisfied:
- The loan is exclusively used for the mining project.
 - The interest rates and other borrowing terms for carrying out the projects are established in accordance with the arm's-length principle.
- (d) The net amount of royalties is subject to tax. For this purpose, net royalties equal gross royalties minus professional expenses, or 30% of gross royalties (resulting in an effective tax rate of 14%).

- (e) This withholding tax applies to payments for services provided to Congolese companies by foreign companies and individuals without a permanent establishment in the DRC. The tax base is the gross amount of the applicable invoice.
- (f) Under the amended Mining Code, dated 9 March 2018, the carryforward period for mining companies is limited to five years following the year of the loss.

B. Taxes on corporate income and gains

Corporate income tax. Congolese companies are taxed on the territoriality principle. As a result, companies carrying on a trade or business outside the Democratic Republic of Congo (DRC) are not taxed in the DRC on the related profits. Congolese companies are those registered in the DRC, regardless of the nationality of the shareholders or where the company is managed and controlled. Foreign companies (for example, branches) engaged in activities in the DRC are subject to Congolese corporate tax on Congolese-source profits only.

A company is considered to have a permanent establishment in the DRC if it satisfies either of the following conditions:

- It has a fixed place of business in the DRC, including an effective place of management, branch, office, factory, plant, workshop, agency, store, offices, laboratory, buying and selling counter, warehouse, real estate property under rental agreement, a mine, an oil or gas well, a quarry or any other place of exploitation and extraction of natural resources or any other fixed or permanent place of business, or in absence of a fixed place of business, it carries out a professional activity directly, under its own name, during a period of at least six months.
- It provides services, including advisory services, through employees or other individuals engaged by a company for that purpose, and the activities of this nature continue for a period or periods that represent a total of more than 6 months within any 12-month period.

The 2018 Finance Law further provides that foreign companies are taxable on the benefits that they realize through their permanent establishment in the DRC. It further states that “when a person other than an agent with an independent status acts on behalf of a foreign company, that person is considered as having a permanent or fixed establishment in the DRC for all activities that this person carries out for this company, if the said person:

- has power in the DRC, which he usually exercises to allow it to enter into contracts on behalf of that company;
- does not have such power, he usually keeps in the DRC a regular stock of goods for delivery on behalf of the foreign company.”

Rates of corporate tax. The regular corporate income tax rate is 30%.

The minimum tax payable is 1% of the annual turnover for larger corporations.

For small corporations with annual revenues of less than CDF10 million, the corporate income tax is set at CDF50,000. For average-sized corporations with annual revenues between

CDF10 million and CDF80 million, the corporate income tax rate is 1% of the annual revenue for sales of goods and 2% for the provision of services.

The corporate income tax rate is 30% for companies holding mining or quarry titles.

Capital gains. Increases resulting from capital gains and depreciation that are realized and either realized or expressed in the accounts or inventories are included in profits and are subject to tax at a rate of 30%.

Increases resulting from unrealized capital gains that are expressed in the accounts or inventories and that are not treated as profits are not yet taxable. This rule applies only if the taxpayer holds a regular accounting and if it fulfills its declarative obligations.

Increases resulting from realized capital gains on buildings, tools, materials and movable assets (regardless of whether they result from rent payments), as well as on participations and portfolios, are taxable to the extent that the sales price exceeds the acquisition price or cost. A deduction is made from the amount of the depreciation that has already been claimed for tax purposes.

Administration. The fiscal year extends from 1 January to 31 December. Tax returns must be filed by 30 April.

Corporate tax must be paid in two installments before 1 August and 1 December. Each installment must equal 40% of the preceding year's tax (increased by any tax reassessment received by the tax office during the current year). The balance of tax due must be paid by the following 30 April.

A penalty of 2% per month is assessed for late payment of tax. Tax is fixed automatically if a tax return is not filed.

Dividends. In general, dividends paid are subject to a 20% withholding tax. The rate of dividend withholding tax for mining companies is 10%. A dividend withholding tax applies to branches. The rates of this tax are 8% for public limited liability companies and 10% for other limited liability companies.

Foreign tax relief. In general, foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Congolese tax under the territoriality principle is taxable.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with principles set by the Organization for the Harmonization of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) Accounting Act, except for banks and insurance companies. The net amount of income is taxed. This amount equals gross income minus business expenses incurred during the tax year to acquire and retain the income. Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office, remuneration or management fees for services paid to nonresidents that are not justified

- Head office overhead or remuneration for certain services (studies and technical assistance) paid to nonresidents
- Expenditure of a personal nature, such as maintenance of household, appraisal fees, holidays and other expenses not necessary for the profession
- Corporate income tax, as well as real tax (tax on movable assets, tax on vehicles or tax on mining concessions), to the extent that the real tax does not constitute an operating expense
- All judicial or administrative fines, and fees and charges relating to breaches by income beneficiaries
- Certain specific charges, gifts, subsidies and penalties
- Directors' fees allocated under the Corporations Act to members of the General Council
- Expenditures on leased property, including depreciation of the property
- Provisions for losses, expenses or depreciation of assets, excluding provisions for the recovery of mineral deposits and provisions for the recovery of bank capital
- Commissions and brokerage fees if it cannot be proven that the tax on turnover (see Section D) has been paid for these items
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)

Inventories. Inventories are normally valued at their historical cost or acquisition cost.

Provisions. In determining accounting profit, companies must implement certain provisions, such as a provision for risk of loss or for certain expenses. These provisions are not deductible for tax purposes. However, provisions for recovery of bank capital and provisions for the recovery of the mineral deposit are deductible for tax purposes.

Tax depreciation. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by tax law. The following are some of the specified annual rates.

Asset	Rate (%)
Buildings	2 to 5
Office equipment	10
Motor vehicles	20 to 25
Plant and machinery	10

Companies can also opt for a regressive method for tax depreciation of specific assets with an annual rate of two to three times the straight-line rate.

Relief for tax losses. Tax losses incurred in a tax year may be carried forward indefinitely. However, the deduction of the available tax losses is capped at 60% of the annual taxable income.

Under the amended Mining Code, dated 9 March 2018, the carryforward period for mining companies is limited to five years following the year of the loss.

Groups of companies. The DRC does not have a fiscal integration system equivalent to a consolidated filing position.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	16
Payroll taxes	
Annual income not exceeding CDF43,200,000; progressive rates	0 to 30
Annual income exceeding CDF43,200,000; flat rate	30
Exceptional income tax for expatriates (IERE)	
Mining companies; Article 244 bis of Law No. 18/001 of 9 March 2018, which reformed the Mining Code, increases the exceptional income tax rate to 12.5% for the first 10 years of the project and provides for the common rate of 25% for the following years	12.5
Other companies	25
Social Security National Institute (Institut national de sécurité sociale, or INSS) contributions; payable monthly	
Employers	13
Employees	5
National Institute for Professional Preparation (Institut national de préparation professionnelle, or INPP); payable monthly by employers	1 to 3
National Agency for Labor (Office National de l'Emploi or ONEM); payable monthly by employers	0.2

E. Miscellaneous matters

Foreign-exchange controls. The currency in the DRC is the Congolese franc (CDF). The exchange rate is variable.

In the DRC, the Central Bank of Congo regulates foreign-exchange controls. It also supervises the regulation on the transfer of currency. Cash transfers from or into the DRC are not subject to restrictions if they do not exceed the equivalent of USD10,000. An exchange control fee of 0.2% is levied on payments to or from abroad.

Debt-to-equity rules. The DRC does not have any thin-capitalization rules, but several measures may apply to related-party transactions (see *Transfer pricing*).

Transfer pricing. The DRC has several measures applicable to related-party transactions that are not conducted on an arm's-length basis.

These provisions include the disallowance of loan interest with respect to rates exceeding the annual average of the effective rates charged by the credit institutions of the country in which the lending company is established and the repayment of principal beyond five years.

Management fees paid to a related party may be deducted from the corporate income tax base if the following conditions are satisfied:

- The services rendered can be clearly identified (that is, they are genuine services that are effectively rendered and directly related to operating activities).
- The services cannot be rendered by a local company (that is, overhead expenses recharged to the local entity are excluded).
- The amount paid for the services corresponds to the remuneration paid in identical transactions between independent companies.

These arm's-length requirements are consistent with those set forth in the Mining Code.

The 2015 Finance Law introduced transfer-pricing documentation requirements. As a result, companies must put at the disposal of the tax administration during a tax audit, general and specific information on an affiliated group of companies (Master File and Local File), including the following:

- General description of the deployed activity, including changes that occurred during the year
- A general description of the legal or operational structures of the affiliated group of companies, including identification of the related companies engaged in transactions involving the company established in the DRC (local company)
- A general description of the function performed and risk assumed by the affiliated companies as soon as they affect the local company
- A list of the main intangible assets owned, including patents, trademarks, trade names and know-how, relating to the local company
- A general description of the group's transfer-pricing policy
- A description of transactions made with other affiliated companies, including the nature and amount of cash flows, such as royalties
- A listing of the cost-sharing agreement, copies of preliminary agreements related to transfer pricing that are concluded under the conditions of the regulation, and the prescription relating to the determination of transfer pricing, affecting the results of the local company
- Presentation of the method or methods for determining transfer pricing, in compliance with the arm's-length principle, including an analysis of the functions performed, assets used and risks assumed, and an explanation concerning the selection and application of the methods used
- An analysis of comparative elements considered as relevant by the company if the selected method requires it.

Under the 2019 Finance Law, the transfer-pricing documentation (a condensed version) must be filed with the tax administration within two months after the filing of the corporate income tax return.

In addition, the corporate income tax law disallows branches from deducting overhead charges incurred by the parent company and charged back to the branch.

F. Tax treaties

The DRC has entered into double tax treaties with Belgium and South Africa. The following are the withholding tax rates under the treaties.

	Dividends %	Interest %	Royalties %
Belgium	10/15 (a)	10	10
South Africa	5/15 (b)	10	10
Non-treaty jurisdictions (c)	20	20	20

- (a) The 10% rate applies if the Belgian recipient company was eligible under the Investment Code or another investment incentive and if it holds at least 25% of the capital of the payer. Otherwise, the rate is 15%.
- (b) The 5% rate applies if the South African recipient company holds at least 25% of the capital of the payer. Otherwise, the rate is 15%.
- (c) For further details, see Section A.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	30 (b)
Branch Tax Rate (%)	15 (c)
Withholding Tax (%)	
Dividends	15 (d)
Interest	20
Royalties from Patents, Know-how, etc.	20
Payments for Non-commercial Services and Activities	5
Revenues Earned by Certain Foreign Companies	7.7/20 (e)

Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) The minimum tax is 1% of turnover. The corporate income tax rate is 25% for agricultural companies.
- (b) In certain circumstances, the tax is deferred or reduced (see Section B).
- (c) The branch tax is calculated on the basis of the net profit decreased by the amount of the corporate income tax, to which a tax rebate of 30% is applied.
- (d) This tax also applies to directors' fees, nondeductible expenses and adjustments of profits following a tax examination. For directors' fees, the rate is 22%.
- (e) For details, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. Congolese companies are taxed on the territoriality principle. As a result, Congolese companies carrying on a trade or business outside Congo are not taxed in Congo on the related profits. Congolese companies are those registered in Congo, regardless of the nationality of the shareholders or where the company is managed and controlled. Foreign companies engaged in activities in Congo are subject to Congolese corporate tax on Congolese-source profits only.

Tax rates. The regular corporate income tax rate is 30%.

The minimum tax payable is 1% of the annual turnover and cannot be less than XAF1 million (or XAF500,000 if turnover is less than XAF10 million a year). A 2% minimum tax is payable by companies that incur tax losses in two consecutive years. It appears that the 2% rate is applied to the sum of gross turnovers and products and benefits realized by the company in the most recent year in which it earned a profit. In general, the 2% tax is not deductible for corporate income tax purposes. However, in the company's first profit-making year after incurring the losses, one-half of the 2% tax is deductible.

The corporate income tax rate is 25% for agricultural companies, micro-finance companies and private educational institutions registered as companies.

The corporate income tax rate is 30% for mining companies and real estate companies.

The branch tax is imposed at a rate of 15%. It is calculated on the basis of the net profit decreased by the amount of the corporate income tax, to which a tax rebate of 30% is applied.

A withholding tax at a rate of 7.7% is imposed on the turnover of foreign companies without a registered branch in Congo that are engaged in legally authorized activities there. A 20% withholding tax is imposed on income sourced in Congo that is derived by foreign companies not engaged in activities in Congo.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies depending on the nature of the project and the level of investments.

The Charter of Investments may grant a tax exemption for a three-year period for new activities in industry, agriculture, forestry and mining. In addition, under the General Tax Code, a tax exemption for a two-year period may be granted for such new activities.

Capital gains. Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if the proceeds are used to acquire new fixed assets in Congo within three years or in the event of a merger.

If the business is totally or partially transferred (directly or indirectly) or discontinued, only one-half of the net capital gains is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased. The total gain is taxed, however, if the business is not carried on in any form by any person.

Capital gains derived by natural or legal entities domiciled abroad on the sale of all or part of their shares in the capital of companies registered under Congolese law are subject to a special tax at a rate of 20%. This withholding tax is payable at the time of registration of the deed of assignment.

Administration. The fiscal year extends from 1 January to 31 December. Tax returns must be filed by 20 May.

Companies must pay the minimum tax between 10 March and 20 March, and corporate tax must be paid in four installments between the 10th and 20th days of February, May, August and November. Each installment must be equal to 20% of the preceding year's tax. The balance of tax due must be paid by the following 20 May.

A 50% penalty is assessed for late payment of tax.

Dividends. Dividends paid are subject to a 15% withholding tax. Resident corporations are taxed on the gross dividend; a corresponding 15% tax credit is available for double tax relief.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are accordingly subject to the 15% withholding tax on dividends.

A parent corporation may exclude the net dividends received from a Congolese or foreign subsidiary if the following conditions are satisfied:

- The parent company is a Congolese joint stock company or limited liability company that holds 30% or more of the capital of the subsidiary, which is also a joint stock company or limited liability company.
- The subsidiary carries on only industrial, agricultural, mining, forestry, large-scale fishing or stock-breeding activities.

No withholding credit is allowed if the net dividends are excluded.

A Congolese joint stock company or limited liability company may exclude 90% of the net dividends received from a joint stock company or limited liability company located in Congo or another Central African Economic and Monetary Community (CEMAC) country if the parent company holds 25% or more of the capital of the payer of the dividends.

Foreign tax relief. In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Congolese tax under the territoriality principle is taxable net of the foreign

tax. A tax treaty with France, however, provides a tax credit on dividends.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the standard statements of the Organization for Harmonization of Business Law in Africa (OHADA) treaty. The members of OHADA are Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of), Congo (Republic of), Côte d'Ivoire, Equatorial Guinea, Gabon, Guinea, Guinea-Bissau, Mali, Niger, Senegal and Togo.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office overhead or remuneration for services paid to non-residents that exceeds 20% of taxable income before the deduction of such items
- Head office fees or remuneration for certain services (studies and technical assistance) paid to nonresidents by companies engaged in building and public works, by engineering firms and by accounting firms, to the extent that the expenses exceed 2% of turnover
- Royalties from patents, brands, models or designs paid to a non-resident corporation participating in the management of, or owning shares in, the Congolese corporation
- Interest paid to a shareholder in excess of the central bank annual rate plus two points and, if the shareholder is in charge of management, interest on the portion of the loan exceeding one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, gifts, subsidies and penalties
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)
- Corporate income tax

Inventories. Inventory is normally valued at the lower of cost or market value.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are likely to occur and if they appear in the financial statements and in a specific statement in the tax return.

Tax depreciation. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by tax law. The following are some of the specified annual rates.

Asset	Rate (%)
Commercial and industrial buildings	5
Office equipment	15
Motor vehicles	20 to 33.33
Plant and machinery	10 to 33.33

Heavy new assets acquired for manufacturing, transformation, transport and handling qualify for a special depreciation allowance at a rate of 40% in the year of acquisition if all of the following conditions are satisfied:

- The assets are used only in industrial, forestry or agricultural activities.
- The assets can be used for a period exceeding three years.
- The total value of the assets exceeds XAF40 million.
- The assets will be intensively used.

Relief for tax losses. Losses may be carried forward for three years. Losses attributable to depreciation may be carried forward indefinitely, but they must be reported on the depreciation table. Losses may not be carried back.

Groups of companies. The Congolese tax law provides for a fiscal integration system and a fiscal regime for holding companies with tax exemptions, particularly with respect to capital gains, dividends and interest on loans.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	18.9
Business activity tax (<i>patente</i>); calculated based on annual turnover according to sliding scale	0.040
Registration duties, on transfers of real property or businesses	4 to 10
Tax on salaries (TUS)	7.5
Social security contributions, on annual salaries; paid by	
Employer	
Family allowance contribution	10.035
Work accident insurance	2.25
Old-age pension	8
Employee	
Old-age pension	4

E. Miscellaneous matters

Foreign-exchange controls. The Congolese currency is the CFA franc BEAC (XAF). The fixed exchange rate for the CFA franc BEAC is XAF655,957 = EUR1.

Exchange-control regulations exist in Congo for financial transfers outside the franc CFA zone (XAF zone), which is the monetary zone including France and its former overseas colonies.

Transfer pricing. The Congolese tax law contains the transfer-pricing measures described below.

Amounts paid by a Congolese company to a company or a group of companies located outside Congo are considered indirect transfers or profits if the payer is dependent *de jure* or *de facto* on the recipient of the payments and if the tax authorities establish that the payments are excessive or unjustified. This measure applies to certain transactions, including the following:

- Overcharges for purchases

- Payments of excessive royalties
- Loans that are interest-free or have unjustifiable rates
- Discounts of debts
- Advantages granted out of proportion with the benefit provided by a service provider

Payments for the use of patents, marks, drawings and models, interest payments and payments for services made by a Congolese company to a nonresident company located in a country with low or no taxation, are considered indirect transfers of benefits unless the Congolese company proves that the payments correspond to real operations and that they are not excessive.

F. Treaty withholding tax rates

The withholding rates under a treaty with France are listed in the following table.

	Dividends	Interest	Royalties
	%	%	%
France	15	0 *	15
Non-treaty jurisdictions	15	20	20

* Interest is subject to tax in the recipient's country. Withholding tax is not imposed in the country of source.

Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (i)

- (a) The 30% rate is reduced to 10% or 20% for companies whose annual gross income does not exceed specified amounts. As of 1 July 2019, the reduced rates will be 20%, 15%, 10% and 5%. For further details, see Section B.
- (b) As of 1 July 2019, the tax rates will be 30% if the capital gains are derived from goods or rights that are part of the taxpayer's activity or if they result from a habitual activity, and 15% in all other cases (for further details, see Section B).
- (c) This withholding tax applies to dividends paid to non-domiciled business entities and to domiciled and non-domiciled individuals (see Section B). The withholding tax is considered a final tax. If the shares of the company paying the dividends were purchased through a local stock exchange, the withholding tax rate is reduced to 5%.
- (d) This is a final withholding tax that is imposed on non-domiciled companies and non-domiciled individuals.
- (e) As of 1 July 2019, the withholding tax rate for fees and commissions will be 25%. For further details regarding withholding tax on interest, fees and commissions, see Section B.
- (f) Non-domiciled companies engaged in these types of activities through a permanent establishment in Costa Rica that do not comply with requirements to report income or to file an income tax return may be subject to an imputed amount of taxable income equivalent to 15% of their total gross income

derived in Costa Rica. Imputed taxable income is subject to the ordinary corporate income tax rate. For further details, see Section C.

- (g) Resolution DGT-R-036-2014 established a 2% withholding requirement for debit or credit card payments processed by financial institutions in Costa Rica. The amounts withheld by the financial institutions are treated as advance payments of the recipient's final income tax liability. The 2% withholding requirement applies only to 88% of the amount of the transaction made with a debit or credit card. The following persons are exempted from this withholding requirement:
- Entities not subject to income tax
 - Companies under the simplified tax regime
 - Transporters of persons or goods
 - Gas stations
 - Taxpayers engaged in agricultural activities that do not have an obligation to make partial income tax payments
 - Taxpayers that generally do not have an obligation to make partial income tax payments
- (h) Resolution DGT-R-35-2014 established that financial entities must withhold 2% on payments made for "professional services" used during the formalization process for financial products.
- (i) Industrial companies may carry forward net operating losses incurred in the first five years of operations for five years. They may carry forward net operating losses incurred in subsequent years for three years. As of 1 July 2019, any type of company may carry forward net operating losses for three years. Agricultural companies may carry forward net operating losses for five years.

B. Taxes on corporate income and gains

Tax reform. On 4 December 2018, Costa Rica enacted a tax reform bill, Law on the Strengthening of Public Finances. The tax reform establishes new rules regarding income tax (for example, rules regarding the tax period, permanent establishments and taxable events). It also creates a new chapter for the taxation of capital income and capital gains and losses.

The current rules apply until 30 June 2019, and starting 1 July 2019, the reform will enter into force.

Corporate income tax. The Costa Rican tax system is a territorial regime; consequently, income derived from Costa Rican sources is subject to tax.

Corporate income tax rates. The corporate tax rate for the 2019 fiscal year is 30% for resident and nonresident companies. However, companies with annual gross income of up to CRC54,303,000 (approximately USD89,500) are subject to an income tax rate of 10%. Companies with annual gross income between CRC54,303,000 and CRC109,228,000 (approximately USD180,100) are subject to an income tax rate of 20%. These tax brackets are adjusted annually.

As of 1 July 2019, the corporate tax rate will remain at 30%, but for companies with annual gross income of up to CRC106,000,000 (approximately USD175,250), the following will be the tax rates:

- 5% for annual net income (taxable income) up to CRC5 million (approximately USD8,250)
- 10% for annual net income between CRC5 million and CRC7,500,000 (approximately USD12,400)
- 15% for annual net income between CRC7,500,000 and CRC10 million (approximately USD16,530)
- 20% on the amount of annual net income exceeding CRC10 million

Companies operating under the Free Trade Zone Regime that are located in the Great Extended Metropolitan Area (GEMA) benefit from an income tax exemption of 100% for the first eight years and of 50% for the next four years. Companies located outside the GEMA benefit from an income tax exemption of 100% for the first 12 years and of 50% for the next 6 years. The Ministry of National Planning and Economic Policy specifies which areas are considered part of the GEMA.

On 13 July 2007, the World Trade Organization Committee on Subsidies and Countervailing Measures agreed to adopt the text of a draft decision of the General Council to continue procedures for the extension until 2015 of the transition period for the elimination of the export subsidy programs of 19 developing countries, including Costa Rica. Based on the above action and to comply with Costa Rica's commitments as a member of the World Trade Organization, on 22 January 2010, the executive branch of the Costa Rican government published Law 8794, which amends and adds certain sections to the Free Trade Zone Regime Law No. 7210. This law created a new category of companies that can apply for the Free Trade Zone Regime. This category is for companies that produce or process goods, regardless of whether the goods are for exportation. Companies in this category are subject to income tax at reduced rates (0%, 5%, 6% or 15%) for a specified number of years depending on whether the company is located inside or outside the GEMA or depending on the amount of the investment.

Capital gains. Capital gains are taxable and capital losses are deductible if they result from the transfer of depreciable assets or from the transfer of non-depreciable assets in the ordinary course of a trade or business. Taxable capital gains are treated as ordinary income and are subject to tax at the normal corporate income tax rate.

Under the tax reform rules, capital gains will be excluded from gross income and will be subject to a 15% withholding tax unless they are derived from goods or rights that are part of the taxpayer's activity or unless they constitute a habitual activity; in such cases, they will be taxed in accordance with the provisions of the corporate income tax.

Administration. The statutory tax year runs from 1 October through 30 September. Companies must file annual corporate income tax returns and pay any tax due within 2 months and 15 days after the end of the tax year. Some entities may request to use the calendar year as their tax year (for example, subsidiaries of foreign companies). Taxpayers that report under the statutory tax year have a filing deadline of 15 December. Taxpayers that report under the calendar year have a filing deadline of 15 March. As of 1 July 2019, the statutory tax year will run from 1 January through 31 December (calendar year).

The current year tax liability must be paid in quarterly installment payments, which are based on the preceding year's income tax paid or the average of the last three years' tax liability, whichever is higher. If a company did not file a return for the last three years, the installment payments are calculated based on the tax liability from the last year a return was filed. New companies must make quarterly payments based on their first-year projected income,

which must be reported to the tax authorities on or before the last day of January. If no projected income is reported, the tax authorities determine the quarterly tax payments based on an imputed income amount.

Companies defined by the tax authorities as National Large Taxpayers or Large Territorial Companies must file audited financial statements on request from the tax authorities. The audited financial statements must be submitted within three months after the request of the tax authorities. The period to respond may be extended by three months if approved by the tax authorities.

In addition, Resolution No. DGT-R-30-2014 requires National Large Taxpayers to update their relevant tax information using a web-based platform called AMPO within 10 business days after information changes. Taxpayers that become classified as National Large Taxpayers must submit the tax information within 15 days after being notified of their National Large Taxpayer status by the tax authorities. The relevant tax information to be provided includes, among other items, the following:

- Agencies
- Branches or commercial premises
- Mergers
- Royalty payments for the use of intangible assets
- Equity participation in other entities
- Participations in economic groups

Dividends. Dividends paid between resident corporations, limited liability companies and partnerships with stock are not taxable. A 15% withholding tax is imposed on dividends paid to domiciled and non-domiciled individuals or to non-domiciled business entities. If the shares on which dividends are paid were purchased through a local stock exchange, the withholding tax rate is reduced to 5%. Distributions by companies of their own shares are not taxable. Under the Income Tax Law, domiciled companies include companies incorporated in Costa Rica and companies that have a permanent establishment in Costa Rica.

As of 1 July 2019, a dividend distribution will not be subject to dividend tax if the shareholder is another corporation domiciled in Costa Rica that engages in an economic activity and is subject to income tax. Under the reform, distributions by companies of their own shares will be exempt.

Interest. Interest, commissions, financial expenses and lease payments of capital assets paid to non-domiciled individuals or legal entities are subject to a 15% withholding tax rate. Interest, commissions, financial expenses and lease payments for capital assets paid to foreign banks that are part of a Costa Rican financial group or conglomerate regulated by the Costa Rican Financial System (Consejo Nacional de Supervisión del Sistema Financiero, or CONASIFF) are subject to a withholding tax rate of 5.5% during the first year of application of a law that entered into force on 27 November 2014, 9% during the second year, 13% during the third year and 15% beginning with the fourth year. Interest, commissions and financial expenses paid by entities regulated by the Superintendence of Financial Entities (Superintendencia General de Entidades Financieras, or SUGEF) to foreign entities that are also regulated and supervised in their

jurisdictions are subject to a 5.5% withholding tax rate. An exemption applies to interest, commissions and financial expenses paid to multilateral development banks and other institutions of multilateral or bilateral development, as well to other nonprofit entities that are not subject to tax.

The tax reform includes a limitation on the deduction of non-banking interest.

Foreign tax relief. The current position of the tax authorities is that Costa Rican taxpayers cannot deduct foreign taxes paid abroad in calculating their taxable income.

C. Determination of trading income

General. Income tax is determined in accordance with International Accounting Standards (IAS), subject to adjustments required under the Costa Rican Income Tax Law and general resolutions issued by the tax authorities. Taxable income includes all income derived from Costa Rican sources, such as income from industrial, agricultural and trade activities in Costa Rica, income from services rendered in Costa Rica and income derived from real estate transactions, assets, capital, goods and rights invested or used in Costa Rica.

Imputed income. The tax authorities may assess imputed income in the cases described below.

Non-domiciled companies that do not file tax returns. Non-domiciled companies engaged in certain types of activities in Costa Rica through a permanent establishment that do not comply with requirements to report income or file income tax returns are subject to an imputed income assessment equal to a specified percentage of their Costa Rican gross income, unless they provide evidence of a lower amount of actual income. For example, documentation supporting an allocation of income between Costa Rica and other countries would prove that all income is not Costa Rican source. The amount of the imputed income assessment is subject to tax at the normal income tax rate. The following are some of the presumed amounts of taxable income:

- Transport and telecommunications: 15% of gross income
- Reinsurance: 10.5% of the net value of the reinsurance undertakings, guarantees and premiums of any type
- Media, cinema and international news: 30% of gross income

Airlines, maritime shipping and transportation companies. Airlines, maritime shipping and transportation companies may enter into an agreement with the tax authorities to compute Costa Rican taxable income using a special formula based on the company's worldwide and local revenues.

Loan and financing transactions. Unless the taxpayer provides evidence to the contrary, loan and financing transactions are deemed to derive a minimum amount of interest based on the highest active interest rate fixed by the Banco Central de Costa Rica (central bank) for lending and financial transactions or, if this rate is not available, on the average market rate being charged in the Costa Rican banking system. The tax authorities do not allow any exceptions to this rule unless the parties entered into a formal written loan or financing agreement.

Inventories. The Costa Rican Income Tax Regulations provide that acquisition cost must be used to record assets. The acquisition cost may be computed using several valuation methods, such as the first-in, first-out (FIFO) and weighted average cost methods. The tax authorities eliminated last-in, first-out (LIFO) as a valid inventory valuation method for tax purposes as of 3 February 2015.

Provisions. In general, provisions, including provisions for contingent liabilities such as doubtful accounts and severance pay, are not deductible expenses. However, actual payments of such liabilities are considered to be deductible expenses.

Tax depreciation. Depreciation may be computed using the straight-line or the sum-of-years' digits method. The tax authorities may allow a special accelerated depreciation method in certain cases. The tax authorities may authorize other methods based on the type of asset or business activity. The method chosen must be applied consistently. Depreciation is computed based on the useful life of the asset as specified in the Income Tax Regulations. The following are some of the straight-line rates.

Asset	Rate (%)
Buildings	2/4/6
Plant and machinery	7/10/15
Vehicles	10/15/34
Furniture and office equipment	10
Tools	10

Relief for losses. Industrial companies may carry forward net operating losses incurred in their first five years of operation for five years and they may carry forward net operating losses incurred in subsequent years for three years. Agricultural companies may carry forward net operating losses for five years.

As of 1 July 2019, any type of company may carry forward net operating losses for three years. Agricultural companies may carry forward net operating losses for five years. Net operating losses may not be carried back.

Groups of companies. Costa Rican law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; the tax reform introduces some specific reduced rates	13%
Real estate transfer tax; the definition of "transfer" includes indirect transfers in addition to direct transfers of immovable property; indirect transfers are the transfer of control over the legal owner of immovable property	1.5%
Vehicle transfer tax	2.5%
Customs duties	
Agricultural products; average rate	12.72%
Industrial products; average rate	4.69%

Nature of tax	Rate
Certain raw materials and machinery and equipment (Certain specified goods and merchandise are subject to higher rates of customs duty.)	0
Real estate tax (assessed and collected by the municipalities)	0.25%
Payroll taxes; withheld by employers; paid by employee; rate depends on compensation level	0%/10%/15%
Social security contributions	
Employer	26.33%
Employee	10.34%
Municipal taxes (varies by municipality)	Various
Solidarity Tax for the Strengthening of Housing Programs; (Solidarity Tax) contained in Law No. 8683; effective from 1 October 2009 through 1 October 2019; purpose of the tax is to finance public housing programs; tax applicable to residential property that is used habitually or occasionally or for recreational purposes, that the taxpayer owns or has the right to use and that is located in Costa Rica; taxpayers are subject to the tax if the value of the infrastructure (permanent structures, such as houses, swimming pools and parking lots) exceeds CRC131 million (approximately USD218,869); the value of the infrastructure must be updated every 3 years during the first 15 calendar days of the corresponding tax year in accordance with the parameters established by the tax authorities; if the taxpayer is subject to the tax (that is, meets value threshold for the infrastructure) the tax base is computed as the total value of the infrastructure (not just the excess of CRC131 million) plus the value of the land as of 1 January, based on a specific zoning model determined by tax authorities; hotel businesses may be subject to the tax depending on their operating model and the type of infrastructure; the tax is paid annually and is due on 15 January of the current tax year (for example, for a fiscal year-end of 31 December 2018, the tax is due by 15 January 2019); Solidarity Tax is independent from the other real estate taxes and is not deductible for income tax purposes; the tax rates are progressive	0.25% to 0.55%
Annual Tax on Legal Entities; applies to all business entities and branches that are registered in the Mercantile Registry; amount of tax depends on whether the entity is registered as a taxpayer and on its gross income in its last corporate income tax return if so registered; tax rate is applied to a base salary; base salary is a monetary point of reference updated each year by the Ministry of Finance and is typically used in	

Nature of tax	Rate
certain laws as a reference for tax computations (for example, tax penalties); in 2018, a base salary was CRC431,000 (approximately USD759); payable by 30 January of each year	
Entities not registered as taxpayers or inactive	15%
Entities with gross income of less than 120 base salaries	25%
Entities with gross income between 120 and 279 base salaries	30%
Entities with gross income equal to or in excess of 280 base salaries	50%

E. Foreign-exchange controls

The currency in Costa Rica is the colón (CRC). As of 23 November 2018, the exchange rate of the colón against the US dollar was CRC568.06 = USD1.

No restrictions are imposed on foreign-trade operations or foreign-currency transactions.

F. Tax treaties

Costa Rica has income tax treaties in effect with Germany and Spain.

Costa Rica signed an income tax treaty with Mexico on 12 April 2014. It will enter into effect after both countries complete their respective legislative approval processes.

The following are the withholding tax rates under Costa Rica's tax treaties with Germany and Spain.

	Dividends %	Interest %	Royalties %
Germany	5/15 (a)	5 (b)	10
Spain	5/12 (a)	5/10 (c)	10
Non-treaty jurisdictions (d)	15	15	25

- (a) The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 20% of the capital of the entity paying the dividends.
- (b) Interest paid from Germany to the Costa Rican government is exempt from German taxes. Interest paid from Costa Rica under a loan guaranteed by Germany for exportation or foreign direct investment or paid to the German government, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the Deutsche Investitions-und Entwicklungsgesellschaft is exempt from Costa Rican taxes. Interest can only be taxed in the contracting state of which the recipient is a resident if the interest is paid in connection with any of the following:
- The sale of commercial or scientific equipment on credit
 - The sale of goods by an enterprise to another enterprise on credit
 - A loan of any type made by a bank resident in one of the contracting states
- (c) The 5% rate applies if the term of the loan agreement under which the interest is derived is five years or longer.
- (d) For further details, see Section A.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (b)
Branch Tax Rate (%)	25 (a)
Withholding Tax (%)	
Dividends	2/10/15 (c)
Interest	18 (d)
Royalties from Patents, Know-how, etc.	20

Directors' Fees and Nondeductible Expenses	15
Payments for Services	20 (e)
Branch Remittance Tax	7.5 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) For details concerning the minimum tax, see Section B.
- (b) See Section B.
- (c) For details concerning these rates, see Section B.
- (d) The standard rate of interest withholding tax is 18%. Several exceptions to this rate exist. The withholding tax rate ranges from 1% to 16.5%, depending on the maturity of a deposit account. For a current account, the withholding tax rate is reduced to 16.5% for companies and 13.5% for individuals. The withholding tax rate on interest is reduced to 8.25% for companies and to 6.75% for individuals if the interest is paid on loans to holding companies from foreign financial institutions or on loans from shareholders of holding companies to finance the acquisition or subscription of securities.
- (e) This withholding tax applies to payments by resident companies for services rendered by nonresidents who do not maintain a professional office in Côte d'Ivoire. For premiums paid to nonresident reinsurance companies, the rate is 12.5%.
- (f) On one-half of the before-tax profit (18% if the profit is exempt from corporate tax). See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are taxed on the territoriality principle. As a result, companies carrying on a trade or business outside Côte d'Ivoire are not taxed in Côte d'Ivoire on the related profits. Resident companies are those registered in Côte d'Ivoire, regardless of the nationality of the shareholders or where they are managed and controlled. Foreign companies with activities in Côte d'Ivoire are subject to corporate tax on local-source profits if they have a permanent establishment in Côte d'Ivoire.

Tax rates. The regular corporate income tax rate is 25%.

The minimum tax is 0.5% of turnover. For oil-producing, electricity and water-producing companies, the rate is reduced to 0.1%. The rate is reduced to 0.15% for banks and financial companies and for insurance companies. The minimum tax may not be less than XOF3 million or more than XOF35 million. New corporations are exempt from the minimum tax for their first fiscal year, and mining companies are exempt from the minimum tax during the exploration phase.

Profits realized in Côte d'Ivoire by branches of foreign companies are deemed to be distributed and therefore are subject to a branch withholding tax on one-half of the before-tax profit at a rate of 15% (effective rate of 7.5%).

Corporations may apply for various categories of priority status and corresponding tax exemptions. Priority status varies depending on the nature of the project and the level of investments. Corporate tax reductions and temporary tax exemptions are granted to new industrial businesses for investments in industrial buildings and building sites, land for development, and industrial and agricultural establishments.

Capital gains. Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if the proceeds are used to ac-

quire new fixed assets in Côte d'Ivoire within three years or in the event of a merger (or other acquisition).

If the business is totally or partially transferred or discontinued, only one-half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gain is taxed if the event occurs five years or more after the business is begun or purchased.

Capital gains derived by holding companies are exempt or are taxed at a rate of 12% if certain conditions are satisfied.

Administration. The financial year is from 1 January to 31 December. Corporate financial statements and corporate results must be filed by the following dates:

- Companies that should have their accounts certified: 30 June of the year following the financial year
- Other companies: 30 May of the year following the financial year

Companies must pay corporate income tax in three equal installments, which are due on 15 April, 15 June and 15 September of the year following the financial year.

The tax center with which taxpayers must file tax returns depends on the company's turnover. The following are the relevant rules:

- Taxpayers with annual turnover below XOF400 million must file with their local tax center.
- Taxpayers with turnover ranging from XOF400 million to XOF3 billion must file with the medium-sized enterprises center (CME).
- Taxpayers with turnover exceeding XOF3 billion must file with the large corporation tax center (DGE).

Companies must use a unified tax form to file their tax return and pay their taxes electronically. This tax return includes in one form all of the taxes to which the company is subject. The deadline to file the unified tax return for companies reporting to the CME or DGE depends on the company's industry. The following are the deadlines:

- Manufacturing, oil and mining companies: 10th day of each month
- Commercial companies: 15th day of each month
- Service companies: 20th day of each month

Late payments are subject to a penalty of 5% for the first month, plus 0.5% for each additional month or part of a month.

Late submissions of financial statements are subject to a penalty of XOF1 million plus XOF100,000 for each month or part of a month of the delay.

If the lateness of a submission exceeds three months, the penalty is XOF2 million plus XOF200,000 for each month or part of a month of the delay.

Dividends. Dividends paid by listed companies out of profits taxed at the 25% corporate tax rate are subject to a 10% withholding tax. A 15% withholding tax is imposed on dividends paid by other companies out of profits taxed at the 25% corporate tax rate. A special withholding tax rate of 2% applies to certain types of bonds issued in Côte d'Ivoire.

A parent company may exclude up to 95% of dividends received from a 10%-owned subsidiary (regime of holding companies and subsidiaries). A listed company may exclude 90% of the dividends received, while an unlisted company may exclude 50%.

The amount of withholding tax due is increased by 25% if the beneficiary of the interest is established in a non-cooperative or low-tax jurisdiction.

Foreign tax relief. In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from tax in Côte d'Ivoire under the territoriality principle is taxable, net of the foreign tax. However, a tax treaty may provide for a tax credit.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to the Accounting System of the Organization for African Business Law Harmonization. Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Gifts (except those granted to certain associations engaged in social, sporting, scientific or cultural development)
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director)
- Subsidies
- Corporate tax
- Penalties

Services fees and royalties paid by Ivorian companies to resident and nonresident parent companies are deductible if the following conditions are satisfied:

- The payer proves that the payments are related to real operations and that the amount of the payments is normal.
- The amount of the payments does not exceed 5% of the turnover and 20% of the overhead of the payer.

If a nonresident is established in a non-cooperative or low-tax jurisdiction, the deduction is capped at 50% of the gross amount paid, without prejudice to the double limit mentioned above in the second bullet in the preceding paragraph.

Payments to resident companies are also subject to the same two conditions mentioned above.

Under certain tax treaties of Côte d'Ivoire, amounts paid to nonresident companies are deductible for tax purposes based on the same conditions as those applicable to payments to resident companies. Even if such treaties apply, the payer must satisfy the two conditions mentioned above in order to deduct the payments.

The deduction of services fees and royalties paid by resident companies to other resident companies is subject to the second condition mentioned above (5% of the turnover and 20% of the overhead). As a result, the nondiscrimination clause provided for by certain tax treaties does not apply, and services fees and royalties paid by resident companies to nonresident companies are deductible under the conditions mentioned above.

Inventories. Inventory is normally valued at the lower of cost or market value. Cost must be determined on a weighted average

cost price method. A first-in, first-out (FIFO) basis is also generally acceptable.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at the following rates.

Asset	Rate (%)
Buildings	5
Light construction	10
Loud machinery	10
Stationary machinery	20
Fixtures	10
Office and home chattels	10
Office equipment	20 to 25
Motor vehicles	33.33
Other specified vehicles and engines	20 to 25
Computers and software	20 to 50

Relief for tax losses. Losses may be carried forward five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. The law does not contain any provision for the fiscal integration of related companies equivalent to a consolidated filing position. However, a parent-subsidiary tax regime exempts dividends and capital gains from tax under certain conditions.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on goods and services sold in Côte d'Ivoire	18
Turnover tax (tax on banking operations), on interest paid to and services rendered by banks and financial companies	10
Special tax on equipment; based on turnover; applicable to all companies	0.1
Business activity tax (<i>patente</i>), based on the turnover and the rental value of tangible assets	Various
Withholding tax, on amounts invoiced by importers, producers and sellers to persons subject to commercial or agriculture tax (entitles the buyer to a credit against withholding tax or VAT payable on its sales)	Various
Registration duty on transfers of real property	4
Registration duty of transfers of businesses	10

Nature of tax	Rate (%)
Special tax on subcontractors of petroleum companies; a global tax including payroll taxes and withholding tax on dividends; imposed on taxable turnover	6
Payroll tax, paid by employers on salaries of Employees from Côte d'Ivoire	2.8
Expatriates	12
Social security contributions	
Retirement, on monthly salaries up to XOF1,647,315; paid by Employer	7.7
Employee	6.3
Family allowances, on monthly salaries up to XOF70,000; paid by employer	5.75
Industrial injuries, on monthly salaries up to XOF70,000; paid by employer	2 to 5

E. Miscellaneous matters

Foreign-exchange controls. Exchange control regulations apply to financial transfers outside the franc zone, which is a monetary zone including France and its former overseas colonies.

Transfer pricing. Taxpayers must file annually the following transfer-pricing documentation:

- An annual return reconciling cross-border intra-group transactions
- A Country-by-Country Report, if, among other conditions, the aggregate annual turnover of the taxpayer is XOF491,967,750,000 or more

Thin-capitalization rules. Côte d'Ivoire has the following thin-capitalization rules regarding loans by shareholders and related parties to local entities:

- The sums of money made available by all shareholders should not exceed the amount of the share capital.
- The interest paid to the shareholders should not exceed 30% of the profit before corporate income tax and before deduction of such interest, and depreciation and provisions.
- The interest rate should not exceed the rate of the central bank advances (currently 4.5%), increased by 2 percentage points.
- The loan should be repaid within five years following the granting of the loan. In addition, the local entity should not go into liquidation during this five-year period.
- The share capital of the local entity should be entirely paid up.

F. Treaty withholding tax rates

Côte d'Ivoire has signed a multilateral tax treaty with the other members of the West African Economic Community (Communauté Economique de l'Afrique de l'Ouest, or CEAO), which are Burkina Faso, Mali, Mauritania, Niger and Senegal.

The country also signed a multilateral tax treaty in the framework of the Common African and Mauritian Organization (Organisation Commune Africaine et Mauricienne, or OCAM). This treaty was also signed by Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Congo (Democratic Republic of), Congo

(Republic of), Gabon, Madagascar, Mauritius, Niger, Rwanda, Senegal and Togo.

The two international organizations mentioned above have been dissolved.

Côte d'Ivoire has signed a new treaty with the countries of the West African Economic and Monetary Union (WAEMU). This tax treaty has applied for some tax items since 2009. It is wholly applicable, effective from 1 January 2010. The members of WAEMU are Benin, Burkina Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo.

	Dividends	Interest	Royalties
	%	%	%
Belgium	15	16	10
Canada	15	15	10
France	15	15	10
Germany	15	15	10
Italy	15	15	10
Morocco	10	10	10
Norway	15	16	10
Portugal	10	10	5
Switzerland	15	15	10
Tunisia	10	10	10
United Kingdom	15	15	10
WAEMU countries	10	15	15
Non-treaty jurisdictions	2/10/15 (a)	18 (b)	20

(a) See Section B.

(b) See footnote (d) in Section A.

On 26 February 2016, Côte d'Ivoire signed a tax treaty with Turkey, but this treaty is not yet in force.

On 21 March 2019, Côte d'Ivoire signed a tax treaty with the United Arab Emirates, but this treaty is not yet in force.

- (a) See Section B.
- (b) These are blacklisted countries with which Croatia does not have a double tax treaty in place. The blacklisted countries are currently American Samoa, Aruba, Barbados, Belize, Bermuda, Dominica, Fiji, Guam, the Marshall Islands, Oman, Samoa, Trinidad and Tobago, the United Arab Emirates, the United States Virgin Islands and Vanuatu.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income. A company is resident in Croatia if its legal seat or its place of management and supervision is located in Croatia. Branches of foreign companies are subject to tax only on their profits derived from Croatia. Investment funds without legal personalities established and operating in accordance with the law for investment funds are not corporate income taxpayers.

Tax rates. The standard rate of corporate income tax is 18%. A lower corporate income tax rate of 12% applies to taxpayers that realized revenue of less than HRK3 million in the respective tax period.

Tax incentives. Tax exemptions and other tax reliefs are available in accordance with the Croatian Corporate Income Tax Act and special legislation regulating incentives. For example, the Investment Promotion Act provides incentives for investments in new business activities and new workplaces.

Capital gains and losses. Capital gains and losses from the sale of assets are considered regular taxable income and tax-deductible expenses, respectively. No separate capital gains tax applies; capital gains are subject to the regular corporate income tax rates of 18% or 12%. Specific rules apply to unrealized gains and losses on certain types of assets. Depending on the type of asset, such gains or losses may be not taxable or not tax deductible, and may be recognized for tax purposes in the period of the realization of the asset.

Administration. The regular tax year is the calendar year, but a company may apply for a different tax year.

Annual tax returns must be filed by the end of the fourth month following the tax year.

Companies must make monthly advance payments of tax. In principle, each monthly advance payment is equal to $\frac{1}{12}$ of the tax due for the preceding year. The balance of tax due must be paid by the end of the fourth month following the tax year. If the total of the advance payments exceeds the tax due for the year, the company may claim a refund.

Dividends. Dividends paid to foreign shareholders are taxable at a rate of 12%.

Foreign tax relief. A foreign tax credit is available to resident companies for foreign tax paid on income earned directly or through permanent establishments abroad. The amount of the credit is the lower of the Croatian corporate tax payable on the foreign income and the foreign tax paid.

C. Determination of trading income

General. The corporate income tax base is determined in accordance with the accounting regulations (Croatian Financial Reporting Standards [CFRS]/International Financial Reporting Standards [IFRS]), adjusted for certain items that increase or decrease the tax base.

The following items decrease the tax base:

- Revenues from dividends and profit shares under certain conditions
- Unrealized profits from value adjustments of shares if they were previously taxed
- Revenues from collected written-off receivables that were taxed in previous periods
- Depreciation expenses carried forward from previous periods
- Tax incentives in accordance with special laws
- Expenses from previous tax periods that were previously taxed (that is, expenses that had been nondeductible)

The following items increase the tax base:

- Depreciation expenses exceeding the maximum allowable amounts and rates (excess may be carried forward).
- Penalty interest paid between related parties.
- Privileges and other benefits granted to individuals and legal persons to execute certain actions in favor of the company.
- Nondeductible interest on loans between related parties.
- The costs of forced collection of tax and other levies.
- Unrealized losses from value adjustments of shares, if these were included in the expenses.
- Unrealized losses from value adjustments of depreciable assets except in the case of extraordinary damages.
- Fifty percent of entertainment expenses resulting from a business relationship with a business partner, including related value-added tax (VAT). These expenses include the following:
 - Gifts, regardless of whether they include the mark of the company or product
 - The cost of holidays, sports, recreation and leisure
 - Rental of airplanes, automobiles, vacation homes and vessels
- Fines imposed by competent bodies.
- Fifty percent of expenses, including related VAT but not including insurance and interest costs, incurred with respect to owned or rented motor vehicles or other means of personal transportation (for example, personal car, vessel, helicopter and airplane) used by managerial, supervisory and other employees, if the personal use of the means of personal transportation is not taxed as a benefit in kind.
- Inventory shortages above the amount prescribed by the Croatian Chamber of Economy, if the shortages are not subject to personal income tax.
- Donations in cash or in kind exceeding 2% of the preceding year's revenue. The limitation does not apply to donations made in accordance with the competent ministry's decisions on special programs and actions undertaken outside the regular business activities of the beneficiary. The donations also include financing of health care expenses (surgery, and purchases of medicines or orthopedic devices) for individuals who are not covered by primary, additional or private health insurance. The donations can also include donations of food producers or traders that

donate food for social, humanitarian and other helpful purposes or that donate food to people hit by natural disasters. The food donations must be in line with special provisions of the Ministry of Agriculture.

- Expenses identified in the course of a tax audit, including VAT personal income tax, city tax and obligatory contributions incurred with respect to hidden profit payments, including payments of private costs of shareholders, company members and individuals and persons related to these individuals.
- Other expenses not incurred for the purpose of earning profit.

The expenses mentioned above, except privileges and other benefits granted to individuals and legal persons to execute certain actions in favor of the company and expenses identified in a tax audit, do not increase the tax base if they are subject to personal income tax.

New legislation that entered into force from 2017 introduced the possibility of determining the tax base based on the cash principle for taxpayers that realized revenue of less than HRK3 million in the preceding tax period. The Corporate Income Tax Act provides detailed rules for determining such tax base. Corporate income taxpayers that are also VAT taxpayers may also determine the tax base based on the cash principle if they have, based on VAT rules, already chosen to pay VAT based on realized income.

Inventories. Inventories are valued in accordance with CFRS or International Accounting Standards (IAS)/IFRS. In general, inventories are valued at the lower of cost or net realizable value. Costs include all acquisition costs, conversion costs and other costs incurred in bringing inventories to their current location and condition. In general, the cost of inventories must be determined using the first-in, first-out (FIFO) or weighted average method.

Losses from value adjustments of inventories are recognized as tax-deductible expenses at the time of disposal of the inventories.

Specific rules deal with allowable limits of inventory shortages.

Provisions. The following provisions are deductible for tax purposes:

- Provisions for severance payments to be paid in the following year according to the prepared restructuring plan
- Provisions for costs of renewing natural resources
- Provisions for costs incurred during guarantee periods
- Provisions for costs related to court disputes that have already been initiated against the taxpayer (excluding interest)
- Provisions for the risk of potential loss in banks, up to the amount prescribed by the Croatian special regulations
- Provisions in insurance companies, up to the obligatory amount prescribed by the law governing the insurance
- Provisions for the unused vacation in accordance with accounting principles

Trade receivables. Value adjustments of trade receivables are deductible if the receivables are overdue for more than 60 days as of the end of the tax year and if they are not collected by the 15th day before the filing of the tax return. However, if a taxpayer does not take measures for debt collection (for example, sue the debtor) before the receivables are barred by the statute of

limitations, the receivables treated as deductible for tax purposes in prior years must be included in taxable income. In addition, value adjustments are deductible for tax purposes in the following circumstances:

- The receivables do not exceed HRK5,000 (approximately EUR656) per debtor (corporate income taxpayers, subject to specific provisions in case of bankruptcy, arbitration and mediation) or HRK2,000 (approximately EUR262) per unrelated individual if the total receivables per individual do not exceed this amount on the last day of the tax period and if the receivable is written off by 31 December 2013.
- The receivables do not exceed HRK200 (approximately EUR26) per unrelated individuals or craftsmen (and/or individuals engaged in similar business activities) if the total receivables per individual do not exceed this amount on the last day of the tax period and do not derive such business activities.
- The company is suing the debtor or a foreclosure is being conducted.
- The receivables are reported in a bankruptcy proceeding of the debtor.
- The debt has been settled in the pre-bankruptcy or bankruptcy proceedings of the debtor.
- The taxpayer proves that costs of initiating certain collection procedures exceed receivables or the taxpayer proves it used the duty of care to initiate collection of the debt (which ultimately could not be collected).
- The debt is written off based on special provisions related to the consumer's bankruptcy.

The write-off of receivables confirmed in the settlement procedure (based on the Act on Compulsory Administration Procedure in Companies of Systemic Importance for the Republic of Croatia [Lex Agrokor]) should be treated as tax-deductible expense (applicable for 2018 and future corporate income tax returns).

Credit institutions may treat as tax deductible the write-off of receivables from unrelated individuals and legal entities that are related to housing provisions and entrepreneurial loans, respectively. This is possible if it can be determined that the write-off is done with the goal of protecting the basic life needs of the individual (for example, prevention of foreclosure on the only real estate in which the loan recipient lives) or not jeopardizing investment developments and entrepreneurial activities of legal entities.

Tax depreciation. Depreciation is calculated by using the straight-line method. The following are the maximum annual depreciation rates prescribed by the Corporate Income Tax Act.

Asset	Rate (%)
Buildings and ships over 1,000 gross registered tons	10
Primary herd and personal cars	40
Intangible assets, equipment, vehicles (except personal cars), and machinery	50
Computers, computer hardware and software, mobile telephones and computer network accessories	100
Other assets	20

The deduction for tax depreciation cannot exceed the expense for accounting depreciation. If maximum allowable tax depreciation exceeds accounting depreciation, the accounting depreciation prevails for tax purposes. If accounting depreciation exceeds maximum allowable tax depreciation, the excess may be deducted in future periods.

Depreciation expenses for personal cars and other vehicles used for personal transportation are deductible up to the amount calculated on the purchase cost of HRK400,000 (approximately EUR52,452) per vehicle. The limitation does not apply to vehicles used exclusively for rental or transportation activities.

Depreciation of assets that are not used in the performance of ordinary business activities is not deductible for tax purposes.

If the accounting records of a taxpayer include vessels, airplanes, apartments or resort houses and if the taxpayer uses these assets in its regular business activities, the depreciation of such assets may be claimed as deductible expenses for tax purposes if the following conditions are met:

- The taxpayer is registered for the activity of renting such assets.
- The revenue realized from the use of the vessels and airplanes is at least 7% of the purchased value of the vessels or airplanes.
- The revenue from the use of apartments and resort houses is at least 5% of the purchase value of the apartments or resort houses.

Relief for losses. Tax losses may be carried forward for five years, but they may not be carried back.

The legal successor may lose the right to a loss carryforward after a legal change (business combination) and/or change in ownership of the company of more than 50% if one of the following circumstances exists:

- The taxpayer did not perform its business activity for the two tax periods before the occurrence of the legal change and/or change in ownership.
- Within two tax periods after the occurrence of the legal change and/or change in ownership, the business activity of the taxpayer substantially changes.

Groups of companies. Croatia does not allow consolidated returns or provide any other tax relief for groups of companies. Each company within a group is taxed separately.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	5/13/25
Real estate tax, on the value determined by the tax authorities	4
Social security contributions; paid by	
Employer	16.5
Employee	20
Personal income tax; the withholding liability lies with the employer	

Nature of tax	Rate (%)
Up to HRK30,000 per month	24
In excess of HRK30,000 per month	36
Municipal surcharge; varies among cities; the rate for Zagreb (the capital city) is 18%	0 to 18

E. Miscellaneous matters

Foreign-exchange controls. The Croatian currency is the kuna (HRK).

The Croatian National Bank is responsible for foreign-exchange regulations.

The Foreign Exchange Act generally imposes restrictions on payments abroad that do not have a legal basis. No restrictions are imposed on transfers of paid-in share capital, dividends, profits, interest, royalties, fees for know-how and similar payments.

Under the Foreign Exchange Act, Croatian resident companies may acquire foreign securities, provide long-term and short-term loans to nonresident companies, acquire real estate abroad and engage in certain other specified transactions. Such transactions are allowed if they are reported to the Croatian National Bank.

Natural persons may make direct investments abroad, acquire foreign securities, provide long-term loans to nonresidents, acquire real estate abroad and provide short-term loans to nonresidents who are related parties (family members).

Transfer pricing. Croatia has transfer-pricing rules that apply to transactions between Croatian residents and nonresidents. Under these rules, the tax authorities may adjust the taxable income of Croatian taxpayers derived from transactions with foreign related companies if they deem the prices and agreed conditions to be different than arm's-length prices and conditions. In such circumstances, taxable income is increased (or expenses decreased) by the difference between prices stated in the financial statements and arm's-length prices. These rules also apply to transactions between two Croatian residents if one of the related parties has special tax status (pays corporate income tax at reduced rates) or has a tax-loss carryforward.

A company may apply one of the following methods for establishing an arm's-length price:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit-split method
- Transactional net margin method

Under the Croatian excessive interest rate rule, the deduction of interest on a loan received by a Croatian taxpayer from a related party is limited to a maximum deductible interest rate published by the Croatian Minister of Finance before the beginning of the relevant tax year (4.55% per year for 2018 and 3.96% per year for 2019).

The above-mentioned interest rate is calculated as the average of the interest rates on the outstanding balances of loans that are granted for a period longer than one year to nonfinancial

companies and that are published by the Croatian National Bank in the current calendar year.

Instead of the rate prescribed by the Minister of Finance, taxpayers can apply the above-mentioned transfer pricing methods for establishing an arm's-length interest rate, subject to the condition that such method apply to all agreements.

Taxpayers can enter into an agreement in the area of transfer pricing and contractual relations between related companies with the Croatian tax authorities and tax authorities in other jurisdictions if applicable (resident jurisdictions of related companies or permanent establishments through which the business activities are carried out). Advance pricing agreements (APAs) enable parties to determine a set of criteria for determining transfer prices (for example, methods, adjustments and key assumptions) before beginning related-party transactions during a tax period.

Debt-to-equity ratios. Under thin-capitalization rules, interest on loans received from foreign shareholders owning 25% or more of the shares, capital or voting rights of the borrower, on loans guaranteed by such shareholders or on loans received from related parties, is not deductible if the loan balance exceeds four times the shareholders' share in the equity of the borrower.

Prepayments of dividends. If the dividends or profit shares are prepaid to an individual during a tax year and if the realized profit at the end of a tax year is insufficient to cover such prepayment, the prepayment is considered to be income subject to personal income tax. The taxpayer must maintain documentary evidence of dividend prepayments and submit it with the tax return.

Anti-Tax Avoidance Directive. The Anti-Tax Avoidance Directive contains rules regarding interest deductibility and controlled foreign companies (CFCs).

Under the interest deductibility rule, to calculate the tax-deductible expense, the taxpayer may determine the exceeding borrowing costs incurred in the tax period to be up to 30% of earnings before interest, taxes, depreciation and amortization (EBITDA) or EUR3 million, whichever is higher. The exceeding borrowing costs are considered to be costs exceeding the taxable interest income or other economically equivalent taxable income. The amount of nondeductible exceeding costs is reduced for the amounts for which the tax base is increased under Article 8 (thin-capitalization rules) and Article 14 (interest on loans between related parties) of the Corporate Income Tax Act.

Under the CFC rule, a CFC of a taxpayer is an entity that exists in any organizational legal form or as a permanent establishment located in another country whose income is not liable to tax or is non-taxable in that country if both of the following conditions are met:

- The taxpayer alone or together with the related parties participates directly or indirectly with more than 50% of the voting rights, is the direct or indirect owner of more than 50% of the capital or realizes the right to receive more than 50% of the profit of the entity.
- The actual profit tax that the company or a permanent establishment paid abroad in another EU state is less than the

difference between the income tax that would be charged to company or the permanent establishment in Croatia and the actual profit tax paid by the company or permanent establishment.

If the entity or the permanent establishment is considered a CFC, the Croatian taxpayer is required to include the following CFC income in its tax base:

- Interest or other financial asset income
- License fees or other income from intellectual property
- Dividends, shares in profits and revenues from the disposal of shares
- Financial leasing income
- Income from insurance, banking and other financial activities
- Income derived from goods and services purchased from related parties and sold to related parties, with little or no added economic value

F. Tax treaties

Croatia has entered into double tax treaties on avoidance of double taxation with many countries (see the withholding rate table below).

Croatia has signed a tax treaty with Egypt, but this treaty is not yet effective.

Croatia has adopted the double tax treaties entered into by the former Yugoslavia with Finland, Norway and Sweden.

The withholding tax rates for payments by Croatian companies under Croatia's double tax treaties and under the former Yugoslavia's double tax treaties adopted by Croatia are listed in the table below.

Croatia became a member of the EU on 1 July 2013. As of that date, provisions of the Interest and Royalty Directive and Parent-Subsidiary Directive adopted by Croatian corporate income tax legislation became applicable to payments to recipients within the EU.

- (a) The 0% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 25% of the payer. The 10% rate applies to other dividends.
- (b) The 0% rate applies if the recipient (beneficial owner) is an entity that directly holds at least 10% of the payer. The 15% rate applies to other dividends.
- (c) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 15% rate applies to other dividends.
- (d) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly or indirectly at least 10% of the payer. The 15% rate applies to other dividends.
- (e) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.

- (f) The 5% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly controls at least 10% of the voting power of the payer, or holds directly at least 25% of the payer. The 15% rate applies to dividends paid by investment corporations that are resident in Canada but are owned by non-residents and in all other cases.
- (g) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 20% of the payer. The 15% rate applies to other dividends.
- (h) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer or if the recipient (beneficial owner) is a pension fund or similar institution that provides insurance services or pension benefits. The 10% rate applies to other dividends.
- (i) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (j) The 0% rate applies if the recipient (beneficial owner) is an entity that directly or indirectly holds at least 10% of the payer. The 15% rate applies to other dividends.
- (k) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (l) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.
- (m) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 10% rate applies to other dividends.
- (n) The 5% rate applies if the recipient (beneficial owner) is an entity that directly controls at least 10% of the voting power of the payer. The 10% rate applies to other dividends.
- (o) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer and if the entity is a resident of Israel. The 15% rate applies to other dividends.
- (p) The 5% rate applies if the recipient (beneficial owner) is an entity that holds at least 25% of the payer and if this ownership is not achieved for the purposes of exploiting these provisions. The 10% rate applies to other dividends.
- (q) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (r) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 10% of the payer. The 10% rate applies to other dividends.
- (s) The 5% rate applies if the dividends are paid by a Croatian resident to a Maltese resident (beneficial owner). If dividends are paid by a Maltese resident to a Croatian resident (beneficial owner), the applicable rate is the rate used to tax the profits out of which the dividends are paid.
- (t) The 0% rate applies if the recipient is an entity that holds directly at least 25% of the payer. The 15% rate applies to other dividends.
- (u) The 5% rate applies if the recipient is an entity that directly holds at least 25% of the voting power of the payer. The 15% rate applies to other dividends.
- (v) This treaty applies to Montenegro and Serbia.
- (w) The 8% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer. The 10% rate applies to other dividends.
- (x) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer and its respective share in capital amounts to at least EUR150,000. The 10% rate applies to other dividends.
- (y) The 5% rate applies if the recipient (beneficial owner) is an entity that holds directly at least 25% of the payer and its respective share in capital amounts to at least USD100,000. The 10% rate applies to other dividends.
- (z) The 5% rate applies if the recipient (beneficial owner) is an entity that controls directly or indirectly at least 25% of the payer. The 15% rate applies if the dividends are paid out of income (including gains) derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and if this income is exempt from tax. The 10% rate applies to other dividends.

On 10 October 2010, the country Netherlands Antilles, which consisted of five island territories in the Caribbean Sea (Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten), was dissolved. On dissolution of the Netherlands Antilles, the islands of Bonaire, Sint Eustatius and Saba (BES-Islands) became part of the Netherlands as extraordinary overseas municipalities. Curaçao and Sint Maarten have both become autonomous countries within the Kingdom of the Netherlands. The former Netherlands Antilles tax laws remain applicable to Curaçao, with the understanding that references in the laws to "the Netherlands Antilles" should now read "Curaçao." The following chapter provides information on taxation in Curaçao only. Chapters on BES-Islands and Sint Maarten appear in this guide.

A. At a glance

Corporate Income Tax Rate (%)	22
Capital Gains Tax Rate (%)	22
Branch Tax Rate (%)	22
Withholding Tax (%)	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10 *

* Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Curaçao offshore tax regime may carry forward tax losses for five years.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on resident and nonresident entities. Resident entities are those incorporated under former Netherlands Antilles or current Curaçao laws, even if their management is located abroad, as well as entities incorporated under foreign law, but effectively managed in Curaçao. For resident entities, corporate income tax is, in principle, levied on the aggregate amount of net profits earned from all sources during the entity's accounting period. Nonresident entities are subject to tax on specific Curaçao income items, such as profits earned through a permanent establishment and income related to real estate property in Curaçao, including interest derived from a mortgage on such real estate property.

Tax rates. Resident and nonresident entities, including branches of foreign companies, are taxed at a standard rate of 22%. However, different rates may apply to companies qualifying for tax holidays, E-zone companies, offshore companies and Curaçao Investment Companies.

Withholding taxes are not imposed on remittances of profits by branches to their foreign head offices.

Tax incentives. Reduced tax rates and other tax incentives (tax holidays) are available to new business enterprises that engage in certain activities, including tourism, land development, retail and wholesale.

The G20 and the Organisation for Economic Co-operation and Development (OECD) finalized work on the Base Erosion and Profit Shifting (BEPS) Project and published their report in October 2015. Based on a 15-point action plan issued in July 2013, the project has created uncertainty in the global tax

landscape as many countries have begun to make BEPS-driven changes to their tax laws and administrative practices. Changes in legislation and policy both locally and internationally due to BEPS have impacted the export facility, tax-exempt status and the e-zone facility, which are discussed below.

E-zone companies. Incentives are available under E-zone legislation. These incentives replaced the incentives that were previously available under the free-zone legislation. The E-zone legislation offers tax incentives to trading companies that are located in a designated location of an E-zone. In principle, the activities of these companies must be focused on trading with companies or persons located outside Curaçao or in the designated zone. Profits derived by E-zone companies from sales of goods to companies or individuals located in Curaçao may not exceed 25% of the total annual turnover. In general, E-zone companies are taxed at a rate of 2%. In principle, tax losses may be carried forward to offset taxable profits in the following 10 years. No turnover tax or import duties are imposed on the following:

- Goods entering the E-zone
- Products delivered by E-zone companies to individuals or companies that are not resident in Curaçao or to companies that are located in the E-zone
- The export of goods

Offshore companies. The offshore regime was abolished in 2001. However, under grandfathering rules, special incentives are available for qualifying offshore companies in existence before 1 January 2002. Offshore companies are resident companies owned by nonresidents that perform their business activities abroad; that is, they mostly earn foreign-source income. Income derived by offshore companies (for example, from royalty, financing, holding, portfolio investment, mutual fund, real estate and service activities) is taxed at corporate income tax rates of 2.4% to 3%. For trading and service companies, offshore status may result in the application of reduced effective rates. Capital gains on securities, loans, intellectual property and immovable property are exempt from corporate income tax. In addition, advance tax rulings can be obtained for determining the offshore tax status and method of calculating the tax base of offshore companies. Profits derived from real estate located outside Curaçao are exempt from corporate income tax. The offshore tax rates are guaranteed through 2019.

Curaçao Investment Companies. Curaçao Investment Companies (CICs) are exempt from Curaçao corporate income tax. Private and public limited liability companies incorporated under former Netherlands Antilles or current Curaçao laws may qualify as CICs. CICs are allowed to entirely or almost entirely (more than 90%) engage in the extending of loans, investing in securities and deposits, and developing and exploiting of intellectual and industrial property rights and similar property or user rights. The exploitation of intellectual property rights can in principle only benefit from the CIC regime to the extent that it concerns “qualifying intellectual property” and to the extent that the intellectual property was developed by the taxpayer in Curaçao or on behalf and for the account of the taxpayer in Curaçao (nexus approach). To qualify as a CIC, a company must submit a written

request to the Tax Inspector, and certain conditions must be satisfied. In addition, the company should have real presence (substance) in Curaçao. CICs are not eligible for benefits under the bilateral regulation for the avoidance of double taxation between the Netherlands and Curaçao, the Tax Regulation for the Kingdom of the Netherlands or any other double tax treaty of the former Netherlands Antilles or Curaçao. However, exchange-of-information provisions in the tax regulation, tax treaties and tax information exchange agreements apply to CICs. If a CIC loses its tax-exempt status, it is treated as a regularly taxed company subject to tax on its worldwide income, and it receives a tax-free step-up.

Foreign-source income exemption. As of July 2018, the Curaçao foreign-source income exemption provides a profit tax exemption for all profits derived from transactions with foreign parties. Companies have the choice as to whether they want to exempt their foreign-source results from taxation, and they may choose the amount exempted. Taxpayers that make use of this exemption are required to pay an annual fee. The specifics of this fee are to be provided by means of a Ministerial Decree that has not yet been published.

Taxed private foundations and trusts. The 2011 tax reform of the Curaçao corporate income tax legislation introduced the option for private foundations and trusts to be subject to a reduced effective corporate income tax rate of 10%. In principle, Curaçao private foundations and trusts are subject to a 0% corporate income tax rate if they do not conduct an enterprise. After the option is exercised, the reduced effective rate of 10% applies for a period of at least three full fiscal years. After this three-year period, the private foundation can request to discontinue being subject to the reduced effective rate of 10%.

Transparent companies. Curaçao public limited liability companies or private limited liability companies can opt for fiscal transparency for Curaçao corporate income tax and individual income tax purposes. To qualify as a transparent company, a written request must be filed and certain conditions must be satisfied. If fiscal transparency is elected, the limited liability company is treated for tax purposes as a partnership; that is, only the partners can be taxed in Curaçao on Curaçao sources of income. If a transparent company loses its transparent status, it is treated as a regularly taxed company subject to tax on its worldwide income. In addition, as of January 2015, rules were introduced regarding the valuation of assets and liabilities of a company that acquires or loses tax transparent status.

Ruling policy. Curaçao has an extensive advance tax ruling practice. These rulings include the following:

- Cost-plus (informal capital) rulings for intercompany activities
- Minimum gross margin rulings for finance activities
- Royalties and dividends (holding activities) rulings

These rulings are usually valid for a three-year period, with the option for extension every three years.

Other incentives. Curaçao also offers other incentives for specific activities, such as the international use of aircraft and ships and the insurance of risks outside Curaçao.

Capital gains. Under the current corporate income tax rules, in general, except for offshore companies, no distinction is made between the taxation of capital gains and the taxation of other income. All income is taxed at the applicable corporate tax rate (22%). Taxation of capital gains on qualifying share interests (participation exemption) is discussed in Section C.

Administration. The standard tax year is the calendar year. However, on request and under certain conditions, a company may use a different financial accounting year as its tax year.

Companies must file a provisional tax return within three months after the end of the financial year. In principle, this return must show a taxable profit that is at least equal to the taxable profit shown on the most recently filed final tax return. Any tax due must be paid at the time of filing of the provisional tax return. An extension of time to file the provisional return and pay the tax is not granted. On request of the company, the Tax Inspector may consent to the reporting of a lower taxable profit than the taxable profit shown on the most recently filed final tax return.

The final tax return must be filed within six months after the end of the financial year. Any difference between the tax due based on the provisional return and the tax due based on the final return must be settled at the time of the filing of the final return. An extension for filing the final tax return on a later date can be obtained.

To ensure compliance with the rules described above, penalties may be imposed. The tax authorities may impose arbitrary assessments if the taxpayer fails to file a tax return. Additional assessments, including a penalty, may be imposed if insufficient tax is levied. A penalty of up to 100% of the additional tax due may be imposed. Depending on the degree of fault, this penalty may vary from 25% to 100%.

In general, offshore companies must file their tax returns within six months following the end of the financial year. An extension of the due date for the filing can be obtained.

Dividends. Curaçao does not levy dividend withholding tax on dividend distributions.

Withholding taxes. Curaçao does not levy withholding taxes on dividends, interest or royalties.

Foreign tax relief. A 100% exemption from Curaçao corporate income tax is available for foreign business profits. For this purpose, foreign profits are profits earned in another country through a permanent establishment or a permanent representative in the other country, or profits earned from immovable property located in a foreign country, including the rights related to the property that is part of the business activities of the taxpayer but is deemed to be part of the foreign business. If foreign profits are derived from a business that can be considered a low-taxed portfolio investment, these foreign profits are taxed at an effective rate of 10%.

As of July 2018, all foreign-source profits may be exempt from corporate income tax (see *Foreign-source income exemption*).

C. Determination of taxable income

General. Taxable profit must be calculated in accordance with “sound business practices.”

All expenses incurred with respect to conducting a business are, in principle, deductible. However, if expenses exceed normal arm’s-length charges and are incurred directly or indirectly for the benefit of shareholders or related companies, the excess is considered to be a nondeductible profit distribution (dividend). In addition, certain expenses, such as fines, penalties and expenses incurred with respect to crimes, are not deductible. The costs of representation, including receptions, festive meetings and entertainment, excursions, and study trips (including the related costs of travel and accommodation), are no longer deductible. Only 80% of expenses incurred on food, beverages and goodies (for example, tobacco) is deductible. Costs of donations, promotional gifts, courses, conferences, seminars and symposiums are 100% deductible. However, travel expenses related to these items are 80% deductible.

In principle, interest expenses are deductible for tax purposes if the interest rate is determined on an arm’s-length basis. However, certain restrictions apply to the deduction of interest on loans connected to certain tax-driven transactions and intragroup reorganizations. Under thin-capitalization rules, the deductibility of interest accrued or paid directly or indirectly to an affiliated TEC may be restricted. As of 1 January 2015, the thin-capitalization rules were extended to loans received from nonresident TECs belonging to the same “concern” (“concern” is specifically defined in the tax law).

Participation exemption. In principle, a 100% participation exemption applies for all qualifying share interests held by Curaçao corporate taxpayers.

In general, a shareholding qualifies for the participation exemption if it represents at least 5% of the share capital or voting power in a company or if the amount paid for the shareholding amounts to at least USD500,000. In addition, any member of a cooperative association can apply for the participation exemption. Effective from 1 January 2015, the participation exemption was extended to participations in mutual funds that are considered to be special-purpose capital and to participations in nonresident mutual funds that are subject to profit tax in their country of residency.

For dividend income, additional requirements are imposed for a participation to be considered a qualifying participation. To apply the 100% exemption on dividends, either of the following conditions must be met:

- The qualifying participation is subject to a (nominal) profit tax rate of 10% (subject-to-tax clause).
- Dividends, interest or royalties received from sources other than the business of the participation do not account for 50% or more of the gross income of the participation (non-portfolio-investment clause).

These conditions may be met on a consolidated basis. If neither of the above conditions is met, a lower limited participation exemption applies to dividends. The limited participation

exemption was amended as of 1 January 2015. Instead of calculating an exemption on the reported income, a formula is used to calculate the income to be reported. The income to be reported is calculated using the following formula:

$$\text{Income} \times \frac{10}{T}$$

For purposes of the above formula, “T” represents the tax rate applicable for the year in which the income is reported. Consequently, an effective tax rate of 10% applies to non-qualifying participations.

The subject-to-tax clause and the non-portfolio-investment clause do not apply to the 100% participation exemption on capital gains and income received from participations that exclusively or almost exclusively hold immovable property.

Expenses that are connected with the participation, including financing expenses, are deductible if the expenses are directly or indirectly related to income that is taxable in Curacao.

Tax depreciation. In general, assets are depreciated using the straight-line method, with the residual value taken into consideration. The following are some of the applicable rates.

Asset	Rate (%)	Residual value (%)
Buildings	2 to 2.5	50
Office equipment	10 to 50	Nil
Motor vehicles	10 to 33	15
Plant and machinery	10	10

The rates listed above provide a general overview of the depreciation rates. The actual depreciation rate depends on the type of asset used by the company. The depreciation of buildings is limited. Buildings can be depreciated to 50% of the value of the building as stipulated in the assessment for the National Ordinance on Immovable Property Tax (Landsverordening onroerende zaakbelasting). For pre-owned buildings that have been depreciated by 1 January 2016 for less than three years, the limitation on the depreciation will become effective in the fourth year. For buildings that have already been depreciated to an amount that exceeds the aforementioned limit, no claw-back occurs. In such case, the depreciated value is respected.

An investment allowance deduction of 10% is granted for acquisitions of fixed assets exceeding approximately USD2,800. The allowance is deducted from taxable income in the year of the investment. The investment allowance deduction is recaptured in the year of sale if the asset is sold within 6 years (15 years for buildings) after the date of the investment. For investments in the maintenance and restorations of monuments listed in the Curaçao Monuments Ordinance, the allowance is increased to a one-time investment deduction of 25%.

Groups of companies. On written request, Curaçao resident companies may form a fiscal unity (tax-consolidated group) for corporate income tax purposes. To qualify for a fiscal unity, the parent company must own at least 99% of the shares in the subsidiary. A fiscal unity may include, among others, a company incorporated

under Dutch law that has its place of effective management in Curaçao. The whole group is taxed for corporate income tax purposes as if it were one company and, as a result, the subsidiaries in the fiscal unity are no longer individually subject to corporate income tax. The Tax Inspector must decide on the request within two months after the receipt of the request.

Advantages for corporate income tax purposes of fiscal unity treatment include the following:

- Losses of one subsidiary may be offset against profits of other members of the fiscal unity.
- Reorganizations, including movements of assets with hidden reserves from one company to another, have no direct tax consequences for corporate income tax purposes.
- Intercompany profits may be fully deferred.

The fiscal unity does not apply for turnover tax purposes.

Relief for losses. Losses in a financial year may be carried forward for 10 years. No carryback is available.

Losses incurred by certain companies during their first four years of business may be carried forward indefinitely. Losses incurred during the first six years by an entity that has the objective of engaging in business in the shipping or aviation industry may be carried forward indefinitely. Companies under the Curaçao offshore tax regime may carry forward tax losses for five years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Turnover tax in Curaçao; a general consumption tax on goods delivered, imports, and services rendered by entrepreneurs (legal entities or individuals) in Curaçao and services rendered in Curaçao by foreign entrepreneurs; primary life goods and certain imports are exempt	
Standard rate	6
Insurance	7
Hotel accommodation	7
Specific goods and services listed as luxurious or unhealthy	9
Real estate transfer tax	4
Import duties	0 to 62

E. Miscellaneous matters

Foreign-exchange controls. The currency in Curaçao is the Antillean guilder (ANG).

For foreign investors that obtain a foreign-exchange license from the Central Bank of Curaçao and Sint Maarten, no restrictions are imposed on the movement of funds into and out of Curaçao and Sint Maarten. In general, the Central Bank automatically grants foreign-exchange licenses for remittances abroad. Residents are subject to several foreign-exchange regulations imposed by the Central Bank. However, residents may be granted nonresident status for foreign-exchange control purposes. Some reporting requirements exist for statistical purposes.

Transfer pricing. In general, intercompany charges should be determined on an arm's-length basis. Entities must keep transfer-pricing documentation on file that shows how the intercompany conditions were agreed upon and whether these conditions are at arm's length.

Companies with a consolidated group turnover exceeding ANG1.5 billion (approximately USD842,000) are subject to Country-by-Country Reporting legislation and are required to have Master File and Local File documentation in their administration.

F. Tax treaties

Provisions for double tax relief are contained in the tax treaty with Norway and in the Tax Regulation for the Kingdom of the Netherlands (consisting of Aruba, Curaçao, the Netherlands and Sint Maarten). The Tax Regulation for the Kingdom of the Netherlands applied between Curaçao and the Netherlands up to 31 December 2015. From 1 January 2016, the Tax Regulation for the Kingdom of the Netherlands applies only between Curaçao and Aruba and Sint Maarten until these jurisdictions negotiate and sign another agreement with Curaçao.

In June 2014, Curaçao and the Netherlands entered into a new bilateral regulation for the avoidance of double taxation. This tax arrangement, which essentially functions as a tax treaty, was approved by the Dutch parliament and was formally published on 9 October 2015. It took effect as of January 2016. The tax arrangement includes, among other measures, a 0% Dutch dividend withholding tax rate that applies under certain conditions. Under a temporary provision, which applies until 31 December 2019, a 5% Dutch dividend withholding tax rate applies to distributions to companies in Curaçao that do not meet the criteria for 0% withholding under the new rules. Curaçao does not impose withholding tax on payments from Curaçao to residents of other countries.

The former Netherlands Antilles has entered into tax information exchange agreements with Antigua and Barbuda, Australia, Bermuda, British Virgin Islands, Canada, Cayman Islands, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Italy, Mexico, New Zealand, St. Lucia, St. Vincent and the Grenadines, Spain, Sweden, the United Kingdom and the United States. As a result of the constitutional reform of the Kingdom of the Netherlands, the tax treaties entered into by the Netherlands Antilles became automatically applicable to the surviving countries, which are the legal successors of the Netherlands Antilles.

Curaçao has negotiated tax treaties with Jamaica and Malta, which have not yet been ratified by the Curaçao government. Curaçao is also negotiating several double tax treaties and additional tax information exchange agreements.

An intergovernmental agreement between Curacao and the United States implementing the US Foreign Account Tax Compliance Act (FATCA) entered into force as of 3 August 2016. Financial institutions in Curaçao must file the required FATCA reporting through a portal set up by the Curaçao government.

Under the latest published OECD list, Curaçao qualifies as a white-listed jurisdiction.

Curaçao signed the multilateral agreement on automatic exchange of information and will begin the exchange of information based on the Common Reporting Standard in 2017.

The Kingdom of the Netherlands has entered into many bilateral investment treaties that also apply to Curaçao.

Curaçao also signed the OECD Convention on Mutual Administrative Assistance in Tax Matters.

A. At a glance

Corporate Income Tax Rate (%)	12.5
Capital Gains Tax Rate (%)	20
Branch Tax Rate (%)	12.5
Withholding Tax (%)	
Dividends	0 (a)
Interest	0 (b)
Royalties from Patents, Know-how, etc.	0/5/10 (c)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) A Special Contribution to the Defence Fund (Defence Tax) at a rate of 17% is withheld from dividends paid to resident and domiciled individuals.
- (b) A Special Contribution to the Defence Fund at a rate of 30% is withheld from interest paid to resident companies and resident and domiciled individuals, if the interest is not considered to arise in the ordinary course of their business or to be closely connected to their ordinary course of business.
- (c) Cyprus levies withholding tax on payments made to nonresident persons who do not carry on any business in Cyprus at a rate of 10% on technical assistance payments and on the gross amount of royalty payments that are connected with the economic utilization of intellectual property rights in Cyprus. A 5% rate applies to royalties paid with respect to films and television. A 5% withholding tax is also imposed on payments made to nonresident persons in consideration for services performed in Cyprus with respect to activities connected with the exploration or exploitation of the seabed or subsoil or their natural resources or with respect to activities relating to the installation and exploitation of pipelines and other installations on the subsoil, seabed or sea surface, if such payments are not connected with a permanent establishment in Cyprus. Withholding tax may be reduced or eliminated on the basis of the European Union (EU) Interest and Royalty Directive and/or on the basis of a double tax treaty.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Cyprus are subject to income tax on their worldwide income. A company is resident in Cyprus if its control and management are exercised in Cyprus. Nonresident companies are taxed only on income derived from a permanent establishment in Cyprus and on rental income from property located in Cyprus.

Rate of corporate tax. The standard rate of corporate income tax is 12.5%.

Capital gains. A capital gains tax of 20% is levied on gains derived from the disposal of the following:

- Immovable property located in Cyprus
- Shares in companies whose assets include, among others, immovable property located in Cyprus
- Shares in companies that participate (either directly or indirectly) in a company or companies that own immovable property located in Cyprus and at least 50% of the market value of such shares is derived from the relevant property

The disposal of shares of companies listed on a recognized stock exchange is exempt from capital gains tax. In addition, no capital gains tax is imposed if the transfer is made in the course of a qualifying company reorganization.

The gain subject to tax in Cyprus equals the disposal proceeds less the greater of the cost or market value on 1 January 1980, adjusted for inflation. Inflation is calculated using the official

Retail Price Index. In the case of disposal of shares of companies that directly or indirectly hold property in Cyprus, the disposal proceeds subject to capital gains are restricted to the market value of the immovable property held directly or indirectly by the company whose shares are sold.

Gains from the disposal of immovable property that consists of land or land and buildings is exempt from capital gains tax if the property is acquired between 16 July 2015 and 31 December 2016 from an independent third party and not through an exchange of property or through a donation or gift.

Administration. The tax year in Cyprus is the same as the calendar year. Income tax is payable by 31 August following the end of the relevant tax year. However, an estimate of tax due is made by 31 July during the tax year and provisional tax is payable in two equal installments by 31 July and 31 December. The two provisional payments can be made by 31 August and 31 January without the imposition of interest or penalties.

Overdue tax is subject to interest (currently at the rate of 3.5% per year) on the basis of complete months. In addition, a flat 5% penalty is imposed on the tax due in the event of a failure to pay the tax by the due date. As of 14 July 2017, this penalty is doubled if the outstanding tax is not paid within two months from the due date.

Dividends. Dividends paid to nonresident persons are not subject to withholding tax.

A 17% Special Contribution to the Defence Fund (Defence Tax) is withheld from dividends paid to resident and domiciled individuals. This is a final tax. Also, see Section D.

A Cypriot tax resident company is deemed to have distributed as dividends 70% of its after-tax accounting profits (subject to certain adjustments) two years after the end of the relevant tax year (for example, the deemed distribution date for the 2017 tax year is 31 December 2019). The amount of the deemed dividend is reduced by any actual dividend distributions made up to the deemed distribution date relating to the year whose profits are subject to deemed distribution. The Special Contribution to the Defence Fund is withheld only on the proportion of profits that is attributable to shareholders considered to be residents of Cyprus (individuals and bodies of persons).

The deemed distribution rules do not apply to profits that are directly or indirectly attributable to shareholders that are non-residents of Cyprus and to individual shareholders that are Cypriot tax residents but do not have a domicile in Cyprus.

Non-domicile rule. A Cypriot tax resident individual who is not domiciled in Cyprus is effectively not subject to the Special Contribution to the Defence Fund in Cyprus on interest, rents or dividends regardless of whether such income is derived from sources within Cyprus and regardless of whether such income is remitted to a bank account or economically used in Cyprus (see *Dividends* and Section D). This rule took effect on 16 July 2015.

Foreign tax relief. Foreign tax on profits and gains of Cypriot resident persons is credited against the tax payable in Cyprus on

the same profits or gains (pooling of credits is generally not allowed). Such foreign tax relief cannot exceed Cyprus tax payable on the same profits or gains. Any unused foreign tax relief cannot be carried forward.

