Super deduction incentives. Super deduction incentives are discussed below.

A super deduction for labor-intensive industry is available. This income tax incentive is available for a domestic corporate taxpayer that conducts new capital investment or business expansion in a business sector that is a labor-intensive industry sector and is not eligible for a tax allowance or the Tax Holiday Incentive. The income tax facility provided to the qualified taxpayer is an investment allowance of 60% (on top of normal tax depreciation) of the amount invested in tangible fixed assets, including land, which are used in the main business activity. This allowance may be claimed at the rate of 10% each year over a six-year period beginning with the fiscal year of the starting of commercial production.

A super deduction for apprentice, internship and teaching activities is available. For a domestic corporate taxpayer that carries out work practice, internship or teaching to coach and develop human resources with “certain competencies” may be eligible for a reduction of gross revenue of a maximum of 200% of the total expenses incurred for work practice, internship or teaching activities. “Certain competencies” is defined as competency to increase human resources quality through work practice, internship or strategic teaching to achieve human resources effectiveness and efficiency as part of a human resources investment, and to meet the structure of labor requirements that are needed by the business or industry sectors.

A super deduction for research and development (R&D) activities is available. A domestic corporate taxpayer that carries out certain R&D activities in Indonesia may be eligible for a reduction in gross revenue of a maximum of 300% of the total expenses incurred for “certain R&D activities” in Indonesia. Certain R&D activities are defined as R&D activities conducted in Indonesia to produce invention, innovation, mastery of new technology or transfer of technology for industrial development to increase the competitiveness of national industry.

Special tax rates. Special tax rates granted to certain companies are described below.

Petroleum. Tax rates applicable to petroleum companies are those applicable when the petroleum companies’ contracts were signed and approved. In addition, foreign petroleum companies are subject to branch profit tax of 20% on their taxable income, except as otherwise provided in an applicable tax treaty.

Mining. Income tax applicable to general mining companies may depend on generation of the concessions granted (that is, when the concession is granted). Holders of earlier concessions are taxed at the rates ranging from 30% to 45% (the tax rates are the rates prevailing at the time the concession was granted). Holders of the more recent concessions are taxed in accordance with the prevailing tax laws (current rate is 22%). Although withholding tax on dividends paid overseas is generally imposed at a rate of 20%, some earlier concessions provide a reduced rate of 10%. These rates may be subject to reduction under certain tax treaties.

Construction companies. Construction companies are subject to corporate income tax with tax rates ranging from 2% to 6% of the contract value. The income tax applies to complete or partial construction activities. The applicable tax rate depends on the business qualification of the respective company and/or the type of services performed. The tax is considered a final tax. Consequently, no corporate income tax is due on the income at the end of a fiscal year. Foreign construction companies operating in Indonesia through a branch or a permanent establishment are subject to further branch profit tax of 20% on the taxable income (accounting profit adjusted for tax) after deduction of the final tax. The rate is subject to applicable tax treaties. Exemption from branch profit tax may apply in the circumstances described above (see *Branch profit tax*).

Foreign drilling companies. Foreign drilling companies are subject to corporate income tax at an effective rate of 3.75% of their gross drilling income, as well as to branch profit tax of 20% on their after-tax taxable income. The branch profit tax may be reduced under certain tax treaties. Branch profit tax may be avoided in the circumstances described above (see *Branch profit tax*).

Nonresident international shipping companies and airlines. Nonresident international shipping companies and airlines are subject to tax at a rate of 2.64% of gross turnover (inclusive of branch profit tax). As a result of the reduction of the corporate tax rate in 2010, the effective tax rate may change. However, this has not yet been confirmed through the issuance of a tax regulation.

Small and medium-sized entities. Individual and corporate taxpayers (except permanent establishments) with annual gross turnover of less than IDR4.8 billion are subject to income tax at a rate of 0.5% of monthly gross turnover for the following maximum periods:

- Seven fiscal years for individual taxpayers
- Four fiscal years for corporate taxpayers in the form of cooperatives, limited partnerships or firms
- Three fiscal years for corporate taxpayers in the form of companies

This income tax is final.

The following taxpayers are excluded from this final tax:

- Taxpayers who choose to be subject to normal income tax rates
- Corporate taxpayers that have already received tax allowance or tax holiday facilities
- Corporate taxpayers in the form of limited partnerships or firms that are established by a few individual taxpayers who have special expertise and provide the same services as independent professional services
- Corporate taxpayers that have not yet started commercial operations
- Corporate taxpayers that have gross revenue of IDR4.8 billion or more from commercial operations in a year

For purposes of the above measure, business income does not include income from independent professional services, such as, among others, services provided by lawyers, accountants, medical doctors and notaries.

Taxpayers qualifying for a different final tax regime, such as construction services companies, are not eligible for this 0.5% final tax.

Under the new Tax Regulations Harmonization Law (HPP Law), starting from the 2022 fiscal year, part of a certain annual gross revenue up to IDR500 million of an individual taxpayer that is subject to final income tax as above is not subject to income tax.

