This Tax Alert updates previously issued lists of Internal Revenue Code Section 1256 qualified boards or exchanges.

**Background**

Generally, a taxpayer must mark to market transactions qualifying as Section 1256 contracts at the end of each tax year as if such transactions were sold for fair market value. Subject to certain exceptions, any gain or loss on a Section 1256 contract is treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss, regardless of how long the taxpayer actually held the contract.

Section 1256 contracts include (among other things) regulated futures contracts and non-equity options. A regulated futures contract is a contract that is (i) marked to market on a daily basis to determine the amount that the taxpayer must deposit to its margin account to cover losses, or the amount that it may withdraw from such account as a result of favorable price changes during the day, and (ii) traded on or subject to the rules of a qualified board or exchange. A non-equity option is an option (other than an “equity” option) that is traded on or subject to the rules of a qualified board or exchange. A “qualified board or exchange” means (i) a national securities exchange, (ii) a domestic board of trade, or (iii) any other exchange, board of trade, or other market that the Secretary determines has rules adequate to carry out the purposes of Section 1256.