C. Determination of trading income

General. The determination of taxable income is based on accounts prepared in accordance with generally accepted accounting principles, subject to certain adjustments and provisions of the tax law. Expenses must be incurred wholly and exclusively for the production of income and must be supported by relevant evidence.

Inventories. Inventory is generally valued at the lower of cost or net realizable value. The cost must be determined under the first-in, first-out method and/or the weighted average cost formula. The last-in, first-out method is not acceptable.

Depreciation and amortization allowances

Plant and machinery. A straight-line allowance of 10% a year is given on capital expenditures for plant and machinery. For machinery and plant acquired during the period of 2012 through 2018, a deduction for wear and tear at 20% per year is allowed.

Industrial buildings. A straight-line allowance of 4% a year is available for industrial buildings. For industrial and hotel buildings acquired during the period of 2012 through 2018, a deduction for wear and tear at 7% is allowed.

Commercial buildings. A straight-line allowance of 3% a year is allowed for commercial buildings.

Office equipment. A straight-line allowance of 20% a year is allowed for computers. Other office equipment is depreciated under the straight-line method at an annual rate of 10%. For other office equipment acquired during the period of 2012 through 2018, a deduction for wear and tear at a rate of 20% per year is allowed.

Motor vehicles. In general, a straight-line allowance of 20% a year is allowed for motor vehicles (except for private saloon cars for which no tax depreciation is available).

Sales of depreciable assets. On the disposal of an asset, if the sale proceeds are less than the remaining depreciable base, a further allowance (balancing deduction) equal to the amount of the difference is granted. If the sale proceeds exceed the depreciable base, the excess (up to the amount of allowances claimed) is included in taxable income (balancing addition).

Taxation of intangible assets

New Intellectual Property Box regime. The provisions of the Intellectual Property (IP) Box regime have been aligned with the recommendations of the Organisation for Economic Co-operation and Development (OECD) Action 5 of the Base Erosion and Profit Shifting (BEPS) Plan on Countering Harmful Tax Practices More Effectively, Taking into Account Transparency and Substance. The new legislation took effect on 1 July 2016.

The new IP Box regime is based on the OECD-recommended nexus approach. This approach limits application of the IP Box

regime if research and development (R&D) is being outsourced to related parties. The approach links the benefits of the regime with the R&D expenses incurred by the taxpayer. Under the new IP Box regime, qualifying taxpayers can claim a tax deduction equal to 80% of qualifying profits resulting from the business use of the qualifying assets. A taxpayer may elect not to claim the deduction or only claim a part of it. The following is the calculation for qualifying profits:

$$\frac{\text{Qualifying expenditure} + \text{Uplift expenditure}}{\text{Overall expenditure}} \times \text{Overall income}$$

The cost of the acquisition or development of intangible assets of a capital nature is amortized in a reasonable manner over its useful economic life, which is determined based on accounting standards, with a maximum period of 20 years.

Old IP Box regime. The old IP Box regime has been grandfathered for a five-year transitional period beginning on 1 July 2016 and ending on 30 June 2021, provided certain conditions are satisfied. The grandfathered IP assets continue to generate the full tax benefits of the existing IP Box regime until 30 June 2021, without the need to apply the nexus ratio shown above.

In general, no new entrants are permitted into the existing regime after 2 January 2016. However, certain exceptions allow entrance to the existing regime if the IP asset was acquired before 30 June 2016 and if certain other conditions are met.

Under the old IP Box regime, a deemed deduction of 80% is applied to net income and gains derived from patents, copyrights and trademarks, as defined in the relevant Cypriot laws. The cost of the acquisition or development of intangible assets of a capital nature is amortized equally over a five-year period.

Relief for losses. Effective from 1 January 2012, losses can be carried forward to the following five years. Loss carrybacks are not allowed.

Groups of companies. Group loss relief for losses incurred in the income year is allowed between resident group companies that meet certain conditions.

Effective from 1 January 2015, the group loss relief provisions are extended to cases in which the surrendering company is registered in and is a tax resident of another EU member state, provided that it has exhausted all possibilities available for using the losses in its respective country of tax residency or in the country where its intermediary holding company has its seat. In such circumstances, the tax losses are calculated based on the provisions of the Cypriot tax laws.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on any supply of goods or services, other than an exempt supply, made in Cyprus by a taxable person (taxable if annual supplies exceed EUR15,600) in the course of business	0/5/9/19

Nature of tax	Rate (%)
Payroll taxes	
Social insurance contribution, levied on each employee's gross salary, up to EUR4,533 a month; payable by both employer and employee	8.3
Employer's contribution to the National Health System (as of 1 March 2019); rate increases to 2.90% as of 1 March 2020; contributions are capped to yearly emoluments of EUR180,000	1.85
Special Cohesion Fund, levied on gross salary; payable by employer	2
Human Resource Development Authority and Redundancy Fund, levied on gross salary, up to EUR4,533 a month; paid by employer	1.7
Leave Fund, levied on gross salary, up to EUR4,533 a month; paid by employer in lieu of holiday pay (employer may obtain exemption from contribution to this fund)	8
Special Contribution to the Defence Fund (Defence Tax)	
On rents received (after allowing for a 25% deduction)	3
On interest received (except for interest earned in the ordinary course of business)	30
On dividends received (or deemed to be received) by resident and domiciled individuals	17

E. Miscellaneous matters

Foreign-exchange controls. Cyprus does not impose foreign-exchange controls.

Transfer pricing. The arm's-length principle is codified in the Cyprus tax law with language similar to that of Article 9 of the OECD Model Tax Convention. Consequently, all transactions entered into with related and/or connected parties must be concluded on an arm's-length basis; otherwise, the tax authorities have the statutory right to make adjustments to taxable income. Therefore, the arm's-length price must be applied on transactions between related parties in their commercial or financial relations. However, Cyprus does not have specific rules regarding transfer pricing or transfer-pricing documentation requirements (apart from loans financed out of debt as detailed below).

On 30 June 2017, the Cyprus Tax Department issued a circular establishing transfer-pricing documentation requirements and rules for Cypriot enterprises entering into back-to-back financing transactions with affiliated and connected parties (loans that are financed by debt). The circular provides guidance on the application of the arm's-length principle according to the OECD Transfer Pricing Guidelines. A transfer-pricing comparability analysis should be prepared by relevant taxpayers to determine their functional profile and to document whether the agreed remuneration (the net interest margin) complies with the arm's-length principle. In addition, certain simplification measures apply to companies whose functional profile is similar to regulated financing and treasury enterprises and to entities engaged in pure intermediary activities.

Broader transfer-pricing legislation is expected to be introduced, effective from 1 January 2019. The new transfer-pricing rules and documentation requirements are expected to be in line with the recommendations of BEPS Action 13 and are expected to include Local and Master File requirements.

EU Anti-Tax Avoidance Directive. The Cypriot tax laws are amended to incorporate the relevant provisions of the EU Anti-Tax Avoidance Directive. The following are the amendments.

- A broadly worded general anti-avoidance rule in line with the wording used in the directive.
- Interest limitation rules that restrict the tax deductibility of borrowing costs exceeding 30% of the tax-adjusted earnings before interest, taxes, depreciation and amortization (EBITDA). The interest limitation rules are applied at a Cypriot group level.
- Controlled foreign corporation (CFC) rules that are based on the significant people functions and the arm's-length principle.

Mergers and demergers. Exemptions are available for profits or gains arising as part of a qualifying company reorganization. However, the law includes general anti-abuse provisions that aim to ensure that the exemptions are available to bona fide company reorganizations. The exemptions also extend to stamp duty and land transfer fees.

F. Treaty withholding tax rates

As noted in Section A, Cyprus does not impose outbound withholding taxes on dividend and interest payments made to non-Cypriot tax resident persons.

- (a) The rate is 10% for dividends paid to a company holding directly at least 25% of the capital of the payer. The rate is 5% if the recipient of the dividends has invested at least EUR200,000 in the share capital of the payer.
- (b) The rate is 0% for interest paid to the government of the other contracting state.
- (c) The rate is 0% for royalties paid for literary, artistic or scientific works, as well as for film and television royalties.
- (d) The lower rate applies to dividends paid to a company holding directly at least 25% of the capital of the payer.
- (e) The rate is 0% for interest paid to the government of the other contracting state and for interest paid on bank loans or with respect to credit sales of industrial, commercial or scientific equipment or merchandise.
- (f) The rate is 10% for dividends paid to a company holding directly at least 10% of the share capital of the payer.
- (g) Cyprus and the United Kingdom entered into a new treaty during 2018. Under the new treaty, the 0% rate applies to dividends paid by a company that is a resident of a contracting state to the beneficial owner who is a resident of the other contracting state. The 15% rate applies to dividends paid out of

- income (including gains) derived directly or indirectly from immovable property by an investment vehicle that distributes most of this income annually and whose income from such immovable property is exempt from tax.
- (h) The rate is 5% for dividends paid to a company holding directly at least 25% of the share capital of the payer.
 - (i) The rate is 0% for interest paid to a government, bank or financial institution.
 - (j) The 0% rate applies if the beneficial owner is a company (other than a partnership) holding at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases.
 - (k) The rate is reduced to 5% if the recipient has invested at least EUR100,000 in the share capital of the payer.
 - (l) The 5% rate applies if the beneficial owner is a company (other than a partnership) holding at least 10% of the voting power of the capital of the company paying the dividends. The 15% rate applies in all other cases.
 - (m) The 5% rate applies if the recipient of the dividends is a direct beneficial owner of at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
 - (n) The rate is 10% for royalties paid for literary, artistic or scientific works, or for films or television. The rate is 15% for payments for the use of industrial, commercial or scientific equipment.
 - (o) The rate is 7% for interest paid to banks and financial institutions.
 - (p) The 0% rate applies to interest paid to the government. The 10% rate applies to interest paid to banks. The 15% rate applies in other cases.
 - (q) The rate is 5% for royalties paid for literary, artistic or scientific works, or for film or television. The rate is 10% for payments for the use of industrial, commercial or scientific equipment.
 - (r) The rate is 0% for royalties paid for literary, dramatic, musical or artistic works.
 - (s) The 15% rate is the general withholding tax rate. However, the 0% rate applies, among other conditions, if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends and if such holding has been maintained for an uninterrupted period of at least 12 months.
 - (s) The 0% rate applies if any of the following circumstances exists:
 - The beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends if such holding has been maintained for an uninterrupted period of at least 12 months.
 - The beneficial owner of the dividends is the other contracting state, the central bank of the other contracting state or a national agency or other agency (including a financial institution) owned or controlled by the government of the other contracting state.
 - The beneficial owner of the dividends is a pension fund or similar institution providing pension schemes in which individuals may participate to secure retirement benefits if such pension fund or similar institution is established, recognized for tax purposes and controlled in accordance with the laws of the other contracting state. The 15% rate applies to other dividends.
 - (t) A 5% rate applies to royalties paid with respect to films and television. A 10% rate applies to other royalties if the asset for which the royalties are paid is used in Cyprus.
 - (u) A 5% rate applies if the beneficial owner of the dividends has invested in the capital of the payer company less than the equivalent of EUR150,000 at the time of the investment.
 - (v) A 0% rate applies if the interest is paid to the government, a local authority or a central bank.
 - (w) The 5% rate applies if the dividend recipient holds at least 20% of the capital of the dividend paying company or has invested at least EUR100,000 in such company. The 15% rate applies in all other cases.
 - (x) The 5% rate applies to royalties paid with respect to copyrights of scientific works, patents, trademarks, secret formulas or processes, or information concerning industrial or commercial experience. The 10% rate applies to other royalties, particularly for literary works, music works, films and software.
 - (y) The 0% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends and if such holding is maintained for an uninterrupted period of at least one year. The 5% rate applies in all other cases.
 - (z) The treaty between Cyprus and the USSR still applies.
 - (aa) The treaty between Cyprus and the Socialist Republic of Yugoslavia still applies.
 - (bb) The treaty between Cyprus and Czechoslovakia still applies.

- (cc) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the capital of the company paying the dividends for a continuous period of at least 24 months.
- (dd) The withholding tax rate on dividends is 5% if the beneficial owner of the dividend is a company (other than a partnership) that holds at least 10% of the dividend paying company. In all other cases, the rate is 10%.
- (ee) The 0% rate applies if the recipient of the income is a qualifying pension fund, the government of the other state or a company that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of at least one year. In all other cases, the rate is 15%.
- (ff) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% applies in all other cases.
- (gg) The 0% rate applies if the interest is paid to ministries, other governmental institutions, municipalities, the central bank and other banks wholly owned by the other contracting state.
- (hh) The 0% rate applies to the following:
- Interest paid to the other contracting state, a political subdivision or a local authority of that state, the national bank of that state, or any institution the capital of which is wholly owned by that state or the political subdivisions or local authorities of that state
 - Interest on deposits (not represented by bearer instruments) with a banking enterprise
- (ii) The 0% rate applies to interest arising in a contracting state and paid to or guaranteed by the government of the other contracting state or a statutory body thereof, or to the national bank of that other state.
- (jj) The 5% rate applies to the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to the gross amount of dividends in all other cases.
- (kk) The 0% rate applies to the gross amount of the dividends if the beneficial owner is a company (other than a partnership). The 10% rate applies to the gross amount of the dividends in all other cases.
- (ll) The rate is 0% for the gross amount of interest paid by a company that is a resident of a contracting state to a company (other than a partnership) that is a resident of the other contracting state and is the beneficial owner of the interest. The 10% rate applies to the gross amount of the interest in all other cases.
- (mm) The rate is 0% for the gross amount of the royalties paid by a company that is a resident of a contracting state to a company (other than a partnership) that is a resident of the other contracting state and is the beneficial owner of the royalties. The 5% rate applies to the gross amount of the royalties in all other cases.
- (nn) If dividends are paid by a company that is a resident of Cyprus to a resident of Malta that is the beneficial owner of the dividends, the Cyprus tax may not exceed 15% of the gross amount of the dividends. If the dividends are paid by a company resident of Malta to a resident of Cyprus that is the beneficial owner of the dividends, the Maltese tax shall not exceed the tax chargeable on the profits out of which the dividends are paid.
- (oo) The 0% rate applies to the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to the gross amount of the dividends in all other cases.
- (pp) The 15% rate applies to the gross amount of the dividends. The 5% rate applies if certain conditions are met.

Cyprus has signed new treaties with Andorra and Saudi Arabia, which have not yet been ratified.

At the time of writing, a bill implementing Council Directive (EU) 2016/1164 of 12 July 2016, as amended by the Council Directive (EU) 2017/952 of 29 May 2017 (referred to as the Anti-Tax Avoidance Directive, or ATAD) was still in the legislative process in the lower chamber of the Czech parliament.

The amendment is to implement the following measures:

- Interest deductibility limitation
- Exit taxation
- Controlled foreign company (CFC) rules
- Anti-hybrid rules
- General anti-abuse rule

The legislative process was not finished as of the end of 2018; the bill will likely be approved and come into effect in the first half of 2019. This chapter briefly addresses the above measures based on the draft wording of the amendment as of the end of 2018. Under the proposed transitory provisions, the new interest deductibility limitation and CFC rules apply to tax periods beginning on or after the effective date of the amendment, while the exit taxation and anti-hybrid rules apply to tax periods beginning on or after 1 January 2020.

Readers should obtain updated information about the above bill before taking any actions.

A. At a glance

Corporate Income Tax Rate (%)	19 (a)
Capital Gains Tax Rate (%)	0/19 (b)
Branch Tax Rate (%)	19
Withholding Tax (%)	
Dividends	0/15/35 (c)(d)(e)
Interest	0/15/35 (c)(e)(f)(g)
Royalties	0/15/35 (c)(e)(g)(h)
Rental Income from Leases	5/15/35 (c)(e)(g)(i)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) Basic investment funds (see Section B) are subject to tax at a rate of 5%. A 0% rate applies to pension funds.
- (b) Capital gains derived by Czech or EU/European Economic Area (EEA) parent companies (as defined in the Czech tax law) on transfers of shares in their subsidiaries are exempt from tax if certain conditions are satisfied (see Section B).
- (c) The rates may be reduced by applicable tax treaties.
- (d) Dividends are subject to a final withholding tax at a rate of 15%. Under the principles of the EU Parent-Subsidiary Directive (No. 2011/96/EU), dividends paid by Czech companies to parent companies (as defined in the directive and Czech law) located in EU/European Free Trade Association (EFTA) countries are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year (further conditions apply). Dividend distributions between two Czech companies or between foreign subsidiaries and their Czech parents are exempt from tax under similar conditions. The tax exemption does not apply if any of the following circumstances exist (further conditions may apply):
- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.
 - The parent or subsidiary may opt for an exemption (or a similar relief) from corporate income tax or similar tax applicable in its jurisdiction.
 - The parent or subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.
 - The subsidiary treats the dividend payments as tax deductible.
- (e) The 35% withholding tax generally applies to Czech-source income arising to Czech tax nonresidents from countries outside the EU/EEA that have not entered into a double tax treaty with the Czech Republic or a bilateral or multilateral tax information exchange agreement that is binding on both the Czech Republic and the respective foreign country. The 35% withholding tax rate also applies if the Czech income payer is unable to prove the tax residency status of the respective beneficial income owner. If applicable, the 35% rate affects all types of income subject to withholding tax (for example, dividends, interest, royalties or rental income). It does not affect rental income from financial leases if the 5% withholding tax rate applies (see footnote [i]).
- (f) Interest payments to nonresidents are subject to withholding tax at a rate of 15%. Under the principles of the EU Directive 2003/49/EC, interest paid by Czech companies to related companies (as defined in the directive) located in EU/EFTA countries is exempt from withholding tax if certain additional conditions are met.
- (g) For certain types of income, EU/EEA tax residents may choose to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the

- withholding tax paid against tax liability stated in the tax return) or they may choose to treat the withholding tax as a final tax on the income.
- (h) This withholding tax applies to nonresidents. Under the principles of EU Directive 2003/49/EC, royalties paid by Czech companies to companies located in EU/EFTA countries are exempt from tax if certain additional conditions are met.
 - (i) A 5% withholding tax is imposed on gross rent if the lease contract stipulates that the lessee takes over the ownership of the leased asset (tangible asset only) for a purchase price or for free at the end of the lease term or if the lease contract stipulates such a right or option for the lessee (further conditions may apply). Other rental payments are subject to a 15% withholding tax. Some rental payments may be considered royalties for Czech tax purposes.

B. Taxes on corporate income and gains

Corporate income tax. Resident enterprises are subject to tax on their worldwide income. An enterprise is considered to be a resident enterprise if it is incorporated in the Czech Republic or if its management is located there. Nonresident enterprises are subject to income tax on their Czech-source income only.

Rates of corporate tax. The standard corporate income tax rate for Czech enterprises and branches of foreign enterprises is 19%. Basic investment funds are subject to a preferential tax rate of 5%. Under the Czech Income Taxes Act, the following are considered basic investment funds:

- An investment fund whose shares are accepted for trading on a European regulated market if it satisfies both of the following conditions:
 - No corporate income taxpayer (other than the state, the central bank or specified international institutions) owns shares representing 10% or more of the share capital of the investment fund. Shares owned by related parties are considered shares owned by a single taxpayer for purposes of this condition.
 - The investment fund does not have a trade license based on the Czech Act on Trades.
- Mutual fund
- Investment fund and subfund of a joint stock company with variable registered capital if it invests (in line with its prospectus) more than 90% of its assets in prescribed instruments (for example, certain securities, money market instruments, financial derivatives, receivables and loans)
- A foreign investment fund comparable to funds as described in the above three bullets if it satisfies all of the following conditions:
 - Its home country is an EU/EEA member state.
 - It can prove that it is administered or managed based on an authorization comparable to the authorization issued by the Czech National Bank and its administrator or manager is subject to supervision comparable to the Czech National Bank's supervision.
 - It has statutes or a document comparable to a prospectus based on which it can be determined whether the fund is comparable to a fund described in the above three bullets.
 - It can prove that according to the laws of its home country none of its income is attributable to other persons (meaning it is not tax transparent).

A preferential corporate income tax rate of 0% applies to pension funds.

No differences exist between the taxation of 100% Czech-owned enterprises and those with foreign investment.

Investment incentives. Investment incentives are available to investors launching or expanding the following:

- Manufacturing production
- Technology centers
- Business support services centers, which are shared-services centers, software-development centers, high-technology repair centers, data centers and call centers

Investment incentives can be obtained in the following forms:

- Corporate income tax relief for 10 years
- Job-creation grants
- Grants for training and retraining of employees
- Cash grants on capital expenditures for strategic investments
- Real estate tax exemption

The total value of the incentives can be as much as 25% of total eligible costs. No incentives are provided in Prague. The cap is increased by 10% for mid-sized enterprises and 20% for small enterprises. The cap applies to the total of tax relief, job-creation grants, cash grants on capital expenditures and real estate tax exemption. Training and retraining grants are provided on top of this cap.

For investments in manufacturing industry, eligible costs equal the value of long-term tangible and intangible assets. For investments in technology centers and business support services centers, eligible costs can be either the value of long-term tangible and intangible assets or the value of employment costs for two years.

Corporate income tax relief and cash grants on capital expenditures are offered throughout the entire Czech Republic with the exception of Prague. Job-creation grants, training and retraining grants are offered only in regions with high unemployment. Job-creation grants are also available in special industrial zones. Real estate tax exemption is offered only in special industrial zones. The special industrial zones are Holešov, Most-Joseph and Ostrava-Mošnov.

An amendment to the Investment Incentives Act is expected to enter into force in 2019. It will implement new rules and modify the system for providing support in the Czech Republic. Specifically, the new system will favor projects involving technology centers and business support services centers. For manufacturing projects, there will be stricter conditions for providing investment incentives, mainly in the form of testing for higher added value (for example, through evaluating the level of employees' wages or the existence of activity in research and development).

Further details regarding the incentives are provided below.

Manufacturing industry. The following are general qualification conditions for the incentives for manufacturing industry:

- The investor must invest at least CZK100 million in long-term tangible and intangible assets. The CZK100 million requirement may be reduced to CZK50 million in selected regions.

- The investment must be in a manufacturing sector, and at least 50% of the total investment must be invested in qualifying production machinery. Machinery must be acquired for an arm's-length price. It must have been produced no more than two years before the acquisition and must not have been previously subject to tax depreciation.
- Intangible assets must be acquired from unrelated third parties for arm's-length prices.
- The proposed production must meet Czech environmental standards.
- At least 20 new jobs must be created.
- All requirements must be met within three years after the date of granting the incentives.
- The investment project may not begin until the filing of an application with CzechInvest (the Czech governmental agency collecting, reviewing and processing investment incentives applications).
- The investor cannot relocate the same or a similar activity in the EEA within the period starting two years preceding the application and ending two years after the completion of the investment project.
- Acquired assets and created jobs must be maintained for the duration of the incentives-utilization period (10 years) and for at least 5 years from the completion of the investment project or creation of the first job.

Technology centers. The following are general qualification conditions for the incentives for technology centers:

- The investor must invest at least CZK10 million in long-term tangible and intangible assets.
- At least 50% of the total investment must be invested in qualifying machinery. Machinery must be acquired for an arm's-length price, must be produced no more than two years before the acquisition and must not have been previously subject to tax depreciation.
- At least 20 new jobs must be created.
- The proposed investment must meet Czech environmental standards.
- All requirements must be met within three years after the date of granting the incentives.
- The investment project may not begin until the filing of an application with CzechInvest.
- The investor cannot relocate the same or a similar activity in the EEA within the period starting two years preceding the application and ending two years after the completion of the investment project.
- Acquired assets and created jobs must be maintained for the duration of the incentives-utilization period (10 years) and for at least 5 years from the completion of the investment project or creation of the first job.

Business support services centers. The following are general qualification conditions for the incentives for business support services centers:

- The minimum number of newly created jobs is 20 for software-development centers and data centers, 70 for shared-services centers and high-technology repair centers, and 500 for call centers.

- The proposed investment must meet Czech environmental standards.
- All requirements must be met within three years after the date of granting the incentives.
- The investment project may not begin until the filing of an application with CzechInvest.
- The investor cannot relocate the same or a similar activity in the EEA within the period starting two years preceding the application and ending two years after the completion of the investment project.
- Acquired assets and created jobs must be maintained for the duration of the incentives-utilization period (10 years) and for at least 5 years from the completion of the investment project or creation of the first job.

Strategic investment. Cash grants on capital expenditures for strategic investments can be provided for up to 10% of eligible costs. Strategic investment can be either investment in manufacturing industry or technology centers meeting specific conditions.

For investments in manufacturing industry and technology centers that are carried out simultaneously, cash grants on capital expenditures can be provided for up to 12.5% of the eligible costs.

Strategic investment in manufacturing industry must meet the following conditions:

- The investor must invest at least CZK500 million in long-term tangible and intangible assets.
- At least CZK250 million of the total investment must be invested in qualifying production machinery.
- At least 500 new jobs must be created.

Strategic investment in the area of technology centers must meet the following conditions:

- The investor must invest at least CZK200 million in long-term tangible and intangible assets.
- At least CZK100 million of the total investment must be invested in qualifying machinery.
- At least 100 new jobs must be created.

Special conditions. In addition to the general conditions listed above, investors claiming the income tax relief must satisfy certain special conditions, including, among others, the following:

- They must reduce their tax base by claiming maximum tax depreciation, deducting all available tax-effective bad debt provisions and using all available tax losses carried forward, in accordance with the tax law.
- They must be the first user of tangible assets (excluding real estate) that are acquired for the purposes of the investment in the Czech Republic.
- They may not cease to exist, terminate their activities or declare bankruptcy.
- They may not increase their tax base through related-party transactions that are not at arm's length.

Mergers are allowed to some extent; that is, tax relief claimed before the merger is not lost, but investors are not able to claim tax relief in subsequent tax periods.

Specific conditions apply to job-creation, retraining and training grants and to grants on capital expenditures for strategic investments.

The incentives are provided based on the Investment Incentives Act. In practice, the government grants the incentives if the conditions are satisfied.

Capital gains. In the Czech Republic, realized and unrealized capital gains are recognized.

Capital gains realized by a Czech or another EU/EEA parent company (also, see below) on the transfer of shares in a subsidiary established in the Czech Republic or another EU/EEA country are exempt from tax if the parent company maintains a holding of at least 10% of the subsidiary for an uninterrupted period of at least one year (further conditions apply).

Capital gains realized by a Czech or EU/EEA parent company on the transfer of shares in a subsidiary in a contracting country (that is, a third country that has entered into a tax treaty with the Czech Republic) are also exempt from tax if the following conditions are satisfied:

- The subsidiary has a legal form comparable to Czech legal forms listed in the Czech tax law.
- The parent company has held an ownership interest of at least 10% in the subsidiary for at least one year (this condition may be fulfilled subsequent to the date of the transfer).
- The subsidiary is liable to a tax similar to corporate income tax at a rate of at least 12% in the tax period in which the parent company accounts for the respective capital gain and in the preceding tax period.

The exemption for capital gains does not apply if any of the following circumstances exists:

- The subsidiary entered liquidation proceedings.
- The shares in the subsidiary were acquired through the acquisition of a going concern.
- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.
- The parent company or the subsidiary may opt for an exemption (or a similar relief) from corporate income tax or similar tax applicable in its jurisdiction.
- The parent company or the subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.

Other realized capital gains are included with other taxable income and taxed at the regular corporate income tax rate. Capital losses on certain assets may be deducted from ordinary income, while capital losses on other assets (including capital losses on assets that qualify for exemption) are not deductible, even from other capital gains.

Unrealized capital gains and losses, which result from revaluation to fair value, are taxable or deductible only with respect to certain assets. Unrealized gains on shares that qualify for exemption are not taxable and unrealized losses on such assets are nondeductible for tax purposes.

Capital gains realized by nonresidents on the following are considered Czech-source income and are consequently generally taxable:

- Sales of rights registered in the Czech Republic or investment instruments to Czech taxpayers or Czech permanent establishments
- Sales of shares (securities or share interests) in Czech companies, regardless of the tax residence of the purchaser

However, capital gains realized by EU/EEA parent companies on sales of shares may be exempt from tax (see above).

Administration. Companies may select a calendar year or a fiscal year as its tax year. If a company uses a tax year other than the calendar year, it must file a notification with the tax authorities.

Tax returns must be filed within three months after the end of the tax year. On application of the company, an extension of three months to file a tax return may be granted at the discretion of the tax authorities. Companies that are subject to a statutory audit are automatically granted the three-month extension.

A company with tax liability of more than CZK150,000 for the preceding year must make quarterly advance payments of tax, each equal to 25% of the preceding year's tax liability. The payments must be made by the 15th day of the third, sixth, ninth and twelfth month of their tax year. Any balance of tax due must be paid by the due date for filing the tax return.

If a company's liability for the preceding year exceeded CZK30,000, but did not exceed CZK150,000, installments that are each equal to 40% of the tax liability for the preceding year must be paid by the 15th day of the sixth and twelfth months of their tax year. If the preceding year's tax liability was CZK30,000 or less, only a single payment is required on filing the annual return.

Late payments and late filings incur penalty charges at a rate established by law. Overpayments are generally refunded within 30 days of the taxpayer's application.

Dividends. Dividends are subject to a final withholding tax at a rate of 15%. The tax rate is increased to 35%, effective from 2013, for dividends paid to Czech tax nonresidents from countries outside the EU/EEA that have not entered into a double tax treaty with the Czech Republic or a bilateral or multilateral tax information exchange agreement that is binding on both the Czech Republic and the respective foreign country.

Under the principles of the EU Parent-Subsidiary Directive (No. 90/435/EEC), dividends paid by Czech companies to parent companies (as defined in the Czech tax law) that are located in EU/EFTA countries (also, see below) are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year (further conditions apply). The condition described in the preceding sentence may be fulfilled subsequent to the date of distribution of the dividend. Dividend distributions between two Czech companies and between foreign subsidiaries and their Czech parents are exempt from tax under similar conditions.

In addition, dividends distributed by subsidiaries in a contracting country are also exempt from taxation under rules similar to those applicable to capital gains (see *Capital gains*).

The tax exemption for dividends does not apply if any of the following circumstances exists (further conditions may apply):

- The parent company or the subsidiary is exempt from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary may opt for an exemption (or a similar relief) from corporate income tax or similar tax applicable in its jurisdiction.
- The parent or subsidiary is subject to zero corporate income tax or similar tax applicable in its jurisdiction.
- The subsidiary has an option to treat the dividend payments as tax deductible in its jurisdiction.

Foreign tax relief. Foreign tax relief (through credit or exemption) is available only under tax treaties. If foreign tax relief is not available under a treaty, the income tax paid abroad may be deducted as an expense in the following year if it is imposed on income included in taxable income in the Czech Republic.

C. Determination of trading income

General. Taxable income is calculated according to Czech accounting regulations, with adjustments for tax purposes.

All expenses incurred to generate, assure and maintain taxable income that relate to the given period are generally deductible, subject to the limits specified in the corporate income tax and related laws, if documented by the taxpayer. The following are some of the expenses that may be deducted:

- Depreciation of tangible and intangible assets (see *Depreciation*).
- Cost of insurance if related to taxable income (except for insurance paid on behalf of an executive or member of the board of directors for damage caused by the performance of his or her functions).
- Membership contributions paid to selected chambers and associations under certain conditions.
- Damages resulting from natural disasters. The amount of the damage must be documented by evidence submitted by an expert from an insurance company. Damages caused by unknown perpetrators can be tax deductible if confirmed by the police.
- Real estate tax paid in accordance with the Czech law, road tax and selected other taxes and fees (subject to exceptions), if related to activities that generate taxable income.
- Specified expenses related to the provision of proper working, social and health care conditions of the employees.
- Payments on leases, including financial leases, under certain conditions.
- Travel expenses related to work in the Czech Republic and abroad.
- Donations valued at CZK2,000 or more for various social and charitable purposes. In general, the maximum amount of this deduction is 10% of the tax base.

The following are some of the expenses that are not deductible for tax purposes:

- Refreshment and entertainment expenses
- Damages (unless the specific conditions mentioned above are met)
- Expenses paid by the taxpayer instead of another payer (for example, instead of related parties)
- Penalties and late payment interest levied by tax authorities and other government institutions
- Non-monetary benefits provided to employees (for example, cultural events, sports, education and medical aids)
- Creation of provisions and reserves (unless specific conditions are met)

In general, taxpayers must increase their tax base by the amount of any overdue liability accounted for in their books that represented a tax-deductible expense and that remains unsettled for 30 months (for liabilities due in 2015 or later) or 36 months (for liabilities due prior to 2015).

Inventory. Inventory is valued at acquisition or production cost. Costs include all costs necessary to convert the inventory to its current condition and to transport it to its current location. No deduction is allowed for inventory provisions or for other decreases in inventory value. Under certain circumstances, the liquidation of inventory may be deductible for tax purposes.

Provisions. Provisions are not deductible unless a special tax law permits their creation for tax purposes.

Tax relief is provided with respect to overdue trading debts (as defined in the law). A special regime applies to unpaid receivables that were due before 31 December 1994.

Rules applicable as of 1 January 2014. Taxpayers may generally create the following tax-deductible provisions for debts that are overdue and not lapsed (with certain limitations):

- 50% of the unpaid book value of the debt if more than 18 months have elapsed since the agreed due date
- 100% of the unpaid book value of the debt if more than 30 months have elapsed since the agreed due date

For overdue debts exceeding CZK200,000 that were acquired from the previous creditor, deduction of the above provisions is allowed only if a court or arbitration proceeding was initiated and the taxpayer (creditor) participates in the proceeding.

Rules applicable until 31 December 2013 (for receivables with a due date before 2014). For overdue debts not exceeding CZK200,000 that were due after 31 December 1994, if between 6 and 12 months had elapsed since the agreed due date for the debt, 20% of the book value of the debt was deductible (grandfathering rules apply). This deduction was allowed regardless of whether court or arbitration proceedings had commenced against the debtor. If the debt was more than 12 months overdue, a court or arbitration proceedings needed to be commenced by the creditor against the debtor to claim a larger tax deduction for the debt. The deduction was calculated by applying the following specified percentages to the book value of the debt.

Months elapsed since agreed due date		Deductible percentage of book value
Exceeding	Not exceeding	%
12	18	33
18	24	50
24	30	66
30	36	80
36	—	100

For debts exceeding CZK200,000 that were overdue more than six months, the rules described above applied if the creditor had commenced court or arbitration proceedings against the debtor.

The above deductions (under the rules applicable until 31 December 2013 and the rules applicable after that date) must be recorded in the accounting books. The deductions may not be claimed for debts from related parties and other specified debts.

A 100% provision can be created for receivables up to CZK30,000, subject to certain conditions. A 100% provision for overdue receivables may also be created if insolvency proceedings have been initiated with respect to the debtor's property and if the creditor makes a timely claim for such receivables against the debtor in the respective court. This deduction may not be claimed for debts from related parties.

Reserves. Taxpayers may create tax-deductible reserves for the repair of tangible assets included in Categories 2 through 6 for tax depreciation purposes (see *Depreciation*). The reserves must be created for a minimum of two tax periods and for the maximum number of tax periods specified for each asset category.

Reserves for repairs of tangible assets may be created tax-effectively only if cash equal to the amount of the reserve created is deposited in a specific bank account. This measure applies to reserves that are created after 2008.

Depreciation. The corporate income tax law includes specific provisions concerning the depreciation of tangible and intangible assets. Depreciable tangible assets are divided into six categories, each of which specifies a period (a specified number of years) over which all assets in the category are depreciated.

The following are the six categories of depreciation, the time periods for depreciation of assets in each category and representative assets included in each category.

Category	Asset	Years
1	Office machines and some light machinery	3
2	Passenger cars, buses, airplanes, tractors, lorries, furniture and specified production machinery	5
3	Heavy machinery	10
4	Wooden buildings, pipelines, buildings for the production of energy, and buildings and halls built near mines	20

Category	Asset	Years
5	Buildings	30
6	Specified buildings	50*

* This category includes hotels, stores and office buildings.

Assets other than buildings that cannot be classified in any of the above categories are considered to be in Category 2. Category 5 covers buildings that are not covered by Categories 4 or 6.

Taxpayers may elect to depreciate assets using the straight-line or the accelerated method. The method chosen, however, does not affect the period of depreciation. Under the accelerated method, depreciation for the first year is calculated by dividing the cost of the asset by the applicable coefficient (see table below). For subsequent years, accelerated depreciation is calculated by multiplying the residual tax value of the asset by two and then dividing by the applicable coefficient, which is reduced by the number of years for which the asset has already been depreciated.

The following are the depreciation rates and coefficients for the six categories under the straight-line and accelerated methods.

Category	Straight-line rate	Accelerated-depreciation coefficient
1	20% for first year and 40% for subsequent years	3 for first year and 4 for subsequent years
2	11% for first year and 22.25% for subsequent years	5 for first year and 6 for subsequent years
3	5.5% for first year and 10.5% for subsequent years	10 for first year and 11 for subsequent years
4	2.15% for first year and 5.15% for subsequent years	20 for first year and 21 for subsequent years
5	1.4% for first year and 3.4% for subsequent years	30 for first year and 31 for subsequent years
6	1.02% for first year and 2.02% for subsequent years	50 for first year and 51 for subsequent years

Taxpayers may elect to use lower than the maximum straight-line depreciation rates. Additional rules apply to assets that were technically improved.

An initial depreciation acceleration (additional 10% to 20% of input price; in general, the input price is the acquisition cost, including related costs) is granted in the year of acquisition for certain tangible assets if other conditions are met.

Effective from 2010, the component depreciation of assets method may be used for accounting purposes. For tax purposes, the accounting result is adjusted as if this method was not used.

Specified tangible assets used in solar energy production are depreciated proportionally for a period of 240 months.

Depreciable intangible assets are divided into two categories — intangible assets that may be used for a definite time period and those that may be used for an indefinite time period. Intangible assets that may be used for a definite period are depreciated proportionally during such period. If the period for use is indefinite, the intangible asset is depreciated proportionally over the following periods (also see next paragraph).

Category	Period (months)
Audiovisual works	18
Software	36
Foundation expenses	60
Other intangible assets	72

Under an amendment, effective from 1 July 2017, the above periods are set as minimum depreciation periods. According to transitory provisions, this modification applies to intangible assets of which depreciation was commenced after the effective date of the amendment (that is, 1 July 2017).

Relief for losses. Losses may be carried forward for five years. The carryforward may be lost if a “substantive change” in persons participating in the equity or control of the taxpayer occurs and if the same activity test is not met. A “substantive change” is considered to be one of the following:

- A change in more than 25% equity ownership
- A change resulting in a shareholder receiving decisive influence

The same activity test is met if 80% of the revenues generated in the period in which the substantive change occurs and in the following tax-loss utilization periods is from the same activities that were performed in the period in which the tax loss was generated.

Groups of companies. Czech tax law does not provide for consolidated tax returns or other types of group relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), levied on all taxable supplies (goods and services), acquisitions of goods from other EU member states and imports of goods; certain supplies are exempt	
Standard rate; applicable to most goods and services	21%
Reduced rate applicable to specified goods and services (for example, food products and cultural services)	15%
Reduced rate applicable to certain goods, such as books, pharmaceuticals and baby food	10%
Social security and health insurance contributions; the social security contributions are paid only up to the maximum assessment base	

Nature of tax	Rate
Health insurance	
Employer	9%
Employee	4.5%
(No maximum assessment base applies.)	
Old-age pension	
Employer	21.5%
Employee	6.5%
(The expected maximum assessment base is CZK1,569,552, as of 1 January 2019.)	
Sickness	
Employer	2.3%
Employee	0%
(The expected maximum assessment base is CZK1,569,552 as of 1 January 2019.)	
Unemployment	
Employer	1.2%
Employee	0%
(The expected maximum assessment base is CZK1,569,552 as of 1 January 2019.)	
Real estate transfer tax; levied on the acquisition of real estate	4%
Excise tax, imposed on entities that produce or import certain goods, including hydrocarbon fuels and lubricants, alcohol and spirits, beer, wine and tobacco products; tax based on the quantity of goods expressed in specific units; tax may be levied only once on a particular good	Various
Road tax, imposed on entities that use vehicles; based on engine capacity and number of axles	Various
Environmental tax; imposed on electricity, natural gas and solid fuel when delivered to final consumers; tax is based on the quantity of goods expressed in specific units; tax is administered and paid by the distributor which charges it to the final customer as a price increase	Various
Tax stamps for the use of highways	
Small vehicles (up to 3.5 tons; annual stamp)	CZK1,500
Large vehicles	Electronic road tolls

E. Miscellaneous matters

Foreign-exchange controls. The only legal tender valid in the Czech Republic is the Czech crown (CZK). Other currencies may be used for domestic transactions, but the use of the Czech crown is prevalent.

The Czech crown is fully convertible. Several financial transactions, such as direct investments or acceptance of credit from abroad, are subject to a reporting requirement.

Anti-avoidance legislation. In applying the tax law, the tax authorities may consider the substance of a transaction if the form of the transaction conceals the actual facts. In addition, the Czech courts have developed the abuse-of-law concept. The concept is similar to the one developed by the European Court of Justice (for example, *Halifax* [No. C-255/02]).

Based on the recent draft of the amendment implementing ATAD (see the beginning of this chapter), a minimalistic version of the general anti-avoidance rule (inspired by ATAD) should be included in the Tax Administration Law in 2019. The provision will apply to all taxes, and its wording (together with the explanatory report) indicates a continuity with the current approach to the abuse of law concept.

Transfer pricing. If prices in a transaction involving related parties vary from the current market prices and if the difference cannot be justified, the market prices are used for tax purposes. Related parties include companies related through capital (that is, the same legal or natural persons directly or indirectly manage, control or own more than 25%) and companies related in a different manner. In addition, related parties are persons who establish a business relationship for the principal purpose of decreasing taxable income or increasing a tax loss.

Binding rulings. Taxpayers may apply to the tax authorities for advance pricing agreements and for binding opinions on transfer prices, the determination of the tax base of a tax nonresident from activities carried on by a permanent establishment, technical improvements of long-term assets, the allocation of expenses to taxable and nontaxable income, expenses incurred on research and development projects, expenses incurred on buildings that are also used for private purposes, and the application of VAT rates.

Financing expenses. The tax deductibility of financing expenses (interest and associated expenses) with respect to related-party loans (including back-to-back loans) is limited by a debt-equity ratio of 4:1 (6:1 for banks and insurance companies). Financing expenses with respect to profit-participating loans are nondeductible for tax purposes. Also, limitations are imposed on the deductibility of financing expenses related to shareholdings.

The interest deductibility limitation rule is expected to be implemented through the ATAD transposition. Based on the draft legislation, a deductibility limit for exceeding borrowing costs will be the higher of 30% tax earnings before interest, tax, depreciation and amortization (EBITDA) or CZK80 million. The rule is expected not to apply to “standalone” taxpayers and to listed financial enterprises. Borrowing costs subject to this rule are defined broadly in line with ATAD. Disallowed exceeding borrowing costs may be carried forward and claimed in future tax periods (however, transfer to previous tax periods and transfer of unused capacity to future tax periods will not be allowed). The interest deductibility limitation rule will apply together with the thin-capitalization rule and other limitations on financing expenses.

Controlled foreign company rules. CFC rules are expected to be implemented through the ATAD transposition. The legislative proposal provides for taxation of certain types of passive income of a CFC (or permanent establishment if exempt pursuant to a double tax treaty) in the hands of a Czech controlling company in proportion to the share capital held in the CFC if the following conditions are met:

- The CFC entity does not carry out substantive economic activity.
- The foreign tax of the CFC entity is lower than 50% of the tax that would be paid as a Czech resident under Czech rules.
- The Czech controlling company directly or indirectly (itself or with associated companies) has a greater than 50% share of the voting rights, capital or profits.

Exit taxation. Exit taxation rules (that is, taxation of the transfer of assets with no change in ownership from the Czech Republic to another jurisdiction if the Czech Republic loses the right to tax the transferred asset) are expected to be implemented through the ATAD transposition. The main parameters of the proposal are broadly in line with those in ATAD.

Anti-hybrid rules. Anti-hybrid rules are expected to be implemented through the ATAD transposition. Situations of double deduction of cost, deduction of cost without inclusion of income and imported hybrid mismatch are addressed by the draft legislation.

Foreign investment. Similar rules apply to both Czech investors and foreign investors.

Exchange of information. Various recent changes have occurred in the area of exchange of information, such as amendments made to the EU directive on administrative cooperation in the field of taxation, including Country-by-Country Reporting (CbCR) and the Mandatory Disclosure Regime (expected to be implemented and applicable as of 1 July 2020), conclusion of the Multilateral Competent Authority Agreement and the conclusion of similar agreements with “tax haven” countries.

F. Treaty withholding tax rates

The Czech Republic honors bilateral tax treaties of Czechoslovakia. It has also entered into tax treaties with many other jurisdictions. The Czech Republic is a signatory of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument, or MLI). The Czech Republic intends to implement “the minimum standard”; that is, the preamble, the rule to prevent treaty abuse (the principal purpose test) and modifications concerning the effective resolution of disputes by mutual agreement, in 52 existing double tax treaties. At the time of writing, the MLI was in the ratification process in the parliament (the time frame of the ratification process is unknown at this point).

The following table lists the withholding tax rates under the bilateral treaties currently honored by the Czech Republic.

	Dividends	Interest	Royalties
	%	%	%
Albania	5/15 (b)	0/5 (g)	10

Non-treaty jurisdictions	15/35 (x)	0/15/35 (d)(x)	15/35 (x)

- (a) The lower rate applies to royalties paid for copyrights. The higher rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment or information.
- (b) The lower rate applies if the receiving company (other than a partnership) owns at least 25% of the capital of the payer. Under the Belgium treaty, dividends paid to partnerships may also qualify for the lower rate. Under the United Kingdom treaty, the lower rate applies if the receiving company controls at least 25% of shares with voting rights of the payer. Under the Japan treaty, the lower rate applies if the receiving company holds at least 25% of shares with voting rights of the payer for at least six months preceding the payment of dividend. Under the Colombia treaty, the 25% rate applies to dividends paid by a Colombian resident that are derived from profits that were not under the law subject to Colombian tax, and the 15% rate applies to dividends not subject to the 5% or 25% rates.
- (c) The lower rate applies if the receiving company (other than a partnership) owns at least 10% of the capital of the payer. Under the Canada and Nigeria treaties, the lower rate applies if the receiving company controls at least 10% of the voting rights of the payer (except for dividends paid by a Canadian

- investment corporation). Under the United States treaty, the lower rate applies if the receiving company owns at least 10% of the shares with voting rights of the payer (exceptions applies to dividends paid by investments companies and real estate investment trusts located in the United States). Under the Norway treaty, the 0% rate also applies to dividends paid to the government or specified institutions. Under the Cyprus, Liechtenstein, Luxembourg and Switzerland treaties, the 0% rate applies if at least 10% of share capital of the payer is held by an entity (other than a partnership) for at least one year. Under the Denmark treaty, the 0% rate applies if the recipient of the dividends is a pension fund. Under the Switzerland treaty, the 0% rate also applies if the recipient of the dividends is a central bank or a pension fund.
- (d) Interest on mutual deposits with banks in the interbank market is exempt from tax for recipients from non-treaty countries (subject to reciprocal treatment). For all Czech tax nonresidents (that is, recipients from treaty and non-treaty countries), interest on bonds issued by Czech taxpayers or the Czech Republic outside the Czech Republic is exempt from tax. The 15% rate applies to other interest but see also footnote (x).
- (e) The lower rate applies if the receiving company (other than a partnership) owns at least 20% of the capital of the payer. Under the Australia treaty, the lower rate applies to dividends paid from the Czech Republic to Australia if the receiving company owns at least 20% of the capital of the payer and to dividends paid from Australia to the Czech Republic if special requirements are met.
- (f) The 5% rate applies if the receiving company (other than a partnership) owns more than 15% of the capital of the payer.
- (g) The 0% rate applies to interest paid to (or by) the government (or specified institutions), subject to further conditions. Under the Albania treaty, the 0% rate also applies to interest paid to an agency, including banks and financial institutions, wholly owned by the contracting state. Under the Georgia treaty, the 0% rate also applies to interest on loans and credits guaranteed by governments or related to sales of industrial equipment that are financed by loans. Under the Armenia and Azerbaijan treaties, the 5% rate applies to interest on bank loans. Under the Ethiopia treaty, the 0% rate also applies to, among other items, interest paid to institutions owned or controlled by the government whose sole purpose is the promotion of export or foreign investment. Under the Thailand treaty, the 10% rate applies to interest paid to financial institutions or insurance companies; otherwise, the rate of the source country applies. Under the Pakistan and Syria treaties, the 0% rate also applies to interest paid to the central bank or any financial institution wholly owned by the government and to interest on loans and credits guaranteed by the government or specified institutions. Under the China treaty, the 0% rate also applies if the interest paid to selected government agencies or the central bank or if the receivable is financed, guaranteed or pledged by the government, the central bank or a selected government agency. Under the Barbados, Colombia, Iran, Tajikistan and Uzbekistan treaties, the 0% rate also applies to interest from the sale on credit of merchandise or equipment or from a loan or credit granted by a bank or guaranteed by the government (or specified institutions). Under the Belarus treaty, the 0% rate also applies to interest on bank loans. Under the Poland treaty, the 0% rate also applies to interest from a loan or credit granted by a bank or guaranteed by the government (or specified institutions). Under the Belgium treaty, the 0% rate applies to interest from suspended payments for goods and services, loans guaranteed by public institutions aimed to support the export and bank loans and deposits (except in the form of securities). Under the Brazil treaty, interest from securities, bonds and promissory notes issued by the government (or specified institutions) is subject to tax in the state of residence of the issuer. Under the Bulgaria and Panama treaties, the 0% rate also applies to interest from suspended payments for equipment or goods or from certain loans guaranteed by public institutions. Under the Canada treaty, the 0% rate also applies to, among other items, interest paid to institutions established to manage and pay out benefits from pension, retirement or employee schemes (other limitations apply). Under the Korea (South) treaty, the 0% rate also applies to interest paid in connection with sales on credit of industrial, commercial or scientific equipment or in connection with sales on credit of goods between commercial entities. Under the Kazakhstan and Turkmenistan treaties, the 0% rate also applies to interest from loans guaranteed by the government (or specified institutions). Under the Malaysia treaty, the 0% rate also applies to interest from approved loans if the beneficial owner of the interest is a Czech tax resident.
- (h) The 5% rate applies to royalties for copyrights. The 10% rate applies to royalties for patents, trademarks, designs or models, plans, secret formulas and processes. The 15% rate applies to other royalties.

- (i) The 10% rate applies to loans and credits granted by a bank for a period of at least 10 years in connection with the following:
 - Sales of industrial equipment or studies
 - Installation or furnishing of industrial or scientific units
 - Public works
- (j) The 10% rate applies if the receiving company owns at least 25% of the payer for at least two years preceding the payment of the dividend.
- (k) The 0% rate applies to a dividend paid to the government of a contracting state (or a government institution) or to a company that is at least 25% owned by the government of the contracting state.
- (l) The 0% rate applies to a dividend paid by a tax resident of Malaysia to a Czech tax resident who is the beneficial owner of the dividends.
- (m) The 0% rate applies to royalties paid for copyrights. The 1% rate applies to royalties paid for finance leases of equipment. The 5% rate applies to royalties paid for operating leases of equipment and for the use of, or right to use, software. The 10% rate applies to other royalties.
- (n) The lower rate applies to royalties for copyrights, with the exception of royalties for cinematographic films and films or tapes for television broadcasting. The higher rate applies to other royalties.
- (o) The lower rate applies to dividends paid by a tax resident of Sri Lanka to a Czech tax resident (except with respect to investments made after the effective date of the treaty).
- (p) The treaty provides for a rate of 10%, but a protocol to the treaty provides for a rate of 5% until Swiss domestic law imposes a withholding tax on royalties.
- (q) In addition to treaty protection, royalties paid by Czech companies or permanent establishments of companies from EU member states to related-party companies located in other EU/EEA member states or Switzerland is exempt from tax if the conditions stated in provisions implementing EU Directive 2003/49/EC, as amended, are satisfied and if an advance ruling is issued by the Czech tax authority. If a Czech withholding tax applies to outbound royalties, EU/EEA tax residents may choose to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return), or to treat the withholding tax as a final tax on the income.
- (r) The 10% rate applies to royalties paid for patents, trademarks and industrial, commercial, or scientific equipment or information. The 15% rate applies to royalties paid for films.
- (s) In addition to treaty protection, dividends paid by Czech companies to parent companies (as defined in the EU Parent-Subsidiary Directive 2011/96/EU) that are located in other EU member states, or in Iceland, Liechtenstein, Norway or Switzerland, are exempt from withholding tax if the parent company maintains a holding of at least 10% of the distributing company for an uninterrupted period of at least one year (this condition may be met subsequently). Further conditions apply.
- (t) In addition to treaty protection, interest from qualified instruments paid by Czech companies or permanent establishments of companies from EU member states to related-party companies (as defined in EU Directive 2003/49/EC) located in other EU/EEA member states or Switzerland is exempt from withholding tax if the conditions stated in the provisions implementing EU Directive 2003/49/EC, as amended, in the Czech tax law are satisfied and if an advance ruling is issued by the Czech tax authority. In addition, if Czech withholding tax applies to outbound interest, EU/EEA tax residents may choose to include the income in their tax return and have it taxed at the standard corporate income tax rate after deduction of associated expenses (while claiming a credit for the withholding tax paid against tax liability stated in the tax return), or to treat the withholding tax as a final tax on the income.
- (u) The 0% rate applies to royalties paid for copyrights. The 5% rate applies to payments for industrial, commercial or scientific equipment. The 10% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret patterns or production procedures and software, as well as for information relating to experience acquired in the areas of industry, commerce or science.
- (v) The 25% rate applies to royalties paid for trademarks. The 15% rate applies to other royalties.
- (w) The 5% rate applies to royalties paid for industrial, commercial or scientific equipment.
- (x) A 35% tax rate applies to payments to tax residents in countries with which the Czech Republic has not entered into a double tax treaty or a treaty on exchange of information in tax matters. For further details, see footnote (e) in Section A.

- (y) The 5% rate applies to business profits after taxation transferred by a permanent establishment in one contracting state to its head office in the other contracting state.
- (z) The 4% rate applies to interest paid to banks, insurance companies and other specified lending and financial institutions. If Chile agrees to a lower rate or an exemption with an Organisation for Economic Co-operation and Development member state, this lower rate or exemption would also apply to the treaty between Chile and the Czech Republic.
- (aa) The 0% rate applies to copyright royalties paid from the Czech Republic to Belgium. The 5% rate applies to royalties paid for use of industrial, commercial or scientific equipment.

New tax treaties that affect withholding rates with Ghana and Kosovo are in the ratification process. In addition, a bill aimed to prevent double taxation with respect to Taiwan is currently awaiting parliament approval.

 Email: kristian.n.stidsen@dk.ey.com

A. At a glance

Corporate Income Tax Rate (%)	22
Capital Gains Tax Rate (%)	22
Branch Tax Rate (%)	22
Withholding Tax (%)	
Dividends	0/22 (a)
Interest	0/22 (b)
Royalties from Patents, Know-how, etc.	0/22 (c)
Branch Remittance Tax	0 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) The general withholding tax rate is 22%, and the recipient can apply for a refund depending on the final tax rate. A withholding tax of 0% normally applies to dividends paid to group companies. See Section B.
- (b) The 22% rate applies to payments between related parties. The rate may be eliminated if certain conditions are met under the European Union (EU) Interest-Royalty Directive or a double tax treaty entered into by Denmark. See Section B.
- (c) The rate is 0% for royalties paid for copyrights of literary, artistic or scientific works, including cinematographic films, and for the use of, or the right to use, industrial, commercial or scientific equipment. In addition, the rate

may be reduced or eliminated if certain conditions are met under the EU Interest-Royalty Directive or a double tax treaty entered into by Denmark.

- (d) A Danish branch office or a tax-transparent entity may be re-characterized as a Danish tax-resident company if the entity is controlled by owners resident in one or more foreign countries, the Faroe Islands, or Greenland and if either of the following circumstances exists:
- The entity is treated as a separate legal entity for tax purposes in the country or countries of the controlling owner(s).
 - The country or countries of the controlling owner(s) are located outside the EU and have not entered into a double tax treaty with Denmark under which withholding tax on dividends paid to companies is reduced or renounced.

B. Taxes on corporate income and gains

Corporate income tax. A resident company is a company incorporated in Denmark. In addition, a company incorporated in a foreign country is considered a resident of Denmark if its day-to-day management is in Denmark.

All tax-resident companies that are part of the same group must be included in a Danish mandatory joint taxation arrangement, regardless of whether these companies are subject to full or limited tax liability in Denmark. This mandatory joint taxation comprises all Danish affiliated companies as well as permanent establishments and real estate located in Denmark (for details, see Section C).

The income of resident companies that is generated in a foreign permanent establishment or real estate located outside Denmark is not included in the statement of the taxable income in Denmark, unless Denmark is granted the right to tax such income under an applicable double tax treaty or other international agreement, or the income is subject to controlled foreign company (CFC) taxation (see Section E).

Branches of foreign companies located in Denmark are taxed only on trading income and on chargeable capital gains derived from the disposal of trading assets that are located in Denmark and related to a Danish permanent establishment.

Rate of corporate tax. For the 2019 income year, resident and non-resident companies are taxed at a rate of 22%.

Capital gains. Capital gains are taxed as other income at a rate of 22%.

Capital gains derived from a disposal of shares in a group company (group shares), shares in a subsidiary (subsidiary shares) and own shares (shares issued by the company) are exempt from tax regardless of the ownership period, while losses incurred on such shares are not deductible.

The following are considered group shares:

- Shares in a company that is subject to mandatory joint taxation under Danish rules together with the shareholder of the company
- Shares in a company that is eligible for inclusion in an international joint taxation arrangement under Danish rules (see Section C)

Shares are considered subsidiary shares if all of the following conditions are met:

- The shares are in a company in which the shareholder directly owns at least 10% of the share capital.

- The company is in a legal form that is similar to a Danish limited liability company.
- The company is subject to corporate tax in its home country (without exemption).
- The company is located in a country that has an agreement with Denmark on exchange of information.

Certain anti-avoidance rules apply if shareholders that do not each meet the requirements of holding group shares or subsidiary shares set up an intermediate holding company that by itself is able to meet the requirements.

In certain cases, capital gains may be reclassified as dividends. The reclassification of capital gains to dividends applies under specific circumstances only.

In general, capital gains derived from a disposal of shares that are not own shares, group shares or subsidiary shares (known as portfolio shares) are taxable at the statutory corporate income tax rate of 22%, while losses are deductible, regardless of the ownership period. However, capital gains derived from the disposal of portfolio shares do not trigger taxation if all of the following conditions are satisfied:

- The shares relate to a Danish limited liability company or a similar foreign company.
- The shares are not publicly listed.
- A maximum of 85% of the book value of the portfolio company is placed in publicly listed shares.
- The company disposing of the portfolio shares does not buy new portfolio shares in the same company within six months after the disposal.

The current rules regarding taxation of portfolio shares are based on the mark-to-market method, under which gains and losses are computed on the basis of the market value of the shares at the beginning and end of the income year. It is possible to opt for taxation based on the realization method with respect to unlisted portfolio shares only. Listed portfolio shares must be taxed according to the mark-to-market method. Special rules apply to the carryforward of unused losses on portfolio shares.

Gains on the sale of goodwill and intellectual property rights are subject to tax.

Recaptured depreciation (see Section C) is taxed as ordinary income at a rate of 22%.

Administration. In general, the income year for companies is the calendar year. Companies may select a staggered income year, which is an income year other than the calendar year. They may change their income year if justified by special circumstances.

In general, tax returns for companies must be filed within six months after the end of the companies' income year. For companies with income years ending from 1 February to 31 March, tax returns must be filed by 1 August. Companies pay corporate tax on a current year basis at a rate of 22%, with half payable on 20 March and the remainder on 20 November.

Dividends paid. In general, dividends paid are subject to withholding tax at a rate of 22%. However, withholding tax is normally

not imposed on dividends paid to group companies if the Danish shares qualify as either group shares or subsidiary shares (see *Capital gains*) and if the withholding tax must be reduced or eliminated under the EU Parent-Subsidiary Directive or a double tax treaty. For a company owning Danish shares that are group shares rather than subsidiary shares, it is required that the withholding tax would have been reduced or eliminated under the EU Parent-Subsidiary Directive or a double tax treaty if the shares had been subsidiary shares. In both cases, the recipient of the dividends must be the beneficial owner of the dividends and, accordingly, is entitled to benefits under the EU Parent-Subsidiary Directive or a double tax treaty.

The final tax rate for nonresident companies is generally 22%, with a rate of 15% for certain portfolio shares. The applicability of the 15% tax rate is described under *Capital gains* (conditions for deriving tax-exempt capital gains on portfolio shares). The 15% rate applies for corporations resident in jurisdictions with which Denmark has entered into a treaty on double taxation or exchange of information (if the shareholding meets the requirements described under *Capital gains*). A claim for a refund for the difference between the withholding tax of 22% and the final tax rate may be filed with the Danish tax authorities.

Withholding tax on dividends from a Danish subsidiary to a foreign company applies in the case of a redistribution of dividends if the Danish company itself has received dividends from a more-than-10%-owned company in another foreign country and if the Danish company cannot be regarded as the beneficial owner of the dividends received. Correspondingly, it applies if the Danish company has received dividends from abroad through one or more other Danish companies. Such dividends are generally subject to withholding tax at a rate of 22%, unless all of the following conditions are met:

- The rate is reduced under a double tax treaty with Denmark or the recipient is covered by the EU Parent-Subsidiary Directive.
- The recipient is considered the beneficial owner of the dividends.
- The general anti-avoidance rule does not apply.

Interest paid. In general, interest paid to foreign group companies is subject to withholding tax at a rate of 22%. The withholding tax is eliminated if any of the following requirements are satisfied:

- The interest is not subject to tax or it is subject to tax at a reduced rate under the provisions of a double tax treaty. For example, if withholding tax on interest is reduced to 10% under a double tax treaty, the withholding tax is eliminated completely.
- The interest is not subject to tax in accordance with the EU Interest/Royalty Directive. Under the directive, interest is not subject to tax if both of the following conditions are satisfied:
 - The debtor company and the creditor company fall within the definition of a company under Article 3 in the EU Interest/Royalty Directive (2003/49/EC).
 - The companies have been associated (as stated in the directive) for at least a 12-month period.
- The interest accrues to a foreign company's permanent establishment in Denmark.

- The interest accrues to a foreign company, and a Danish parent company, indirectly or directly, is able to exercise control over such foreign company (for example, by holding more than 50% of the voting rights). Control must be fulfilled for a period of 12 months during which the interest is paid.
- The interest is paid to a recipient that is controlled by a foreign parent company resident in a country that has entered into a double tax treaty with Denmark and has CFC rules and if, under these foreign CFC rules, the recipient could be subject to CFC taxation.
- The recipient company can prove that the foreign taxation of the interest income amounts to at least $\frac{3}{4}$ of the Danish corporate income tax and that it will not in turn pay the interest to another foreign company that is subject to corporate income tax amounting to less than $\frac{3}{4}$ of the Danish corporate income tax.

The withholding tax and exceptions also apply to non-interest-bearing loans that must be repaid with a premium by the Danish debtor company.

C. Determination of trading income

General. Taxable income is based on profits reported in the annual accounts, which are prepared in accordance with generally accepted accounting principles. For tax purposes, several adjustments are made, primarily concerning depreciation and write-offs of inventory.

Expenses incurred to acquire, ensure and maintain income are deductible on an accrual basis. Certain expenses, such as certain gifts, income taxes and formation expenses, are not deductible. Only 25% of business entertainment expenses is deductible for tax purposes. Expenses incurred on advisor fees are not deductible if they are incurred with respect to investments in shares that have the purposes of a full or partial acquisition of one or more companies and of the exercise of control over or participation in the management of these companies.

Inventories. Inventory may be valued at historical cost or at the cost on the balance sheet at the end of the income year. Inventory may also be valued at the production price if the goods are produced in-house. Indirect costs, such as freight, duties and certain other items, may be included.

Dividends received. Dividends received with respect to shares that qualify as group shares or subsidiary shares (see *Capital gains*) are exempt from tax to the extent that no tax deduction is claimed for the distribution by the entity making the distribution.

Dividends received by a Danish permanent establishment may be exempt from tax if the permanent establishment is owned by a foreign company that is tax resident in the EU, European Economic Area (EEA) or in a country that has entered into a double tax treaty with Denmark.

Dividends received on a company's own shares are exempt from tax.

Dividends that are not covered by the above tax exemption, such as dividends from portfolio shares, must be included in the taxable income of the dividend receiving company and taxed at the

normal corporate income tax rate of 22%. A tax credit is normally available to the dividend receiving company for foreign withholding taxes withheld by the dividend distributing company.

Depreciation

Immediate deductions. For the 2019 income year, new acquisitions not exceeding DKK13,800 (2019 amount) or with a lifetime not exceeding three years are 100% deductible in the year of purchase. Computer software, operating equipment and ships for research and development, except operating equipment and ships used for exploration of raw materials, are also 100% deductible in the year of purchase.

Asset classes. Certain depreciable assets must be allocated among four asset classes:

- Operating equipment (including production facilities, machinery, office equipment, hardware and certain software that may not be written off immediately) may be depreciated at an annual rate of up to 25%, using the declining-balance method.
- Certain ships (weighing more than 20 tons and leased out without a crew) may be depreciated at an annual rate up to 12%, using the declining-balance method.
- Certain operating equipment with a long economic life (certain ships transporting goods or passengers, aircraft, rolling railway material, drilling rigs and facilities for producing heat and electricity) may be depreciated at an annual rate of up to 15%, using the declining-balance method. Facilities for producing heat and electricity with a capacity of less than 1 MW and wind-turbine generators (regardless of the capacity) may be depreciated at an annual rate of up to 15%, using the declining-balance method.
- Infrastructural facilities (facilities used for purposes, such as transporting, storing and distributing electricity, water, heat, oil, gas and wastewater and facilities with respect to radio, telecommunications and data transmissions) may be depreciated at an annual rate of up to 7%, using the declining-balance method.

It is important to distinguish between building installations and infrastructural facilities.

Buildings. Buildings used for commercial and industrial purposes may be depreciated at an annual rate of up to 4%, using the straight-line method based on the purchase price, excluding the value of the land. Office buildings, financial institutions, hotels, hospitals and certain other buildings may not be depreciated. However, office blocks or office premises adjacent to buildings used for commercial purposes may be depreciated if the office blocks are used together with the depreciable buildings.

Others. Acquired goodwill, patent rights and trademarks may be amortized over seven years. Costs incurred in connection with the improvement of rented premises and properties (not used for habitation or other commercial or non-industrial purposes) on leased land may be depreciated at an annual rate of up to 20%. If the tenancy is entered into for a fixed number of years, the annual depreciation rate cannot exceed a rate that results in equal amounts of depreciation over the fixed number of years.

Recapture. The amount of depreciation claimed on an asset may be recaptured on the disposal of the asset. Recaptured depreciation is subject to tax at a rate of 22%. For assets depreciated under the declining-balance method, however, the consideration received is deducted from the collective declining-balance account, and, consequently, the recapture is indirect.

Advance depreciation. Advance depreciation is available on ships. A total of 30% (with a maximum of 15% in any single year) of the expenditure exceeding DKK1,572,900 (2019 amount) may be written off in the years preceding the year of delivery or completion. The relief is given if a binding contract has been concluded for construction or purchase of a ship. If a partnership enters into the contract, each partner must meet the DKK1,572,900 (2019 amount) requirement. If a ship is intended for lease, advance depreciation is not allowed in the year of acquisition, unless permission is obtained from the local tax authorities. This rule does not apply to the ships included in the new asset classes (see *Depreciation*).

Relief for trading losses. Trading losses and interest expenses may be set off against other income and chargeable gains. Losses incurred may be set off in full against the portion of the year's taxable income not exceeding an amount of DKK8,385,000 (2019 amount). Losses exceeding DKK8,385,000 (2019 amount) may be set off against 60% of the taxable income for the year. As a result, a company may not reduce its taxable income to less than 40% of the taxable income exceeding DKK8,385,000 (2019 amount).

Losses, including prior-year losses, that cannot be set off against the taxable income for the year may be carried forward infinitely.

Losses may not be offset against interest and other capital income, net of interest paid, if more than 50% of the shares in the company changed ownership since the beginning of the year in which the loss was incurred. In addition, tax losses are forfeited by companies that are not engaged in an activity at the date of change of ownership.

Groups of companies. Joint taxation of Danish affiliated companies, Danish permanent establishments of foreign affiliated companies and real properties of foreign affiliated companies that are located in Denmark is compulsory. The jointly taxed income equals the sum of the net income of the jointly taxed companies, permanent establishments and real properties. An affiliation generally exists if a common shareholder (Danish or foreign) is able to control the company (for example, by holding more than 50% of the voting rights).

Joint taxation with foreign companies is voluntary. If a Danish company elects to be jointly taxed with a foreign company, all foreign affiliated companies must be included in the Danish joint taxation arrangement. These include all subsidiaries, permanent establishments and real estate owned by the Danish company. If the Danish company is owned by a foreign group, the ultimate foreign parent company and all foreign companies affiliated with the ultimate foreign parent company are also included.

A company is considered to be an affiliated company if a controlling interest exists.

A 10-year period of commitment applies if a Danish company elects to be jointly taxed with its foreign affiliated companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT)	25%
Labor market supplementary pension scheme (ATP); approximate annual employer contribution for each full-time employee	DKK2,272
Payroll tax (Loensumsafgift)	
Banks, insurance companies and other financial businesses; levied on total payroll	15%
Other VAT-exempt businesses, including some public bodies; levied on total payroll plus taxable profits, adjusted to exclude financial income and expenses	4.12%
Lotteries and information activities performed by tourist offices, other organizations and some public bodies; levied on total payroll	6.37%
Publishers or importers of newspapers; levied on the value of newspapers sold	3.54%

E. Miscellaneous matters

Foreign-exchange controls. Denmark does not impose foreign-exchange controls.

Debt-to-equity rules. Under thin-capitalization rules, interest paid by a Danish company or branch to a foreign group company is not deductible to the extent that the Danish company's debt-to-equity ratio exceeds 4:1 at the end of the debtor's income year and that the amount of controlled debt exceeds DKK10 million. Limited deductibility applies only to interest expenses relating to the part of the controlled debt that needs to be converted to equity to satisfy the debt-to-equity ratio of 4:1 (that is, a minimum of 20% equity). The thin-capitalization rules also apply to third-party debt if the third party has received guarantees and similar assistance from a group company of the borrower.

The Danish thin-capitalization rules are supplemented through an "interest ceiling rule" and an Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) rule. These rules apply to controlled and non-controlled debt. Only companies with net financial expenses exceeding DKK21,300,000 and DKK22,313,400, respectively (2019 amounts), are subject to these supplementary rules. For jointly taxed companies, the thresholds apply to all of these companies together.

Under the "interest ceiling rule," a company may only deduct net financial expenses corresponding to 2.7% (2019 rate) of the taxable value of certain qualified assets. Deductions for any excess net financial expenses are lost, except for capital losses, which may be carried forward for three years.

Under the EBITDA rule, a company may reduce its taxable income through the deduction of financial expenses by no more than 30%. Net financial expenses exceeding this limit are non-deductible but, in contrast to the interest ceiling rule, the excess expenses can be carried forward for up to five years (if not restricted again by the EBITDA rule). The calculation must be made after taking into account a possible restriction under the interest ceiling rule.

Under the interest ceiling rule, a safe harbor of net financial expenses up to DKK21,300,000 (2019 amount) exists. Under the EBITDA rule, a safe harbor of net financial expenses up to DKK22,313,400 (2019 amount) exists. These expenses are always deductible, subject to restriction under the thin-capitalization rules.

If a company establishes that it could obtain third-party financing on similar terms, it may be allowed to deduct the interest that would normally be disallowed under the ordinary thin-capitalization rules described above. No arm's-length principle can be applied to help the company escape the interest ceiling rule or the EBITDA rule.

Danish tax law does not recharacterize disallowed interest or impose withholding tax on it.

Anti-avoidance legislation. A general anti-avoidance rule has been implemented in the Danish domestic tax law. It is contained in the new Section 3 of the Danish Tax Assessment Act.

The anti-avoidance rule seeks to restrict the benefits of applicable tax law, including EU directives or a double tax treaty, claimed by a taxpayer who participates in an arrangement, or a series of arrangements, that has the primary purpose (or has as one of its primary purposes) to achieve a tax benefit that is contrary to the contents or purpose of the applicable tax law, EU directive or double tax treaty in question.

The global anti-avoidance rule is introduced in accordance with Article 6 of the EU Anti-Tax Avoidance Directive (ATAD) and applies to resident and nonresident companies.

In addition, certain recharacterization rules exist, such as a rule that recharacterizes debt as equity if the debt is treated as an equity instrument according to the tax rules in the country of the creditor.

Although a Danish company or taxable legal entity may change its domicile to another country, this would normally be considered a liquidation with the same tax effect as a taxable sale. The company can transfer its activities abroad, but, to prevent tax avoidance, such a transfer is considered a taxable disposal of the activities.

Controlled foreign companies. Under the CFC legislation, a Danish company, together with other group member companies, holding more than 50% of the voting power of a foreign company must include in taxable income 100% of the taxable income of the subsidiary if the subsidiary is primarily engaged in financial activities. For this purpose, a subsidiary is considered to be primarily engaged in financial activities if more than 50% of the subsidiary's taxable income consists of net financial income and

if more than 10% of the subsidiary's assets are "financial assets" (calculated according to modified Danish tax rules). The CFC rules apply to branches only if the branch is directly held by the Danish company. The income of indirectly held branches is included in the income of its head office.

The Danish CFC legislation should have been changed in accordance with the EU ATAD as of 1 January 2019. However, this has not yet happened. New CFC rules are expected to be in place during 2019.

Anti-hybrid mismatch rules. Denmark has several anti-hybrid mismatch rules.

Under Section 2A of the Danish Corporate Tax Act (anti-"check-the-box" rule), if a Danish company is considered to be transparent according to foreign tax rules (for example, the company is taxed as a branch in a foreign country), in principle, the company is also considered transparent according to Danish tax rules. The rule may imply that a Danish company owned by a US parent company that has "checked the box" on the Danish company cannot deduct interest expenses, royalty expenses or other internal expenses paid to the US parent company because it is treated as a branch office of the parent company. Certain exceptions exist, and case-by-case evaluation is suggested.

Under Section 2B of the Danish Corporate Tax Act, if a Danish entity owes debt to a foreign entity, which according to foreign tax rules is considered equity, the debt for Danish purposes is re-characterized as equity. This implies that the rules for withholding tax on dividends must be observed for interest payments and that no deduction is allowed on such interest payments. Certain exceptions exist, and case-by-case evaluation is suggested.

Under Section 2C of the Danish Corporate Tax Act, branches of entities that are required to register in Denmark may be treated as separate entities for Danish tax purposes if certain conditions are met. This treatment may apply if the parent of the branch is located in a non-EU/non-treaty country and if the Danish branch is considered a separate entity for tax purposes in the parent's country. Certain exceptions exist, and case-by-case evaluation is suggested.

Under Section 5G of the Danish Tax Assessment Act, a Danish company cannot deduct costs that under foreign tax law are deducted from income not subject to Danish taxation. Case-by-case evaluation is suggested.

The Danish anti-hybrid mismatch rules under Section 2A and Section 2B of the Danish Corporate Tax Act will be amended as of 1 January 2020 to make the rules reflect the anti-hybrid mismatch rules of the EU ATAD. Section 2A and Section 2B will be abolished and replaced by new anti-hybrid rules in Sections 8C-8E, and the scope of Section 2C will be expanded.

Transfer pricing. Transactions between affiliated entities must be determined on an arm's-length basis. In addition, Danish companies and Danish permanent establishments must report summary information about transactions with affiliated companies as part of the company's annual tax return.

Danish tax law requires entities to prepare and maintain written transfer-pricing documentation for transactions that are not considered insignificant. Enterprises can be fined if they have not prepared any transfer-pricing documentation or if the documentation prepared is considered to be insufficient as a result of gross negligence or deliberate omission. The documentation can be prepared in Danish, English, Norwegian or Swedish and must be prepared no later than the deadline to file the summary information about transactions with affiliated companies, which is an integrated part of the company's annual tax return. The transfer-pricing documentation must be submitted to the tax authorities within 60 days on request.

The fine for failure to prepare satisfactory transfer-pricing documentation consists of a basic amount of DKK250,000 per year per entity for up to five years plus 10% of the income increase required by the tax authorities. The basic amount may be reduced to DKK125,000 if adequate transfer-pricing documentation is filed subsequently.

Fines may be imposed for every single income year for which satisfactory transfer-pricing documentation is not filed.

In addition, companies may be fined if they disclose incorrect or misleading information for purposes of the tax authorities' assessment of whether the company is subject to the documentation duty.

The documentation requirements for small and medium-sized enterprises apply only to transactions with affiliated entities in non-treaty countries that are not members of the EU/EEA. To qualify as small and medium-sized enterprises, enterprises must satisfy the following conditions:

- They must have less than 250 employees.
- They must have an annual balance sheet total of less than DKK125 million or annual revenues of less than DKK250 million.

The above amounts are calculated on a consolidated basis (that is, all group companies must be taken into account).

Country-by-Country reporting. Entities belonging to a multinational group with a consolidated revenue above DKK5.6 billion (EUR750 million) are subject to Country-by-Country (CbC) Reporting and notification obligations. Denmark generally follows the Organisation for Economic Co-operation and Development guidelines on CbC reporting.

The notification must be submitted by the Danish company or permanent establishment no later than the last day of the reporting period (the entity's income year). If there is more than one Danish entity in the group and these entities are subject to joint taxation in Denmark, the notification can be made by the appointed administrative entity of the Danish joint taxation group on behalf of all entities.

A surrogate or local filing of the CbC Report is required if there is no active agreement on automatic exchange of the report between Denmark and the country where the ultimate parent

entity or another surrogate parent entity filing the report is tax resident.

F. Treaty withholding tax rates

Under Danish domestic law, no withholding tax is imposed on dividends paid to companies if both of the following requirements are satisfied:

- The shares are group shares or subsidiary shares (see Section B).
- A tax treaty between Denmark and the country of residence of the recipient of the dividend provides that Denmark must eliminate or reduce the withholding tax on dividends, or the recipient is resident in an EU member state and falls within the definition of a company under Article 2 of the EU Parent-Subsidiary Directive (90/435/EEC) and the directive provides that Denmark must eliminate or reduce the withholding tax on dividends.

As a result, the reduced treaty rates on dividends in the table below might be eliminated under Danish domestic law.

Non-treaty jurisdictions	22	22	22

- (a) In general, all interest payments to foreign group companies are subject to a final withholding tax of 22%. Several exceptions exist (see Section B). As a result of these exceptions, in general, withholding tax is imposed only on interest payments made to group companies that would qualify as CFCs for Danish tax purposes or if the recipient is not considered to be the beneficial owner, according to the domestic interpretation. Effective from the 2006 income year, withholding tax on interest paid to individuals was abolished.
- (b) Under Danish domestic law, the rate is 0% for royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and for the use of, or the right to use, industrial, commercial or scientific equipment. Under a tax treaty, the general withholding tax rate for royalties of 22% can be reduced to 0%. Royalties paid to a company resident in another EU country are not subject to withholding tax if the provisions of the EU Interest/Royalty Directive are met and if the recipient is considered to be the beneficial owner according to the domestic interpretation.

- (c) The rate is 15% if the recipient is not a company owning at least 25% of the capital.
- (d) The rate is 15% if the recipient is not a company owning at least 10% of the capital.
- (e) The withholding tax rate is 0% if all of the following conditions are satisfied:
- The recipient directly owns at least 25% of the share capital of the payer for a period of 12 consecutive months that includes the date of the distribution of the dividend.
 - The dividend is not taxed in Greenland.
 - The recipient does not deduct the portion of a dividend distributed by it that is attributable to the Danish subsidiary.
- If the above conditions are not met, the withholding tax rate is generally 22%. However, the rate is 15% for dividends on unlisted portfolio shares (shares held by a person owning less than 10% of the company's shares).
- (f) The withholding tax rate is 0% if the recipient owns at least 50% of the share capital in the dividend distributing company and has invested more than EUR2 million in the dividend paying company. The withholding tax rate is 5% if the recipient owns at least 10% of the share capital in the dividend paying company and has invested more than EUR100,000 in the dividend paying company. The withholding tax rate is 10% in all other cases.
- (g) The rate is 22% for payments for the use of, or the right to use, trademarks.
- (h) Denmark honors the USSR treaty with respect to the former USSR republics. Armenia, Azerbaijan, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Uzbekistan have declared that they do not consider themselves obligated by the USSR treaty. Denmark has entered into tax treaties with Estonia, Georgia, Latvia, Lithuania, the Russian Federation and Ukraine.
- (i) Denmark honors the Czechoslovakia treaty with respect to the Slovak Republic.
- (j) The rate is 15% if the recipient is not a company owning at least 20% of the capital of the payer and has invested at least EUR1 million in the capital of the payer.
- (k) The rate is 5% if the recipient is a company that owns at least 70% of the capital of the payer or has invested at least USD12 million in the capital of the payer. The rate is 10% if the recipient is a company owning at least 25%, but less than 70%, of the capital of the payer. For other dividends, the rate is 15%.
- (l) The rate is 10% if the recipient is not a company owning at least 25% of the capital of the payer.
- (m) The treaty does not cover the Hong Kong Special Administrative Region (SAR).
- (n) The withholding tax rate for dividends is 0% if the recipient owns at least 10% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the dividend withholding tax rate is 15%.
- (o) The rate is 20% if the recipient is not a company owning at least 25% of the capital of the payer.
- (p) The rate is 25% if the recipient is not a company owning at least 25% of the capital of the payer.
- (q) The rate is 30% if the recipient is not a company owning at least 25% of the voting power during the period of six months immediately preceding the date of payment.
- (r) The withholding tax rate for dividends is 0% if the recipient owns at least 10% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the dividend withholding tax rate is 10%.
- (s) The rate is 5% if the recipient of the dividends is a company owning at least 25% of the capital of the payer.
- (t) The withholding tax rate for dividends is 0% if the recipient owns at least 10% of the share capital in the payer of the dividends for a continuous period of at least six months. If this condition is not met, the dividend withholding tax rate is 15%.
- (u) The rate applies if the recipient owns at least 25% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the rate is 15%.
- (v) The rate applies if the recipient owns at least 25% of the share capital in the payer of the dividends for a continuous period of at least 12 months. If this condition is not met, the rate is 10%.
- (w) The rate is 15% if the recipient is not a company owning at least 25% of the voting power of the payer.

- (x) The rate is 20% if the recipient is not a company owning at least 25% of the voting power of the payer.
- (y) The rate is 15% if the recipient is not a company owning at least 10% of the shares of the payer. The 0% and 5% rates depend on applicable limitation-of-benefit tests.

In addition to the double tax treaties listed in the table above, Denmark has entered into double tax treaties on savings, double tax treaties on international air and sea traffic, agreements on exchange of information in tax cases and agreements on promoting the economic relationship. The following are the jurisdictions with which Denmark has entered into such agreements:

- Double tax treaties on savings: Anguilla; Aruba; British Virgin Islands; Cayman Islands; Curaçao; Sint Maarten; Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles); Guernsey; Isle of Man; Jersey; Montserrat; and Turks and Caicos Islands
- Double tax treaties on international air and sea traffic: Bermuda, British Virgin Islands, Cayman Islands, Guernsey, Hong Kong SAR, Isle of Man, Jersey, Jordan, Kuwait and Lebanon
- Agreements on exchange of information: Andorra; Anguilla; Antigua and Barbuda; Aruba; Bahamas; Barbados; Belize; Bermuda; Botswana; Brunei Darussalam; Cayman Islands; Cook Islands; Costa Rica; Curaçao; Sint Maarten; Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles); Czech Republic; Dominica; Gibraltar; Grenada; Guernsey; Isle of Man; Jamaica; Jersey; Liberia; Liechtenstein; Macau SAR; Marshall Islands; Mauritius; Monaco; Montserrat; Netherlands; Niue; Panama; Qatar; St. Kitts and Nevis; St. Lucia; St. Vincent and the Grenadines; Samoa; San Marino; Seychelles; Turks and Caicos Islands; United Arab Emirates; Uruguay and Vanuatu
- Agreements on promoting the economic relationship: Aruba; Curaçao; Sint Maarten; and Bonaire, Sint Eustatius and Saba (formerly part of the Netherlands Antilles)

Agreements on exchange of information with respect to taxes have been proposed with Belgium, Greenland, Guatemala and Kuwait.

A. At a glance

Corporate Income Tax Rate (%)	27
Capital Gains Tax Rate (%)	27
Branch Tax Rate (%)	27 (a)
Withholding Tax (%)	
Dividends	10 (b)
Interest	10 (c)
Royalties	27 (d)
Other Dominican-source Income	27 (e)
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The Dominican Tax Regulations do not contemplate an exclusive or additional income tax for branches. Therefore, the standard corporate income tax rate applies.
- (b) This is a final withholding tax applicable to payments to both residents and nonresidents.
- (c) This is a final withholding tax applicable to payments to resident individuals and to nonresident individuals, companies and unincorporated business entities.
- (d) This withholding tax applies to royalty payments made to nonresident persons.
- (e) This withholding tax applies to payments to nonresident or non-domiciled entities or individuals. According to the local legislation, the following types of income, among others, are considered Dominican source income:
- Income from capital, assets or rights situated, placed or used economically in the Dominican Republic
 - Income derived from commercial, industrial, farming, mining and similar activities carried out in the Dominican Republic
 - Income from personal labor, the exercise of a profession or a job
 - Income from the exploitation of all types of industrial property or know-how
 - Income from technical assistance services, provided from abroad or within the Dominican Republic
 - Income from rental or leasing activities

B. Taxes on corporate income and gains

Corporate income tax. Resident corporations are subject to tax on their Dominican-source income and on their foreign-source income derived from investments and financial gains, such as dividends and interest from bonds acquired abroad.

A company is resident in the Dominican Republic if it is incorporated in the Dominican Republic.

A foreign company is considered domiciled in the Dominican Republic if it has its principal business or its effective management located in the Dominican Republic. Nonresidents operating through a permanent establishment are subject to income tax as companies incorporated in the Dominican Republic.

Corporate income tax rates. The corporate income tax rate is 27%.

Full exemptions or certain income tax credits usually apply to companies established in designated Free-Trade Zones (FTZs) or benefiting from other special incentive laws, including, among others, the Frontier Development Law (Law 28-01), the Tourism Development Law (Law 158-01, as amended by Law 195-13), the Renewable Energies Law (Law 57-07) and the Film Law (Law 108-10).

Asset tax. The annual asset tax is assessed at a rate of 1% on the assets registered in the taxpayer's accounting books.

The tax base is the net carrying value of the taxpayer's assets at the end of the fiscal year as indicated in the balance sheet, not adjusted by inflation and after applying depreciation, amortization and reserves for bad debt expenses. Investments in shares of another company, real estate used for agricultural exploitation and advance tax payments are excluded from the tax base. Corporate income tax is creditable against the asset tax. The asset tax is calculated in the annual income tax return.