Capital gains. A 0.1% final withholding tax is imposed on proceeds of sales of publicly listed shares through the Indonesian stock exchange. An additional tax at a rate of 0.5% of the share value is levied on sales of founder shares associated with a public offering. Founder shareholders must pay the 0.5% tax within one month after the shares are listed. Founder shareholders that do

not pay the tax by the due date are subject to income tax on the gains at the ordinary income tax rate.

Capital gains derived by residents are included in taxable income and are subject to tax at the normal income tax rate. Capital gains derived by nonresidents are subject to tax at a rate of 20%. The law provides that the 20% tax is imposed on an amount of deemed income. The Minister of Finance established the deemed income for sales of unlisted shares. The deemed income equals 25% of the gross sale proceeds, resulting in an effective tax rate of 5% of the gross sale proceeds. This rule applies to residents of non-treaty countries and to residents of treaty countries if the applicable treaty allows Indonesia to tax the income.

In addition to sales or transfers of shares, Indonesian tax applies a 20% tax rate to an estimated net income of 25% on sales or transfers of certain assets owned by non-Indonesian tax residents that do not have a permanent establishment in Indonesia. The assets are luxury jewelry, diamonds, gold, gemstones, luxury watches, antiques, paintings, cars, motorcycles, yachts and/or light aircraft. This results in an effective tax rate of 5%. The purchaser must withhold the tax. A tax exemption applies to transactions with a value of less than IDR10 million. The provisions of tax treaties override the above regulation.

The sale or transfer by nonresidents of shares in conduit companies or special purpose companies established or resident in tax-haven jurisdictions that have a special relationship with an Indonesian entity or an Indonesian permanent establishment of a foreign entity is deemed to be a sale or transfer of shares of the Indonesian entity or the permanent establishment. The relevant regulation provides that the Indonesian income tax applicable to the transaction is 5% of the gross sale proceeds. The 5% rate is derived from the application of the 20% cross-border withholding tax under Article 26 of the Income Tax Law to a profit that is deemed to be 25% of the gross sale proceeds. A provision in an applicable tax treaty overrides the above rule if the seller of the shares is a tax resident in a country that has entered into a tax treaty with Indonesia.

Sellers or transferors of the right to use land or buildings are subject to tax at a rate of 2.5% of the gross transfer value. The gross transfer value must represent the market value if the seller and buyer have a special relationship. Purchasers or transferees must pay a transfer duty of 5%, which may be reduced to 2.5% for transfers in business mergers approved by the Director General of Taxation.

Administration. The annual corporate income tax return must be filed by the end of the fourth month following the end of the fiscal year. The deadline can be extended for two months. The balance of annual tax due must be settled before filing the annual tax return.

Corporate income tax must be paid in advance through monthly installments, which are due on the 15th day of the month following the relevant month. The tax installment equals 1/12 of tax payable for the preceding year (after exclusion of non-regular income) or tax payable based on the latest tax assessment received.

Banks and securities companies calculate their monthly tax installments based on quarterly and semiannual financial reports, respectively.

Dividends. In general, dividends are taxable.

Starting November 2020, Indonesian-source dividends paid to tax-resident companies are exempt from tax. Dividends paid to tax-resident individuals are exempt from tax if such dividends are invested in Indonesia for a certain time period. If the exemption does not apply, dividends received by Indonesian resident individuals are subject to a final tax of 10%. To qualify for tax exemption, the dividend paid to resident companies and resident individuals must be declared at the annual general meeting of shareholders or as an interim dividend based on the prevailing regulations. Under the Company Law, dividends can only be paid out of profits.

Dividends remitted to overseas shareholders are subject to a final 20% withholding tax, unless an applicable tax treaty provides a lower rate.

Foreign dividends paid by offshore companies and after-tax profit from offshore permanent establishments, which are received by corporate or individual tax residents, are exempt from tax if such income is invested in Indonesia or used to support other businesses in Indonesia for a certain time period and satisfy certain conditions.

Foreign tax relief. A credit is allowed for tax paid or due overseas on income accruing to an Indonesian company, provided it does not exceed the allowable foreign tax credit. The allowable foreign tax credit is computed on a type (basket)-of-income and country-by-country basis.

C. Determination of trading income

General. Income is broadly defined. It includes, but is not limited to, the following:

- Business profits
- Gains from sales or transfers of assets
- Interest, dividends, royalties and rental and other income with respect to the use of property
- Income resulting from reorganizations, regardless of the name or form
- Gains from sales or transfers of all or part of a mining concession, funding participation or capital contribution of a mining company
- Receipt of refund of tax that has been claimed as a tax deduction
- Income earned by *syariah*-based businesses (*syariah* refers to businesses conducted in accordance with Islamic law)
- Interest compensation
- Surplus of Bank Indonesia

Certain income is not taxable or is subject to a final tax regime. Interest earned by resident taxpayers on time deposits, certificates of deposit and savings accounts is subject to a 20% withholding tax, representing a final tax on such income. A final 20% (or lower rate provided in a tax treaty) withholding tax is imposed on interest earned by nonresidents.