For financial institutions, electricity companies, stockbrokers, pension fund administrators, investment fund administrators and securitization companies, the tax base for the asset tax is the total value of fixed assets (net of depreciation) according to the balance sheet at the end of the tax period.

Entities that benefit from corporate income tax exemptions based on special laws or public contracts approved by Congress are exempt from the asset tax.

Capital gains. Gains derived from direct and indirect transfers of assets or rights located or economically exploited in the Dominican Republic are taxable and subject to the capital gains tax rate of 27%. Under the Dominican Republic Tax Code, capital gains may arise from the transfer of shares, land or other capital assets possessed by taxpayers, regardless of whether the gains are connected to the taxpayers' businesses. The following assets are not considered capital assets:

- Commercial inventories or assets possessed principally for sale to clients in the ordinary course of business
- Depreciable assets
- Accounts or promissory notes acquired in the ordinary course of business for services rendered or derived from the sale of inventory assets or assets sold in the ordinary course of business

The capital gain tax base equals the difference between the transfer price of the assets and the cost of acquisition or production (adjusted for inflation).

Administration. In general, the tax year is the calendar year. However, companies may adopt a fiscal year ending on 31 March, 30 June or 30 September. The income tax return must be filed within 120 days after the end of the fiscal year.

All companies must make monthly income tax prepayments. For taxpayers that had an effective tax rate (ETR) in the preceding tax year that was lower or equal to 1.5%, each prepayment equals the amount resulting from applying the 1.5% rate to the gross income reported in the preceding fiscal year. Taxpayers with an ETR higher than 1.5% must make monthly prepayments corresponding to 1/12 of the income tax paid in the preceding fiscal year. The ETR is determined by dividing the income tax paid in the preceding fiscal year by the gross income of the same period.

Taxpayers can request a two-month income tax return filing extension.

Indemnity interest at a rate of 1.10% is charged monthly on outstanding balances of taxes due. In addition, a penalty of a 10% surcharge applies for the first month, and a 4% surcharge applies for each month or fraction of a month thereafter.

Noncompliance by the taxpayer with tax obligations may be subject to a penalty of 5 to 30 minimum wages.

In addition, a penalty equal to 0.25% of the income declared in the preceding fiscal year may be applied.

Dividends. Dividends (and all other types of distributions of earnings) are subject to a final withholding tax of 10%. Under the Dominican Tax Code and its regulations, a dividend is defined as any distributions of profits or reserves made by any type of corporation or entity to a shareholder, partner or participant. The following are included in the concept of profit distributions:

- Accounts receivable or similar arrangements that a corporation or entity has with its shareholders, members or participants, if they were not generated by a commercial transaction and if no principal or interest payments have been made in a period of more than 90 calendar days.
- Share capital reductions, if capitalized reserves and/or retained earnings exist, until these reserves and earnings accounts are exhausted. This does not apply to capital returns derived from the liquidation of the entity, whereby the first amounts distributed are deemed to be capital returns rather than the distribution of retained earnings.

Foreign tax relief. Foreign income tax paid on income derived from investments and financial gains abroad may be claimed as a credit against the income tax payable in the Dominican Republic. However, such credit is limited to the portion of Dominican Republic tax allocable to the foreign-source income subject to tax abroad.

C. Determination of trading income

General. Tax is imposed on taxable profits, which correspond to the accounting profits adjusted in accordance with the income tax law.

Expenses incurred to generate taxable income and preserve the source of such income are deductible on an accrual basis if properly documented. However, certain expenses are not deductible, including the following:

- Expenses not properly documented
- Unauthorized bad debt provisions
- Prior period tax adjustments
- Personal expenses
- Profits to be capitalized

In addition, the Dominican Tax Code contains interest deduction rules, which are described below.

Under Dominican Republic law, the deduction of interest depends on certain general and specific conditions.

The following are the general conditions for the deduction of interest:

- The interest should be related to the acquisition, maintenance and/or operation of taxable income-producing assets.
- Corporate entities should recognize interest expenses according to the accrual method of accounting.
- Expenses and costs, such as interest payments, must be supported by corresponding documentation (loan agreement and invoices).
- The loan and interest rates agreed between the parties must comply with the arm's-length principle.
- The 10% withholding tax applicable to the gross amount of such payments has been applied and paid to the Dominican Republic tax authorities.

In addition, if the payment exceeds DOP50,000 (approximately USD1,000), the payment must have been made through any of the means available in the financial industry (for example, wire transfers and checks).

Dominican Republic law provides the following specific limitations for the deduction of interest:

- A special anti-avoidance rule, which limits the interest deductible based on the effective tax rate of the interest recipient
- A thin-capitalization limitation, which limits the amount deductible to three times the ratio of the average of equity to the average of debt that generated such interest in a given year

Special industries. Rules applicable to special industries are outlined below.

Nonresident insurance companies. Nonresident insurance companies are taxed on a deemed income equal to 10% of their gross income (premiums) derived from insurance services rendered to resident or domiciled companies or individuals.

Transportation. Income derived from transportation services rendered by nonresident transportation companies from the

Dominican Republic to other countries is deemed to equal 10% of the gross income derived from such services.

Others. Film distribution companies are taxed in the Dominican Republic based on a deemed income equal to 15% of their gross income derived from the distribution of foreign films. In addition, foreign communications companies are taxed on a deemed income equal to 15% of their gross income.

Inventories. In general, last-in, first-out (LIFO) is the approved method for valuing inventory. However, taxpayers may use other methods if previously approved by the tax authorities.

Provisions. In general, provisions are not deductible for income tax purposes. However, the Tax Code and income tax regulations provide for limited exceptions to this rule, including a provision for uncollectable accounts receivable. This provision is allowable as a deductible expense if it is calculated based on 4% of the accounts receivable balance at the close of the fiscal year and if the amount is authorized by the Tax Administration.

Provisions for gratifications, bonuses and other similar compensation items are deductible for income tax purposes if the amounts in the provisions are paid by the filing date of the income tax return.

Tax depreciation and amortization allowances. Depreciation is calculated using a variation of the declining-balance method. Intangibles, such as patents, models, drawings and copyrights, may be amortized using the straight-line method if they have a definite useful life.

Salvage value is not taken into account in calculating depreciation. The following are the generally applicable depreciation rates provided by law.

Asset	Rate (%)
Buildings	5
Light vehicles and office equipment, including computers	25
Other assets	15

Relief for losses. Losses generated by companies in the ordinary course of a trade or business may be carried forward for a five-year period. In each fiscal year, 20% of the total loss can be used to offset taxable income. However, in the fourth and fifth years, only 80% and 70%, respectively, of the total taxable income may be offset by the 20% loss carry forward. Losses derived from reorganizations are not deductible for income tax purposes. Net operating losses may not be carried back.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; standard rate	18
Social security contributions	
Mandatory health contributions; imposed on salary up to a maximum amount of 10 legal minimum wages	

Nature of tax	Rate (%)
Employer	7.09
Employee	3.04
Mandatory pension contributions; imposed on salary up to a maximum amount of 20 legal minimum wages	
Employer	7.10
Employee	2.87
Government Training Institution (INFOTEP) contribution on the payroll amount; payable monthly by the employer	1
Labor risk contributions; payable by employer on salary up to a maximum amount of 4 legal minimum wages; rate varies according to the risk level of the company's activity	1.10 to 1.30
Workers' compensation insurance	Various
Telecom Tax; imposed on the consumption of telecom services by legal entities and individuals in the Dominican Republic; tax rate applied to gross payment	10
Tax on financial transactions; imposed on the value of checks and wire transfer transactions and on payments made to third parties (the tax applies even if the wire transfer is made to an account in the same bank)	0.0015

E. Miscellaneous matters

Foreign-exchange controls. The Central Bank of the Dominican Republic (Banco Central de la República Dominicana) has liberalized foreign-exchange controls. Only individuals and companies generating foreign currency from exports, services rendered and other specified activities are required to exchange foreign currency with the Central Bank through commercial banks. The Central Bank is not required to furnish foreign currency to satisfy demands for foreign payments. Individuals and companies may buy foreign currency from, or sell it to, commercial banks.

As of 3 December 2018, the exchange rate was USD1 = DOP50.1725.

Transfer pricing. Transfer-pricing regulations apply to entities that perform transactions with the following:

- Nonresident "related parties"
- Resident "related parties"
- Individuals or entities domiciled or located in states with preferential tax regimes or low or no taxation (tax havens)

Under the transfer-pricing regulations, "related parties" include, among others, the following situations:

- One of the parties participates in the direct or indirect management, control or equity of the other.
- The same individuals or entities participate directly or indirectly in the management, control or equity of the parties.
- One of the parties transfers more than 50% of its production to the other, and at least one of them is resident or domiciled in the Dominican Republic.

Under the transfer-pricing regulations, the prices established in controlled transactions must comply with the arm's-length principle, which means that the prices established among related parties should be agreed as if they were carried among independent parties, in comparable transactions and under the same or similar circumstances.

Taxpayers subject to the transfer-pricing regulations must comply with the following requirements:

- They must file a Transfer Pricing Tax Return. This return must be filed with the tax authorities within 180 days after the end of the fiscal year.
- They must conduct a transfer-pricing study in order to justify the prices used in intercompany transactions.

However, if taxpayers only carry on controlled transactions locally or if their controlled transactions do not exceed DOP11,015,961, they are not required to conduct a transfer-pricing study.

The Dominican tax authorities have the power to challenge the prices agreed between the related parties and adjust them, if the prices agreed result in lower taxation in the Dominican Republic or a deferral in the tax payment.

F. Treaty withholding tax rates

The following are the maximum withholding tax rates under the Dominican Republic's double tax treaties.

	Dividends	Interest	Royalties
	%	%	%
Canada	18 (a)	18	18
Spain	10 (b)	10	10
Non-treaty jurisdictions	10	10	27

- (a) Under the tax treaty with Canada, if the Dominican Republic enters into a treaty with another country in which the applicable income tax withholding rate for dividends is lower than the rate provided in the treaty with Canada that same tax treatment automatically applies to the treaty with Canada.
- (b) Dividends paid to Spanish entities that hold 75% or more of the distributing entity's capital are subject to a 0% tax.

Because of the frequent changes to the tax law in Ecuador in recent years, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	0 to 10 (b)
Branch Tax Rate (%)	25 (a)
Withholding Tax (%) (c)	
Dividends	0/7 (d)
Interest	25 (e)
Royalties	25
Technical Assistance	25
Services	25
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (f)

- (a) Companies that reinvest their profits in Ecuador and use them to acquire assets for productive activities in Ecuador are entitled to a reduction of 10 percentage points in the corporate income tax rate on the reinvested amount (that is, the reinvested profits are taxed at 15%) if the company increases its capital stock and such increase is registered with the Commercial Register by 31 December of the fiscal year.

- (b) Capital gains tax on sales of tangible assets is not imposed in Ecuador. Gains derived from direct or indirect transfers of shares of Ecuadorian entities are subject to flat-rate income tax.
- (c) These withholding taxes are imposed on remittances abroad to non-domiciled companies and nonresident individuals. The withholding tax rates may be reduced under tax treaties. For further details concerning withholding taxes, see Section B.
- (d) For details, see Section B.
- (e) A 25% withholding tax is imposed on payments of interest to non-domiciled companies and nonresident individuals unless the interest is paid on loans granted by financial institutions, nonfinancial specialized entities registered with the Superintendence of Banks or multilateral institutions (Andean Corporation for Promotion, International Monetary Fund or World Bank). Thin-capitalization rules apply to the deductibility of interest paid to related parties (see Section E).
- (f) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on companies domiciled in Ecuador and on foreign companies. Companies domiciled in Ecuador include those incorporated in Ecuador and companies incorporated in foreign countries that have been approved as branches by the Superintendence of Companies after a legal proceeding. Companies incorporated in Ecuador are subject to tax on their worldwide income. Foreign companies are subject to tax on income derived from activities within Ecuador and from goods and assets located within Ecuador.

Rate of corporate tax. The standard rate of corporate income tax is 25%.

The corporate income tax rate is increased to 28% if either of the following conditions is met:

- The local entity has not reported the corporate structure (until the last individual) or it partially reported it.
- An entity domiciled in a tax haven, low-tax jurisdiction or in a preferential-regime jurisdiction is in the corporate structure of the local taxpayer and its beneficial owner is an individual resident in Ecuador.

The 28% rate is applied to the tax base in proportion to the ownership affected by one of the events listed above. If this ownership is equal to or exceeds 50% of the local entity corporate capital, the 28% rate applies to the entire tax base.

Exporting, manufacturing or receptive tourism companies that reinvest their profits in Ecuador and use them to acquire assets for productive activities in Ecuador are entitled to a reduction of 10 percentage points in the corporate income tax rate on the reinvested amount (that is, the reinvested profits are taxed at 15%) if they retain the reinvested profits until 31 December of the tax year following the tax year in which the profits are earned.

Capital gains. Capital gains tax on sales of tangible assets is not imposed in Ecuador.

Gains derived from direct or indirect transfers of shares (and other capital representative rights) of Ecuadorian entities are subject to flat-rate income tax in accordance with the following progressive table.

Gains		Rate %
Exceeding USD	Not exceeding USD	
0	20,000	0
20,000	40,000	2
40,000	80,000	4
80,000	160,000	6
160,000	320,000	8
320,000	—	10

Indirect transfers are taxable if both of the following conditions are met:

- At any time during the tax year in which the transfer is performed, the real value of the shares of the Ecuadorian entity or permanent establishment represents directly or indirectly 20% or more of the real value of the nonresident company's shares.
- In the same fiscal year or 12 months before the transaction, the transfer of shares of the nonresident company by the same seller directly or indirectly corresponds to an aggregate amount exceeding 300 basic fractions of income tax for individuals (USD3,381,000 for the 2018 fiscal year). This amount is increased to 1,000 basic fractions of income tax for individuals (USD11,270,000 for the 2018 fiscal year) if the transaction does not exceed the 10% of the total share capital.

Under the above rule, the Ecuadorian entity whose shares were negotiated or transferred is considered the substitute for the taxpayer and, consequently, is responsible for the income tax payment.

This tax does not apply in the case of corporate restructures, mergers or spin-offs, provided that the beneficial owners of the shares do not change before the procedure.

Losses on transfers of shares between related parties are not deductible.

Administration. The fiscal year runs from 1 January to 31 December. No other closing dates are permitted, regardless of the date a business begins operations. Returns must be filed between 10 April and 28 April.

Companies must make an advance payment of income tax equal to the sum of 0.2% of the equity of the company, 0.2% of the total costs and expenses deducted in the calculation of income tax, 0.4% of the total assets of the company and 0.4% of the total income subject to income tax. The equity and total assets are determined as of the end of the preceding fiscal year. The other amount is the total for the preceding fiscal year.

The amount of the advance payment is calculated in the annual tax return. The advance payment is payable in two installments, which are due in July and September. To calculate the amount of the advance payment, the withholdings made with respect to the taxpayer in the preceding year are subtracted.

As a result, if no tax is payable for a fiscal year or the tax payable is lower than the advance payment, it is possible to file a refund petition for the income tax overpaid.

The penalty for late filing is 3% of the income tax due for each month or fraction of a month of the delay, up to a maximum of 100% of the tax due. Interest at the maximum legal rate, which floats, is levied on all increases in tax assessments from the date the tax was originally due to the date of payment.

Withholding taxes. A 25% withholding tax is generally imposed on the following payments abroad:

- Interest, royalties and payments for technical assistance to non-domiciled companies and nonresident individuals
- Payments to nonresident individuals for services rendered
- Payments to non-domiciled companies for professional services rendered abroad or occasional services rendered in Ecuador

Income tax withholding at a rate of 25% applies to all reimbursements of expenses abroad.

Income tax withholding at a rate of 35% applies to cross-border payments made to recipients in tax havens, low-taxation jurisdictions or preferential tax regimes.

Penalties are imposed for failures to comply with the withholding requirements. Withholding agents who deliberately fail to provide taxpayers, totally or partially, with tax withholding receipts are subject to imprisonment and fines.

Dividends. In general, dividends distributed after the payment of income tax are not subject to income tax or withholding tax. However, if the effective beneficiary is an individual resident in Ecuador, a withholding tax is imposed at rates ranging from 5% and 35%, according to a progressive table issued by the tax authorities.

For anticipated dividend distributions (before the annual income tax return), withholding tax at a rate equal to the corporate income tax rate is applied. This is a self-assessment methodology and the income tax paid is considered to be a tax credit for the local entity in its annual income tax return.

Foreign tax relief. Income received by companies domiciled in Ecuador is exempt for income tax purposes if it was subject to tax abroad (the withholding tax on such income is nondeductible); otherwise, the income is taxable and the amount of the withholding tax may be used as a tax credit if this income comes from tax havens, low-tax jurisdictions or preferential tax regime jurisdictions.

C. Determination of trading income

General. Taxable income is based on accounting profits after the corresponding tax reconciliation adjustments.

In computing taxable income, a company can deduct expenses incurred in producing income, including production and distribution costs, interest charges, royalty payments and depreciation. Also, employee profit-sharing distributions (15% of gross profit) can be deducted before computing taxes. Special provisions govern the computation of taxable income from the export of petroleum and air and maritime transportation.

Expenses incurred abroad are generally deductible if corresponding taxes are withheld and if the payment constitutes taxable

income for the recipient. The following cross-border payments are deductible subject to specified limitations:

- Payments for imports, including interest and financing fees, as provided in import licenses
- Export fees of up to 2% of the export value
- Interest paid to related parties that are subject to the thin-capitalization rules (see Section E)
- Payments under financial leases
- Indirect costs allocation (up to 5% of the tax base)
- Royalties, technical services, management fees and consulting services paid to related parties (up to 20% of the sum of the tax base and these expenses)

Nondeductible expenses include the following:

- Interest paid on foreign loans, to the extent the interest rate exceeds the limit established by the Central Bank Board (the maximum rate is the Prime Rate), and interest on foreign loans not registered at the Ecuadorian Central Bank
- Losses on sales of assets between related parties
- Leasing payments with respect to leasebacks or trade with related parties

Inventories. Inventory is generally stated at cost (calculated using the average, first-in, first-out [FIFO] or actual methods). Inventory write-offs must be documented through a sworn statement that the inventory was destroyed or donated.

Tax depreciation and amortization. Depreciation and amortization expenses are deductible for income tax purposes. The tax law provides the following maximum straight-line depreciation rates applicable for tax purposes.

Asset	Rate (%)
Commercial and industrial buildings, aircraft and ships	5
Office equipment	10
Motor vehicles and trucks	20
Plant and machinery	10
Computers	33

For tax purposes, as a general rule, expenditures to acquire property and other assets that produce revenue must be amortized over at least 5 years, using a straight-line depreciation rate of 20%. Intangibles must be amortized over either the term of the relevant contract or a 20-year period.

The tax authorities may approve other methods and annual rates for depreciation and amortization.

Research and development expenses are generally written off over five years.

Relief for losses. Net operating losses may be carried forward and offset against profits in the following five years, provided that the amount offset does not exceed 25% of the year's profits. Loss carrybacks are not permitted.

Groups of companies. For tax purposes, no measures exist for filing consolidated returns and relieving losses within a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on sales and commercial transactions, imports, rendering of services and intellectual property rights; principal products that are exempt are food products in their natural state, drugs and veterinary products	12
Outflow tax (OT); imposed on all cross-border payments or money transactions abroad, with or without the intervention of financial institutions, and monies deposited abroad through bank transfers, OT also applies to any form of termination of obligations and checks or wire transfers; tax is withheld at source; foreign banks operating in Ecuador must pay the tax monthly; the tax law provides that OT applies to payments made from foreign bank accounts of Ecuadorian entities if OT was not levied on the cash when it was initially transferred to the foreign bank account and to exports of goods and services if the cash does not enter Ecuador within six months after the goods arrive at their destination or the services begin to be rendered; OT paid on imports of raw materials, supplies and capital goods may be used as a tax credit for income tax purposes for the following five years if such goods are used in production processes and listed in a resolution issued by the Internal Revenue Service (IRS) of Ecuador	5

E. Miscellaneous matters

Foreign-exchange controls. All transactions in Ecuador must be conducted in US dollars.

Debt-to-equity rules. A thin-capitalization rule applies in Ecuador. Any interest paid on loans from related parties in excess of a 3:1 debt-to-equity ratio is not deductible.

Free-trade zone. The signatories of the Andean Community or the former Andean Pact (Bolivia, Colombia, Ecuador and Peru) have entered into a free-trade agreement. However, Peru signed the agreement with some restrictions. Under the agreement, merchandise and goods manufactured in one of the signatory countries may enter the other signatory countries free of customs duties. All items imported from other countries are subject to a common external customs duty.

Transfer pricing. In general, transfer-pricing rules in Ecuador follow Organisation for Economic Co-operation and Development (OECD) rules, because they require fulfillment of the arm's-length standard. Nevertheless, the technical preferences of the IRS are quite specific and may imply significant differences when

measuring compliance with the rules. Special rules apply to oil, bananas and metallic commodities.

In addition to traditional ownership-control criteria to determine relationships between parties, since 2008, the law considers companies related if they are domiciled in foreign jurisdictions listed as tax havens by the Ecuadorian IRS (87 jurisdictions) or if they are paying anywhere else a corporate income tax deemed as “low” by the IRS (as of 2019, the threshold is 15%).

Transfer-pricing information must be documented by all companies having transactions with related parties, including domestic ones. Companies must file their documentation with the IRS if certain conditions are met, as described below.

Income taxpayers that have carried out transactions with related parties during a fiscal year in an amount exceeding USD3 million must submit the Transfer Pricing Annex to the IRS.

Income taxpayers that have carried out transactions with related parties during a fiscal year in an amount that exceeds USD15 million must submit the Transfer Pricing Annex and the Transfer Pricing Comprehensive Report to the IRS.

Income taxpayers that do not meet the minimum amounts mentioned above must submit the Transfer Pricing Annex or the Transfer Pricing Comprehensive Report at the request of the IRS.

Transactions that are added up for purposes of the threshold include most balance-sheet movements.

Certain transactions (most of them are domestic if certain conditions are met) are not added up for purposes of the threshold and are not part of the compulsory Annex or Report, but their documentation may be requested at any time by the IRS.

The deadline to file the Transfer Pricing Annex and the Transfer Pricing Comprehensive Report is two months after the deadline for the filing of the corporate income tax return, which includes certain declarations on the total amounts of relevant related parties’ transactions.

Taxpayers involved in transactions with related parties are exempt from the application of the transfer-pricing regime if they satisfy all of the following conditions:

- Their corporate income tax is higher than 3% of taxable income.
- They do not conduct business with residents in tax havens or lower-tax jurisdictions.
- They do not have contracts with government institutions for the exploration or exploitation of nonrenewable resources.

Transactions covered by an Advanced Pricing Ruling (APR) of the IRS do not need to be reported. APRs may be requested at any time and for any transaction, but they are commonly used to eliminate deductibility restrictions that the Ecuadorian tax law imposes on related-party transactions regarding administrative and technical services, royalties, consultancy, technical assistance and similar items.

F. Treaty withholding tax rates

Under an agreement with Bolivia, Colombia and Peru (the Andean Pact), income earned in those countries is generally not taxed in Ecuador to avoid double taxation. The withholding tax rates under Ecuador's bilateral treaties are shown in the table below. Ecuadorian law has established a refund mechanism regarding the benefits from double tax treaties. Under this mechanism, the full applicable withholding is made with respect to payments abroad exceeding 20 basic fractions of income tax for individuals (USD225,400 for the 2018 fiscal year), and a tax claim must then be presented to the IRS to recover the excess amount withheld.

	Dividends (a)	Interest	Royalties
	%	%	%
Belarus	5/10	10	10
Belgium	15	10	10
Brazil	0	15	15 (c)
Canada	5/15	15	10/15
Chile	5/15	4/15	10/15
China (mainland)	0/5	0/10	0/10
France	15	10/15	15
Germany	15	15	15
Italy	15	0/10	5
Korea (South)	5/10	0/12	5/12
Mexico	5	10/15	10
Qatar	5/10	10	10
Romania	15	10	10
Singapore	0/5	0/10	10
Spain	15	10/15	15
Switzerland	15	10	10
Uruguay	10/15	15	10/15
Non-treaty jurisdictions	0	25 (b)	25

- (a) Dividends are exempt from withholding tax under Ecuadorian domestic law if corporate income tax was paid on the profits out of which the dividends were distributed.
- (b) A 25% withholding tax is imposed on the payment of interest abroad unless the interest is paid on loans granted by financial institutions, specialized non-financial entities qualified by the control authorities in Ecuador or multilateral institutions.
- (c) Trademark royalties are taxed at a rate of 25%.

A. At a glance

Corporate Income Tax Rate (%)	22.5 (a)
Capital Gains Tax Rate (%)	
Sales of Securities	10/22.5 (a)(b)
Sales of Other Assets	22.5 (a)
Branch Tax Rate (%)	22.5 (a)
Withholding Tax (%)	
Dividends	10 (c)
Interest	20 (c)
Royalties from Patents, Know-how, etc.	20 (c)
Services	20 (c)
Branch Remittance Tax	5 (d)
Net Operating Losses (Years)	
Carryback	0 (e)
Carryforward	5

- (a) The standard corporate income tax rate is 22.5%. Exceptions to the 22.5% rate exist (see Section B).
- (b) For details regarding the 10% rate, see Section B.
- (c) This is the standard rate. The rate may be reduced to 5% under domestic law for dividends. It also may be reduced under a tax treaty. Exemptions may apply in certain circumstances. The tax is a final tax imposed on gross payments. Also, see Section B.
- (d) A branch remittance tax of 5% is payable within 60 days after the financial year-end.
- (e) Only losses incurred in long-term projects may be carried back to offset profits from the same project for an unlimited number of years.

B. Taxes on corporate income

Corporate income tax. Egyptian corporations are subject to corporate profits tax on their profits derived from Egypt, as well as on profits derived from abroad, unless the foreign activities are performed through a permanent establishment located abroad. Foreign companies performing activities through a permanent establishment in Egypt are subject to tax only on their profits derived from Egypt.

Rates of corporate income tax. The standard rate of corporate income tax is 22.5%.

Exceptions to the 22.5% rate exist. Oil prospecting and production companies are subject to tax on their profits at a rate of 40.55%. The Suez Canal Company, the Egyptian General Petroleum Company and the Central Bank of Egypt are subject to tax on their profits at a rate of 40%.

Capital gains

From the sale of securities. The following rates apply to capital gains derived from the sale of securities by resident juridical persons:

- A 10% rate applies to capital gains on securities registered at the Egyptian Stock Exchange that are sourced in Egypt (suspended for listed securities for a further three years [from 17 May 2017 to 16 May 2020]).
- The standard corporate tax rate of 22.5% applies to capital gains on securities not registered with the Egyptian Stock Exchange that are sourced in Egypt, capital gains on securities realized abroad and capital gains on shares.

From the sale of other assets. Tax on capital gains on other assets is calculated at the ordinary corporate profits tax rates in the same manner as ordinary business profits and is not calculated separately. Trading and capital losses derived from sales of other assets are deductible against taxable capital gains.

Administration. Companies must file their annual tax returns, together with all supporting schedules and the original financial statements, before 1 May of each year, or four months after the end of the financial year. The tax return must be signed by the taxpayer. Taxpayers can file a request for an extension of the due date for filing the tax return if the estimated amount of tax is paid at the time of the request. A request for an extension must be filed at least 15 days before the due date. An extension of up to 60 days may be granted. An amended tax return can be filed within 30 days after the original due date.

Any tax due must be paid when the tax return is filed.

A late penalty is imposed at a rate of 2% plus the credit and discount rate set by the Central Bank of Egypt in January of each year.

The law has set up appeals committees at two levels — the Internal Committee and the Appeal Committee. The Appeal Committee's decision is final and binding on the taxpayer and the tax department, unless a case is appealed to the court within 30 days of receiving the decision, which is usually in the form of an assessment.

Dividends. Dividends paid by corporations or partnerships, including companies established under the special economic zone system, to resident juridical persons, nonresident persons, or nonresident juridical persons that have a permanent establishment in Egypt are subject to tax on dividends.

Tax on dividends is imposed at a standard rate of 10% without any deductions or exemptions. However, this rate can be reduced to 5% if both of the following conditions are fulfilled:

- The recipient holds more than 25% of the distributing company's capital or voting rights.
- The recipient holds the shares or commits to hold the shares for a period of not less than two years (effective from 21 August 2015).

Under the law, foreign branches' profits in Egypt are considered distributed profits within 60 days after the financial year-end. As a result, a branch must pay the dividend tax on its annual profits

within 60 days after the financial year-end. In addition, branch remittance tax at a rate of 5% applies to foreign branches' profits.

The tax law grants exemptions for investment funds, parent companies and holding companies under some conditions.

Dividends in the form of free stocks are not subject to tax on dividends.

Withholding tax. In general, payments for all services performed by nonresident companies for Egyptian companies in or outside Egypt are subject to withholding tax at a rate of 20%. However, this withholding tax does not apply to payments related to the following activities:

- Transportation
- Shipping
- Insurance
- Training
- Participation in conferences and exhibitions
- Registration in foreign stock markets
- Direct advertising campaigns
- Hotel accommodation
- Services related to religious activities

Foreign tax relief. Foreign tax paid by resident entities outside Egypt can be deducted if supporting documents are available.

Treaties entered into between Egypt and other countries provide a credit for taxes paid abroad on income subject to corporate income tax in Egypt.

C. Determination of taxable income

General. Corporate income tax is based on taxable profits computed in accordance with generally accepted accounting principles, modified for tax purposes by certain statutory provisions primarily concerning depreciation, provisions, inventory valuation, intercompany transactions and expenses. Interest on bonds listed on the Egyptian stock exchange is exempt from tax if certain conditions are satisfied.

Taxable profits are based on actual revenues and costs. Consequently, unrealized revenues and costs are not included in the tax base.

Start-up and formation expenses may be deducted in the first year.

The deductibility of a branch's share of head office overhead expenses is limited to 10% of the taxable net profit. Head-office expenses are fully deductible if they are directly incurred by the branch and are necessary for the performance of the branch's activity in Egypt. Such expenses must be supported by original documents and approved by the head office auditors.

Interest paid on loans and overdrafts with respect to a company's activities is deductible after offsetting interest income. Interest paid to individuals who are not subject to tax or exempt from tax is not deductible. Deductible interest is limited to the interest computed at a rate equal to twice the discount rate determined by the Central Bank of Egypt.

Inventories. Inventory is normally valued for tax purposes at the lower of cost or market value. Cost is defined as purchase price plus direct and indirect production costs. Inventory reserves are not permissible deductions for tax purposes. For accounting purposes, companies may elect to use any acceptable method of inventory valuation, such as first-in, first-out (FIFO) or average cost. The method should be applied consistently, and if the method is changed, the reasons for such change should be stated.

Provisions. Provisions are not deductible except for the following:

- Provision for up to 80% of loans made by banks, which is required by the Central Bank of Egypt
- Insurance companies' provision determined under Law No. 10 of 1981

Bad debts are deductible if the company provides a report from an external auditor certifying the following:

- The company is maintaining regular accounting records.
- The debt is related to the company's activity.
- The debt appears in the company's records.
- The company has taken the necessary action to collect the debt.

Depreciation and amortization allowances. Depreciation is deductible for tax purposes and may be calculated using either the straight-line or declining-balance method. The following are the depreciation rates.

Type of asset	Method of depreciation	Rate (%)
Buildings, ships and aircraft	Straight-line	5
Intangible assets	Straight-line	10
Computers	Declining-balance	50
Heavy machinery and equipment	Declining-balance	25
Small machinery and equipment	Declining-balance	25
Vehicles	Declining-balance	25
Furniture	Declining-balance	25
Other tangible assets	Declining-balance	25

The law allows a taxpayer to claim a deduction of 30% of the costs of new or used equipment and machines as accelerated depreciation if the assets are used for production purposes. This deduction applies only in the first tax period in which the equipment and machines are used.

Relief for losses. Tax losses may be carried forward for five years. Losses incurred in long-term projects may be carried back for an unlimited number of years to offset profits from the same project.

Losses incurred outside Egypt cannot be offset against taxable profits in Egypt.

If capital losses exceed capital gains realized from disposals of securities and shares in a tax year, the excess can be carried forward for three years.

Groups of companies. Associated or related companies in a group are taxed separately for corporate income tax purposes. Egyptian

law does not contain a concept of group assessment under which group losses may be offset against profits within a group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	Various
Customs duties	
General, ad valorem	Various
On value of machinery needed for investments by companies	5
Stamp duties on bills, promissory notes and letters of guarantee as well as most types of documents, contracts, checks and receipts (shares and bonds listed on the Egyptian Stock Exchange are exempt)	Various
Social insurance	
On monthly base salary, up to EGP1,510; paid by	
Employer	26
Employee	14
On amount of variable salary (any amount other than base salary) of EGP3,360 a month; paid by	
Employer	24
Employee	11
On contract labor force	18

E. Miscellaneous matters

Foreign-exchange controls. Egypt has a free-market exchange system. Exchange rates are determined by supply and demand, without interference from the central bank or the Ministry of the Economy.

Debt-to-equity rules. Under the new tax law, the maximum debt-to-equity ratio is 4:1. If the debt exceeds such ratio, the excess interest may not be claimed as a deductible expense.

Transfer pricing. Egyptian tax law contains specific tax provisions relating to transfer pricing, which are based on the arm's-length principle. Under these measures, the tax authorities may adjust the income of an enterprise if its taxable income in Egypt is reduced as a result of contractual provisions that differ from those that would be agreed upon by unrelated parties.

However, according to Egyptian tax law, it is possible to enter into arrangements in advance with the Tax Department regarding a transfer-pricing policy through an advance pricing agreement (APA). An APA ensures that transfer prices will not be challenged after the tax return is submitted and, accordingly, eliminates exposure to penalties and interest on the late payment of taxes resulting from adjustments of transfer prices.

The Egyptian Tax Authority (ETA), in association with the Organisation for Economic Co-operation and Development (OECD), issued transfer-pricing guidelines in 2010. These

guidelines advise taxpayers on the application of the arm's-length principle in pricing their intragroup transactions and outline the documentation that taxpayers should maintain as evidence to demonstrate their compliance with the arm's-length principle.

On 22 May 2018, the Egyptian government issued Ministerial Decree No. 221 of 2018, which amended the Income Tax Law Executive Regulations to align Egypt's rules more closely with the international consensus on transfer pricing reflected in the OECD transfer-pricing guidelines.

On 23 October 2018, the ETA issued a revised version of the 2010 transfer-pricing guidelines on its website. The new guidelines consist of the following two parts:

- Principles and Implementation
- Advance Pricing Agreements

The guidelines introduce a three-tiered transfer-pricing documentation approach and introduce the following significant new compliance obligations in Egypt:

- **Local file:** A taxpayer engaged in transactions with related parties is expected to prepare local transfer-pricing documentation and submit it to the ETA within two months following the filing of the 2018 corporate tax return.
- **Country-by-Country Report (CbCR):** An Egyptian parent company of a multinational group with consolidated group revenue of at least EGP3 billion (EUR148 million) must file a CbCR in Egypt. The submission deadline is 12 months from the end of the reporting fiscal year.
- **Master file:** The master file must be prepared at the ultimate parent level of the group and must be made available to the ETA based on the parent entity's tax return filing date in its home jurisdiction.

The APA program is designed to enable taxpayers and the ETA to agree on the proper treatment of the transfer pricing of potential controlled transaction(s) in which the taxpayer will engage for a specific period (typically more than one year) under certain terms and conditions. The APA program is intended to provide a cooperative process to resolve potential transfer-pricing disputes in advance.

The new guidelines provide the APA framework and other details regarding the APA program in Egypt.

F. Treaty withholding tax rates

The table below sets forth maximum withholding rates provided in Egypt's double tax treaties for dividends, interest and royalties.

To benefit from the tax rates provided by double tax treaties with respect to dividends, interest and royalties, within six months after the date of receipt of the payment, a nonresident entity or its legal representative must submit to the tax authorities an application to apply the tax rate stated in the treaty and request a refund of the difference between the domestic rate and the treaty rate. The application must be submitted on the form designed for this purpose together with required documents.

The following is the treaty withholding tax rate table.

	Dividends (a) (%)	Interest (%)	Royalties (%)
Albania	5/10	10	10

Loans	5 (b)
Equity or capital decreases	5 (j)
Other Payments Made to Nonresidents	20/25 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	0 (k)

- (a) A special 5% tax is imposed on the income of large taxpayers. For further details regarding the corporate income tax and the special 5% tax, see Section B.
- (b) For details, see Section B.
- (c) The withholding tax applies to interest received by individuals and companies on bank deposits. Interest paid between domiciled companies is not subject to withholding tax.
- (d) Amounts paid or credited to non-domiciled legal entities or individuals who are resident, domiciled or incorporated in tax-haven jurisdictions (or paid through legal entities resident, domiciled or incorporated in such jurisdictions) are subject to a 25% withholding tax. Exceptions apply to the following types of payments:
- Payments for acquisitions or transfers of tangible assets
 - Payments to taxpayers in tax-haven jurisdictions located in Central America that have signed cooperation agreements with Salvadoran tax and customs authorities
 - Payments to taxpayers in tax-haven jurisdictions that have signed with El Salvador information exchange agreements or double tax treaties
 - Payments under circumstances in which reduced withholding tax rates apply

If an interest payment is made to a non-domiciled entity that is not registered with the Central Reserve Bank of El Salvador and not domiciled in a tax-haven jurisdiction, a 20% withholding tax applies. If an interest payment is made to a non-domiciled entity that is not registered with the Central Reserve Bank of El Salvador and domiciled in a tax-haven jurisdiction, a 25% withholding tax applies. Withholding tax at a reduced 10% rate applies if the recipient of the interest is a financial institution supervised in its country of origin and registered with the Central Reserve Bank of El Salvador. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a payment in full of the income tax on the interest income.

- (e) The withholding tax is imposed on payments to foreign companies and individuals for services rendered or used in El Salvador, as well as on payments for the transfer of intangible assets. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax. Amounts paid or credited to non-domiciled legal entities or individuals who are resident, domiciled or incorporated in tax-haven jurisdictions (or paid through legal entities resident, domiciled or incorporated in such jurisdictions) are subject to a 25% withholding tax. Exceptions apply to the following types of payments:
- Payments for acquisitions or transfers of tangible assets
 - Payments to taxpayers in tax-haven jurisdictions located in Central America that have signed cooperation agreements with Salvadoran tax and customs authorities
 - Payments to taxpayers in tax-haven jurisdictions that have signed with El Salvador information exchange agreements or double tax treaties
 - Payments under circumstances in which reduced withholding tax rates apply

The 20% rate applies to royalties from know-how and technical services paid to non-domiciled entities that are not domiciled in tax-haven jurisdictions.

- (f) The withholding tax is imposed on payments to non-domiciled persons or entities for transfers of intangible assets or for the use, or grant of use, of rights over tangible and intangible assets related to cinematographic movies, video tapes, phonographic discs, radio serials, television serials, serials and strips reproduced by any means, video and track records, and television programs transmitted by cable, satellite or other similar media. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.
- (g) The withholding tax is imposed on payments to foreign companies and individuals for international transportation services. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.
- (h) The withholding tax is imposed on payments to non-domiciled insurance and reinsurance companies and reinsurance brokers, authorized by the Superintendent of the Financial System. If the recipient does not file an annual income tax return, the withholding tax is presumed to be a final tax.
- (i) A withholding tax rate of 3% applies to income derived from capital invested in securities, or transactions in securities, shares and other investments in the Salvadoran securities market (primary or secondary).
- (j) A withholding tax rate of 5% applies to amounts paid or credited in capital or equity reductions, in the portion corresponding to capitalization or reinvestment of profits. For this purpose, the amounts paid or credited by the decrease of equity or capital corresponds to previously capitalized amounts.
- (k) Capital losses can be carried forward to offset capital gains for a period of five years, provided that the losses have been reported in previously filed tax returns.

B. Taxes on corporate income and gains

Corporate income tax. Resident corporations are subject to tax on Salvadoran-source income and on certain types of foreign investment income. Nonresident corporations are subject to tax on Salvadoran-source income only. As a result, resident and non-resident taxpayers are subject to income tax on income derived from the following:

- Movable and immovable property in El Salvador
- Activities carried out in El Salvador
- Services rendered by domiciled and non-domiciled entities that are used in El Salvador

Taxable foreign investment income derived by resident corporations includes income, capital gains, profits, or interest derived from securities, financial instruments, and derivative contracts if any of the following conditions are met:

- The issuing entity is a national entity or domiciled in El Salvador.
- The capital is invested or employed in El Salvador.
- The risk assumed is placed or located in El Salvador.

Foreign investment income earned by a legal entity that is domiciled in El Salvador or that is considered a domiciled establishment or branch for Salvadoran tax purposes is taxable.

Income derived from interest, premiums and other earnings from deposits abroad paid by non-domiciled financial institutions to domiciled legal entities must always be declared to the Salvadoran tax authorities even if they have been subject to income tax or other similar taxes abroad. Taxes paid abroad can be credited according to the rules provided by Salvadoran law.

Corporate income tax rate. The standard rate of income tax is 30% for Salvadoran companies, foreign companies with a permanent establishment in El Salvador and non-domiciled companies. However, companies that have sales equal to or less than USD150,000 are subject to a 25% income tax rate.

Special tax for large taxpayers. On 29 October 2015, El Salvador's Congress approved a legislative decree that created a special tax for large taxpayers to support the government's public safety plan. The decree entered into force for five years as of 29 November 2015, and it prevails over any other contradictory law or statute. Taxpayers with annual net income of USD500,000 or more must report and pay a tax of 5% of net income. In practice, the tax should apply only to taxpayers classified as large taxpayers by the tax authorities.

Capital gains. Capital gains derived from the sale of movable and immovable property are subject to income tax at a rate of 10%. However, if the asset is sold within 12 months after acquisition, the capital gain is subject to tax at a rate of 25% or 30% of net income.

Companies may carry forward capital losses for a five-year period to offset future capital gains only.

The capital gain or loss on a transaction is computed by deducting from the sales price the following:

- Cost of the asset, which equals the purchase price less allowable depreciation claimed under the income tax law
- Improvements made to the asset
- All selling expenses necessary to complete the transaction

Administration. The statutory tax year runs from 1 January through 31 December. Companies must file annual income tax returns and pay any tax due within four months after the end of the tax year.

Companies with total assets of SVC10 million (approximately USD1,142,857) or more, or with gross income of SVC5 million (approximately USD571,428) or more, must file an annual tax certification of their tax obligations. This certificate is issued by an external certified public accountant (CPA) who is authorized by the CPA Surveillance Council.

Dividends. Domiciled entities in El Salvador that pay to, or register profits for, domiciled or non-domiciled entities or individuals must withhold income tax at a 5% rate. This serves as a definite income tax payment. Payment or registration of profits can be made in various forms, including, among others, payments in cash or securities and in-kind payments, regardless of whether they are considered dividends, quotas, excess payments, legal reserves, profits or earnings.

The above obligation also applies to representatives of parent companies, affiliates, branches, agencies and other permanent establishments that pay or credit profits to domiciled entities or individuals abroad.

Notwithstanding the above, if payments are made to an entity or individual domiciled or resident in a tax-haven jurisdiction, a 25% withholding tax rate applies.

Withholding tax on loans. Legal entities or entities without legal capacity domiciled in El Salvador that remit cash or in-kind assets as loans or advance remittances or engage in other types of loan operations must withhold tax at a rate of 5% of such amounts if the amounts are remitted to any of the following:

- Partners, shareholders, associates, beneficiaries, and other related parties according to Section 25 of the Income Tax Law (for example, spouses and relatives in the fourth degree of consanguinity or second degree of kinship)
- Entities or individuals domiciled or resident in a tax-haven jurisdiction
- Parent companies or branches domiciled abroad

Certain exceptions apply, such as to loans with a market value interest rate or a one-year term and to supervised financial institutions.

Foreign tax relief. In general, relief is granted in El Salvador for foreign taxes paid with respect to certain types of investment income earned abroad. Also, see Section F.

C. Determination of trading income

General. Taxable income is computed in accordance with adopted Financial Information Standards in El Salvador (International Financial Reporting Standards), subject to adjustments required by the Salvadoran income tax law. The Salvadoran income tax law requires the use of the accrual method of accounting.

Taxable income includes all income derived from the following:

- Assets located in El Salvador
- Activities or transactions carried out in El Salvador
- Capital invested in El Salvador
- Services rendered in El Salvador and services rendered outside El Salvador that are used in El Salvador
- Certain types of investment income (see Section B)

In general, all costs and expenses necessary to produce and preserve taxable income are deductible for income tax purposes, provided all legal deductibility requirements are met.

Imputed income. The Salvadoran income tax law does not contain rates and formulas for calculating imputed income. However, the

tax authorities may determine taxable income based on certain information, including the following:

- Investments made during the tax year
- Equity fluctuations
- Transactions and profits recorded in previous tax years
- Purchases and sales
- Value of imported goods
- Value of inventories
- Purchases not recorded
- Performance of similar businesses
- General expenses

Inventories. Salvadoran income tax regulations provide that inventories may be valued at acquisition cost. The cost may be calculated using certain methods, such as first-in, first-out (FIFO), last purchase cost and average cost, as well as special methods established for agricultural products and cattle. The income tax law provides that inventories can be valued by other methods if authorization from the tax authorities is obtained before the method is implemented.

Provisions. Provisions for contingent liabilities, such as severance payments and labor costs, are not deductible expenses. However, payments of such liabilities are deductible expenses. Amounts for doubtful accounts may be deducted if certain legal requirements are satisfied.

Tax depreciation and amortization

Depreciation. The acquisition cost of products with a useful life of 12 months or less may be fully deducted from taxable income in the year of acquisition. Property with a useful life of more than 12 months may be depreciated using the following straight-line rates.

Asset	Rate (%)
Buildings	5
Machinery	20
Vehicles	25
Other movable property	50

Only a portion of the acquisition cost of used machinery and movable property may be deducted for tax purposes. The deductible percentages, which are based on the asset's life, are shown in the following table.

Asset's useful life Years	Deductible percentage (%)
1 but less than 2	80
2 but less than 3	60
3 but less than 4	40
4 or more	20

The useful life of a used asset is determined when the asset is purchased. The depreciable portion of the acquisition cost is calculated according to the normal depreciation rules.

Tax amortization. The acquisition cost or development cost of software programs used to produce and preserve taxable income may be amortized at an annual rate of up to 25% of the cost of development or acquisition. The deductible percentages

applicable to used machinery (see above) also apply to used software programs.

Relief for losses. Net operating losses may not be carried forward or back to offset taxable income.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; transfers of fixed assets that have been used for four years or more are not subject to transfer taxes	13
Real property transfer tax; tax imposed on value of real property with respect to the amount that exceeds SVC250,000 (approximately USD28,571)	3
Customs duties	Various
Social contributions; paid by employer Prevention system (this system provides pensions and certain other benefits); on salaries up to SVC56,875 (USD6,500)	7.75
Social security; on salaries up to SVC8,750 (USD1,000)	
Maternity, sickness and professional risks	7.5
Professional training	1

E. Foreign-exchange controls

The currencies in El Salvador are the colon (SVC) and the US dollar. Since 2001, all transactions and operations in El Salvador can be carried out and denominated in colons or US dollars. The permanent exchange rate in El Salvador is SVC8.75 = USD1.

No restrictions are imposed on foreign-trade operations or foreign-currency transactions.

F. Tax treaties

El Salvador's only tax treaty in force is with Spain. The treaty is based on the Organisation for Economic Co-operation and Development model, with some minor differences.

In Spain, the treaty applies to income tax on individuals, income tax on corporations, income tax for nonresidents, net worth tax, and local income tax and net worth tax. In El Salvador, the treaty applies to income tax.

For dividends, interest and royalties paid by companies domiciled in one signatory country to residents of the other signatory country, the treaty provides for maximum tax rates in the source country of 12% for dividends and 10% for interest and royalties. If certain conditions are met, the tax rate for dividends may be reduced to 0%. The treaty also provides for a maximum rate of 10% in the source country for services, unless the individual or company that accounts for the income has a permanent establishment in the country in which the services are rendered.

A. At a glance

Corporate Income Tax Rate (%)	35 (a)
Capital Gains Tax Rate (%)	35 (b)
Branch Tax Rate (%)	35
Withholding Tax (%)	
Dividends	25 (c)
Interest	25 (c)
Royalties from Patents, Know-how, etc.	20
Payments for Oil and Gas Services	5/6.25/20 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3/5 (e)

- (a) The minimum corporate tax is 3% of turnover. See Section B for details.
 (b) In certain circumstances, the tax is deferred or reduced (see Section B).
 (c) This tax is imposed on payments to nonresidents. For the withholding tax rates applicable to residents, see Section B.
 (d) This tax applies to payments for services performed by subcontractors of oil and gas companies. The 6.25% rate applies to residents. The 20% rate applies to nonresidents. The 5% rate applies to transportation, mobilization services (bringing a rig or vessel into Equatorial Guinea [EG]) and demobilization services (sending a rig or vessel out of EG) performed by nonresidents in EG.
 (e) In general, companies may carry forward net operating losses for three years. However, companies operating in the hydrocarbon sector may carry forward net operating losses for five years.

B. Taxes on corporate income and gains

Corporate income tax. Equatorial Guinea (EG) companies are taxed on the territorial principle. As a result, EG companies carrying on business outside EG are not subject to corporate income tax in EG on the related profits. EG companies are those registered in EG, regardless of the nationality of the shareholders or where the companies are managed and controlled. Foreign

companies engaged in business in EG are subject to corporate income tax on EG-source profits.

Tax rate. The corporate income tax rate is 35%.

The minimum corporate tax is 3% of annual turnover for the preceding year. The amount of this tax cannot be less than XAF800,000 (for further details regarding this tax, see *Administration*).

The 2019 Finance Law deleted Article 461.3 of the Income Tax Law. This article was related to the crediting of withholding tax against the final corporate income tax liability. Withholding taxes should be considered current expenses for the year and deducted as such.

Capital gains. Capital gains are taxed at the regular corporate income tax rate. However, the tax can be deferred if all of the proceeds are used to acquire new fixed assets in EG within three years or in the event of a merger. If the business is totally or partially transferred or discontinued, only one-half of the net capital gains is taxed if the event occurs less than five years after the start-up or purchase of the business, and only one-third of the gains is taxed if the event occurs five years or more after the business is begun or purchased.

Administration. The tax year is the calendar year. Tax returns must be filed by 30 April. The minimum corporate tax must be declared and paid by 31 March of each year. The minimum corporate tax may be set off against the regular income tax payable for the same tax year.

Late payments and late filings of tax returns are subject to penalties. For the minimum corporate tax, the penalty equals 50% of the amount of the tax. For corporate income tax, the following are the penalties:

- XAF200,000 per month of delay for the filing of the return. However, the total amount of the penalty cannot exceed 75% of the tax owed.
- 50% of the amount not declared if the return has a shortfall that exceeds 1/10 of the declared profit. The penalty is increased to 100% in case of bad faith.

Dividends. Dividends paid to nonresidents are subject to a 25% withholding tax.

The following withholding tax rates apply to dividends received by residents:

- Physical persons: application of the progressive scale in accordance with the provision of Article 252 that may be reduced by issuing a global income return provided under Articles 240 and 241 of the General Tax Code
- Resident legal entities: 10%

However, a parent company may exclude up to 90% of the dividends received from a 25%-owned subsidiary.

Foreign tax relief. EG does not provide relief for foreign taxes paid.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the

rules contained in the general accounting chart of the Organization for Harmonization of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are deductible only if they are normal and substantiated:

- Head office overhead and remuneration for certain services (studies and technical, financial or administrative assistance) paid to nonresidents
- Royalties from patents, brands, models or designs paid to a non-Economic and Monetary Community of Central Africa (Communauté Économique et Monétaire de l'Afrique Centrale, or CEMAC) corporation participating in the management of, or owning shares in, the EG corporation

The following expenses are not deductible:

- Rent expense for movable equipment paid to a shareholder holding, directly or indirectly, more than 10% of the capital
- A portion of interest paid to a shareholder in excess of the central bank annual rate and, if the shareholder is in charge of management, on the portion of the loan exceeding one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, penalties, corporate income tax and individual income tax
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director), gifts and subsidies

Inventories. Inventories are normally valued at cost. Cost must be determined under a weighted average cost price method.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates specified by the tax law. The following are the straight-line depreciation rates for major categories of assets.

Asset	Rate (%)
Buildings	5 to 20
Plant and machinery, and transportation equipment	5 to 100
Office equipment	10 to 15

Relief for losses. In general, companies may carry forward net operating losses for three years. However, companies operating in the hydrocarbon sector may carry forward net operating losses for five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. EG law does not allow the filing of consolidated tax returns or provide any other form of tax relief for

groups of companies. However, the OHADA Uniform Act on Accounting Law contains the principle of consolidated financial statements.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on transactions performed in EG that are not subject to the oil and gas sector withholding tax (see Section A)	
General rate	15
Reduced rate	6
Specified products	0
Social security contributions; imposed on salaries; paid by	
Employer	21.5
Employee	4.5
Worker Protection Fund and Professional Training Fund; imposed on salaries; paid by	
Employer (on gross salary)	1
Employee (on net salary)	0.5

E. Foreign-exchange controls

The EG currency is the CFA franc BEAC (XAF).

Exchange-control regulations exist in EG for financial transfers in the franc zone which is the monetary zone including France and its former overseas colonies. In the franc zone, transactions from XAF1 million to XAF10 million require a preliminary declaration to the Ministry of Finance. Outside the franc zone, a preliminary authorization from the Ministry of Finance and Budget is required for any transaction exceeding XAF10 million.

F. Tax treaties

EG has entered into the tax treaty of the former Central African Economic and Customs Union (Union Douanière et Économique de l'Afrique Centrale, or UDEAC).

The tax law in Estonia has been frequently amended, and further changes are likely to be introduced. Because of these frequent changes, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Tax Rate (%)	14/20 (a)
Capital Gains Tax Rate (%)	0/14/20 (b)
Branch Tax Rate (%)	14/20 (a)

Withholding Tax (%) (d)

Dividends	0/7 (c)
Interest	0/20 (d)
Royalties	0/10/20 (e)
Rental Payments	20 (f)
Services	0/10/20 (g)
Salaries and Wages	20

- (a) Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject only to tax at a rate of 20% on the gross amount of distributed profits and certain payments made. The tax rate is applied to the net taxable amount divided by a specified percentage. A lower income tax rate of 14% is applied to regular dividends. For further details, see Section B.
- (b) Resident companies and permanent establishments of nonresident companies are not subject to tax on their capital gains received. They are subject only to tax at a rate of 14% or 20% on the gross amount of distributed profits. Nonresident companies without a permanent establishment in Estonia are subject to tax at a rate of 20% on their capital gains derived from Estonian sources. For further details, see Section B.
- (c) Withholding tax is not imposed on dividends paid to companies. Dividends are subject to 20% (or 14% in certain cases) corporate income tax at the level of the resident distributing companies only. Withholding tax at a rate of 7% is imposed on certain profit distributions to individuals. For further details, see Section B.
- (d) Interest payments are generally exempt from withholding tax. Withholding tax at a rate of 20% is imposed on interest paid to resident individuals (including payments made by contractual investment funds on the account of the funds). Interest paid to nonresidents as a result of ownership of contractual investment funds is subject to a 20% withholding tax if more than 50% of the assets owned (directly or indirectly) by the fund during a two-year period preceding the date of the interest payment is real estate located in Estonia and if the interest recipient has at least 10% ownership in the contractual investment fund at the moment of receiving the interest. Withholding tax is not imposed on interest paid from the profits of contractual investment funds if the profits have already been taxed.
- (e) Withholding tax at a rate of 10% is imposed on payments to nonresident individuals and companies. Royalties paid to companies resident in other EU countries or Switzerland are not subject to withholding tax if the provisions of the EU Interest-Royalty Directive are satisfied. A 20% withholding tax is imposed on payments to resident individuals.
- (f) Withholding tax at a rate of 20% is imposed on payments to resident individuals and nonresidents.
- (g) The 20% rate applies to payments to nonresidents from low-tax jurisdictions (a low-tax jurisdiction is a jurisdiction that does not impose a tax on profits or distributions or a jurisdiction in which such tax would be less than 1/3 of the Estonian tax payable by resident individuals on a similar amount of business income). The 10% rate applies to payments to other nonresidents for services rendered in Estonia. A 0% rate may apply under double tax treaties.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies (except for limited partnership funds) and permanent establishments of nonresidents are not generally subject to tax on their income (see below an exception in the case of exceeding borrowing costs and controlled foreign company [CFC] income). They are subject to tax on the following payments made to resident legal entities, nonresident companies, resident individuals and nonresident individuals:

- Dividends
- Fringe benefits
- Gifts
- Donations
- Business entertainment expenses
- Distributions of profits
- Payments not related to the business of the payer

Starting from 2019, income tax is charged annually on exceeding borrowing costs of resident companies and permanent establishments of nonresidents (except for financial institutions) to the extent they exceed losses if such costs amount to at least EUR3 million and if they exceed 30% of the company's earnings before interest, tax, depreciation and amortization (EBITDA).

Starting from 2019, income tax is charged annually on resident companies and permanent establishments of nonresidents' income from controlled foreign companies (CFCs) if the income was derived from fictitious transactions of which the main purpose was to obtain a tax advantage using assets and taking risks related to controlling company key employees. The rule does not apply to resident companies if the CFC financial year profit does not exceed EUR750,000 and other business income does not exceed EUR75,000.

The exceeding borrowing cost and taxable CFC income must be reported by the 10th day of the 9th month following the financial year. The tax is payable by the same deadline.

Starting from 2020, if a taxpayer moves assets or its tax residence out of Estonia, an exit tax will be charged on the economic value of any capital gain created in Estonia even if that gain has not yet been realized at the time of the exit.

Resident companies are companies registered (effectively the same as incorporated) in Estonia. European public limited liability companies and European Cooperative Societies that have their registered office in Estonia are deemed to be Estonian tax residents. Nonresident companies without a permanent establishment in Estonia are subject to tax on their business income derived from Estonia.

Tax rates. Resident companies are subject to tax on the payments described in *Corporate income tax* at a rate of 20% of the gross amount of the payments. To calculate the corporate income tax for 2019, the tax rate is applied to the net taxable amount divided by 0.8.

Beginning with 2019, a lower income tax rate of 14% is applied to regular profit distributions. A regular profit distribution is the amount of the company's last three years' average dividend that is subject to tax in Estonia. The 20% tax rate is applied to the dividend amount exceeding the regular profit distribution. The dividend paid in 2018 is the first amount to be included in the three-year average calculation.

To calculate the corporate income tax on a regular dividend, the tax rate of 14% is applied to the net taxable amount divided by 0.86.

A 20% rate applies to income derived by nonresident companies without a permanent establishment in Estonia.

Capital gains. Capital gains derived by resident companies and permanent establishments of nonresident companies are exempt from tax until they are distributed.

Nonresident companies without a permanent establishment in Estonia are taxed at a rate of 20% on their capital gains derived from Estonian sources.

Capital gains derived from sales of shares and securities by non-residents are exempt from tax. However, if the shares of a company, contractual investment fund or other pool of assets are sold by a nonresident with at least a 10% holding and if at the time of the sale or at any other time during the two preceding years, real estate and buildings directly or indirectly accounted for 50% or more of the assets of the company, capital gains derived from the sale of the shares are taxable.

If a resident company is deleted from the Estonian commercial register without liquidation and its economic activities are ended, the holding of a nonresident in the company is taxed as a capital gain, which is equal to the market value of the holding less the acquisition cost. The taxation is postponed if economic activities are continued through another resident company or a permanent establishment remains in Estonia.

Administration. The tax period is a calendar month. Tax returns must be filed and income tax must be paid by the 10th day of the following month.

Advance rulings. Taxable persons may apply for advance rulings from the tax authorities. Advance rulings may relate only to actual planned transactions, as opposed to theoretical questions. The advance ruling is binding on the tax authorities and recommended for the taxable person. The taxable person must inform the tax authorities of the execution of the transaction described in the advance ruling. A time limit for the binding nature of the ruling is set based on the taxpayer's evaluation of the time needed for the execution of the transaction.

The processing of the advance ruling may be suspended if a similar transaction is simultaneously being reviewed in challenge proceedings (administrative proceedings involving a dispute between the taxpayer and the tax authorities) or court proceedings and if the expected decision in such proceedings is crucial for the determination of the tax consequences. Advance rulings may not be issued with respect to the determination of transfer prices (determination of value of transactions between related parties).

For the advance ruling to be binding, the taxpayer must present detailed and accurate information before the beginning of the relevant transactions. If the tax laws are amended after the advance ruling has been issued but before the transaction is carried out, the advance ruling is no longer binding. The deadline for issuing an advance ruling is 60 calendar days beginning with the date of acceptance of the application. By a motivated decision (a decision that includes arguments supporting the decision) in writing, the deadline may be extended for an additional 30 calendar days. A state fee is payable for the processing of the advance-ruling application.

A summary of the ruling, except for information protected by the tax secrecy clause (the tax authorities are bound to maintain the confidentiality of information concerning a taxpayer that was acquired in the course of their activities; certain exceptions

apply), is published on the tax authorities' web page. The taxable person may prohibit the disclosure of specific information.

Reporting of intra-group loans. Resident companies and the permanent establishments of nonresidents (except public limited funds and credit institutions) are required to report the following information on loans granted to other group companies:

- Amount of the loan
- Increase in principal balance
- Extension of term or change of other material terms

The reporting must be done on a quarterly basis.

Dividends. Withholding tax is not generally imposed on dividends paid. A 7% withholding tax is imposed on dividends paid to individuals if the corporate income tax of 14% has been paid by an Estonian company on the share of profits out of which the dividends are paid. Payers of dividends must pay corporate income tax at a rate of 20% or 14% on the gross amount of dividends paid. This income tax is treated as a payment of income tax by the distributing company and not as tax withheld from the recipient of the dividends.

Dividends received are not included in taxable income (see *Foreign tax relief*).

The following payments are also taxable as dividends at the level of the company:

- Decrease of share capital (if the decrease exceeds paid-in equity capital)
- Redemption of shares and the payment of liquidation proceeds in an amount that exceeds the monetary and non-monetary payments made into the equity capital

Interest. Interest payments are generally exempt from withholding tax. Withholding tax at a rate of 20% is imposed on interest paid to resident individuals (including payments made by contractual investment funds on the account of the funds). Interest paid to nonresidents as a result of ownership of contractual investment funds is subject to a 20% withholding tax if more than 50% of the assets owned (directly or indirectly) by the fund during a two-year period preceding the date of the interest payment is real estate located in Estonia and if the interest recipient has at least 10% ownership in the contractual investment fund at the moment of receiving the interest. Withholding tax is not imposed on interest paid from the profits of contractual investment funds if the profits have already been taxed.

Foreign tax relief. Dividends distributed by an Estonian company and a permanent establishment of a foreign company that had received dividends from a foreign company (except from a company located in a low-tax jurisdiction) are exempt from income tax if the following conditions are satisfied:

- The dividends are received from a taxable company resident in the European Economic Area (EEA) or Switzerland, or foreign tax has been paid on or withheld from the profits out of which the dividends were paid.
- The Estonian company receiving the dividends owns at least 10% of the shares or votes of the foreign company when the dividends were received.

- The transaction or a chain of transactions is actual (a transaction or a chain of transactions is not actual if its primary purpose or one of its primary purposes is to obtain a tax advantage), and the distributing subsidiary cannot deduct the distributed profits. The tax exemption applies to the extent that a transaction or a chain of transactions is carried out for business purposes, the economic content of which is necessary and appropriate for the business activities in question.

The following profits are also exempt from tax:

- Profits allocated to a permanent establishment of an Estonian company in an EEA country or Switzerland
- Profits allocated to a permanent establishment of an Estonian company in another foreign country if foreign tax has been paid on the profits

Profits received from a permanent establishment by an Estonian resident company remain exempt if a transaction or a chain of transactions is actual (a transaction or a chain of transactions is not actual if its primary purpose or one of its primary purposes is to obtain a tax advantage).

Any foreign tax paid or withheld can be credited by an Estonian company against income tax payable on dividend distribution.

C. Determination of trading income

Because resident companies and permanent establishments of nonresident companies registered with the Estonian authorities are not subject to tax on their income, they need not determine their trading income for tax purposes.

Profits of Estonian contractual investment funds from immovable property are taxed immediately when profits are earned.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods and services, excluding exports	9/20
Social security tax	33
Mandatory funded pension contributions	2
Land tax	0.1 to 2.5
Unemployment insurance contributions (2019 rates); paid by	
Employer	0.8
Employee	1.6

Other significant taxes include excise duty, stamp duties, heavy vehicles tax, charges on the use of Estonian natural resources and pollution charges.

E. Miscellaneous matters

Foreign-exchange controls. The official currency in Estonia is the euro (EUR).

Enterprises registered in Estonia may maintain bank accounts abroad without any restrictions.

Debt-to-equity rules. In certain cases, exceeding borrowing costs of resident companies and permanent establishments of nonresidents are subject to corporate income tax. See *Corporate income tax* in Section B.

Anti-avoidance legislation. Under the Taxation Act, if it is evident from the content of a transaction or act that the transaction or act is performed for the purposes of tax evasion, the actual economic substance of the transaction applies for tax purposes. If a fictitious transaction is entered into in order to conceal another transaction, the provisions of the concealed transaction apply for tax purposes. Also, see *Foreign tax relief* in Section B.

Under the general anti-avoidance rule contained in the Income Tax Act, a transaction (or chain of transactions) is not considered for income tax purposes if the main purpose or one of the main purposes of the transaction is obtaining a tax advantage that is contrary to the purpose of the tax law or an international agreement and that is fictitious. A transaction (or chain of transactions) is considered to be fictitious if it is not done for actual vital or business purposes that reflect the economic substance of the transaction.

Transfer pricing. Under a transfer-pricing measure in the income tax law, pricing between resident and nonresident associated companies should be at arm's length. The tax authorities may adjust to an arm's-length amount the profit of a company engaging in transactions with nonresident associated persons. Persons are considered associated if they have a common economic interest or if one person has a prevalent influence over another person. The transfer-pricing measure also covers transactions between nonresident legal entities and their permanent establishments in Estonia. Transfer-pricing documentation is required for the following entities:

- Entities with more than 250 employees (together with related parties)
- Entities operating in certain industries
- Entities that had turnover, including the turnover of related parties, of at least EUR50 million in the preceding financial year
- Entities that had consolidated net assets of at least EUR43 million in the preceding financial year
- Parties to a transaction if one of the parties is a resident of a low-tax jurisdiction

Country-by-Country Reporting. Estonia has implemented legislation requiring the parent undertakings of multinational enterprises (MNEs) with a consolidated turnover of at least EUR750 million to submit to the tax authorities' annual groupwide reports for each entity and jurisdiction in which the MNE group operates (Country-by-Country Reporting). The report is due on 31 December of the year following the end of the financial year. Notification about the MNE group and the reporting entity is required to be submitted within six months after the end of a financial year.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under Estonian domestic law.

- (a) Dividends paid to corporations are not subject to withholding tax under Estonian domestic law.
- (b) Interest is not subject to withholding tax under Estonian domestic law except for interest paid in certain circumstances to nonresidents as a result of ownership in foreign contractual investment funds (see Section B).
- (c) Royalties paid to a company resident in another EU country or Switzerland are not subject to withholding tax if the provisions of the EU Interest-Royalty Directive are satisfied.
- (d) The lower rate applies to royalties paid for the use of industrial, commercial or scientific equipment.
- (e) The lower rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, but excluding software payments.
- (f) The 20% rate applies to rental payments to nonresidents. The 10% rate applies to royalties, including royalties paid for the use of industrial, commercial or scientific equipment.
- (g) Withholding tax at a rate of 7% is imposed on certain profit distribution to individuals (for further details, see Section B). This withholding tax rate is reduced to 5% (Bulgaria, Israel and Macedonia) and to 0% (Bahrain, Isle of Man, Jersey, Mexico and the United Arab Emirates).

- (a) For purposes of the withholding taxes, nonresident companies are companies that are neither registered nor incorporated in Eswatini.
- (b) This withholding tax applies to dividends paid to nonresidents. See Section B.
- (c) This withholding tax is imposed on the payment after deduction of direct costs of materials used in construction operations.
- (d) This tax is imposed on the deemed repatriated income of the branch of a nonresident company. However, for the branch of a company registered in Botswana, Lesotho, Mozambique, Namibia or South Africa, the rate of the tax is reduced to 12.5%.

B. Taxes on corporate income and gains

Corporate income tax. Domestic and foreign companies are taxed on all income received or accrued from a source in Eswatini or deemed to be from a source in Eswatini.

Rate of corporate tax. The corporate tax rate is 27.5%.

Administration. The tax year runs from 1 July to 30 June. Corporate taxpayers may obtain permission to pay tax on a different fiscal year-end. Tax returns are due within 30 days after the notice given by the Commissioner of Taxes. Taxpayers unable to submit returns within 30 days must apply for an extension and submit an estimate of their income for the year.

Companies must pay provisional tax based on their estimated annual tax liability in two installments during their financial year. The installments must be paid by the end of the sixth month of the financial year and by the end of the financial year. A third (“topping-up”) payment of any balance of tax due must be made within six months after the end of the financial year.

Dividends. Dividends paid to resident companies are exempt from tax. A 15% withholding tax is imposed on dividends paid to nonresidents, including companies. The rate is reduced to 12.5% if the dividend is paid to a company incorporated or registered in the Southern African Customs Union (SACU; the SACU consists of Botswana, Eswatini, Lesotho, Namibia and South Africa), provided the company is not a subsidiary or branch of a company incorporated or registered outside the SACU.

Foreign tax relief. No specific provisions for foreign tax relief exists, except under double tax agreements.

C. Determination of trading income

General. Income tax is levied on all taxable income received by or accrued to any person from a source within Eswatini or deemed to be within Eswatini. Taxable income includes all income other than capital gains and losses and exempt income.

Expenses, other than those of a capital nature, incurred in Eswatini for the production of income may be deducted from income. Expenses incurred outside Eswatini in the production of income are deductible at the discretion of the Commissioner of Taxes.

Expenses specifically allowed include interest on business-related loans, repairs and maintenance, and bad and doubtful debts. In general, expenses that are not wholly or necessarily incurred in the production of income are not deductible.

Inventories. In general, inventories are valued using the last-in, first-out (LIFO), first-in, first-out (FIFO) or weighted-average methods.

Provisions. Provisions are not normally allowed as deductions in computing taxable income.

Depreciation. An annual depreciation allowance, calculated using a declining-balance method, is available for most capital expenditures. An annual depreciation allowance is also available for industrial buildings and hotels. The straight-line method may be used if prior permission is obtained from the Commissioner of Taxes.

An initial allowance of 50% is granted for investments in plant and machinery used in manufacturing, industrial buildings and hotels.

Relief for trading losses. Trading losses are deductible in the year sustained and may be carried forward without limitation. Losses may not be carried back.

D. Value-added tax

Value-added tax (VAT) is charged on the supply of goods and services in Eswatini as well as on the importation of goods and services. The VAT rates are the standard rate of 15% and a 0% rate.

E. Foreign-exchange controls

Foreign-exchange controls are not imposed within the Common Monetary Area, which includes Eswatini, Lesotho, Namibia and South Africa. Transactions outside this area are regulated by the Central Bank of Eswatini in cooperation with authorized dealers. Residents outside the Common Monetary Area may open non-resident accounts.

Foreign-exchange controls are imposed on imports as well as on the repatriation of capital, profits, interest, royalties, fees and income of expatriate personnel. These transactions require prior approval from the Central Bank of Eswatini, but approval is generally granted.

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %	Management fees %
Mauritius	7.5	5	7.5	0
Seychelles	7.5/10 (c)	7.5	10	10
South Africa	10/15 (a)	10	10	10
Taiwan	10	10	10	10
United Kingdom	15	0	0	0
Non-treaty jurisdictions	15 (b)	10	15	15

(a) The 10% rate applies if the shareholder holds at least 25% of the capital. The 15% rate applies in all other cases.

(b) See Section B.

(c) The 7.5% rate applies if the shareholder holds at least 25% of the capital. The 10% rate applies in all other cases.

Branch Tax Rate (%)	20
Withholding Tax (%)	
Dividends	0 (a)
Interest	10
Royalties from Patents, Know-how, etc.	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	4 (b)

(a) Effective from 1 August 2017, all dividends distributed are exempt from income tax.

(b) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to income tax on worldwide assessable income. Nonresident companies carrying on business through a branch pay tax only on Fiji-source income. A resident company is a company incorporated in Fiji. A company not incorporated in Fiji is considered a resident company if it carries on business in Fiji and has either its central management or control in Fiji or its voting power controlled by shareholders who are residents of Fiji.

Tax rates. In general, resident companies and branches of non-resident companies are subject to tax at a rate of 20%. Companies that are listed on the South Pacific Stock Exchange and have a resident shareholding of at least 40% are subject to tax at a rate of 10%. Foreign companies that establish their headquarters in Fiji or relocate their headquarters to Fiji are subject to tax at a rate of 17%.

Tax holidays are available to various enterprises and for various activities, including qualifying hotel projects, companies granted a tax-free regions license, qualifying information communications technology operators, approved activities in commercial agricultural farming and agro-processing, approved activities with respect to processing agricultural commodities into biofuels, approved activities in renewable energy projects and power cogeneration, medical services, residential housing development and audiovisual activities. Effective from 1 January 2017, certain licenses for hotel tax concessions are no longer granted.

Capital gains. The rate of the capital gains tax is 10%. Effective from 1 January 2016, the capital gains tax is administered through the Income Tax Act 2015. Previously, capital gains tax was administered through the Capital Gains Tax Decree 2011. Capital gains tax applies only to non-depreciable capital assets, while gains on depreciable capital assets are subject to income tax at a rate of 20%.

Administration. The Fiji tax year is the calendar year. However, for most companies, an alternative fiscal year is normally allowed. Tax for any fiscal year is payable in three installments according to the following schedule:

- 33.3% of the preceding year's tax liability by the end of the sixth month
- Another 33.3% of the preceding year's liability by the end of the ninth month
- Another 33.4% of the preceding year's liability on or before the balance date

Companies are required to file tax returns within three months after the fiscal year-end, but extensions of an additional two, four or six months are granted to tax agents, depending on the level of taxable income.

Dividends. Effective from 1 August 2017, all dividends distributed are exempt from income tax.

Foreign tax relief. Income derived by Fiji residents from treaty countries is subject to Fiji income tax, but credit is given for taxes paid, up to the amount of Fiji tax applicable on the same income.

Income derived from non-treaty countries is exempt to the extent that it was subject to income tax in such countries.

C. Determination of trading income

General. Income is defined as the aggregate of all sources of income, including annual net profit from a trade, commercial, financial or other business.

Expenses are deductible to the extent incurred in producing taxable income. Expenditures of a personal or capital nature are generally not deductible. Deductions are allowable for certain expenditures incurred in the agricultural and mining industries. Experimentation and research and development expenses incurred in projects connected with the taxpayer's business are deductible.

Inventories. Fiji does not have any specific measures for stock valuation for the purposes of year-end income determination. Valuations are generally made at cost or market value on a

first-in, first-out (FIFO) or actual basis. The tax authorities have discretion to make adjustments if inventories are sold or otherwise disposed of at below market value.

Provisions. Provisions are not deductible until payments are made or, in the case of doubtful trading debts, until the debts are considered totally irrecoverable and have been written off.

Tax depreciation. The following are some of the annual depreciation rates prescribed by law for 2016 and future years.

Asset	Rate	
	Straight line (%)	Diminishing value (%)
Commercial and industrial buildings	1.25 to 7	—
Office equipment	12.5	20
Heavy commercial motor vehicles	25	40
Passenger motor vehicles	20	30
Plant and machinery	12.5	20

Tax depreciation is subject to recapture on the sale of an asset, to the extent the sales proceeds exceed the tax value after depreciation. The amount recaptured may be set off against the cost of a replacement asset; otherwise, it is taxed as ordinary income in the year of sale. In addition, a capital gain on the sale of a capital asset is subject to capital gains tax.

Relief for losses. Losses may be carried forward for four years. Losses incurred as a result of claiming the standard allowance are available for carryforward for a period of eight years. The standard allowance is one of the hotel incentives. It allows a hotel owner a 25% deduction with respect to capital expenditure on construction, renovation or refurbishment of a hotel. Losses are not available for carryforward if the taxpayer's business in the year in which relief is claimed is substantially different from its business in the year in which the loss was incurred.

Groups of companies. No group relief measures exist.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on virtually all goods and services and residential rent, if annual gross turnover exceeds FJD100,000; financial services (except insurance services) and gambling are exempt	9
Service turnover tax	10
Environmental levy; imposed on prescribed services subject to the service turnover tax	6
Fringe benefit tax	20
Social security contributions to the national provident fund, paid by	
Employer	10
Employee (maximum rate)	8

E. Miscellaneous matters

Foreign-exchange controls. Most remittances abroad require approval from the Reserve Bank of Fiji. Depending on the level of the country's foreign-exchange reserve, further restrictions may be imposed on the nature, timing and amount of remittances that can be made.

Debt-to-equity ratios. An entity may have offshore borrowings up to FJD5 million per year without the prior approval of the Reserve Bank of Fiji. Foreign-owned companies may borrow locally any amount if a total debt-to-equity ratio of 3:1 is maintained. The total debt consists of local and offshore borrowings. Equity includes paid-up capital, shareholders' non-interest-bearing loans, retained earnings and subordinated interest-bearing loans.

Anti-avoidance legislation. Contracts, agreements or arrangements entered into that have the effect of altering the incidence of any tax may be rendered void by the tax authorities. However, the act does not allow for restructuring.

Dividends	0/15/20 (c)
Interest	0/20 (d)
Royalties	20 (e)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10 (f)

(a) See Section B.

(b) The withholding taxes generally apply only to payments to nonresidents. The rates may be reduced by tax treaties.

(c) No withholding tax is imposed on dividends paid to a parent company resident in another European Union (EU) country if the recipient of the dividends satisfies the following conditions:

- It holds directly at least 10% of the capital of the payer.
- The recipient of the dividend is a company qualifying under Article 2 of the EU Parent-Subsidiary Directive.

Companies resident in EU or European Economic Area (EEA) member states are generally eligible for the tax exemption for dividends under the same conditions as comparable Finnish companies if the Finnish withholding taxes cannot be credited in the company's state of residence and if sufficient exchange of information may take place between Finland and the state of residence of the recipient. Dividends paid to a company resident in an EU/EEA member state are subject to withholding tax at a rate of 15% if the shares constitute investment assets of the recipient company and the recipient owns less than 10% of the Finnish company.

(d) Interest paid to nonresidents is generally exempt from tax unless the loan may be deemed comparable to an equity investment. In general, interest paid to resident individuals is subject to a final withholding tax of 30% if it is paid on bonds, debentures and bank deposits.

(e) No withholding tax is imposed on royalties paid to nonresidents if all of the following conditions are satisfied:

- The beneficial owner of the royalties is a company resident in another EU country or a permanent establishment located in another EU country of a company resident in an EU country.
- The recipient is subject to income tax in its home country.
- The company paying the royalties, or the company whose permanent establishment is deemed to be the payer, is an associated company of the company receiving the royalties, or of the company whose permanent establishment is deemed to be the recipient.

A company is an associated company of another company if any of the following apply:

- The first company has a direct minimum holding of 25% in the capital of the second company.
- The second company has a direct minimum holding of 25% in the capital of the first company.
- A third company has a direct minimum holding of 25% in both the capital of the first company and the capital of the second company.

Royalties paid to resident individuals are normally subject to salary withholding.

(f) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Finland are taxed on their worldwide income. Nonresident companies are taxed only on their Finnish-source income. Resident companies are generally those incorporated in Finland.

Rate of corporate income tax. The corporate income tax rate is 20%.

Capital gains. Gains derived by companies from the disposal of business assets are treated as ordinary business income. Gains derived from the disposal of machinery and equipment are deducted from the remaining book value of similar assets, reducing the depreciable basis of the remaining assets. Gains derived from the disposal of buildings are calculated separately for each building by deducting the remaining acquisition cost from the sales price.

Gains derived by corporate entities, other than companies engaged in private equity investment activities, from the sale of shares are exempt from tax if all of the following conditions are satisfied:

- The shares are part of the seller's fixed assets.
- The seller has owned at least 10% of the shares in the company, including the shares sold, for an uninterrupted period of at least one year.
- The shares sold are shares in either a Finnish company, a company as defined in Article 2 of the EU Parent-Subsidiary Directive or a company resident in a country with which Finland has entered into a tax treaty that applies to dividends distributed by the company whose shares are sold.
- The shares are not shares in a real estate company or a company de facto engaged in the holding or administering of real estate.

Even if the above conditions are satisfied, a sale of shares under certain circumstances may result in the generation of taxable income. If the acquisition cost of the shares has at any time been depreciated on the grounds that the fair market value of the shares has declined or if a reserve has been deducted, this part of the consideration received (that is, the deducted depreciation or reserve) is taxable income. The same principle applies if the shares have at any time been the subject of a transaction between related companies and if this transaction resulted in a tax-deductible loss. Under these circumstances, the consideration received for the shares is taxable up to the amount of the earlier tax-deductible loss.

A loss incurred on the sale of shares is not tax-deductible if a gain on the sale of such shares would have been exempt from tax. If the above-mentioned requirements of tax exemption are not fulfilled, a loss from sale of shares that are part of seller's fixed assets is deductible from profit resulting from the sale of such shares during the five years following the loss-making year.

The participation exemption rules concerning capital gains, which are described above, do not apply to shares owned by capital investors. For capital investors, capital gains derived from the sale of shares are taxable income and capital losses incurred on shares are tax-deductible.

Administration. Companies must file the corporate income tax return within four months after the end of their accounting period. Tax return filing must be completed electronically. Nonresident companies carrying out business activities in Finland without triggering a permanent establishment should also file a tax return with a report on its activities carried out in Finland.

Corporate income tax is prepaid in installments during the accounting period, and additional advance taxes may be applied for and paid without accruing interest during the first month

following the end of the financial year. After the tax return is filed and processed by the tax authorities, a final settlement or refund is made. The tax assessment is completed within 10 months after the end of the accounting period. If the taxes assessed exceed the total of the prepaid installments, interest at a rate of 2% (for 2019) is added to the final assessment. The interest is calculated from the beginning of the second month following the end of the financial year. If the prepaid taxes exceed the final assessment, a refund with interest at a rate of 0.5% (for 2018) is paid.

In general, the tax authorities may carry out tax audits within five years from the end of the assessment year. For assessments concluded in 2017 or later, the statute of limitations is generally reduced to three years. However, the statute is six years in certain specific situations (for example, transfer-pricing matters or intra-group financing or restructuring). Under extraordinary circumstances, these time limits may be extended by a year. A company's 2015 fiscal year is open for adjustment until the end of December 2021. The 2016 fiscal year is open for adjustment until the end of December 2022. However, the 2017 fiscal year is only open for adjustment until the end of December 2020 unless a specific statute of limitations applies.

As a result of an audit, a penalty of up to 30% of the adjusted amount of taxable income may be imposed on a corporation for tax assessment of the 2017 fiscal year and earlier years. For the tax assessment of the 2018 fiscal year and future years, a tax penalty of up to 10% of the adjusted amount of taxable income may be imposed on a corporation and, in certain special cases, the penalty may be up to 50% of the amount of adjusted tax. A penalty charge can be added even though the adjustment does not result in additional income taxes (a change in the taxable income amount is sufficient). Also, interest is charged on the additional tax (but not on the penalties) at a specified rate (7% for 2019). Neither the penalty nor the interest is deductible when calculating taxable income.

Dividends. Under the current rules, a dividend distribution by a Finnish company cannot result in liability for the distributing company to pay additional income taxes on the basis of the distribution alone. This applies to dividends distributed to both Finnish residents and nonresidents.

A dividend received by a Finnish corporate entity from a company resident in Finland or from a "company," as defined in Article 2 of the EU Parent-Subsidiary Directive, is usually exempt from tax. The exemption also applies to dividends received from any other company resident in another EU/EEA country if the company paying the dividends is liable to pay income tax of at least 10%. If a Finnish corporate entity receives a dividend from a company resident in a non-EU/EEA country, the dividend is usually fully (100%) taxable.

The dividend is also fully taxable if the company paying the dividend can deduct the dividend in its tax calculation.

By exception, a dividend received by an unlisted Finnish corporate entity from a listed company is fully (100%) taxable, unless the listed company is resident in Finland or in an EU/EEA country

and the recipient owns at least 10% of the shares in the distributing company.

Distribution of funds from invested unrestricted equity capital. The return of invested unrestricted equity to shareholders in listed companies is taxed as dividend income, effective from 1 January 2014. The return of the invested unrestricted equity from an unlisted company continues to be treated as a repayment of capital if the recipient can show that the recipient has made an investment to the company and that the invested capital is returned within 10 years from the time the investment was made. The new provisions apply to unlisted companies, effective from 1 January 2016, if the investment was made before 1 January 2014.

Foreign tax relief. If no tax treaty is in force, domestic law provides relief for foreign tax paid. The credit is granted if the recipient Finnish corporation pays corporate income tax on qualifying foreign-source income in the same year. If the Finnish company does not have any corporate income tax liability that year, no credit is granted. Foreign tax credits may be carried forward five years under certain conditions. Foreign tax credits may not be carried back.

Under tax treaties, foreign tax is most frequently relieved by exemption or a tax credit. With certain countries, tax sparing may also be granted.

C. Determination of trading income

General. Taxable income is closely tied to the income in the statutory accounts. Most of the deductions must be booked in the statutory accounts to be valid for tax purposes. As stated in the tax law, the definitions of both income and expenses are general and broad and include all expenses that are incurred to maintain or create new taxable income.

In general, expenses are deductible if they are incurred for the purpose of acquiring or maintaining taxable income. For the 2014 financial year, entertainment expenses are fully nondeductible for corporate income tax purposes. However, effective from 1 January 2015, 50% of entertainment expenses is deductible for tax purposes. Expenses incurred to obtain tax-free income, as well as income taxes and penalties, are not deductible.

Inventories. Inventories are valued at the lowest of cost, replacement cost or market value on a first-in, first-out (FIFO) basis. Companies may allocate fixed manufacturing overhead to the cost of inventory for accounting and tax purposes if certain conditions are met. Obsolete inventories should be provided for or discarded.

Provisions. In general, the possibility of establishing provisions or reserves for tax purposes is relatively limited. Deductions of warranty reserves and provisions for doubtful debts are limited to the amount of actual expected costs. These provisions are only available for certain types of taxpayers under certain conditions.

Tax depreciation. The Business Tax Act provides detailed rules for the depreciation of different types of assets. The depreciable base is the acquisition cost, which includes related levies, taxes and installation costs. The depreciation expense for tax purposes is not

permitted to exceed the cumulative depreciation expense reported in the annual financial statements in the current year or in previous years. Plant machinery, equipment and buildings are generally depreciated by using the declining-balance method.

Machinery and equipment are combined into a pool for depreciation purposes. Companies may vary the annual depreciation in this pool from 0% to 25%. All machinery and equipment with a life of more than three years are classified as depreciable assets. The depreciable basis is decreased by proceeds from sales of assets in the pool. If the sales price exceeds the depreciable basis, the excess is added to taxable income. If it can be proven that the remaining balance of all machinery and equipment is higher than the fair market value as a result of injury, damage or a similar circumstance, additional depreciation may be claimed for the balance of the machinery.

Equipment with a short life (up to three years), such as tools, is usually expensed. Equipment with an acquisition price of less than EUR850 may also be expensed, with a maximum deduction of EUR2,500 per year.

The maximum depreciation rates for buildings vary from 4% to 20%. The depreciation percentage depends on the use of the building. The depreciation rate for factories, warehouses, shops and similar buildings is 7%.

Intangible assets, such as patents and goodwill, are depreciated using the straight-line method over 10 years, unless the taxpayer demonstrates that the asset's useful life is less than 10 years.

Relief for losses. Losses may be carried forward for 10 years. However, a direct or indirect change in the ownership of the company involving more than 50% of the shares results in the forfeiture of the right to set off losses against profits in future years. An indirect change occurs if more than 50% of the shares in the parent company owning at least 20% of the shares of the loss-making company are transferred and accordingly all of the shares owned by the parent company in the loss-making company are deemed to have changed ownership. An application may be made to the tax office for a special permit for reinstating the right to use the tax losses. The tax office has extensive discretion as to whether to grant the permit.

Losses may not be carried back.

Groups of companies. Corporations are taxed individually in Finland. No consolidated tax returns are applicable. A kind of group taxation is, however, introduced by allowing group contributions for limited liability companies. Group contributions are tax-deductible for the payer and included in the income of the recipient. By transfers of these contributions, income can be effectively allocated among group companies in Finland. To qualify, both companies must be resident in Finland, and at least 90% ownership, direct or indirect, must exist from the beginning of the tax year. Both companies must carry out business activities and be taxed under the Business Tax Act. Also, they must have the same accounting period. The taxpayer cannot create a tax loss by making group contributions.

If the local tax authorities allow tax losses to be deducted regardless of a change in ownership, these losses may generally not be covered by group contributions. However, on application, the local tax authorities may allow such tax losses to be covered by group contributions only in special circumstances.

If a corporate entity or a group of corporate entities owns at least 10% of the share capital of another company, the losses of any receivables from the other company (other than sales receivables) are not tax-deductible. With the exception of the group contributions described above, the same rule applies to all other financial assistance granted to the other company without compensation that is intended to improve the other company's financial situation.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on the sale, rental, importation or repair of goods, and on services unless specifically exempt; exempt services include financial services and insurance services	24
Transfer tax on the purchase of real estate located in Finland; calculated as a percentage of the purchase price	4
Transfer tax on the purchase of shares relating to real estate; calculated as a percentage of the purchase price or other consideration	2
Transfer tax on the purchase of shares in Finnish companies; calculated as percentage of the purchase price or other consideration	1.6
Social security taxes, paid by the employer as a percentage of salaries	
Health insurance premium (2019 rate)	0.77
Employment pension premium; average rate (2019)	17.35
Unemployment insurance premium, on total salaries paid by the employer (for 2019)	
Up to EUR2,086,500	0.50
Amount in excess of EUR2,086,500	2.05
Accident insurance (average rate for 2019)	0.8
Group life insurance (average rate for 2019)	0.07

E. Miscellaneous matters

Foreign-exchange controls. No restrictions are imposed on the repatriation of earnings, interest and royalties abroad.

Transfer pricing. Related-party transactions are accepted if they are carried out at arm's length. Corporate income can be adjusted if the transactions are not as they would have been between independent parties.

Under Finnish transfer-pricing rules, group companies must prepare transfer-pricing documentation if specific circumstances exist. The aim of the documentation is to prove the arm's-length nature of the prices used in cross-border intercompany transactions. On request of the tax authorities, the transfer-pricing documentation for a specified fiscal year must be submitted within

60 days, but not earlier than 6 months after the end of the financial year. Additional clarifications concerning the documentation must be submitted within 90 days of a request by the tax authorities.

A tax penalty of up to EUR25,000 can be imposed for a failure to comply with the transfer-pricing documentation requirements, even if the pricing of the transactions was at arm's length. The adjustment of taxable income may also result in a separate tax penalty of up to 30% of the adjusted amount of income for tax assessment of the 2017 fiscal year and earlier years. From the tax assessment of the 2018 fiscal year and future years, a tax penalty of up to 10% of the adjusted amount of taxable income may be imposed on a corporation and, in certain special cases, the penalty may be up to 50% of the amount of adjusted tax. The adjusted amount of tax also incurs penalty interest.

Country-by-Country Reporting obligations are also implemented under Finnish domestic law, with an annual obligation to file a notification regarding the reporting group entity with the Finnish tax authorities.

Debt-to-equity rules. Direct investments are generally made with a combination of equity and foreign or domestic loans. Finland does not have any specific thin-capitalization legislation. The law does not provide a specific debt-to-equity ratio, and a very limited amount of case law exists. Interest determined on an arm's-length basis on a loan obtained for business purposes is normally fully deductible. In the case of insufficient business reasons for the loan, the deductibility of the interest might be challenged through application of the general anti-avoidance provision.

Restrictions on the tax deductibility of interest expenses entered into force on January 2013 and were applied for the first time with respect to taxation for the 2014 tax year. As a result of the implementation of the EU's Anti-Tax Avoidance Directive (ATAD), the interest deduction limitation rules have been amended. The amended rules are applied for the first time in the 2019 tax assessment. The restrictions do not apply if the taxpayer establishes that the ratio of its book equity to total assets in the financial statements is equal to or higher than the corresponding ratio in the consolidated financial statements of its ultimate parent company.

Under the above provisions, interest expenses are fully deductible against interest income. Any interest expenses exceeding interest income (that is, net interest expenses) may be fully deducted if the total amount of net interest expenses does not exceed EUR500,000 during the fiscal year.

If the EUR500,000 threshold is exceeded, net interest expenses may be deducted only to the extent that they do not exceed 25% of the taxable business profit (calculated under Section 3 of the Finnish Business Income Tax Act) after adding back the following:

- Interest expenses
- Tax depreciation
- Group contributions received (group contributions paid are subtracted)

Non-related-party net interest expenses are deductible up to EUR3 million, and they are deducted primarily as a part of the

25% tax earnings before interest, tax, depreciation and amortization (EBITDA) quota.

The rules described in the preceding paragraph do not apply to non-related-party interest expenses from loans (for example, bank loans) obtained before 17 June 2016. The exception does not apply to later changes of the loans that would affect the amount of the loan or the loan period.

In general, the rules do not apply to financial institutions and to insurance and pension companies. Based on the so-called infrastructure exception, the new rules also do not apply to social housing projects that have received interest subsidies.

The nondeductible amount of interest expenses may be deducted during subsequent years within the respective limitations for each tax year.

Controlled foreign companies. Under Finland's controlled foreign company (CFC) legislation, a Finnish shareholder is subject to tax on its respective direct or indirect share of the CFC's income. In connection with the implementation of the EU ATAD, the Finnish CFC rules are amended with the new rules entering into force as of 1 January 2019 and applied for the first time in the 2019 tax assessment.

A foreign permanent establishment (PE) of a foreign corporation is categorized as a CFC under the same conditions as subsidiaries if the foreign PE is located in a different state than the foreign corporation and if the income of the foreign PE is not taxed in the residence state of the foreign corporation. To determine whether a company is a CFC, the steps described below must be followed:

It first must be determined whether the company is controlled by a Finnish resident either alone or with related parties (resident or nonresident). If not, the CFC rules do not apply. Under the rules applicable from the 2019 tax assessment, a company is controlled by Finnish residents if residents of Finland for tax purposes own directly or indirectly more than 25% of the share capital or the voting shares of the company or if one or more Finnish tax residents is entitled to at least 25% of the profits or the return on capital of the company.

In addition, the foreign company's effective tax rate in its country of residence should be less than three-fifths of the Finnish corporate income tax rate (that is, less than 12%).

If both of the above conditions are fulfilled, the foreign company is considered as a CFC for Finnish tax purposes unless an exemption, as described below, applies.

Under the rules applicable from the 2019 tax assessment, a foreign company is not considered a CFC if it is genuinely established in the jurisdiction of its tax residence and if it carries out genuine economic activities in that jurisdiction. The description of genuine economic activities remains largely in line with the description earlier applicable to EEA resident entities. However, in addition to the conditions related to the genuine establishment in terms of personnel, premises and assets, companies tax resident in a jurisdiction outside the EEA fall within the scope of the exemption only if the following conditions are fulfilled:

- The company's income mostly arises from industrial production activities, other comparable production or service activities, shipping activities, or sales or marketing activities directly serving these activities, and the activities are carried out in the jurisdiction of the company's tax residence, or the company's income mostly arises from payments made by an entity that is part of the same group, that is tax resident in the same jurisdiction and that carries out the above-mentioned activities in that jurisdiction.
- There is sufficient basis for exchange of information between Finland and the jurisdiction of residence and the exchange of information with the jurisdiction is fulfilled.
- At the end of the tax year in question and at the end of the previous tax year, the jurisdiction of residence is not included in the list of non-cooperative jurisdictions issued by the Council of the European Union.

The rules in force before 1 January 2019, including the exemptions therein, are still applicable for the tax assessment of the 2018 tax year and earlier years.

Anti-avoidance legislation. Under a general anti-avoidance provision in the law, the tax authorities may look through certain transactions and apply substance over form in assessing taxes. The general anti-avoidance provision may also be applied if insufficient business reasons for a transaction are presented.

F. Treaty withholding tax rates

The rates in the table below reflect the current double tax treaty rates. As a result of domestic legislation, lower rates may apply. Certain other exceptions may also apply. Please consult your local tax specialist for more information.

	Dividends (aa) %	Interest (w) %	Royalties (cc) %

- (a) The lower rate applies if the recipient is a corporation owning at least 20% of the payer.
- (b) The lower rate applies if the recipient is a corporation owning at least 25% of the payer.
- (c) The rate is 0% for royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting.
- (d) The lower rate applies if the recipient is a corporation owning at least 15% of the payer.
- (e) Copyright royalties for the production or reproduction of any literary, dramatic, musical or artistic work (other than motion picture films) are exempt from tax.
- (f) The lower rate applies if the recipient is a company owning at least 10% of the voting power of the payer.
- (g) The rate is 10% for royalties for copyrights of literary, artistic or scientific works, including films and tapes; otherwise, the rate is 15%.
- (h) The 5% rate applies if the recipient is a corporation owning at least 25% and more than EUR200,000 of the capital of the payer.
- (i) Interest on certain loans is exempt from withholding.
- (j) The rate is 0% for royalties received for the use of or the right to use any copyright of literary, artistic or scientific work, excluding cinematographic films or films and tapes for television or radio broadcasting.
- (k) The 10% rate applies if the recipient has owned at least 25% of the voting rights of the payer for at least six months before the end of the payer's fiscal year. The 15% rate applies to other dividends.
- (l) The lower rate applies to royalties paid for the use of computer software and for equipment leasing.
- (m) The rate is 15% for royalties paid by an enterprise registered with and engaged in preferred areas of activities, for royalties for cinematographic films or tapes for television or broadcasting, and for royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work.
- (n) The 0% rate applies if the recipient is a corporation owning at least 5% of the payer.
- (o) The 20% rate applies if the recipient of the dividends is a corporation that owns at least 25% of the payer. The 15% rate applies to dividends paid by industrial enterprises to recipients described in the preceding sentence. Otherwise, the domestic rates of 20% or 30% apply.
- (p) The lower rate applies if the recipient is a financial institution.
- (q) A lower tax rate applies in certain cases. Please consult the tax treaty.
- (r) The 0% rate applies if the receiving company owns at least 80% of the voting power of the paying company for at least 12 months and qualifies under certain provisions of the limitation-on-benefits article of the treaty.
- (s) The 5% rate applies if, at the time the dividend is payable, the recipient of the dividends owns at least 30% of the share capital of the payer and has invested in the payer foreign capital in excess of USD100,000. The 12% rate applies to other dividends.
- (t) The 0% rate applies to royalties paid for copyrights of literary, artistic or scientific works. The 5% rate applies to royalties paid for the use of cinematographic films and tapes and films for television or radio broadcasting. The 15% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
- (u) The 0% rate applies if the recipient of the dividends owns at least 10% of the voting rights of the payer. The 15% rate applies to other dividends.
- (v) Finland is honoring the Yugoslavia treaty with respect to Bosnia and Herzegovina, Croatia, Kosovo, Montenegro and Serbia.
- (w) Under Finnish domestic law, interest paid to nonresidents is generally exempt from tax.
- (x) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
- (y) The 0% rate applies if, at the time the dividend is payable, the recipient of the dividends owns at least 50% of the share capital of the payer and has invested in the payer foreign capital of EUR2 million or more. The 5% rate applies if the recipient of the dividends owns at least 10% of the share capital of the payer and has invested in the payer foreign capital in excess of EUR100,000. The 10% rate applies to other dividends.
- (z) The rate is 10% for royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting. For other royalties, the rate is 5%.

(aa) No withholding tax is imposed on dividends paid to a parent company resident in another EU country if the recipient of the dividends satisfies the following conditions:

- It holds directly at least 10% of the capital of the payer.
- The recipient of the dividend is a company in a form mentioned in the EU Parent-Subsidiary Directive.

Companies resident in EU or EEA states are generally eligible for the tax exemption for dividends under the same conditions as comparable Finnish companies if the Finnish withholding taxes cannot be credited in the company's state of residence.

(bb) The 5% rate applies if the recipient is a corporation owning at least 70% of the share capital of the payer. The 10% rate applies if the recipient is a corporation owning at least 25%, but less than 70%, of the share capital of the payer. The 15% rate applies to other dividends.

(cc) No withholding tax is imposed on royalties paid to nonresidents if all of the following conditions are satisfied:

- The beneficial owner of the royalties is a company resident in another EU country or a permanent establishment located in another EU country of a company resident in an EU country.
- The recipient is subject to income tax in its home country.
- The company paying the royalties, or the company whose permanent establishment is deemed to be the payer, is an associated company of the company receiving the royalties, or of the company whose permanent establishment is deemed to be the recipient.

A company is an associated company of another company if any of the following apply:

- The first company has a direct minimum holding of 25% in the capital of the second company.
- The second company has a direct minimum holding of 25% in the capital of the first company.
- A third company has a direct minimum holding of 25% in both the capital of the first company and the capital of the second company.

(dd) The 0% rate applies to royalties for software programs, patents, models or drawings. The 5% rate applies to other industrial royalties. The 10% rate applies to royalties for literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting.

(ee) The lower rate applies if the recipient is a corporation owning at least 10% of the payer.

(ff) A lower rate applies in certain circumstances. Please consult the tax treaty.

(gg) The 3% rate applies to royalties paid to a news agency. The 5% rate applies to artistic royalties. The 10% rate applies to industrial royalties. The 15% rate applies to other royalties.

(hh) The 0% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or radio broadcasting. The 1% rate applies to amounts paid under financial leases of equipment. The 5% rate applies to amounts paid under operating leases of equipment and computer software. The 10% rate applies to other royalties.

(ii) The 12% rate applies if the recipient of the dividends is a corporation owning at least 25% of the payer. The 15% rate applies if the recipient of the dividends is a corporation owning less than 25% of the payer. The 20% rate applies to other dividends.

(jj) The 0% rate applies in certain circumstances. Please consult the tax treaty.

(kk) The 0% rate applies to royalties paid for the use of, or right to use, computer software, patents, designs, models or plans. The 5% rate applies to royalties paid for the use of, or the right to use, secret formulas or processes, or for information concerning industrial, commercial or scientific experience (know-how). The 10% rate applies to royalties for the use of, or right to use, trademarks and copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting.

(ll) The 5% rate applies if the recipient is a corporation owning at least 10% of the payer's voting rights. The 0% rate applies if the Australian company has held at least 80% of the Finnish company's voting power for at least 12 months and meets certain other conditions.

(mm) The lower rate applies to, among other interest payments, interest paid by public bodies.

(nn) The lower rate applies to, among other interest payments, interest on current accounts and on advance payments between banks.

(oo) The 5% rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment, or software. The 10% rate applies to royalties paid for the following:

- The use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting
 - The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
 - Information concerning industrial, commercial or scientific experience
- (pp) Copyright royalties are exempt from withholding tax. The 1% rate applies to royalties paid for finance leases of equipment. The 5% rate applies to royalties paid for operating leases of equipment, or for the use of, or the right to use, cinematographic films, films and tapes for television or radio broadcasting, or computer software. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs, plans, formulas or processes, or for information concerning industrial, commercial or scientific experience.
- (qq) A tax treaty is in force between Finland and Brazil. However, the tax-sparing articles of the treaty applied only for the first 10 years since the signing of the treaty. This period ended on 25 December 2007.
- (rr) The lower rate applies if the Italian company holds directly more than 50% of the capital in the Finnish company.
- (ss) The beneficial owner of royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment may elect to be taxed, in the contracting state in which such royalties arise, as if the equipment were effectively connected with a permanent establishment in that state. In such case, the provisions of Article 7 (Business income) of the treaty apply to the income and deductions attributable to such equipment.
- (tt) The 0% rate applies if the interest is paid to the state or a local authority thereof, to the national bank, or to an institution of which the capital is wholly owned by the government.
- (uu) The lower rate applies to loans granted by banks.
- (vv) The 0% rate applies if the interest is paid to the state or national bank. The 5% rate applies to interest on loans to certain public entities promoting export. The 10% rate applies to loans granted by banks. The 15% rate applies in all other cases.
- (ww) The 15% rate applies if the recipient is a company owning at least 10% of the voting power of the payer. Otherwise, the domestic rates of 20% or 30% apply.
- (xx) The 5% rate applies if the interest is paid with respect to indebtedness arising on the sale on credit by the recipient enterprise of any merchandise or industrial, commercial or scientific equipment to an enterprise of the other contracting state, except when the sale or indebtedness is between related persons; in certain circumstances, a 0% rate applies.
- (yy) The tax treaty between Finland and Sri Lanka has been revised, and the revised tax treaty is applicable from 1 January 2019.
- (zz) The new tax treaty with Finland and Spain entered into force on 30 July 2018 and is applicable from 1 January 2019.
- (aaa) The 0% rate applies if the beneficial owner of the interest is the government of the contracting state, a local authority, the central bank, or other agency or instrumentality controlled by the government or if the loan or credit is guaranteed by one of the aforementioned bodies.
- (bbb) The lower rate applies if a company (other than a partnership or a German real estate investment trust company) holds directly at least 10% of the capital of the company paying the dividends.
- (ccc) The new tax treaty between Finland and the Hong Kong Special Administrative Region (SAR) is applicable from 1 January 2019.

A. At a glance

Corporate Income Tax Rate (%)	31 (a)
Capital Gains Tax Rate (%)	0/15/19/25/31 (a)(b)
Branch Tax Rate (%)	31
Withholding Tax (%)	
Dividends	30/75 (c)(d)(e)
Interest	0/75 (c)(f)(g)
Royalties from Patents, Know-how, etc.	31/75 (c)(f)(g)
Branch Remittance Tax	30 (h)
Net Operating Losses (Years)	
Carryback	1 (i)
Carryforward	Unlimited (j)

- (a) For resident companies, surtaxes are imposed on the corporate income tax and capital gains tax. For details, see Section B.
- (b) For details concerning these rates, see Section B.
- (c) These are the withholding tax rates under French domestic law. Tax treaties may reduce or eliminate the withholding taxes.
- (d) Under the European Union (EU) Parent-Subsidiary Directive and Article 119 ter of the French Tax Code, dividends distributed by a French subsidiary to an EU parent company are exempt from withholding tax, if, among other conditions, the recipient holds or commits to hold at least 5% of the subsidiary's shares for at least two years. For details, see Section B.
- (e) The withholding tax rate is 75% for distributed profits paid into uncooperative states.
- (f) No withholding tax is imposed on interest and royalties paid between associated companies of different EU member states if certain conditions are met. For details, see Section B.
- (g) The withholding tax rate is 75% for interest on qualifying borrowings and royalties paid into uncooperative states.
- (h) Branch remittance tax may be reduced or eliminated by double tax treaties. It is not imposed on French branches of companies that are resident in EU member states and are subject to tax in their home countries.
- (i) Losses carried back may not exceed EUR1 million.
- (j) The amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit exceeding this limit for such year.

B. Taxes on corporate income and gains

Corporate tax. The taxation of French companies is based on a territorial principle. As a result, French companies carrying on a trade or business outside France are generally not taxed in France on the related profits and cannot take into account the related losses. However, under the French controlled foreign company (CFC) rules contained in Article 209 B of the French Tax Code, income earned by a French enterprise through a foreign enterprise may be taxed in France if such income is subject to an effective tax rate that is 50% lower than the French effective tax rate on similar income (for further details, see Section E). French companies are companies registered in France, regardless of the nationality of the shareholders and companies that have their place of effective management in France. Foreign companies carrying on an activity in France are subject to French corporate tax on their French-source profits.

Profits derived in France by branches of nonresident companies are deemed to be distributed, normally resulting in the imposition of a branch withholding tax of 30% on after-tax income. This tax is not imposed on the profits of French branches of companies that are resident in EU member states and that are subject to corporate income tax in their home countries. It may be reduced or eliminated by tax treaties. Although branch withholding tax normally applies to undistributed profits, such profits may be exempted from the tax if an application is filed with the tax authorities and if certain requirements are met.

Rates of corporate tax. The standard corporate tax rate is 31% for financial years beginning on or after 1 January 2019 (for financial years beginning on or after 1 January 2018 and before 1 January 2019), a 28% rate applied to the first EUR500,000 of taxable income of all entities and the taxable income in excess of EUR 500,000 was subject to the then standard corporate tax rate of 33%). For financial years beginning on or after 1 January 2019, a 28% rate applies to the first EUR500,000 of taxable income of all entities, and taxable income in excess of EUR500,000 is subject to a 31% rate. For financial years beginning on or after 1 January 2020, a 28% rate will apply for all entities. For financial years beginning on or after 1 January 2021, a 26.5% rate will apply for all entities. For financial years beginning on or after 1 January 2022, a 25% rate will apply for all entities.

A social security surtax of 3.3% is assessed on the corporate income tax amount. This surtax is imposed on the portion of corporate tax due exceeding EUR763,000 before offsetting the tax credits granted under tax treaties (see *Foreign tax relief*). The 3.3% surtax does not apply to companies whose annual turnover is lower than EUR7,630,000 if at least 75% of the company is owned by individuals or by companies that themselves satisfy these conditions.

Members of consolidated groups must take into account the global turnover of the group to determine whether they reach the EUR7,630,000 threshold mentioned above.

Taking into account the social security surtax, the marginal effective rate of French corporate income tax is 32.02% (31% + 1.02%).

A reduced corporate tax rate of 15% applies to the first EUR38,120 of the profits of small and medium-sized enterprises if certain conditions are met, including the following:

- The turnover of the company is less than EUR7,630,000.
- At least 75% of the company is owned by individuals or by companies that themselves satisfy this condition and the above condition.

Capital gains. Capital gains derived from the sale of fixed assets by French companies are subject to corporate income tax at the standard rate.

Capital gains derived from the sale of qualifying participations that have been held for at least two years before their sale are exempt from tax. The following are qualifying participations:

- *Titres de participation* (specific class of shares for accounting purposes that enables the shareholder to have a controlling interest)
- Participations eligible for the dividend participation exemption regime if the shareholder holds at least 5% voting rights

However, the corporate income tax applies to 12% of the gross capital gains realized on qualifying participations. As a result, the effective tax rate on such gains is 3.72% (based on a 31% standard corporate tax rate).

Capital losses incurred with respect to such qualifying participations may no longer be offset against capital gains.

A reduced 15% tax rate applies to the following:

- Income derived from the licensing of patents or patentable rights
- Capital gains realized on patents or patentable rights held for at least two years unless the disposal takes place between related companies

For financial years beginning on or after 1 January 2019, this reduced tax rate is lowered to 10% and applies, on an election performed on an asset-by-asset basis (or, under certain conditions, on a group-of-assets basis), to the net income derived from the licensing of qualifying patents or software, after deduction of the research and development (R&D) expenses incurred during the financial year (a recapture of R&D expenses incurred since the financial year for which the election was made applies the first time the net income is calculated). If negative, the result is carried forward and deducted from income derived in subsequent years from the licensing of the qualifying patent or software. If positive, a ratio, which cannot be greater than 100%, is applied to determine the net income subject to the 10% rate. This ratio compares the following:

- 130% of the R&D expenses incurred for the creation, or the development of the qualifying patent, either by the claiming taxpayer or by unrelated parties
- The total R&D expenses incurred for the creation, the development, or the acquisition of the qualifying patent

For the calculation of the ratio, the R&D expenses include expenses incurred prior to the election, eventually limited to those incurred during financial years beginning on or after 1 January 2019 (specific recapture rules apply for the financial years beginning in 2019 and 2020). A safe harbor provision allows election of a replacement ratio, subject to an agreement with the tax authorities.

The same tax treatment could apply, also on the basis of an election, to the net income derived from the sublicensing of qualifying patents, and to the net gains derived from the transfer to unrelated parties of qualifying patents, provided that the latter was not acquired less than two years before. Qualifying patents include copyright-protected software but do not include patentable rights (except for small and medium-sized companies under certain circumstances).

For French tax consolidated groups, this election is available at the group level. The net income and ratio are determined at the group level.

A reduced 15% tax rate also applies to capital gains derived from sales of shares in venture mutual funds (FCPRs) and venture capital investment companies (SCRs), if these shares have been held for a period of at least five years.

Long-term capital losses relating to income qualifying for the 15% category may only be offset against long-term capital gains corresponding to the same category.

The reduced rates also apply to various distributions made by FCPRs and SCRs.

Capital gains derived from sales of participating interests in companies that are predominantly real estate companies are subject to tax at the standard rate. For listed real estate companies, the rate is reduced to 19%.

Long-term capital gains derived from the first sale of participating interests in companies whose assets' value is mainly composed of television broadcasting rights are subject to tax at a rate of 25%.

Administration. In general, companies must file a tax return within three months following the end of their financial year.

Corporate income tax is prepaid in four installments. Companies that have their financial year ending on 31 December must pay the installments on 15 March, 15 June, 15 September and 15 December. The balance of corporate tax is due by 15 April of the following year. Other companies must pay the balance of corporate tax due within four months following the end of their financial year. The rules governing the payment of corporate income tax also apply to the payment of the 3.3% surtax.

Companies must file their corporate income tax and VAT returns electronically. If a company does not comply with this requirement, a 0.2% penalty is imposed.

In general, late payment and late filing are subject to a 10% penalty. If additional tax is payable as a result of a reassessment of tax, interest is charged at 0.4% per month (4.8% per year) for

interest accrued before 1 January 2018 and 0.2% per month (2.4% per year) for interest accrued from 1 January 2018 to 31 December 2020. Many exceptions and specific rules apply to interest and penalties.

Dividends. Dividends paid by French companies no longer carry a tax credit (*avoir fiscal*). However, under the parent-subsidiary regime, dividends received by French companies or French branches of nonresident companies are exempt from corporate income tax, except for a 5% service charge computed on the gross dividend income (net dividend income and foreign tax credits) and added back to the recipient's taxable income. The rate of this service charge is reduced to 1% in the following cases:

- The distribution is performed within a French tax consolidated group.
- The dividend is distributed to a French tax consolidated company by a company that is a resident for tax purposes in the EU or European Economic Area (EEA) (provided that the EEA country has entered into a treaty with France that includes a mutual assistance provision) and the latter company could be part of the French tax consolidated group if it were subject to corporate income tax in France.
- The dividend is distributed to a French company that is not part of a French tax consolidated group by a company that is resident for tax purposes in the EU or the EEA (provided that the EEA country has entered into a treaty with France that includes a mutual assistance provision) if both of the following conditions are satisfied:
 - Both companies could be part of the same French tax consolidated group if the distributing company was subject to corporate income tax in France.
 - The fact that the French beneficiary company is not tax consolidated does not result from the mere absence of an option for the French tax consolidation regime while that option was technically possible.

The parent-subsidiary regime does not apply to the following:

- Profit distributions that are deductible from the distributing company's taxable income
- Dividends distributed within an arrangement or a series of arrangements, which have been put into place for the main purpose, or one of the main purposes, of obtaining a tax advantage contrary to the object or purpose of the participation exemption regime, are not genuine having regard to all relevant facts and circumstances (that is, not put into place for valid commercial reasons that reflect economic reality)
- Dividends received from a subsidiary established in an uncooperative country (as defined in Article 238-0 A of the French Tax Code; see Section E), unless the parent company demonstrates that the subsidiary's activities are real and do not aim to localize revenues in an uncooperative country

The parent-subsidiary regime applies if the recipient holds at least 5% of the share capital of the distributing company for at least two years.

Effective for financial years beginning on or after 1 January 2019, dividends that cannot benefit from the parent-subsidiary

regime are exempt from corporation income tax up to 99% of the amount of the dividend in the following cases:

- The distribution is performed within a French tax consolidated group (the exemption does not apply the first financial year in which the distributing company is part of the group).
- The dividend is distributed to a French tax consolidated company by a company that is a resident for tax purposes in the EU or EEA (provided that the EEA country has entered into a treaty with France that includes a mutual assistance provision) and the latter company could have been part of the French tax consolidated group if it were subject to corporate income tax in France (the exemption does not apply the first financial year during which this condition is fulfilled).
- The dividend is distributed to a French company that is not part of a French tax consolidated group by a company that is resident for tax purposes in the EU or EEA (provided that the EEA country has entered into a tax treaty with France that includes a mutual assistance provision) if both of the following conditions are satisfied:
 - Both companies could be part of the same French tax consolidated group if the distributing company was subject to corporate income tax in France.
 - The fact that the French beneficiary company is not tax consolidated does not result from the mere absence of an option for the French tax consolidation regime while that option was technically possible.

In general, a 30% withholding tax is imposed on dividends paid to nonresident entities (12.8% for nonresident individuals). The withholding tax rate is increased to 75% for distributed profits paid into uncooperative states (see Section E), unless it is demonstrated that these distributions do not aim to localize revenues in an uncooperative state.

This tax may be reduced or eliminated by tax treaties. In addition, under the EU Parent-Subsidiary Directive, dividends distributed by French subsidiaries to EU parent companies are exempt from withholding tax, if, among other conditions, the recipient holds 10% or more of the shares of the subsidiary for at least two years (the 10% threshold is lowered to 5% if the effective beneficiary cannot credit the French withholding tax in its country of residence).

Furthermore, the withholding tax no longer applies to profits derived from stock, interests or assimilated shares distributed to collective investment vehicles (CIVs) created under foreign law and located in an EU member state or in a state that has signed a treaty with France that includes an administrative assistance provision aimed at combating tax fraud. However, to benefit from the withholding tax exemption, foreign CIVs must meet the same definition as French CIVs, and the content and actual implementation of the administrative assistance provisions must effectively allow the French tax authorities to obtain from the foreign tax authorities the information needed to verify this condition. A 15% withholding tax applies to distributions of income exempt from corporate income tax that are made by French real estate investment trusts (so-called SIICs and SPPICAVs) to French or foreign CIVs.

Withholding taxes on interest and royalties. Under French domestic law, withholding tax is no longer imposed on interest paid to nonresidents. However, a 75% domestic withholding tax is imposed on interest on qualifying borrowings paid into uncooperative states (see Section E), unless it is demonstrated that the corresponding operations do not aim to localize revenues in the uncooperative states.

A 31% withholding tax is imposed on royalties and certain fees paid to nonresidents.

However, as a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and qualifying royalties paid between “associated companies” subject to corporate income tax of different EU member states was abolished. A company is an “associated company” of a second company if any of the following conditions is satisfied:

- The first company has maintained a direct minimum holding of 25% in the capital of the second company for at least two years at the time of the payment or commits itself to maintain such holding for a two-year period.
- The second company has maintained a direct minimum holding of 25% in the capital of the first company for at least two years or commits itself to maintain the holding for the two-year period.
- A third company has maintained a direct minimum holding of 25% in the capital of both the first and second companies for at least two years or commits itself to maintain such holding for a two-year period.

In these three situations, if the company chooses to undertake to keep the shares for at least two years, it must appoint a tax representative in France who would retrospectively pay the withholding tax if the shares are sold before the end of the two-year period.

Domestic withholding tax on royalties may be reduced or eliminated by tax treaties.

Foreign tax relief. In general, income subject to foreign tax and not exempt from French tax under the territoriality principle is taxable. However, most tax treaties provide for a tax credit that generally corresponds to withholding taxes on passive income. Loss-making companies cannot use the tax credit, and they are not allowed to deduct the underlying foreign tax (the withholding tax levied on foreign-source income, which gives right to a tax credit under the double tax treaty).

C. Determination of trading income

General. The assessment is based on financial statements prepared according to French generally accepted accounting principles, subject to certain adjustments.

Deductibility of interest. In general, interest payments are fully deductible. However, certain restrictions are imposed.

Interest accrued by a French entity with respect to loans from its direct shareholders may be deducted from the borrower’s taxable income only if the following two conditions are satisfied:

- The share capital of the borrower is fully paid-up.

- The interest rate does not exceed the average interest rate on loans with an initial duration of more than two years granted by banks to French companies.

Effective for financial years beginning on or after 1 January 2019, the deduction of interest and financial expenses may be limited by several rules.

Related-party interest is tax-deductible only if it meets an arm's-length test and a minimal taxation test.

Under the arm's-length test, the interest rate is capped at the higher of the following two rates:

- The average annual interest rate on loans granted by financial institutions that carry a floating rate and have a minimum term of two years
- The interest rate at which the company could have borrowed from any unrelated financial institution, such as a bank, in similar circumstances (that is, the market rate)

The portion of interest that exceeds the higher of the above two thresholds is not tax-deductible and must be added back to the company's taxable income for the relevant financial year (this portion is also considered to be distributed income).

Under the minimal taxation test, the tax deduction of interest accrued to related-party lenders is disallowed if the French taxpayer cannot prove, at the request of the French tax authorities, that the related lender is liable to corporate income tax on such interest that is at least 25% of the corporate income tax that would have been due had the lender been established in France. If the lender is domiciled or established outside France, the French corporate income tax is determined as if the lender were established or domiciled in France. If the lender is a transparent entity, such as a partnership or an investment fund, the limitation of interest deduction only applies to the extent that such entity and its relevant members are affiliated, and the minimum corporate income tax rate of 25% is considered at the level of the entity's members or shareholders.

The net financial expenses incurred during a financial year (that is, the financial expenses reduced by financial income) is deductible from the taxable income of a company only to the extent that they do not exceed the higher of the two following thresholds:

- EUR3 million
- 30% of the adjusted taxable income of the company

For purposes of the above rule, financial expenses (or income), as defined, include, but are not limited to, any amounts that are accrued in remuneration for monies put at the disposal of the company (or by the company to another party). They include, but are not limited to, the following:

- Payments under profit participating loans
- Imputed interest on instruments such as convertible bonds
- Amounts under alternative financing arrangements
- Notional interest amounts under derivative instruments or hedging arrangements related to an entity's borrowings
- Certain foreign-exchange gains and losses on borrowings and instruments connected with the raising of finance

- Guarantee fees for financing arrangements, arrangement fees and similar costs related to the borrowing of funds

The adjusted taxable income corresponds to the taxable income before the offset of tax losses and without taking into consideration net financial expenses and, to some extent, depreciation, provisions, and capital gains and losses. Seventy-five percent of the net financial expenses exceeding the threshold is tax deductible, provided that the equity-to-asset ratio of the company is at least equal to, or is not lower by more than two percentage points, than the equity-to-asset ratio of the consolidated group to which it belongs. Financial expenses that are excluded from the deductible expenses of a given fiscal year can be carried forward indefinitely (subject to the abovementioned limitations). If, for a given financial year, a company does not fully utilize its deduction capacity (that is, the amount of net financial expenses is lower than the thresholds mentioned above), the unused portion of deduction capacity, which equals the positive difference between the applicable thresholds and the net financial expenses, can be carried forward to the five following financial years. However, this deduction capacity carryforward cannot be used to deduct nondeductible interest expenses that have been carried forward.

In case the company exceeds a specific 1.5:1 debt-to-equity ratio and cannot demonstrate that its debt-to-equity ratio is not higher by more than two percentage points than the debt-to-equity ratio of the consolidated group to which it belongs, restrictive rules apply. A portion of the net financial expenses, determined by application of the following ratio to the net financial expenses, is subject to the regular threshold (EUR3 million or 30% of the adjusted taxable income of the company):

$$\frac{\text{Average amount of indebtedness to unrelated parties} + (1.5 \times \text{equity})}{\text{Average amount of indebtedness}}$$

The remaining portion of the net financial expenses is tax deductible only within the limit of the higher of the two following strengthened thresholds:

- EUR1 million
- 10% of the above-mentioned adjusted taxable income

In case of thin-capitalization, the safe-harbor rule that allows for the additional deduction of 75% of the net financial expenses exceeding the threshold does not apply. The portion of net financial expenses that could not be deducted by application of the strengthened threshold can only benefit from the carryforward up to one-third of its amount, and the exceeding portion of the deduction capacity cannot be carried forward.

For a tax-consolidated group, the limitation rule based on a portion of the adjusted taxable income applies at the level of the group.

Inventories. Inventory is normally valued at the lower of cost or market value. Cost must be determined under a weighted average cost price method. A first-in, first-out (FIFO) basis is also

generally acceptable, but a last-in, first-out (LIFO) basis is not permitted.

Reserves. In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes. In addition, the law provides for the deduction of special reserves.

Capital allowances. In general, assets are depreciated using the straight-line method. However, new qualifying industrial assets are generally depreciated using the declining-balance method.

Depreciable assets composed of various parts with different characteristics must be depreciated on a separate basis (these assets must be split into a principal component or structure on the one hand and into additional components on the other hand). The depreciable amount of each asset must be spread out over its likely useful life for the company, which corresponds to the time period during which the company may expect to derive a profit from it. The depreciation method applied to each asset (straight-line method or accelerated method) must also be consistent with the pace at which the company expects to derive a profit from the asset.

Periodic assessment of the residual value of each component must be conducted to establish a (non-tax deductible) provision for impairment if needed.

For tax purposes, the depreciation of assets that have not been split into components and the depreciation of the asset's principal structure that has been split into components can be spread out over the useful life commonly accepted in business practices. This rule does not apply to buildings acquired by real estate investment companies. The following are some of the acceptable straight-line rates.

Asset	Rate (%)
Commercial buildings	2 to 5
Industrial buildings	5
Office equipment	10 to 20
Motor vehicles	20 to 25
Plant and machinery	5 to 10*

* These are the general rates. Alternatively, new plant and machinery may be depreciated using the declining-balance method at rates generally ranging from 12.5% to 50%.

Certain specified assets may be depreciated using accelerated depreciation methods. Land and works of art are not depreciable. Intangible assets are depreciable if the company can anticipate that the profits derived from the assets will end at a fixed date. In general, goodwill is not depreciable.

Relief for tax losses. Losses may be carried forward indefinitely. However, the amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit above that amount for such financial year.

In addition, enterprises subject to corporate tax may carry back losses against undistributed profits from the prior financial year.

The carryback results in a credit equal to the loss multiplied by the current corporate tax rate, but losses carried back may not exceed EUR1 million. The credit may be used to reduce corporate income tax payable during the following five years with the balance being refunded at the end of the fifth year. A significant change in the company's activity, particularly an addition or a termination of a business that infers a decrease of 50% or more of either the revenue or the average headcount and fixed assets, may jeopardize the loss carryover and carryback.

Groups of companies. Related companies subject to corporate tax may elect to form a tax-consolidated group. Under the tax-consolidation regime, the parent company files a consolidated return, thereby allowing the offset of losses of one group entity against the profits of related companies. The parent company then pays tax based on the net taxable income of companies included in the consolidated group, after certain adjustments for intra-group provisions are made, in particular, the following:

- Intra-group asset or share transfers, as well as any subsequent depreciation related to these transfers, are neutralized (the neutralization of share transfers benefiting from the participation exemption is repealed for financial years beginning on or after 1 January 2019).
- Intra-group dividends not subject to the parent-subsidiary regime are neutralized (this neutralization is repealed for financial years beginning on or after 1 January 2019).
- Intra-group provisions for bad and doubtful debts are neutralized.
- Waivers of debts and subsidies between members of the group are neutralized (this neutralization is repealed for financial years beginning on or after 1 January 2019).

If a company is acquired from a shareholder controlling the group and becomes a member of the tax-consolidated group, the amendment Charasse provides that an amount of the financing expenses of the group must be added back to the consolidated income within a nine-year period starting with the purchasing year. This amount is calculated as follows:

$$\text{Group financing expenses} \times \frac{\text{Acquisition price of the shares}}{\text{Average amount of the group's debt}}$$

The group includes the French subsidiaries in which the parent has a direct or indirect shareholding of at least 95% and for which the parent company has elected tax consolidation.

A French company or permanent establishment is allowed to form a French tax consolidated group with other French companies or permanent establishments if all are owned at 95% or more by a foreign parent company or permanent establishment is allowed that is subject to a tax equivalent to French corporate income tax in another EU country or EEA country ("horizontal tax consolidation"). The 95% ownership test can be met directly, or indirectly, through intermediate companies or permanent establishments that are all subject to tax in an EU/EEA country or through other French consolidated companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	2.1/5.5/10/20
Territorial Economic Contribution; replaced the Business Activity Tax (Taxe professionnelle); capped to a certain amount of the value added by the company; maximum rate	3
Social security contributions, on gross salary (approximate percentages); paid by Employer	40 to 45
Employee	20 to 23
General social security tax (<i>contribution sociale généralisée</i> , or CSG) on active income	9.2
General social security tax on patrimonial and financial income (for example, income from real estate and securities)	9.2
Social debt repayment tax (<i>contribution remboursement de la dette sociale</i> , or CRDS), on all income	0.5
Special social security tax (<i>prélèvement de solidarité</i>)	7.5
Registration duty	
On sales of shares in stock companies (including <i>sociétés anonymes</i> , <i>sociétés par actions simplifiées</i> and <i>sociétés en commandites par actions</i>); intragroup transfers are exempt	0.1
On sales of shares of private limited liability companies (<i>sociétés à responsabilité limitée</i> , or SARLs) and interests in general partnerships (<i>sociétés en nom collectif</i> , or SNCs); intragroup transfers are exempt	3
On sales of goodwill	3 to 5
On sales of professional premises, housing, businesses and shares of companies whose assets primarily consist of real estate	5 to 6

E. Miscellaneous matters

Foreign-exchange controls. French exchange-control regulations have been eased. French direct investments into foreign countries are now almost completely unrestricted. In general, foreign direct investments in France, except in certain sensitive sectors, are only subject to an administrative declaration. For current operations, such as loans between residents and nonresidents and the opening of foreign bank accounts by French companies, the regulations have been almost totally eliminated.

Payments to residents of tax havens or to uncooperative states or territories. Under Article 238 A of the French Tax Code, interest, royalties and other remuneration paid to a recipient established in a tax haven or on a bank account located in a tax haven are deemed to be fictitious and not at arm's length. As a result, to deduct the amount paid, the French entity must prove that the operation is effective (that it effectively compensates executed services) and is at arm's length. For purposes of the above rules, a privileged tax regime is a regime under which the effective tax

paid is 50% lower than the tax that would be paid in France in similar situations.

If these payments are made to a recipient established in an uncooperative country or on a bank account located in an uncooperative country, the French entity must also prove that the operation's principal aim is not to locate the payment in that country. The list of the uncooperative countries is published at least once a year.

Transfer pricing. French entities controlled by, or controlling, entities established outside France are taxable in France on any profits transferred directly or indirectly to the entity located abroad through an increase or decrease in purchase or sale prices or by any other means.

In the context of a tax audit, certain companies (companies with total net sales before taxes or total gross assets equal to or greater than EUR400 million, subsidiaries owned at more than 50% by such a company, parent companies that hold more than 50% of such a company and members of a French tax consolidated group that includes at least one company that meets these criteria) must provide their transfer-pricing documentation on the tax inspector's request or within 30 days (Article L 13AA of the French Tax Procedure Code). For financial years beginning on or after 1 January 2018, the transfer-pricing documentation includes the list of information recommended by the Organisation for Economic Co-operation and Development (OECD) for the Master File (Annex I to the new Chapter V of the OECD's Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations) and the Local File (Annex II to the aforementioned Chapter V). If the company fails to provide the documentation in due time, a penalty of up to either 5% of the transfer-pricing reassessment or 0.5% of the volume of the transactions carried out with related enterprises is applied, with a minimum of EUR10,000 per financial year under audit.

In addition, certain companies (a company with total net sales before taxes or total gross assets equal to or greater than EUR50 million, a subsidiary owned at more than 50% by such a company, a parent company that holds more than 50% of such a company and members of a French tax consolidated group that includes at least one company that meets these criteria) are required to file a "light" transfer-pricing statement within six months after the filing deadline of the tax return (Article 223 quinquies B of the French Tax Code). The transfer-pricing statement includes the following:

- General information about the group (main activities, companies related to the reporting entity, intangible assets held by the group and used by the reporting entity, and general description of the transfer-pricing policy applied by the group)
- Specific information for intragroup transactions
- Disclosure of change in the activity of the entity or in the transfer-pricing method being applied

Although the penalty for a not filing this transfer-pricing statement is minimal (that is, EUR150), taxpayers failing to file the report are likely to be scrutinized by the French tax authorities.

Country-by-Country Reporting. In accordance with the OECD final report on Transfer Pricing Documentation and Country-by-Country Reporting (CbCR) Action 13 and EU Directive 2011/16/EU regarding mandatory automatic exchange of information in the field of taxation, certain companies that are members of a multinational group with a consolidated turnover of at least EUR750 million are subject to a CbCR obligation (Article 223 quinquies C of the French Tax Code). The report must be filed within 12 months after the closing date of the financial year. Noncompliant companies may be subject to a penalty of up to EUR100,000.

Controlled foreign companies. Under Section 209 B of the French Tax Code, if French companies subject to corporate income tax in France have a foreign branch or if they hold, directly or indirectly, an interest (shareholding, voting rights or share in the profits) of at least 50% in any type of structure benefiting from a privileged tax regime in its home country (the shareholding threshold is reduced to 5% in certain situations), the profits of this foreign entity or enterprise are subject to corporate income tax in France. If the foreign profits have been realized by a legal entity, they are taxed as a deemed distribution in the hands of the French company. If the profits have been realized by an enterprise (an establishment or a branch), these profits are taxed as profits of the French company if the tax treaty between France and the relevant foreign state allows the application of Section 209 B of the French Tax Code.

For the purpose of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in France in similar situations (such a foreign company is known as a controlled foreign company [CFC]). Tax paid by a CFC in its home country may be credited against French corporate income tax.

CFC rules do not apply to profits derived from entities established in an EU member state unless the French tax authorities establish that the use of the foreign entity is an artificial scheme that is driven solely by French tax avoidance purposes.

Similarly, the CFC rules do not apply if the profits of the foreign entity are derived from an activity effectively performed in the country of establishment. The concerned company must demonstrate that the establishment of the subsidiary in a tax-favorable jurisdiction has mainly a non-tax purpose and effect by proving that the subsidiary mainly carries out an actual industrial or commercial activity.

Debt-to-equity rules. For a discussion on the restrictions imposed on the deductibility of interest payments, see Section C.

Headquarters and logistics centers. The French tax authorities issue rulings that grant special tax treatment to headquarters companies and logistics centers companies. These companies are subject to corporate income tax at the normal rate on a tax base corresponding generally to 6% to 10% of annual operating expenses, depending on the company's size, functions assumed and risks borne. In addition, certain employee allowances are exempt from income tax.

Reorganizations. On election by the companies involved, mergers, spin-offs, split-offs and dissolutions without liquidation may qualify for a special rollover regime.

Tax credit for research and development. To encourage investments in R&D, the tax credit for R&D expenditure equals 30% of qualifying expenses related to operations of R&D (qualifying expenses equal the sum of 75% of the depreciation of fixed assets used in the research activity and 50% of staff expenses related to research) up to EUR100 million, and 5% for such expenses above EUR100 million. The rate is increased to 40% for the first year and to 35% for the following year for companies that benefit from the tax credit for the first time or that did not benefit from the regime for the five years preceding their request for the credit.

Tax audits. All companies must maintain their accounting records in an electronic form when French tax authorities carry out a tax audit.

F. Treaty withholding tax rates

The following table is for illustrative purposes only.

	Dividends %	Interest (e)(g) %	Royalties (e) %

- (a) Dividends paid by French companies to parent companies located in other EU member states are exempt from withholding tax if the parent company makes a commitment to hold at least 10% of the distributing company for an uninterrupted period of at least two years (the 10% threshold is lowered to 5% if the effective beneficiary cannot credit the French withholding tax in its country of residence).
- (b) Withholding tax rates of 5%/15% (dividends), 0%/10% (interest) and 0%/10% (royalties) apply with respect to Quebec.
- (c) France has agreed with Turkmenistan to apply the France-USSR tax treaty. France applies the France-USSR tax treaty to Belarus, Kyrgyzstan and Moldova.
- (d) The tax treaty between France and China does not apply to the Hong Kong SAR.
- (e) As a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and royalties paid between associated companies of different EU states is abolished if certain conditions are met (see Section B).

- (f) France is honoring the France-Yugoslavia treaty with respect to Bosnia and Herzegovina, Montenegro and Serbia.
- (g) The French domestic law applies. As a result, the rate is 0% under normal circumstances. The rates listed for interest in the table are the treaty rates.
- (h) The general rates under the treaty are reduced in practice according to a “most-favored-nation” clause. The rates indicated are those resulting from the application of the “most-favored-nation” clause.
- (i) The 75% rate applies only to payments made into uncooperative countries (see Section E).
- (j) The domestic rate applies.
- (k) The dash signifies the domestic rate.

A. At a glance

Corporate Income Tax Rate (%)	25/30/35 (a)(b)
Capital Gains Tax Rate (%)	25/30/35 (c)
Withholding Tax (%)	
Dividends	10/20 (d)
Interest	20 (e)
Royalties from Patents, Know-how, etc.	20 (f)
Payments for Services	20 (g)
Branch Remittance Tax	10/20 (h)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The minimum tax is 1% of turnover (unless exempt). See Section B for details.
 (b) Oil companies' subcontractors with a permanent establishment in Gabon are subject to tax on taxable turnover. The tax rate for these subcontractors is currently 8.75% (see Section D).
 (c) In certain circumstances, the tax is deferred (see Section B).
 (d) The rate is 10% if the parent-subsidiary regime applies. The 20% rate applies to payments made to resident and nonresident individuals and legal entities.
 (e) This 20% rate applies to interest paid to resident and nonresident individuals and nonresident legal entities, excluding interest on bonds.
 (f) This withholding tax applies to payments to nonresidents.
 (g) This withholding tax applies to payments made by resident companies to nonresidents for services, including professional services, rendered or used in Gabon.
 (h) This tax applies if the profits are remitted to the head office. The 10% rate applies to payments to head offices located in tax treaty countries. The rate of 20% applies to payments to head offices located in non-treaty countries.

B. Taxes on corporate income and gains

Corporate income tax. Gabonese companies are taxed on the territoriality principle. As a result, Gabonese companies carrying on a trade or business outside Gabon are not taxed in Gabon on the related profits. Gabonese companies are those registered in Gabon,

regardless of the nationality of the shareholders or where the companies are managed and controlled. Foreign companies with activities in Gabon are subject to Gabonese corporate tax on Gabonese-source profits.

Tax rates. The standard corporate income tax rate is 30%. However, oil and mining companies are subject to tax at a rate of 35%. A reduced corporate tax rate of 25% applies to a limited number of companies. The minimum corporate tax payable is 1% of annual turnover, but not less than XAF1 million. The base for the calculation of the minimum corporate tax is the global turnover realized during the tax year. An exemption from the minimum corporate tax applies to the following companies:

- Companies exempt from corporate income tax, as provided in the general tax code
- New businesses
- Newly incorporated companies or legal entities, for their first two years, regardless of their activities

Capital gains. Capital gains are taxed at the regular corporate rate. The tax, however, can be deferred if all of the proceeds are used to acquire new fixed assets in Gabon within three years.

Administration. The tax year is the calendar year. Tax returns must be filed by 30 April.

Companies must pay the corporate tax (or the minimum tax) in two installments, which are due on 30 November and 30 January. The first installment equals 25% of the preceding year's corporate tax. The second installment equals 33.33% of such tax. Companies must pay any balance of tax due by the due date for the tax return, which is 30 April.

Late payments are subject to a penalty of 10% for the first month and 3% for subsequent months.

Late filing of the corporate tax return is subject to a penalty of XAF50,000 per month (before summons to pay), increased to XAF200,000 per month (after summons to pay), with a maximum penalty of XAF5 million.

Dividends. Dividends paid to resident and nonresident individuals and legal entities are subject to a 20% withholding tax.

If the parent-subsidiary regime applies, dividends received by parent companies are subject to a 10% tax. The parent-subsidiary regime applies if the following conditions are satisfied:

- The shares owned by the parent company represent at least 25% of the capital of the subsidiary.
- Both the parent and subsidiary have their seat in a Central African Economic and Monetary Community (CEMAC) member country (Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea and Gabon).
- The holding company retains the shares registered in its own name for at least two years from the date of issuance of the shares.

Foreign tax relief. In general, foreign tax credits are not allowed; income subject to foreign tax that is not exempt from Gabonese tax under the territoriality principle is taxable net of the foreign tax. However, Gabon's tax treaties with Belgium, Canada,

France and Morocco provide a tax credit that corresponds to the amount of the withholding tax.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the general accounting chart of the Organization for the Harmonization of Business Law in Africa.

Business expenses are generally deductible unless specifically excluded by law. To be deductible, an expense must satisfy the following general conditions:

- It must be made in the direct interest of the company or linked to the normal management of the company.
- It must be real and justified.
- It must result in the diminution of the net assets of the company.
- It must be registered in the company books as an expense of the related fiscal year.
- It must not be expressly excluded from deductible expenses by law.
- It must not be considered as an abnormal transaction.

The following expenses are deductible, subject to the conditions mentioned above:

- Head office overhead and remuneration for certain services (studies and technical, financial or administrative assistance) paid to nonresidents. The deduction is limited to 10% of chargeable income before taking into account such expenses.
- Royalties from patents, brands, models or designs paid to a non-CEMAC corporation participating in the management of, or owning shares in, the Gabonese corporation.

The following expenses are not deductible:

- Rent expense for movable equipment paid to a shareholder holding, directly or indirectly, more than 10% of the capital
- A portion of interest paid to a shareholder in excess of the central bank annual rate plus two points and, if the shareholder is in charge of management, on the portion of the loan exceeding one-half of the capital stock
- Commissions and brokerage fees exceeding 5% of purchased imports
- Certain specific charges, penalties and corporate tax
- Most liberalities (payments that do not produce a compensatory benefit, such as excessive remuneration paid to a director), gifts and subsidies

Inventories. Inventories are normally valued at cost or market value. Cost must be determined on a weighted-average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be

depreciated using the straight-line method at rates specified by the tax law. The following are some of the applicable straight-line rates.

Asset	Rate (%)
Constructions	5 to 20
Plant and machinery and transport equipment	5 to 33.3
Office equipment	To 33.3

An accelerated depreciation method may be used for certain fixed assets, subject to the approval of the tax authorities.

Relief for tax losses. Losses may be carried forward five years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. Gabonese law does not allow the filing of consolidated tax returns. Tax rules applicable to groups of companies are discussed below.

Corporate income tax. Costs incurred within a group are deductible for tax purposes. These costs include assistance fees, interest on partner current accounts and rentals of goods within the group.

Capital gains derived from intragroup operations are taxable at a reduced rate of 20% instead of a rate of 30%, unless they are subject to other favorable exemption regimes.

Tax on investment income. Tax on Gabonese-source investment income (for example, dividends) paid to companies of the same group are subject to the Tax on Income from Movable Capital (Impôt sur le Revenu des Capitaux Mobiliers, or IRCM) at a rate of 5%. This income is normally taxable at a rate of 20% (or 10% if the company is located in the CEMAC area).

A 10% rate applies if the income is paid by the head company to a partner who is an individual or legal entity.

Subject to conditions, a tax credit in Gabon may be granted even for tax paid to countries that have not entered into a tax treaty with Gabon.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Business activity tax (<i>license</i>); calculated based on the nature of the business, the value of equipment and the number of employees	Various
Special tax on subcontractors of petroleum companies; a global tax including a contractual payment amount, income tax and payroll tax; on taxable turnover	8.75
Registration duties, on transfers of real property or businesses	4 to 8
Social security contributions, on an employee's gross salary limited to XAF1,500,000 a month	
Employer	16
Employee	2.5

Nature of tax	Rate (%)
Medical health contributions, on an employee's gross salary limited to XAF1,500,000 a month	
Employer	4.1
Employee	1
Value-added tax (VAT); imposed on corporations realizing annual turnover in excess of XAF60 million from general business activities and on corporations realizing annual turnover in excess of XAF500 million from forestry development activities	
Standard rate	18
Reduced rate, on certain items such as sugar	10
Reduced rate on sales of cement and the rendering of services related to cement	5
Exports and international transport	0
Withholding tax on local service providers that are not subject to VAT; tax based on the total amount of the invoice	9.5

E. Miscellaneous matters

Foreign exchange controls. The CEMAC Act, dated 21 December 2018, provides exchange-control regulations, which apply to financial transfers outside the franc zone, which is a monetary zone including France and its former overseas colonies.

Specific tax incentive regime on mergers and similar operations. A specific tax incentive regime for mergers and similar operations is available. To benefit from this regime, all of the following conditions must be satisfied:

- The transferee (beneficiary company in the transfer) must have its registered office in Gabon.
- An agreement must be obtained from the Minister of Finance, after approval of the Director General of Taxes if foreign companies are involved in the operation.
- The operation must be justified by economic reasons instead of fiscal reasons.
- The new shares must be held for a period of five years after the transfer.

F. Treaty withholding tax rates

Gabon has signed a multilateral tax treaty with the CEMAC members, which were formerly members of the Central African Economic and Customs Union (UDEAC). Gabon has also entered into the African and Mauritian Common Organization (OCAM) multilateral tax treaty, as well as tax treaties with Belgium, Canada, France and Morocco. The withholding rates under these multilateral treaties and the treaties with Belgium, Canada, France and Morocco are listed in the following table.

	Dividends %	Interest %	Royalties %
Belgium	15	15	10
Benin	15	15	– (a)
Cameroon	15	15	– (a)

	Dividends	Interest	Royalties
	%	%	%
Canada	15	10	10 (a)
Central African Republic	15	15	– (a)
Chad	15	15	– (a)
Congo (b)	15	15	– (a)
Côte d'Ivoire	15	15	– (a)
Equatorial Guinea	15	15	– (a)
France	15	10	10
Morocco	15	10	10
Senegal	15	15	– (a)
Togo	15	15	– (a)
Non-treaty jurisdictions	20	20 (c)	20

- (a) Withholding tax is not imposed, but the income is subject to tax in the state of the recipient.
- (b) Congo and Gabon have signed both the CEMAC (UDEAC) and OCAM treaties. The withholding rates are the same under each treaty.
- (c) See footnote (e) to Section A.

Because of the rapidly changing economic and political situation in Georgia, frequent changes are introduced to the Tax Code of Georgia. As a result, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15 (b)
Withholding Tax (%)	
Dividends	5
Interest	5
Royalties	5 (c)
Management Fees	10 (c)
Income from International Transport or International Communications	10 (c)
Income from Oil and Gas Operations	4 (c)
Interest, Royalties and Payments of Other Georgian-Source Income to Companies Registered in Low-Tax Jurisdictions	15
Payments of Other Georgian-Source Income	10 (c)
Branch Remittance Tax	0

- (a) Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject only to tax at a rate of 15% on distributed profits and certain payments made. The tax rate is applied to the taxable object divided by a specified percentage (for further details, see Section B).
- (b) Resident companies and permanent establishments of nonresident companies are not subject to tax on their capital gains received. They are subject only to tax at a rate of 15% on distributed profits. Nonresident companies without a permanent establishment in Georgia are subject to tax at a rate of 15% on their capital gains derived from Georgian sources. For further details, see Section B.
- (c) These withholding taxes apply to payments to foreign companies.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies and permanent establishments of nonresident companies are not subject to tax on their income. They are subject only to tax on the following taxable objects:

- Distributed profits
- Expenses incurred and other payments not related to economic activity
- Free-of-charge supplies of goods or services and transfers of funds
- Representative expenses exceeding statutory limits prescribed by the Tax Code of Georgia (TCG)

Distributed profits. Distributed profit consists of cash or non-cash dividends distributed by a legal entity to its partners or shareholders.

Activities that are not considered distributions of profits include, among others, the following:

- Distributions of dividends among Georgian legal entities
- Distributions of dividends received from foreign enterprises (other than companies registered in low-tax jurisdictions)

Repatriations of profits attributable to permanent establishments of nonresident entities are treated as distributions of profits. Profit attributable to a permanent establishment is a profit that the permanent establishment would have made if it were a distinct and separate enterprise engaged in the same or similar activities under the same or similar conditions.

Distributions of profits include the following:

- Transactions conducted with related resident entities that are not subject to tax on distributions of profit (that is, they are taxed under the old regime) if the contractual price of such transactions differs from the market price
- International controlled transactions that are not at arm's length
- Transactions conducted with persons that are exempt from corporate income tax or personal income tax under the TCG if the contractual price of such transactions differs from the market price

Incurred expenses and other payments not related to economic activity. The TCG contains a list of expenses or payments that are subject to corporate income tax. Such expenses include, among others, expenses that are not documentarily proven or that were not incurred for the purpose of deriving profit, income or compensation. In addition, certain payments to persons registered in low-tax jurisdictions are taxable.

Free-of-charge supplies of goods and services and transfers of funds. Supplies that are not aimed at gaining profit, income or compensation are considered to be free of charge. In addition, a shortage of inventory or fixed assets is considered a free-of-charge supply and is subject to corporate income tax.

Free-of-charge supplies of goods or services are exempt from tax under the following circumstances:

- The supply was taxed at the source of payment.
- The supply represents a donation to a charitable organization and does not exceed 10% of the net profit for the preceding calendar year.
- The recipient of the goods, services or funds is a state authority, municipal body or legal entity of public law.

Representative expenses. Representative expenses exceeding 1% of revenues or expenses for the preceding calendar year are taxable.

Commercial banks, credit unions, insurance companies, microfinance organizations and pawnshops will be taxed in accordance with new system described above, effective from 1 January 2023. Until then, the tax base of these entities is determined as the difference between the gross taxable income and the amount of deductions stipulated under the TCG.

Foreign legal entities without a permanent establishment in Georgia are subject to withholding tax on their Georgian-source income at a rate of 4%, 5%, 10% or 15% (see Section A).

Tax rate. The regular corporate income tax rate is 15%. To calculate corporate income tax, the tax rate is applied to the taxable objects described above divided by 0.85.

Special types of enterprises. The Georgian tax law provides for beneficial tax treatment for enterprises operating in Georgia with the following statuses:

- International Financial Company
- Special Trade Company
- Free Industrial Zone Company
- Virtual Zone Person
- Tourist Enterprise
- Agricultural Cooperative

The Georgian Tax Authorities (GTA) grant the above statuses according to the rules defined by the Minister of Finance of Georgia. The statuses are described below.

International Financial Company. A financial institution may obtain the status of International Financial Company for the purpose of tax benefits if its Georgian-source income derived from financial operations and/or financial services does not exceed 10% of its worldwide income. Income received from financial operations and financial services between International Financial Companies is not considered to be income received from Georgian sources. An International Financial Company must be established outside a Free Industrial Zone. International Financial Companies are exempt from corporate income tax on profits and distributions of profits derived from financial operations, financial services and/or the sale of securities issued by nonresident persons.

Special Trade Company. An entity conducting its activities in an authorized warehouse may be granted Special Trade Company status for corporate income tax exemption purposes. A Special Trade Company may supply and re-export foreign goods from a customs warehouse, as well as purchase foreign goods from an entity without such status for further supply or re-export. A Special Trade Company may also derive income (including Georgian-source income) from other allowable activities if such income does not exceed the sum of GEL1 million and 5% of the customs value of foreign goods brought into Georgia. In addition, a Special Trade Company may derive income exempted from corporate income tax and from the sale of fixed assets used in economic activities for more than two years. A Special Trade

Company is prohibited from importing or purchasing Georgian goods for further supply, rendering of services in Georgia to a Georgian entity, individual entrepreneur and/or to a permanent establishment of a foreign enterprise and operating a customs warehouse. The status of Special Trade Company is canceled for a calendar year if an authorized representative of such company submits an application to the GTA at least five business days before the beginning of the relevant calendar year. A Special Trade Company is exempt from corporate income tax on distributed profits received from allowable activities except for income received from the sale of fixed assets.

Free Industrial Zone Company. Free Industrial Zone Company status for tax purposes may be granted to a company operating in a Free Industrial Zone. Free Industrial Zone Companies primarily engage in the manufacturing and export of goods outside Georgia from a Free Industrial Zone. The status of Free Industrial Zone Company is subject to cancellation if the company engages in activities prohibited by the law. Free Industrial Zone Companies are exempt from corporate income tax on distributed proceeds from activities allowed within a Free Industrial Zone.

Virtual Zone Person. Virtual Zone Person status for tax purposes may be granted to a company engaged in information technology activities. Virtual Zone Persons are exempt from corporate income tax on distributions of profits derived from the supply of self-produced information technology outside Georgia.

Tourist Enterprise. Tourist Enterprise status for tax purposes may be granted to a company that builds a hotel for the purpose of the sale and leaseback of the assets, or part of the assets, of the hotel and uses the building in hotel operations. Distribution of profit derived from the rendering of hotel services and the incurrence of expenses in the course of such activity by tourist enterprises are exempt from corporate income tax until 1 January 2026.

Agricultural Cooperative. Agricultural Cooperative status for tax purposes may be granted to a company in accordance with the Law of Georgia on “Agricultural Cooperative.” Agricultural Cooperatives are exempt from corporate income tax on distributed profits derived from the initial supply of agricultural products produced in Georgia before industrial processing of the products (that is, a change of commodity code occurs) until 1 January 2023.

Capital gains. No separate capital gains tax is imposed in Georgia. Capital gains derived by resident companies and permanent establishments of nonresident companies are not subject to corporate income tax until they are distributed.

Capital gains from the supply of treasury bonds are exempt from taxation.

In addition, the following types of capital gains derived by non-residents without a permanent establishment in Georgia are exempt from taxation:

- Gains from the supply of bonds issued through a public offering by a resident entity in Georgia and admitted for trading on the organized market recognized by the National Bank of Georgia (NBG)

- Gains from the supply of equity securities issued through a public offering by a resident entity in Georgia and admitted for trading on the organized market recognized by the NBG

Administration. The reporting period for the entities subject to corporate income tax on distribution of profit is a calendar month. Such entities must submit a corporate income tax return and pay the respective tax by the 15th of the month following the reporting month.

The reporting period for commercial banks, credit unions, insurance companies, microfinance organizations and pawnshops is a calendar year. Such entities must file an annual corporate income tax return and make a balancing payment of corporate income tax by 1 April of the year following the reporting year.

These entities must make advance payments of corporate income tax. Each payment is equal to 25% of the corporate income tax liability for the preceding year. The due dates for the payments are 15 May, 15 July, 15 September and 15 December. Advance payments of tax are applied against the corporate income tax liability for the current tax year.

If the total advance payments exceed the tax due for the tax year, the excess is applied against any outstanding liabilities for other taxes. If no outstanding tax liabilities exist, taxpayers may apply overpayments against future tax liabilities or claim a refund.

Interest is charged on late tax payments at a rate of 0.05% of the tax due for each day of delay. If the tax return is not filed by the due date, a penalty is imposed. This penalty equals 5% of the amount of tax payable stated in the tax return for each complete or incomplete month of delay. However, the total amount of the penalty may not be less than GEL50 or more than 30% of the amount of tax liability. A penalty for an understatement of tax liability or overstatement of a tax credit that results from a change of the taxable point by the GTA is imposed at a rate of 10% of the relevant amount. The percentage is 50% in all other cases. No penalty is imposed if a taxpayer voluntarily files an adjusted tax return before an order on the tax offense or on the conducting of a tax inspection is issued.

Dividends. A dividend withholding tax is imposed on dividends paid by Georgian enterprises to individuals, not-for-profit companies and foreign legal entities. However, dividends paid to Georgian legal entities are not subject to withholding tax. The current dividend withholding tax rate is 5%.

The following types of dividends are not subject to withholding tax:

- Dividends paid by International Financial Companies
- Dividends paid by Free Industrial Zone Companies
- Dividends paid by Agricultural Cooperatives to their members until 1 January 2023

Interest. An interest withholding tax is imposed on interest payments made by permanent establishments of nonresidents or residents or on their behalf to individuals, organizations or nonresidents without a permanent establishment in Georgia.

The current interest withholding tax rate is 5%.

The following types of interest payments are not subject to withholding tax:

- Interest paid by financial institutions licensed according to the Georgian law
- Interest paid by Free Industrial Zone Companies
- Interest paid on bonds issued by Georgian entities and listed on recognized foreign stock exchanges

Foreign tax relief. Foreign income tax paid on income generated from foreign sources may be credited against Georgian tax imposed on the same income, limited to the amount of such Georgian tax (that is, up to the amount of corporate income tax that would have been payable on such income in Georgia). To credit foreign tax paid abroad, payment evidence should be provided to the GTA.

C. Determination of taxable income

General. Until 1 January 2023, the tax base of commercial banks, credit unions, insurance companies, microfinance organizations and pawnshops equals the difference between the gross taxable income and the amount of deductions stipulated under the TCG. Consequently, the rules provided below in this section apply only to these entities. These entities will be taxed in accordance with the new system (that is, on distribution of profit), effective from 1 January 2023.

Taxable income of entities mentioned above is computed on the basis of International Financial Reporting Standards, modified by certain tax adjustments. It includes the following:

- Trading income
- Capital gains
- Income from financial activities
- Assets received free of charge
- Works and services
- Other items of income

Income received in foreign currency is converted into Georgian lari (GEL) at the daily exchange rate determined by the NBG for the date of receipt of the income.

Commercial banks, credit unions, insurance companies, microfinance organizations and pawnshops may deduct from gross income all documented expenses contributing to the generation of such income. However, certain expenses are nondeductible or partially deductible for tax purposes.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on goods and services supplied in Georgia and on imported goods; reverse-charge VAT is imposed on works and services carried out in Georgia by nonresident entities	18
Property tax; on the average annual net book value of fixed assets	1
Property tax for leasing companies on leased assets	0.6

Georgia also imposes import and excise taxes.

E. Miscellaneous matters

Foreign-exchange controls. The Georgian currency is the lari (GEL). The lari is a non-convertible currency outside Georgia. Enterprises may buy or sell foreign currencies through authorized banks or foreign-exchange offices in Georgia.

Georgia does not impose restrictive currency-control regulations. Enterprises may open bank accounts abroad without any restriction if they declare such accounts (other than deposit accounts) with the GTA within five working days after opening such accounts. In general, all transactions performed in Georgia must be conducted in lari. Transactions with nonresident entities can be conducted in other currencies.

Transfer pricing. Under the transfer-pricing (TP) rules set by the TCG, the arm's-length principle applies to transactions carried out by taxpayers with related parties. The TP rules generally apply to cross-border transactions between related parties. These rules may also apply to transactions between a Georgian resident entity and an unrelated foreign entity that is a resident of a low-tax jurisdiction and transactions between a Georgian company and its permanent establishment.

The generally accepted transfer-pricing methods include the following:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Net profit margin method
- Profit split method

The Minister of Finance of Georgia is authorized to provide detailed descriptions of TP methods, their application rules and other procedural rules.

In 2013, the Minister of Finance of Georgia enforced the Instruction "On Pricing International Controlled Transactions," which is in accordance with the TCG provisions. The Instruction covers the following items:

- Scope of transactions subject to Georgian transfer-pricing rules
- Acceptable transfer-pricing methods
- Comparability criteria
- Information sources
- Arm's-length range
- Procedure for advance pricing agreements
- Transfer-pricing documentation requirements
- Other procedural issues

It also outlines required actions for companies doing business in Georgia.

Thin capitalization. The thin-capitalization rules were abolished, effective from 1 January 2017.

F. Treaty withholding tax rates

Georgia has entered into tax treaties with 55 countries. The table below lists the withholding tax rates under these treaties. In

general, if the withholding tax rate provided in a treaty exceeds the rate provided by the TCG, the latter rate applies.

	Dividends	Interest	Royalties
	%	%	%
Armenia	5/10 (a)	10	5
Austria	0/5/10 (b)	0	0
Azerbaijan	10	10	10
Bahrain	0	0	0

	Dividends	Interest	Royalties
	%	%	%
United Arab Emirates	0	0	0
United Kingdom	0/5/10 (s)	0	0
Uzbekistan	5/15 (t)	10	10
Non-treaty jurisdictions	5	5	5

- (a) The 5% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least a 25% share in the capital of the payer of the dividends. The 10% rate applies in all other cases.
- (b) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (c) The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the payer of the dividends. The 15% rate applies in all other cases.
- (d) The 0% rate applies if the recipient is the beneficial owner of interest on a commercial debt-claim, including a debt-claim represented by commercial paper, resulting from deferred payments for goods, merchandise or services supplied by an enterprise or if the recipient is the beneficial owner of interest on a loan of any nature that is not represented by a bearer instrument and that is granted by a banking enterprise. The 10% rate applies in all other cases.
- (e) The 5% rate applies if the beneficial owner of the royalties is a company. The 10% rate applies in all other cases.
- (f) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies in all other cases.
- (g) The 0% rate applies if the recipient is the beneficial owner of interest on credit sales of industrial, commercial or scientific equipment. The 8% rate applies in all other cases.
- (h) The 0% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, except for computer software and including cinematographic films, and films or tapes for television or radio broadcasting. The 5% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment. The 10% rate applies if the recipient is the beneficial owner of royalties paid for the use of, or the right to use, patents, trademarks, designs or models, planes, secret formulas or processes, computer software or information concerning industrial, commercial or scientific experience.
- (i) The 0% rate applies if either of the following circumstances exists:
 - The actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Danish krone or Georgian lari).
 - The beneficial owner of the dividends is the other contracting state or the central bank of that other state, any national agency or any other agency (including a financial institution) owned or controlled by the government of the other contracting state.

The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Danish krone or Georgian lari). The 10% rate applies in all other cases.
- (j) The 0% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual recipient is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (k) The 0% rate applies if the actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR3 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual

recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.

- (l) The 0% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR3 million (or the equivalent amount in any currency). The 5% rate applies if the actual recipient is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in any currency). The 10% rate applies in all other cases.
- (m) The 5% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends and that has invested in the payer at least EUR100,000. The 15% rate applies in all other cases.
- (n) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends and that has invested in the payer at least USD75,000. The 10% rate applies in all other cases.
- (o) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends and that has invested in the payer at least EUR75,000. The 15% rate applies in all other cases.
- (p) The 0% rate applies if the actual recipient of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than EUR2 million (or the equivalent amount in Georgian lari). The 5% rate applies if the actual recipient is a company that holds directly or indirectly at least 10% of the capital of the payer of the dividends and that has invested in the payer more than EUR100,000 (or the equivalent amount in Georgian lari). The 10% rate applies in all other cases.
- (q) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer of the dividends and that has invested in the payer more than USD2 million (or the equivalent amount in euros or Georgian lari). The 5% rate applies if the recipient is a company that holds at least 10% of the capital of the payer of the dividends. The 15% rate applies in all other cases.
- (r) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (s) The 0% rate applies if the beneficial owner of the dividends is a company that is a resident of the other contracting state and controls, directly or indirectly, at least 50% of the voting power in the company paying the dividends and that has invested at least GBP2 million or the equivalent amount in the currency of Georgia in the share capital of the company paying the dividends. The 5% rate applies if the beneficial owner of the dividends is a resident of the other contracting state and is a company that controls, directly or indirectly, at least 10% of the voting power in the company paying the dividends. The 10% rate applies in all other cases.
- (t) The 5% rate applies if the actual recipient of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 15% rate applies in all other cases.
- (u) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership that is not liable to tax) that has held directly at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months before the decision to distribute the dividends. The 5% rate applies in all other cases.
- (v) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (w) The 0% rate applies if the beneficial owner of the dividends is any of the following:
- A company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends
 - The other contracting state or the central bank of the other contracting state
 - A pension fund or other similar institution providing pension schemes in which individuals may participate to secure retirement benefits if such pension fund or other similar institution is established and recognized for tax purposes in accordance with the laws of the other state.
- The 5% rate applies in all other cases.

-
- (x) The 0% rate applies if the beneficial owner of the dividends is a company that has invested in the payer more than USD3 million (or the equivalent amount in Georgian lari). The 5% rate applies in all other cases.
 - (y) The 0% rate applies to pension funds and recipients of interest on corporate bonds traded on a stock exchange in the other state and issued by a company that is a resident of that state. The 5% rate applies in all other cases.
 - (z) The 0% rate applies to interest arising in a contracting state that is derived and beneficially owned by the government of the other contracting state, including its political subdivisions and local authorities, the central bank or any financial institution wholly owned by that government, and to interest derived from loans guaranteed by that government. The 10% rate applies in all other cases.
 - (aa) The 0% rate applies if the beneficial owner of the dividends is a company (or partnership) that holds at least 10% of the capital or the voting power of the company paying the dividends. The 10% rate applies in all other cases.
 - (bb) The 0% rate applies to royalties paid as consideration for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting. The 10% rate applies to royalties paid as consideration for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
 - (cc) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Trade Tax Rate (Average Rate) (%)	14
Capital Gains Tax Rate (%)	15 (a)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	25 (a)(b)(c)(d)
Interest	0 (e)(f)
Royalties from Patents, Know-how, etc.	15 (a)(b)(f)(g)(h)
Remuneration to Members of a Supervisory Board	30 (h)
Payments for Construction Work	15 (a)(b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1 (i)
Carryforward	Unlimited (j)

- (a) A 5.5% solidarity surcharge is imposed (see Section B).
- (b) On application, these rates may be reduced by tax treaties.
- (c) This withholding tax applies to dividends paid to residents and nonresidents. For dividends paid to nonresident corporate entities, this rate may be reduced to 15% if the nonresident dividend recipient qualifies as an eligible recipient under the German anti-treaty shopping rules.
- (d) These rates may be reduced under the European Union (EU) Parent-Subsidiary Directive. Under the EU Parent-Subsidiary Directive, on application, a withholding tax rate of 0% applies to dividends distributed by a German subsidiary to an EU parent company if the recipient has owned 10% or more of the share capital of the subsidiary for a continuous period of 12 months at the time the dividend distribution takes place and if the German anti-treaty shopping rules do not apply.
- (e) A 25% interest withholding tax is imposed on the following types of interest:
- Interest paid by financial institutions.
 - Interest from over-the-counter business. Over-the-counter business refers to bank transactions carried out over the bank counter, without the securities being on deposit at the bank.
 - Interest from certain types of profit-participating and convertible debt instruments.
- Interest secured by domestic real estate is subject to tax for nonresidents, but not subject to withholding tax (self-declaration). The interest withholding tax is not imposed on intercompany loans. Nonresidents may apply for a refund of the withholding tax if a treaty exemption applies. If a nonresident is required to file an income tax return in Germany, the withholding tax is credited against the assessed corporate income tax or refunded.
- (f) These rates may be reduced by tax treaties or under the EU Interest-Royalty Directive. Under the EU Interest-Royalty Directive, on application, German withholding tax is not imposed on interest and royalties paid by a German resident company to an associated company located in another EU member state. To qualify as associated companies, a minimum 25% shareholding or a common parent is required, among other requirements.
- (g) The withholding tax rate on royalties from patents, know-how and similar items is 15% for payments to nonresident corporations if such items are registered in Germany or used in a German business.
- (h) This withholding tax applies to payments to nonresidents only.
- (i) The loss carryback, which is optional, is available for corporate income tax purposes, but not for trade income tax purposes. The maximum carryback is EUR1 million.
- (j) The carryforward applies for both corporate income tax and trade tax purposes. The maximum loss carryforward that may be used for corporate and trade tax purposes is restricted to EUR1 million for each tax year plus 60% of annual taxable income exceeding EUR1 million (so-called minimum taxation). The carryforward is subject to the change-of-ownership rule (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. Corporations, such as stock corporations (Aktiengesellschaft, or AG) and limited liability companies (Gesellschaft mit beschränkter Haftung, or GmbH), that have their corporate seat or place of management in Germany (resident corporations) are subject to corporate income tax (Körperschaftsteuer) on worldwide income, unless otherwise provided in tax treaties.

A nonresident corporation, whose corporate seat and place of management are located outside Germany, is subject to corporate income tax only on income derived from German sources. Income from German sources includes, among other items, business income from operations in the country through a branch, office or other permanent establishment, including a permanent representative, and income derived from the leasing and disposal of real estate located in Germany.

Rates of corporate income tax. Corporate income tax is imposed at a rate of 15% on taxable income, regardless of whether the income is distributed or retained.

A 5.5% solidarity surcharge is imposed on corporate income tax, resulting in an effective tax rate of 15.825%. Prepayments of corporate income tax and withholding tax payments are also subject to this surcharge.

Trade tax. Municipalities impose a trade tax on income. However, for purposes of this tax, taxable income is subject to certain adjustments. The major adjustments include a 25% add-back of interest expenses with respect to debt, a 6.25% add-back of license payments, a 5% add-back of lease payments for movable assets and a 12.5% add-back of lease payments for immovable assets. The effective average trade tax rate amounts to approximately 14%. Taking into account the various municipality multipliers, the combined average tax rate for corporations (including corporate income tax, solidarity surcharge and trade tax) ranges from approximately 23% to 33%.

If a company operates in several municipalities, the tax base is allocated according to the payroll paid at each site. Certain enterprises, such as specified banks and real estate companies, receive privileged treatment under the trade tax law.

Withholding tax on construction work. Taxpayers and entities that are corporate bodies under public law (for example, cities and municipalities) must withhold a tax of 15% from payments made for construction work provided in Germany. The tax must be withheld even if the work provider does not have a tax presence in the form of a permanent establishment or permanent representative in Germany unless the work provider obtains a "certificate of non-taxation" from the competent tax office. Construction work providers may obtain a refund of the withholding tax if they can prove that no German tax liability against which the withholding tax could be applied exists.

Capital gains and losses. Capital gains of corporations, except those derived from sales of shares, are treated as ordinary income. However, rollover relief is granted if gains derived from disposals

of real estate are reinvested in real estate within the following four years and if certain other conditions are met.

Capital gains derived by corporations from sales of shares in corporations are generally exempt from corporate income tax and trade tax. Five percent of the capital gain is deemed to be a non-deductible expense. As a result, the exemption is effectively limited to 95% of the capital gain. Based on case law, the 5% deemed expense add-back should not apply to nonresident corporate sellers, even if the nonresident seller cannot claim treaty protection. The 95% tax exemption for capital gains received by a corporate shareholder is not granted to banks, financial services institutions and financial enterprises that purchase shares with the intention of realizing short-term profits for their own account.

However, to the extent that write-downs of the shares have previously been deducted for tax purposes, capital gains from sales of shares are not exempt.

Capital gains derived from the disposal of tainted shares are, in principle, 95% exempt from tax. Tainted shares may result from corporate reorganizations (for example, contributions of qualifying businesses or partnership interests into corporations in return for shares or share swaps) that are carried out at tax book values or below fair market values. The subsequent disposal of the tainted shares results in a (full or partial) retroactive taxation of the original reorganization that gave rise to the share taint. In general, after a seven-year holding period, the shares lose their taint.

In general, capital losses are deductible. However, capital losses are not deductible if a gain resulting from the underlying transaction would have been exempt from tax. Consequently, capital losses from sales of shares or write-downs on shares are generally not deductible. In addition, capital losses and write-downs on loans to related parties may not be deductible under certain circumstances.

Administration. The tax year is the calendar year. If a company adopts an accounting period that deviates from the calendar year, tax is assessed for the taxable income in the accounting period ending within the calendar year. The adoption of a tax year other than the calendar year requires the consent of the tax office.

Annual tax returns must be filed by 31 May of the year following the tax year. However, an extension to 31 December of the year following the tax year is usually granted if a licensed tax consultant prepares the return.

Payments made with respect to the estimated corporate income tax liability, usually determined at one-quarter of the liability for the previous year, are due on 10 March, 10 June, 10 September and 10 December. Prepayments of trade tax are due on 15 February, 15 May, 15 August and 15 November. Final payments are due one month after the tax assessment notice issued by the tax authorities is received by the taxpayer.

Late tax payments and tax refunds are generally subject to interest of 0.5% per month. Interest begins to accrue 15 months after the end of the calendar year for which the tax is assessed. The interest is not deductible for corporate income and trade tax purposes if the tax itself is not deductible. Late payment penalties are

also charged at 1% a month if the unpaid balance is not settled within one month from the date of the assessment notice issued by the tax office. A penalty of up to 10% of the tax liability, but not more than EUR25,000, can be assessed if the tax return is not filed by the due date, including extensions granted.

Dividends. Dividends received by German corporations and branches of nonresident corporations from their German and foreign corporate subsidiaries are exempt from tax. However, a minimum shareholding requirement of 10% applies for this participation exemption for corporate income tax purposes. In addition to this domestic rule, an applicable tax treaty may provide for an exemption for foreign dividends. The tax exemption for dividends is granted only if the dividend payment is not tax-deductible as a business expense at the level of the distributing entity (linking rule).

Five percent of the tax-exempt dividend income is treated as a nondeductible expense, while the expenses actually incurred are deductible. Consequently, only 95% of the dividends received by a corporation is effectively exempt from tax. The 95% tax exemption for dividends received by a corporate shareholder is not granted for portfolio dividends (less than 10% shareholding) or to banks, financial services institutions and financial enterprises that purchase shares with the intention of realizing short-term profits for their own account.

The participation exemption applies for trade tax purposes if the dividends are received from corporations in which the parent holds at least 15% as of 1 January of the calendar year in which the dividend distribution takes place. For dividends from EU corporations, the required minimum shareholding is 10%. For dividends from third-country corporations, the shares (minimum shareholding of 15%) must be held continuously since 1 January of the calendar year in which the dividend distribution takes place and the subsidiary's gross income must be realized exclusively or almost exclusively from active business (however, this requirement has been held to be against EU law by the European Court of Justice). A tax exemption on the basis of a double tax treaty may apply for trade tax purposes.