Taxpayers are generally able to deduct from gross income all expenses to the extent that they are directly or indirectly incurred in earning taxable income. Nondeductible expenses include the following:

- Income tax and penalties
- Expenses incurred for the private needs of shareholders, associates or members
- Gifts
- Donations (except for donations for national disasters, grants in the framework of R&D activities in Indonesia, grants for the development of social infrastructure, grants in the form of education facilities [for example, books, computers, chairs, tables and other educational resources] and grants for the development of sport)
- Reserves and provisions for certain industries

Business losses incurred overseas are not deductible.

Foreign-exchange gains and losses are treated as taxable income and deductible expenses in accordance with the generally accepted accounting procedures in Indonesia that are consistently adopted.

Under the HPP Law, starting from the 2022 fiscal year, certain benefits in kind will now be tax-deductible for the employer and become taxable income for the employee/recipient. “Benefit in kind” means consideration in kind in the form of goods other than money and/or consideration in the form of enjoyment for the right to use certain facilities and/or services. The HPP Law provides certain exemptions from this treatment.

Inventories. For tax purposes, inventories must be valued at cost using either the first-in, first-out (FIFO) or average-cost method. The last-in, first-out (LIFO) method is not allowed.

Provisions. Provisions are generally not deductible for tax purposes.

Certain taxpayers that may claim bad debt provisions as deductible expenses include banks and certain nonbank financial institutions, such as other corporate entities providing loan facilities, insurance companies, leasing companies that lease assets under finance leases, consumer financing companies, and factoring companies. The following companies may also claim tax deductions for reserves or provisions:

- Social insurance providers: reserves of social funds
- Forestry companies: reserves for reforestation
- Mining companies: reserves for reclamation of mining sites
- Industrial waste treatment companies: reserves for closure and maintenance of waste treatment plants

Taxpayers may claim tax deductions for bad debts if all of the following conditions are satisfied:

- The costs have been claimed as corporate losses in commercial financial reports.
- A list of the names of the debtors and totals of the bad debts is submitted to the Director General of Taxation.
- A legal suit for collection of the debt is filed with the public court or government institutions handling state receivables. Alternatively, taxpayers may publicize the bad debt in a general or specialized publication or obtain acknowledgment of the write-off of the bad debt from the relevant debtor.

The write-off of receivables from a related party is not deductible for tax purposes.

Depreciation and amortization allowances. Depreciation is calculated on the useful life of an asset by applying the straight-line method or declining-balance method. In general, depreciation is deducted beginning with the month the expenditure is incurred. However, for assets under construction, depreciation begins with the month in which the construction of the assets is completed. Buildings are depreciated using the straight-line method. The following table provides the useful lives and depreciation rates for depreciable assets.

Class of asset	Useful life (years)	Depreciation method	
		Straight-line (%)	Declining-balance (%)
Buildings			
Permanent	20	5	–
Non-permanent	10	10	–
Other assets			
Class 1	4	25	50
Class 2	8	12.5	25
Class 3	16	6.25	12.5
Class 4	20	5	10

Intangible assets with more than one year of benefit, including leases of tangible property, are amortized according to their useful lives using the same percentages applicable to fixed assets. Special depreciation and amortization rules apply to assets used in certain businesses or in certain areas (see Section B).

Under the HPP Law, starting from the 2022 fiscal year, depreciation of a permanent building that has a useful life of more than 20 years will be carried out using the straight-line method using a 20-year life or in accordance with the actual useful life based on the taxpayer's accounting records. Amortization of intangible assets that have a useful life of more than 20 years will be amortized over 20 years or in accordance with the actual useful life based on the taxpayer's accounting records.

Revaluation of assets for tax purposes. Subject to approval of the Directorate General of Taxation, increments resulting from revaluation of tangible fixed assets is subject to final income tax at the following rates:

- 3% for applications submitted from 15 October 2015 through 31 December 2015
- 4% for applications submitted from 1 January 2016 through 30 June 2016
- 6% for applications submitted from 1 July 2016 through 31 December 2016
- 10% for applications submitted in the 2017 fiscal year

The final tax is applied to any excess in value of the tangible fixed assets' revaluation or revaluation forecast over the tangible fixed assets' tax written-down value. This tax must be settled before the application is submitted. The value of tangible fixed assets being revalued should be the fair market value of the tangible fixed assets as determined by a licensed appraisal company. The

Directorate General of Taxation may redetermine the fair market value of the relevant tangible fixed assets.

Revaluation of fixed assets can be conducted on all of the tangible fixed assets owned by the company or certain selected tangible fixed assets if the assets are physically located in Indonesia and are used to earn, collect and maintain taxable income. The tangible fixed assets revaluation can only be performed every five years, and any breach of this period results in the imposition of additional tax. A tangible fixed asset that has been revalued is depreciated based on a new revalued cost base and is treated as having the same useful life as a new asset.

Revalued tangible fixed assets in Classes 1 and 2 (see *Depreciation and amortization allowances*) that are transferred before the end of their useful lives, as well as revalued tangible fixed assets in Classes 3 and 4, and land and buildings that are transferred within 10 years of their revaluation approval, are subject to additional tax.

Relief for losses. Tax losses may not be carried back. They may generally be carried forward for five years. Tax losses incurred by certain businesses or incurred in certain areas may be carried forward for up to 10 years (see Section B).

Groups of companies. The losses of one company may not be used to reduce the profits of an affiliate.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on delivery of taxable goods, on imports of goods and on services (including services furnished by foreign taxpayers outside Indonesia if the services have a benefit in Indonesia), unless specifically exempt; an offshore seller, offshore service provider or offshore e-commerce organizer can be appointed by the Indonesian tax authorities as an e-commerce VAT collector to collect, pay and report the VAT payable on e-commerce transactions with Indonesian customers because these transactions are considered to be a utilization of intangible taxable goods or taxable services from offshore within Indonesia	
Standard rate	10
(Under the HPP Law, starting 1 April 2022, the standard VAT rate is increased to 11% and will increase again to 12% starting no later than 1 January 2025.)	
Export of goods or certain services	0
Sales tax on luxury goods, imposed in addition to the VAT on the delivery of luxury goods manufactured in or imported into Indonesia; rate depends on the nature of the goods	10 to 200

Non-reporting of foreign loans results in the forfeiting of the deductibility of the interest.

Interest rates on related-party loans must be at arm's length.

Transfer pricing. The law provides that the following methods may be used to determine arm's-length pricing:

- Comparable uncontrolled price method
- Resale-price method
- Cost-plus method
- Profit-split method
- Transactional net margin method
- Comparable uncontrolled transaction method
- Tangible and intangible asset valuation method
- Business valuation method

The Indonesian tax authority requires that related-party transactions or dealings with affiliated companies be carried out in a "commercially justifiable way" and on an arm's-length basis. Taxpayers must maintain documentation establishing that related-party transactions are conducted at arm's length. The transfer-pricing study must be maintained for 10 years from the relevant tax year.

The Indonesian tax authority uses advance pricing agreements (APAs) to regulate transactions between related parties and to mitigate future transfer-pricing disputes with the Director General of Taxation. Broadly, an APA represents an advance agreement between a company and the Director General of Taxation regarding the determination of the acceptable pricing for a transaction between related parties. An APA provides the sales price for manufactured goods, the amount of royalties and other information. An APA may be entered into with the Director General of Taxation (unilateral) or between the Director General of Taxation and the foreign tax authority (bilateral).

F. Treaty withholding tax rates

Indonesia has introduced tough anti-treaty abuse rules. The Indonesian tax authority may ignore the provisions of a tax treaty if these rules are not satisfied.

The Indonesian tax authority may seek agreement with a tax treaty jurisdiction for exchange of information, mutual agreement procedure and assistance with tax collection.

The following table shows withholding tax rates under Indonesia's double tax treaties.

	Dividends (%)		Interest (b)	Royalties
	A	B	%	%
Algeria	15	15	0/15	15
Armenia	15	10	0/10	10

Sweden	15	10	0/10	10/15 (c)
Switzerland	15	10	10	10 (a)
Syria	10	10	10	15/20 (c)
Taiwan	10	10	0/10	10
Thailand	15	15	0/15	10/15 (c)
Tunisia	12	12	0/12	15
Turkey	15	10	0/10	10
Ukraine	15	10	0/10	10

	Dividends (%)		Interest (b)	Royalties
	A	B	%	%
United Arab Emirates	10	10	0/7	5 (a)
United Kingdom	15	10	0/10	10/15 (c)
United States	15	10	0/10	10
Uzbekistan	10	10	0/10	10
Venezuela	15	10	0/10	20 (a)
Vietnam	15	15	0/15	15
Zimbabwe	20	10	10	15 (a)
Non-treaty jurisdictions	20	20	20	20

A Rate applicable to portfolio investments.

B Rate applicable to substantial holdings.

(a) Technical services are subject to the following reduced rates of withholding tax:

- Germany: 7.5%
- Luxembourg: 10%
- Pakistan: 15%
- Papua New Guinea: 10%
- Switzerland: 5%
- United Arab Emirates: 5%
- Venezuela: 10%
- Zimbabwe: 10%

(b) If two rates are other than 0%, the higher rate applies to interest paid to companies in certain specified industries or to interest on certain bonds. The 0% rate applies if the beneficial owner of the interest is the government.

(c) The rates vary according to the rights or information licensed.