Foreign tax relief. Under German domestic tax law, income from foreign sources, except for foreign dividends received by a qualifying corporate shareholder (see *Dividends*), is usually taxable, with a credit for the foreign income taxes paid, up to the amount of German tax payable on the foreign-source income, subject to per-country limitations. Excess foreign tax credit cannot be carried back or carried forward. Instead of a foreign tax credit, a deduction may be claimed for foreign income tax. This may be beneficial in loss years and in certain other instances. In general, German tax treaties provide for an exemption from German taxation of income from foreign real estate and foreign permanent establishments (activity requirements generally apply).

C. Determination of trading income

General. Taxable income of corporations is based on the annual financial statements prepared under German generally accepted accounting principles (GAAP), subject to numerous adjustments for tax purposes. After the annual financial statements have been

filed with the tax authorities, they may be changed only to the extent necessary to comply with GAAP and the tax laws.

Acquired goodwill must be capitalized for tax purposes and may be amortized over 15 years. Intangibles acquired individually must also be capitalized for tax purposes and may be amortized over their useful lives (normally between 5 and 10 years). A company's own research and development and start-up and formation expenses may not be capitalized for tax purposes. They must be currently expensed.

Inventories. Inventory is basically valued at acquisition cost or production cost, unless a lower value (that is, the lower of reproduction or repurchase cost and market value) is indicated. Under certain conditions, the last-in, first-out (LIFO) method can be used to value inventory assets if the assets are of a similar type.

Provisions. In general, provisions established under German GAAP are accepted for tax purposes. However, in past years, the scope of tax-deductible provisions has been severely limited by certain rules, including, among others, the following:

- Liabilities or accruals of obligations whose fulfillment is contingent on future revenue or profit may be recorded only when the condition occurs.
- Provisions for foreseeable losses from open contracts may not be recorded.
- Future benefits arising in connection with the fulfillment of an obligation must be offset against costs resulting from the obligation.
- Non-monetary obligations may be accrued using the direct cost and the necessary indirect cost.
- Provisions for obligations resulting from the operation of a business must be built up in equal increments over the period of operation.
- Provisions for pension obligations must be calculated on an actuarial basis using an interest rate of 6% and built up over the period of employment.

If built-in losses contained in the above provisions or liabilities materialize on their transfer at fair market value, the resulting losses may generally only be deducted for tax purposes over a period of 15 years.

Non-interest-bearing debt must be discounted at an annual rate of 5.5% if the remaining term exceeds 12 months.

Depreciation. For movable fixed assets purchased or produced after 31 December 2007, tax depreciation must be calculated using the straight-line method (as an exception, the declining-balance method could have been applied for movable assets purchased or manufactured between 1 January 2009 and 31 December 2010). Movable assets with acquisition costs that do not exceed EUR800 (previously EUR410) can be fully depreciated in the year of acquisition, regardless of their useful lives. Useful lives of movable assets are published by the Federal Ministry of Finance, based primarily on tax audit experience; deviation from published useful life is possible, but requires justification by the taxpayer. Tax depreciation rates for buildings are provided by law. The Federal Ministry of Finance has published tax depreciation

rates for movable fixed assets generally usable in trade and industry. Schedules for assets specific to certain industries are also available. The following are some of the straight-line rates under the general list.

Asset	Rate (%)
Office equipment	6 to 20
Motor vehicles	10 to 16.6
Plant and machinery	6 to 12.5
Airplanes	5
Personal computers or notebooks and related equipment	33.3
Nonresidential buildings (offices, retail and factories)	
Constructed before 1 January 1925	2.5
Constructed after 31 December 1924 and application for the construction permit filed before 1 April 1985	2
Application for the construction permit filed after 31 March 1985	3*

* The rate is 4% if the application for the construction permit was filed or the purchase agreement was dated before 1 January 2001.

Mark-to-market rule. Under a mark-to-market rule, a tax deduction for the write-down of an asset because of a permanent impairment in value is allowed only if the value is permanently lower (for fixed assets) or is lower than the acquisition costs (not just temporarily). This rule is particularly relevant for assets that are not subject to ordinary depreciation, such as land or shares (however, write-downs of shares are not tax effective; see Section B). For assets that have been written down to their going-concern value, the write down must be reversed as soon as and to the extent that the asset has increased in value.

Disallowed items. After income for tax purposes has been determined, certain adjustments need to be made to calculate taxable income. Major adjustments include the following nondeductible expenses:

- Income taxes (corporate income tax, solidarity surcharge and trade tax) and any interest expense paid with respect to these taxes
- Interest expenses (see *General interest expense limitation*)
- Penalties
- Fifty percent of supervisory board fees
- Thirty percent of business meal expenses
- Gifts to non-employees exceeding EUR35 per person per year and input value-added tax (VAT) regarding such expenses
- Expenses incurred in direct connection with tax-exempt income items (see the discussion of dividends in Section B)

In addition, as a result of the exemption for capital gains derived from sales of shares (see Section B), losses from sales of shares, write-downs of shares or, under certain circumstances, write-downs on loans to related parties are not deductible for tax purposes and must be added back to the tax base.

General interest expense limitation. The interest expense limitation rule applies to all loans (that is, group and third-party loans, regardless of recourse) and to businesses resident in Germany,

companies residing abroad but maintaining a permanent establishment in Germany, and partnerships with a German branch.

Under the interest expense limitation rule, the deduction of interest expense exceeding interest income (net interest expense) is limited to 30% of taxable earnings before (net) interest, tax, depreciation and amortization (EBITDA). Tax-exempt income and partnership income should not be considered in the calculation of the taxable EBITDA.

The limitation rule does not apply if one of the following exemption rules applies:

- Exemption threshold. The annual net interest expense is less than EUR3 million.
- Group clause. The company is not a member of a consolidated group (a group of companies that can be consolidated under International Financial Reporting Standards [IFRS]). The group clause does not apply if both of the following circumstances exist:
 - A shareholder who, directly or indirectly, holds more than 25% in the corporation or a related party of such shareholder grants a loan to the company.
 - The interest exceeds 10% of the company's net interest expense.
- Escape clause. The equity ratio of the German subgroup is at least as high as the equity ratio of the worldwide group (within a 2% margin). A "group" is defined as a group of entities that could be consolidated under IFRS, regardless of whether a consolidation has been actually carried out. The equity ratio is calculated on the basis of the IFRS/US GAAP/EU local country GAAP consolidated balance sheet of the ultimate parent. The same accounting standard is applied to a German group but subject to several complex technical adjustments, such as a deduction for unconsolidated subsidiaries. The access to the escape clause is limited in the case of certain loans from non-consolidated shareholders (related party debt exception).

Unused EBITDA can be carried forward over a five-year period. However, the carryforward does not apply if one of the above-mentioned exemptions from the interest expense limitation rule applies or if a positive net interest balance exists. The EBITDA carryforward is forfeited in the course of reorganizations but not under the loss-trafficking rules (see *Tax losses*).

Nondeductible interest expense can be carried forward indefinitely but is subject to the loss-trafficking rules (see *Tax losses*). A deduction is possible in the following years in accordance with the interest expense limitation rules. The nondeductibility is final in the case of a transfer, merger, termination or liquidation of the business or in the case of a permanent excess of limitation amounts (that is, net interest expense is permanently higher than 30% of the taxable EBITDA and the exemption clauses are not fulfilled; as a result, the deduction of all of the interest expense is permanently not achievable).

The interest expense limitation rules may be incompatible with German constitutional law according to the German Federal Tax Court, which has recently referred the case to the German Constitutional Court.

Constructive distributions of income. Adjustments to taxable income as a result of a violation of arm's-length principles are deemed to be constructive distributions of income (see the discussion of transfer pricing in Section E).

Tax losses. Tax losses may be carried forward without time limitation. Under the restrictions of the so-called minimum taxation, only 60% of annual taxable profits in excess of EUR1 million can be offset by loss carryforwards. As a result, 40% of the portion of profit exceeding EUR1 million is subject to tax.

This tax loss carryforward rule applies for both corporate income tax purposes and trade tax purposes. For corporate income tax (not trade tax) purposes, an optional loss carryback is permitted for one year up to the maximum amount of EUR1 million.

Under the German loss-trafficking rule, tax loss carryforwards are forfeited if, within a five-year period, more than 50% of the shares (votes or value) of a loss-making entity is directly or indirectly transferred to a single new shareholder or a group of shareholders. To prevent abuse of the rule, the rule includes a measure under which investors with common interests and acting together are deemed to be one acquirer for the purposes of the rule.

The following exceptions apply to the loss-trafficking rule:

- **Group restructuring exception.** A transfer of shares is not considered to be harmful if it occurs within a "100% controlled group." A group is considered to be a "100% controlled group" if, after a direct or indirect transfer, the same person owns directly or indirectly 100% of the transferor and transferee, or if the acquirer is holding all of the shares in the seller of the shares or the seller is holding all of the shares in the acquirer of the shares.
- **Built-in gain exception.** For harmful share transfers, a loss carryforward is not forfeited up to the amount of the loss company's built-in gains to the extent that these built-in gains are taxable in Germany. Consequently, built-in gains allocable to subsidiaries are not taken into account; see the discussion of capital gains and losses in Section B.

The carryforward of losses is also allowed in certain limited shareholder change situations if strict business continuation requirements are met.

Loss carryforwards are also forfeited in the course of a merger, change of legal form or liquidation of the loss-making company.

The Federal Constitutional Court has not yet decided if the loss-trafficking tax rule would be unconstitutional under German tax law in case of a change of shareholding of more than 50%; this question is pending.

Groups of companies. German tax law provides a tax consolidation for a German group of companies (*Organschaft*), which allows losses of group companies to be offset against profits of other group companies. Only German resident companies in which the parent company has held directly or indirectly the majority of the voting rights since the beginning of the fiscal year of the subsidiary may be included (this requirement is known as financial integration). A tax consolidation may cover corporate income tax, trade tax and VAT. To make the *Organschaft* effective for

corporate income tax and trade tax purposes, the parent company and the German subsidiaries must enter into a profit-and-loss absorption agreement (Gewinnabfuhrungsvertrag) for a minimum period of five years. Partnerships do not qualify as subsidiaries in a corporate income tax or trade tax Organschaft, but they may under certain circumstances be a VAT group subsidiary.

An Organschaft subsidiary must have its place of management in Germany and its legal seat in Germany or an EU/European Economic Area member state.

A domestic or foreign corporation, individual or partnership may become the head of an Organschaft if, in addition to the above requirements, the following requirements are met:

- The company has an active trade or business (generally assumed for corporations).
- The investments in the subsidiaries are assets of a German branch.
- The branch profits (including the income of the subsidiaries) are subject to German taxation for both domestic direct tax and tax treaty purposes.

The Organschaft for VAT requires the following:

- Financial integration (see above).
- Economic integration of the lower-tier entities. Economic integration exists if the business activities of the members of the group complement each other.
- Integration in organizational matters. Organizational integration exists if the group parent is able to impose its will on the group members and does so in the day-to-day business.

In contrast to the other Organschaft forms, Organschaft for VAT can begin and end during the course of the fiscal year.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Real property tax, on assessed standard value of real property; rate varies by municipality	0.65 to 2.83
Real estate transfer tax (RETT), on sales and transfers of real property, including buildings, and on certain transactions that are deemed to be equivalent to transfers of real property, such as the assignment of at least 95% of the shares of a German or foreign company that holds the title to domestic real property (however, a group exception may apply); levied on the purchase price of the real property or, in certain situations (such as when at least 95% of the shares of a real estate-owning company are transferred), on the assessed standard value of the real property	
Rate for real estate located in Bavaria and Saxony	3.5
Rate for real estate located in Hamburg	4.5
Rate for real estate located in Baden-Württemberg, Bremen, Lower Saxony, Mecklenburg-West Pomerania, Rhineland-Palatinate and Saxony-Anhalt	5
Rate for real estate located in Berlin and Hesse	6

Nature of tax	Rate (%)
Rate for real estate located in Brandenburg, North Rhine-Westphalia, Saarland, Schleswig-Holstein and Thuringia	6.5
Value-added tax (VAT or Umsatzsteuer); on application, foreign enterprises may receive refunds of German VAT paid if they are neither established nor registered for VAT purposes in Germany; this application must be filed by non-EU enterprises by 30 June and by EU enterprises by 30 September, in the year following the year in which the invoice was received by the claimant)	
Standard rate	19
Reduced rate	7

E. Miscellaneous matters

Foreign losses. In principle, losses incurred by foreign permanent establishments are not deductible if a German tax treaty provides that a permanent establishment's income is taxable only in the country where it is located. However, these losses may be taken into account if they are incurred in non-treaty countries or if a tax treaty provides for the credit method, subject to the condition that the foreign branch is engaged in a specified active trade.

Foreign-exchange controls. No controls are imposed on the transfer of money in and out of Germany. However, specific reporting requirements for certain transactions must be met.

Debt-to-equity rules. The interest expense limitation rule (see Section C) replaced the former thin-capitalization rules. Consequently, no statutory debt-to-equity ratio currently applies.

Anti-avoidance legislation. Several tax laws contain anti-avoidance legislation. The Corporate Income Tax Act deals with constructive dividends by corporations, both in Germany and abroad. The Foreign Transactions Tax Act deals with all kinds of related or affiliated taxpayers, such as individuals, partnerships and corporations, and is restricted to cross-border transactions. It contains extensive provisions on controlled foreign company (CFC) and passive foreign investment company income. The General Tax Code contains a general anti-abuse rule stating that a tax liability cannot be effectively avoided by an abuse of legal forms and methods if obtaining a tax advantage is the only reason for such an arrangement.

The Income Tax Act provides anti-abuse rules that are aimed at preventing the unjustified reduction of German withholding taxes under a tax treaty, under the EU Parent-Subsidiary Directive or under the EU Interest-Royalty Directive (treaty or directive shopping).

Germany's newer tax treaties include "switch-over" clauses as well as "subject-to-tax" clauses. Domestic treaty-overriding rules, which are aimed at preventing double non-taxation or double deductions, also exist.

Transfer pricing. German tax law contains a set of rules that allow the adjustment of transfer prices. These rules include general measures on constructive dividend payments and constructive

contributions and a specific adjustment provision in the CFC legislation. All of the measures mentioned in the preceding sentence are based on the arm's-length principle. Germany has implemented the Authorized Organisation for Economic Co-operation and Development (OECD) Approach (AOA). As a result, permanent establishments and partnerships are treated as separate entities, similar to corporations.

The Foreign Transactions Tax Act now specifically provides that the preferential methods for determining the transfer price are the traditional transaction methods (comparable uncontrolled price method, resale-minus method and cost-plus method) if comparable transactions can be determined. In addition, the code contains express language with respect to the determination of the arm's-length character of a transfer price if no comparables can be found. Effective from 1 January 2008, a special set of rules directed at securing the German tax revenue have been incorporated into the code. These rules deal with the determination of transfer prices in the event of a transfer of business functions abroad.

Specific documentation rules apply for transfer-pricing purposes. On request of a tax auditor, the taxpayer is required to submit the transfer-pricing documentation within 60 days (in the case of extraordinary business transactions, within 30 days). Non-compliance with these rules may result in a penalty (if imposed) of at least EUR100 per day of delay up to a maximum of EUR1 million. If no documentation is provided or if the documentation is unusable or insufficient, a surcharge of 5% to 10% of the income adjustment is applied with a minimum surcharge of EUR5,000.

A Country-by-Country Reporting (CbCR) requirement applies to German taxpayers for fiscal years beginning after 31 December 2015, if they belong to a group with consolidated revenues of at least EUR750 million in the preceding fiscal year. The providing of a master file in addition to a local file on request will be required for fiscal years beginning after 31 December 2016 if the German taxpayer's revenue was at least EUR100 million in the preceding fiscal year.

Real estate investment trusts. Effective from 1 January 2007, Germany introduced the real estate investment trust (REIT), which is a tax-exempt entity. In general, a REIT is a listed German stock corporation (AG) that satisfies certain conditions, including, but not limited to, the following:

- It has a free float (volume of shares traded on the stock exchange) at the time of listing of at least 25%.
- Its real estate assets account for at least 75% of its gross assets.
- Rental income from real estate accounts for at least 75% of its total income.
- Ninety percent of its income is distributed to its shareholders.

German investment tax law. The German investment tax law provides for the following three tax regimes:

- Regular "investment funds," which are subject to taxation at the fund level
- "Special-investment funds," which have to meet further conditions and are taxed semi-transparently with certain options and exemptions

- All other investment vehicles (especially partnerships), which are subject to the general rules of (corporate or individual) income taxation depending on the legal form and status

Both German and foreign investment funds, as well as special-investment funds, are no longer fully exempt from tax at the fund level. The transparency principle is being replaced by taxation of the following types of domestic income at the fund level:

- Dividend payments from German-based corporations are subject to a flat tax regime of 15% on the gross dividends received by the fund. The tax exemption under Section 8b of the German Corporate Income Tax Act does not apply.
- Net income from letting and the sale of German real estate is subject to tax at a rate of 15% plus the solidarity surcharge (15.825% in total).
- Other German-source income, which would be subject to German taxation if received by a foreign investor (for example, income from renewable energy investments or commercial partnership investments), is subject to tax at a rate of 15% plus the solidarity surcharge (15.825% in total).

All other income is not subject to German corporate income tax (for example, interest income, profits deriving from forward contracts or foreign dividends, as well as foreign real estate proceeds). In general, investment funds are subject to German trade tax. However, an exemption from German trade tax applies if the business purpose is limited to the investment and management of funds for the joint account of the unitholders and no active entrepreneurial management of the assets is performed. Special-investment funds are generally exempt from trade tax.

Special-investment funds can opt for transparent taxation for certain German domestic income. If the option is exercised, the income is subject to tax at the investor level. Certain rules and limitations apply.

In general, a German investor is subject to tax on its investment fund income (that is, distributions, profits from the sale of units in the investment fund, as well as to the so-called flat tax on a deemed profit, if no distributions are made). The applicable tax rate depends on the individual situation of the investor (for example, corporate vehicle or individual vehicle). Special tax regimes (partial tax exemptions) might apply depending on the respective asset allocation of the fund as well as on the individual situation of the investor (tax exemption of 15% to 80%). Half of the respective partial exemption for corporate income tax and individual income tax purposes is granted for trade tax purposes. In general, foreign investors are not subject to tax in Germany on any of their investment fund income.

Income derived from special-investment funds (distributed income, deemed distributed income and profits from the sale or redemption of shares) is subject to regular corporate income tax, individual income tax (if fund units are allocated to business assets) and trade tax at the investor level, depending on the individual tax situation. In general, the participation exemption for German individual income tax and German corporate income tax purposes applies if the respective conditions are met.

Mutual assistance. Germany exchanges tax-relevant information with various countries based on tax treaties, other bilateral agreements (for example, the Intergovernmental Agreement between Germany and the United States with respect to the US Foreign Account Tax Compliance Act [FATCA]), EU Directives (such as the EU Mutual Assistance Directive) and multilateral agreements (such as the OECD's Multilateral Competent Authority Agreement for the Common Reporting Standard [CRS]). Recently enacted legislation focuses in particular on the automatic exchange of information.

Automatic exchange of financial account information. Under the FATCA Intergovernmental Agreement of 31 May 2013 and the FATCA Implementation Decree of 23 July 2014, German financial institutions must report certain financial account information regarding US reportable accounts on an annual basis to the German Federal Central Tax Office (Bundeszentralamt für Steuern), which automatically exchanges this information with the US Internal Revenue Service. In addition, effective from 1 January 2016, Germany implemented the CRS. German financial institutions are required to identify reportable accounts, which are the accounts held by the following:

- An individual or certain entities resident in a CRS zone country
- “Passive nonfinancial entities” (as defined) with one or more controlling persons resident in a CRS zone country

These accounts must then be reported annually by 31 July for the preceding reporting period to the German Federal Central Tax Office (with first reporting in 2017 for 2016), which passes this information on to the competent tax authorities where the reportable person is tax resident.

Under both exchange-of-information regimes, the term “financial institution” is defined rather broadly and does not only include banks, financial services companies, investment funds and insurance companies, but also certain holding companies, treasury centers, captive finance companies, other investment entities, pension entities and certain other entities.

Automatic exchange of advance cross-border rulings and advance pricing agreements. The German implementation of changes to the EU Mutual Assistance Directive provides for the automatic exchange of advance cross-border rulings and advance pricing arrangements (APAs) between EU member states. The information exchange occurs within three months after the end of the calendar half-year in which the advance cross-border rulings were granted. In line with the EU directive, the information exchange obligation affects rulings and arrangements that are issued, amended or renewed as of 1 January 2017. However, under certain conditions, rulings and arrangements that have been issued or amended since 1 January 2012 are also subject to exchange.

F. Treaty withholding tax rates

The following table is for illustrative purposes only.

	Dividends (1) %	Interest (2)(3) %	Royalties (4) %
Albania	5/15	5 (c)(d)	5
Algeria	5/15	10 (c)(d)	10

	Dividends (1)	Interest (2)(3)	Royalties (4)
	%	%	%
Argentina	15	10/15 (c)(d)	15
Armenia	7/10/15 (g)	5 (c)(d)	6
Australia	0/5/15	10 (c)(d)	5
Austria	5/15 (2)	0	0
Azerbaijan	5/15	10 (c)(d)	5/10

- (1) These rates also apply to silent partnership income. Under German tax law, income from a silent partnership is regarded as a dividend if the silent partnership is characterized as a typical silent partnership. Profits from an atypical silent partnership are considered as business profits. Income from participation rights (Genussrechte) is treated as a dividend if the holder participates in profits and liquidation results. Otherwise, the income from participation rights is considered to be interest for treaty purposes.
- (2) According to the EU Parent-Subsidiary Directive, dividends distributed by a German subsidiary to a qualifying EU parent company are exempt from withholding tax if the recipient owns 10% or more of the subsidiary.
- (3) German interest withholding tax is imposed only on interest paid by financial institutions, on interest from over-the-counter transactions and on interest payments on convertible and profit-sharing bonds and participating loans. In addition, interest on loans secured by fixed property located in Germany is

subject to a limited German tax liability; tax on such interest is not imposed by withholding tax but by the issuance of an assessment notice on the filing of a tax return. If not otherwise noted, the treaty withholding tax rate also reduces the German statutory tax rate for interest on loans secured by fixed property located in Germany.

- (4) As a result of the implementation of EU Directive 2003/49/EC, withholding tax on interest and royalties paid between associated companies of different EU states is abolished if certain conditions are met.
 - (a) The treaty with China (mainland) does not apply to the Hong Kong and Macau Special Administrative Regions (SARs).
 - (b) The rate applies if the income is subject to tax in the other state.
 - (c) According to domestic law, interest on participating loans, profit-sharing bonds and income from silent partnerships is taxed at 25% if the payment is treated as tax-deductible (reduced on application to 15% if the recipient is a corporation and if the German anti-treaty shopping rules do not apply).
 - (d) Under certain treaties, interest is exempt from withholding tax if it is paid to a contracting state's government, the central bank or certain public banks or finance institutions or if it relates to a loan that is guaranteed by public credit insurance.
 - (e) The United States treaty provides for a 0% rate if the participation is at least 80% for a period of 12 months and if the conditions of the Limitation-of-Benefit test under Article 28 are fulfilled.
 - (f) Interest payments to banks or on loans granted by banks may be subject to a 10% withholding tax rate (5% in the Mexico treaty).
 - (g) A 15% rate applies to dividends that are paid out of income or gains derived from immovable property by an investment vehicle.
 - (h) This is an agreement between the German Institute in Taipei and the Taipei Representative Office in Germany.
 - (i) If Syria enters into an agreement with any other EU country that provides for a lower rate than 12%, Syria will apply this lower rate on royalties paid to residents of Germany.
 - (j) The agreement between Germany and former Yugoslavia applies.
 - (k) The agreement between Germany and former Czechoslovakia applies.

Germany has initialed and/or signed new tax treaties with Belgium, Croatia, Denmark, Ecuador, Egypt, Oman, Poland, Portugal, Singapore, South Africa, Sri Lanka, Trinidad and Tobago, and Tunisia. At the time of writing, the domestic legal procedures for the entry into force of those treaties had not yet been concluded.

Germany is negotiating or renegotiating tax treaties with Angola, Argentina, Bangladesh, Bolivia, Botswana, Bulgaria, Canada, Colombia, Costa Rica, Cuba, Cyprus, the Czech Republic, Ethiopia, Greece, the Hong Kong SAR, Iceland, India, Iran, Ireland, Jordan, Korea (South), Kosovo, Kuwait, Kyrgyzstan, Latvia, Liberia, Mauritius, Mexico, Namibia, Nigeria, Norway, Qatar, Romania, the Russian Federation, Rwanda, Senegal, Serbia, Slovenia, Sweden, Switzerland, Tajikistan, Tanzania, Ukraine, the United Kingdom and Vietnam.

Carryback	Unlimited (e)
Carryforward	3/5 (f)

- (a) Capital gains are added to business or investment income and taxed at the rate applicable to the person.
- (b) Applicable to payments to residents and nonresidents.
- (c) This is a final tax for both residents and nonresidents without a permanent establishment in Ghana.
- (d) This is a final tax for nonresidents without a permanent establishment in Ghana only.
- (e) Losses incurred on completion of long-term contracts may be carried back to prior tax years.
- (f) Enterprises that operate in government priority sectors (petroleum operations, minerals and mining operations, energy and power, manufacturing, farming, agro-processing, tourism, and information and communication technology businesses) are allowed to carry forward their losses for a period of five years. All other enterprises are allowed to carry forward their losses for a period of three years. In addition, losses incurred by venture capital financing companies on the disposal of shares invested in venture capital subsidiary companies under the Venture Capital Trust Fund Act, 2004 (Act 680) and losses incurred by qualifying venture capital financing companies on shares in any venture may be carried forward for five years after the disposal of the shares.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their business or investment income for the year, regardless of whether the source of the income still exists. A company is resident in Ghana if it is incorporated under the laws of Ghana or if its management and control are exercised in Ghana at any time during the year. Permanent establishments of nonresident companies in Ghana are also subject to tax on their worldwide income.

Rates of corporate income tax. The standard corporate income tax rate is 25%. However, various other tax rates apply to income derived from specified business activities.

Income derived from non-traditional exports is taxed at a rate of 8%. Income derived by banks from loans granted to farming enterprises is subject to tax at a rate of 20%. The rate of tax applicable to income derived by financial institutions from loans to leasing companies is 20%.

Rural or community banks are subject to tax at a rate of 1% for a period of 10 years beginning with their first year of operations.

The corporate income tax rate applicable to companies principally engaged in the hotel industry is 22%.

For petroleum extracting companies, the tax rate is 35%. The rate is consistent with the rate provided in the publicly disclosed petroleum agreements that have been signed with the government of Ghana. After a company has recovered all outlays from an oil field plus a specified rate of return after deduction of tax, royalties and an inflation adjustment, the government may negotiate for an additional share of the crude oil profits.

Mining companies are subject to corporate income tax at a rate of 35%. A holder of a mining lease, restricted mining lease or small-scale mining license must pay a royalty with respect to minerals obtained from its mining operations in Ghana. The royalty must be paid at the prescribed rate and in the prescribed manner.

Tax incentives. Ghana offers tax exemptions and tax reductions to companies engaged in specified industrial activities.

Income derived by companies from the business of constructing affordable low-cost residential premises for lease or sale is subject to tax at a rate of 1% for a period of five tax years (years of assessment). The tax-incentive period begins with the tax year in which the company begins its operations. If the company's accounting year differs from the calendar year, the beginning of the tax-incentive period is the tax year in which the accounting period of the first year of operations begins.

Rural banks are subject to tax at a rate of 1% for their first 10 years of operation.

The income of a venture capital financing company is subject to tax at a rate of 1% for five years if the company satisfies the eligibility requirements for funding under the Venture Capital Trust Fund Act. The tax-incentive period begins with the tax year in which the company satisfies the eligibility requirements.

Cocoa farmers are exempt from tax on income derived from cocoa. Cattle ranchers are subject to tax at a rate of 1% for the first 10 tax years. Income derived from tree crops, such as coffee, oil palm, shea nut, rubber and coconut, is subject to tax at a rate of 1% for 10 years following the first harvest. For a company's first five years of operations, income derived from livestock (other than cattle), fishing and cash crops, such as maize, rice, pineapple, cassava and yam, is subject to tax at a rate of 1%.

Income of a company from an agro-processing business conducted wholly in Ghana is subject to tax at a rate of 1% for a period of five tax years. The period begins with the tax year in which the company begins commercial production. If the company's accounting year differs from the calendar year, the beginning of the period is the tax year in which the accounting period of the first year of production begins.

Income of a company that commercially produces cocoa byproducts wholly in Ghana from substandard cocoa beans, cocoa husks and other cocoa waste as the principal raw materials is subject to tax at a rate of 1% for a period of five tax years. The tax-incentive period begins with the tax year in which the company begins commercial production. If the company's accounting year differs from the calendar year, the beginning of the period is the tax year in which the accounting period of the first year of production begins.

The income of a company whose principal activity is the processing of waste, including recycling of plastic and polythene material for agricultural or commercial purposes, is subject to tax at a rate of 1% for a period of seven tax years. This period begins with the tax year in which the company begins its operations. If the company's accounting year differs from the calendar year, the beginning of the tax-exemption period is the tax year in which the accounting period of the first year of operations begins.

Nonresident companies engaged in air and sea transportation are exempt from tax if the Commissioner-General of the Ghana Revenue Authority (GRA) is satisfied that the same types of companies resident in Ghana are granted an equivalent exemption by the nonresident company's country of residence.

Manufacturing enterprises, other than those operating in free zones or engaged in the export of non-traditional goods, located in regional capitals other than Accra are entitled to a 25% income tax rebate, while manufacturing enterprises located outside regional capitals other than Tema are entitled to a 50% income tax rebate.

Capital gains. A company that derives a gain from the realization of a capital asset is required to include the gain in its business income unless the asset is held or used for investment purposes. In such case, the gain is included in determining the company's investment income.

To calculate a gain from the realization of a capital asset, the cost basis of the asset is deducted from the proceeds received on the disposal of the asset. The cost basis of a chargeable asset is the sum of the following:

- Cost of the asset including incidental costs
- Expenditure incurred to alter or improve the asset
- Expenditure relating or incidental to the disposal of the asset

Administration. The Ghana Revenue Authority (GRA) is responsible for the administration and collection of all taxes.

The tax year is the calendar year. If a company's accounting year differs from the calendar year, its basis period for a tax year is the accounting year ending within the tax year.

Companies must file their tax returns within four months after the end of their accounting year.

Assessed tax must be paid on the date specified in the notice of assessment from the Commissioner-General of the GRA. In general, companies whose accounting year differs from the tax year must make quarterly payments at the end of the third, sixth, ninth and twelfth months of their accounting year.

Companies that fail to pay income tax by the due date are liable to pay interest at 125% of the statutory rate on the amount of tax that remains unpaid, in addition to the tax payable. The interest is compounded monthly.

To make tax collection more efficient, taxpayers are segmented into the following three categories:

- Large taxpayers
- Medium taxpayers
- Small taxpayers

Dividends. An 8% withholding tax is imposed on dividends paid to resident shareholders and nonresident shareholders unless exempt. This is a final tax.

Foreign tax relief. Foreign tax paid on foreign income is allowed as a credit against tax payable with respect to the foreign income received in Ghana. The amount of tax chargeable with respect to the income is reduced by the amount of the credit.

C. Determination of trading income

General. Chargeable income is based on the income reported in entities' financial statements, subject to certain adjustments.

To be deductible, expenses must be wholly, exclusively and necessarily incurred in the production of income by the company during the financial year. Expenses that may be deducted include the following:

- Interest (subject to thin-capitalization rules; see Section E)
- Rent
- Repair of plant, premises, machinery and fixtures (see *Repairs*)
- Bad debts (see *Provisions*)
- Research and development expenditure
- Financial costs (see *Financial costs*)

Repairs. Expenditure on repairs and improvements to a depreciable asset are deductible expenses, regardless of whether they are of a capital nature. However, the amount deductible is limited to 5% of the written-down value of the pool to which the depreciable asset belongs. The excess expenditure is added to the written-down value of such pool.

Financial costs. Financial costs other than interest incurred by an entity are deducted in calculating the income of the entity from an investment or business. However, the deduction is limited to the sum of the following:

- Financial gains to be included in calculating the income of the entity from the business or investment
- Fifty percent of the chargeable income of the entity for the year from the business or investment, calculated without including financial gains derived by the entity or deducting financial costs incurred by the entity

Any outstanding financial costs can be carried forward for up to five tax years.

The timing of the inclusions and exclusions of financial gains and costs is determined in accordance with generally accepted accounting principles (GAAP).

Inventories. In determining the chargeable income of a person from a business, the cost of inventory used in generating the income is deducted. The deductible amount is determined by adding to the value of the opening stock the expenses incurred by the person that is included in the cost of trading stock and deducting the value of the closing stock from the amount.

Provisions. Bad debts incurred in business are deductible if the company proves to the satisfaction of the Commissioner-General of the GRA that the debts have become bad, and that it has taken all reasonable steps to ensure payment, but to no avail. Under the Tax Act, provisions for bad and doubtful debts are not allowed for tax purposes.

All amounts recovered with respect to bad debts that were deducted must be included in income for the accounting year of the recovery.

Research and development expenditure. Expenses with respect to research and development are deductible if the expenses are wholly, exclusively and necessarily incurred in generating the income of the business, regardless of whether the expense is of a capital nature.

Capital allowances (tax depreciation). Capital allowances are granted on depreciable assets. Depreciable assets are classified into five main classes. Assets in Classes 1, 2, and 3 are placed in separate pools, and capital allowances granted with respect to the pool. Capital allowances for Classes 4 and 5 assets are granted on individual assets of the same class. To claim capital allowances, a company must satisfy the following conditions:

- It used the asset in the production of the income.
- It incurred cost in purchasing the asset.

Capital allowances granted for a particular tax year are deemed to be deductions in arriving at the chargeable income or loss of the company.

The following table presents the various classes of assets and details for calculating their capital allowances (capital allowances granted with respect to assets used in mining and petroleum operations are not included in the table).

Class	Assets	Rate %	Formula for calculating capital allowances
1	Computers and data handling equipment, together with peripheral devices	40	$(A \times B \times C) \div 365$ (a)
2	Automobiles; buses and minibuses; goods vehicles; construction and earth-moving equipment, heavy general purpose or specialized trucks; trailers and trailer-mounted containers; plant and machinery used in manufacturing; and costs of a capital nature with respect to long-term crop planting costs	30	$(A \times B \times C) \div 365$ (a)
3	Railroad cars, locomotives and equipment; vessels, barges, tugs, and similar water transportation equipment; aircraft; specialized public utility plant, equipment, and machinery; office furniture, fixtures and equipment; and any depreciable asset not included in another class	20	$(A \times B \times C) \div 365$ (a)
4	Buildings, structures and similar works of a permanent nature	10	$(A \times B \times C) \div 365$ (b)(c)
5	Intangible assets	– (d)	$[(A \div D) \times C] \div 365$ (c)(e)

- (a) A is the written-down value of the pool at the end of a basis period, B is the depreciation rate applicable to the pool, and C is the number of days in the period.
- (b) A is the cost base of the asset, B is the depreciation rate, and C is the number of days in the basis period.
- (c) The total amount of capital allowances granted for a Class 4 or 5 asset may not exceed the cost basis of the asset.
- (d) The rate is determined by formula.
- (e) A is the cost base of the asset, C is the number of days in the basis period, and D is the useful life of the asset in whole years calculated at the time the asset is acquired.

Mining and petroleum. A different method applies for granting capital allowances for mining and petroleum companies or contractors. For mining and petroleum operations, assets are pooled on a year-by-year basis, and assets acquired each year represent a separate pool. Capital allowances are calculated on straight-line basis at a rate of 20% on each separate pool.

Relief for losses. Enterprises engaged in government priority sectors are permitted to carry forward losses for a period of five years. However, enterprises operating in any other sector of the economy are allowed to carry forward losses for a period of three years.

Losses incurred on completion of long-term contracts may be carried back to prior tax years.

Groups of companies. Each company within a group must file a separate tax return. Offsetting of losses against profits among members of the group is not allowed.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); imposed on all supplies of goods and services made in, or goods imported into, Ghana, except for exempt items; services imported for the person's own consumption are subject to a reverse VAT charge	12.5
National Health Insurance Levy (NHIL); imposed on all supplies of goods and services made in or imported into Ghana, except for supplies that are specifically exempt; services imported for the person's own consumption are subject to a reverse NHIL charge	2.5
VAT Flat Rate Scheme; retailers and wholesalers of goods must charge VAT on their supplies at a flat rate; input VAT incurred by persons under the scheme cannot be claimed	3
Ghana Education Trust Fund levy (GETFund levy); imposed on all supplies of goods and services made in or imported into Ghana, except for supplies that are specifically exempt; services imported for the person's own consumption are subject to a reverse GETFund levy charge	2.5

E. Miscellaneous matters

Foreign-exchange controls. The currency in Ghana is the Ghana cedi (GHS).

The Foreign Exchange Act, 2006 (Act 723) governs foreign-exchange controls in Ghana. However, the Bank of Ghana exercises much discretion in administering the act.

Anti-avoidance legislation. A company must obtain a tax-clearance certificate to engage in certain transactions, including the purchase of goods in commercial quantities from producers, distributors, manufacturers or importers. The Commissioner-General of the GRA has the power to disregard or re-characterize fictitious arrangements and schemes entered into or carried out for the purposes of avoiding tax. The income tax law contains the following three specific anti-avoidance measures:

- Income splitting (see Section C)
- Transfer pricing (see *Transfer pricing*)
- Thin capitalization (exempt-debt to exempt-equity ratio; see *Debt-to-equity ratio*)

Transfer pricing. Ghana introduced transfer pricing regulations in September 2012. The regulations follow the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines. The regulations allow the use of the transfer-pricing methods outlined in the OECD guidelines and the use of an alternative method if the methods stated are not appropriate for determining the arm's-length price for the transaction. On the filing of a return, the Commissioner-General can use an alternative transfer-pricing method if the Commissioner-General takes the view that the method used does not result in the arm's-length price for a transaction.

The regulations also require entities that enter into related-party transactions to prepare contemporaneous documentation to support their returns. Entities must also submit transfer-pricing returns as part of their annual income tax returns within four months after the end of the accounting year.

Debt-to-equity ratio. If an "exempt-controlled resident entity," other than a financial institution, has an "exempt debt" to "exempt equity" ratio in excess of 3:1, no deduction is allowed for interest paid or a foreign-exchange loss incurred on the portion of the debt that exceeds the 3:1 ratio. Broadly, an "exempt-controlled resident entity" is a resident entity of which at least 50% of its underlying ownership or control is held by an "exempt person," which is a nonresident person or a resident person meeting certain criteria. The law also provides detailed definitions of "exempt debt" and "exempt equity."

F. Treaty withholding tax rates

The following are the maximum withholding rates under Ghana's double tax treaties for dividends, interest, royalties, and management and technology transfer fees.

	Dividends	Interest	Royalties and management and technology transfer fees
	%	%	%
Belgium	5	10	15
Czech Republic	5	5	10
France	8	10	15
Denmark	5	8	8
Germany	8	10	15
Italy	5	10	10
Mauritius	7	7	8/10 (a)
Netherlands	8	10	15
South Africa	8	10	15
Switzerland	5	10	8
United Kingdom	8	10	15
Non-treaty jurisdictions	8	8	15/20 (b)

(a) The 8% rate applies to royalties, and the 10% rate applies to technical services.

(b) The 15% rate applies to royalties. The 20% rate applies to management and technical service fees.

A. At a glance

Corporate Income Tax Rate (%)	10 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	10 (a)
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (b)

- (a) A tax rate of 20% applies to utility, energy and fuel supply companies and companies abusing a dominant market position.
- (b) In general, the carryforward is unlimited. However, if both a change in ownership and a major change in the nature or conduct of a trade carried on by the company occurs within a three-year period, losses incurred before the change in ownership cannot be offset against losses incurred subsequent to the change in ownership.

B. Taxes on corporate income and gains

Corporate income tax. Companies are taxed on profits “accrued in or derived from” Gibraltar. “Accrued in or derived from” is defined by reference to the location of the activities that generate the profits. If a company’s income results from an underlying activity that requires a license and regulation under any law of Gibraltar, the income is deemed to accrue in and derive from Gibraltar, except for income from activities carried on outside Gibraltar by a branch or permanent establishment.

The above rule applies regardless of whether a company is registered in Gibraltar or whether it is ordinarily resident in Gibraltar. A company is ordinarily resident in Gibraltar if central management and control is exercised there.

Rates of corporation tax. All companies are chargeable on taxable profits at a rate of 10%, except for utility, energy and fuel supply companies and companies deemed to be abusing a dominant market position, which are subject to tax at a rate of 20%.

Capital gains. Capital gains are not taxed in Gibraltar. Capital losses are not deductible.

Administration. For financial periods ending on or after 1 January 2016, all companies that are registered in Gibraltar or that have income assessable to tax in Gibraltar are required to file a return. For prior financial periods, only companies with income assessable to tax in Gibraltar were required to file a return. Returns, accounts and computations must be filed within nine months after the end of the month in which the financial period ends.

For financial periods ending on or after 1 January 2016, all companies incorporated in Gibraltar that declare a dividend in a financial period are required to file a dividend return within nine months after the end of the month in which that financial period ends. Before 2016, only companies incorporated in Gibraltar that declared a dividend in favor of a person ordinarily resident in Gibraltar or in favor of another company incorporated in Gibraltar were required to file a dividend return.

Companies must make payments on account of their corporation tax by 28 February and 30 September each year. Each payment is made toward the tax liability for the financial period in which the payment on account is due. The amount of payment on account due is based on the tax payable for the last relevant financial period. An application can be made for a reduced or zero payment if basing the payment on a prior year would result in an excessive payment. The final payment with respect to a financial period is due within nine months after the end of the month in which that financial period ends.

Companies not complying with filing and payment deadlines are subject to penalties and surcharges.

A self-assessment system requires companies to assess correctly their tax liabilities or face significant penalties.

Companies may request advance tax rulings. In October 2018, a process for requesting and issuing rulings was set out in legislation.

Dividends. Dividends paid by Gibraltar companies are not subject to withholding tax. Tax credits are attached to dividends paid by companies incorporated in Gibraltar. This tax credit equals the tax paid by the company on the profits out of which the dividend is paid. Restrictions may apply to how such tax credits may be utilized.

Dividend income is not taxable in the following circumstances:

- The dividend is received by a company from another company.
- The dividend is received by a person who is not ordinarily resident in Gibraltar.
- The dividend is received from a company that has its shares listed on a recognized stock exchange.
- The dividend represents the distribution of profits or gains on which no tax has been charged in accordance with the provisions of the Income Tax Act 2010 (the act contains rules governing the allocation of dividends to specific profits or gains).

The above exceptions may be subject to the anti-avoidance provisions introduced into the EU Parent-Subsidiary Directive, which apply from 31 December 2015.

Interest. Withholding tax is not imposed on the payment of interest. Interest income is not taxable, except for the following:

- Interest on loans or advances by one company to another company if the interest from an individual company is GIP100,000 or more per year. Under an anti-avoidance measure, interest received or receivable from different companies is considered to be from the same company for the purposes of the GIP100,000 threshold if those companies are “connected persons.” For this purpose, interest is deemed to be accrued and derived in Gibraltar if the company in receipt of the interest is a Gibraltar-registered company.
- Interest income of a company that lends to, or takes deposits from, the general public or engages in similar activities.

Royalties. Royalty income received or receivable by a company is taxable. Such income is deemed to be accrued and derived in Gibraltar if the company receiving the royalties is a Gibraltar-registered company.

Non-trading rental income from movable property. Non-trading rental income from movable property is taxable, effective from 22 November 2018. Such income is deemed to accrue in and derive from Gibraltar if the recipient is a Gibraltar-registered company.

Foreign tax relief. Unilateral tax relief is granted with respect to tax paid or payable in another jurisdiction on income from that jurisdiction. This is restricted to the tax that would otherwise have been payable in Gibraltar on that income.

C. Determination of trading income

General. Taxable profits are determined based on financial statements prepared in accordance with Gibraltar generally accepted accounting practice (GAAP), or UK GAAP or International Financial Reporting Standards, subject to certain adjustments and provisions.

In general, expenses must be incurred wholly and exclusively for the purposes of the trade, business, profession or vocation. However, specific reliefs and prohibitions exist for certain expenses.

Certain expenses are either not deductible or are subject to restrictions, including the following:

- Interest paid or payable to a person not resident in Gibraltar is not deductible to the extent that the interest is charged at a rate greater than a reasonable commercial rate.
- Depreciation and amortization of assets are not deductible (instead capital allowances are given; see *Tax depreciation [capital allowances]*).
- Contributions to a provident, pension or other fund for the benefit of employees are not deductible if the fund has not been approved by the Commissioner of Income Tax.

- The cost of entertaining existing and potential clients and persons introducing business, are deductible, but detailed rules restrict deductibility.
- For a branch or a company with a branch, the deduction for certain head office expenses or certain expenses incurred by a branch for the common purpose of the company is restricted to 5% of gross income of the branch.
- “General” expenses are apportioned between chargeable and non-chargeable income on a pro rata basis. The part of such expenses attributable to non-chargeable income is not deductible.

Tax depreciation (capital allowances). The first GIP30,000 of plant and machinery (including, among other items, fixtures, fittings, equipment and commercial motor vehicles) acquired in a financial period is fully deductible in that period. In addition, the first GIP50,000 of qualifying capital expenditure on information technology investment in a financial period is also fully deductible.

All such assets are pooled for tax purposes. The pool is increased with respect to any additions in excess of initial allowances given, and reduced by the proceeds of any disposals in the period. The allowance for the year is then calculated at 15% of the value of the pool. The pool value is then reduced by that allowance and the remaining balance carried forward to the next period. For companies taxed at 20% (see *Rates of corporate tax*), the annual allowance is given at 20% instead of 15%.

Groups of companies. Gibraltar law does not provide for tax consolidation. It does not have any provision for group relief (that is, the use of tax losses of one group company by another group company).

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Stamp duty	
On the issuance or increase of authorized share capital, or on the issuance of loan capital; fixed amount per transaction	GIP10
On the purchase of real estate in Gibraltar	
First- and second-time buyers	
First GIP260,000 of purchase price	0%
Balance above GIP260,000 to GIP350,000	5.5%
Balance above GIP350,000	3.5%
Other buyers	
Purchase price not exceeding GIP200,000	0%
Purchase price between GIP200,001 and GIP350,000	2% on first GIP250,000, and 5.5% on balance
Purchase price of over GIP350,000	3% on first GIP350,000, and 3.5% on balance

Nature of tax	Rate
Social insurance contributions, on employees' wages and salaries; payable on weekly wages by Employer	20% (subject to minimum of GIP18.15 per employee per week and maximum of GIP40.15 per employee per week)
Employee (under 60)	10% (subject to minimum of GIP6.05 per week and maximum of GIP30.25 per week)

E. Miscellaneous matters

Foreign-exchange controls. Restrictions are not imposed on foreign exchange or on inward or outward investments. The transfer of profits and dividends, loan principal and interest, royalties and fees is unlimited, subject to company law.

Anti-avoidance legislation. Gibraltar tax law contains several anti-avoidance provisions.

The Commissioner of Income Tax may disregard part or all of arrangements that are deemed to be artificial and/or fictitious and whose purpose is to reduce or eliminate tax payable.

Any "notifiable arrangement" or "notifiable proposal" must be disclosed to the Commissioner of Income Tax. Detailed procedures exist for seeking clearance in advance of proposals. A timetable is provided for the Commissioner to request further information, to notify the applicant that anti-avoidance provisions will or will not apply, or to notify the applicant that the Commissioner requires a further 21 days to make a decision.

In certain circumstances, the deduction for expenses incurred in favor of a connected party or parties may be restricted to the lower of 5% of turnover or 75% of profit before taking into account the expenses in question.

Debt-to-equity ratios. Thin-capitalization rules apply to interest paid by a company in the following circumstances:

- The interest is paid to a connected party that is not a company.
- The loan is secured by assets belonging to a connected party that is not a company.

In the above circumstances, if the loan is not considered to be on arm's-length terms and if the loan capital to equity ratio is greater than 5:1, interest paid by the company may be treated as a dividend instead of a deductible expense.

Interest paid to a connected party in excess of the amount that would have been charged on an arm's-length basis may be deemed to be a dividend instead of a deductible expense.

Interest may be disallowed as a deductible expense if both of the following circumstances exist:

- The loan is secured by a cash deposit made with the lender (or party connected to the lender) or secured by certain investments.
- The income from the cash deposit or investment is not assessable to tax.

F. Tax treaties

Gibraltar has no tax treaties in force. Gibraltar has implemented the European Union (EU) Parent Subsidiary Directive and the EU Directive on Interest and Royalties. Notwithstanding the legislation arising from these EU directives, Gibraltar does not impose withholding tax on dividends, interest or royalties.

At the time of writing, changes to the tax law were expected. Because of these expected changes, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	28 (a)
Capital Gains Tax Rate (%)	28 (b)
Branch Tax Rate (%)	28
Withholding Tax (%)	
Dividends	10 (c)
Interest	
Bank Interest	15 (d)(e)
Interest on Treasury Bills and Corporate Bonds	15 (d)(e)
Repos and Reverse Repos	15 (d)(e)
Other Interest	
Paid to Greek Legal Entities	15
Paid to Foreign Legal Entities	15 (e)(f)
Royalties from Patents, Know-how and similar payments	20 (e)(f)
Technical Service Fees, Management Service Fees, Consulting Service Fees and Fees for Similar Services	0/20 (g)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) Under Law 4579 of 3 December 2018, business income realized by legal persons or legal entities in the 2019 fiscal year (1 January 2019 to 31 December 2019) is taxable at a 28% rate (with the exception of credit institutions, which continue to be taxed at a 29% rate). It is expected that the corporate income tax rate will be further decreased to 27% for the 2020 fiscal year, 26% for the 2021 fiscal year and 25% for the 2022 fiscal year).
- (b) For details regarding the taxation of capital gains derived by legal persons or legal entities, see Section B.
- (c) The 10% withholding tax rate applies to dividends and interim dividends distributed by a Greek corporation (*anonymos eteria*, or AE; in certain countries, a corporation is referred to as a *société anonyme*, or SA) and profits distributed by a Greek limited liability company (*eteria periorismenis efthisis*, or EPE). This 10% withholding tax is subject to rates applicable under double tax treaties or under the European Union (EU) Parent-Subsidiary Directive (amended by Directive 2011/96/EC).
- (d) This 15% withholding tax is subject to rates applicable under double tax treaties or under the EU Interest-Royalties Directive.
- (e) This is a final tax if the beneficiary is a legal person (for example, a company) or legal entity that satisfies both of the following conditions:
- It does not have its tax residency in Greece.
 - It does not maintain a permanent establishment for corporate income tax purposes in Greece.
- (f) This 20% withholding tax is subject to rates applicable under double tax treaties or under the EU Interest-Royalties Directive. No tax is withheld on payments of royalties made to legal persons or legal entities that have their tax residence in Greece or that have a Greek permanent establishment in Greece.

- (g) No tax is withheld if the recipient has its tax residency in Greece or another EU/European Economic Area (EEA) country; otherwise, a 20% withholding tax applies.

B. Taxes on corporate income and gains

Corporate income tax. Greek companies are taxed on their worldwide income. Foreign business enterprises are taxed only on income derived from a permanent establishment in Greece or on profits generated in Greece. An AE, SA or EPE is Greek if its corporate seat or place of effective management is located in Greece.

A legal person or entity is considered to be a Greek tax resident in the following cases:

- It is incorporated or established under Greek law.
- It has its registered office in Greece.
- Its place of effective management is in Greece at any time during the tax year.

The “place of effective management” concept should be reviewed on an ad hoc basis in the context of the factual background of each case. For this purpose, indicative criteria are listed, such as the following:

- The place where the day-to-day management of the company takes place
- The place where strategic business decisions are made
- The place where the annual general meeting of shareholders or partners or the board of directors takes place
- The place where the accounting books of the company are held
- The residence of the members of the board of directors

In addition, the Greek tax administration may examine additional factors, such as the residence of the majority of the shareholders or partners.

Rate of corporate income tax. The standard corporate income tax rate is currently 28% (see footnote [a] in Section A for further details).

Capital gains. Capital gains earned by legal entities are treated as business income and are subject to corporate income tax at the standard rate of 28% if they derive from the following:

- Disposals of fixed assets
- Transfers of businesses as going concerns
- Disposals of real estate property that do not constitute a business activity per se
- Transfers of securities (such as listed shares, unlisted shares, interests in partnerships, treasury bills, Greek state bonds and derivatives)

Sales of listed shares are also subject to a 0.2% transaction duty.

Administration. The fiscal year coincides with the calendar year. Legal persons or entities keeping double-entry books may set their tax year to end on 30 June or on any other date coinciding with the tax year-end of their foreign shareholder. An option for a tax year exceeding 12 months is not available. Greek SAs or AEs, Greek EPEs and branches of foreign companies must file an annual corporate income tax return by the end of the sixth month following the end of their fiscal year.

In general, on filing their annual corporate income tax return, legal entities must make an advance payment against the next year's income tax liability. Such advance payment equals the amount calculated by applying a rate of 100% to the income tax due for the year for which the return is filed. The final payment of tax is calculated by subtracting the advance payment made in the preceding year and other prepayments of tax (including taxes withheld at source) and foreign taxes paid on foreign-source income from the amount of tax due. The foreign tax credit cannot exceed the amount of Greek tax otherwise payable on the foreign-source income.

A description of the penalties is provided below; if more than one penalty applies to the same tax offense, only the provision providing for the largest penalty applies.

A failure to file a corporate income tax return or to file in time a corporate income tax return results in the imposition of an administrative penalty ranging from EUR100 (if no tax is due) to EUR500 (if tax is due).

A failure to pay corporate income tax as a result of filing an inaccurate corporate income tax return results in the imposition of the following penalties:

- If the filing of an inaccurate corporate income tax return results in a difference of corporate income tax of 5% to 20%, the penalty equals 10% of the amount of the difference between the tax assessed on the basis of the tax return and the corrective tax assessment.
- If the filing of inaccurate corporate income tax return results in a difference of corporate income tax exceeding 20% but not exceeding 50%, the penalty equals 25% of the amount of the difference.
- If the filing of inaccurate corporate income tax return results in a difference of corporate income tax exceeding 50%, the penalty equals 50% of the amount of the difference.

A failure to file a corporate income tax return when corporate income tax would be due results in the imposition of a penalty equal to 50% of the amount of corporate income tax avoided.

In addition to the above, interest in arrears for the late payment of corporate tax is assessed; the current rate is 0.73% per month.

A failure to file a withholding tax return, the filing of an inaccurate withholding tax return or the failure to pay withholding taxes on time results in the imposition of a penalty equal to 50% of the amount of the unpaid tax.

Dividends. A 10% withholding tax is imposed on dividends and interim dividends distributed to Greek or foreign beneficiaries by Greek SAs and profits distributed by Greek EPEs, unless an applicable double tax treaty provides otherwise (see Section F) or unless tax relief is available under the EU Parent-Subsidiary Directive (90/435/EEC), as amended by Directive 2011/96/EC). For details regarding the rules in this directive, please see below. This tax represents the final tax liability of the recipient with respect to the dividends received if the recipient is a legal entity

that does not have tax residency in Greece and does not maintain a permanent establishment in Greece.

A Greek subsidiary is not required to withhold the 10% withholding tax from dividends and interim dividends distributed to their EU parent companies if all of the following conditions are satisfied:

- The EU parent company holds a minimum 10% participation in the Greek subsidiary.
- The EU parent company holds the above participation in the Greek subsidiary for at least two consecutive years.
- The recipient EU parent company satisfies all of the following additional conditions:
 - It has one of the legal types listed in Annex I of EU Directive 2011/96/EC.
 - It is tax resident in one of the EU member states (and is not considered tax resident in any non-EU country).
 - It is subject to one of the taxes listed in Annex I of Section B of EU Directive 2011/96/EC, with no option for a tax exemption.

Effective from 1 January 2014, if a Greek tax resident legal person distributes dividends to its parent company and if the parent company has not completed the two-year holding period for a 10% participation but meets the rest of the exemption requirements (see above), the distribution can be exempt from withholding tax, provided that the local Greek tax resident legal person deposits a bank guarantee in an amount based on a specific calculation. This amount is almost equal to the amount of the dividend withholding tax due.

Foreign tax credit. Foreign-source income is usually taxable with a credit for foreign income taxes paid, up to the amount of Greek tax corresponding to the foreign-source income. The credit cannot exceed the amount of Greek tax payable on the same amount.

C. Determination of trading income

General. Taxable income for all legal entities consists of annual gross income, less allowable deductions. In principle, expenses may be deducted only from gross income for the fiscal year in which they are incurred.

In general, effective from 1 January 2014, all ordinary business expenses and specific items mentioned in the tax law may be deducted for tax purposes (with the exception of certain expenses that the law explicitly indicates are not deductible for tax purposes) only if the following conditions are satisfied:

- They are made in the interest of the business or in the ordinary course of its business transactions.
- They reflect an actual transaction that has a value not considered lower or higher than the actual value, based on indirect audit methods (cross-checks).
- They are recorded in the accounting books for the period in which they are incurred and are supported by proper documentation.

Special reference is made to the deductibility of expenses made for scientific and technological research.

The new Income Tax Code also includes a list of nondeductible expenses.

Inventories. Effective from 1 January 2014, inventory and semi-finished products must be evaluated according to current accounting principles. The tax law does not determine any official method for stock valuation. However, beginning with the tax year in which a valuation method is first used by a company for valuation of its inventory and semifinished products, the company must use the method for a minimum of four years.

Provisions. Bad debt provisions and write-offs are deductible for corporate income tax purposes at a rate defined on a case-by-case basis, based the amount of the uncollected debt and the time period during which the debt remains uncollected.

For uncollected debts that do not exceed EUR1,000 and that are overdue for a period of more than 12 months, the taxpayer may establish a provision equal to 100% of the debt.

For uncollected debts that exceed EUR1,000 and that are overdue, the taxpayer may establish a provision equal to the following:

- 50% of the debt if it is overdue from 12 to 18 months
- 75% of the debt if it is overdue from 18 to 24 months
- 100% of the debt if this is overdue for more than 24 months

Restrictions are imposed on the formation of bad debt provisions for a shareholder or partner holding at least a 10% participation in a business and for business' subsidiaries with a minimum 10% participation. Special rules are also provided for the deduction of bad debt provisions by banks, leasing and factoring companies.

Depreciation. Depreciation is performed by applying a specific depreciation rate to the acquisition or construction cost for a business asset. The depreciation of each fixed asset begins the month following the month in which the asset is first used or put into service by the taxpayer. The following table provides the annual depreciation rates, effective from 1 January 2014.

Categories of assets	Depreciation rate (%)
Buildings, installations, facilities industrial installations, non-building facilities, warehouses and special loading and unloading vehicles	4
Plots of land used for mining purposes and quarries, except those used for ancillary mining activities	5
Public means of transportation (including airplanes, trains and ships)	5
Machinery and equipment (except for personal computers [PCs] and software)	10
Means of transportation of individuals	16
Means of transportation of goods	12
Intangible assets and royalties and expenses of multiannual depreciation	10
PCs and software	20
Equipment used for scientific and technological research	40
Other fixed assets	10

An option exists for one-off depreciation of fixed assets valued up to EUR1,500 in the year in which the assets are acquired and placed in service. Newly established companies are eligible to claim depreciation for all of their fixed assets at a 0% rate for their first three years.

Relief for losses. Tax losses may be carried forward to offset business profits in the following five consecutive tax years from the tax year in which they are incurred. The right to carry forward tax losses ceases to apply if both of the following events occur:

- More than 33% of the direct or indirect shareholding participation or voting rights in a legal person or entity changes in a tax year.
- In the same and/or in the subsequent tax year, the business activity of the legal person or entity changes in excess of 50% in terms of its turnover, in relation to the tax year immediately preceding the tax year of the change described in the bullet above.

Offsetting of losses incurred abroad against business profits derived domestically is not allowed, with the exception of income arising in other EU or EEA member states that is not exempted based on an applicable double tax treaty. Losses may not be carried back.

Groups of companies. Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or other group relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	24
Reduced rate	13
	(special reduced rate of 6%)
Stamp duty on private loan agreements	2.4/3.6
Capital duty	1.1
Annual real estate tax; imposed on the value of real estate owned by legal entities; the rate depends on the zone of the real estate, its surface, year built, whether the property faces a national road and other factors	Various
Special property tax; imposed on the "objective" value of real estate property; the tax does not apply if the company has listed shares or if it discloses its corporate structure and the ultimate individual shareholders or partners are revealed	15
Real estate transfer tax; imposed on taxable value	3

E. Miscellaneous matters

Foreign-exchange controls. As a general rule, the transfer of funds to a foreign credit institution may be subject to certain preapprovals from the side of the Greek credit institution or from the competent Administrative Credit Committee of Greece; otherwise, it

is prohibited (although some exemptions exist). Readers should obtain updated information before engaging in any transaction because the relevant rules are subject to amendment on a regular basis.

Transfer pricing. The Greek tax law includes a transfer-pricing clause (Articles 21 and 22 of the Code of Fiscal Procedure) that is aligned with international standards. In addition, the transfer-pricing legislation requires that an enterprise maintain documentation files.

Effective from 1 January 2014, a new definition of “associated/affiliate enterprises” is introduced. The new law defines the term “associated person,” which extends to legal entities, individuals and any other body of persons. The term encompasses two persons if any of the following circumstances exists:

- One of them holds directly or indirectly shares, parts or quotas in the other of at least 33%, estimated on the basis of total value or number, or equivalent profit participation rights or voting rights.
- Another third person participates directly or indirectly in the other two in any of the aforementioned ways.
- Between them, direct or indirect management dependence or control exists or the possibility exists for one person to exercise decisive influence over the other or for a third person to do so in both of them.

Effective from 1 January 2014, the concept of advance pricing arrangements (APAs) is introduced in Greek transfer-pricing legislation.

Debt-to-equity rules. No deduction is allowed for interest expenses (with the exception of interest on banking loans and corporate bond loans) incurred on loans granted by third parties to the extent that the interest rate exceeds the interest that would be payable if the applicable interest rate were equal to the interest rate for loans connected with revolving accounts to non-credit or non-financial enterprises, as published by the Bank of Greece.

Under the rules applicable for fiscal years beginning on or after 1 January 2017, interest expense in excess of interest income (net interest expense) that exceeds 30% of Earnings Before Interest, Tax, Depreciation, and Amortization (EBITDA) plus nondeductible expenses is not deductible for tax purposes. However, notwithstanding the above rule, interest expense in excess of interest income is fully deductible as a business expense if the cumulative amount of interest expenses recorded in the accounting books does not exceed EUR3 million per year.

The amount of interest expense that is not deductible for corporate income tax purposes in accordance with the above debt-to-equity rules may be carried forward as a deductible expense with no restriction (indefinitely).

The above debt-to-equity rules do not apply to credit institutions.

Controlled foreign corporations. Controlled foreign corporation (CFC) rules are introduced in Greece, effective from 1 January 2014. These rules are designed to deal with tax avoidance of Greek companies through the shifting of revenues to subsidiaries

in low-tax jurisdictions. Basically, these rules provide for the inclusion in the taxable income of the Greek companies of undistributed passive income (for example, interest, dividends and royalties) of foreign subsidiaries under the conditions stipulated in the law.

Mergers and acquisitions. Company law regulates mergers and acquisitions in Greece. However, significant tax exemptions and relief for company restructurings may be available.

Transfers of operations. The tax law regulates the tax treatment of a group business restructuring that results in a transfer of operations (exit taxation). In the case of a local or cross-border intra-group restructuring qualifying as a transfer of functions, assets, risks and business opportunities (profit potential), the transfer of these items are considered a “transfer package” for the purposes of the law. If, within the context of such restructuring, a transfer of an intangible asset takes place (among other transfers), such transfer must be made for consideration according to the arm’s-length principle, taking into account the total value of the underlying assets and the transfer package (relevant functions and risks transferred). If the taxpayer can prove that no significant intangible assets have been transferred and that arm’s-length consideration has been paid with respect to the specific transfer that took place, the transfer-package provisions do not apply.

General anti-avoidance rule. Fiscal Procedure Code Law 4174/2013 introduced a general anti-avoidance rule. Under this rule, the tax administration may disregard any artificial arrangement or series of arrangements that aim at the evasion of taxation and lead to a tax advantage. An arrangement is considered artificial if it lacks commercial substance and aims for the evasion of taxation or a tax benefit. To determine if an arrangement is artificial, various characteristics are examined. For purposes of this measure, the goal of an arrangement is to avoid taxation if, regardless of the subjective intention of the taxpayer, it is contrary to the object, spirit and purpose of the tax provisions that would apply in other cases. To determine the tax advantage, the amount of tax due after taking into consideration such arrangements is compared to the tax that would be payable by the taxpayer under the same conditions in the absence of such an arrangement.

Law 89/1967 regime. Enterprises licensed to operate under the Law 89/1967 regime may enter into a favorable APA with the tax authorities. A license may be granted to enterprises under this regime if certain conditions are met. The principal condition is that the company must be exclusively engaged in the provision of specific services to foreign associated companies, the foreign head office or foreign branches. The Ministry of Economy and Finance grants the license after reviewing and approving the applicant’s transfer-pricing study (based on the cost-plus method).

F. Treaty withholding tax rates

Under most double tax treaties, the rates in the table below apply to the extent that the amount of interest or royalties is at arm’s length. The domestic withholding tax rates apply to any excess amounts. In addition, certain recent double tax treaties include an anti-abuse clause.

Greece has implemented EU Directive 2003/49/EC. Under this directive, withholding tax on interest and royalties paid between associated companies of different EU member states was abolished, effective from 1 July 2013.

The following table provides treaty withholding tax rates for dividends, interest and royalties.

	Dividends	Interest	Royalties
	%	%	%
Albania	5	5	5
Armenia	10	10	5
Austria	0/5/10 (m)(n)	0/8 (o)	0/7 (o)
Azerbaijan	8	8	8
Belgium	0/5/10 (m)(n)	0/10 (l)(o)	0/5 (o)
Bosnia and Herzegovina	5/10 (m)	10	10
Bulgaria	0/10 (n)	0/10 (o)	0/10 (o)
Canada	5/10 (m)	10	10
China (mainland)	5/10 (m)	0/10 (l)	10
Croatia	0/5/10 (m)(n)	10	0/10 (o)
Cyprus	0/10 (n)	0/10 (o)	0 (e)
Czechoslovakia (i)	0/10 (n)	0/10 (o)	0/10 (o)
Denmark	0/10 (n)	0/8 (o)	0/5 (o)
Egypt	10	15	15
Estonia	0/5/10 (m)(n)	0/10 (o)	0/10 (a)(o)
Finland	0/10 (n)	0/10 (o)	0/10 (k)(o)
France	0/10 (n)	0/10 (o)	0/5 (o)
Georgia	8	8	5
Germany	0/10 (n)	0/10 (o)	0
Hungary	0/10 (n)	0/10 (o)	0/10 (o)
Iceland	5/10 (m)	8	10
India	10	15	20
Ireland	0/5/10 (m)(n)	5	0/5 (o)

- (a) The rate is 5% for royalties paid for the use of industrial, commercial or scientific equipment (7% under the Romania and South Africa treaties).
- (b) The 0% rate applies if the recipient does not control directly or indirectly more than 50% of the voting power in the payer. However, the 0% rate does not apply to interest paid to US recipients to the extent that the interest is paid at an annual rate exceeding 9%.
- (c) For details, see Section A.
- (d) The 0% rate does not apply to cinematographic film royalties paid to US residents.
- (e) The rate is 5% for film royalties.
- (f) The rate is 8% if the recipient is a bank or similar entity.
- (g) The rate is 0% for copyright royalties for literary, artistic or scientific works, including films.
- (h) The rate is 5% for royalties for literary, artistic or scientific works, including films.
- (i) Greece honors the Czechoslovakia treaty with respect to the Czech and Slovak Republics.
- (j) Under the South Africa treaty, the rate is 0% for interest paid to the South Africa Reserve Bank. Under the Italy treaty, the rate is 0% for interest payments made by the Greek government, interest payments made to the Italian government and interest payments relating to government loans.
- (k) The 10% rate applies to copyright royalties for literary, artistic or scientific works.
- (l) The rate is 5% if the recipient is a bank. Under the China, Mexico and Turkey treaties, the rate is 0% if the recipient is a government bank.
- (m) The 5% rate applies if the recipient of the dividends is a company that owns more than 25% of the payer corporation.
- (n) The 0% rate applies if the conditions of the EU Parent-Subsidiary Directive are met (for Switzerland, the 0% rate applies if the conditions of the European Community (EC)-Switzerland agreement providing for measures equivalent to those in Directive 2003/48/EC are met).
- (o) The 0% rate applies if the terms of the EU Interest-Royalties Directive are met; for Switzerland, the 0% rate applies if the conditions of the EU-Switzerland agreement providing for measures equivalent to those in Directive 2003/48/EC are met.
- (p) The 0% rate for dividends and interest payments applies if the recipient is the government of Kuwait or a state division or subdivision, the Central Bank of Kuwait or other government organizations or government funds.
- (q) The 0% rate on interest payments applies if the recipient is the government of Qatar.
- (r) The 0% withholding tax rate for dividends and interest payments applies if the recipient is the government of the United Arab Emirates (UAE) or its political subdivisions, the Central Bank of the UAE or certain UAE investment authorities.

A. At a glance

Corporate Income Tax Rate (%)	21
Capital Gains Tax Rate (%)	21
Branch Tax Rate (%)	21
Withholding Tax (%) (a)	
Dividends	30 (b)
Interest	30 (b)(c)
Royalties from Patents, Know-how, etc.	30 (b)
Branch Profits Tax	30 (d)
Net Operating Losses (Years)(e)	
Carryback	0
Carryforward	Unlimited

- (a) The withholding tax rates may be reduced under tax treaties (see Section E).
 (b) Imposed on payments to nonresidents.
 (c) Interest on certain portfolio debt obligations issued after 18 July 1984 and bank deposit interest not effectively connected to a trade or business in Guam are exempt from withholding.
 (d) The branch profits tax is imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by withdrawals of previously reinvested earnings.
 (e) This is applicable to losses generated after 2017. A net operating loss is generally limited to 80% of taxable income. Special rules apply to certain types of losses and entities.

B. Taxes on corporate income and gains

The system of corporate income taxation in force in Guam, a territory of the United States, is a mirror image of the US income tax system. The applicable law is the US Internal Revenue Code, with “Guam” substituted for all references to the “United States.” Therefore, for a description of the income taxation of corporations resident or doing business in Guam, refer to the sections on

the United States and substitute “Guam” for each reference to the “United States.”

Income taxes are paid to the government of Guam, which administers its tax system.

Under an agreement between the United States and Guam, Guam had the authority to separate its system of taxation from the US Internal Revenue Code, effective 1 January 1991. Because a comprehensive Guam Tax Code has not yet been developed, this date has been extended, and the mirror system of taxation continues to apply to Guam until a new code goes into effect.

The government of Guam, through the Guam Economic Development Authority, is authorized by law to allow tax rebates to qualified investors. Qualifying Certificates (QCs) for tax incentives are granted based on the investment commitment as well as on the potential for creating new employment and expanding the base of the island’s industry. These incentives are aimed primarily at manufacturers, insurance companies, trusts, commercial fishing companies, corporate headquarters, specialized medical facilities, high-technology companies, agricultural enterprises and tourism-development companies. In general, the tax rebates can amount to up to 75% of income tax paid for up to 20 years. Certain insurance companies may qualify for a 100% income tax rebate.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Gross receipts tax, on sales of tangible personal property and services, excluding wholesale activities	5%
Use tax, on goods imported into and consumed in Guam (businesses are subject to either gross receipts tax or use tax, not both)	4%
Hotel occupancy tax	11%
Real property tax; imposed on appraised value	
Land	0.0972%
Improvements	0.3888%
Additional levy on improvements with a value of USD1,000,000 or more	0.3888%
Liquid fuel taxes, imposed per gallon	
Aviation	8 cents
Diesel	14 cents
Other	15 cents
Alcoholic beverage excise tax	
Malted fermented beverages	7 cents per 12 fluid ounces
Distilled beverages	USD18 per gallon
Vinous beverages	USD4.95 per gallon
Tobacco excise tax	
Cigarettes	USD20 per 100 cigarettes
Cigars	53 to 66 cents per cigar
Other tobacco products	USD53 per pound
Documents tax, on conveyances and on mortgages of real property	0.25%

Nature of tax	Rate
Social security contributions (including 1.45% Medicare tax); imposed on Wages up to USD132,900 (for 2019); paid by	
Employer	6.2%
Employee	6.2%
All covered wages (for 2019; Medicare tax); paid by	
Employer	1.45%
Employee	1.45%
(Effective from 1 January 2013, an additional Medicare tax of 0.9% applies to wages, tips, other compensation and self-employment income in excess of USD200,000 for taxpayers who file as single or head of household. For married taxpayers filing jointly and surviving spouses, the additional 0.9% Medicare tax applies to the couple's combined wages in excess of USD250,000. The additional tax applies only to the amount owed by the employee; the employer does not pay the additional tax. Employers withhold tax only on wages in excess of USD200,000.)	
Miscellaneous license fees	Various

D. Miscellaneous matters

Foreign-exchange controls. Guam does not impose foreign-exchange controls.

Debt-to-equity rules. The US debt-to-equity rules apply in Guam.

Transfer pricing. The US transfer-pricing rules apply in Guam.

E. Tax treaties

The Guam Foreign Investment Equity Act was signed into law on 24 August 2002 and amends the Organic Act of Guam with respect to the application of the Guam territorial income tax laws. The Guam Foreign Investment Equity Act provides that the tax rate under Sections 871, 881, 884, 1441, 1442, 1443, 1445 and 1446 of the US Internal Revenue Code of 1986, on any item of income from sources in Guam is the same as the rate that would apply with respect to such item were Guam treated as part of the United States for purposes of the treaty obligations of the United States. However, this provision does not apply to determine the tax rate on any item of income received from a Guam payer, if for any tax year, the tax on the Guam payer was rebated under Guam law (see Section B for a discussion of the QC rebates).

- (a) For details regarding the Regime on Profits from Business Activities and the Optional Simplified Regime on Revenue from Business Activities, see Section B.
- (b) Subsidiaries and branches are subject to the same tax treatment (that is, as independent taxpayers separate from their parents and headquarters).
- (c) See Section B for further information.
- (d) The withholding taxes, other than the dividend withholding tax, apply to nonresidents without a permanent establishment in Guatemala. For information regarding dividends, see *Dividends* in Section B.
- (e) For details regarding the withholding tax on interest, see Section B.

B. Taxes on corporate income and gains

Corporate income tax. The Income Tax Law (ITL) provides that income derived from activities rendered or services used in Guatemala is considered Guatemalan-source income and must be classified and taxed under one of the following categories:

- Income from business activities
- Income from employment
- Income from capital

Corporate income tax rates. Income from business activities is income derived from ordinary or occasional trade or business. Companies that generate income from business activities may choose to be taxed under one of the following tax regimes:

- Regime on Profits from Business Activities, which applies on a net income basis (authorized expenses are deductible)
- Optional Simplified Regime on Revenue from Business Activities, which applies on a gross receipts basis (no deductions are allowed)

Under the Regime on Profits from Business Activities, companies may deduct expenses incurred to generate taxable income or to preserve the source of such income, except in specific circumstances in which the law imposes limits on deductibility. The taxable income is subject to tax at a rate of 25%. In addition, a 1% Solidarity Tax applies (see Section D).

Alternatively, companies may elect to be taxed under the Optional Simplified Regime on Revenue from Business Activities. Under this regime, companies are subject to income tax on their “taxable income,” which is understood to be the difference between gross income and exempt income. The first GTQ30,000 (approximately USD3,886) of taxable income is subject to tax at a rate of 5%, and the exceeding amount is subject to tax at a rate of 7%. No deductions are allowed. Taxpayers that choose to operate through this scheme are subject to final withholding tax.

Companies operating under the Drawback Regime, the Free Trade Zone Regime or the Santo Tomas de Castilla Free-Trade and Industrial Zone (La Zona Libre de Industria y Comercio de Santo Tomás de Castilla, or ZOLIC) Regime benefit from a 100% income tax exemption for income earned from export activities. However, on 31 March 2016, the Emerging Law for the Preservation of Employment (Decree No. 19-2016) entered into force. The purpose of the law is to limit access to benefits for taxpayers under the Drawback Regime and the Free Trade Zone Regime.

Income from capital and capital gains. Income from capital (other from dividends; see *Dividends*) and capital gains generated in Guatemala are taxed at a rate of 10%, regardless of the regime elected by the taxpayer. The following types of income are classified as income from capital and are subject to tax in Guatemala:

- Royalties
- Income from leasing and subleasing (if not part of the taxpayer’s ordinary trade or business)
- Interest and other types of returns derived from investments that are received by residents or nonresidents with permanent establishment in Guatemala

Under the ITL, the following gains are subject to capital gains tax in Guatemala:

- Gains derived from the transfer of shares issued by resident entities
- Gains derived from the transfer of shares issued by foreign entities that own immovable or movable property located in Guatemala
- Gains derived from the transfer of movable or immovable assets, lottery tickets, raffle tickets or similar items or from the incorporation of assets located in Guatemala into the taxpayer's property

Administration. The statutory tax year runs from 1 January through 31 December.

Companies operating under the Regime on Profits from Business Activities must file an annual income tax return and make any payment due within three months after the end of the tax year. Companies operating under the Optional Simplified Regime on Revenue from Business Activities must file an annual information tax return within three months after the end of the tax year. Interest and penalty charges are imposed for late payments of taxes.

Under the Regime on Profits from Business Activities, companies must make quarterly advance income tax payments, which are credited against the final income tax liability. In addition, taxpayers that are qualified as Special Taxpayers must file the annual income tax return together with financial statements audited by a certified public accountant or an independent audit firm.

Companies operating under the Optional Simplified Regime on Revenue from Business Activities settle their tax through final withholding payments made by the payer. They must file a monthly tax return in which they separately determine the total amounts of gross income, exempt income, income subject to withholding tax and income subject to direct payment (companies may be required to make direct payments of tax if they are transacting with persons not required by law to make withholdings or if they have been previously authorized by the tax authorities). The tax return must be filed within the first 10 business days of the month following the month in which the tax was generated.

Dividends. Dividends are taxed under the category of "Income from Capital." A 5% withholding tax is imposed on all dividend distributions made, regardless of the beneficiary's country of residence.

Interest. In general, a 10% final withholding tax is imposed on interest paid to nonresidents. However, withholding tax is not imposed on the following types of interest payments:

- Interest payments made by local banks to banks and financial institutions domiciled abroad (that is, entities licensed and regulated in their country of origin)
- Interest payments made by local taxpayers to multilateral institutions abroad
- Interest payments made by local taxpayers to banks and financial institutions domiciled abroad that are authorized to operate in the country by the Guatemalan Law on Banks and Financial Groups

Foreign tax relief. Guatemala does not grant relief for foreign taxes paid.

C. Determination of trading income

General. Under the Regime on Profits from Business Activities, expenses incurred to generate taxable income, including local taxes, other than income tax and value-added tax (VAT) when such taxes are not considered to be a cost, are deductible. The tax authorities are empowered to deny deductions if they determine that any of the following circumstances exist:

- The expenses are not considered necessary to produce taxable income.
- The expenses correspond to a different fiscal year.
- The expenses are not supported by the appropriate documentation.

The expenses must be registered in the taxpayer's accounting records.

Documents issued abroad that support the deduction of expenses may be subject to a 3% stamp tax.

The deductibility of expenses is also conditioned on the reporting and payment of withholding taxes and on the satisfaction of specific documentation requirements, which apply in certain circumstances. This documentation includes, among others, the following items:

- Valid invoices authorized for local operations
- Invoices or receipts issued abroad
- Notary Public deeds
- Payrolls reported to the social security authorities
- Customs returns for the importation of goods including the tax receipts

In general, payments on transactions valued over GTQ30,000 (approximately USD3,886) must be made through a banking or financial institution, and the corresponding balance statement is required as part of the supporting documentation needed to consider the payment deductible. Operations not made through the banking system must be documented through a Notary Public deed.

For these purposes, the law provides that a single transaction may be considered to include the following:

- All payments made to a single source or provider during a calendar month
- An operation of GTQ30,000 (approximately USD3,886) or above that involves partial or split payments to the same provider or person

In both of the above cases, taxpayers should use the payment or documentation methods listed above. Otherwise, the expense may not be deductible for income tax purposes and may not be considered a tax credit for VAT purposes. This requirement is known in Spanish as "Bancarización."

The deduction for royalties, payments for financial or technical advice and professional service fees for services rendered from abroad to local taxpayers is limited to 5% of the taxpayer's gross income.

Interest is deductible for income tax purposes if all of the following conditions are satisfied:

- The loan proceeds that give rise to such interest must be used to generate taxable income.
- Payments must be documented and correspond to the same fiscal year.
- The taxpayer must comply with the obligation to withhold the corresponding tax, if applicable.
- The deductible amount may not exceed the value calculated by multiplying the interest rate set by the Guatemalan Monetary Board by a total of three times the “average net asset” amount reported by the taxpayer in the annual tax return. “Average net asset” is defined as the sum of the total net worth of the previous year and the total net worth of the current year (values declared in the annual income tax returns), divided by two.
- Loans issued abroad must be obtained from banks or financial institutions that are registered and monitored by the state entity in charge of bank supervision in the country of origin. They must also be authorized for financial intermediation in the country in which the loan is granted.
- The interest rate on foreign-currency loans may not exceed the maximum simple annual rate set by the Monetary Board, minus the value of the quetzal exchange rate variation in relation to the currency in which the loan is expressed, during the period corresponding to the annual income tax return.

Inventories. Inventories are valued at cost. The acquisition cost may be computed using various valuation methods provided in the income tax law. No deviation from these methods is allowed unless previously authorized by the tax authorities.

Cattle may be priced at cost or sales price.

No provisions for deterioration or obsolescence are allowed. The destruction of inventory is considered a deductible expense if it is certified by an inspector from the tax authorities or by a Notary Public.

Provisions. Provisions for bad debts of up to 3% of credit-sales balances are deductible (excluding bad debts guaranteed by pledge or mortgage). Reserves for severance compensation of up to 8.33% of payroll costs are also deductible.

Tax depreciation. Straight-line depreciation is allowed, subject to the following annual maximum rates.

Asset	Rate (%)
Buildings and leasehold improvements	5
Plantations	15
Furniture, fixtures, ships and railroads	20
Machinery and equipment, vehicles and containers	20
Computer equipment	33.33
Tools, porcelain, glassware and certain animals	25
Other items that are not specified	10

Goodwill can be amortized over a minimum period of 10 years. Other intangible assets related to intellectual property rights may be amortized over a minimum period of five years.

Oil and other natural resources are subject to depletion in accordance with the level of production and the remaining reserves.

Relief for losses. Under the Regime on Profits from Business Activities and the Optional Simplified Regime on Revenue from Business Activities, net operating losses cannot offset taxable income in prior or future years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax	12%
Levies on petroleum distribution; rate varies by type of fuel	USD0.16 to USD0.61 per gallon
Land tax; imposed annually on value of land; maximum rate, applicable to value in excess of GTQ70,000 (approximately USD9,067)	0.9%
Revaluation tax; imposed on the increase in value resulting from a revaluation of immovable property and other fixed assets by an authorized third-party adjuster	10%
Import duties	0% to 20%
Social security tax; imposed on wages; paid by Employer	12.67%
Employee	4.83%
Solidarity Tax (ISO); imposed on legal entities subject to the Regime on Profits from Business Activities; tax rate applied to the higher of 1/4 of net assets or 1/4 of gross income; newly organized entities are not subject to ISO during their first four quarters of operations; entities that have a gross margin of lower than 4% of its gross income or incur losses for two consecutive years are not subject to the tax	1%

E. Miscellaneous matters

Foreign-exchange controls. The currency in Guatemala is the quetzal (GTQ). As of 5 December 2018, the average exchange rate was GTQ7.71954 = USD1. Guatemala does not impose foreign-exchange controls. The exchange system is regulated through the banks.

Debt-to-equity rules. Guatemala does not impose any debt-to-equity requirements.

Anti-avoidance legislation. The tax law contains general measures to prevent tax fraud and similar conduct.

Transfer pricing. Effective from 1 January 2013, official transfer-pricing rules apply to transactions with related parties resident abroad. However, Decree 19-2013 of the Guatemalan Congress suspended the application of the transfer-pricing rules as of 23 December 2013. These rules re-entered into force as of 1 January 2015. The Income Tax Law provides the following two formal obligations:

- Annex to the Annual Income Tax Return on related parties must be filed no later than 31 March of each fiscal year.
- Annual preparation of the Transfer Pricing Study is needed when formally required by the tax authorities.

Online Electronic Invoice regime. On 20 March 2018, the Board of Directors of the tax authorities issued Agreement 13-2018, which entered into force on 23 May 2018. This agreement contains the new Online Electronic Invoice regime, which provides rules regarding the issuance, transmission, certification and storage by electronic means of invoices, credit and debit notes, receipts, and other documents authorized by the tax authorities.

F. Tax treaties

Guatemala signed a double tax treaty with Mexico in March 2015, which is not yet in effect. The treaty will enter into effect after both countries complete their respective legislative approval processes.

- (a) This is the standard corporate income tax rate. For details regarding other rates, see Section B.
- (b) Dividend withholding tax is not imposed on dividends paid to foreign shareholders. See Section B. Dividends paid to Guernsey resident individual shareholders may be subject to withholding tax.
- (c) A carryback for up to two years is available for terminal losses if trade is permanently discontinued.

B. Taxes on corporate income and gains

Corporate income tax. A Guernsey resident company is subject to income tax on its worldwide income. A company not resident in Guernsey is subject to Guernsey income tax on its Guernsey-source income (other than disregarded company income, such as bank interest), unless a double tax treaty applies. A company is resident in Guernsey if its ultimate shareholder control is in Guernsey (tracing through any intermediary structures) or if it is incorporated in Guernsey. Control for Guernsey tax purposes is

determined by reference to beneficial ownership rather than central management and control. However, effective from 1 January 2019, Guernsey's corporate residence definition is amended to introduce the concept of management and control, such that a company is also treated as resident if it is managed and controlled in Guernsey. In addition, effective from 1 January 2019, a company is not treated as resident in Guernsey if it is tax resident in another jurisdiction, if it is managed and controlled in that other jurisdiction and if that other jurisdiction has a highest rate of company tax of at least 10% or has a tiebreaker clause in a double tax agreement or other international agreement. Anti-avoidance provisions apply.

Rates of corporate income tax. The standard rate of corporate income tax is 0%.

A 10% rate applies to profits derived from banking business, insurance management, insurance intermediaries, domestic insurance business, regulated fiduciary business, fund administration business, custody services provided by banks and regulated investment management services provided to individual clients. Effective from 1 January 2019, the 10% rate is also extended to income from operating an investment exchange and from regulatory compliance business.