(d) The tax treaty allows each of the signatory jurisdictions to apply the domestic tax anti-avoidance rules.

In addition to the above treaties, Indonesia has entered into agreements for the reciprocal exemption of taxes and duties on air transport with Bangladesh, Croatia, Laos, Morocco, Saudi Arabia and South Africa.

Capital Gains Tax Rate (%)	15/35 (a)
Branch Tax Rate (%)	15/35 (a)
Withholding Tax (%)	
Dividends	0
Interest	15 (b)
Royalties	15 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (c)

- (a) The 15% rate is the general corporate income tax rate. The 35% rate applies to oil and gas production and extraction activities and related industries, including service contracts. The Kurdistan Region of Iraq has not yet adopted the 35% rate.
- (b) This withholding tax is imposed on payments to nonresidents.
- (c) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. In general, corporate income tax is imposed on profits arising in Iraq from commercial activities (or activities of a commercial nature), vocations and professions, including profits arising from contracts and undertakings. In assessing the taxability of nonresidents in Iraq, the tax authority generally relies on certain factors that distinguish between “doing business in Iraq” and “doing business with Iraq.” If any one of the following factors is satisfied, a company is deemed to be “doing business in Iraq” and accordingly taxable in Iraq:

- The place of signing the contract by the party performing work under the contract (vendor or service provider) is in Iraq.
- The place of performance of work is in Iraq.
- The place of delivery of goods or services is in Iraq.
- The place of payment for the work is in Iraq.

The Iraqi Ministry of Finance’s Instructions No. (1) of 2014 amended the above four factors. Under the amended instructions, the taxability of the following items is addressed separately:

- Supply contracts
- Supplementary or complementary services performed in relation to a supply contract
- Professional services

Income arising from a supply contract is taxable in Iraq if any one of the following factors applies:

- The vendor or service provider has a branch or an office in Iraq, and the contract is signed by the branch or office representative, any of the branch or office’s employees or any other person who is resident in Iraq and authorized to sign the contract.
- The vendor or service provider has a branch or an office in Iraq, and the contract is performed or executed by the branch or office representative, any of the branch or office’s employees or any other person who is resident in Iraq and is authorized to perform or execute the contract.
- The contract’s legal formalities and requirements are completed in Iraq in the name of the vendor or service provider (for example, customs clearance, payment of customs duties, opening of letter of credit or any related procedures, regardless of whether the vendor or service provider has a branch, office or agent in Iraq).
- Payments under the contract to the vendor or service provider are received fully or partially in Iraq, regardless of the currency used to make the payments.
- The vendor or service provider receives payment in barter.

Tax is imposed on income arising from supplementary or complementary services performed in Iraq with respect to a supply contract (such as erection, supervision, maintenance or engineering services), regardless of whether the services are included in the supply contract or in an independent contract. In addition, the taxability of the service component is determined separately from the taxability of the supply contract.

Tax is imposed on professional services performed in Iraq by a legal or natural person, regardless of whether the services are included in the supply contract or in an independent contract and regardless of the place of payment. The taxability of the service

component is determined separately from the taxability of the supply contract.

Tax rates. The general corporate income tax rate applicable to all companies (except oil and gas production and extraction activities and related industries, including service contracts) is a unified flat rate of 15% of taxable income. Activities relating to oil and gas production and extraction and related industries, including service contracts, are subject to income tax at a rate of 35% of taxable income. The Kurdistan Region of Iraq has not yet adopted the 35% rate.

Withholding tax. Companies doing business in Iraq are required to withhold taxes from payments made to their local subcontractors and service providers and remit the withheld taxes to the Iraqi tax authority on a monthly basis. The withholding rates vary, depending on the nature of activities carried out under each contract. The Kurdistan Region of Iraq does not currently observe this tax withholding, retention and remittance process with respect to local payments made to subcontractors and service providers.

Capital gains. Capital gains derived from the sale of fixed assets are taxable at the normal corporate income tax rate of 15% (35% for oil and gas production and extraction activities and related industries, including service contracts, except in the Kurdistan Region of Iraq where the 35% tax rate has not yet been adopted). Capital gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax; otherwise, they are taxed at the normal corporate income tax rates.

Administration

Tax filing due dates and penalties. In Iraq, the tax filing package (whether for Iraqi companies or foreign branches operating in Iraq) consists of audited financial statements prepared under the Iraqi Unified Accounting System, together with an income tax return. The tax filing package must be filed in Arabic within five months after the end of the fiscal year. In the Kurdistan Region of Iraq, the filings must be made within six months after the end of the fiscal year, consisting of the audited financial statements prepared under the Iraqi Unified Accounting System (along with an income tax return only for those taxpayers classified as large taxpayers by the tax authority of the Kurdistan Region of Iraq).

For all taxpayers in Iraq and the Kurdistan Region of Iraq, except companies classified as large taxpayers in the Kurdistan Region of Iraq, a delay fine equal to 10% of the tax due is imposed (up to a maximum of IQD500,000 and IQD75,000 in Iraq and the Kurdistan Region of Iraq, respectively) on a taxpayer that does not submit an income tax filing within the tax filing deadline.

Foreign branches that fail to submit the tax filing package by the due date in Iraq are subject to a penalty of IQD10,000. A similar penalty is not currently being imposed in the Kurdistan Region of Iraq.

For taxpayers not classified as large taxpayers in the Kurdistan Region of Iraq, the tax authority in the region has been sending the files of taxpayers that fail to submit their tax filing in a timely manner to a tax tribunal. The tax tribunal assesses late filing penalties, ranging from 10% to 25% of taxable income.

For taxpayers classified as large taxpayers in the Kurdistan Region of Iraq, failing to submit the tax filing package by the due date results in a penalty equal to 5% of the tax due for each late month, up to a maximum of 100% of the tax due and no less than IQD100,000 for branches and IQD500,000 for Iraqi limited liability companies.

Tax assessment and payment. For all taxpayers in Iraq and the Kurdistan Region of Iraq, except companies classified as large taxpayers in the Kurdistan Region of Iraq, after an income tax filing is made, the tax authority audits the filing and may request additional information. It eventually issues a tax assessment in an estimation memorandum. In general, payment of the total amount of tax is due after the tax authority and the taxpayer sign the estimation memorandum indicating their agreement with the tax assessment. For companies classified as large taxpayers in the Kurdistan Region of Iraq, the tax filing is initially accepted on the self-assessment basis.

In Iraq, if the tax due is not paid within three days from the date of assessment notification, late payment interest equal to the current overdraft banking interest applied by Al-Rafidain Bank (currently 11%) applies. Except for taxpayers classified as large taxpayers in the Kurdistan Region of Iraq, if the tax due is not paid within 21 days after the date of assessment notification, a late payment penalty equal to 5% of the amount of tax due is imposed. This amount is doubled if the tax is not paid within 21 days after the lapse of the first period.

For companies classified as large taxpayers in the Kurdistan Region of Iraq, the payment is due together with the tax filing package based on the self-assessed tax liability declared in the tax return. The tax authority should accept the tax filing as self-declared by the taxpayer. The penalties associated with late payment are equal to 10% of the tax due. Delay interest of 1% per month is also imposed, with partial months counting as a full month.

Dividends. In general, dividends paid from previously taxed income are not taxable to the recipient.

Interest. Interest paid to nonresidents is subject to a withholding tax rate of 15%.

Foreign tax relief. A foreign tax credit is available to Iraqi companies on income taxes paid abroad. In general, the foreign tax credit is limited to the amount of an Iraqi company's income tax on the foreign income. Excess foreign tax credits may be carried forward for five years.

C. Determination of trading income

General. In general, all income generated in Iraq is taxable in Iraq (see *Corporate income tax* in Section B), except for income exempt under a valid tax law or resolution, the industrial investment law, or the investment promotion law in the Kurdistan Region of Iraq.

Business expenses incurred to generate income are allowable, with limitations on certain items, such as entertainment and donations. However, provisions and reserves are not deductible for tax purposes.

Tax depreciation. The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets. These rates are set out in several tables for various industries. In general, the following are the acceptable depreciation methods:

- Straight line
- Declining balance
- Other methods (with the approval of the tax authority)

If the rates used for accounting purposes are greater than the prescribed tax depreciation rates, the excess is disallowed for tax purposes.

Relief for losses. A tax loss from one source of income may offset profits from other sources of income in the same tax year. Unused tax losses may be carried forward and deducted from the taxable income of the taxpayer during the following five consecutive years, subject to the following conditions:

- Losses may not offset more than half of the taxable income of each of the five years.
- Losses may only offset income from the same source from which the losses arose.

To claim losses, a taxpayer must obtain appropriate documentation including financial statements that support the loss and sufficient documentation to support the expenses that created such loss.

Groups of companies. Iraqi law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Stamp duties; imposed on the total contract value	
Iraq	0.3
Kurdistan Region of Iraq	0.1
(The stamp duty rates provided are the most commonly applied rates in Iraq and the Kurdistan Region of Iraq. In practice, the application of the stamp duty may vary.)	
Property tax; imposed on the annual rent	
From buildings	10.8
From land	2
Social security contributions; imposed on salaries and benefits of local and expatriate employees; a portion of employee allowances up to an amount equal to 30% of the base salary is not subject to social security contributions	
Employer (general)	12
Employer (oil and gas sector, except in the Kurdistan Region of Iraq)	25
Employee	5

E. Miscellaneous matters

Foreign-exchange controls. The currency in Iraq is the Iraqi dinar (IQD). Iraq does not impose any foreign-exchange controls. However, according to the Central Bank of Iraq's instructions and regulations, transfers of funds must be in accordance with the Anti-Terrorism Law and the Anti-Money Laundering Law.