A 20% rate applies to profits from Guernsey property, regulated utility business, retail business carried on in Guernsey that has a taxable profit of more than GBP500,000 in a year, and the importation and/or supply of hydrocarbon oil or gas.

Exempt companies. An exempt company regime is available for certain collective-investment schemes. An exempt company is treated as nonresident in Guernsey for tax purposes. It is taxable in Guernsey only on Guernsey-source income, excluding bank interest. Collective-investment schemes (typically unit trusts, investment trusts or bodies involving other forms of public participation) form a substantial sector of the finance industry in Guernsey. Other companies associated with such schemes may also qualify for exemption. Companies pay a fixed annual fee of GBP1,200 to register for exempt status, regardless of their income.

Capital gains. Capital gains are not taxable in Guernsey.

Economic substance. Economic substance requirements have been introduced and are effective for accounting periods beginning on or after 1 January 2019. The requirements apply to Guernsey tax resident companies, regardless of their country of incorporation. Companies carrying on any of the following types of business are required to meet the economic substance test:

- Banking
- Insurance
- Fund management
- Finance and leasing
- Headquarters
- Shipping
- Holding company
- Intellectual property holding
- Distribution and service center

The economic substance test looks at whether a company is directed and managed in Guernsey (note that this is different from management and control) and whether the company is undertaking its core income-generating activities in Guernsey, supported by adequate expenditure, employees and premises in Guernsey.

Penalties for failing to meet the economic substance test range from financial penalties of up to GBP100,000 to strike off (dissolution of company) and exchange of information.

Administration. The Guernsey tax year corresponds to the calendar year. Tax payments on account are normally due in two equal installments on 30 June and 31 December of the tax year, with a balancing payment or repayment due after filing and assessment.

An annual tax return is generally required for all Guernsey resident companies and some foreign companies with Guernsey-source income. The annual tax return must be filed electronically by 30 November of the following year. Automatic late filing penalties may be imposed.

If taxable distributions or loans to Guernsey resident individuals are made during the year, a final Distribution Reporter tax return is required to be filed by 15 January following the tax year. Taxes on such events must be withheld at source and paid quarterly by the 15th of the month following the relevant quarter.

Companies must file annual validation forms with the Guernsey Registry, and pay the relevant filing fee. Fees are based on the type and activity of the company and range from GBP100 to GBP1,000.

Dividends. No tax is withheld from dividends paid to foreign shareholders of Guernsey companies.

If dividends are paid to Guernsey resident individual shareholders, the company may be required to withhold tax of up to 20% of the distribution. The amount of tax withheld may be reduced if the company has already suffered tax on the profits distributed. Companies maintain tax pools to track undistributed income (income that has not suffered tax at 20% or more) and tax already suffered. Distributions are required to be matched against undistributed income first.

Companies may also be required to withhold tax at a rate of 20% if a loan is advanced to a Guernsey resident beneficial member, but some exemptions apply.

Foreign tax relief. Guernsey grants specific double taxation relief for income from its treaty countries and grants unilateral relief for income from non-treaty countries up to an effective maximum rate of 15%.

C. Determination of trading income

General. The assessment is based on accounting profits, subject to certain adjustments. To be deductible against revenue, expenses must be incurred wholly and exclusively for the purposes of the trade, and must not be capital in nature.

Nonresident companies are exempt from tax on disregarded company income, including Guernsey-source bank interest.

Tax depreciation. Depreciation is not an allowable deduction, but annual allowances are available on the cost of certain plant and machinery. Annual allowances are generally calculated at a rate of 20% on a reducing-balance or straight-line basis (subject to specific variations).

Groups of companies. Under Guernsey law, a trading loss incurred by a member of a 90%-owned group of companies may be offset against profits earned in the same tax year by another member of the group. All members of the group must be incorporated and resident in Guernsey or have a fixed place of business in Guernsey. Restrictions apply if members of the group are taxed at different rates.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Social security contributions; payable on the salaries and wages of employees resident in Guernsey; paid by (2019 rates)	
Employer (maximum contribution of GBP804.80 per month)	6.6
Employee (maximum contribution of GBP804.80 per month)	6.6
Tax on real property; based on the unit value of the property located in Guernsey; rates vary according to the type of property	Various
Document duty on sales of Guernsey property; based on the value of the transaction	2.25 to 5.50
(Legislation extending the duty to include the sale of shares in corporate vehicles holding Guernsey real property has been introduced.)	

E. Miscellaneous matters

Anti-avoidance legislation. Guernsey's tax law includes a general anti-avoidance rule. The Director of Income Tax has broad powers to adjust a taxpayer's tax liability and assess income tax that, in the Director's opinion, has been deliberately avoided by a transaction entered into by the taxpayer.

Exchange controls. Guernsey does not impose any foreign-exchange controls.

Debt-to-equity ratios. Guernsey does not prescribe any debt-to-equity ratios, but the general anti-avoidance rule can be applied in some situations.

Types of companies. The Guernsey company law allows the incorporation of companies limited by shares, guarantee or shares and guarantee. A company limited by shares and guarantee may have both shareholders and guarantee members.

Protected cell companies. Protected cell companies (PCCs) consist of several cells and core capital. Each cell is liable only to its own creditors. A creditor of a particular cell has recourse to the assets of that cell and the core capital only. PCCs may be used for captive insurance companies, collective-investment schemes or other approved enterprises.

Incorporated cell companies. Incorporated cell companies are similar to PCCs in terms of their cellular nature. However, each cell is regarded as an incorporated entity in its own right and, consequently, is subject to tax a separate entity.

Migration of companies. Guernsey law allows an overseas company to migrate into Guernsey and be registered as a Guernsey company. In addition, a Guernsey company may be removed from the Companies Register with the intention of becoming incorporated in another jurisdiction. In both cases, the law of the other jurisdiction must provide for the migration, the company must be solvent and certain other conditions must be met.

Country-by-Country Reporting. Guernsey has committed to adopt the minimum standards required under the Base Erosion and Profit Shifting (BEPS) program of the Organisation for Economic Co-operation and Development (OECD). Under Action 13, certain reporting obligations are required with respect to Country-by-Country Reporting (CbCR). Ultimate Parent Entities and Surrogate Parent Entities have notification and filing requirements in Guernsey. Constituent Entities also have notification requirements.

F. Tax treaties

Guernsey has entered into comprehensive tax treaties with the following jurisdictions.

Cyprus	Luxembourg	Qatar
Hong Kong SAR	Malta	Seychelles
Isle of Man	Mauritius	Singapore
Jersey	Monaco	United Kingdom*
Liechtenstein		

* A revised double tax treaty with the United Kingdom is in force from 7 January 2019.

Guernsey has completed negotiations for comprehensive double tax treaties with Bahrain and Gibraltar and is engaged in tax treaty negotiations with the United Arab Emirates. In addition, discussions are ongoing regarding the possibility of a double tax treaty with Estonia.

Guernsey also has partial (limited) treaties with the following jurisdictions.

Australia	Greenland	New Zealand
Denmark	Iceland	Norway
Faroe Islands	Ireland	Poland
Finland	Japan	Sweden

In addition, Guernsey has signed tax information exchange agreements with 60 jurisdictions.

- (a) The minimum tax is 1.5% of turnover unless exempt (see Section B).
 (b) The tax may be deferred if proceeds are reinvested (see Section B).
 (c) This tax applies to payments to nonresidents.
 (d) This tax applies to payments by residents to nonresidents for services, including professional services, performed in Guinea.
 (e) This tax applies only to rent paid to individuals.
 (f) This tax applies to banks only.

- (g) This tax applies to insurance companies only.
- (h) This tax applies to lottery tickets sold by gambling companies.
- (i) See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Guinean companies are taxed on the territoriality principle. As a result, Guinean companies carrying on a trade or business outside Guinea are not taxed in Guinea on the related profits. Foreign companies with activities in Guinea are subject to Guinean corporate tax on Guinean-source profits only.

Tax rates. Under the 2018 Finance Law, the regular corporate income tax rate was reduced to 25%. Since the issuance of the amended Mining Code in April 2013, the rate for the mining sector is 30% (applicable to mining companies only; not applicable to subcontractors). For telecommunication companies, banks, insurance companies and companies importing, storing, storing and distributing petroleum products, the corporate income tax rate is 35%.

The annual minimum tax payable is 1.5% of annual turnover. However, under the 2018 Finance Law for companies registered with the Big Companies Services from the National Tax Direction, the annual minimum tax payable cannot be less than GNF75 million. For other companies, it cannot be less than GNF15 million.

Profits realized in Guinea by branches of foreign companies are deemed to be distributed and therefore are subject to a branch withholding tax of 10% on after-tax income.

Corporations may apply for various categories of priority status and corresponding tax exemptions. The priority status varies, depending on the nature of the project and the level of investment.

Capital gains. Capital gains are taxed at the regular corporate rate. The tax, however, may be deferred if the proceeds are used to acquire new fixed assets in Guinea in the following three financial years.

Capital gains on transfers of shares are taxed at a rate of 10%.

Administration. The fiscal year is from 1 January to 31 December. Tax returns must be filed by 30 April of the year following the fiscal year.

Companies must pay the relevant annual minimum tax before 15 January of the year following the fiscal year. Two advance payments of corporate tax, each equal to 33 $\frac{1}{3}$ % of the corporate tax for the previous year, are due on 15 June and 15 September of the fiscal year. Any balance due must be paid by 30 April of the following year.

Dividends. Dividends are subject to a 10% withholding tax, which may be credited by the recipient against corporate income tax.

Foreign tax relief. Foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Guinean tax under the territoriality principle is taxable net of the foreign tax.

C. Determination of trading income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the Organization for the Harmonization of Business Law in Africa (Organisation pour l'Harmonisation en Afrique du Droit des Affaires, or OHADA) Uniform Act on Accounting Law (SYSCOHADA).

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Head office overhead in excess of 10% of turnover derived by a Guinean branch
- Interest paid on loans from shareholders to the extent the rate exceeds the current rate of the Central Bank and all of the interest on shareholder loans if the capital of the company is not fully paid
- Corporate income tax and withholding tax on real estate
- Certain specific charges

Inventories. Inventory is normally valued at the lower of cost or market value.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at maximum rates specified by the tax law.

Relief for tax losses. Losses may be carried forward for three years. Losses may not be carried back.

Groups of companies. Fiscal integration of Guinean companies equivalent to a consolidated filing position is not available.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on sales of goods and services and on imports	
Standard rate	18
Business activity tax (<i>patente</i>), calculated based on the nature of the business activity and the rental value of the place of business	Various
Registration duties, on transfers of real property or businesses	2 to 15
Payroll taxes; paid by employers on salaries	6
Training tax; paid by employers on salaries	1.5/3
Social security contributions, on an employee's annual gross salary, up to GNF1,500,000	
Employer	18
Employee	5

E. Foreign-exchange controls

Exchange-control regulations exist in Guinea for foreign financial transactions.

F. Tax treaties

Guinea has entered into double tax treaties with France, Morocco and the United Arab Emirates.

- (a) The 25% rate applies to non-commercial companies. Commercial companies are taxed at a rate of 40% of income, or 2% of turnover, whichever is lower, subject to the approval of the Commissioner-General of the Guyana Revenue Authority. Telephone companies are taxed at a rate of 45%. See Section B.
- (b) See Section B.
- (c) These withholding taxes apply to payments to nonresidents only.
- (d) These withholding taxes apply to payments to companies and individuals.
- (e) This tax applies to deemed remittances of profits to the overseas head office.
- (f) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Guyana are subject to tax on their worldwide income from all sources. Relief with respect to taxation suffered on foreign-source income in an overseas jurisdiction may be available under a double tax treaty. Non-resident companies engaged in business in Guyana are subject to tax on income directly or indirectly accruing in or derived from Guyana.

Rates of tax. For the 2019 year of income, the basic rate of corporation tax for non-commercial companies is 25%. However, other tax rates apply to income derived from specified business activities, as described below.

Income derived by a commercial company is taxed at 40% or is subject to a minimum tax at the rate of 2% of turnover as described below. A commercial company is a company that derives at least 75% of its gross income from trading in goods not manufactured by the company. It includes a commission agency, a telecommunication company and an entity engaged in the banking and insurance business (except the long-term insurance business). Telephone companies are taxed at a rate of 45%. For companies engaged in commercial and non-commercial activities, a dual rate is applicable; that is, the commercial activity is taxed at the lower of 2% of turnover and 40% of taxable income (subject to the agreement of the Commissioner General), and the non-commercial activity is taxed at a rate of 25%.

An advance corporation tax at a rate of 10% must be deducted by the payer from gross fees paid to a nonresident company with respect to goods and services if the nonresident company is engaged in a trade or business in Guyana. The advance corporation tax is creditable against the nonresident company's ultimate corporation tax liability.

Payments in excess of GYD500,000 to resident contractors are subject to a contractor tax at a rate of 2% on each payment if the payments are for the supply of labor or the hiring of equipment. A contractor is a resident person who has been awarded a contract for providing or supplying independent personal services for reward, other than as an employee. The contractor tax is creditable against the resident contractor's ultimate tax liability.

Subject to the agreement of the Commissioner General, commercial companies, other than insurance companies, and commercial activities of a company carrying on both commercial and non-commercial activities are subject to a minimum tax at a rate of 2% of turnover if the corporation tax calculated as payable for the income year is less than 2% of the turnover of the commercial company. If, in any year, the corporation tax payable is calculated to be higher than 2% of turnover, the tax payable is limited to the corporation tax assessed. Consequently, the tax payable by a commercial company or with respect to the commercial activities of a company undertaking both commercial and non-commercial activities is the lower of 2% of turnover or corporation tax at a rate of 40%.

Capital gains. Capital gains tax is payable at a rate of 20% on the net chargeable gain of a person accruing or arising in Guyana or elsewhere, regardless of whether it is received in Guyana, on the

change of ownership of property, subject to certain exceptions. In general, if capital allowances were taken with respect to an asset being disposed, the capital gain is the amount by which the value of the consideration received exceeds the cost of or acquisition value of the asset, less any capital allowances taken with respect to the property. In certain sectors, a disposal may give rise to a balancing adjustment, which may be subject to corporation tax and may affect the amount of applicable capital gains tax.

Capital losses may be carried forward for 24 years.

If an exemption from property tax is granted, a concomitant exemption is granted for capital gains tax.

Short-term capital gains from the disposal of assets within 12 months of their acquisition are exempt from capital gains tax. However, short-term capital gains are subject to corporation tax.

Administration. The tax year is the calendar year. Tax is calculated on the profits for the accounting period that ends during the tax year. For each quarter, a company is required to pay a corporation tax or minimum tax installment, whichever is lesser. The quarterly payments must be made by 15 March, 15 June, 15 September and 15 December in each tax year. Quarterly payments of corporation tax are determined based on the taxable income for the preceding accounting period. Minimum tax installments are based on the actual gross sales or receipts of the company for the relevant quarter. The minimum tax calculation excludes income or receipts that are exempt for corporation tax purposes, such as dividends received from Guyana resident companies.

Annual tax returns must be filed by 30 April in the year following the tax year, and any balance of tax due is payable at that time. In general, audited financial statements must be filed with annual tax returns. However, draft management accounts may be accepted for filing purposes if the audited financial statements are filed on or before 31 December of the year in which the tax returns are due. In addition, the Guyana Revenue Authority is expected to launch the provision of e-services (e-registrations and e-filings) for certain taxpayers during 2019.

Failure to file a tax return attracts a penalty of 10% of the amount of tax assessed, while failure to file a nil tax return or a tax return that discloses a loss attracts a penalty of GYD50,000. If the balance of tax due is not paid by the 30 April deadline, a penalty is payable equal to 2% of the unpaid tax for each month, or part thereof, that tax remains outstanding. Interest is also payable at a rate of 18% per year.

Dividends. Dividends received from nonresident companies are subject to tax. Dividends received by resident companies from other resident companies are exempt from tax.

Dividends paid to nonresident companies and individuals are generally subject to a withholding tax of 20%.

Double tax relief. Bilateral agreements have been entered into between the government of Guyana and the governments of certain other countries to provide relief from double taxation (see Section F). Relief from double taxation is achieved by one of the following two methods:

- Exemption or a reduced rate on certain classes of income in one of the two countries concerned.
- Credit if the income is fully or partially taxed in the two countries. The tax in the country in which the income arises is allowed as a credit against the tax on the same income in the country where the recipient is resident. The credit is the lower of the Guyana tax or the foreign tax on the same income.

C. Determination of taxable income

General. The assessment is based on financial statements prepared according to international accounting standards, subject to certain adjustments.

To be deductible, expenses must be incurred wholly and exclusively in the production of income. Deductions for head-office expenses paid by a Guyana branch to a nonresident head office or to a nonresident associate or subsidiary company, or by a Guyana resident company to a nonresident parent or associate company, may not exceed 1% of the sales or gross income of the payer.

Inventories. Inventory may be valued at cost or market value, whichever is lower. A method of stock valuation, once properly adopted, is binding until permission to change is obtained from the Guyana Revenue Authority.

Bad debts. Trading debts that have become bad and that are proven to be so to the satisfaction of the Guyana Revenue Authority may be deducted in determining taxable income. In addition, doubtful debts are deductible to the extent that they have become bad during the year. If these debts are subsequently collected, they are considered to be income subject to tax in the year of recovery.

Tax depreciation (capital allowances). Depreciation is calculated on the depreciated value of fixed assets at the beginning of each accounting year.

Capital expenditure incurred on plant, machinery or equipment or any building housing machinery owned by the taxpayer or incurred with respect to machinery and equipment that the taxpayer has the full burden of wear and tear qualify for capital allowances under the declining-balance method or straight-line method. However, if the latter method is used, a maximum of 90% of the cost of the asset may be depreciated.

The following are the applicable rates for assets acquired on or after 1 January 1992.

Asset	Rate (%)
Aircraft	33.3
Boats	10
Buildings (housing machinery)	5 (on cost)
Buildings used for providing services and warehousing	2 (on cost)
Furniture and fittings	10
Motor vehicles	20
Office equipment	
Electronic	50
Other	15
Plant and machinery	20

For new equipment for industries harnessing alternate energy through wind, solar, water and biomass technologies, capital expenses are written off within two years.

Separate capital allowances are available with respect to the petroleum and mining sectors. Capital allowances may be claimed on petroleum capital expenditure in the petroleum sector at a rate of 20% per year on a straight-line basis. In addition, in the diamond and gold mining sector, capital allowances may be claimed on exploration and development expenditure at a rate of 20% per year on a straight-line basis. Other sectors are also granted specific initial and annual allowances.

Relief for tax losses. Losses carried forward can be written off to the extent of half the taxable income for the tax year. The unrelieved balance can be carried forward indefinitely. No loss carry-back is allowed.

In the petroleum sector, corporation tax losses may be written off to the full extent of the taxable income for the tax year. Similarly, the restriction on the ability to set off the full extent of losses against taxable income does not apply to commercial companies liable to pay minimum tax.

Groups of companies. No provisions for group relief exist.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); applies to most products supplied and services rendered in Guyana; imports of goods are also subject to VAT; certain imports of services are also subject to VAT under the VAT reverse-charge mechanism; companies and other businesses are required to register for VAT if their turnover exceeds a stipulated threshold as specified in the Value-Added Tax Act (currently GYD15,000,000 [approximately USD75,000] a year)	
Standard rate	14
Certain items, including specified exports	0
Property tax; payable on the net property of a company in excess of GYD40 million; the tax is payable on the amount by which the aggregate value of all movable and immovable property of a person exceeds the aggregate value of all debts owed	
On the first GYD40 million of net property	Nil
For every dollar of the next GYD20 million of net property	0.50
For every dollar of the remainder of net property	0.75

E. Miscellaneous matters

Foreign-exchange controls. The Guyana currency is the Guyana dollar (GYD).

Guyana has a floating exchange-rate regime. Profits may be repatriated without the approval of the Central Bank of Guyana. However, certain restrictions are imposed with respect to the settlement of local transactions in foreign currency and the borrowing of funds in a foreign currency. Permission is also required to establish a foreign-currency account.

Debt-to-equity rules. In general, no thin-capitalization rules are imposed in Guyana. However, if a local company pays or accrues interest on securities issued to a nonresident company and if the local company is a subsidiary of the nonresident company or a fellow subsidiary with respect to the nonresident company, the interest is treated as a distribution and may not be claimed as a deduction against the income of the local company.

F. Treaty withholding tax rates

The following table lists the withholding tax rates under Guyana's tax treaties. If the treaty rates are higher than the rates prescribed in the domestic law, the lower domestic rates apply.

	Dividends	Interest	Royalties
	%	%	%
Canada	15	25	10
Caribbean Community and Common Market (a)			
Antigua and Barbuda	0	15	15
Barbados	0	15	15
Belize	0	15	15
Dominica	0	15	15
Grenada	0	15	15
Jamaica	0	15	15
St. Kitts and Nevis	0	15	15
St. Lucia	0	15	15
St. Vincent and the Grenadines	0	15	15
Trinidad and Tobago	0	15	15
United Kingdom	10/15 (b)	15	10
Non-treaty jurisdictions	20	20	20

(a) The listed countries have ratified the Caribbean Community and Common Market (CARICOM) double tax treaty.

(b) The lower rate applies if the recipient and beneficial owner of the dividends is a company that owns 10% or more of the voting power of the distributing company.

Salaries and Other Payments for Services	25
Fees and Commissions	25
Reinsurance	10
Videos and Films	25 (c)
Other	10
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (d)

- (a) An alternate minimum income tax and asset tax are also imposed (see Section B). A Social Contribution Tax is imposed at a rate of 5% on companies with net income exceeding HNL1 million. Domiciled entities that have reported operating losses in two consecutive or alternate tax periods that are still

open for examination are also subject to advance income tax payments (AIT) that are computed at a rate of 1% of gross income equal to or greater than HNL100 million. The AIT may be credited against the annual corporate income tax, asset tax or the Social Contribution Tax.

- (b) Withholding taxes are imposed on payments to nonresident companies and individuals.
- (c) This withholding tax applies to payments for films and video tapes for movies, television, video clubs and cable television.
- (d) Only companies engaged in agriculture, manufacturing, mining and tourism may carry forward net operating losses.

B. Taxes on corporate income and gains

Corporate income tax. Honduran-resident companies (that is, those incorporated in Honduras) are no longer taxed on their worldwide income. Effective from 1 January 2017, only their Honduran-source income is subject to Honduran tax. Nonresident companies are subject to income tax only on income derived from Honduran sources.

Corporate income tax rates. Companies are subject to corporate income tax at a rate of 25% on their net income.

A Social Contribution Tax of 5% applies to companies with net income exceeding HNL1 million.

A 1% income tax installment applies to taxpayers that meet the following conditions:

- During open tax periods, they have reported operating losses in two consecutive or alternate tax periods.
- In the prior tax period, they derived gross income equal to or greater than HNL100 million.

The installment equals 1% of the gross income reported.

The income tax installment is a tax credit that may be applied against income tax, asset tax or the Social Contribution Tax on the filing of the year-end tax return.

The following taxpayers are not subject to the income tax installment:

- Individuals or entities in the preoperative phase, up to a maximum of five years.
- Companies and individuals that incur losses resulting from an act of God or force majeure. This loss needs to be certified by an audit firm registered with the respective accounting association, notwithstanding a subsequent examination by the tax authorities.
- Companies and individuals authorized by the tax authorities to carry forward losses in accordance to Section 20 of the Honduran Income Tax Law (HN ITL).
- Companies and individuals that calculated and paid tax in the prior tax period and are subject to income tax installments in accordance to Section 34 of the HN ITL.
- Companies and individuals that prove through a tax audit report, carried out by an audit firm registered with the respective accounting association, that the tax loss is real, subject to verification from the tax authorities.
- Companies and individuals established under Section 7 of the HN ITL and tax-exempt by law or Special Legislative Decrees.

Companies operating under the following special regimes are exempt from income tax, sales tax, customs duties and certain municipal taxes:

- Free Trade Zone
- Industrial Processing Zone (Zona Industrial de Procesamiento, or ZIP)
- Temporary Import Regime (Régimen de Importación Temporal, or RIT)
- Agroindustrial Export Zone (Zona Agro-Industrial de Exportación, or ZAIDE)
- Free Tourist Zone (Zona Libre Turística, or ZOLT)

Alternative minimum income tax. An alternative minimum income tax (AMT) applies to resident individuals and corporations. The tax rates for 2018 and 2019 are shown in the following table.

Threshold of annual gross income to which AMT applies	Tax rate
Equal to and greater than HNL300 million up to HNL600 million	0.75% (0.5% for taxpayers in special economic sectors)
In excess of HNL600 million	1% (0.5% for taxpayers in special economic sectors)

For 2020 and future years, the AMT applies to annual gross income greater than HNL1 billion at a rate of 1% (0.5% for taxpayers in special sectors).

The minimum income tax rate is reduced to 0.75% of gross income for individuals or legal entities producing or selling the following products or services:

- Cement production and distribution
- Public utility services provided by state-owned companies
- Products and medicines for human use (at the importation and production levels)
- Bakery-related products

Asset tax. An asset tax is assessed based on net assets (as defined in the law) reported in the company's balance sheet. The asset tax rate is 1%. Income tax may be credited against asset tax. If the income tax equals or exceeds the asset tax for the tax year, no asset tax is due. If the income tax is less than the asset tax, the difference is payable as asset tax. In such circumstances, the asset tax represents a minimum tax for the year.

Financial transaction tax. A financial transaction tax applies to local and foreign currency operations carried on in either national or foreign currency within the institutions of the national banking system, including the following:

- National Bank for Agricultural Development (Banco Nacional de Desarrollo Agrícola, or BANADESA)
- Financial entities
- Representation offices that are supervised by the National Commission on Banking and Insurance (Comisión Nacional de Bancos y Seguros, or CNBS)

The financial transaction tax applies to the following transactions:

- Debits (withdrawals) from at-sight deposits and checking accounts, carried out by the institutions referred to in the preceding paragraph (the financial institutions).
- Debits (withdrawals) of deposits from saving accounts, carried out by the financial institutions.
- Loan operations granted by the financial institutions that need to be absorbed by the lender. The contribution under the financial transaction tax applies only to disbursements and not to payments received by the financial institution. The CNBS must ensure that this special contribution is not transferred to the borrower.
- Issuance of cashier's checks, certified checks, traveler's checks and other similar existing financial instruments by financial institutions, or financial instruments to be created in the future, if they are issued without using the accounts mentioned in the first two bullets above.
- Payments or transfers in favor of third parties of money recovered or collected in the name of such parties that are carried out by the financial institutions without using the accounts mentioned in the first two bullets above.
- Transfers or money remittances abroad or locally, carried out through the financial institutions, without using the accounts mentioned in the first two bullets above.
- Credit card annual membership renewals, for the principal cardholder only.

The following are the amounts of the contributions required under the financial transaction tax for the first, second, fourth, fifth and sixth categories of transactions listed above:

- First, second, fifth and sixth categories listed above: HNL2 per thousand or fraction of a thousand
- Fourth category: HNL1.50 per thousand or fraction of a thousand

The contributions for the transactions in the seventh (last) category above are provided in the following table.

Credit line		Contribution HNL
Exceeding HNL	Not exceeding HNL	
40,000	50,000	500
50,000	100,000	600
100,000	200,000	700
200,000	500,000	800
500,000	1,000,000	900
1,000,000	—	1,000

The law does not establish the contribution for the third category.

Capital gains. Capital gains are subject to tax at a rate of 10%.

A gain generated from any type of transfer of assets or rights by a person whose ordinary trade does not involve commercializing such assets or rights is considered a capital gain.

However, if the asset being transferred is part of the ordinary course of business of the transferor (for example, the transferor ordinarily or habitually engages in the trade or business of selling shares), the gains are categorized as ordinary income subject to corporate income tax at a rate of 25%.

Capital losses are deductible only if derived from the sale of depreciable assets or from the sale of non-depreciable assets sold in the ordinary course of a trade or business.

The capital gain must be reported and the corresponding tax paid for each transaction within 10 working days following the date on which the payment is received by the seller. An annual return must also be filed by 30 April of each year.

For the transfer of immovable property or rights and securities carried out with a nonresident, the buyer must withhold 4% of the transfer value. The capital gains tax is deemed to constitute a credit to such tax for the seller. The tax withheld must be reported in a filing and paid by the buyer within 10 calendar days following the date of the transaction.

Administration. The regular statutory tax year runs from 1 January through 31 December. However, taxpayers may elect a different tax year by requesting an authorization from the tax authorities. Companies with a regular statutory tax year must file an annual income tax return and pay any corresponding tax due within 120 days after the end of the tax year. For companies with a different tax year, the filing and payment deadline is 90 days after the end of their tax year. Mandatory advance tax payments are payable each quarter based on the income tax liability for the preceding tax year.

Dividends. A 10% withholding tax is imposed on dividends.

Foreign tax relief. Honduras does not grant any relief for foreign taxes paid.

C. Determination of taxable income

General. Net taxable income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the Honduran income tax law.

Inventories. Inventories are valued using the first-in, first-out (FIFO), last-in, first-out (LIFO) or weighted average cost methods.

Provisions. Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes. However, payments of such liabilities are deductible expenses.

Tax depreciation. Depreciation may be computed using the straight-line method. Companies may obtain authorization from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, the method must be applied consistently thereafter. The following are the applicable straight-line method rates for some common assets.

Asset	Rate (%)
Buildings	2.5 to 10
Plant and machinery	10
Vehicles	10 to 33
Furniture and office equipment	10
Tools	25

Relief for losses. Companies engaged in agriculture, manufacturing, mining and tourism may carry forward net operating losses for three years. However, certain restrictions apply. Net operating losses may not be carried back.

Groups of companies. Honduran law does not allow the filing of consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax	15
Customs duties	1 to 20
Payroll taxes; paid by employers; average rate	8.5
Municipal taxes	
Property tax; imposed on companies owning real estate	Various
Industry trade and service municipal tax; imposed monthly on income derived from the operations of companies; rates vary according to the annual production volume, income or sales	
Up to HNL500,000	0.030
From HNL500,000 to HNL10,000,000	0.040
From HNL10,000,000 to HNL20,000,000	0.030
From HNL20,000,000 to HNL30,000,000	0.020
Over HNL30,000,000	0.015

E. Foreign-exchange controls

The Honduran currency is the lempira (HNL). As of 5 December 2018, the exchange rate for the lempira was HNL24.4828 = USD1.

No restrictions are imposed on foreign-trade operations or foreign currency transactions.

F. Tax treaties

Honduras has not entered into any income tax treaties with other countries.

This chapter relates to the tax jurisdiction of the Hong Kong Special Administrative Region (SAR) of China.

A. At a glance

Corporate Income Tax Rate (%)	16.5 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	16.5 (a)
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties from Patents, Know-how, etc.	
Paid to Corporations	4.95/16.5 (b)
Paid to Individuals	4.5/15 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforwards	Unlimited

(a) See Section B for the two-tier profits tax rates regime.

- (b) If the nonresident corporation is eligible for the two-tier profits tax rates regime referred to in Section B, the withholding tax rate is 2.475% (for the first HKD2 million of its royalty income) and 4.95% (for the remainder of its royalty income). However, if a recipient of payments is an associate of the payer and if the intellectual property rights were previously owned by a Hong Kong taxpayer, a withholding tax rate of 16.5% applies (subject to the application of the two-tier profits tax rates regime referred to in Section B). If the nonresident is an individual eligible for the two-tier profits tax rates regime referred to in Section B, the withholding tax rate is 2.25% (for the first HKD2 million of his or her royalty income) and 4.5% (for the remainder of his or her royalty income). However, if a recipient of payments is an associate of the payer and if the intellectual property rights were previously owned by a Hong Kong taxpayer, a withholding tax rate of 15% applies (subject to the application of the two-tier profits tax rates regime referred to in Section B).

B. Taxes on corporate income and gains

Profits tax. Companies carrying on a trade, profession or business in Hong Kong are subject to profits tax on profits arising in or derived from Hong Kong. However, certain royalties received from a Hong Kong payer by a foreign entity that does not otherwise carry on a trade, profession or business in Hong Kong are liable to a withholding tax in Hong Kong (see Section A).

The basis of taxation in Hong Kong is territorial. The determination of the source of profits or income can be extremely complicated and often involves uncertainty. It requires case-by-case consideration. To obtain certainty concerning this and other tax issues, taxpayers may apply to the Inland Revenue for advance rulings on the tax implications of a transaction, subject to payment of certain fees and compliance with other procedures.

Rates of profits tax. The normal profits tax rates applicable to corporations and non-corporate entities are 16.5% and 15%, respectively. If a taxpayer is eligible for the two-tier profits tax rates regime, profits tax rates for the first HKD2 million of profits are reduced by 50% to 8.25% or 7.5%. The remainder of the profits continue to be taxed at the normal profits tax rates of 16.5% or 15%.

However, each group of “connected entities” can only elect one entity in the group to benefit from the two-tier regime for a given fiscal year. In general, two entities are regarded as “connected entities” if one entity has control over the other or both are under the control of a third entity. “Control” generally refers to one entity holding directly or indirectly more than 50% of the issued share capital, voting rights, capital or profits of another entity.

Tax incentives. The following tax incentives and enhanced deductions are available in Hong Kong:

- Interest income and trading profits derived by corporations from qualifying debt instruments (QDIs) issued prior to 1 April 2018 with a maturity period of less than seven years are taxed at a rate of 8.25% (50% of the normal profits tax rate), while interest income and trading profits derived from those QDIs with a maturity period of seven years or longer are exempt from tax. Interest income and trading profits derived from QDIs issued on or after 1 April 2018 of any duration are exempt from tax.
- Income derived from the business of reinsurance by professional reinsurers that have made an irrevocable election is taxed at a rate of 8.25%.

- Income derived from the business of insurance by authorized captive insurers that have made an irrevocable election is taxed at a rate of 8.25%.
- Profits derived by authorized and certain bona fide widely held mutual funds, collective-investment schemes and unit trusts are exempt from tax.
- Profits derived from qualifying corporate treasury activities by qualifying corporate treasury centers that have made an irrevocable election are taxed at a rate of 8.25%.
- Profits of qualifying aircraft lessors and qualifying aircraft leasing managers that have made an irrevocable election are taxed at the concessionary tax rate of 8.25%. In addition, instead of tax depreciation allowances, the deemed taxable amount with respect to income derived from the leasing of aircraft to an aircraft operator by a qualifying aircraft lessor equals 20% of the tax base of the lessor concerned (that is, their gross rentals less deductible expenses, but excluding tax depreciation allowances).

Qualifying research and development (R&D) expenditure incurred on or after 1 April 2018 is eligible for enhanced tax deductions; the first HKD2 million is eligible for a 300% deduction and the remainder, not subject to any cap, is deductible at 200%. R&D expenditure that does not qualify for the enhanced deductions is eligible for the normal 100% tax deduction subject to fulfillment of the specified conditions.

Tax exemption for nonresident funds. Nonresident persons, including corporations, partnerships and trustees of trust estates, are exempt from tax in Hong Kong if their activities in Hong Kong are restricted to certain specified transactions and to transactions incidental to such transactions. An entity is regarded as a nonresident if its place of central management and control is located outside Hong Kong. Specified transactions are broadly defined to cover most types of transactions typically carried out by investment funds, such as transactions involving securities (for unlisted securities, the exemption is subject to certain specified conditions), future and currency contracts, commodities and the making of deposits other than by money-lending businesses.

Anti-avoidance measures provide that under certain circumstances, a resident investor in an exempt nonresident fund is deemed to derive a portion of the exempt income of the fund and is subject to tax in Hong Kong on such income, regardless of whether the fund makes an actual distribution.

Tax exemptions for resident open-ended fund companies. Subject to certain safe-harbor rules and anti-avoidance provisions, an open-ended fund company (OFC) is exempt from tax in Hong Kong with respect to its assessable profits derived from qualifying transactions and incidental transactions if it satisfies the following conditions:

- It is a resident person with its central management and control exercised in Hong Kong.
- It is non-closely held (as defined).
- It only carries out transactions in permissible asset classes through or arranged by specified persons.

Anti-avoidance measures contained in the bill provide that under certain circumstances, a resident investor in an exempt OFC fund is deemed to derive a portion of the exempt income of the OFC and is subject to tax in Hong Kong on such income, regardless of whether the OFC makes an actual distribution.

Proposed tax exemptions for all funds operating in Hong Kong.

Under a bill being scrutinized by the Legislative Council of Hong Kong, subject to certain specified conditions, an entity that meets the definition of a “fund” as being a collective-investment scheme would be eligible for a tax exemption for its profits generated from transactions in qualifying assets and transactions incidental to such transactions. Onshore privately offered open-ended fund companies (OFCs) are also eligible for a tax exemption for profits from transactions in non-qualifying assets. The proposed exemption would be granted to all funds regardless of their size and the place where their central management and control are exercised.

Capital gains. Capital gains are not taxed, and capital losses are not deductible for profits tax purposes.

Administration. A fiscal year runs from 1 April to 31 March. If an accounting period does not coincide with a fiscal year, the profit for the accounting period is deemed to be the profit for the fiscal year in which the period ends. Special rules govern commencements and cessations of businesses and deal with accounting periods of shorter or longer duration than 12 months.

Companies generally make two payments of profits tax during a fiscal year. The first payment consists of 75% of the provisional tax for the current year plus 100% of the final payment for the preceding year. The second payment equals 25% of the provisional tax for the current year. The timing of payments is determined by assessment notices rather than by set dates, generally during November to April of the fiscal year.

Dividends. Hong Kong does not impose withholding tax on dividends paid to domestic or foreign shareholders. In addition, dividends received from foreign companies are not taxable in Hong Kong.

Foreign tax relief. In certain circumstances, a deduction is allowed for foreign taxes paid. A foreign tax credit is available under the full comprehensive double tax treaties entered into between Hong Kong and other jurisdictions. However, the amount of the credit may not exceed the amount of tax payable under the Hong Kong tax laws with respect to the relevant item of income. For details concerning Hong Kong’s double tax treaties, see Section E.

C. Determination of assessable profits

General. The assessment is based on accounts prepared on generally accepted accounting principles, subject to certain statutory tax adjustments.

In general, interest income earned on deposits with financial institutions is exempt from profits tax. However, this exemption does not apply if the recipient of the interest is a financial institution or if the deposits are used as security for borrowings and the

interest expense with respect to the borrowings is claimed as a tax deduction.

Expenses must be incurred in the production of chargeable profits. Certain specified expenses are not allowed, including domestic and private expenses, capital expenditures, the cost of improvements, sums recoverable under insurance and tax payments. The deductibility of interest is subject to restrictions (see Section D).

Inventories. Stock is normally valued at the lower of cost and net realizable value. Cost must be determined using the first-in, first-out (FIFO) method or an average cost, standard cost or adjusted selling price basis. The last-in, first-out (LIFO) method is not acceptable. However, this may not apply to shares and securities held for trading purposes.

Capital allowances

Industrial buildings. An initial allowance of 20% is granted on new industrial buildings in the year in which the expenditure is incurred, and annual depreciation allowances are 4% of qualifying capital expenditure beginning in the year the building is first put into use. No initial allowance is granted on the purchase of used buildings, but annual depreciation allowances may be available. Subject to certain exceptions, buildings used for the purposes of a qualifying trade are industrial buildings.

Commercial buildings. An annual allowance (4% of qualifying capital expenditure each year) is available on commercial buildings. Buildings that do not qualify as industrial buildings are commercial buildings. Refurbishment costs for premises, other than those used as domestic dwellings, may be deducted in equal amounts over a five-year period.

Prescribed plant and machinery. Subject to satisfying certain conditions, companies may immediately write off 100% of expenditure on manufacturing plant and machinery and on computer software and hardware.

Environmental protection facilities. Subject to satisfying certain conditions, capital expenditure incurred on eligible environmental protection installation forming part of a building or structure, environmental protection machinery and environmentally friendly vehicles qualifies for a 100% write-off in the year in which the expenditure is incurred.

Other plant and machinery, and office equipment. An initial allowance of 60% is granted for non-manufacturing plant and machinery, and office equipment in the year of purchase. An annual allowance of 10%, 20% or 30% under the declining-balance method is available on the balance of the expenditure beginning in the year the asset is first used in the business. Consequently, the total allowances (initial and annual) in the first year can be 64%, 68% or 72%.

Motor vehicles. An initial allowance of 60% is granted for motor vehicles in the year of purchase. An annual allowance of 30% under the pooling system (declining-balance method) is allowed on the balance of the expenditure beginning in the year the asset is first used in the business.

Intellectual property rights. Subject to certain anti-avoidance provisions, capital expenditure incurred on the purchase of patents, industrial know-how, registered trademarks, copyrights, registered designs, rights in layout design (topography) of integrated circuits, plant varieties and performances qualifies for tax amortization over a time period ranging from one to five years.

Recapture. Depreciation allowances are generally subject to recapture if the proceeds from the sale of a depreciable asset exceed its tax-depreciated value. The recapture rule also applies to prescribed plant and machinery (manufacturing plant and machinery and computer hardware and software) and environmental protection installation and machinery, and environmentally friendly vehicles that were previously written off in full. Consequently, in the year of disposal, the sales proceeds from the above-mentioned assets generally are included in chargeable profits, up to the original costs of the assets. Allowances for commercial and industrial buildings may be recaptured, up to their original costs. Assets depreciable under the pooling system (declining-balance method) are allocated to one of three pools according to their depreciation rates, which are 10%, 20% or 30%. Proceeds from the sale of an asset in a pool (up to the cost of the asset) are deducted from the pool balance. If a negative balance results within the pool, a balancing charge is added to taxable profits.

Relief for business losses. Losses incurred in a year can be carried forward indefinitely and set off against the profits of the company in subsequent years. No carryback is possible. Certain rules prevent trafficking in loss companies. In addition, specific rules govern the offset of normal business losses against concessionary trading receipts (that is, those taxed at concessionary rates instead of the full normal rates) and vice versa.

Groups of companies. Consolidated filing is not permitted. Hong Kong does not provide group relief for tax losses.

D. Miscellaneous matters

Mergers and reorganizations. When considering an acquisition in Hong Kong, a company must first decide whether to acquire the shares or the assets of the target company. Unlike some other jurisdictions, the Hong Kong tax code does not allow a step-up in tax basis of the underlying assets if shares are acquired. The target company retains the same tax basis for its assets, regardless of the price paid for the shares.

Effective from 3 March 2014, the new Companies Ordinance (Cap 622) introduced measures to facilitate an amalgamation of two or more wholly owned companies within a group without the need to seek approval from the court. Currently, the Hong Kong tax code does not contain specific provisions relating to a court-free amalgamation. The Hong Kong Inland Revenue Department (IRD) is considering the enactment of specific legislation to address the issues relating to court-free amalgamations. Pending the enactment of such legislation, the IRD has announced that if it is satisfied that a court-free amalgamation that does not involve a sale of assets is not carried out for the purpose of obtaining tax benefits, the amalgamated company (that is, the surviving entity) will generally be treated as if it is the continuation of, and the

same person as, the amalgamating company (that is, the company that ceased to exist as a separate legal entity upon amalgamation). Under such an approach, except for trading stocks, no tax charges will arise in the amalgamating company, and the amalgamated company will be entitled to deductions for any unrelieved tax costs inherent in the items being taken over. In addition, subject to satisfying certain conditions, tax losses brought forward from the amalgamating company can be used to offset profits of the amalgamated company.

Anti-avoidance legislation. Transactions that are artificial, fictitious or predominantly tax-driven may be disregarded under general anti-avoidance tax measures. In addition, specific measures deny the carryforward of tax losses if the dominant reason for a change in shareholding of a corporation is the intention to use the tax losses. Other specific anti-avoidance measures include those designed to counteract certain leverage and cross-border leasing, non-arm's-length transactions between a Hong Kong resident company and its foreign affiliates and the use of personal service companies to disguise employer-employee relationships.

Transfer pricing. Under the specific transfer-pricing legislation (TP law), transactions between connected persons (including those between different parts of the same enterprise located in different jurisdictions) are required to be priced and conducted on an arm's-length basis. Certain specified domestic transactions that do not result in any actual tax difference or meet the non-business loan condition are specifically exempt from the TP law, provided that certain prescribed conditions are met.

The transfer-pricing guidelines of the Organisation for Economic Co-operation and Development (OECD) provide guidance on how the TP law should be interpreted.

TP documentation requirements. The TP law also adopts the three-tier documentation approach as recommended by the OECD for related-party transactions, which is comprised of the following:

- Local File
- Master File
- Country-by-Country (CbC) Reporting

A Hong Kong entity of a group is required to prepare and retain the entity's Local File and a Master File of its group with respect to an accounting period unless either of the following circumstances exists:

- Any two of the following conditions are satisfied:
 - The total amount of the entity's revenue for the accounting period does not exceed HKD400 million.
 - The total value of the entity's assets at the end of the accounting period does not exceed HKD300 million.
 - The average number of the entity's employees during the accounting period does not exceed 100.
- All the following conditions are satisfied with respect to the following categories of transactions between connected persons (excluding specified domestic transactions) undertaken by the entity in an accounting period:
 - The total amount of transfers of properties (excluding financial assets and intangibles) does not exceed HKD220 million.

- The total amount of transactions with respect to financial assets does not exceed HKD110 million.
- The total amount of transfers of intangibles does not exceed HKD110 million.
- The total amount of other transactions does not exceed HKD44 million.

If all of the conditions stated in the second bullet above are not satisfied, the entity is required to prepare a Local File with respect to the particular category(ies) of transactions that exceeded the threshold(s) specified above. In addition, the entity is not exempt from preparing the Master File.

Unless exempted, effective from the accounting period beginning on or after 1 April 2018, the Master File and Local File must be prepared within nine months after the end of the relevant accounting period. Although the Master File and Local File are not required to be submitted together with the annual tax return, they must be produced for examination on request and retained for a period of not less than seven years after the end of the accounting period.

Country-by-Country Reporting. The CbC Report filing threshold is set in accordance with the OECD recommendation; that is, consolidated turnover exceeding EUR750 million (HKD6.8 billion) in the preceding year.

The primary obligation for CbC Report filing falls on the Ultimate Parent Entities (UPEs) of multinational groups that are resident in Hong Kong. A CbC Report must be prepared for each accounting period beginning on or after 1 January 2018. The information to be included in the CbC Report is in line with the OECD's requirements. A Hong Kong enterprise that is a constituent entity of a CbC Reporting group must file a notification with the IRD within three months after the end of the accounting period to which its UPE's CbC Report relates. This notification must contain sufficient information for Hong Kong to obtain the CbC Report directly from the jurisdiction in which the Hong Kong taxpayer's UPE or Surrogate Parent Entity has filed the CbC Report under the automatic exchange of information mechanisms for the exchange of CbC Reports. The deadline for filing a CbC Report is 12 months after the end of the relevant accounting period or the date specified in the assessor's notice, whichever is earlier.

Foreign-exchange controls. Hong Kong does not impose foreign-exchange controls.

Islamic bonds. A special legislative framework provides comparable tax treatment in terms of stamp duty, profits tax and property tax for some common types of Islamic bonds (sukuk), vis-à-vis conventional bonds. However, no special tax incentives are conferred on Islamic bonds.

Interest expense. In an attempt to combat avoidance, restrictions are placed on the deductibility of interest expense. In general, subject to certain specific anti-avoidance rules, interest on monies borrowed is deductible for tax purposes if it is incurred in the production of chargeable profits in Hong Kong and if one of the following additional conditions is satisfied:

- The recipient is taxable in Hong Kong on the interest.

- The interest is paid to a recognized financial institution in Hong Kong or overseas.
- The interest is paid with respect to debt instruments that are listed or marketed in Hong Kong or in a recognized overseas market.
- The interest is paid with respect to money that is borrowed from an unrelated person and that is wholly used to finance capital expenditures on plant and machinery qualifying for capital allowances or the purchase of trading stock.
- The interest is paid by a corporation in the ordinary course of its intra-group financing business to its overseas associated corporations, and such overseas corporations are subject to tax overseas with respect to the interest received at a rate of not less than the applicable reference rate (that is, 16.5% or 8.25% as the case may be).

Subject to certain provisions, distributions made with respect to regulatory capital securities (covering Additional Tier 1 instruments and Tier 2 instruments) issued by financial institutions in compliance with the relevant banking capital adequacy requirements are treated as interest expenses and are tax-deductible.

Under a bill being scrutinized by the Legislative Council of Hong Kong, the above tax treatment would be extended to cover distributions made with respect to loss-absorbing capacity (LAC) instruments, other than common equity, issued by financial institutions and their relevant group companies to meet the relevant minimum LAC requirements.

Reversion of sovereignty to China. Since 1 July 1997, Hong Kong has been a Special Administrative Region (SAR) of China under Article 31 of the constitution of China. However, as an SAR, Hong Kong has a tax system that is based on common law and distinct from the system used in Mainland China.

In addition, on its own, Hong Kong, using the name “Hong Kong, China,” may maintain and develop relations, and may conclude and implement agreements, with foreign states and regions and relevant international organizations in such fields as economics, trade, finance, shipping, communications, tourism, culture and sports.

E. Tax treaties

Both the Hong Kong and Mainland China tax authorities take the view that Mainland China’s tax treaties with other jurisdictions do not cover Hong Kong.

For the avoidance of double taxation on shipping income, Hong Kong has entered into agreements with Denmark, Germany, Norway, Singapore, Sri Lanka and the United States. These agreements generally provide for tax exemption in one territory for profits and capital gains derived by an enterprise of the other territory in the first-mentioned territory with respect to the operation of ships in international traffic. However, under the agreement between Hong Kong and Sri Lanka, 50% of the profits derived from the operation of ships in international traffic may be taxed in the source jurisdiction. Apart from these agreements,

reciprocal exemption provisions with the tax authorities of Chile, Korea (South) and New Zealand have also been confirmed.

Hong Kong has signed double tax agreements relating to airline profits with several jurisdictions, including Bangladesh, Croatia, Denmark, Estonia, Ethiopia, Fiji, Finland, Germany, Iceland, Israel, Jordan, Kenya, Laos, the Macau SAR, Maldives, Mauritius, Norway, Seychelles, Singapore, Sri Lanka and Sweden. Under these agreements, international transport income of Hong Kong airlines is exempt from tax in these signatory jurisdictions. However, international transport income of Hong Kong airlines that is exempt from tax overseas under these agreements or under relevant full comprehensive double tax treaties is taxed in Hong Kong.

Hong Kong has also entered into full comprehensive double tax treaties modeled on the conventional tax treaty adopted by the OECD, with the jurisdictions listed in the table below. The table shows the withholding tax rates for dividends, interest and royalties paid from Hong Kong to residents of the treaty jurisdictions. The rates shown in the table are the lower of the treaty rates and the applicable rates under Hong Kong domestic law.

- (a) The withholding rates in Hong Kong applicable to individuals and corporations are 4.5% and 4.95%, respectively (subject to the application of the two-tier profits tax rates regime referred to in Section B above). These rates are lower than those specified in the relevant tax treaties, and consequently, the Hong Kong domestic rates apply.
- (b) The tax treaty is still pending ratification. The reduced rates for royalties will not apply until the ratification procedures are completed.
- (c) The 0% rate applies if the beneficial owner of the royalties is a company (other than a partnership). In all other cases, the 3% rate applies.
- (d) The 3% rate applies to payments for the use of, or the right to use, aircraft. The 4.95% rate applies in all other cases.

The same rate applies to the taxable income of permanent establishments of nonresident companies. In general, the various permanent establishments of a nonresident company are taxed as a single entity. However, the taxable income of permanent establishments that are registered as distinct branches with the Court of Registration must be calculated separately, and losses incurred by one branch may not offset the profits of another. Such registrations are an option for foreign taxpayers in some cases and mandatory in other cases, depending on the country of incorporation of the foreign entity, its planned activities and other circumstances.

Alternative minimum tax. The alternative minimum tax (AMT) is calculated by applying the general rate of 9% to the AMT tax base. In general, the AMT tax base is 2% of total revenues, excluding any revenue attributable to foreign permanent establishments. The AMT tax base must be increased by an amount equal to 50% of additional loans contracted by the company from its shareholders or members during the tax year.

If a company's AMT is higher than the corporate income tax otherwise calculated or the pretax profit, the taxpayer may choose to pay either of the following:

- AMT.
- Corporate income tax otherwise payable. In this case, the company must fill out a one-page form that provides information regarding certain types of expenses and, in principle, is more likely to be selected for a tax audit.

Tax incentives

Reduced rate on certain types of income. Companies may reduce their corporate tax base by 50% of royalty income, which includes, in certain cases, income from the disposal of intangible property. In effect, only half of the royalty income is taxable. In light of the recent developments regarding the Base Erosion and Profit Shifting (BEPS) Project of the Organisation for Economic Co-operation and Development (OECD), the definition of royalties eligible for these incentives was narrowed, and the conditions for applying these allowances were tightened as of 1 July 2016.

The total reduction mentioned above may not exceed 50% of the pretax profit of the company. The deduction may be claimed on the tax return. Unlike the development tax allowance (see *Development tax allowance*), no special reporting or preapproval obligations are imposed.

Research and development double deduction. In addition to being recognized expenses for corporate income tax purposes, the direct costs of basic research, applied research and research and development (R&D) incurred within the scope of a company's activities reduces the corporate income tax base. As a result, a double deduction is allowed for these expenses for corporate income tax purposes. It is not required that the research itself take place in Hungary, and the double deduction may include R&D purchased from related or unrelated foreign enterprises and, in some cases, from Hungarian enterprises.

R&D triple deduction. Certain R&D activities conducted in cooperation with the Hungarian Academy of Arts and Sciences and its research institutions, public research centers or private research centers directly or indirectly owned by the state can result in a

deduction of three times the R&D cost. However, this deduction is capped at HUF50 million (approximately USD176,000).

Development tax allowance. Companies may benefit from a development tax allowance (tax credit), conforming with European Community (EC) law, for up to 12 tax years if they satisfy all of the following conditions:

- They make an investment of at least HUF3 billion (approximately USD10,560,000) or an investment of HUF1 billion (approximately USD3,520,000) in an underdeveloped region.
- They meet either of the following conditions:
 - The average number of employees increases by at least 50 (or 25 in underdeveloped regions).
 - Compared to the tax year preceding the commencement of the investment, the increase in the annual wage cost is at least 300 times (150 times in underdeveloped regions) the minimum wage (for 2019, the minimum monthly wage is HUF150,000 [approximately USD528]).
- The investment comprises one of the following:
 - The acquisition of a new asset
 - The enlargement of existing assets
 - The fundamental modification of the final product or the previous production method as a result of the investment

In addition, the scope of development tax allowances is expanded. Large companies are now eligible for development tax allowances with respect to asset investments of at least HUF6 billion (approximately USD21 million) or job-creating investments of at least HUF3 billion (approximately USD10,560,000), aimed at product diversification or new procedural innovations in certain Central Hungarian municipalities. The application of the tax allowance is subject to a government resolution based on the authorization of the European Commission.

Taxpayers may claim a development tax allowance with respect to investments of at least HUF100 million (approximately USD352,000) in free entrepreneurial zones.

Small and medium-sized enterprises may become eligible for development tax allowances with respect to investments implemented in any region in the amount of at least HUF500 million (approximately USD1,760,000).

A development tax allowance can also be claimed for investments of at least HUF100 million (approximately USD352,000) in the fields of food product hygiene, environmental protection, basic or applied research or film production, if certain other requirements are met. Investments of any amount in any field that result in a certain level of job creation may also qualify for a tax allowance.

In general, companies must submit a notification regarding the allowance to the Ministry of Finance before the start date of the investment and self-assess the tax allowance. However, companies must obtain permission from the Ministry of Finance if their investment-related costs and expenses exceed EUR100 million (approximately USD114 million). Taxpayers must report the completion date of their investments within 90 days after the date on which the investment becomes operational.

The tax allowance may reduce the company's corporate income tax liability by up to 80%, resulting in an effective tax rate of 1.8% (instead of 9%). Depending on the location of the project, the allowance may cover between 20% and 50% of the eligible investment costs. In general, the allowance may be used within a 12-year period after the investment is put into operation, but it must be used by the 16th year after the declaration for the allowance was filed. In general, the 12-year period begins in the year following the year in which the investment is put into operation. However, the investor may request that the 12-year period begin in the year in which the investment is put into operation.

Tax allowance for investments and renovations made for energy efficiency purposes. If taxpayers make investments or renovations to reduce their final energy consumption, they can utilize a tax allowance up to 45% of the eligible extra costs, depending on the region in which the investment is made (up to a maximum of the present HUF value of EUR15 million), directly relating to or attributable to the assets responsible for the energy saving. The tax allowance may be increased by 20% if the investment is made by a small enterprise and by 10% if the investment is made by a medium-sized enterprise. The tax allowance can be applied in the tax year following the year in which the investment was put into operation, and in the following five tax years. To be able to apply the tax allowance, the taxpayer must hold a certificate issued by the relevant authority proving that the investment qualifies as an investment for energy-efficiency purposes. Qualifying assets must be operated for at least five years. The tax allowance for investments serving energy-efficiency purposes and the development tax credit cannot both be applied to the same investment.

Tax allowance for investments in registered startup companies. Taxpayers that invest in startup companies may decrease their pretax profit by three times the acquisition value of the participation (including the increase in the acquisition value as a result of a capital increase after acquisition) in the tax year the participation is obtained and in the following three years, in equal amounts. The pretax profit can be decreased by a maximum of HUF20 million in each tax year, per startup company. If, as a result of a capital increase in the startup, the acquisition value increases in the period in which the allowance can be applied, the tax base can be decreased with respect to the increase, provided that the participation acquired in the startup company previously entitled the taxpayer to apply a tax-base allowance. However, this does not extend the length of the initial application period.

Tax-base allowances to promote labor mobility. Under the tax-base allowances to promote labor mobility, the pretax profit can be decreased by the following:

- The amount recorded as the acquisition value or the increment of the acquisition value of workers' hostels in the tax year in which the investment or renovation is finished
- The amount recorded as the rental fees for properties used as workers' hostels, or incurred with respect to the maintenance and operation of workers' hostels in the current tax year
- The amount of the net asset value or the increase in the net asset value of the property with a long-lasting structure built to provide housing for the taxpayer's employees in the tax year in which the investment or the development is completed

Film tax credit. Tax relief is provided to Hungarian companies sponsoring film production carried out in Hungary. The contributions are effectively refunded by the state because the sponsors can deduct the contributions from the corporate income tax payable, but the amount deducted may not exceed 30% of eligible expenses of the film production. In addition, these contributions, up to the above limit, are also deductible for corporate income tax purposes. The tax relief may be carried forward for a period of eight years. It is available only if the sponsor does not receive any rights with respect to the sponsored film.

To qualify for tax incentives, films are subject to a comprehensive cultural test, which grants points for various aspects of the production, including the members of the crew, the actors and the theme of the film being European. In general, only films receiving more than a certain number of points qualify.

To use the film tax credit, the taxpayer must pay 6.75% supplementary support to the beneficiary in the tax year in which the basic support is provided. The supplementary support is not deductible for corporate income tax purposes.

Sports tax credit. Tax relief is provided to Hungarian companies supporting sports organizations in the following popular team sports:

- Football (that is, soccer)
- Handball
- Basketball
- Water polo
- Ice hockey
- Volleyball

Under the sports tax credit scheme, national sports associations, professional sports organizations, amateur sports organizations, nonprofit foundations and civil sports organizations may be supported. Donations granted to these sports organizations are fully creditable against the corporate tax liability of the donor, capped at 70% of the donor's total corporate tax liability, if the taxpayer does not have government liabilities in arrears. Unused tax credits may be carried forward for a period of eight years. In addition, amounts donated are also deductible for corporate income tax purposes. Supplementary sport development aid must be paid by the donors within the framework of sponsorship or aid contracts equal to at least 6.75% of the amount indicated in the support certificate. This expense is not deductible for corporate income tax purposes. The supplementary development aid must be transferred to the respective national sport associations or the respective sports organizations or foundations.

New film and sports tax credit. Effective from 2015, film productions and sports organizations may be supported by Hungarian corporate taxpayers in a new manner, as an alternative to the "old" model that will also remain in existence. Under the new rules, the taxpayer may designate a portion of its tax liability as support for a selected, qualifying organization. On receiving the tax payment from the taxpayer, the tax authority remits the designated amount to the beneficiary. Taxpayers can designate up to 80% of their monthly or quarterly tax advance payments and up to 80% of their "top-up payments" or year-end tax payments. The

total amount of the support is capped at the same amounts as under the “old” rules. As a benefit, the tax authority credits 7.5% of the amounts designated from advance tax payments and “top-up payments” and 2.5% of the amounts designated from the year-end tax payment to the taxpayer’s tax account.

Capital gains. With the exception of capital gains on “reported shares,” “reported intangibles” and certain other intellectual property (see below), capital gains derived by Hungarian companies are included in taxable income and taxed at the standard corporate income tax rate.

Capital gains derived by nonresident companies from disposals of Hungarian shares (except for shares in Hungarian real estate companies, see below) are not subject to tax, unless the shares are held through a permanent establishment of the seller in Hungary.

Reported shares. If a taxpayer has held registered shares of an entity for at least one year and reported the acquisition of the shares or an increase in the shareholding within 75 days after the date of the acquisition to the Hungarian tax authorities, the shares are “reported shares.” If a shareholding has already been reported to the tax authorities, further reporting is necessary only if the proportion of the shareholding increases.

Capital gains (including foreign-exchange gains) derived from the sale of the reported shares or from the contribution of the reported shares in kind to the capital of another company are exempt from corporate income tax. Capital losses (including foreign-exchange losses) incurred on such investments are not deductible for tax purposes.

Reported intangibles. Similar to the rules of reported shares, the acquisition and creation of royalty-generating intangible assets (intellectual property and pecuniary rights) by Hungarian taxpayers can be reported to the Hungarian tax authorities within 60 days after the date of acquisition or creation. If the reported intangible asset is sold or disposed of after a holding period of at least one year, the gain on the sale is non-taxable. However, any losses related to such reported intangible asset (that is, impairment) are not deductible for corporate income tax purposes.

If an unreported intangible asset is sold, the gain on the sale is exempt from tax if this gain is used to purchase further royalty-generating intangibles within five years. A taxpayer may not enjoy the benefits arising from the reporting of a repurchased intangible if this asset was previously sold as an unreported intangible that benefited from this capital gains tax exemption.

Hungarian real estate holding companies. Gains derived by a nonresident from the alienation of shares in a Hungarian real estate holding company are taxed at a rate of 9%, unless a tax treaty exempts such gains from taxation. A Hungarian company is deemed to be a Hungarian real estate holding company if either of the following circumstances exists:

- More than 75% of its book value is derived from real property located in Hungary.
- More than 75% of the total book value of the group, comprised of the company and its related companies that are engaged in business in Hungary (whether as resident entities or through

permanent establishments), is derived from real property located in Hungary.

The capital gains are not taxable if the Hungarian company is listed on a recognized stock exchange.

Administration. In general, the calendar year is the tax year. However, companies may choose a different tax year if such year best fits their business cycle or is required to meet the management information needs of the parent company. Companies selecting a tax year other than the calendar year must notify the tax authorities within 15 days after making the decision on the selection.

Companies must file their corporate income tax returns by the last day of the fifth month following the end of the tax year. If their annual tax liability is greater than the total advance tax payments paid during the year, they are required to pay the balance on filing the return.

Extensions to file tax returns may not be obtained in advance of the due date. However, a company may obtain an extension after the due date if it files, with the completed late return, a letter requesting an extension to the date the return is filed. At their discretion, the tax authorities may accept the late return as being filed on time if the letter explains the reasons for the delay and establishes that the tax return is being filed within 15 days after the reason for the delay expires, and if the company pays any balance of tax due shown on the return.

If an extension for filing is granted, no late filing or payment penalties are imposed, and no interest is charged on the late payment. If an extension for filing is not granted, a penalty of up to HUF500,000 (approximately USD1,760) can be imposed. In addition, interest is charged on the late payment of tax at a rate equal to twice the National Bank of Hungary prime interest rate (on 4 December 2018, the prime interest rate was 0.9%). Interest is charged beginning on the date the payment is due, and it may be charged for up to three years.

In their corporate income tax returns, taxpayers also declare the tax advances that they will pay for the 12-month period beginning in the second month after the filing deadline. The total of these advances equals the amount of tax payable for the year covered in the corporate income tax return. For calendar-year taxpayers, which have a filing deadline of 31 May, advances are payable over a 12-month period beginning in July of the year following the year covered in the corporate income tax return and ending in June of the subsequent year. For companies with a corporate income tax liability exceeding HUF5 million (approximately USD17,600) in the preceding year, advance payments are divided into 12 equal monthly installments. Other companies make quarterly advance payments. As a result of the decrease of the corporate income tax rate in 2017, the amount of advance tax payable in 2017 and 2018 must be calculated based on special transitional rules. In addition to paying the monthly or quarterly advances, by the 20th day of the last month of their tax year, companies must make a "top-up payment" if their net sales revenues exceeded HUF100 million (approximately USD352,000) in the preceding tax year. The amount of the payment is the

difference between the installments paid during the tax year and the anticipated tax liability for the tax year.

Dividends

Dividends paid by Hungarian companies. Withholding tax is not imposed on dividends paid to foreign companies.

Withholding tax at a rate of 15% is imposed on dividends paid directly to resident and nonresident individuals. Tax treaties may override Hungarian domestic law with respect to the withholding tax on dividends.

Dividends received by Hungarian companies. In general, dividends received by Hungarian companies are exempt from corporate income tax. The only exception applies to dividends paid by controlled foreign corporations (CFCs; see Section E).

Interest, royalties and service fees

Interest, royalties and service fees paid by Hungarian companies. Withholding tax is not imposed on interest, royalties and service fees or any other payments made to local or foreign companies.

Hungary imposes a withholding tax at a rate of 15% on interest paid directly to individuals.

Interest and royalties received by Hungarian companies. A tax incentive may apply to royalties received by Hungarian companies (see *Tax incentives*). Interest received by a Hungarian company is taxable according to the general rules.

Foreign tax credit. Foreign taxes paid on foreign-source income may be credited against Hungarian tax. Foreign dividend withholding tax may be credited for Hungarian tax purposes if the dividend or the undistributed profit is subject to tax in Hungary.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with Hungarian accounting standards. These standards are set forth in the law on accounting, which is largely modeled on European Union (EU) directives.

Effective from 1 January 2017, the following companies can elect to use International Financial Reporting Standards (IFRS) for purposes of preparing their stand-alone Hungarian financial statements:

- Entities subject to compulsory statutory audit
- Companies whose direct or indirect parent prepares a consolidated report under IFRS
- Insurance companies
- Banks and other entities subject to similar prudential rules
- Entities providing financial services under the supervision of the Hungarian National Bank
- Hungarian branches of non-Hungarian entities

Effective from 1 January 2017, the use of IFRS is mandatory in the following circumstances:

- The entity's stock is listed on any of the stock exchanges in the European Economic Area (EEA), excluding banks and other entities subject to similar prudential rules and insurance companies).

- It is mandatory under Regulation 1606/2002 of the European Parliament and of the EU Council.

The application of IFRS is mandatory for banks and other entities subject to similar prudential rules (regardless of whether their stock is listed on any of the stock exchanges in the EEA) and insurance companies with securities listed on any of the stock exchanges in the EEA from the tax year beginning in 2018.

Taxable income is determined by adjusting the pretax profit shown in the annual financial statements by items described in the Act on Corporate Income Tax. If IFRS are applied, the starting point for the determination of the corporate income tax base is the IFRS result, but different adjustments apply. The purpose of making adjustments to the IFRS result is to arrive at a tax base that is largely similar to the tax base of companies reporting under Hungarian accounting standards.

Some items are not subject to tax as income, such as dividends received (but see the controlled foreign corporation rules in Section E).

Some items, such as transfers without consideration, are not deductible for tax purposes.

Tax depreciation. In general, depreciation is deductible in accordance with the Annexes to the Act on Corporate Income Tax. Lower rates may be used if they are at least equal to the amount of the depreciation used for accounting purposes. The annexes specify, among others, the following straight-line tax depreciation rates.

Asset	Rate (%)
Buildings used in hotel or catering businesses	3
Commercial and industrial buildings	2 to 6
Leased buildings	5
Motor vehicles	20
Plant and machinery	
General rate	14.5
Automation equipment, equipment for environmental protection, medical equipment and other specified items	33
Computers	50
Intellectual property and film production equipment	50

Relief for losses. Pre-2015 losses can be applied in any tax year until 2025. Losses incurred in 2015 and subsequent years may be carried forward for five years only. The losses can be applied against only 50% of the tax base for a particular year. Certain special rules apply to losses incurred before 2009.

Change-of-control restrictions have been introduced with respect to the availability of previously incurred tax losses after corporate transformations, mergers and acquisitions.

Groups of companies. Effective from 1 January 2019, taxpayers can opt for group taxation for corporate income tax purposes. Corporate income tax groups can be formed by at least two taxpayers that are resident in Hungary (a Hungarian branch of a non-Hungarian resident entity can also participate in a corporate income tax group). As a precondition, groups must consist of related companies based on voting rights equivalent to at least

75%. In addition, the companies in the group must satisfy the following conditions:

- They must keep their books in the same currency.
- They must have the same tax year.
- They must prepare their financial statements under the same accounting standards.

A taxpayer can be a member of only one group at the same time.

The formation of a corporate income tax group is subject to the filing of an application. The start date for the group or for becoming a member of an existing group is the first day of the tax year following the year of the application.

Corporate income tax groups must settle their tax liabilities and exercise their rights as taxpayers through their appointed representatives under the group's tax identification number. The group representative must keep appropriate records that allow the group to support its tax audits and keep all of the data needed by the group for the payment of its corporate income tax liability and the exercise of its rights.

In general, transfer-pricing rules and adjustments should not be applied to transactions between corporate income tax group members after the formation of the group.

Unless another regulation specifically states otherwise, the potential exemption or relief from the rules on related-party transactions does not apply to taxes other than corporate income tax. For example, the local business tax or value-added tax treatment of related-party transactions remains unchanged even if a corporate income tax group is formed.

Group members' negative tax bases can offset up to 50% of the positive tax bases of other corporate income tax group members in calculating the corporate income tax base of the group. Pre-grouping tax losses of a group member can only offset the same group member's corporate income tax base (up to 50%). Tax losses generated after the creation of the group can offset up to 50% of the corporate income tax base of the group.

The general corporate income tax rate of 9% also applies to corporate income tax groups.

D. Other significant taxes

The following table summarizes other significant taxes and provides the 2018 rates for these taxes.

Nature of tax	Rate (%)
Value-added (sales) tax, on goods, services and imports	
Standard rate	27
Preferential rates	5/18
Bank tax; imposed on various entities in the financial market; the tax base and tax rate varies by financial activity	Various
Levy on energy suppliers ("Robin Hood tax")	31
Social security contributions, on gross salaries; in general, expatriates do not participate; paid by	

Nature of tax	Rate (%)
Employer	19.5
Employee (the contribution represents the sum of the 8.5% health-care contribution and the 10% pension fund contribution)	18.5
Excise duty, on various goods, including gasoline, alcohol, tobacco, beer, wine and champagne	Various
Local business tax; imposed on turnover or gross margin (A decision of the European Court of Justice held that this tax was compatible with EU law.)	2

E. Miscellaneous matters

Foreign-exchange controls. The Hungarian currency is the forint (HUF). Hungary does not impose any foreign-exchange controls; the forint is freely convertible.

Companies doing business in Hungary must open a bank account at a Hungarian bank to make payments to and from the Hungarian authorities. They may also open accounts elsewhere to engage in other transactions.

Payments in Hungarian or foreign currency may be freely made to parties outside Hungary.

Transfer pricing. For contracts between related companies, the tax base of the companies must be adjusted by the difference between the market price and the contract price if the application of the market price would have resulted in higher income for the companies.

Taxpayers may also reduce the tax base in certain circumstances if, as a result of not applying market prices, their income is higher than it would have been if market prices had been applied. Effective from 2018, the tax base reduction can be only applied on the declaration of the related party stating that it will take (or has taken) into account the same amount when calculating its corporate income tax (or other equivalent tax) base. The tax base reduction does not apply if the transaction involves companies deemed to be CFCs (see *Controlled foreign corporations*).

The market price must be determined by one of the following methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Transactional net margin method
- Profit split method
- Any other appropriate method

These methods reflect the July 2010 update of the OECD guidelines. A decree issued by the Ministry of Finance describes the requirements for the documentation of related-party transactions. Transfer-pricing documentation must be prepared for all related-party agreements that are in effect, regardless of the date on which the agreement was concluded.

The transfer-pricing rules also apply to in-kind capital contributions (including on foundation) and the withdrawal of assets in kind (in the case of capital reduction and possibly in the case of winding-up) by the majority shareholder. The transfer-pricing rules also apply to in-kind dividend payments. Advance pricing agreements (APAs) are available.

Hungary has ratified and is applying the Arbitration Convention.

Controlled foreign corporations. As of 1 January 2019, the definition of CFCs in the Act on Corporate Income Tax and Dividend Tax is changed in accordance with the EU Council Directive that sets out the rules against tax-avoidance practices closely relating to the operation of the internal market. A CFC is defined as a nonresident company (branch) that meets one of the following conditions:

- At least 50% of the registered capital or the voting rights in the nonresident company is directly or indirectly owned by a Hungarian resident private individual or company, provided that the foreign company has to pay less than half of the amount of corporate income tax that would be payable if the tax and the tax base were calculated on the basis of the Hungarian tax rules. The 50% threshold must be evaluated on a consolidated basis. Consequently, the ratio of participation and voting rights held by all Hungarian and non-Hungarian related parties must be considered on an aggregate basis.
- A Hungarian resident individual or company has the right to receive at least 50% of the after-tax profit of the foreign company, provided that the foreign company has to pay less than half of the amount of corporate income tax that would be payable if the tax and the tax base were calculated on the basis of the Hungarian tax rules. The 50% threshold must be evaluated on a consolidated basis. Consequently, the rights to receive part of the after-tax profit held by all Hungarian and non-Hungarian related parties should be considered on an aggregate basis.
- A foreign branch of a Hungarian resident company is a CFC if the foreign branch has to pay less than half of the amount of corporate income tax that would be payable if the tax and tax base of the branch were calculated on the basis of the Hungarian tax rules.

On establishing a nonresident company's CFC status, it must be considered, among other criteria, whether the nonresident company (branch) carried out any legal transactions that were not genuine. A legal transaction, or a series of such transactions, qualifies as non-genuine if it is performed with the primary purpose of gaining a tax advantage and if the significant personnel functions relating to the assets of and the risks assumed by the nonresident company (branch) are carried out by a Hungarian resident company.

The following are exceptions to the above definition:

- If the pretax profit of a nonresident company (branch) does not exceed HUF234,952,500, if its profit from non-commercial activities does not exceed HUF23,495,250 or if its pretax profit does not exceed 10% of the operating costs accounted for the relevant tax year, the nonresident company (branch) does not qualify as a CFC.

- A foreign permanent establishment that operates in a country outside the EU or the EEA with which Hungary has a treaty with a provision to exempt the income of foreign permanent establishments from corporate income tax liability in Hungary does not qualify as a CFC if it qualifies as a permanent establishment under the treaty.

The above rules enter into force as of 2019. However, for taxpayers applying the current regulation, which has been in effect since 2017, there will be a transitional period of one year.

Taxpayers must increase their corporate income tax base in relation to CFCs in accordance with the following rules:

- In the tax year in which the CFC's tax year has its last day, the taxpayer's corporate income tax base is increased by the amount of the positive after-tax profit, less the approved (distributed) dividend realized from non-genuine legal transactions as stated on the last day of the CFC's tax year, to the extent that the taxpayer performs significant personnel functions relating to the income generated from the non-genuine legal transaction.
- The amount recognized as an increase to the pretax profit, relating to the undistributed income of the CFC, must be calculated in line with the arm's-length principle.

Dividends received from CFCs do not qualify for the participation exemption regime and, accordingly, are treated as taxable income to the Hungarian shareholders (except for dividends that were already taxed as undistributed after-tax profits in previous years). Nevertheless, the corporate income tax paid abroad can be credited against the Hungarian corporate income tax liability. As a result, the overall non-Hungarian and Hungarian tax burden is capped at the 9% Hungarian corporate income tax rate. Capital losses on investments in CFCs are not deductible for tax purposes.

Debt-to-equity rules. To comply with the Council Directive (EU) 2016/1164, named the EU Anti-Tax Avoidance Directive (ATAD), as of 1 January 2019, a new rule to restrict interest deductions replaces the thin-capitalization rules.

Under this new rule, the amount of the net financing costs exceeding either 30% of the earnings before interest, tax, depreciation and amortization (EBITDA) or the nominal threshold of EUR3 million (HUF939,810,000), whichever is higher, increases the pretax profit.

The unused part of previous tax years' interest deduction capacity reduces the amount of the increase described in the preceding paragraph, but this reduction cannot exceed the amount of the increase.

If in previous tax years, the tax base was increased based on this provision, in the year in question, the tax base can be decreased by up to the same amount, to the extent of the current year's interest deduction capacity. The law does not specifically restrict the length of time that the previous years' tax base increasing item can be applied to reduce the tax base.

The deduction restriction is broader than in the previous thin-capitalization rule, to the extent that any costs and expendi-

tures equivalent to interest in economic terms, as well as costs and expenditures accounted for in connection with raising funds, are also subject to restrictions, in addition to interest expenditures. The deduction of foreign-exchange losses, borrowing fees and related legal costs as well as the deduction of the costs of any potential hedging transactions can also be restricted. The law provides that the above financing costs can be reduced by interest income and other taxable income that is equivalent to interest income when determining the net financing costs. This amount should be compared to the limit provided by law when calculating the increasing item.

Like the previous rules, the measure for the increase in the tax base does not have to be applied by financial institutions, investment enterprises, alternative investment funds, the management companies of undertakings for collective investment in transferable securities or by taxpayers qualifying as insurance and reinsurance companies. However, there is no similar exception from applying the increasing item with respect to borrowings from the above list.

For financing agreements concluded before 17 June 2016, the new rule will be applied for the first time with respect to amended contract amounts or amended terms, from the day following the date on which the amendment for the increased contract amount or the extension of maturity enters into force. Otherwise, the previous thin-capitalization rule continues to apply to these contracts. However, taxpayers may also opt to apply the new interest deduction restriction rule.

A member of a group that prepares consolidated annual financial statements does not have to apply the interest deduction restriction rule if it can establish that the ratio of its average equity to the average of its total assets in the tax year equals or exceeds the same ratio calculated for the entire group. In addition, in applying the interest deduction restriction rule, net financing costs can be deducted from the corporate income tax base by applying on the taxpayer's EBITDA the ratio of the total net financing costs incurred with third parties at the group level to the total EBITDA of the group; that is, by using the following formula:

$$\frac{\text{Third-party total net financing costs at group level}}{\text{Group's EBITDA}} \times \frac{\text{Taxpayer's EBITDA}}{\text{EBITDA}}$$

Foreign investment. No restrictions are imposed on the percentage of ownership that foreigners may acquire in Hungarian companies. Some restrictions exist with respect to the ownership of farmland.

F. Treaty withholding tax rates

Hungary does not impose withholding taxes on payments to foreign entities. However, it does impose withholding tax on the payment of dividends and interest to foreign individuals (for details, see Section B).

Hungary has tax treaties in effect with the following jurisdictions.

Albania	Indonesia	Portugal
Armenia	Iran	Qatar

Australia	Ireland	Romania
Austria	Israel	Russian Federation
Azerbaijan	Italy	San Marino
Bahrain	Japan	Saudi Arabia
Belarus	Kazakhstan	Serbia (b)
Belgium	Korea (South)	Singapore
Bosnia and Herzegovina (a)	Kosovo	Slovak Republic
Brazil	Kuwait	Slovenia
Bulgaria	Latvia	South Africa
Canada	Liechtenstein	Spain
China (mainland)	Lithuania	Sweden
Croatia	Luxembourg (d)	Switzerland
Cyprus	Macedonia	Taiwan
Czech Republic	Malaysia	Thailand
Denmark	Malta	Tunisia
Egypt	Mexico	Turkey
Estonia	Moldova	Turkmenistan
Finland	Mongolia	Ukraine
France	Montenegro (b)	United Arab Emirates
Georgia	Morocco	United Kingdom
Germany	Netherlands	United States (c)
Greece	Norway	Uruguay
Hong Kong SAR	Oman	Uzbekistan
Iceland	Pakistan	Vietnam
India	Philippines	
	Poland	

- (a) The 1985 treaty between Hungary and the former Socialist Federal Republic of Yugoslavia is applied with respect to Bosnia and Herzegovina.
- (b) The 2001 treaty between Hungary and the former Federal Republic of Yugoslavia is applied with respect to Serbia. In practice, Hungary and Montenegro also apply this treaty, but no formal announcement has been made to confirm this practice.
- (c) This treaty was renegotiated in 2010, but the new treaty is not yet in force.
- (d) This treaty was renegotiated. The new treaty is effective from 27 January 2017.

Hungary is negotiating double tax treaties with Algeria, Andorra, Argentina, Chile, Colombia, Ethiopia, Iraq, Kyrgyzstan, Panama and Sri Lanka.

On 7 June 2017, Hungary signed with more than 65 other countries the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (MLI). The MLI ensures that rules designed to prevent cross-border tax evasion will be incorporated into bilateral tax treaties. It will also enable hundreds of tax treaties to be updated with OECD BEPS measures without the need for drawn-out bilateral negotiations. The Hungarian government has opted out from all provisions of the MLI that allow an opt-out.

A. At a glance

Corporate Income Tax Rate (%)	20 (a)
Capital Gains Tax Rate (%)	20 (b)
Branch Tax Rate (%)	20 (a)
Withholding Tax (%)	
Dividends	
Residents	20 (c)
Nonresidents	20 (d)
Interest	
Residents	20
Nonresidents	12 (e)
Royalties from Patents, Know-how, etc.	20 (f)
Payments under Leases and Rent	20 (f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	10

- (a) A 37.6% rate applies to partnerships.
- (b) Capital gains are taxed as ordinary income. Capital gains may be offset by extraordinary depreciation (for details, see Section B).
- (c) Dividends received by domestic companies are considered ordinary income. However, dividends received from domestic companies are fully deductible. Dividends received from foreign companies are also fully deductible, provided that the foreign companies are taxed in a similar manner to Icelandic companies. Dividends received by partnerships are taxed at 22%, and no deduction is allowed.
- (d) A 20% withholding tax is imposed on dividends paid to nonresident entities. A 22% withholding tax is imposed on dividends paid to nonresident individuals. Nonresidents can obtain a refund of the withholding tax or apply for an exemption from the withholding tax based on an applicable double tax treaty. If no double tax treaty applies, nonresidents must suffer the withholding. However, residents of European Union (EU), European Economic Area (EEA) or European Free Trade Association (EFTA) states or the Faroe Islands are eligible for a full deduction for dividends received from domestic companies in the same manner as domestic entities. Companies may claim this deduction by

filing a tax return. They are accordingly reimbursed for withheld taxes in the general assessment in the following year.

- (e) Interest income up to ISK150,000 a year is exempt from income tax for nonresident individuals. A 12% withholding tax is imposed on interest paid to nonresident entities and nonresident individuals unless, on application, the Director of Internal Revenue grants an exemption from withholding tax based on an applicable double tax treaty. Alternatively, the withholding tax may either be refunded or not withheld. Interest on bonds issued in the name of financial undertakings or energy companies is not subject to withholding tax. The bonds must be registered at a central securities depository established in an Organisation for Economic Co-operation and Development (OECD), EEA or EFTA state or the Faroe Islands. Interest paid by Seðlabanki Íslands (the Icelandic central bank) in its own name or on behalf of the Icelandic treasury is also not subject to withholding tax.
- (f) Royalties, payments under leases and rent payments that are paid to nonresident companies, partnerships and individuals are subject to withholding tax at a rate of 22%. A 20% rate applies to resident companies. A 37.6% rate applies to resident partnerships. These payments are not subject to withholding when paid to residents.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are taxed on their worldwide income. Resident corporations are those incorporated, registered, domiciled or effectively managed in Iceland. Nonresident companies are taxed only on their income earned in Iceland.

Rate of corporate tax. The rate of corporate income tax is 20%. The rate for taxable partnerships is 37.6%.

Capital gains. Capital gains result from profits derived from sales of assets. These gains are included in ordinary income and taxed at the normal income tax rates.

Capital gains may be offset by extraordinary depreciation on other fixed assets or on fixed assets acquired within two years of the sale. If the fixed assets are not acquired within two years of the sale, the gain is included in income, and a 10% penalty is imposed.

Profits from stock sales. Profits derived by domestic companies from stock sales are considered ordinary income. However, profits derived from stock sales in domestic companies are fully deductible. Profits derived by domestic companies from stock sales in foreign companies are also fully deductible, provided that the foreign companies are taxed in a similar manner to Icelandic companies and that their tax ratio is not lower than the general tax ratio in any member state of the OECD, any member state of the EEA, any founding state of the EFTA or the Faroe Islands.

Administration. The tax year is generally the calendar year.

The final due date for legal entities to submit their income tax return is 31 May. Monthly advance tax payments are due on the first day of each month except for January and September. Each advance payment equals 8.5% of the previous year's tax. The tax due is determined when the annual assessment is issued. Companies generally must pay the unpaid balance in three equal monthly payments in October, November and December.

Advance rulings. Both resident and nonresident companies may request advance rulings on most corporate income tax consequences of future transactions. Rulings are issued only on matters of substantial importance.

Dividends. Dividends earned by domestic companies are considered ordinary income. Dividends are subject to withholding tax except for dividends paid to companies of the same tax-consolidated group. However, dividends received from domestic companies are fully deductible from dividend income in the annual assessment process and, as a result, effectively no taxable income is declared, and any withholding tax that was imposed is refunded or used to reduce other taxes resulting from the assessment. Dividends received from foreign companies are also fully deductible, provided that the foreign companies are taxed in a similar manner to Icelandic companies and that their tax ratio is not lower than the general tax ratio in any member state of the OECD, any member state of the EEA, any founding state of the EFTA or the Faroe Islands.

Dividends paid to domestic partnerships are subject to 22% withholding tax, and no deduction is allowed.

Withholding tax is imposed on dividends paid to nonresidents. The rate is 20% for companies and 22% for individuals. Tax treaties may reduce or eliminate the dividend withholding tax. Nonresidents from EU, EEA or EFTA states or the Faroe Islands are eligible for a full deduction from dividends received from domestic companies in the same manner as domestic entities. Companies may claim this deduction by filing a tax return. They are accordingly reimbursed for withheld taxes in the general assessment in the following year.

No withholding tax is imposed on distributions by taxable partnerships.

Foreign tax relief. Relief for double taxation may be obtained unilaterally under Icelandic domestic law or under a tax treaty. Unilateral relief may be granted through a tax credit against Icelandic income tax at the discretion of the Director of Internal Revenue.

C. Determination of trading income

General. The computation of taxable income is based on net income in the financial statements prepared according to generally accepted accounting principles. For tax purposes, several adjustments are made, primarily concerning depreciation and write-offs of inventory.

In general, expenses incurred to generate and maintain business income are deductible.