Debt-to-equity rules. Iraq does not have any debt-to-equity rules. The only restrictions on debt-to-equity ratios are those stated in the articles and memoranda of association. However, the tax authority may disallow claims of interest expense if it deems the expense to be excessive or unreasonable.

F. Tax treaties

Iraq has entered into a bilateral double tax treaty with Egypt and a multilateral double tax treaty with the states of the Arab Economic Union Council.

A. At a glance

Corporate Income Tax Rate (%)	12.5 (a)
Exit Tax Rate (%)	12.5 (c)

Capital Gains Tax Rate (%)	33 (b)
Exit Tax Rate (%)	12.5 (c)
Branch Tax Rate (%)	12.5 (a)
Withholding Tax (%)	
Dividends	25 (d)(e)
Interest	20 (e)(f)(g)
Royalties	20 (e)(g)(h)
Payments from Irish Real Estate Funds	20 (i)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1
Carryforward	Unlimited

- (a) This rate applies to trading income and to certain dividends received from nonresident companies. A 25% rate applies to certain income and to certain activities. For details concerning the tax rates, see Section B.
- (b) A 40% rate applies to disposals of certain life insurance policies.
- (c) This tax applies to unrealized capital gains when companies migrate or transfer assets offshore such that they leave the scope of Irish tax.
- (d) This withholding tax is imposed on dividends distributed subject to exceptions (see Section B).
- (e) Applicable to both residents and nonresidents.
- (f) Interest paid by a company in the course of a trade or business to a company resident in another European Union (EU) member state or in a country with which Ireland has entered into a double tax treaty is exempt from withholding tax, subject to conditions. See footnote (p) in Section F for details regarding an extension of this exemption. Bank deposit interest is subject to a 33% deposit interest retention tax (DIRT). DIRT exemptions apply to bank interest paid to nonresidents and, subject to certain conditions, bank interest paid to Irish resident companies and pension funds.
- (g) Ireland implemented the EU Interest and Royalties Directive, effective from 1 January 2004.
- (h) Under Irish domestic law, withholding tax on royalties applies only to certain patent royalties and to other payments regarded as “annual payments” under Irish law. The Irish Revenue has confirmed that withholding tax need not be deducted from royalties paid to nonresidents with respect to foreign patents (subject to conditions).
- (i) A 20% withholding tax applies to payments from Irish Real Estate Funds (IREFs) to certain investors. A general exemption is provided for distributions of profits on disposals of property held for five years or longer. For further details, see Section B.

B. Taxes on corporate income and gains

Corporation tax. A company resident in Ireland is subject to corporation tax on its worldwide profits (income plus capital gains). All Irish-incorporated companies are regarded as Irish resident, subject to an override in a double tax treaty. Prior to 1 January 2021, transitional rules applied to companies incorporated before 1 January 2015.

For companies that are incorporated in other jurisdictions, the general rule for determining company residence is the common law, which provides that a company resides where its real business is carried on: that is, where the central management and control of the company are exercised.

A company not resident in Ireland is subject to corporation tax if it carries on a trade in Ireland through a branch or agency. The liability applies to trading profits of the branch or agency, other income from property or rights used by the branch or agency, and chargeable gains on the disposal of Irish assets used or held for the purposes of the branch or agency. Certain nonresident landlords are also within the scope of corporation tax (previously

income tax) with effect for profits and gains accruing on or after 1 January 2022.

A company resident in a country with which Ireland has entered into a tax treaty is subject to tax only on profits generated by a permanent establishment as described in the relevant treaty. This normally requires a fixed place of business or dependent agent in Ireland. Companies that are resident in non-treaty countries and do not trade in Ireland through a branch or agency are subject to income tax on income arising in Ireland and to capital gains tax (CGT) on the disposal of certain specified Irish assets (see *Chargeable capital gains*).

Rates of corporation tax. The standard rate of corporation tax on trading income is 12.5%.

On election, the 12.5% rate also applies to dividends received from the following companies:

- A company resident in an EU member state, a treaty country or a country that has ratified the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Assistance in Tax Matters
- A company that is 75%-owned by a publicly quoted company

The election applies only to dividends sourced from trading income unless the dividends are portfolio dividends (less than 5% interest). In this instance, the dividends are deemed to be from a “trading” source. Foreign dividends from portfolio investments that form part of the trading income of a company are exempt from corporation tax.

A 25% rate applies to the following:

- Certain non-trading income, such as Irish rental and investment income
- Foreign income unless the income is part of an Irish trade
- Income from “working minerals” (broadly defined), petroleum activities and dealing or developing land other than construction operations (for the taxation of construction operations, see *Land transactions*)

Startup companies. A five-year exemption from tax on certain trading profits and capital gains (subject to conditions) applies to companies with a total corporation tax liability (as defined) of less than EUR40,000 per year. This exemption applies to new companies that begin trading on or after 1 January 2018. A cap referring to employer social insurance costs applies. A three-year exemption applied if trading commenced prior to 1 January 2018.