Inventories. Inventories are valued at the lower of cost or market value. Cost must be determined using the first-in, first-out (FIFO) method. Five percent of the value of inventory at the end of the year is deductible.

Tax depreciation. Depreciation must be calculated using either the declining-balance method or the straight-line method. The straight-line method applies to buildings, expendable natural resources and the right of ownership of valuable intellectual properties, including copyright, publishing rights, patent rights and brand rights. The declining-balance method applies to ships, aircraft, vehicles and machinery. Fixed assets cannot be depreciated below

10% of cost. The following are some of the applicable depreciation rates.

Assets	Rate (%)
Buildings	
Office and retail	1 to 3
Industrial plants	3 to 6
Drilling holes and transmission lines	7.5 to 10
Ships, aircraft, cars carrying fewer than nine persons (except taxis)	10 to 20
Automobiles and other transport vehicles	20 to 35
Industrial machinery and equipment	10 to 30
Office equipment	20 to 35
Machinery and equipment for building and construction	20 to 35
Other movable property	20 to 35

The amortization period for goodwill ranges from 5 to 10 years. The amortization period for copyrights, patents, trademarks, designs, models, know-how or similar rights ranges from five to seven years.

Relief for losses. Losses may be carried forward for 10 years. Losses may not be carried back.

Groups of companies. Resident companies may use group consolidation if one company owns at least 90% of the shares in another company or if at least 90% of the shares in a company are owned by companies that are members of the same tax-consolidated group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on most goods sold in Iceland and most services rendered in Iceland	
Higher rate	24
Lower rate for hotels, books and publications, food products, heating of houses and road tolls	11
Social security contributions, paid by the employer on gross payroll	6.6
Commodity tax; on certain goods, including vehicles and fuel	Various

E. Foreign-exchange controls

Iceland abolished the foreign-exchange controls in 2017.

Nonresidents may directly invest in most industries in Iceland, but they must notify Seðlabanki Íslands (the central bank) of such investments. The fishing industry is the principal industry in which investments by nonresidents are limited. Nonresidents may not own a majority in such companies.

F. Treaty withholding tax rates

	Dividends		Interest %	Royalties %

A Qualifying companies.

B Individuals and other companies.

(a) Unless indicated otherwise, the rate applies to corporate shareholders with ownership of at least 10%.

- (b) The lower rate applies to copyrights (except for films and similar items), computer software, patents and know-how concerning industrial, commercial or scientific experience (but not including any such information provided in connection with a rental or franchise agreement). The higher rate applies to other royalties.
- (c) The rate applies to corporate shareholders with ownership of at least 25%.
- (d) These are the rates under the Nordic Convention.
- (e) The lower rate applies to royalties paid for the use of industrial, commercial or scientific equipment.
- (f) A 12% withholding tax is imposed on interest paid to nonresident entities and nonresident individuals unless, on application, the Director of Internal Revenue grants an exemption from withholding tax. Alternatively, the withholding tax may be refunded.
- (g) Royalties paid to nonresidents are subject to withholding tax at a rate of 22%. The net royalties (gross royalties less expenses) are normally included in ordinary income and taxed at the general corporate income tax rate unless a tax treaty provides a reduced rate.
- (h) The lower rate applies to royalties paid for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experiences if they are paid to a resident of the other contracting state that is the beneficial owner of the royalties.
- (i) The higher rate applies to the following:
- Any information concerning industrial, commercial or scientific experience provided in connection with a rental or franchise agreement
 - A trademark associated with an agreement referred to in the first bullet
 - The copyright of a motion picture film or work on film or videotape or other means of reproduction for use in connection with television
- (j) The rate applies if the Russian company owns directly at least 25% of the capital in the Icelandic company and the foreign capital invested exceeds USD100,000.
- (k) Royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes may also be taxed in the country of origin. However, the taxation of such royalties may not exceed 5%. For other royalties, as defined in the treaty, the rate is 0%.
- (l) The higher rate applies to royalties for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes.
- (m) The 0% rate applies to corporate shareholders with ownership of at least 25%. The 5% rate applies if following circumstances exist:
- The company that is the beneficial owner has for a period of six months owned at least 10% of the company's capital, in cases in which the paying company is a resident of Iceland.
 - The company that is the beneficial owner has for a period of six months owned at least 10% of the voting power of the company, in cases in which the paying company is a resident of Japan.

Tax information and exchange agreements are in force with Andorra, Anguilla, Antigua and Barbuda, Aruba, Bahamas, Bahrain, Belize, Bermuda, Botswana, British Virgin Islands, Brunei Darussalam, Cayman Islands, Cook Islands, Dominican Republic, Gibraltar, Grenada, Guernsey, the Hong Kong Special Administrative Region (SAR), Isle of Man, Jersey, Liberia, Liechtenstein, Macau, Marshall Islands, Mauritius, Monaco, Montserrat, the Netherlands Antilles (applicable to the successor jurisdictions of the Netherlands Antilles), Niue, Panama, St. Lucia, Samoa, San Marino, Seychelles, Turks and Caicos Islands, and Uruguay.

A. At a glance

Domestic Company Income Tax Rate (%)	25/30 (a)(b)
Capital Gains Tax Rate (%)	20 (a)(c)
Branch Tax Rate (%)	40 (a)(d)
Withholding Tax (%)	
Dividends	0
Interest	
Paid to Domestic Companies	10 (e)(f)
Paid to Foreign Companies	20 (a)(e)(f)(g)(h)
Royalties from Patents, Know-how, etc.	10 (a)(e)(h)(i)
Technical Services Fees	10 (a)(e)(h)(i)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	8 (j)

- (a) The rates are subject to an additional levy consisting of a surcharge and a cess. They are increased by the following surcharges on such taxes:
- Domestic companies with net income exceeding INR100 million: 12%
 - Foreign companies with net income exceeding INR100 million: 5%
 - Domestic companies with net income exceeding INR10 million: 7%
 - Foreign companies with net income exceeding INR10 million: 2%
- No surcharge is payable if the net income does not exceed INR10 million. The tax payable (inclusive of the surcharge, as applicable) is further increased by a cess levied at 4% of the tax payable. The withholding tax rates are increased by a surcharge for payments exceeding INR10 million made to foreign companies and a cess (see above).
- (b) A reduced tax rate of 25% applies for the 2018-19 fiscal year to companies that had gross turnover not exceeding INR2.5 billion in the 2016-17 fiscal year. In addition, domestic companies set up and registered after 1 March 2016 and engaged in the manufacturing or production of articles or things and research with respect to such articles or things can opt for a concessional tax rate of 25%, subject to the fulfilment of specified conditions.
- (c) See *Capital gains* in Section B.
- (d) For exceptions to this basic rate, see Section B.
- (e) A Permanent Account Number (PAN) is a unique identity number assigned to a taxpayer in India on registration with the India tax authorities. If an income recipient fails to furnish its PAN, tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 20%.
- (f) Interest paid by business trusts is subject to a withholding tax at a rate of 10% for payments to residents and 5% for payments to nonresidents (including foreign companies) plus applicable surcharge and cess (See Section E).
- (g) This rate applies to interest on monies borrowed, or debts incurred, in foreign currency. Withholding tax at a rate of 5% (plus a surcharge of 2% or 5%, as applicable, and a 4% cess) is imposed on interest payments to nonresidents (including foreign companies) with respect to the following:
- Infrastructure debt funds
 - Borrowings made by an Indian company in foreign currency by way of loans between 1 July 2012 and 1 July 2020, infrastructure bonds issued between 1 July 2012 and 1 October 2014 or long-term bonds issued between 1 October 2014 and 1 July 2020, subject to prescribed conditions (for long-term bonds, the lower withholding rate would not be affected if the recipient does not furnish a PAN; see footnote [e] above)
 - Rupee-denominated bonds of an Indian company or a government security issued to a foreign institutional investor or a qualified foreign investor, with respect to interest payable between 1 June 2013 and 1 July 2020

- Monies borrowed by an Indian company from a source outside India through the issuance of rupee-denominated bonds before 1 July 2020
Other interest is taxed at a rate of 40% (plus the surcharge of 2% or 5%, as applicable, and the 4% cess).
- (h) If a recipient of income is located in a Notified Jurisdictional Area (NJA), tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 30% (for further details, see Section E).
- (i) The 10% rate (plus the 2% or 5% surcharge, as applicable, and the 4% cess) applies to royalties and technical services fees paid to foreign companies by Indian enterprises. However, depending on the applicable tax treaty, if the royalties or technical services fees paid under the agreement are effectively connected to a permanent establishment or fixed place of the nonresident recipient in India, the payments are taxed on a net income basis at a rate of 40% (plus the 2% or 5% surcharge, as applicable, and the 4% cess).
- (j) Unabsorbed depreciation may be carried forward indefinitely to offset taxable profits in subsequent years.

B. Taxes on corporate income and gains

Corporate income tax. A domestic company is defined for tax purposes as a company incorporated in India. The definition also includes a company incorporated outside India (foreign company) if the company has made certain arrangements for declaration and payment of a dividend in India. The tax rates in India are specified with reference to a domestic company. As a result, it is possible for a foreign company to be taxed at rates applicable to a domestic company if it has made the necessary arrangements for the declaration and payment of a dividend in India.

A company resident in India is subject to tax on its worldwide income, unless the income is specifically exempt. A company not resident in India is subject to Indian tax on Indian-source income and on income received in India. Depending on the circumstances, certain income may be deemed to be Indian-source income. Companies incorporated in India are resident in India for tax purposes, as are companies incorporated outside India, if their place of effective management in that year is in India. As a result, if the place of effective management of a foreign company is in India, it is subject to tax in India on its worldwide income. If such a foreign company also qualifies as a domestic company (see above), the tax rates applicable to a domestic company apply. The government has issued guidelines for the determination of the place of effective management of a foreign company.

Rates of corporate tax. Domestic companies are subject to tax at a basic rate of 30% (25% for domestic companies that had gross turnover not exceeding INR2.5 billion in the 2016-17 fiscal year). New companies set up and registered on or after 1 March 2016 that are engaged in the manufacturing or production of articles or things and research with respect to such articles or things can opt for a concessional tax rate of 25%, subject to the fulfilment of specified conditions. In addition, a 7% or 12% surcharge (for details regarding the surcharge, see footnote [a] in Section A) and a 4% cess are imposed on the income tax of such companies. Long-term capital gains are taxed at special rates (see *Capital gains*).

For foreign companies, the net income is taxed at 40% plus the 2% or 5% surcharge, as applicable, and the 4% cess. A rate of 10% plus the 2% or 5% surcharge and the 4% cess applies to royalties and technical services fees paid to foreign companies if the royalty or technical services fees agreement is approved by the central government or if it is in accordance with the Industrial Policy. A

rate of 20% (plus the 2% or 5% surcharge and the 4% cess) applies to gross interest from foreign-currency loans or from units of a mutual fund. A lower rate of 5% (plus the 2% or 5% surcharge and the 4% cess) applies to gross interest from foreign-currency borrowings raised by Indian companies or business trusts by way of loans between 1 July 2012 and 1 July 2020, long-term infrastructure bonds issued between 1 July 2012 and 1 October 2014 or long-term bonds issued between 1 October 2014 and 1 July 2020, subject to prescribed conditions. A lower rate of 5% (plus the 2% or 5% surcharge and the 4% cess) also applies to interest payable between 1 June 2013 and 1 July 2020 on rupee-denominated bonds issued by Indian companies and government securities, subject to prescribed conditions. A lower rate of 5% (plus the 2% or 5% surcharge and the 4% cess) applies to interest received from units of business trusts in India (see Section E). A lower rate of 5% (plus the 2% or 5% surcharge and the 4% cess) applies to monies borrowed by Indian companies from a source outside India through the issuance of rupee-denominated bonds before 1 July 2020.

If a nonresident with a permanent establishment or fixed place of business in India enters into a royalty or technical services fees agreement and if the royalties or fees paid under the agreement are effectively connected to such permanent establishment or fixed place, depending on the applicable tax treaty, the payments are taxed on a net income basis at a rate of 40% plus the 2% or 5% surcharge and the 4% cess.

Income from carbon credits. Effective from the 2017-18 fiscal year, income from transfer of carbon credits is taxed at a rate of 10% (plus applicable surcharge and cess) on a gross basis without allowing any expenditure or allowance against such income.

Income from crude oil. The income tax law provides for a tax exemption to foreign companies earning income from the storage of oil in a facility in India and from the sale of crude oil to any person resident in India, under an agreement entered into or approved by the central government. This exemption extends to income accruing or arising to a foreign company from the sale of leftover stock of crude oil from a facility in India after the expiration of agreement or the arrangement with the central government.

Tax incentives. Subject to prescribed conditions, the following tax exemptions and deductions are available to companies with respect to business carried on in India:

- A 10-year tax holiday equal to 100% of the taxable profits is available to undertakings or enterprises engaged in the following:
 - Developing or operating and maintaining or developing, operating and maintaining infrastructure facilities (roads, toll roads, bridges, rail systems, highway projects including housing or other activities that are integral parts of the highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems, solid waste management systems, ports, airports, inland waterways, inland ports or navigational channels in the sea), if development or operation and maintenance of the infrastructure facility begins before 1 April 2017

- Generation or generation and distribution of power if the company begins to generate power at any time during the period of 1 April 1993 through 31 March 2017
- Starting transmission or distribution by laying a network of new transmission or distribution lines at any time during the period of 1 April 1999 through 31 March 2017
- Undertaking substantial renovation and modernization (at least 50% increase in book value of plant and machinery) of an existing network of transmission or distribution lines during the period of 1 April 2004 through 31 March 2017

The company may choose any 10 consecutive years within the first 15 years (10 out of 20 years in certain circumstances) for the period of the tax holiday. Such tax holiday is not available to an undertaking or enterprise that is transferred in an amalgamation or demerger.

- A 10-year tax holiday equal to 100% of profits and gains derived by an undertaking or enterprise that begins the development of a Special Economic Zone (SEZ) notified (through an official publication by the government of India) before 1 April 2017, subject to certain conditions.
- A 10-year tax holiday equal to 100% of taxable profits for the first 5 years and 30% of taxable profits for the next 5 years from the business of processing, preserving and packaging of fruits or vegetables or from the integrated business of handling, storing and transporting food grains. A similar tax holiday is available with respect to profits from the business of processing, preserving and packaging of meat and meat products, poultry or marine or dairy products.
- One hundred percent of the profits derived from the business of developing and building a housing project if approval from the competent authority is obtained during the period of 1 June 2016 through 31 March 2019, subject to fulfilment of other conditions. The size of the plot and residential unit must be within specified limits to qualify for the tax holiday.
- A three-year tax holiday out of seven years with respect to profits derived from a startup business that involves innovation, development, deployment or commercialization of new products, processes or services driven by technology or intellectual property, for domestic companies incorporated between 1 April 2016 and 1 April 2021, subject to other conditions.
- A 15-year tax holiday with respect to profits derived from export activities by units that begin to manufacture or produce articles or things or provide services in SEZs. For the first 5 years of the tax holiday, a tax deduction equal to 100% of the profits derived from the export of articles, things or services provided is available. For the following 5 years, a tax deduction equal to 50% of the profits is available. For the next 5 years, the availability of the deduction is contingent on the allocation of the profits to a specified reserve and the use of such amounts in the prescribed manner. The deduction is capped at 50% of the profits allocated to the reserve.
- A 10-year tax deduction equal to 100% of profits derived from an undertaking that begins the manufacturing or production of specified goods or carries on specified business in northeastern states before 1 April 2017. This deduction is also available if an undertaking manufacturing the specified goods undertakes a substantial expansion that involves an increase in investment in

plant and machinery by at least 25% of the book value of plant and machinery (computed before depreciation).

- A 5-year tax holiday equal to 100% of the profits from the business of collecting and processing or treating of biodegradable waste for either of the following purposes:
 - Generating power or producing biofertilizers, biopesticides or other biological agents
 - Producing biogas or making pellets or briquettes for fuel or organic manure
- A five-year tax holiday equal to 100% of the profits has been introduced, effective from the 2018-19 fiscal year for agricultural produce companies with turnover up to INR1 billion. If they are engaged in the purchase, supply, marketing and processing of agricultural produce from their members, the benefit can be obtained for a period of six years beginning with the 2018-19 fiscal year.
- To encourage employment generation, a 30% deduction is provided for three years for the emoluments paid to new employees (employed for 240 days). This period is reduced to 150 days for apparel manufacturers. Effective from the 2018-19 fiscal year, the benefit extends to companies engaged in the manufacturing of leather and footwear. In addition, if the minimum period of employment is not met in the first year, the deduction is still allowed if the criteria is met in the succeeding year.
- Accelerated deduction of capital expenditure (other than expenditure on the acquisition of land, goodwill or financial instruments) incurred, wholly and exclusively for certain specified businesses in the year of the incurrence of such expense. Expense incurred before the commencement of business is allowed as a deduction on the commencement of the specified business. The following are the specified businesses:
 - Setting up and operating a cold chain facility
 - Setting up and operating a warehousing facility for storage of agricultural produce
 - Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution including storage facilities that are an integral part of such network
 - Building and operating in India a new hotel with a two-star or above category, as classified by the central government
 - Building and operating in India a new hospital with at least 100 beds for patients
 - Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government
 - Developing and building a housing project under a scheme for affordable housing framed by the central or state government in accordance with the prescribed guidelines
 - Producing fertilizers in a new plant or newly installed capacity in an existing plant
 - Setting up and operating an inland container depot or a container freight station notified or approved under the Customs Act
 - Setting up and operating a warehousing facility for storage of sugar
 - Beekeeping and production of honey and beeswax
 - Laying and operating a slurry pipeline for the transportation of iron ore

- Setting up and operating a semiconductor wafer fabrication manufacturing unit notified by the Central Board of Direct Taxes (CBDT; the administrative authority for direct taxes) in accordance with prescribed guidelines
- Developing or maintaining and operating or developing, maintaining and operating a new infrastructure facility

Minimum alternative tax. The minimum alternative tax (MAT) applies to a company if the tax payable by the company on its total income, as computed under the Income Tax Act, is less than 18.5% of its book profit. It is levied at a rate of 18.5% of book profit, plus applicable surcharge and cess (the surcharge, as applicable, is imposed at a rate of 7% or 12% for domestic companies and 2% or 5% for foreign companies, and the cess is imposed at a rate of 4%). The concessional rate of 9% applies in place of the 18.5% rate in the case of a unit located in the International Financial Service Center that derives its income solely in convertible foreign exchange. MAT is levied on companies only and does not apply to firms or other persons, which are separately subject to an alternative minimum tax of 18.5% (plus applicable surcharge and cess). MAT does not apply to a foreign company in the following cases:

- In the case of a foreign company that is resident of a country with which India has entered into a treaty, if such foreign company does not have a permanent establishment in India under the terms of the relevant treaty
- In the case of a foreign company that is resident of a country with which India has not entered into a treaty, if such foreign company does not have a place of business in India under the corporate tax laws of India

In computing book profit for MAT purposes, certain positive and negative adjustments must be made to the net profit shown in the books of account per the applicable accounting standards.

The net profit as per the profit-and-loss account is increased by the following key items:

- Amount of income tax (including dividend distribution tax, any interest charged under the Income Tax Act, surcharge and cess) paid or payable and the provision for such tax
- Amount carried to any reserves
- Amount allocated to provisions for liabilities other than ascertained liabilities
- Amount allocated to provision for losses of subsidiary companies
- Amount of dividend paid or proposed
- Amount of expenditure related to exempt income
- Amount of depreciation
- Amount of deferred tax and the provision for such tax, if debited to the profit-and-loss account
- Amounts set aside as a provision for diminution in the value of any asset
- Amount in revaluation reserve relating to a revalued asset on retirement of the asset
- Expenditure related to a share of the income of an association of persons that is not taxable

- Expenditure of a foreign company related to capital gains on specified securities, interest, royalties or fees for technical services, in certain specified circumstances
- Notional loss on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units allotted by the trust, notional loss resulting from any change in the carrying amounts of such units or loss on the transfer of such units
- Expenditure related to royalty income with respect to patents covered by the Patent Box Regime (see Section E)
- Gain on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units

The net profit is decreased by the following key items:

- Amount withdrawn from any reserves or provisions if such amount is credited in the profit-and-loss account
- Amount of losses carried forward (excluding depreciation) or unabsorbed depreciation, whichever is less, according to the books of account in the case of all companies (except as referred to below)
- The aggregate amount of unabsorbed depreciation and losses brought forward in the case of a company against which an application is admitted under the Insolvency and Bankruptcy Code, 2016
- Profits of “sick” industrial companies, which are companies that have accumulated losses equal to or exceeding their net worth at the end of a financial year and are declared to be sick by the Board for Industrial and Financial Reconstruction
- Income that is exempt from tax
- Amount of depreciation debited to the profit-and-loss account excluding depreciation on account of revaluation of assets
- Amount of deferred tax, if any such amount is credited to the profit-and-loss account
- Amount withdrawn from revaluation reserve and credited to the profit-and-loss account, to the extent that it does not exceed depreciation of the revalued assets
- Share in the income of an association of persons that is not taxable
- Capital gains on certain specified securities, interest, royalties or fees for technical services of a foreign company in specified circumstances
- Notional gain on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units allotted by the trust, notional gain resulting from any change in the carrying amount of such units or gain on the transfer of such units
- Royalty income with respect to patents covered by Patent Box Regime (see Section E)
- Loss on the transfer of shares of a special-purpose vehicle to a business trust in exchange for units

MAT paid by companies can be carried forward and set off against income tax payable in subsequent years under the normal provisions of the Income Tax Act for a period of 15 years. The maximum amount that can be set off against regular income tax is equal to the difference between the tax payable on the total income as computed under the Income Tax Act and the tax that would have been payable under the MAT provisions for that year.

MAT does not apply to income from life insurance businesses.

In addition, it has been clarified with retrospective effect from the 2000-2001 fiscal year that MAT also does not apply to foreign companies whose total income is comprised solely of profits and gains from the operation of ships and aircrafts, exploration and extraction of mineral oils, and civil construction in certain turnkey power projects, which are subject to presumptive basis of taxation under the Income Tax Act.

A report in a prescribed form that certifies the amount of book profits must be obtained from a chartered accountant.

Capital gains

General. The Income Tax Act prescribes special tax rates for the taxation of capital gains. Gains derived from “transfers” of “capital assets” are subject to tax as capital gains and are deemed to be income in the year of the transfer.

“Transfer” and “capital asset” are broadly defined in the Income Tax Act. In addition, shares or interests in foreign entities are deemed to be capital assets located in India if they derive, directly or indirectly, their value substantially from assets located in India. Gains derived from the transfer of such deemed capital assets are deemed to be income in the year of transfer. This provision does not apply to investments held by nonresidents in Foreign Institutional Investors (FIIs) in certain circumstances.

The tax rate at which capital gains are taxable in India depends on whether the capital asset transferred is a short-term capital asset or a long-term capital asset. A short-term capital asset is defined as a capital asset that is held for less than 36 months immediately before the date of its transfer. However, if the capital asset is an equity or preference share in a company or a security (for example, a debenture, bond, government security or derivative) listed on a recognized stock exchange in India, a unit of an equity-oriented mutual fund or a specified zero-coupon bond, a 12-month period replaces the 36-month period. In addition, in the case of shares of a company (other than shares listed on recognized stock exchange in India) and immovable property (land or building or both), a 24-month period replaces the 36-month period. A capital asset that is not a short-term capital asset is a long-term capital asset.

Capital gains on specified transactions on which securities transaction tax has been paid on acquisition as well as on sale. Effective from the 2018-19 fiscal year, long-term capital gains in excess of INR100,000 derived from the transfer of equity shares on which securities transaction tax (STT) has been paid on acquisition as well as on sale of equity shares are chargeable to tax at a rate of 10%. These gains were previously exempt from tax.

Effective from the 2018-19 fiscal year, long-term capital gains in excess of INR100,000 derived from the transfer of units of an equity-oriented fund or units of a business trust on a recognized stock exchange in India on which STT has been paid at the time of such transfer is chargeable to tax at a rate of 10%. The exemption from tax on long-term capital gains on such transfer of listed securities is withdrawn, effective from the 2018-19 fiscal year.

Short-term capital gains derived from the transfer of equity shares in a company, units of an equity-oriented fund or units of a business trust on a recognized stock exchange in India are taxable at a

reduced rate of 15% plus the surcharge, as applicable, and the cess, if STT has been paid on the transaction.

The tax regime described above applies to all types of taxpayers, including FIIs.

Sales of unlisted equity shares that are included in an initial public offer are also subject to STT and are eligible for the aforementioned reduced rates with respect to long-term or short-term capital gains.

Capital gains on transactions on which STT has not been paid. For sales of shares and units of mutual funds that have not been subject to STT and for capital gains derived from the transfer of a capital asset that is not a specified security, the following are the capital gains tax rates (excluding the applicable surcharge and cess).

Type of taxpayer	Short-term capital gains rate (%) (a)	Long-term capital gains rate (%) (a)
Domestic companies	25/30 (b)	20 (c)
FIIs	30	10
Nonresidents other than FIIs	40	20 (c)(d)

- (a) The above rates are subject to a surcharge and cess. The surcharge is levied at a rate of 7% for domestic companies and at a rate of 2% for foreign companies if the net income of the company exceeds INR10 million. The surcharge rate is increased to 12% for domestic companies and 5% for foreign companies if net income exceeds INR100 million. The rate of the cess is 4%.
- (b) See footnote (b) of Section A.
- (c) A concessional rate of 10% (plus surcharge and cess) applies in certain cases, such as the transfer of listed securities, listed units of mutual funds or zero-coupon bonds, subject to certain conditions.
- (d) Gains derived from the transfer of unlisted securities are taxable at a rate of 10%, without the benefit of protection from foreign currency fluctuation and indexation for inflation on the computation of such gains (see discussion below).

Computational provisions. For assets that were acquired on or before 1 April 2001, the market value on that date may be substituted for actual cost in calculating gains. The acquisition cost is indexed for inflation. However, no inflation adjustment is allowed for bonds and debentures. For the purpose of calculating capital gains, the acquisition cost of bonus shares is deemed to be zero. Nonresident companies compute capital gains on shares and debentures in the currency used to purchase such assets, and consequently they are protected from taxation on fluctuations in the value of the Indian rupee. As a result, the benefit of indexation is not available to nonresident companies with respect to the computation of capital gains on shares. If the consideration is not ascertainable or determinable for a transfer, the fair market value of the asset transferred is deemed to be the full value of consideration.

Specific rules apply for the computation of long-term capital gains on the transfer of specified listed securities (equity shares of a company, units of an equity-oriented fund or units of a business trust) on which STT has been paid, as discussed above in *Capital gains on specified transactions on which securities transaction tax has been paid on acquisition as well as on sale.*

If unlisted shares are transferred at a value that is less than fair market value, as prescribed, such fair market value is treated as notional consideration for the transfer of unlisted shares.

Slump sales, demergers and amalgamations. Special rules apply to “slump sales,” “demergers” and “amalgamations” (for a description of amalgamations, see Section C).

A “slump sale” is the transfer of an undertaking for a lump-sum consideration without assigning values to the individual assets and liabilities. The profits derived from such sales are taxed as long-term capital gains if the transferred undertaking has been held for more than 36 months.

Capital gains on a slump sale equal the difference between lump-sum consideration and the net worth of the undertaking. For purposes of computing capital gains, the net worth of the undertaking equals the difference between the value of the total assets (the sum of the tax-depreciated value of assets that are depreciable for income tax purposes and the book value of other assets) of the undertaking or division and the book value of liabilities of such undertaking or division.

With respect to companies, a “demerger” is the transfer of an undertaking by one company (demerged company) to another company (resulting company) pursuant to a scheme of arrangement under Sections 230 to 232 of the Companies Act, 2013, provided that certain conditions are satisfied. Subject to certain conditions, the transfer of capital assets in a demerger is not considered to be a transfer subject to capital gains tax if the resulting company is an Indian company.

In a demerger, the shareholders of the demerged company are issued shares in the resulting company in proportion to their existing shareholdings in the demerged company based on a predetermined share-issue ratio. This issuance of shares by the resulting company to the shareholders of the demerged company is exempt from capital gains tax.

In the case of a demerger of a foreign company, the provisions of Sections 230 to 232 of the Companies Act, 2013 do not apply. In such case, a transfer of shares in an Indian company, or shares in a foreign company that derives its value substantially from assets located in India, by the demerged foreign company to the resulting foreign company is exempt from capital gains tax if the following conditions are satisfied:

- Shareholders holding at least 75% in value of the shares in the demerged foreign company continue to remain shareholders of the resulting foreign company.
- Such transfer does not attract capital gains tax in the country of incorporation of the demerged foreign company.

Like demergers, if certain conditions are satisfied, transfers of capital assets in amalgamations are not considered to be transfers subject to capital gains tax, provided the amalgamated company is an Indian company.

In an amalgamation, shareholders of the amalgamating company are usually issued shares in the amalgamated company in exchange for their existing shareholding in the amalgamating company based on a predetermined share-exchange ratio. Such exchange of shares is exempt from capital gains tax if the following conditions are satisfied:

- The transfer is made in consideration of the allotment of shares in the amalgamated company (unless the shareholder itself is the amalgamated company).
- The amalgamated company is an Indian company.

A transfer of shares in an Indian company or shares in a foreign company that derives its value substantially from assets located in India, in an amalgamation of two foreign companies, is exempt from capital gains tax if the following conditions are satisfied:

- At least 25% of the shareholders of the amalgamating foreign company continue to remain shareholders of the amalgamated foreign company.
- Such transfer does not attract capital gains tax in the country of incorporation of the amalgamating foreign companies.

No capital gains tax applies for the conversion of preference shares to equity. Furthermore, the transfer of rupee-denominated bonds of an Indian company issued outside India from one non-resident to another nonresident does not result in capital gains tax in India.

Gains from conversion of stock-in-trade into a capital asset is taxable as business income in the year of conversion. Business income is computed with reference to the fair market value of the stock-in-trade as of the date of conversion. Consequently, the fair market value is regarded as the cost of acquisition of the converted capital asset. The holding period of such capital asset is calculated from the date of conversion.

Depreciable assets. To compute capital gains on sales of assets on which depreciation has been allowed, the sales proceeds of the assets are deducted from the declining-balance value of the classes of assets (including additions during the year) of which the assets form a part. If the sales proceeds exceed the declining-balance value, the excess is treated as short-term capital gain. Otherwise, no capital gain results from sales of such assets even if the sales proceeds for a particular asset are greater than the cost of the asset.

Non-depreciable assets. For non-depreciable assets, such as land, gains are computed in accordance with the rules described below.

If the asset is held for 36 months or more, the capital gain is considered a long-term capital gain, which equals the net sale consideration less the indexed cost of acquisition. The gain on an asset held for less than 36 months is considered a short-term capital gain, which equals the sale consideration less the acquisition cost. For listed shares, listed securities, equity-oriented units of mutual funds and zero-coupon bonds, a 12-month period replaces the 36-month period. Further, in the cases of shares of a company (other than shares listed on recognized stock exchange in India) and land and buildings or both, a 24-month period replaces the 36-month period.

The transfer of a capital asset by a parent company to its wholly owned Indian subsidiary or the transfer of a capital asset by a wholly owned subsidiary to its Indian parent company is exempt from capital gains tax, subject to the fulfillment of certain conditions.

Administration. The Indian fiscal year runs from 1 April to 31 March. All companies must file tax returns by 30 September or 30 November (for companies undertaking international transactions; see the discussion of transfer pricing in Section E). Tax is payable in advance on 15 June, 15 September, 15 December and 15 March. Any balance of tax due must be paid on or before the date of filing the return. The carryforward of losses for a fiscal year is not allowed if a return is filed late.

A nonresident with a liaison office in India is required to submit a statement in the prescribed form within 60 days after the end of the fiscal year.

Income computation and disclosure standards. The government of India has notified 10 income computation and disclosure standards (ICDS), which are effective for the 2016-17 fiscal year and future years. The ICDS provides a set of rules for computing taxable income under the headings, “profits and gains of business or profession” and “income from other sources” of the Income Tax Act. This applies to all taxpayers following the mercantile system of accounting.

The Income Tax Act provides the following in relation to the application of ICDS with retrospective effect from the 2016-17 fiscal year:

- Mark-to-market losses or expected losses are allowed as deductions from business income to the extent permissible under the ICDS.
- Foreign-exchange fluctuation gains or losses with respect to specified foreign-currency transactions are computed in accordance with the ICDS.
- Profits arising from construction contracts and service contracts are computed using the percentage-of-completion method in accordance with ICDS.
- Inventory valuation rules are in accordance with the ICDS.
- Interest on compensation or enhanced compensation is deemed to be income in the year in which it is received.
- Export incentives or claims for price escalation are taxable in the year in which reasonable certainty of its realization is achieved.
- Subsidies or grants received from the government are taxed on receipt if they were not taxed in an earlier tax year.

ICDS do not affect the maintenance of books of accounts. Consequently, they do not affect the MAT computation.

Withholding taxes. Payments to resident companies are subject to the following withholding taxes:

Type of payment	Rate (%) (a)
Dividends	0
Interest	10 (b)
Commissions from sales of lottery tickets	5
Other specified commissions	5
Payments to contractors	2
Rent	2/10 (c)
Income from lotteries and horse races	30
Professional and technical service fees	10
Royalties	10

Type of payment	Rate (%) (a)
Payments of compensation to residents for the compulsory acquisition of certain immovable property	10
Payment of consideration for transfer of immovable property	1

(a) If an income recipient fails to furnish its PAN, tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 20%.

(b) See footnote (f) in Section A.

(c) The withholding tax rate for rental payments is 10%. For equipment rental, the rate is 2%.

Payments to nonresident companies are subject to the following withholding taxes.

Type of payment	Rate (%) (a)(b)(c)
Dividends	0
Interest on foreign-currency loans	20 (d)
Royalties and technical services fees	10 (e)
Rent	40
Income from lotteries and horse races	30
Long-term capital gains other than exempt gains	20
Other income	40

(a) The 2% or 5% surcharge (applicable to payments made to foreign companies exceeding INR10 million or INR100 million, respectively) and the 4% cess are imposed on the above withholding taxes.

(b) If the income recipient fails to furnish a PAN to the payer, tax must be withheld at the higher of the following rates:

- Rate specified in the relevant provision of the Income Tax Act
- Tax treaty rate
- 20%

(c) If the recipient of income is located in an NJA, tax must be withheld at the higher of the rate specified in the relevant provision of the Income Tax Act and 30% (see Section E).

(d) See footnotes (f) and (g) in Section A.

(e) See footnote (i) in Section A.

Dividends. Dividends paid by domestic companies are exempt from tax in the hands of the recipients. However, domestic companies must pay a dividend distribution tax (DDT) at a rate of 20.56% (basic rate of 15% on the gross amount of dividend payable plus the 12% surcharge and the 4% cess) on dividends declared, distributed or paid by them. A company that is a unit located in International Financial Service Center is not liable to pay DDT for any dividends declared after 1 April 2017. The DDT paid is a nondeductible expense.

Loans and advances granted by closely held companies to specified persons qualify as deemed dividends subject to DDT in the hands of the company (instead of the shareholder or concern) at a rate of 34.94% (basic rate of 30% plus 12% surcharge and 4% cess). This applies to loans and advances granted from the 2018-19 fiscal year onward.

The amount of dividends (on which DDT is leviable) that are paid by a domestic company can be reduced by the amount of dividends received from its subsidiary on which the subsidiary has paid DDT, subject to the satisfaction of prescribed conditions.

Gross dividends received by a domestic company from a specified foreign company (in which it has shareholding 26% or more) are taxable at a concessional rate of 15% (plus applicable surcharge and cess).

Dividends received by an Indian company from a foreign company in which the Indian company has a shareholding of more than 50% can be set off against subsequent dividends paid by the Indian company to its shareholders on which DDT is payable, subject to conditions.

Effective from the 2017-18 fiscal year, for the purpose of the computation of the deemed dividend in the hands of an amalgamated (or resulting) company, the accumulated profits or loss is increased by the accumulated profits of the amalgamating company as of the date of amalgamation (regardless of whether it is capitalized).

Buyback tax. The buyback of unlisted shares by an Indian company is subject to buyback tax at a rate of 20% plus surcharge of 12% and cess of 4%, resulting in effective tax rate of 23.29%. The tax is computed on the difference between the price at which shares are bought back and the consideration received by the company for issuance of shares. The amounts received are exempt in the hands of the shareholders.

Foreign tax relief. Foreign tax relief for the avoidance of double taxation is governed by tax treaties with several countries. If no such agreements exist, resident companies may claim a foreign tax credit for the foreign tax paid under domestic law provisions. The amount of the credit is the lower of the Indian tax payable on the income that is taxed twice and the foreign tax paid as per the applicable tax treaty. Treaty benefits and relief are available only if a nonresident taxpayer obtains a tax-residency certificate indicating that it is resident in a country outside India. This certificate must be issued by the government of that country. In addition to obtaining the certificate, taxpayers must maintain certain prescribed documents and information. The Indian government has issued rules for the administration and computation of the tax credit in India. The rules also include provisions for compliance and reporting that must be undertaken to claim the tax credit in India.

C. Determination of trading income

General. Business-related expenses are deductible; capital expenditures (other than on scientific research in certain cases) and personal expenses may not be deducted.

Certain expenses on which taxes are required to be withheld are not allowable as deductions until the required taxes have been withheld and paid to the government. In the case of amounts paid to residents, such disallowance is limited to 30% of the expenses; in the case of amounts paid to nonresidents, the entire amount is disallowed. The deductibility of head-office expenses for non-resident companies is limited.

Expenses that are paid to a person in cash (that is, otherwise than through a banking channel) are disallowed if they exceed the value of INR10,000 in a day.

Income derived from operations with respect to mineral oil, and certain other income derived by nonresidents (for example, from shipping business, operation of aircraft and turnkey power projects) are taxed on a deemed-profit basis. Under an optional tonnage tax scheme, shipping profits derived by Indian shipping companies are taxed on a deemed basis.

Inventories. In determining trading income, inventories may, at the taxpayer's option, be valued either at cost or the lower of cost or replacement value. The last-in, first-out (LIFO) method is not accepted. Refer also to ICDS for the valuation of inventories for the computation of income of certain taxpayers.

Provisions. Provisions for taxes (other than income tax, dividend distribution tax and wealth tax, which are not deductible expenses) and duties, bonuses, leave salary and interest on loans from financial institutions and scheduled banks are not deductible on an accrual basis unless payments are made before the due date of filing of the income tax return. If such payments are not made before the due date of filing of the income tax return, a deduction is allowed only in the year of actual payment. General provisions for doubtful trading debts are not deductible until the bad debt is written off in the accounts, but some relief is available for banks and financial institutions with respect to nonperforming assets. Interest payable on loans, borrowings or advances that is converted into loans, borrowings or advances may not be claimed as a deduction for tax purposes.

Depreciation allowances. Depreciation is calculated using the declining-balance method and is allowed on classes of assets. Depreciation rates vary according to the class of assets. The following are the general rates.

Asset	Rate (%)
Plant and machinery	15*
Motor buses, motor lorries and motor taxis used in a rental business	30
Motor cars other than those used in the business of running them on hire	15
Buildings	10
Furniture and fittings	10

* Subject to the fulfillment of prescribed conditions, accelerated depreciation equal to 20% of the actual cost is allowed in the first year with respect to plant and machinery (other than ships or aircraft) acquired or installed after 31 March 2005. Accelerated depreciation is allowed at the rate of 35% to an undertaking or manufacturing enterprise set up in notified areas (in the states of Andhra Pradesh, Bihar, Telangana or West Bengal) on or after 1 April 2015 but before 1 April 2020. Additions to plant and machinery that are used for less than 180 days in the year in which they are acquired and placed in service qualify for accelerated depreciation in that year at one-half of the above rates. The balance of accelerated depreciation is allowed in the subsequent year.

Depreciation is also allowed on intangibles, such as know-how, patents, copyrights, trademarks, licenses, franchises or other similar commercial rights. These items are depreciated using the declining-balance method at a rate of 25%.

Special rates apply to certain assets, such as 40% for computers and computer software, energy-saving devices, and air or water pollution-control equipment (effective from the 2017-18 fiscal year). Previously, the depreciation rates were 60%, 80% and 100%. Additions to assets that are used for less than 180 days in the year in which they are acquired and placed in service qualify for depreciation in that year at one-half of the normal rates. On the sale or scrapping of an asset within a class of assets, the declining-balance value of the class of assets is reduced by the sales proceeds (for details concerning the capital gains taxation of such a sale, see Section B).

Companies engaged in power generation or power generation and distribution may elect to use the straight-line method of depreciation at specified rates.

If payment for the acquisition of asset is made in cash and it exceeds INR10,000 in aggregate in a day, such payment is not considered in determining the actual cost of asset and depreciation on the asset is not available, effective from the 2017-18 fiscal year.

Investment allowances. An additional deduction of 15% of the cost of new plant and machinery (other than ships, aircraft, computers, computer software and vehicles) is allowed to companies engaged in the business of manufacturing or production of articles or things that acquire and install new plant and machinery between 1 April 2014 and 31 March 2017 if their aggregate expenditure on such new plant and machinery exceeds INR250 million.

In addition to the above, a further additional deduction of 15% is available to an undertaking set up between 1 April 2015 and 31 March 2020 that is engaged in the business of manufacturing or production of articles or things in notified backward areas in the states of Andhra Pradesh, Bihar, Telangana or West Bengal and that acquires and installs new plant and machinery (other than ships, aircraft, computers, computer software and vehicles) between 1 April 2015 and 31 March 2020.

Relief for losses. Business losses, excluding losses resulting from unabsorbed depreciation of business assets (see below), may be carried forward to be set off against taxable income derived from business in the following eight years, provided the income tax return for the year of loss is filed on time.

For closely held corporations, a 51% continuity of ownership test must also be satisfied. This restriction does not apply to start-up companies. Start-up companies, defined in the income tax law as those in which the public does not hold a substantial interest, are eligible to carry forward and set off losses of the first seven years beginning from the year of incorporation, as long as the shareholders who held shares carrying voting power in the year of the loss continue to hold those shares in the setoff year. Effective from the 2017-18 fiscal year, the restriction does not apply to companies in which change in the shareholding takes place pursuant to an approved resolution process under the Insolvency and Bankruptcy Code, 2016.

Unabsorbed depreciation may be carried forward indefinitely to be set off against taxable income of subsequent years.

Losses under the heading “Capital Gains” (that is, resulting from transfers of capital assets) may not be set off against other income, but may be carried forward for eight years to be set off against capital gains. Long-term capital losses may be set off against long-term capital gains only.

Losses from “House Property” are eligible for setoff from other types of income to the extent of INR200,000 for all types of properties including self-occupied, let out or deemed to be let out. The balance of the unabsorbed loss can be carried forward for eight years.

Amalgamations and demergers. Special rules apply to “amalgamations” and “demergers” (for a description of a “demerger,” see Section B). With respect to companies, an “amalgamation” is the merger of one or more companies with another company or the merger of two or more companies to form one company (the company or companies that merge are referred to as the “amalgamating company or companies” and the company with which they merge, or which is formed as a result of the merger, is known as the “amalgamated company”) that meet certain specified conditions.

An amalgamated company may claim the benefit of the carryforward of business losses and unabsorbed depreciation of the amalgamating companies if the following conditions are satisfied:

- Shareholders holding at least 75% of the shares of the amalgamating company become shareholders of the amalgamated company.
- The amalgamating company owns an industrial undertaking, a ship or a hotel.
- The amalgamating company has been engaged in business for at least three years and incurred the accumulated business loss or unabsorbed depreciation during such period.
- As of the date of amalgamation, the amalgamating company has continuously held at least 75% of the book value of the fixed assets that it held two years before the date of the amalgamation.
- At least 75% of the book value of fixed assets acquired from the amalgamating company is held continuously by the amalgamated company for a period of five years.
- The amalgamated company continues the business of the amalgamating company for at least five years from the date of amalgamation.
- Additional specified conditions apply to ensure that the amalgamation is for genuine business purposes.

In the event of non-compliance with any of the above conditions, any business losses carried forward and unabsorbed depreciation that has been set off by the amalgamated company against its taxable income is treated as income for the year in which the failure to fulfill any of the above conditions occurs.

Groups of companies. The income tax law does not provide for the consolidation of income or common assessment of groups of companies. Each company, including a wholly owned subsidiary, is assessed separately.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Equalisation Levy; deducted from payments made to nonresidents that do not have a permanent establishment in India for the rendering of specified services to residents of India; specified services include online advertisements, provision for digital advertising space, or any other facilities or services for the purpose of online advertisements	6
Securities Transaction Tax (STT); payable on transactions in equity shares, derivatives, units of an equity-oriented mutual funds and units of business trusts on a recognized stock exchange; the tax is imposed on the value of the transaction and varies according to the type of transaction	
Delivery-based transactions in equity shares or in units of equity-oriented funds	
Buyer	
Shares	0.1
Units	Nil
Seller	
Shares	0.1
Units	0.001
Sale of units of equity-oriented funds to mutual funds; tax paid by seller	0.001
Non-delivery-based transactions in equity shares or in units of an equity-oriented fund; tax paid by seller	0.025
Sale of derivatives	
Sale of option (seller); rate applied to option premium	0.05
Sale of option when option is exercised (buyer); rate applied to settlement price	0.125
Sale of futures (seller)	0.01
Sale of unlisted equity shares under offer for sale to public	0.2
Sale of units of a business trust (delivery-based)	
Tax paid by buyer	0.1
Tax paid by seller	0.1
Sale of units of a business trust (non-delivery-based); tax paid by seller	0.025
Commodities transaction tax	
Sale of commodities derivatives; tax paid by seller	0.01
Sale of an option on commodity derivative	
Tax paid by buyer	0.0001
Tax paid by seller	0.05
Goods and Services Tax (GST); on the supply of goods and services; levied by the central government or state government	Various

Nature of tax	Rate (%)
Customs duty and GST; on goods imported into India; levied by the central government	Various
Stamp duties; levied by each state on specified documents and transactions, including property transfers	Various
Social security contributions; paid by the employer for medical insurance plans for certain categories of employees and for minimum retirement benefit plans	Various

E. Miscellaneous matters

Foreign-exchange controls. All cross-border transactions with non-residents are subject to foreign-exchange controls contained in the Foreign Exchange Management Act. The rupee is fully convertible for trade and current account purposes. Except for certain specified restrictions, foreign currency may be freely purchased for trade and current account purposes. In general, such purchases must be made at the market rate. Capital account transactions are not permitted unless they are specifically allowed and the prescribed conditions are satisfied. Cross-border transactions that are specifically allowed include the following:

- All remittances abroad that require prior approval arrangements, such as joint venture and technical collaboration agreements.
- The remittance of interest, dividends, service fees and royalties.
- Repatriation of capital is also freely permitted for investment approved on a repatriable basis. However, for sales of Indian assets, the terms of sale require the approval of the exchange-control authorities, and certain other conditions must be satisfied.

On 7 November 2017, the Reserve Bank of India released guidelines on the simplification and consolidation of foreign-investment regulations applicable in India.

Transfer pricing. The Income Tax Act includes detailed transfer-pricing regulations. Although the guidelines are broadly in line with the principles set out by the Organisation for Economic Co-operation and Development (OECD), key differences exist.

Under these regulations, income and expenses, including interest payments, with respect to international transactions between two or more associated enterprises (including permanent establishments) must be determined using arm's-length prices. The transfer-pricing regulations also apply to, among other transactions, cost-sharing arrangements, certain capital-financing transactions, business restructurings or reorganizations and dealings in intangibles.

The transfer-pricing regulations contain definitions of various terms, including "associated enterprise," "arm's-length price," "enterprise," "international transaction" and "permanent establishment." It specifies methods for determining the arm's-length price. The following are the specified methods:

- Comparable uncontrolled price method
- Resale price method
- Cost-plus method
- Profit split method
- Transactional net margin method

- Any other method that takes into account the price that has been charged or paid or would have been charged or paid, in the same or a similar uncontrolled transaction, with or between non-associated enterprises, under similar circumstances, considering all the relevant facts

The CBDT has issued regulations for applying these methods to determine arm's-length prices. In addition, the CBDT has issued safe-harbor rules indicating the circumstances in which tax officers accept transfer prices declared by taxpayers. The safe harbor rules for determining transfer prices apply for five years beginning with the 2012-13 fiscal year.

On 7 June 2017, the government announced revised safe-harbor rules with an objective to reduce transfer-pricing litigation for eligible taxpayers. The new rules extend the applicability to an additional category of international transaction (low-value-adding intra-group services) and they also revise the applicable prices or margins that would be accepted as arm's length. The safe-harbor provisions are now extended to the 2018-19 fiscal year with certain modifications in thresholds for eligible international transactions. For the 2016-17 fiscal year, the taxpayer can opt for safe harbors under the old rules or the amended rules, whichever are more beneficial.

The transfer-pricing regulations require each person entering into an international transaction to maintain prescribed documents and information regarding a transaction. Each person entering into an international transaction must arrange for an accountant to prepare a report and furnish it to the Tax Officer by the due date for filing the corporate tax return, which is 30 November in such circumstances.

A tax officer may make an adjustment with respect to an international transaction, if the officer determines that certain conditions exist, including any of the following:

- The price is not at arm's length.
- The prescribed documents and information have not been maintained.
- The information or data on the basis of which the price was determined is not reliable.
- Information or documents requested by the Tax Officer have not been furnished.

Stringent penalties (up to 2% of the transaction value) are imposed for non-compliance with the procedural requirements and for understatement of profits.

Measures allowing Advance Pricing Agreements (APAs) are effective from July 2012. Under these measures, the tax administration may enter into an APA with any person undertaking an international transaction. APAs are binding on the taxpayer and the tax authorities (provided no change in law and facts) and are valid for a maximum period of five consecutive years. The APA scheme provides for a "rollback" mechanism, which is subject to prescribed conditions and procedures. Under the "rollback" mechanism, an APA covering a future period may also be applied to international transactions entered into by a taxpayer during the periods (not exceeding four years) preceding the first year for which the APA is applicable.

Transfer-pricing measures apply to certain transactions involving profit-linked tax-holiday units.

Secondary adjustments. The Income Tax Act provides for a secondary-adjustment regime to ensure that profit allocation between associated enterprises is consistent with the primary transfer-pricing adjustment. Under the secondary-adjustment regime if, as a result of the primary adjustment to the transfer price, the total income or reduction of loss of taxpayer is increased and the excess money that is available to the associated enterprise is not repatriated to India within a prescribed time, such excess money is deemed to be an advance made by the taxpayer to such associated enterprise, resulting in notional taxation of interest on such advance, effective from the 2017-2018 fiscal year. The provision does not apply if the primary adjustment is less than INR10 million and if it is made for the 2015-16 fiscal year or earlier years.

Country-by-Country Reporting, Master File and Local File. The Income Tax Act provides a specific regime with respect to Country-by-Country Reporting (CbCR), the Master File and the Local File in line with OECD's final report on Base Erosion Profit Shifting (BEPS) Action 13. The reporting provisions apply for the 2016-17 fiscal year if consolidated revenue of an international group in the prior year (that is, the 2015-16 fiscal year) exceeds the prescribed limit. The parent entity of the international group must file the CbCR if such parent entity is a resident of India. In other cases, every constituent entity of such group that is a resident of India must file the CbCR. It has also been clarified that an Indian constituent entity (with a nonresident parent) is now required to file the CbCR in India even if the parent entity has no obligation to file such report in its home jurisdiction. The government has recently issued rules for the implementation of the above requirements that contain a few administrative changes and clarifications. The rules prescribe a monetary threshold, based on cumulative conditions of consolidated revenue and the value of international transactions, for maintenance of the Master File.

The due date for the filing of the Master File in the first year (that is, the 2016-17 fiscal year) is extended to 31 March 2018. For subsequent years, the Master File needs to be filed on or before the due date for filing of the income tax return in India. Effective from the 2016-17 fiscal year, the time allowed for filing the CbCR is 12 months from the end of reporting accounting year for the parent entity and alternate reporting entity (ARE) resident in India. In addition, the due date for filing the CbCR by an overseas ARE is the due date specified by the country or territory of which the ARE is a resident. For a constituent resident entity that is required to furnish CbCR details in certain circumstances, the due date will be prescribed.

Debt-to-equity rules. India does not currently impose mandatory capitalization rules. However, banks and financial corporations must comply with capital adequacy norms. In addition, foreign-exchange regulations prescribe that the debt-to-equity ratio should not exceed 4:1 in the case of borrowings beyond a certain limit from certain nonresident lenders.

Limitation on interest deduction. In line with the recommendations of OECD's BEPS Action 4, the Income Tax Act provides a specific provision to limit interest deduction exceeding INR10 million. A deduction claimed by an Indian company or a permanent establishment of a foreign company in India with respect to interest expenditure regarding any debt issued by a nonresident that is an associated enterprise of the taxpayer is subject to disallowance. Disallowance is restricted to the lower of total interest paid or payable in excess of 30% of earnings before interest, taxes, depreciation and amortization (EBIDTA) or interest paid or payable to the associated enterprise. Interest disallowed can be carried forward to the following eight fiscal years to be set off against taxable income of any business or profession in a subsequent year. A deduction in a subsequent year is also subject to the limitation of 30% of EBITDA. Such limitation does not apply to the banking and insurance sector.

General Anti-avoidance Rules. The Income Tax Act includes General Anti-avoidance Rules (GAAR), which will be effective from 1 April 2017. The GAAR are broad rules that are designed to deal with aggressive tax planning. Wide discretion is provided to the tax authorities to invalidate an arrangement, including the disregarding of the application of tax treaties, if an arrangement is treated as an "impermissible avoidance arrangement." The central government has issued clarifications for the implementation of the GAAR.

Notified Jurisdictional Area. The Income Tax Act contains a "tool box" to deal with transactions with entities located in noncooperative countries or jurisdictions that do not exchange information with India. The government of India is empowered to notify such jurisdiction as a Notified Jurisdiction Area (NJA). The government discourages transactions by taxpayers in India with persons located in an NJA by providing onerous tax consequences with respect to such transactions. The consequences include applicability of transfer-pricing regulations, additional disclosure and compliance requirements, disallowance of deductions in some circumstances and higher withholding tax rates on transactions with a person located in an NJA. Previously Cyprus was notified as an NJA, effective from 1 November 2013. Such notification was withdrawn with retrospective effect, under an amendment to the India-Cyprus double tax treaty. No other jurisdiction is notified as an NJA.

Business trusts. The Income Tax Act contains a specific taxation regime for the taxability of income from business trusts (real estate investment trusts and infrastructure investment trusts). This is a new category of investment vehicles for acquiring control or interests in Indian special-purpose vehicles for investments in the real estate or infrastructure sector. Units of business trusts can be listed on recognized stock exchange and can be subscribed by residents and nonresident investors (including foreign companies). Business trusts can also avail themselves of external commercial borrowings from nonresident investors (including foreign companies). Business trusts are granted pass-through status for purposes of taxation. Distributions of dividend income from business trusts are exempt in the hands of investors. For further details, see footnote (f) in Section A and *Rates of corporate tax* and *Capital gains* in Section B.

Patent Box Regime. The Income Tax Act contains the Patent Box regime, which is a specific taxation regime for the taxability of royalty income earned by a patentee resident in India with respect to a patent developed and registered in India. Such royalty income is taxable at the rate of 10% on the gross amount without any allowance or deduction for any expenditure. For these purposes, royalty income includes consideration for any of the following:

- Transfer of all or any rights with respect to a patent
- Imparting of any information concerning the working of, or the use of, a patent
- The use of any patent
- Rendering of any services in connection with any of these activities

Foreign portfolio investors. The Income Tax Act provides a safe-harbor regime for onshore management of offshore funds, thereby neutralizing the impact of the constitution of business connection, permanent establishment or tax residence for offshore funds in India. Under this regime, on the fulfillment of certain conditions, these funds can qualify as an eligible investment funds (EIFs) or eligible fund managers. Investment funds set up by a Category I or Category II foreign portfolio investor registered with the Securities and Exchange Board of India are not required to satisfy the investor diversification conditions to qualify as an EIF. Benefits under the safe-harbor regime are available only if the investment fund is established in a country on a specified list.

Discouraging cash transactions. The income tax law prohibits receipt in cash of an amount exceeding INR200,000 on or after 1 April 2017, in a day, with respect to a single transaction spread over many days or with respect to an event.

Significant economic presence. From the 2018-19 fiscal year, the Income Tax Act introduces the concept of significant economic presence (SEP). This concept expands the scope of a “business connection” in India that results in the taxation of business income of nonresidents in India. SEP is a new nexus test primarily targeted to tax business models in the digital economy and is based on the options elucidated in the OECD’s BEPS Report on Action 1. The SEP rule is in addition to the equalization levy in India (see Section D).

According to the Income Tax Act, SEP is defined to mean the following:

- Any transaction with respect to any goods, services or property carried out by a nonresident in India, including the providing of a download of data or software in India, if the aggregate of payments arising from such transaction or transactions during the tax year exceed the amount as may be prescribed
- Systematic and continuous soliciting of its business activities or engaging in interaction with such number of users as may be prescribed, in India, through digital means

Any income attributable to SEP is taxable in India. Rules on the thresholds for creating SEP have not yet been prescribed.

Gift taxation. The Income Tax Act levies tax on any taxpayer who is in receipt of money in excess of INR50,000 or immovable

property that has a value in excess of INR50,000, without consideration or for an inadequate consideration. Property is considered to be acquired for an inadequate consideration if the difference between the specified value of property and the consideration paid exceeds INR50,000. Specific valuation rules apply to determine the taxable income in the hands of the recipient. Also, effective from the 2018-19 fiscal year, the gift taxation does not apply to the transfer of a capital asset by a holding company to its wholly owned Indian subsidiary (or vice versa) if the transferee company (recipient) is an Indian company.

F. Treaty withholding tax rates

Under the Income Tax Act, Indian companies are required to pay DDT (see Section B) at an effective tax rate of nearly 20.36% (base rate of 15% on gross amount plus a surcharge of 12% and an education cess of 4%) on dividends declared, distributed or paid by it. Such dividends are exempt from tax in the hands of the recipients. Accordingly, the relevant treaty rates for dividends are not captured in the table below.

Tax rates specified under the Income Tax Act are increased by a surcharge and cess. See footnote (a) and (c) below for tax rates under the Income Tax Act on outbound payments of interest and royalties, respectively. In general, if the relevant treaty specifies the same or lower rate for withholding, these treaty rates, which are more beneficial for the nonresident recipient, may be applied. In addition, these tax rates need not be increased by the surcharge and cess. To claim treaty benefits, the nonresident recipient must obtain a Tax Residency Certificate indicating that it is a resident of that country or specified territory. This certificate is issued by the government of such country or territory. The nonresident recipient is also required to provide certain information and documents to substantiate its eligibility to claim treaty benefits.

The following table presents the treaty rates on outbound payments of interest and royalties to jurisdictions that have entered into tax treaties with India.

	Dividends	Interest (a)(b)	Approved royalties (c)(d)
	%	%	%

- (a) A 20% rate applies if the relevant tax treaty provides for unlimited taxation rights for the source country on interest income. Under the Income Tax Act, the 20% rate applies with respect to interest on monies borrowed or debts incurred in foreign currency by an Indian concern or the government. If the recipient is a foreign company, this rate is increased by a surcharge of 2% (when the aggregate income exceeds INR10 million) or 5% (when the aggregate income exceeds INR100 million) and is further increased by an education cess of 4% (on income tax and surcharge). A special reduced rate of 5% applies under certain specified circumstances (see footnote [f] in Section A). In other cases, depending on whether the recipient is a corporate entity, a tax rate of 30% or 40% applies. These tax rates are increased the applicable surcharge and cess.
- (b) A reduced rate of 0% to 10% generally applies under a tax treaty if interest payments are made to local authorities, political subdivisions, the government, banks, financial institutions or similar organizations. A reduced rate may also apply if the lender holds a certain threshold of capital in the borrower. The text of the relevant tax treaty needs to be examined.
- (c) Under the Income Tax Act, a 10% rate applies if the relevant tax treaty provides for unlimited rights for the source country to tax royalties (the rate is increased by the surcharge and cess) and if the payment is made by the government of India or an Indian concern. In other cases, as mentioned in footnote (a) above, a tax rate of 30% or 40% applies. These rates are increased by the applicable surcharge and cess.
- (d) The rate provided under the relevant tax treaty applies to royalties not effectively connected with a permanent establishment in India. Also, in some of India's tax treaties, such as with Australia, Canada, Spain, the United Kingdom and the United States, a separate rate of 10% is specified for equipment royalties. Similarly, under India's tax treaty with Bulgaria, a 15% rate applies to copyright royalties other than cinematographic films or films and tapes used for radio or television broadcasting. In addition, many of India's tax treaties also provide for withholding tax rates for technical services fees. In most cases, the rates applicable to royalties also apply to the technical services fees. The text of the relevant tax treaty needs to be examined to determine the relevant scope and rate. Effective from the 2017-18 fiscal year, no withholding tax is imposed on payments made by National Technical Research Organization in India.
- (e) A more restrictive scope of the definition of royalties or interest and/or a reduced rate may be available under the most-favored-nation clause in the relevant tax treaty.

- (f) A reduced rate of 10% applies in the event of notifications issued by the government of India that give effect to the most-favored-nation clauses in these tax treaties.
- (g) This treaty applies to the Slovak Republic.
- (h) An increased rate of 25% applies to trademark royalties.
- (i) A protocol amending the tax treaty with Mauritius was signed on 10 May 2016 and is effective in India from 1 April 2017. The protocol provides for a withholding tax rate of 7.5% on interest and 15% on royalties.
- (j) A revised tax treaty with Kenya entered into force on 30 August 2017. The revised treaty is effective in India from 1 April 2018. The rates under the revised treaty are reflected in the table.
- (k) In the first five years in which this treaty is in effect, a 15% rate applies to royalties if the payer is the government of the contracting state, a political subdivision or a public sector company and a 20% rate applies for other payers. For subsequent years, a 15% rate applies in all cases.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	– (b)
Withholding Tax (%)	
Dividends	10/15/20 (c)
Interest	15/20 (c)
Royalties from Patents, Know-how, etc.	15/20 (c)
Rent	
Land or Buildings	10 (d)
Other Payments for the Use of Assets	2 (e)
Fees for Services	
Payments to Residents	
Technical, Management and Consultant Services	2 (e)
Construction Contracting Services	2/3/4 (f)
Construction Planning and Supervision	4/6 (f)
Other Services	2 (e)
Payments to Nonresidents	20 (g)
Branch Profits Tax	20 (h)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 to 10 (i)

- (a) This rate also applies to Indonesian permanent establishments of foreign companies. See Section B.
- (b) See Section B for details concerning the taxation of capital gains.
- (c) A final withholding tax at a rate of 20% is imposed on payments to nonresidents. Tax treaties may reduce the tax rate. Certain dividends paid to residents are exempt from tax if prescribed conditions are satisfied. If the exemption does not apply, a 15% withholding tax applies on dividends paid to tax resident companies and a 10% final withholding tax applies to dividends paid to tax resident individuals. A 15% withholding tax is imposed on interest paid by non-financial institutions to residents. Interest paid by banks on bank deposits to residents is subject to a final withholding tax of 20%.
- (d) This is a final withholding tax imposed on gross rent from land or buildings.

- (e) This tax is considered a prepayment of income tax. It is imposed on the gross amount paid to residents. An increase of 100% of the normal withholding tax rate is imposed on taxpayers subject to this withholding tax that do not possess a Tax Identification Number.
- (f) This tax is considered a final tax. The applicable tax rate depends on the type of service provided and the “qualification” of the construction companies. The “qualification” is issued by the authorities with respect to the business scale of a construction company (that is, small, medium or large).
- (g) This is a final tax imposed on the gross amount paid to nonresidents. The withholding tax rate on certain types of income may be reduced under double tax treaties.
- (h) This is a final tax imposed on the net after-tax profits of a permanent establishment. The rate may be reduced under double tax treaties. The tax applies regardless of whether the income is remitted. An exemption may apply if the profits are reinvested in Indonesia.
- (i) Losses incurred by taxpayers engaged in certain businesses or incurred in certain areas may be carried forward for up to 10 years (see Section B).

B. Taxes on corporate income and gains

Corporate income tax. Companies incorporated or domiciled in Indonesia are subject to income tax on worldwide income. Foreign tax may be claimed as a tax credit subject to a limitation rule (see *Foreign tax relief*). Branches of foreign companies are taxed only on those profits derived from activities carried on in Indonesia. However, income accruing from Indonesia to a foreign company having a permanent establishment in Indonesia is taxed as income of the permanent establishment if the business generating the income is of a similar nature to the business of the permanent establishment. This is known as the “force of attraction” principle.

Rates of corporate tax. Corporate tax is imposed at a flat rate of 25%. This rate applies to Indonesian companies and foreign companies operating in Indonesia through a permanent establishment. The tax rate is reduced by five percentage points for listed companies that have at least 40% of their paid up capital traded on the stock exchange. Small and medium-scale domestic companies (that is, companies having gross turnover of up to IDR50 billion) are entitled to a 50% reduction of the tax rate. The reduced rate applies to taxable income corresponding to gross turnover of up to IDR4.8 billion.

Branch profit tax. The net after-tax profits of a permanent establishment are subject to branch profit tax at a rate of 20%. This rate may be reduced under a double tax treaty. Branch profit tax applies regardless of whether the income is remitted to the head office. An exemption may apply if the profits are reinvested in Indonesia.

Tax incentives

Tax Allowance Incentive. Tax incentives under the Tax Allowance Incentive are granted to certain qualifying resident companies investing in certain types of businesses or regions. The Tax Allowance Incentive consists of the following:

- Accelerated depreciation and amortization.
- Extended period of 10 years for the carryforward of a tax loss (normally 5 years), subject to certain conditions.
- Reduced tax rate of 10% (or lower rate under a double tax treaty) for dividends paid to nonresidents.
- Investment allowance in the form of reduction of net income by 30% of the amount invested in land and buildings, and plant and

equipment. This allowance is claimed at a rate of 5% each year over a six-year period.

To qualify for the above tax incentives, the investment must be a new investment or an investment for the purpose of expanding a current business. Under a government regulation, 71 categories of business sectors and 74 other categories of industries in certain areas may qualify for the tax incentives. The designated areas and provinces are generally outside Java. They are primarily the north-eastern provinces and provinces located in Sulawesi.

Certain restrictions apply to the use and transfer of fixed assets that benefit from the incentives. These restrictions apply for the first six years of commercial production or for the prescribed useful life of the assets for tax purposes. The incentives are revoked with a penalty if these rules are violated. Implementation of the government regulation is evaluated within two years from the date on which the approval is granted. A monitoring team is established for this purpose.

Tax Holiday Incentive. Certain taxpayers engaged in a “pioneer industry” may seek a tax incentive commonly known as the Tax Holiday Incentive, which was introduced in 2011 and renewed in November 2018. The Tax Holiday Incentive offers 50% and 100% corporate tax exemptions for 5 to 20 years, depending on the amount of new capital investment. An additional period of corporate income tax reduction for two fiscal years is also offered after the expiration of the tax holiday in the following cases:

- 25% reduction of the corporate income tax payable if the new capital investment is at least IDR100 billion but less than IDR500 billion
- 50% reduction of the corporate income tax payable if the new capital investment is at least IDR500 billion

To qualify for the Tax Holiday Incentive, taxpayers must fulfill the following criteria:

- They must be Indonesian legal entities.
- They must be engaged in a “pioneer industry.”
- The capital investment must be new and not yet issued with an approval or rejection on an application to reduce the corporate income tax of the company.
- They must have a new capital investment plan with a minimum value of IDR100 billion.
- They must satisfy the thin-capitalization ratio required by the Minister of Finance for income tax purposes.

Currently, the following sectors qualify as pioneer industries:

- Integrated upstream base metal industry (steel and non-steel), with or without its derivatives
- Integrated purification and/or refinery of oil and gas industry, with or without its derivatives
- Integrated petrochemical industry that is oil-, natural gas- or coal-based, with or without its derivatives
- Integrated basic organic chemical industry sourced from agriculture, plantation or forestry, with or without its derivatives
- Integrated basic inorganic chemical industry, with or without its derivatives

- Integrated pharmaceutical raw material industry, with or without its derivatives
- Manufacturing industry of irradiation equipment, electro-medical or electrotherapy
- Manufacturing industry of electronical or telematic equipment's main components such as semiconductors' wafers, backlights for liquid crystal displays, electrical drivers or displays
- Manufacturing industry of engines and main components for industrial engines
- Manufacturing industry of robotic components that support the engine manufacturing industry
- Manufacturing industry of main components for power plant machineries
- Manufacturing industry of automotive and automotive main components
- Manufacturing industry of main components for ships
- Manufacturing industry of main components for trains
- Manufacturing industry of main components for aircraft and supporting activities for the aerospace industry
- Manufacturing industry with products based from agriculture, plantation or forestry that produce pulp, with or without its derivatives
- Economic infrastructure
- Digital economy that covers activities such as data processing, hosting and other related activities

Taxpayers that have received tax incentives for investments in certain types of businesses or regions are not eligible for the Tax Holiday Incentive.

The Tax Holiday Incentive application is processed through the Online Single Submission (OSS) system. The completed application to obtain the Tax Holiday Incentive is submitted by OSS to the Minister of Finance through the Directorate General of Taxation. The decision to grant the Tax Holiday Incentive to the company is issued by the Directorate General of Taxation on behalf of the Minister of Finance within five business days after it receives the complete proposal. The Tax Holiday Incentive can be given by the Minister of Finance with respect to a proposal that is submitted within five years after 27 November 2018.

Special tax rates. Special tax rates granted to certain companies are described below.

Petroleum. Tax rates applicable to petroleum companies are those applicable when the petroleum companies' contracts were signed and approved. In addition, foreign petroleum companies are subject to branch profit tax of 20% on their taxable income, except as otherwise provided in an applicable tax treaty.

Mining. Income tax applicable to general mining companies may depend on generation of the concessions granted (that is, when the concession is granted). Holders of earlier concessions are taxed at the rates ranging from 30% to 45% (the tax rates are the rates prevailing at the time the concession was granted). Holders of the more recent concessions are taxed in accordance with the prevailing tax laws (current rate is 25%). Although withholding tax on dividends paid overseas is generally imposed at a rate of 20%,

some earlier concessions provide a reduced rate of 10%. These rates may be subject to reduction under certain tax treaties.

Construction companies. Construction companies are subject to corporate income tax with tax rates ranging from 2% to 6% of the contract value. The income tax applies to complete or partial construction activities. The applicable tax rate depends on the business qualification of the respective company and/or the type of services performed. The tax is considered a final tax. Consequently, no corporate income tax is due on the income at the end of a fiscal year. Foreign construction companies operating in Indonesia through a branch or a permanent establishment are subject to further branch profit tax of 20% on the taxable income (accounting profit adjusted for tax) after deduction of the final tax. The rate is subject to applicable tax treaties. Exemption from branch profit tax may apply in the circumstances described above (see *Branch profit tax*).

Foreign drilling companies. Foreign drilling companies are subject to corporate income tax at an effective rate of 3.75% of their gross drilling income, as well as to branch profit tax of 20% on their after-tax taxable income. The branch profit tax may be reduced under certain tax treaties. Branch profit tax may be avoided in the circumstances described above (see *Branch profit tax*).

Nonresident international shipping companies and airlines. Nonresident international shipping companies and airlines are subject to tax at a rate of 2.64% of gross turnover (inclusive of branch profit tax). As a result of the reduction of the corporate tax rate in 2010, the effective tax rate may change. However, this has not yet been confirmed through the issuance of a tax regulation.

Small and medium-sized entities. Individual and corporate taxpayers (except permanent establishments) with annual gross turnover of less than IDR4.8 billion are subject to income tax at a rate of 0.5% of monthly gross turnover for the following maximum periods:

- Seven fiscal years for individual taxpayers
- Four fiscal years for corporate taxpayers in the form of cooperatives, limited partnerships or firms
- Three fiscal years for corporate taxpayers in the form of companies

This income tax is final.

The following taxpayers are excluded from this final tax:

- Taxpayers who choose to be subject to normal income tax rates
- Corporate taxpayers that have already received tax allowance or tax holiday facilities
- Corporate taxpayers in the form of limited partnerships or firms that are established by a few individual taxpayers who have special expertise and provide the same services as independent professional services
- Corporate taxpayers that have not yet started commercial operations
- Corporate taxpayers that have gross revenue of IDR4.8 billion or more from commercial operations in a year

For purposes of the above measure, business income does not include income from independent professional services, such as,

among others, services provided by lawyers, accountants, medical doctors and notaries.

Taxpayers qualifying for a different final tax regime, such as construction services companies, are not eligible for this 0.5% final tax.

Capital gains. A 0.1% final withholding tax is imposed on proceeds of sales of publicly listed shares through the Indonesian stock exchange. An additional tax at a rate of 0.5% of the share value is levied on sales of founder shares associated with a public offering. Founder shareholders must pay the 0.5% tax within one month after the shares are listed. Founder shareholders that do not pay the tax by the due date are subject to income tax on the gains at the ordinary income tax rate.

Capital gains derived by residents are included in taxable income and are subject to tax at the normal income tax rate. Capital gains derived by nonresidents are subject to tax at a rate of 20%. The law provides that the 20% tax is imposed on an amount of deemed income. The Minister of Finance established the deemed income for sales of unlisted shares. The deemed income equals 25% of the gross sale proceeds, resulting in an effective tax rate of 5% of the gross sale proceeds. This rule applies to residents of non-treaty countries and to residents of treaty countries if the applicable treaty allows Indonesia to tax the income.

In addition to sales or transfers of shares, Indonesian tax applies a 20% tax rate to an estimated net income of 25% on sales or transfers of certain assets owned by non-Indonesian tax residents that do not have a permanent establishment in Indonesia. The assets are luxury jewelry, diamonds, gold, gemstones, luxury watches, antiques, paintings, cars, motorcycles, yachts and/or light aircraft. This results in an effective tax rate of 5%. The purchaser must withhold the tax. A tax exemption applies to transactions with a value of less than IDR10 million. The provisions of tax treaties override the above regulation.

The sale or transfer by nonresidents of shares in conduit companies or special purpose companies established or resident in tax-haven jurisdictions that have a special relationship with an Indonesian entity or an Indonesian permanent establishment of a foreign entity is deemed to be a sale or transfer of shares of the Indonesian entity or the permanent establishment. The relevant regulation provides that the Indonesian income tax applicable to the transaction is 5% of the gross sale proceeds. The 5% rate is derived from the application of the 20% cross-border withholding tax under Article 26 of the Income Tax Law to a profit that is deemed to be 25% of the gross sale proceeds. A provision in an applicable tax treaty overrides the above rule if the seller of the shares is a tax resident in a country that has entered into a tax treaty with Indonesia.

Sellers or transferors of the right to use land or buildings are subject to tax at a rate of 2.5% of the gross transfer value. The gross transfer value must represent the market value if the seller and buyer have a special relationship. Purchasers or transferees must pay a transfer duty of 5%, which may be reduced to 2.5% for

transfers in business mergers approved by the Director General of Taxation.

Administration. The annual corporate income tax return must be filed by the end of the fourth month following the end of the fiscal year. The deadline can be extended for two months. The balance of annual tax due must be settled before filing the annual tax return.

Corporate income tax must be paid in advance through monthly installments, which are due on the 15th day of the month following the relevant month. The tax installment equals 1/12 of tax payable for the preceding year (after exclusion of non-regular income) or tax payable based on the latest tax assessment received. Banks and securities companies calculate their monthly tax installments based on quarterly and semiannual financial reports, respectively.

Dividends. In general, dividends are taxable.

Dividends paid domestically to Indonesian resident corporate taxpayers are subject to withholding tax at a rate of 15%. This tax is an advance payment of the dividend recipient's tax liability. Tax exemption may apply if the dividends are paid from retained earnings and if the recipient's share ownership in the payer of the dividends represents 25% or more of the paid-in capital. Dividends exempted from tax are not subject to the 15% withholding tax. Dividends received by Indonesian resident individuals are subject to a final tax of 10%.

Dividends remitted to overseas shareholders are subject to a final 20% withholding tax, unless an applicable tax treaty provides a lower rate.

Foreign tax relief. A credit is allowed for tax paid or due overseas on income accruing to an Indonesian company, provided it does not exceed the allowable foreign tax credit. The allowable foreign tax credit for each type of income is computed on a country-by-country basis.

C. Determination of trading income

General. Income is broadly defined. It includes, but is not limited to, the following:

- Business profits
- Gains from sales or transfers of assets
- Interest, dividends, royalties and rental and other income with respect to the use of property
- Income resulting from reorganizations, regardless of the name or form
- Gains from sales or transfers of all or part of a mining concession, funding participation or capital contribution of a mining company
- Receipt of refund of tax that has been claimed as a tax deduction
- Income earned by *syariah*-based businesses (*syariah* refers to businesses conducted in accordance with Islamic law)
- Interest compensation
- Surplus of Bank Indonesia

Certain income is not taxable or is subject to a final tax regime. Interest earned by resident taxpayers on time deposits, certificates

of deposit and savings accounts is subject to a 20% withholding tax, representing a final tax on such income. A final 20% (or lower rate provided in a tax treaty) withholding tax is imposed on interest earned by nonresidents.

Taxpayers are generally able to deduct from gross income all expenses to the extent that they are directly or indirectly incurred in earning taxable income. Nondeductible expenses include the following:

- Income tax and penalties
- Expenses incurred for the private needs of shareholders, associates or members
- Gifts
- Donations (except for donations for national disasters, grants in the framework of research and development activities in Indonesia, grants for the development of social infrastructure, grants in the form of education facilities [for example, books, computers, chairs, tables and other educational resources] and grants for the development of sport)
- Benefits-in-kind, which include a subsidy, aid, gift or award given to an employee or a related party
- Reserves and provisions for certain industries

Business losses incurred overseas are not deductible.

Foreign-exchange gains and losses are treated as taxable income and deductible expenses in accordance with the generally accepted accounting procedures in Indonesia that are consistently adopted.

Inventories. For tax purposes, inventories must be valued at cost using either the first-in, first-out (FIFO) or average-cost method. The last-in, first-out (LIFO) method is not allowed.

Provisions. Provisions are generally not deductible for tax purposes.

Certain taxpayers that may claim bad debt provisions as deductible expenses include banks and certain nonbank financial institutions, such as other corporate entities providing loan facilities, insurance companies, leasing companies that lease assets under finance leases, consumer financing companies, and factoring companies. The following companies may also claim tax deductions for reserves or provisions:

- Social insurance providers: reserves of social funds
- Forestry companies: reserves for reforestation
- Mining companies: reserves for reclamation of mining sites
- Industrial waste treatment companies: reserves for closure and maintenance of waste treatment plants

Taxpayers may claim tax deductions for bad debts if all of the following conditions are satisfied:

- The costs have been claimed as corporate losses in commercial financial reports.
- A list of the names of the debtors and totals of the bad debts is submitted to the Director General of Taxation.
- A legal suit for collection of the debt is filed with the public court or government institutions handling state receivables. Alternatively, taxpayers may publicize the bad debt in a general or specialized publication or obtain acknowledgment of the write-off of the bad debt from the relevant debtor.

The write-off of receivables from a related party is not deductible for tax purposes.

Depreciation and amortization allowances. Depreciation is calculated on the useful life of an asset by applying the straight-line method or declining-balance method. In general, depreciation is deducted beginning with the month the expenditure is incurred. However, for assets under construction, depreciation begins with the month in which the construction of the assets is completed. Buildings are depreciated using the straight-line method. The following table provides the useful lives and depreciation rates for depreciable assets.

Class of asset	Useful life Years	Depreciation method	
		Straight-line (%)	Declining-balance (%)
Buildings			
Permanent	20	5	–
Non-permanent	10	10	–
Other assets			
Class 1	4	25	50
Class 2	8	12.5	25
Class 3	16	6.25	12.5
Class 4	20	5	10

Intangible assets with more than one year of benefit, including leases of tangible property, are amortized according to their useful lives using the same percentages applicable to fixed assets. Special depreciation and amortization rules apply to assets used in certain businesses or in certain areas (see Section B).

Revaluation of assets for tax purposes. Subject to approval of the Directorate General of Taxation, increments resulting from revaluation of tangible fixed assets is subject to final income tax at the following rates:

- 3% for applications submitted from 15 October 2015 through 31 December 2015
- 4% for applications submitted from 1 January 2016 through 30 June 2016
- 6% for applications submitted from 1 July 2016 through 31 December 2016
- 10% for applications submitted in the 2017 fiscal year

The final tax is applied to any excess in value of the tangible fixed assets' revaluation or revaluation forecast over the tangible fixed assets' tax written-down value. This tax must be settled before the application is submitted. The value of tangible fixed assets being revalued should be the fair market value of the tangible fixed assets as determined by a licensed appraisal company. The Directorate General of Taxation may re-determine the fair market value of the relevant tangible fixed assets.

Revaluation of fixed assets can be conducted on all of the tangible fixed assets owned by the company or certain selected tangible fixed assets if the assets are physically located in Indonesia and are used to earn, collect and maintain taxable income. The tangible fixed assets revaluation can only be performed every five years, and any breach of this period results in the imposition of additional tax. A tangible fixed asset that has been revalued is

depreciated based on a new revalued cost base and is treated as having the same useful life as a new asset.

Revalued tangible fixed assets in Classes 1 and 2 (see *Depreciation and amortization allowances*) that are transferred before the end of their useful lives, as well as revalued tangible fixed assets in Classes 3 and 4, and land and buildings that are transferred within 10 years of their revaluation approval, are subject to additional tax.

Relief for losses. Tax losses may not be carried back. They may generally be carried forward for five years. Tax losses incurred by certain businesses or incurred in certain areas may be carried forward for up to 10 years (see Section B).

Groups of companies. The losses of one company may not be used to reduce the profits of an affiliate.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on delivery of taxable goods, on imports of goods and on services (including services furnished by foreign taxpayers outside Indonesia if the services have a benefit in Indonesia), unless specifically exempt	
Standard rate	10
Export of goods or certain services	0
Sales tax on luxury goods, imposed in addition to the VAT on the delivery of luxury goods manufactured in or imported into Indonesia; rate depends on the nature of the goods	10 to 200
Transfer duty on land and buildings	5

E. Miscellaneous matters

Foreign-exchange controls. No exchange controls affect the repayment of loans and the remittance of dividends, interest and royalties. Underlying documents must be submitted to the remitting bank for the remittance of funds in foreign currency of more than the equivalent of USD100,000. Foreign loans must be reported to Bank Indonesia to enhance the monitoring of the country's foreign exchange reserves.

Debt-to-equity rules. Under the tax law, the Minister of Finance may determine an acceptable debt-to-equity ratio. In September 2015, the Minister prescribed a maximum debt-to-equity ratio of 4:1, effective from the 2016 tax year. This rule applies only to Indonesian resident companies, which are companies that are established or incorporated in Indonesia or domiciled in Indonesia and that have their equity made up of shares. It does not apply to permanent establishments. Certain taxpayers are exempted from the rule.

Under the Minister of Finance Regulation regarding the debt-to-equity ratio, if a taxpayer breaches the ratio limit, the Directorate General of Taxation is entitled to adjust the taxpayer's borrowing costs based on the debt-to-equity ratio limit. For a taxpayer that

has a nil or negative equity, all costs related to the borrowing are treated as nondeductible for corporate tax purposes. Foreign loans must be reported to the Directorate General of Taxation. Non-reporting of foreign loans results in the forfeiting of the deductibility of the interest.

Interest rates on related-party loans must be at arm's length.

Transfer pricing. The law provides that the following methods may be used to determine arm's-length pricing:

- Comparable uncontrolled price method
- Resale-price method
- Cost-plus method
- Profit-split method
- Transactional net margin method

The Indonesian tax authority requires that related-party transactions or dealings with affiliated companies be carried out in a "commercially justifiable way" and on an arm's-length basis. Taxpayers must maintain documentation establishing that related-party transactions are conducted at arm's length. The transfer-pricing study must be maintained for 10 years from the relevant tax year.

The Indonesian tax authority uses advance pricing agreements (APAs) to regulate transactions between related parties and to mitigate future transfer-pricing disputes with the Director General of Taxation. Broadly, an APA represents an advance agreement between a company and the Director General of Taxation regarding the determination of the acceptable pricing for a transaction between related parties. An APA provides the sales price for manufactured goods, the amount of royalties and other information. An APA may be entered into with the Director General of Taxation (unilateral) or between the Director General of Taxation and the foreign tax authority (bilateral).

F. Treaty withholding tax rates

Indonesia has introduced tough anti-treaty abuse rules. The Indonesian tax authority may ignore the provisions of a tax treaty if these rules are not satisfied.

The Indonesian tax authority may seek agreement with a tax treaty country for exchange of information, mutual agreement procedure and assistance with tax collection.

The following table shows withholding tax rates under Indonesia's double tax treaties.

	Dividends (%)		Interest (b)	Royalties
	A	B	%	%
Algeria	15	15	0/15	15
Armenia	15	10	0/10	10

A Rate applicable to portfolio investments.

B Rate applicable to substantial holdings.

(a) Technical services are subject to the following reduced rates of withholding tax:

- Germany, 7.5%
- Luxembourg, 10%
- Pakistan, 15%
- Papua New Guinea, 10%
- Switzerland, 5%
- Venezuela, 10%
- Zimbabwe, 10%

(b) If two rates are other than 0%, the higher rate applies to interest paid to companies in certain specified industries or to interest on certain bonds. The 0% rate applies if the beneficial owner of the interest is the government, except under the Singapore treaty, which provides that the 0% rate applies to interest on government bonds.

(c) The rates vary according to the rights or information licensed.

(d) The tax treaty allows each of the signatory countries to apply the domestic tax anti-avoidance rules.

(e) On 30 July 2015, Indonesia and the Netherlands signed a new protocol to their tax treaty. This protocol provides reduced rates of 5% and 15% for dividends and 5% and 10% for interest (no tax exemption for interest paid to the Netherlands). The new protocol is subject to ratification of both countries before it becomes effective.

In addition to the above treaties, Indonesia has entered into agreements for the reciprocal exemption of taxes and duties on air transport with Bangladesh, Croatia, Laos, Morocco, Saudi Arabia and South Africa.

- (a) The 15% rate is the general corporate income tax rate. The 35% rate applies to oil and gas production and extraction activities and related industries, including service contracts. The Kurdistan Region of Iraq has not yet adopted the 35% rate.
- (b) This withholding tax is imposed on payments to nonresidents.
- (c) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. In general, corporate income tax is imposed on profits arising in Iraq from commercial activities (or activities of a commercial nature), vocations and professions, including profits arising from contracts and undertakings. In assessing the taxability of nonresidents in Iraq, the General Commission for Taxes (GCT), which is the Iraqi tax authority, generally relies on certain factors that distinguish between “doing business in Iraq” and “doing business with Iraq.” If any one of the following factors is satisfied, a company is deemed to be “doing business in Iraq” and accordingly taxable in Iraq:

- The place of signing the contract by the party performing work under the contract (vendor or service provider) is in Iraq.
- The place of performance of work is in Iraq.
- The place of delivery of goods or services is in Iraq.
- The place of payment for the work is in Iraq.

The Iraqi Ministry of Finance’s Instructions No. (1) of 2014 amended the above four factors. Under the new instructions, the taxability of the following items is addressed separately:

- Supply contracts
- Supplementary or complementary services performed in relation to a supply contract
- Professional services

Income arising from a supply contract is taxable in Iraq if any one of the following factors applies:

- The vendor or service provider has a branch or an office in Iraq, and the contract is signed by the branch or office representative, any of the branch or office’s employees or any other person who is resident in Iraq and authorized to sign the contract.
- The vendor or service provider has a branch or an office in Iraq, and the contract is performed or executed by the branch or office representative, any of the branch or office’s employees or any other person who is resident in Iraq and is authorized to perform or execute the contract.
- The contract’s legal formalities and requirements are completed in Iraq in the name of the vendor or service provider (for example, customs clearance, payment of customs duties, opening of letter of credit or any related procedures, regardless of whether the vendor or service provider has a branch, office or agent in Iraq).
- Payments under the contract to the vendor or service provider are received fully or partially in Iraq, regardless of the currency used to make the payments.
- The vendor or service provider receives payment in barter.

Tax is imposed on income arising from supplementary or complementary services performed in Iraq with respect to a supply contract (such as erection, supervision, maintenance or engineering services), regardless of whether the services are included in the supply contract or in an independent contract. In addition, the taxability of the service component is determined separately from the taxability of the supply contract.

Tax is imposed on professional services performed in Iraq by a legal or natural person, regardless of whether the services are included in the supply contract or in an independent contract and

regardless of the place of payment. The taxability of the service component is determined separately from the taxability of the supply contract.

Tax rates. The general corporate income tax rate applicable to all companies (except oil and gas production and extraction activities and related industries, including service contracts) is a unified flat rate of 15% of taxable income. Activities relating to oil and gas production and extraction activities and related industries, including service contracts, are subject to income tax at a rate of 35% of taxable income. The Kurdistan Region of Iraq has not yet adopted the 35% rate.

Withholding tax. Companies doing business in Iraq are required to withhold taxes from payments made to their subcontractors and remit the withheld taxes to the GCT on a monthly basis. The withholding rates vary, depending on the nature of activities carried out under each contract. The Kurdistan Region of Iraq does not currently observe this tax withholding, retention and remittance process.

Capital gains. Capital gains derived from the sale of fixed assets are taxable at the normal corporate income tax rate of 15% (35% for oil and gas production and extraction activities and related industries, including service contracts, except in the Kurdistan Region of Iraq where the 35% tax rate has not yet been adopted). Capital gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax; otherwise, they are taxed at the normal corporate income tax rates.

Administration

Tax filing due dates and penalties. In Iraq, tax returns for all corporate entities must be filed in Arabic within five months after the end of the fiscal year, together with audited financial statements prepared under the Iraqi Unified Accounting System. The Kurdistan Regional Government's tax authority requires only large taxpayers to file a tax return. The tax filing in the Kurdistan Region of Iraq must be made within six months after the end of the fiscal year.

For all taxpayers in Iraq and the Kurdistan Region of Iraq, except companies classified as large taxpayers in the Kurdistan Region of Iraq, a delay fine equal to 10% of the tax due is imposed, up to a maximum of IQD500,000 (up to a maximum of IQD75,000 in the Kurdistan Region of Iraq), on a taxpayer that does not submit or refuses to submit an income tax filing within five months after the end of the fiscal year (within six months in the Kurdistan Region of Iraq). Foreign branches that fail to submit financial statements by the due date for the income tax filing in Iraq are subject to a penalty of IQD10,000.

A similar penalty is not currently being imposed in the Kurdistan Region of Iraq. However, the tax authority in the region has been sending to a tax tribunal the files of companies that fail to submit their tax filing in a timely manner. The tax tribunal assesses late filing penalties, ranging from 10% to 25% of taxable income.

For large taxpayers in the Kurdistan Region of Iraq, failing to submit the tax filing package by the due date results in a penalty equal to 5% of the tax due for each late month, up to a maximum

of 100% of the tax due and no less than IQD100,000 (USD84) for branches.

Tax assessment and payment. For all taxpayers in Iraq and the Kurdistan Region of Iraq, except companies classified as large taxpayers in the Kurdistan Region of Iraq, after an income tax filing is made, the tax authority audits the filing and may request additional information. It eventually issues a tax assessment in an estimation memorandum. In general, in 2018, with the exception of foreign oil and gas companies, payment of the total amount of tax is due after the GCT and the taxpayer sign the estimation memorandum indicating their agreement with the tax assessment.

In Iraq and the Kurdistan Region of Iraq, if the tax due is not paid within 21 days after the date of assessment notification, a late payment penalty equal to 5% of the amount of tax due is imposed. This amount is doubled if the tax is not paid within 21 days after the lapse of the first period. The Kurdistan Regional Government's tax authority imposes different penalties and administers them differently.

For companies classified as large taxpayers in the Kurdistan Region of Iraq, the payment is due together with the tax filing package based on the self-assessed tax liability declared in the tax return. The tax authority should accept the tax filing as self-declared by the taxpayer. The penalties associated with late payment are equal to 10% of the tax due. Also, delay interest of 1% per month is imposed, with partial months counting as a full month.

Dividends. In general, dividends paid from previously taxed income are not taxable to the recipient.

Interest. Interest paid to nonresidents is subject to a withholding tax rate of 15%.

Foreign tax relief. A foreign tax credit is available to Iraqi companies on income taxes paid abroad. In general, the foreign tax credit is limited to the amount of an Iraqi company's income tax on the foreign income. Excess foreign tax credits may be carried forward for five years.

C. Determination of trading income

General. In general, all income generated in Iraq is taxable in Iraq (see *Corporate income tax* in Section B), except for income exempt under a valid tax law or resolution, the industrial investment law, or the investment promotion law in the Kurdistan Region of Iraq.

Business expenses incurred to generate income are allowable, with limitations on certain items, such as entertainment and donations. However, provisions and reserves are not deductible for tax purposes.

Tax depreciation. The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets. These rates are set out in several tables for various industries. In general, the following are the acceptable depreciation methods:

- Straight line
- Declining balance
- Other methods (with the approval of the GCT)

If the rates used for accounting purposes are greater than the prescribed tax depreciation rates, the excess is disallowed for tax purposes.

Relief for losses. A tax loss from one source of income may offset profits from other sources of income in the same tax year. Unused tax losses may be carried forward and deducted from the taxable income of the taxpayer during the following five consecutive years, subject to the following conditions:

- Losses may not offset more than half of the taxable income of each of the five years.
- The loss may offset only income from the same source from which the loss arose.

To claim losses, a taxpayer must obtain appropriate documentation including financial statements that support the loss and sufficient documentation to support the expenses that created such loss.

Groups of companies. Iraqi law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Stamp duties; imposed on the total contract value	
Iraq	0.3
Kurdistan Region of Iraq	0.1
(The stamp duty rates provided are the most commonly applied rates in Iraq and the Kurdistan Region of Iraq. In practice, the application of the stamp duty may vary.)	
Property tax; imposed on the annual rent	
From buildings	10.8
From land	2
Social security contributions; imposed on salaries and benefits of local and expatriate employees; a portion of employee allowances up to an amount equal to 30% of the base salary is not subject to social security contributions	
Employer (general)	12
Employer (oil and gas sector, except in the Kurdistan Region of Iraq)	25
Employee	5

E. Miscellaneous matters

Foreign-exchange controls. The currency in Iraq is the Iraqi dinar (IQD). Iraq does not impose any foreign-exchange controls. However, according to the Central Bank of Iraq's instructions and regulations, transfers of funds must be in accordance with the Anti-Terrorism Law and the Anti-Money Laundering Law.

Debt-to-equity rules. Iraq does not have any debt-to-equity rules. The only restrictions on debt-to-equity ratios are those stated in the articles and memoranda of association. However, the GCT may disallow claims of interest expense if it deems the expense to be excessive or unreasonable.

F. Tax treaties

Iraq has entered into a bilateral double tax treaty with Egypt and a multilateral double tax treaty with the states of the Arab Economic Union Council.

- (a) This rate applies to trading income and to certain dividends received from nonresident companies. A 25% rate applies to certain income and to certain activities. For details concerning the tax rates, see Section B.
- (b) A 40% rate applies to disposals of certain life insurance policies.
- (c) This tax applies to unrealized capital gains when companies migrate or transfer assets offshore such that they leave the scope of Irish tax.
- (d) This withholding tax is imposed on dividends distributed subject to exceptions (see Section B).
- (e) Applicable to both residents and nonresidents.
- (f) Interest paid by a company in the course of a trade or business to a company resident in another European Union (EU) member state or in a country with which Ireland has entered into a double tax treaty is exempt from withholding tax, subject to conditions. See footnote (p) in Section F for details regarding an extension of this exemption. Bank deposit interest is subject to a 37% deposit interest retention tax (DIRT). DIRT exemptions apply to bank interest paid to nonresidents and, subject to certain conditions, bank interest paid to Irish resident companies and pension funds.
- (g) Ireland implemented the EU Interest and Royalties Directive, effective from 1 January 2004.
- (h) Under Irish domestic law, withholding tax on royalties applies only to certain patent royalties and to other payments regarded as "annual payments" under Irish law. The Irish Revenue has confirmed that withholding tax need not be deducted from royalties paid to nonresidents with respect to foreign patents (subject to conditions).
- (i) A 20% withholding tax applies to payments from Irish Real Estate Funds (IREFs) to certain investors. A general exemption is provided for distributions of profits on disposals of property held for five years or longer. For further details, see Section B.

B. Taxes on corporate income and gains

Corporation tax. A company resident in Ireland is subject to corporation tax on its worldwide profits (income plus capital gains). All Irish-incorporated companies are regarded as Irish resident, subject to an override in a double tax treaty. This rule applies from 1 January 2015 for companies incorporated on or after 1 January 2015. For companies incorporated before 1 January 2015, the new rule applies from the earlier of 1 January 2021 or from a date on or after 1 January 2015 on which both of the following conditions are satisfied:

- A change in ownership of the company occurs.
- Within one year before or five years after the change in ownership, a major change in the nature or conduct of the business of the company occurs.

For companies within this transitional period and for companies that are incorporated in other jurisdictions, the general rule for determining company residence is the common law, which provides that a company resides where its real business is carried on, that is, where the central management and control of the company is exercised.

Subject to neither of the changes referred to above occurring, a company incorporated in Ireland before 1 January 2015 is treated as resident for tax purposes in Ireland unless either of the following apply:

- The company or a related company (50% common ownership of ordinary share capital) carries on a trade in Ireland and either of the following conditions is satisfied:
 - The company is controlled by persons (companies or individuals) resident in a European Union (EU) member country or in a country with which Ireland has entered into a tax treaty (treaty country), provided these persons are not controlled by persons that are not resident in such countries.
 - The principal class of shares in the company or a related company is substantially and regularly traded on one or more recognized stock exchanges in an EU or treaty country.
- The company is regarded under a tax treaty as being resident in a treaty country and not resident in Ireland.

Notwithstanding the transitional rules, Finance (No. 2) Act 2013 provides that an Irish incorporated company is regarded as Irish resident if all of the following circumstances exist:

- The company is centrally managed and controlled in a territory with which a tax treaty is in force.
- It would have been tax resident in that relevant territory under its laws had it been incorporated there.
- The company would not otherwise be regarded by virtue of the law of any territory as resident in that territory.

A company not resident in Ireland is subject to corporation tax if it carries on a trade in Ireland through a branch or agency. The liability applies to trading profits of the branch or agency, other income from property or rights used by the branch or agency, and chargeable gains on the disposal of Irish assets used or held for the purposes of the branch or agency.

A company resident in a country with which Ireland has entered into a tax treaty is subject to tax only on profits generated by a permanent establishment as described in the relevant treaty. This normally requires a fixed place of business or dependent agent in Ireland. Companies that are resident in non-treaty countries and do not trade in Ireland through a branch or agency are subject to income tax on income arising in Ireland and to capital gains tax (CGT) on the disposal of certain specified Irish assets (see *Chargeable capital gains*).

Rates of corporation tax. The standard rate of corporation tax on trading income is 12.5%.

On election, the 12.5% rate also applies to dividends received from the following companies:

- A company resident in an EU member state, a treaty country or a country that has ratified the Organisation for Economic

Co-operation and Development (OECD) Convention on Mutual Assistance in Tax Matters

- A company that is 75%-owned by a publicly quoted company

The election applies only to dividends sourced from trading income unless the dividends are portfolio dividends (less than 5% interest). In this instance, the dividends are deemed to be from a “trading” source. Foreign dividends from portfolio investments that form part of the trading income of a company are exempt from corporation tax.

A 25% rate applies to the following:

- Certain non-trading income, such as Irish rental and investment income
- Foreign income unless the income is part of an Irish trade
- Income from “working minerals” (broadly defined), petroleum activities and dealing or developing land other than construction operations (for the taxation of construction operations, see *Land transactions*)

Startup companies. A three-year exemption from tax on certain trading profits and capital gains (subject to conditions) applies to companies with a total corporation tax liability (as defined) of less than EUR40,000 per year. This exemption applies to new companies that begin trading on or before 31 December 2021. A cap referring to employer social insurance costs applies.

Land transactions. Different tax rates apply to land transactions. Profits or gains derived from dealing in residential or nonresidential development land are subject to the higher rate of corporation tax (25%). Most construction operations are subject to corporation tax at the standard rate of 12.5%.

Shipping companies. Shipping companies that undertake qualifying shipping activities, including carriage of cargo and passengers, marine-related activities, leasing of qualifying ships and related activities, may elect to be subject to a special tonnage tax regime instead of the normal corporation tax regime.

Under the tonnage tax regime, profits are calculated on the basis of a specified profit per day according to the tonnage of the relevant ship. The following are the amounts of the daily profit attributed to each qualifying ship:

- For each 100 tons up to 1,000 tons: EUR1.00
- For each 100 tons between 1,000 and 10,000 tons: EUR0.75
- For each 100 tons between 10,000 and 25,000 tons: EUR0.50
- For each 100 tons above 25,000 tons: EUR0.25

The profits attributed to each qualifying ship for the accounting period will be determined by multiplying the daily profit as determined above by the number of days in the accounting period, or, if the ship was operated by the company as a qualifying ship for only part of the period, by the number of days in that part of the accounting period.

The standard corporation tax rate for trading income (12.5%) applies to the amount of profits determined under the rules described above.

Oil and gas exploration. Petroleum production tax (PPT) applies to oil and gas exploration authorizations granted on or after 18 June 2014. PPT replaces profit resources rent tax (PRRT). This regime applies a tax-deductible PPT to the net profits of each field, using a sliding scale of rates from 10% to 40%, based on the profitability of the field. This is in addition to the existing 25% corporation tax rate. A minimum PPT equal to 5% of field gross revenue less transportation expenditure applies.

PRRT continues to apply to authorizations granted in the period 1 January 2007 through 17 June 2014. The PRRT is imposed in addition to the 25% corporation tax rate, and it operates on a graduated basis that is linked to the profitability of the oil or gas field. The tax rate varies according to the profit ratio (rate of cumulative profits less 25% corporation tax divided by accumulated capital investment). The following are the tax rates.

Profit ratio	Tax rate (%)
Less than 1.5	0
Between 1.5 and 3	5
Between 3 and 4.5	10
Exceeding 4.5	15

Close companies. Investment and rental income of a “close company” is subject to an additional 20% surcharge if it is not distributed within 18 months after the end of the relevant accounting period. A closely held professional services company is subject to a 15% surcharge on 50% of its undistributed trading income. Broadly, a “close company” is a company that is under the control of five or fewer persons or under the control of its directors (as defined).

Life insurance companies. For life insurance business written before 1 January 2001, policyholders are subject to income tax at the standard rate (20%) on the investment income and gains less management expenses attributable to the policyholders. Life insurance companies deduct the income tax within the life insurance fund. Resident individuals do not pay any further tax. Companies are subject to Irish CGT arising on the disposal of a life insurance policy and receive a credit for income tax at the standard rate deemed to have been deducted by the life insurance company. For life insurance business written after 1 January 2001 and all other business of life companies, a tax-free buildup of investment return over the term of the policy (gross roll-up) is allowed. However, for Irish residents, an exit tax is imposed on gains resulting from certain “chargeable events” (as defined) with respect to life policies. Pension business and general annuity business are exempt from the exit tax. The exit tax is withheld at a rate of 41% on the investment return arising on the policy. This return is the difference between proceeds on redemption, maturity or assignment, and the premiums or subscription amounts paid. A 60% exit tax applies to personal portfolio life insurance policies (PPLPs). This rate applies to domestic and foreign PPLPs that were not cashed in before 26 September 2001.

Deemed disposal rules apply to gross roll up life policies held by Irish residents. A deemed chargeable event occurs at the end of every eight-year period (relevant period) beginning with the inception of the life policy. Exit tax is imposed on the gain arising

on this deemed chargeable event. These rules do not apply to policies held by nonresidents.

Shareholder profits of domestic life insurance companies are taxed at the standard rate of corporation tax (now 12.5%) regardless of whether they relate to business written before or after 1 January 2001.

Companies investing in Irish policies are generally subject to an exit tax, as described above. However, corporate holders of certain foreign policies are subject to self-assessment tax at a rate of 25% on profits from the investment in the policies. These foreign policies are policies issued by an insurance company or a branch of such a company carrying on business in a member state of the EU (other than Ireland), in a state in the European Economic Area (EEA) or in a country in the OECD with which Ireland has entered into a tax treaty. Payments with respect to such policies accruing to Irish residents that are not companies are subject to income tax at a rate of 41%. The 41% rate depends on the filing of a self-assessment return with the Irish authorities. The deemed disposal measures (see above) also apply to foreign life policies. Payments with respect to foreign policies, other than those mentioned above, are subject to tax at a rate of 40%. If a company investing in a life insurance policy is a close company, additional surcharges may apply.

Investment undertakings (gross roll-up funds and net funds). For investment undertakings (gross roll-up funds), distributions and other payments made are subject to an exit tax at a rate of 41%. This exit tax applies to the cancellation, redemption or assignment of shares and is imposed on the difference between the amount payable to the shareholder and the amount invested by the shareholder. A pro rata calculation applies for partial disposal, redemption, cancellation, repurchase or assignment of shares unless the company has elected to apply a first-in, first-out basis of identification for such disposals. Investments in IFSC funds are now covered by the investment undertakings rules described above. Nonresidents are generally exempt from the exit tax in investment undertakings described above if they provide the relevant declarations (however, see *Irish Real Estate Funds*). Certain Irish residents are also exempt from the exit tax if the relevant declarations are provided.

A 60% exit tax applies to personal portfolio investment undertakings (PPIUs). A 60% rate also applies to foreign PPIUs that are equivalent to Irish investment undertakings.

Unit holders are deemed to dispose of units acquired by them every eight years from the date of acquisition. To the extent that a gain arises on this deemed disposal, exit tax must normally be deducted and paid by the investment undertaking to the Irish tax authorities. On the disposal of the relevant unit, a credit is available for the tax paid on the deemed disposal. Similarly, a refund is payable to the unit holder if the actual exit tax liability is less than the exit tax paid on the deemed disposals. This refund is generally paid by the investment undertaking which can set off the refund against future exit tax. The deemed disposal rules apply to units acquired on or after 1 January 2001.

Offshore funds that are equivalent to Irish investment undertakings are also subject to tax on a self-assessment basis similar to the rules applicable to foreign life policies (see *Life insurance companies*). Deemed disposal rules also apply to Irish residents after every eight years.

Offshore funds domiciled in another EU member state, EEA state or a member state of the OECD with which Ireland has entered into a double tax agreement, are no longer subject to the offshore fund rules, effective from 2 April 2007. They are subject to either marginal rate of income tax on distributions or CGT at 33%. Certain transitional rules apply. Other offshore funds are still subject to either marginal rate income tax or CGT at 40%, depending on certain circumstances.

Investments in undertakings for collective investment (net funds) that are companies are subject to corporation tax at a rate of 30%.

Ireland has repealed the EU Savings Directive and incorporated the revised EU Council Directive on Administrative Cooperation (DAC 2) into Irish law. Ireland has already implemented the OECD Common Reporting Standard (CRS).

Irish Real Estate Funds. A new 20% withholding tax applies to payments from Irish Real Estate Funds (IREFs) to certain investors that are entitled to an exemption from the normal exit charge described above, typically nonresident investors. It applies to many forms of returns to investors of profits from certain real estate business activities, including dealing in or developing Irish land or an Irish property rental business. The withholding tax applies from 1 January 2017, regardless of when the profits arose. Although a general exemption is provided for distributions of profits on disposals of property held for five years, this may not apply to many investor structures (guidance is expected).

An IREF is an investment undertaking (or a subfund of such undertaking) in which at least 25% of the value of the assets at the end of the previous accounting period is derived from the following:

- Land or minerals in Ireland
- Certain offshore exploration rights
- Shares in a real estate investment trust
- Unquoted shares deriving their value directly or indirectly from the above
- Certain mortgages
- Another IREF

In addition, from 1 January 2017, acquirers of units in IREFs must apply a 20% withholding tax (regardless of the seller's status), unless the consideration does not exceed EUR500,000. A statutory advance clearance regime applies for certain indirect and direct investors with respect to this withholding tax.

Knowledge Development Box. The Knowledge Development Box (KDB) regime complies with the OECD's modified nexus approach. The KDB provides that an effective tax rate of 6.25% applies to qualifying profits. The relief is granted through a tax deduction and applies for accounting periods beginning on or after 1 January 2016 and before 1 January 2021. For KDB purposes, qualifying assets are innovations protected by qualifying

patents (including patents pending) and certain copyrighted software. Expenditure on marketing-related intellectual property such as trademarks and brands does not qualify. KDB claims must be made within 24 months after the end of the accounting period.

Chargeable capital gains. Chargeable capital gains are subject to corporation tax at a rate of 33% (except for development land gains which are subject to CGT at that rate). In computing a gain, relief is given for the effects of inflation by applying an index factor. However, indexation relief applies only for the period of ownership of an asset up to 31 December 2002.

In calculating the liability for CGT on the disposal of development land or unquoted shares deriving their value from such land, certain restrictions apply. The adjustment for inflation is applied only to that portion of the purchase price reflecting the current use value of the land at the date of purchase. The balance of the purchase price, without an adjustment for inflation, is still allowed as a deduction. Gains on development land may be reduced only by losses on development land. However, losses on development land may be set off against gains on disposals of other assets.

A nonresident company is subject to CGT or corporation tax on its chargeable capital gains from the following assets located in Ireland:

- Land and buildings
- Minerals and mineral rights
- Exploration or exploitation rights in the continental shelf
- Unquoted shares deriving the majority of their value from such assets
- Assets used in a business carried on in Ireland through a branch or agency

Exit charge. An exit charge, which is compliant with the EU Anti-Avoidance Directive (ATAD), is effective from 10 October 2018. Before the introduction of this measure, Ireland had a limited exit tax regime.

Effective from 10 October 2018, a company is deemed to have disposed of assets (and immediately reacquired them at market value) if any of the following events occur:

- A company resident in a member state (other than Ireland) transfers assets from an Irish permanent establishment to its head office or permanent establishment in another member state or third country.
- A company resident in a member state (other than Ireland) transfers a business carried on by an Irish permanent establishment to another member state or third country.
- A company ceases to be tax resident in Ireland and becomes resident in another member state or third country.

The tax charge does not apply if assets remain in Ireland and continue to be used for the purposes of an Irish trade through a permanent establishment.

The charge does not apply to certain financial transactions if the asset will revert to the permanent establishment or company within 12 months of the transfer, or to certain assets, such as Irish

land or buildings that remain within the charge to Irish capital gains tax.

The 12.5% rate of tax applies to the deemed gains accruing. An option is available to elect to defer the payment of the exit tax if the assets are transferred to an EU/EEA country. If this election is made, the tax is payable in six equal installments. The first installment is due nine months after the event triggering the exit charge if the company is subject to corporation tax, or on 31 October in the tax year following the year in which the tax event occurs. The remaining installments are due on each of the next five anniversaries of the initial due date.

Anti-avoidance provisions deny the application of the 12.5% rate if the event forms part of a transaction to dispose of the asset and if the purpose of the transaction is to ensure that the gain accruing on the disposal of the asset is charged at the 12.5% rate. In this circumstance, a standard 33% rate of capital gains tax applies.

Substantial shareholding relief. An exemption from corporation tax applies to the disposal by an Irish company of a shareholding in another company (the investee company) if the following conditions are satisfied:

- At the time of disposal, the investee company is resident for tax purposes in Ireland, in another EU member state or in a country with which Ireland has entered into a tax treaty.
- The Irish company has held (directly or indirectly), for a period of at least 12 months, a minimum holding of 5% of the shares in the investee company.
- The investee company is wholly or principally a trading company or, taken together, the holding company, its 5% group and the investee company are wholly or principally a trading group.

If the above conditions are satisfied, the relief applies automatically (no claim or election mechanism exists).

Administration. The corporation tax liability is determined by self-assessment. As a result, a company must estimate its own liability. Preliminary tax is payable in two installments if the company is not a “small company” (see below). The initial installment is due on the 21st day of the 6th month of the accounting period (assuming the accounting period ends after the 21st day of a month). This installment must equal the lower of 50% of the tax liability for the preceding year or 45% of the tax liability for the current year. The final installment of preliminary tax is due 31 days before the end of the accounting period and must bring the aggregate preliminary tax payments up to 90% of the tax liability for the year. If this date falls on or after the 21st day of a month, the 21st of that month becomes the due date.

“Small companies” alternatively may pay preliminary tax equal to 100% of their tax liability for the preceding year. A company qualifies as a “small company” if its corporation tax liability for the preceding year did not exceed EUR200,000.

A company that pays more than 45% of its corporation tax liability for a period as an initial installment of preliminary tax or more than 90% of its corporation tax liability for a period by the due date for its final installment of preliminary tax can elect jointly

with another group company that has not met the 45% or 90% tests to treat the excess as having been paid by that latter company for interest calculation purposes only. Certain conditions apply.

Any balance of corporation tax due is payable by the due date for the filing of the corporation tax return (Form CT1). This is normally nine months after a company's accounting year-end.

When the nine-month period ends on or after the 21st day of a month, the 21st of that month becomes the due date for filing the Form CT1 and the payment of any balance of corporation tax.

A start-up company with a corporation tax liability of less than EUR200,000 is relieved from having to make any corporation tax payment until its tax return filing date.

Corporation tax returns and payments must normally be filed electronically via Revenue Online Service. Electronic filers may avail of a two-day extension of return filing and payment deadlines. Accounts are required to be filed in iXBRL format, subject to limited iXBRL exemption criteria. A concessional three-month filing deadline may apply for iXBRL financial statements (not Form CT1).

If a company does not comply with the above filing obligation (including the requirement to submit accounts in iXBRL format), it is subject to one of the following surcharges:

- 5% of the tax, up to a maximum penalty of EUR12,695, if the filing is not more than two months late
- 10% of the tax, up to a maximum penalty of EUR63,485, in all other cases

In addition, the company suffers the reduction of certain tax reliefs, which consist of the set off of certain losses against current year profits and the surrender of losses among a group of companies. The following are the applicable reductions:

- A 25% reduction, up to a maximum of EUR31,740, if the filing is not more than two months late
- A 50% reduction, up to a maximum of EUR158,715, in all other cases

The above surcharges and restrictions also apply if a company fails to comply with its local property tax (see Section D) obligations with respect to residential properties that it owns.

A limited number of cases are selected for later in-depth Revenue examination, and the assessment can be increased if the return is inaccurate.

A company must file a CGT return reporting disposals of development land and related unquoted shares and pay CGT on such disposals. CGT may be due twice a year, depending on the date of realization of the chargeable gains. CGT on such chargeable gains arising in the period of 1 January to 30 November must be paid by 15 December of that same year. CGT on such gains arising in December of each year is due on or before 31 January of the following year.

Dividends

Dividend withholding tax. Dividend withholding tax (DWT) is imposed on distributions made by Irish companies at a rate of 20%.

The law provides for many exemptions from DWT. Dividends paid to the following recipients are not subject to DWT:

- Companies resident in Ireland
- Approved pension schemes
- Qualifying employee share ownership trusts
- Collective-investment undertakings
- Charities
- Certain sports bodies promoting athletic or amateur games
- Trustees of Approved Minimum Retirement Funds (funds held by qualifying fund managers on behalf of the individuals entitled to the assets)

Additional exemptions are provided for nonresidents. Distributions are exempt from DWT if they are made to the following:

- Nonresident companies, which are under the direct or indirect control of persons (companies or individuals) who are resident in an EU member country or in a country with which Ireland has entered into a tax treaty (treaty country), provided that these persons are not under the control of persons not resident in such countries
- Nonresident companies, or 75% parent companies of nonresident companies, the principal class of shares of which is substantially and regularly traded on a recognized stock exchange in an EU member country or a treaty country
- Companies not controlled by Irish residents that are resident in an EU member country or a treaty country
- Non-corporate persons who are resident in an EU member country or a treaty country and are neither resident nor ordinarily resident in Ireland
- Certain qualifying intermediaries and authorized withholding agents

The above “treaty country” references are extended to any country with which Ireland has signed a double tax treaty (see footnote [p] in Section F).

Detailed certification procedures apply to some of the exemptions from DWT described above.

DWT does not apply to dividends covered by the EU Parent-Subsidiary Directive. Anti-avoidance provisions prevent the use of EU holding companies to avoid DWT. If a majority of an EU parent company’s voting rights are controlled directly or indirectly by persons not resident in an EU or tax treaty country, DWT applies unless it can be established that the parent company exists for bona fide commercial reasons and does not form part of a tax avoidance scheme. DWT may also be recovered under a double tax treaty. The benefit of the directive is denied if “arrangements” exist that “are not put in place for valid commercial reasons which reflect economic reality.”

Distributions paid out of certain types of exempt income, such as exempt woodland income, are not subject to DWT.

Companies must file a return within 14 days after the end of the calendar month of the distribution. The return is required

regardless of whether DWT applies to the distributions. Any DWT due must be paid over to the Collector General when the return is filed.

Other: A company resident in Ireland can exclude from its taxable income distributions received from Irish resident companies (franked investment income).

Irish resident shareholders, other than companies, are subject to income tax on distributions received. DWT may be claimed as a credit against the recipient's income tax liability. Recipients not subject to income tax may obtain a refund of DWT.

Foreign tax relief. Under tax treaty provisions, direct foreign tax on income and gains of an Irish resident company may be credited against the Irish tax levied on the same profits. However, foreign tax relief cannot exceed the Irish corporation tax attributable to the same profits.

For purposes of calculating the credit under tax treaties, income derived from each source is generally treated as a separate stream. Consequently, foreign tax may generally be credited only against the Irish corporation tax on the income that suffered the foreign tax. However, a unilateral credit for otherwise unrelieved foreign tax on interest income may be offset against the corporation tax payable on the "relevant interest." "Relevant interest" is defined as interest income from group companies, which are greater than 25% related and are resident in treaty countries. The unilateral credit relief effectively introduces a pooling mechanism for the calculation of the relief available.

If no treaty exists, a deduction for foreign tax paid is allowed against such income and gains. A unilateral credit relief is available for foreign tax deducted from royalties received by trading companies. For royalties received after 1 January 2012, a limited corporate tax deduction is available for foreign tax suffered that would not otherwise qualify for double tax relief or unilateral credit relief.

An Irish tax credit is available for taxes equivalent to corporation tax and CGT paid by a branch if Ireland has not entered into a tax treaty with the country where the branch is located or if Ireland's tax treaty with such country does not provide for relief (that is, unilateral relief for branch profits tax).

An Irish company that has branches in more than one country can pool its excess foreign tax credits between the different branches. This is beneficial if one branch suffers the foreign equivalent of corporation tax at a tax rate higher than 12.5% and another branch pays tax at a rate lower than 12.5%. Unused credits can be carried forward to offset corporation tax in future accounting periods.

Unilateral credit relief for foreign tax paid by a company on interest income that is included in the trading income of a company for Irish corporation tax purposes may also be available. The relief is available only if the company cannot claim relief under a double tax treaty for the foreign tax and if the tax has not been repaid to the company. The unilateral relief is equal to the lesser of the Irish corporation tax attributable to the relevant interest or the foreign tax attributable to the relevant interest.

Unilateral credit relief may be available for Irish resident companies, or Irish branches of companies resident in EEA countries (excluding Liechtenstein), that receive dividends from foreign subsidiaries. Companies are permitted to “mix” the credits for foreign tax on different dividends from 5% subsidiaries for purposes of calculating the overall tax credit in Ireland. Any unused excess can be carried forward indefinitely and offset in subsequent periods. The subsidiaries can be located in any country. However, credits arising on dividends taxed at 12.5% are ring-fenced to prevent these tax credits from reducing the tax on the dividends taxed at the 25% rate.

An additional foreign tax credit (AFC) is available with respect to certain dividends received from companies resident in EEA countries (excluding Liechtenstein) if the existing credit for actual foreign tax suffered on the relevant dividend is less than the amount that would be computed by reference to the nominal rate of tax in the country from which the dividend is paid. The total foreign tax credit, including the AFC, cannot exceed the Irish corporation tax attributable to the income. Certain dividends are excluded.

Ireland has implemented the EU Parent-Subsidiary Directive (as amended). These provisions, which overlap to a significant extent with the unilateral credit relief measures described above, extend to Switzerland.

A company that incurs a tax liability on a capital gain in one of six specified countries may claim a credit for foreign tax against Irish CGT on the same gain. This unilateral credit is targeted at those countries with which Ireland has entered into double tax agreements before the introduction of CGT.

C. Determination of trading income

General. The calculation of trading income is based on the company’s accounts prepared in accordance with generally accepted accounting practice (GAAP), subject to adjustments required or authorized by law. For tax purposes, accounts can be prepared under Irish GAAP (applies to accounting periods commencing before 1 January 2015), International Financial Reporting Standards (IFRS) or Financial Reporting Standards (FRS) 101 or 102 (FRS applies for any accounting periods commencing on or after 1 January 2015). Detailed rules address any transition from Irish GAAP to IFRS and FRS 101 or 102 and, from 1 January 2018, changes in accounting policies more generally.

If derived from Irish sources, income derived from commercial woodlands is exempt from tax.

Expenses must be incurred wholly and exclusively for the purposes of the trade and be of a revenue (as distinct from capital) nature. However, entertainment expenses are totally disallowed, unless they are incurred for employees only. The deductibility of motor leasing expenses is restricted by reference to the carbon dioxide emissions of the motor cars.

Revenue expenditure incurred in the three years before the beginning of trading is generally deductible.

A tax deduction was available for expenditure incurred on acquiring know-how, which includes industrial information and techniques likely to assist in the manufacture or processing of goods or materials, for the purpose of a trade. The deduction was available for expenditure incurred before 7 May 2011. See *Tax depreciation (capital allowances)* for relief available on expenditure on intangible assets incurred on or after this date.

Depreciation of assets is not deductible. Instead, the tax code provides for a system of capital allowances (see *Tax depreciation [capital allowances]*).

Share-based payments. Consideration consisting directly or indirectly of shares in the company or a connected company that is given for goods or services or that is given to an employee or director of a company is generally not deductible except for the following:

- Expenditure incurred by the company on acquiring the shares (or rights to receive the shares)
- Payments made to a connected company for the issuance or the transfer of shares (or rights to receive the shares)

In effect, a tax deduction is denied for IFRS 2 or Financial Reporting Standard (FRS) 20 accounting costs unless these costs reflect actual payments. In addition, the timing of the tax deduction for such payments is dependent on the employees' income tax positions.

Interest payments. Interest on loans used for trading purposes is normally deductible on an accrual basis in accordance with its accounting treatment unless specifically prohibited.

Certain types of interest paid in an accounting period may be classified as a distribution and, consequently, are not treated as an allowable deduction. However, interest may not be reclassified if it is paid by an Irish resident company to an EU resident company or to a resident of a treaty country (on election). Such interest is allowed as a trading deduction and is not treated as a distribution, subject to certain conditions and exceptions. To facilitate cash pooling and group treasury operations, in the context of a lending trade, a tax deduction may be allowed for interest payments to a connected company in a non-treaty jurisdiction, to the extent that the recipient jurisdiction levies tax on such interest.

Before 2003, a borrower could accrue interest on a loan and claim a tax deduction, while the lender might not be subject to tax until the interest was actually paid. However, since 2003, a tax deduction for interest accrued on a liability between connected persons (including companies and individuals) may be deferred until such time as the interest is actually paid if all of the following circumstances exist:

- The interest is payable directly or indirectly to a connected person.
- Apart from the new measure, the interest would be allowable in computing the trading income of a trade carried on by the payer.
- The interest is not trading income in the hands of the recipient, as determined under Irish principles.

Detailed rules provide for the apportionment of interest between allowable and non-allowable elements.

The above restriction does not apply to interest payable by an Irish company to a connected nonresident corporate lender if the lender is not under the control, directly or indirectly, of Irish residents.

Banks may deduct interest payments made to nonresident group companies in calculating trading income (that is, the payments are not reclassified as distributions).

Charges on income, such as certain interest expenses and patent royalties, are not deductible in the computation of taxable trading income, but may be deducted when paid as a charge. A tax deduction may be claimed for interest as a charge (as a deduction from total profits, which consists of income and capital gains) if the funds borrowed are used for the following non-trading purposes:

- Acquisition of shares in a rental or trading company, or a company whose business principally consists of holding shares in trading or rental companies
- Lending to the companies mentioned in the first bullet, provided the funds are used wholly and exclusively for the purpose of the trade or business of the borrower or of a connected company

Deductions of interest as a charge have always been subject to certain conditions and anti-avoidance measures. These conditions and measures have added complexities to the implementation and maintenance of structures designed to qualify for this interest relief. In particular, interest relief is restricted if the borrower receives or is deemed to have received, a “recovery of capital” (as defined).

Interest on loans made on or after 2 February 2006 is not allowed as a tax deduction if the loan to the Irish company is from a connected party and if the loan is used, directly or indirectly, to acquire shares from a connected company. Further measures restrict the deductibility of interest as a trading expense and interest as a charge to the extent that an acquisition of assets from a connected company is funded by monies borrowed from another connected company.

Certain additional anti-avoidance rules may apply in connected party situations.

Foreign-exchange gains and losses. Realized and unrealized foreign-exchange gains and losses relating to monies held or payable by a company for the purpose of its business, or to hedging contracts with respect to such items, are included in the taxable income of a company to the extent the gains and losses have been properly recorded in the company’s accounts. If a company acquires a shareholding in a 25% subsidiary in a foreign currency and that acquisition is funded by a liability (borrowings, share capital or a capital contribution) in the same foreign currency, the company can elect to match the foreign currency gain or loss on the asset (the shares in the 25% subsidiary) with the foreign currency gain or loss on the liability. As a result, the company is taxable only on the real economic gain or loss on the asset and not on currency movements against which it is economically hedged. A company must make the matching election within three weeks of the making of the investment.

An additional foreign-exchange matching measure permits trading companies to elect to match exchange-rate movements on trading

assets denominated in foreign currency against movements on redeemable share capital denominated in foreign currency. The election for this treatment must be made within three weeks of acquiring the relevant trading asset.

Inventories. Stock is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis or some approximation of FIFO; the last-in, first-out (LIFO) basis is not acceptable.

Provisions. General provisions and reserves are not allowable deductions. Some specific provisions and reserves, including reserves for specific bad debts, may be allowed. In general, provisions created in accordance with IFRS or Irish GAAP are acceptable for tax purposes subject to normal tax rules.

Tax depreciation (capital allowances)

Plant and machinery. Capital expenditure on plant and machinery and motor vehicles in use at the end of an accounting period is written off at an annual straight-line rate of 12.5%.

The maximum qualifying expenditure for capital allowances on motor vehicles is EUR24,000. Capital allowances and leasing expense deductions for new motor cars are granted by reference to carbon dioxide emissions. As a result, some vehicles do not qualify for capital allowances or leasing expense tax deductions.

An immediate 100% write-off is allowed for capital expenditure on oil and gas exploration, development and abandonment, incurred under a license issued by the Minister for Energy. An immediate 100% write-off is also allowed for certain energy-efficient equipment.

The 2018 Finance Act contains a measure providing for accelerated capital allowances for expenditure incurred on equipment and buildings used for the purposes of providing childcare services or a fitness center to employees, effective from 1 January 2019.

On the disposal of plant and machinery, a balancing charge or allowance applies, depending on the amount received on disposal compared with the written-down value of the asset. Balancing charges are not imposed with respect to plant and machinery if the proceeds from the disposal are less than EUR2,000.

Computer software. If a company carrying on a trade incurs capital expenditure on the acquisition of software or a right to use software in that trade, the right and related software is regarded as plant or machinery and qualifies for capital allowances over eight years. Some computer software may qualify for tax depreciation under the intangible assets regime (see *Intangible assets*).

Patent rights. A company incurring capital expenditure on the purchase of patent rights for use in a trade may be entitled to writing-down allowances. Relief is given over 17 years or the life of the patent rights, whichever is the shorter. Ongoing patent royalties are typically deductible when paid (see information regarding charges in *Interest payments*). The allowances are available for expenditure incurred before 7 May 2011. See *Intangible assets* for relief available on expenditure incurred on or after this date.

Immovable property. The basic annual rate is 4% for industrial buildings. Capital expenditure incurred on hotels on or after 4 December 2002 is written off over 25 years (previously 7 years). Transitional measures applied to certain approved projects if the expenditure was incurred on or before 31 December 2006, and reduced rates applied in certain circumstances if the expenditure was incurred in the period 1 January 2007 through 31 July 2008.

Urban renewal schemes. Property-based tax incentives in urban renewal areas may be available for expenditure incurred before 31 July 2008. The reliefs include accelerated capital allowances for commercial and industrial buildings.

Telecommunication infrastructure. Capital allowances are available for capital expenditure incurred on the purchase of rights to use advanced telecommunication infrastructure. These intangible rights typically extend from 10 to 25 years. They are usually purchased with an upfront lump-sum payment. The expenditure incurred by a company on such rights may be written off over the life of the agreement relating to the use of the rights, with a minimum period of seven years.

Other. Capital allowances are also available on expenditure incurred for scientific research, dredging, mining development, ships, agricultural buildings, airport buildings, runways, and petroleum exploration, development and production.

Intangible assets. Capital allowances are available on a broad range of specified intangible assets acquired on or after 8 May 2009. Capital allowances are available for expenditure incurred on many types of intangible assets including, but not limited to, customer lists, brands, trademarks, patents, copyrights, designs, know-how, some computer software, pharmaceutical authorizations and related rights, licenses and attributable goodwill.

Relief is generally granted in line with book depreciation and is claimed on the annual tax return.

However, the company can elect for a 15-year write-off period, which is useful if intangible assets are not depreciated for book purposes. This election is made on an asset-by-asset basis.

For capital expenditure incurred by a company on or after 11 October 2017, the aggregate relief (inclusive of any related finance interest) is capped annually at 80% of the trading income of the relevant trade (previously 100%) in which the intangible assets are used. Excess allowances can be carried forward indefinitely against income of the same trade.

Allowances granted are clawed back if the asset is sold within a five-year period.

Patent rights and know-how. For acquisitions before 6 May 2011, allowances for acquired patent rights were granted over the shorter of 17 years or the duration of acquired rights. Certain know-how was deductible in full in the year of acquisition. After that date, relief must be claimed under the new intangible asset regime (see *Intangible assets*).

Research and development expenditures. A corporation tax credit of 25% is available for qualifying research and development (R&D) expenditure incurred by companies for R&D activities

carried on in EEA countries. This credit is granted in addition to any existing deduction or capital allowances for R&D expenditure. As a result of this credit, companies may enjoy an effective benefit of up to 37.5% of R&D expenditure.

R&D credits that cannot be used in an accounting period can be carried forward indefinitely to future accounting periods. Excess R&D credits can be carried back against corporation tax paid in the immediately preceding accounting period. Any remaining excess credits may be refunded over a three-year period. This enhancement of the R&D credit regime represents a significant cash-flow opportunity for loss-making companies. However, a 12-month time limit for R&D claims applies. All R&D claims must be made within 12 months after the end of the accounting period in which the R&D expenditure giving rise to the claim is incurred.

A reward scheme allows companies to use all or part of the R&D credit to reward key employees.

Film credit. From 1 January 2015, film relief is only available to producer companies in the film and film production industry. The relief provides for a film corporation tax credit of 32% against the corporation tax liability of the producer company. Any excess is available for payment to the producer company. Detailed certification rules and conditions apply. The 2018 Finance Act provides for the extension of the relief to 31 December 2024. In addition, subject to EU approval, it introduced a time limited, tapered regional uplift of 5% for productions in designated areas. This uplift will taper out over a period of four years. The following will be the percentages of the credit over this period:

- Claims made on or before 31 December 2020: credit is 37%
- Claims made after 31 December 2020 but on or before 31 December 2021: credit is 35%
- Claims made after 31 December 2021 but on or before 31 December 2022: credit is 34%
- Claims made after 31 December 2022: credit is 32%

Relief for losses. Trading losses and charges incurred by a company in an accounting period in a trading activity that is not subject to the 25% corporation tax rate (effectively most trades) can be offset only against profits of that accounting period or the preceding accounting period to the extent that the profits consist of trading income subject to the 12.5% rate. Any unused trading losses may be carried forward to offset future trading income derived from the same trade.

Relief may be available through a reduction of corporation tax on a value basis. For example, in 2019, when the standard corporation tax rate on trading income is 12.5%, 12.5% of the trading loss may be offset against the corporation tax liability of a company with respect to profits from all sources. The full amount of the trading loss that is so utilized is regarded as being used up for purposes of calculating losses that may be carried forward. In effect, a company needs trading losses equal to twice the amount of its passive income to eliminate its tax liability on such income.

Terminal loss relief may be available if a company incurs a loss in its last 12 months of trading. This relief allows such losses to be

carried back against income of the same trade in the preceding three years.

Groups of companies. Certain tax reliefs are available to a group of companies that meet the following requirements:

- The group companies have a minimum share relationship of 75%.
- The parent company is entitled to 75% of distributable profits.
- The parent company is entitled to 75% of assets available for distribution on a winding up.

Such companies may transfer surplus losses and excess charges on income. Surplus losses of companies owned by a consortium may also be transferred.

Group and consortium relief are available if all of the companies in the group or consortium are resident in an EEA member country (except Liechtenstein). Loss relief was historically restricted to losses incurred in a business carried on by a company subject to Irish corporation tax. However, group relief is now available for certain “trapped” trading losses incurred by non-Irish 75% subsidiaries resident in an EEA country (except Liechtenstein). Losses that can be used elsewhere are ineligible for surrender.

Losses can be transferred between two Irish resident companies if both companies are part of a 75% group involving companies that are tax resident in an EU or tax treaty country, or quoted on a recognized stock exchange. In determining whether a company is a 75% subsidiary of another company for the purpose of group relief (losses), the parent is no longer regarded as owning any shares that it owns directly or indirectly in a company that is not resident for tax purposes in a relevant territory. This effectively means that losses may not be surrendered if a company resident in a state that has not entered into a double tax treaty with Ireland is between a claimant and a surrendering company in the group structure.

The National Asset Management Agency Act 2009 provides for a limited form of loss surrender between certain financial institutions in the same group with respect to excess losses carried forward from earlier periods for which the surrendering financial institution cannot obtain relief.

In a 75% group, assets may be transferred without generating a chargeable gain. An asset retains its tax value while it is held within the group. The tax value is generally based on original cost; for assets acquired before 6 April 1974, the tax value is computed with reference to the market value on that date. If an asset is transferred to a company that leaves the group within 10 years after the transaction, that company is deemed to have disposed of and immediately reacquired the asset at its market value at the time of its acquisition, effectively crystallizing the deferred gain.

A nonresident company that is resident in an EEA country (except Liechtenstein) and a company resident in a jurisdiction with which Ireland has a double tax treaty may be taken into account in determining whether a group exists for chargeable gains purposes. An Irish branch of a company resident in an EEA country (except

Liechtenstein) and an Irish branch of a company resident in a jurisdiction with which Ireland has a double tax treaty, that is a member of a group may transfer assets to another member of a group on a tax-neutral basis. Any gain arising on the transfer is not taxable until the asset is sold outside the group. To qualify for such relief, the following conditions must be satisfied:

- Each of the companies in the group must be resident in Ireland or in an EEA country (except Liechtenstein) or in a jurisdiction with which Ireland has a double tax treaty.
- Any transferor/transferee companies not resident in Ireland must be carrying on a trade in Ireland through a branch.
- The transferred asset must be a chargeable asset for corporation tax purposes in Ireland.

Dividends paid between Irish resident companies are not subject to DWT (see Section B) if the appropriate declarations are made. However, a 51% subsidiary resident in Ireland may pay dividends free of DWT without the parent company making a formal declaration to the subsidiary that it is an Irish resident company. Withholding tax is not imposed on interest and royalty payments between members of a 51% group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods or services, other than an exempt supply made in or deemed to be made in Ireland, and on imports from other than EU member states at the point of entry	
Standard rate	23
Other rates	0/4.8/5.4/9/13.5
Stamp duty, on certain documents (maximum rate)	6
Local property tax (residential property); assessed on the midpoint value of valuation bands	
Market value less than EUR1 million	0.18
Market value greater than EUR1 million	
First EUR1 million	0.18
Balance	0.25
Pay-related social insurance (PRSI) (for the period ending 31 December 2018), on employees' salaries; paid by	
Employers	
For employees earning a weekly salary of more than EUR386; on each employee's salary without limit	10.95
For employees earning a weekly salary of EUR386 or less	8.7
Employees	
PRSI; on annual salary	4
Universal Social Charge (USC)	
Annual salary of up to EUR12,012 (exempt if income is less than EUR13,000)	0.5
Annual salary of EUR12,013 to EUR19,874	2
Annual salary of EUR19,875 to EUR70,044	4.5

Nature of tax	Rate (%)
Annual salary in excess of EUR70,044 (A 2% rate applies to individuals over 70 years old or who hold a full medical card and whose aggregate income for the year is less than EUR60,000.)	8

E. Miscellaneous matters

Foreign-exchange controls. Foreign-exchange controls are not imposed, except in very limited circumstances at the discretion of the Minister for Finance. For example, the minister may impose foreign-exchange controls to comply with EU law or a United Nations resolution.

Debt-to-equity ratios. No thin-capitalization rules exist, but interest payments to 75%-nonresident affiliated companies may be treated as distributions of profit and consequently are not deductible (for details regarding this rule, see Section C).

Controlled foreign companies. The 2018 Finance Act transposes Option B of the EU ATAD controlled foreign company (CFC) rules into Irish law. The rules provide for a CFC income inclusion at the Irish parent level for accounting periods beginning on or after 1 January 2019.

The charge applies to undistributed income of greater than 50%-owned foreign entities based on share capital, voting rights or distributions on wind-up if both of the following conditions are satisfied:

- The relevant Irish activities, being significant people functions or key entrepreneurial risk-taking functions, are performed in Ireland on behalf of the CFC group.
- Such functions are relevant to the legal or beneficial ownership of assets held by the foreign entity or the assumption and management of the risks included in the relevant assets and risks of the foreign entity.

The charging provision excludes situations in which the undistributed income attributable to the relevant Irish activities is the result of arrangements that would have been entered into by persons dealing at arm's length or in which the essential purpose of the arrangements is not to secure a tax advantage. Other exemptions apply, in line with ATAD, with respect to effective tax rates, low-profit margins and low accounting profits.

The provision includes a charge to Irish corporation tax at a rate of 12.5% on the basis that the attributable undistributed income would be treated as trading income had it accrued directly to the chargeable company and a charge to Irish corporation tax at a rate of 25% for attributable undistributed passive income. Any foreign tax paid or borne, corresponding to Irish corporation tax, with respect to the chargeable income of the CFC is allowed as a credit against Irish tax arising on a CFC income inclusion. No other form of relief is allowed to mitigate the CFC charge.

A 12-month exemption with respect to newly acquired CFCs applies if certain conditions are satisfied. Relief is also provided with respect to disposals of CFCs for which chargeable gains arise that allow for a deduction of a CFC tax charge in computing the arising gains.

Anti-avoidance rule. A general anti-avoidance rule (GAAR) empowers the Revenue Commissioners to reclassify a “tax avoidance” transaction in order to remove a tax advantage resulting from such transaction. An additional surcharge equal to 30% (20% for transactions begun on or before 23 October 2014) of the underpayment can be imposed if the Revenue Commissioners deny a tax advantage and if the taxpayer had not made a “protective notification” of the “tax avoidance” transaction to the Revenue within 90 days after the beginning of the transaction.

Transfer pricing. Transfer-pricing legislation in Ireland is effective from 1 January 2011. The rules apply to any arrangement between associated enterprises if the transaction meets the definition of an Irish trading transaction for one or both of the parties. For the purposes of determining an arm’s-length price, the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations are adopted. Sufficient records must be maintained to support an arm’s-length price. OECD-style documentation is sufficient.

Grandfathering provisions apply to transactions for which the terms were agreed on before 1 July 2010. Exemptions from the rules are available for small and medium-sized enterprises, which are companies with fewer than 250 employees and turnover of less than EUR50 million or assets of less than EUR43 million.

Legislation will be introduced in the 2019 Finance Bill (expected October 2019) to update Ireland’s transfer-pricing rules, effective from 1 January 2020. The update is expected to include adoption of the 2017 OECD Transfer Pricing Guidelines into Irish law.

Country-by-Country Reporting. The 2015 Finance Act introduced Country-by-Country Reporting compliant with the OECD’s recommendations. For accounting periods beginning on or after 1 January 2016, Irish-headquartered companies must file a Country-by-Country Report with the Irish Revenue within 12 months after the end of their accounting period. In addition, Country-by-Country notifications must be made no later than the last day of the fiscal year to which the report relates. Groups with annual consolidated group revenue in the immediately preceding accounting period of less than EUR750 million are exempt from this reporting requirement.

Construction operations. Special withholding tax rules apply to payments made by principal contractors to subcontractors with respect to relevant contracts in the construction, forestry and meat-processing industries. Under these rules, principal contractors must withhold tax from certain payments. Under this electronic system (within which all relevant contracts must be registered), withholding rates of 0%, 20% and 35% apply. If subcontractors are not registered with the Revenue or if serious compliance issues that need to be addressed exist, the rate is 35%. All other subcontractors should qualify for the 20% rate.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

Non-treaty jurisdictions	0/20 (o)(p)	20 (b)(p)	0/20 (c)

- (a) Withholding tax at a rate of 20% applies to dividends distributed on or after 6 April 2001. The table assumes that the recipient of the dividends is not a company controlled by Irish residents (that is, the domestic measure providing that DWT is not imposed on payments to residents of treaty countries applies). If domestic law allows the imposition of DWT, a refund of the DWT may be obtained under the terms of an applicable tax treaty.
- (b) Interest is generally exempt from withholding tax if it is paid by a company or investment undertaking in the ordinary course of its business to a company resident in an EU member country or a country with which Ireland has entered into a tax treaty. However, this exemption may be unavailable if the recipient is resident in a country that does not generally impose a tax on interest received from foreign sources.
- (c) Under Irish domestic law, withholding tax on royalties applies only to patent royalties and to other payments regarded as "annual payments" under Irish law. The Irish Revenue has confirmed that withholding tax need not be deducted from royalties paid to nonresidents with respect to foreign patents (subject to conditions). Effective from 4 February 2010, withholding tax does not apply to patent royalties paid by a company in the course of a trade or business to a company resident in a treaty country that imposes a generally applicable tax on royalties received from foreign sources (subject to conditions).
- (d) The normal withholding tax rate for royalties is 10%. However, the following royalties are exempt unless the recipient has a permanent establishment in Ireland and the income is derived there:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works (but not including royalties paid for motion picture films or for works on film or videotape or other means of reproduction for use in connection with television broadcasting)
 - Royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including any such royalties in connection with rental or franchise agreements)

- (e) The 0% rate also applies in certain circumstances, such as if the interest is paid by, or received from, a central bank or local authority.
- (f) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.
- (g) The 0% rate also applies in certain circumstances, such as if the interest is paid by or received from a central bank or local authority. The 5% rate applies if the beneficial owner of the interest is a bank. The 10% rate applies to other interest.
- (h) A 0% rate also applies to royalties for the use of copyrights of literary, artistic or scientific works, including motion pictures, film recordings on tape, other media used for radio or television broadcasting or other means of reproduction or transmission.
- (i) The 0% rate also applies to interest paid to banks or financial institutions, interest paid on loans with a term of more than two years and interest paid in certain other circumstances.
- (j) The withholding tax rate for royalties is 10%, but only 60% of royalties for the use of, or the right to use, industrial, commercial or scientific equipment is taxable.
- (k) The 5% rate applies to royalties paid for the use of patents, designs or models, plans, secret formulas or processes or for information concerning industrial or scientific experience. The 10% rate applies to royalties paid for the use of trademarks or information concerning commercial experience. The 15% rate applies to other royalties.
- (l) The normal withholding tax rate for interest is 10%, but a 0% rate applies in certain circumstances.
- (m) Ireland has implemented Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between 25%-associated companies of different EU member states. The 2005 Finance Act extended these benefits to Switzerland. If the directive applies, the withholding tax rate is reduced to 0%.
- (n) The 10% rate applies to interest paid with respect to a loan or other debt claim for a period exceeding two years or interest paid to a financial institution.
- (o) Irish domestic law may provide for an exemption from DWT under certain circumstances (see Section B).
- (p) Certain withholding tax exemptions that are available to treaty countries under Irish domestic law (see footnotes [a] and [b]) may be extended to residents of any countries with which Ireland signs a double tax treaty (beginning on the date of signing of such agreement), subject to conditions.
- (q) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, computer software, industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience.
- (r) The 2% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.
- (s) The 10% rate applies if the interest is beneficially owned by a financial institution or if it is beneficially owned by a resident of the other contracting state and is paid with respect to indebtedness arising from a sale on credit by a resident of that other state of equipment, merchandise or services, unless the sale is between persons not dealing with each other at arm's length. The 15% rate applies to interest in other cases.
- (t) The 5% rate applies to the right to use copyrights of literary, artistic or scientific works. The 10% rate applies to the use of, or the right to use, industrial, commercial or scientific equipment, or patents. The 15% rate applies to the use of, or the right to use, trademarks, designs or models, plans, secret formulas or processes and to information concerning industrial, commercial or scientific experience.
- (u) The 10% rate applies if the interest is beneficially owned by a resident of other contracting state. The 5% rate applies to interest paid in connection with the sale on credit of industrial, commercial or scientific equipment, or on loans granted by banks.
- (v) The 5% rate applies with respect to copyrights of scientific works, patents, trademarks, secret formulas or processes or information concerning industrial, commercial or scientific experience.
- (w) The 10% rate applies if the interest is beneficially owned by a resident of the other contacting state.
- (x) The 8% rate applies to royalties with respect to copyrights of scientific works, patents, trademarks, designs or models plans, secret formulas or processes, or information concerning industrial commercial or scientific experience.

- (y) For purposes of giving relief under a double tax agreement, IREF distributions (see *Irish Real Estate Funds* in Section B) are regarded as income from immovable property if the investor in an investment undertaking is beneficially entitled directly or indirectly to at least 10% of the IREFs units. Otherwise, the payment is regarded as a dividend for treaty purposes. The table assumes that the distribution is not from an IREF.

Ireland has entered into limited double tax agreements with Guernsey, the Isle of Man and Jersey, which do not provide for reductions in withholding taxes.

Ireland has signed a double tax treaty with Ghana.

Ireland has ratified the protocol to the existing double tax treaty with Belgium. Notification of the completion of Belgium's ratification procedure is awaited. Negotiations for a protocol to the existing double tax treaty with Mexico have concluded.

Ireland is negotiating double tax treaties with Azerbaijan, Oman, Turkmenistan and Uruguay.

Ireland's existing treaties will also be updated to incorporate provisions under the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI). Ireland deposited its Instrument of Ratification of the MLI with the OECD on 29 January 2019. The MLI will enter into force for Ireland on 1 May 2019.

A. At a glance

Resident Corporation Income Tax Rate (%)	0 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0 (a)
Withholding Tax (%)	
Dividends	0
Interest	0 (b)
Royalties	0
Net Operating Losses	
Carryback	1 (c)
Carryforward	Unlimited (c)

- (a) The standard 0% rate of corporate income tax applies to all profits derived by companies except for the following:
- Certain banking business in the Isle of Man and certain retail business in the Isle of Man, which are subject to tax at a rate of 10%
 - Profits arising from land and property in the Isle of Man, which are subject to tax at a rate of 20%
- (b) Information is exchanged automatically in all cases.
- (c) Loss relief is available in certain circumstances (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in the Isle of Man are subject to income tax on their worldwide income, but relief from double taxation may be available. A nonresident company with a branch carrying on a trade in the Isle of Man is subject to tax on the income of the branch. A company is resident in the Isle of Man if it is incorporated in the Isle of Man or if the central management and control of the company is exercised there.

Rates of corporation tax. The standard rate of corporate income tax is 0%. This rate applies to all profits derived by trading and investment companies, except for the following:

- Certain banking business in the Isle of Man and certain retail business in the Isle of Man, which are subject to tax at a rate of 10%
- Profits arising from land and property in the Isle of Man, which are subject to tax at a rate of 20%

Trading companies may also elect to be taxed at the 10% rate.

Special types of companies. Special types of companies in the Isle of Man are described briefly below.

Funds industry. The Isle of Man has a full suite of fund options, with the Specialist Funds being a popular vehicle for alternative investment. Management fees, including administration services' fees, to Specialist Funds, are exempt for value-added tax (VAT) purposes if the services are provided from the IOM. Specialist Funds can include close-ended investment trust companies. The exemption can also cover UK-listed investment entities, including investment trust companies, venture capital trusts, and certain overseas funds.

The Isle of Man also offers exempt schemes that are not subject to regulation. Exempt schemes may have up to 49 members (provided the scheme is not available to the public; that is, it is a private engagement). Virtually all types of assets can be held in these schemes.

Overseas funds may be administered in the Isle of Man without being subject to Isle of Man regulations if they are incorporated in a jurisdiction with an appropriate regulatory framework.

Limited liability companies. The Limited Liability Companies Act 1996 allows for the formation of limited liability companies (LLCs). The liability of the members of an LLC is limited to the members' contributions to capital.

For Manx tax purposes, an LLC is treated like a partnership. Consequently, an LLC's profits are allocated among its members for tax purposes.

New Manx Vehicles. The New Manx Vehicle (NMV) is a corporate vehicle that is subject to simplified filing requirements and that is designed to be flexible and inexpensive to administer. It is taxed in the same manner as normal Isle of Man companies.

Manx foundations. Under the Foundations Act 2011, foundations can be created in the Isle of Man. Manx foundations are regarded as corporate taxpayers for purposes of Manx corporate income tax and are taxed in the same manner as normal Isle of Man companies. Manx foundations are of particular interest to persons who are from civil law jurisdictions.

Capital gains. The Isle of Man does not impose a tax on capital gains.

Administration. Tax returns must be filed within 12 months and 1 day after the accounting year-end, and any tax payable is due at the same time. In certain circumstances, companies wholly subject to the 0% rate file shortened tax returns.

Filing penalties apply for the late submission of company returns. The first penalty is GBP250. A further penalty of GBP500 is

imposed if the return is not filed within 18 months and 1 day after the end of the accounting period. If the return remains outstanding 24 months after the end of the accounting period, the company and its officers may be subject to criminal proceedings.

Withholding taxes. In general, no withholding tax is imposed on dividends, interest and royalties paid by Isle of Man resident companies. The Assessor of Income Tax may require a person who makes a payment or credit of taxable income to a person resident outside the Isle of Man to deduct income tax from such payment or credit at a rate specified by the Assessor. For example, a 20% withholding tax is imposed on Isle of Man rent paid by Isle of Man resident companies to nonresident companies and individuals.

Foreign tax relief. Foreign tax on income of a resident company may be credited against Manx income tax on the same profits. Foreign tax relief cannot exceed the income tax assessed by the Isle of Man on those profits.

C. Determination of trading income

General. The tax assessment is based on financial accounts prepared using generally accepted accounting principles, subject to certain adjustments and provisions.

Expenses must be incurred wholly and exclusively for the purpose of the trade and not be capital in nature. Dividends are not deductible in calculating taxable profit.

Inventories. Inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not acceptable.

Capital allowances (tax depreciation)

Plant and machinery. A first-year allowance of up to 100% may be claimed. Annual writing-down allowances of 25% may also be claimed.

Motor vehicles. Expenditures on motor vehicles qualify for an annual allowance of 25% of the declining balance. The maximum annual allowance is GBP3,000.

Industrial buildings, agricultural buildings and tourist premises. A 100% initial allowance may be claimed on capital investment to acquire, extend or alter a qualifying industrial building, agricultural building or tourist facility. This allowance is granted on expenditures in excess of any government grants received.

Disposals. On the ultimate disposal of assets on which capital allowances have been claimed, an adjustment is made by add-back or further allowance to reflect the net cost to the company of the asset.

Relief for trading losses. Trading losses may be used to offset other income of the year in which the loss was incurred or income of the preceding year if the same trade was carried on, or losses may be carried forward, without time limit, to offset future income from the same trade. Special rules apply to the carryback of losses on commencement or cessation of the trade.

Companies may also surrender losses to 75%-group companies. A recipient company can use surrendered losses only against profits earned in the same year of assessment.

Under the loss relief rules described above, relief is allowable only against profits chargeable at the same rate of tax. Losses arising from activities subject to tax at the rate of 0% may not be relieved against profits taxed at 10%.

D. Other significant taxes

The Isle of Man and the United Kingdom are considered one area for VAT, customs and excise purposes. VAT, customs and excise rates are levied in the Isle of Man at the same rates as in the United Kingdom. The Customs and Excise Division in the Isle of Man operates independently from the United Kingdom, but under similar legislation.

Under Protocol 3 of the UK's Treaty of Accession to the European Union (EU), the Isle of Man enjoys the benefits of being within Europe for financial services, customs and VAT purposes, but outside the United Kingdom and the EU with respect to direct taxation and legal and regulatory matters. This makes it possible to operate businesses from the Isle of Man that are subject to a corporate income tax rate of 0%, but are VAT-registered. It allows UK inward investors to arrange for VAT registration in the Isle of Man without the risk of a taxable presence in the United Kingdom. The Isle of Man has its own Electronic Processing Unit (EPU), whereby international traders or their agents can electronically declare imports or exports into or out of the Isle of Man or the United Kingdom. This results in a system-generated customs clearance. On payment of duties and taxes due, goods can then enter into free circulation and be traded with any other EU member state. Businesses can land their goods in the Isle of Man or the United Kingdom and make customs declarations through the Isle of Man for both jurisdictions. Systems and procedures in both the Isle of Man and the United Kingdom are the same and rules, procedures and decisions from the Isle of Man apply throughout the EU.

The Isle of Man has the same system for National Insurance contributions as the United Kingdom, but the contributions are calculated at lower rates.

E. Miscellaneous matters

Anti-avoidance provisions. The Assessor of Income Tax has the authority to make an assessment or an additional assessment in situations in which the Assessor considers Manx tax to have been avoided. Appeals are made to the Income Tax Commissioners. No assessment is made if the person involved provides evidence to the Assessor that the purpose of avoiding or reducing income tax liability was not the primary purpose or one of the primary purposes for which the transaction was carried out.

Foreign-exchange controls. The Isle of Man does not impose any foreign-exchange controls.

Transfer pricing. Isle of Man law does not include transfer-pricing rules. However, domestic anti-avoidance provisions need to be considered.

Debt-to-equity rules. The Isle of Man does not impose debt-to-equity requirements.

F. Tax treaties

The Isle of Man has entered into double tax treaties with Bahrain, Estonia, Guernsey, Jersey, Luxembourg, Malta, Qatar, Seychelles, Singapore, and the United Kingdom. It has also signed a double tax treaty with Belgium, but this treaty is not yet in force.

In addition, the Isle of Man has entered into agreements with the following countries to eliminate the double taxation of profits with respect to enterprises operating ships or aircraft in international traffic.

Denmark	Germany	Norway
Faroe Islands	Greenland	Poland
Finland	Iceland	Sweden
France	Netherlands	United States

The Isle of Man has signed tax information exchange agreements (TIEAs) with the following countries.

Argentina	Germany	Poland
Australia	Greenland	Portugal
Botswana	Iceland	Romania
British Virgin Islands	India	Slovenia
Canada	Indonesia	Spain*
Cayman Islands	Ireland	Swaziland*
China (mainland)	Italy	Sweden
Czech Republic	Japan	Switzerland
Denmark	Lesotho	Turkey
Faroe Islands	Mexico	Turks and Caicos Islands
Finland	Netherlands	United Kingdom
France	New Zealand	United States
	Norway	

* TIEAs with these countries are awaiting ratification.

A. At a glance

Corporate Income Tax Rate (%)	23 (a)
Capital Gains Tax Rate (%)	23 (a)(b)
Branch Tax Rate (%)	23 (a)
Withholding Tax (%)	
Dividends	0/15/20/25/30 (c)(d)

Interest	0/23 (a)(c)(e)(f)
Royalties from Patents, Know-how, etc.	23 (a)(c)(e)
Branch Remittance Tax	0
Net Operating Losses (Years) Carryback	0
Carryforward	Unlimited

- (a) This is the regular company tax rate for profits and real capital gains. Reduced rates of company tax are available in accordance with the Capital Investment Encouragement Law (for details, see Section B).
- (b) See Section B for details.
- (c) The withholding tax may be reduced by applicable tax treaties.
- (d) The 0% rate generally applies to distributions to Israeli parent companies. In addition, reduced withholding tax rates of 15% and 20% may apply under the Capital Investment Encouragement Law.
- (e) In principle, the withholding taxes on interest and royalties are not final taxes.
- (f) Interest paid to nonresidents on Israeli corporate bonds registered for trading on the Tel-Aviv Stock Exchange is exempt. In general, interest paid to nonresidents on Israeli governmental bonds is exempt. However, interest on short-term bonds (issued for 13 months or less) is taxable.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to Israeli tax on their worldwide income. Nonresident companies are subject to Israeli tax on income accrued or derived in Israel, unless otherwise provided for in an applicable tax treaty.

A company is considered resident in Israel for Israeli tax purposes if either of the following applies:

- It is incorporated in Israel.
- Its business is controlled and managed in Israel.

Rates of corporate tax. Effective from 1 January 2018, the regular rate of company tax is 23%. The following are the combined Israel taxes on profits, taking into account the 30% withholding tax on dividends paid to shareholders holding 10% or more of the company (material shareholders) and the 25% withholding tax imposed on shareholders holding less than 10% of the company:

- Material shareholders: 46.1% for 2018 and future years. Shareholders who are individuals may be subject to an additional tax at a rate of 3% on their taxable income in excess of ILS640,000 (linked to the Consumer Price Index each year).
- Other shareholders: 42.25% for 2018 and future years. For individual shareholders, an additional tax of 3% may apply (see above).

The dividend withholding tax rates mentioned above may be reduced based on applicable tax treaties.

Tax levy on oil and gas. Under the Windfall Profits Tax Law, a levy is imposed on oil and gas profits from an oil or gas project in the relevant tax year. The levy is designed to capitalize on the economic dividend arising from each individual reservoir. The levy is imposed only after the investments in exploration, development and construction are fully returned plus a yield that reflects, among other items, the developer's risks and required financial expenses. The levy is progressive and has a relatively lower rate when first collected, and increases as the project's profit margins grow.

Tax reductions and exemptions. The major tax reductions and exemptions offered by Israel are described below.

Capital Investment Encouragement Law. The Capital Investment Encouragement Law has the following objectives:

- Achieving of enhanced growth targets in the business sector
- Improving the competitiveness of Israeli industries in international markets
- Creating employment and development opportunities in outlying areas

Precedence is granted to innovation and development areas.

The country is divided into national priority areas, which benefit from several reduced tax rates and benefits based on the location of the enterprise.

A reduced uniform corporate tax rate for exporting industrial enterprises (generally over 25% of turnover from export activity) applies. The reduced tax rate does not depend on a program and applies to the industrial enterprise's industrial income.

The reduced tax rates for industrial enterprises that meet the criteria of the law are 7.5% for Development Area A and 16% for the rest of the country. In addition, accelerated depreciation applies. The accelerated depreciation reaches 400% of the standard depreciation rate on buildings (not exceeding 20% per year and exclusive of land) and 200% of the standard depreciation rate on equipment.

A reduced tax on dividends of 15% or 20% is imposed without distinction between foreign and local investors. These tax rates may be reduced under applicable tax treaties. On the distribution of a dividend to an Israeli company, no withholding tax is imposed.

A unique tax benefit is granted to certain large industrial enterprises. This entitles such companies to a reduced tax rate of 5% in Development Area A and 8% in the rest of the country.

In addition to the above tax benefits, fixed asset grants of 20% to 30% of the investment cost of fixed assets may be granted to enterprises in Development Area A.

Grants may also be made under the Employment Grant Program. These grants are made to create incentives for employment in the outlying areas of Israel. The grants are up to 27.5% of the cost of salaries for a period of two and one-half to four years, depending on the location, number of employees and the employees' salaries.

New innovation box. Israel approved a new innovation box regime for intellectual property (IP)-based companies, effective from 1 January 2017. This regime is included in the Capital Investment Encouragement Law.

The Israeli government tailored the new regime to the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) framework, encouraging multinationals to consolidate IP ownership and profits in Israel, together with existing Israeli research and development (R&D) functions.

Tax benefits created to achieve this goal include a reduced corporate income tax rate of 6% on IP-based income and on capital gains from future sales of IP. The 6% rate applies to qualifying Israeli companies that are part of a group with global consolidated revenue of over ILS10 billion (USD2,500,000,000).

Other qualifying companies with global consolidated revenue below ILS10 billion are subject to a 12% tax rate. However, if the Israeli company is located in a development area, the tax rate is further reduced to 7.5%.

In addition, withholding tax on dividends is subject to a reduced rate of 4% for all qualifying companies (unless further reduced by a treaty).

Entering into the regime is not conditioned on making additional investments in Israel. A company can qualify if it invests at least 7% of the last three years' revenue in R&D or incurs ILS75 million in R&D expenses per year and if it meets one of the following conditions:

- It has at least 20% R&D employees (or more than 200 R&D employees).
- A venture capital investment of ILS8 million was previously made in the company.
- It had average annual growth over three years of 25% in sales or employees.

Companies not meeting the above conditions may still be considered qualified companies at the discretion of the Israeli Innovation Authority in the Economy Ministry.

Companies wishing to exit from the regime in the future will not be subject to the clawback of tax benefits.

The Finance Committee also approved a stability clause to encourage multinationals to invest in Israel. Accordingly, companies will be able to confirm the applicability of tax incentives for a 10-year period under a ruling process.

In line with the new OECD Nexus Approach, the Finance Minister promulgated regulations to ensure that companies are benefiting from the regime to the extent qualifying R&D expenses are incurred.

Research and development incentives. R&D programs are available to Israeli companies. The Office of the Chief Scientist at the Ministry of Economy primarily provides these incentives. The company can obtain an R&D grant equal to about 30% to 60% of its R&D expenses, depending on the grant program, the company's technology innovation and its business model. Binational agreements for joint R&D projects are also available. These agreements provide for grants equaling 30% to 60% of the R&D expenses incurred during the commercial phase.

Some of Israel's tax treaties include tax-sparing clauses under which regular Israeli taxes, rather than reduced Israeli taxes, may be credited against tax imposed on dividends received from an Israeli company in the investor's country of residence. As a result, the Israeli tax benefits may be partially or fully preserved for an investor in an Israeli company enjoying the benefits of the Capital Investment Encouragement Law.

Eilat free trade zone. A value-added tax (VAT) exemption and employment benefits are granted to enterprises in the Eilat free trade zone.

Other incentives. Approved residential rental properties qualify for reduced company tax rates on rental income (and on gains derived from sales of certain buildings that have a residential element; a building has a residential element if at least 50% of the floor space is rented for residential purposes for a prescribed number of years, according to detailed rules). The reduced rates generally range from 11% (plus 15% withholding tax on dividends) for companies to 20% for individuals.

Preferential tax treatment may also be allowed with respect to the following:

- Real Estate Investment Trust (REIT) companies
- Agriculture
- Oil
- Movies
- International trading
- R&D financing
- Hotels and tourist ventures

Foreign resident investors may qualify for exemption from capital gains tax in certain circumstances (see *Capital gains and losses*).

Capital gains and losses

Residents. Resident companies are taxable on worldwide capital gains. Capital gains are divided into real and inflationary components. The following are descriptions of the taxation of these components:

- Effective from 1 January 2018, the tax rate on real capital gains is the standard corporate tax rate of 23%.
- The inflationary component of capital gains is exempt from tax to the extent that it accrued on or after 1 January 1994, and is generally taxable at a rate of 10% to the extent that it accrued before that date.

Gains derived from sales of Israeli real estate or from sales of interests in real estate associations (entities whose primary assets relate to Israeli real estate) are subject to Land Appreciation Tax at rates similar to those applicable to other capital gains.

Capital losses may be used to offset capital gains derived in the same or future tax years without time limit. In each year, capital losses are first offset against real gains and then offset against taxable inflationary amounts in accordance with the following ratio: ILS3.5 of inflationary amounts per ILS1 of capital losses. Capital losses from assets located abroad must be offset against capital gains on other assets abroad, then against capital gains from assets in Israel.

Capital losses incurred on securities can also be offset against dividend and interest income in the same year, subject to certain conditions.

Nonresidents. Unless a tax treaty provides otherwise, in principle, nonresident companies and individuals are subject to Israeli tax on their capital gains relating to any of the following:

- An asset located in Israel.

- An asset located abroad that is primarily a direct or indirect right to an asset, inventory or real estate in Israel or to a real estate association (an entity whose primary assets relate to Israeli real estate). Tax is imposed on the portion of the consideration that relates to such property in Israel.
- Shares or rights to shares (for example, warrants and options) in an Israeli resident entity.
- A right to a nonresident entity that primarily represents a direct or indirect right to property in Israel. Tax is imposed on the portion of the consideration that relates to such property in Israel.

Foreign residents not engaged in business in Israel may qualify for exemption from capital gains tax on disposals of the following investments:

- Securities traded on the Tel-Aviv stock exchange (with certain exceptions)
- Securities of Israeli companies traded on a recognized foreign stock exchange

The above exemption does not apply to the following:

- Gains attributable to a permanent establishment (generally a fixed place of business) of the investor in Israel
- Shares of Real Estate Investment Trust (REIT) companies
- Capital gains derived from the sale of Israeli governmental short-term bonds (issued for 13 months or less)

Foreign residents may also qualify for an exemption from capital gains tax on disposals of all types of Israeli securities not listed to trade that were purchased on or after 1 January 2009 if the seller (the company or individual who sold the Israeli securities to the foreign resident) was not a related party.

The above exemption does not apply to the following:

- Gains attributable to a permanent establishment (generally a fixed place of business) of the investor in Israel
- Shares of a company whose assets are principally Israeli real estate
- Shares of a company that has the value of its assets derived principally from the usufruct of immovable property and right to payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources (for example, companies that hold licenses to exploit gas and minerals in Israel's territory, which includes Israel's economic water)

In other cases, unless a tax treaty provides otherwise, foreign resident companies pay capital gains tax in accordance with the rules and rates applicable to Israeli resident companies, as described above. However, nonresidents investing with foreign currency may elect to apply the relevant exchange rate rather than the inflation rate to compute the inflationary amount.

Administration. The Israeli tax year is normally the calendar year. However, subsidiaries of foreign publicly traded companies may sometimes be allowed to use a different fiscal year.

Companies are generally required to file audited annual tax returns and financial statements within five months after the end of their fiscal year, but extensions may be obtained.

Companies must normally file monthly or bimonthly reports and make payments with respect to the following taxes:

- Company tax advances, which are typically computed as a percentage of a company's sales revenues
- Supplementary company tax advances with respect to certain nondeductible expenses
- Tax and social security contributions withheld from salaries and remittances to certain suppliers
- VAT

Nonresidents are required to appoint an Israeli tax representative and VAT representative if any part of their activities is conducted in Israel. The VAT representative is deemed to be the tax representative if no other tax representative is appointed. The tax representative is empowered to pay tax out of the foreign resident's assets.

Dividends. A 30% withholding tax is generally imposed on dividends paid to individual shareholders holding 10% or more of the shares in an Israeli company (material shareholders). A 25% withholding tax is imposed on dividends paid to individual shareholders holding less than 10% of the shares in an Israeli company and on regular dividends paid by a publicly traded company (regardless of whether the recipient is a material shareholder). However, resident companies are exempt from company tax on dividends paid out of regular income that was accrued or derived from sources within Israel. Companies are generally subject to tax at a rate of 25% on foreign dividend income that is paid from a foreign source or from income accrued or derived abroad (foreign-source income that is passed up a chain of companies).

A reduced withholding tax of 15% or 20% is imposed on dividends paid out of the income of a company entitled to the benefits of the Capital Investment Encouragement Law. The rate may be further reduced under an applicable tax treaty. However, if such dividend is paid to an Israeli company, it is generally exempt from withholding tax (with certain exceptions).

Interest. Israeli resident companies are taxable on worldwide interest, original discount and linkage differentials income. The tax rate for these types of income is the standard corporate tax rate of 23%. Interest, original discount and linkage differentials income are treated as derived from Israeli sources if the payer is located in Israel. In principle, the same taxation rules apply to non-Israeli resident companies on Israeli-source interest, original discount and linkage differentials income, unless a tax treaty provides otherwise.

Nevertheless, an exemption from Israeli tax is available to foreign investors that receive interest income on bonds issued by Israeli companies traded on the Israeli stock exchange.

In addition, interest paid to nonresidents on Israeli governmental bonds that are issued for 13 months or more is exempt.

Israeli holding companies and participation exemption. To qualify for the participation exemption, an Israeli holding company must satisfy various conditions, including the following:

- It must be incorporated in Israel.
- Its business is controlled and managed in Israel only.
- It may not be a public company or a financial institution.
- It must not have been formed in a tax-deferred reorganization.

- For 300 days or more in the year, beginning in the year after incorporation, the holding company must have an investment of at least ILS50 million in the equity of, or as loans to, the investee companies, and at least 75% of the holding company's assets must consist of such equity investments and loans.

In addition, the foreign investee company must satisfy the following conditions:

- It must be resident in a country that entered into a tax treaty with Israel, or it must be resident in a foreign country that had a tax rate for business activity of at least 15% on the date of the holding company's investment (however, it is not required that the investee company pay the 15% tax [for example, it obtains a tax holiday]).
- At least 75% of its income in the relevant tax year is accrued or derived from a business or one-time venture abroad.
- The Israeli holding company must hold an "entitling shareholding" in the investee company for at least 12 consecutive months. An "entitling shareholding" is a shareholding that confers at least 10% of the investee's profits. The entitling shareholding must span a period of at least 12 months that includes the date on which the income is received.

An Israeli holding company is exempt from tax on the following types of income:

- Capital gains derived from the sale of an entitling shareholding in an investee company
- Dividends distributed during the 12-month minimum shareholding period with respect to an entitling shareholding in an investee company
- Interest, dividends and capital gains derived from securities traded on the Tel-Aviv Stock Exchange
- Interest and indexation amounts received from Israeli financial institutions

In addition, dividends paid by Israeli holding companies to foreign resident shareholders are subject to a reduced rate of dividend withholding tax of 5%.

Foreign tax relief. A credit for foreign taxes is available for federal and state taxes but not municipal taxes. Any excess foreign tax credit may be offset against Israeli tax on non-Israeli-source income from the same type in the following five tax years.

With respect to foreign dividend income, an Israeli company may receive a direct and an underlying tax credit for foreign taxes. The foreign dividend income is grossed up for tax purposes by the amount of the creditable taxes. The following are the alternative forms of the credit:

- Direct foreign tax credit only: corporate tax rate of 23% is imposed on foreign dividend income, and any dividend withholding tax incurred is creditable in Israel.
- Direct and underlying foreign tax credit: corporate tax rate of 23% is imposed on foreign dividend income, and a credit is granted for dividend withholding tax and underlying corporate tax paid abroad by 25%-or-greater affiliates and their direct 50%-or-greater subsidiaries. If an underlying foreign tax credit is claimed, any excess foreign tax credit may not be used to offset company tax in future years.

Foreign residents that receive little or no relief for Israeli taxes in their home countries may be granted a reduced Israeli tax rate by the Minister of Finance.

C. Determination of trading income

General. Taxable income is based on financial statements that are prepared in accordance with generally accepted accounting principles and are derived from acceptable accounting records. In principle, expenses are deductible if they are wholly and exclusively incurred in the production of taxable income. Various items may require adjustment for tax purposes, including depreciation, R&D expenses, and vehicle and travel expenses.

Inventories. In general, inventory may be valued at the lower of cost or market value. Cost may be determined using one of the following methods:

- Actual
- Average
- First-in, first-out (FIFO)

The last-in, first-out (LIFO) method is not allowed.

Provisions. Bad debts are deductible in the year they become irrecoverable. Special rules apply to employee-related provisions, such as severance pay, vacation pay, recreation pay and sick pay.

Depreciation. Depreciation at prescribed rates, based on the type of asset and the number of shifts the asset is used, may be claimed with respect to fixed assets used in the production of taxable income.

Accelerated depreciation may be claimed in certain instances. For example, under the Inflationary Adjustments Regulations (Accelerated Depreciation), for assets first used in Israel between 1 June 1989 and 31 December 2013, industrial enterprises may depreciate equipment using the straight-line method at annual rates ranging from 20% to 40%. Alternatively, they may depreciate equipment using the declining-balance method at rates ranging from 30% to 50%.

The following are some of the standard straight-line rates that apply primarily to non-industrial companies.

Asset	Rate (%)
Mechanical equipment	7 to 10
Electronic equipment	15
Personal computers and peripheral equipment	33
Buildings (depending on quality)	1.5 to 4
Goodwill	10 (a)
Patent rights and technology	12.5 (b)

(a) Subject to the fulfillment of certain conditions.

(b) For industrial companies, subject to the fulfillment of certain conditions.

Groups of companies. Subject to certain conditions, consolidated returns are permissible for an Israeli holding company and its Israeli industrial subsidiaries if the subsidiaries are all engaged in the same line of production. For this purpose, a holding company is a company that has invested at least 80% of its fixed assets in the industrial subsidiaries and controls at least 50% (or two-thirds in certain cases) of various rights in those subsidiaries. For a

diversified operation, a holding company may file a consolidated return with the subsidiaries that share the common line of production in which the largest amount has been invested.

Group returns may also be filed by an Israeli industrial company and Israeli industrial subsidiary companies if the subsidiaries are at least two-thirds controlled (in terms of voting power and appointment of directors) by the industrial company and if the industrial company and the subsidiaries are in the same line of production.

Detailed rules concerning the deferral of capital gains tax apply to certain types of reorganizations, including corporate mergers, divisions and shares-for-assets exchanges. In many cases, an advance ruling is necessary.