Land transactions. Different tax rates apply to land transactions. Profits or gains derived from dealing in residential or nonresidential development land are subject to the higher rate of corporation tax (25%). Most construction operations are subject to corporation tax at the standard rate of 12.5%.

Shipping companies. Shipping companies that undertake qualifying shipping activities, including carriage of cargo and passengers, marine-related activities, leasing of qualifying ships and related activities, may elect to be subject to a special tonnage tax regime instead of the normal corporation tax regime.

Under the tonnage tax regime, profits are calculated on the basis of a specified profit per day according to the tonnage of the relevant ship. The following are the amounts of the daily profit attributed to each qualifying ship:

- For each 100 tons up to 1,000 tons: EUR1.00
- For each 100 tons between 1,000 and 10,000 tons: EUR0.75
- For each 100 tons between 10,000 and 25,000 tons: EUR0.50
- For each 100 tons above 25,000 tons: EUR0.25

The profits attributed to each qualifying ship for the accounting period will be determined by multiplying the daily profit as determined above by the number of days in the accounting period, or, if the ship was operated by the company as a qualifying ship for only part of the period, by the number of days in that part of the accounting period.

The standard corporation tax rate for trading income (12.5%) applies to the amount of profits determined under the rules described above.

Oil and gas exploration. Petroleum production tax (PPT) applies to oil and gas exploration authorizations granted on or after 18 June 2014. PPT replaces profit resources rent tax (PRRT). This regime applies a tax-deductible PPT to the net profits of each field, using a sliding scale of rates from 10% to 40%, based on the profitability of the field. This is in addition to the existing 25% corporation tax rate. A minimum PPT equal to 5% of field gross revenue less transportation expenditure applies.

PRRT continues to apply to authorizations granted in the period 1 January 2007 through 17 June 2014. The PRRT is imposed in addition to the 25% corporation tax rate, and it operates on a graduated basis that is linked to the profitability of the oil or gas field. The tax rate varies according to the profit ratio (rate of cumulative profits less 25% corporation tax divided by accumulated capital investment). The following are the tax rates.

Profit ratio	Tax rate (%)
Less than 1.5	0
Between 1.5 and 3	5
Between 3 and 4.5	10
Exceeding 4.5	15

Close companies. Investment and rental income of a “close company” is subject to an additional 20% surcharge if it is not distributed within 18 months after the end of the relevant accounting period. A closely held professional services company is subject to a 15% surcharge on 50% of its undistributed trading income. Broadly, a “close company” is a company that is under the control of five or fewer persons or under the control of its directors (as defined).

Life insurance companies. For life insurance business written before 1 January 2001, policyholders are subject to income tax at the standard rate (20%) on the investment income and gains less management expenses attributable to the policyholders. Life insurance companies deduct the income tax within the life insurance fund. Resident individuals do not pay any further tax. Companies are subject to Irish CGT arising on the disposal of a life insurance policy and receive a credit for income tax at the

standard rate deemed to have been deducted by the life insurance company. For life insurance business written after 1 January 2001 and all other business of life companies, a tax-free buildup of investment return over the term of the policy (gross roll-up) is allowed. However, for Irish residents, an exit tax is imposed on gains resulting from certain "chargeable events" (as defined) with respect to life policies. Pension business and general annuity business are exempt from the exit tax. The exit tax is withheld at a rate of 41% on the investment return arising on the policy. This return is the difference between proceeds on redemption, maturity or assignment, and the premiums or subscription amounts paid. A 60% exit tax applies to personal portfolio life insurance policies (PPLPs). This rate applies to domestic and foreign PPLPs that were not cashed in before 26 September 2001.

Deemed disposal rules apply to gross roll up life policies held by Irish residents. A deemed chargeable event occurs at the end of every eight-year period (relevant period) beginning with the inception of the life policy. Exit tax is imposed on the gain arising on this deemed chargeable event. These rules do not apply to policies held by nonresidents.

Shareholder profits of domestic life insurance companies are taxed at the standard rate of corporation tax (now 12.5%) regardless of whether they relate to business written before or after 1 January 2001.

Companies investing in Irish policies are generally subject to an exit tax, as described above. However, corporate holders of certain foreign policies are subject to self-assessment tax at a rate of 25% on profits from the investment in the policies. These foreign policies are policies issued by an insurance company or a branch of such a company carrying on business in a member state of the EU (other than Ireland), in a state in the European Economic Area (EEA) or in a country in the OECD with which Ireland has entered into a tax treaty. Payments with respect to such policies accruing to Irish residents that are not companies are subject to income tax at a rate of 41%. The 41% rate depends on the filing of a self-assessment return with the Irish authorities. The deemed disposal measures (see above) also apply to foreign life policies. Payments with respect to foreign policies, other than those mentioned above, are subject to tax at a rate of 40%. If a company investing in a life insurance policy is a close company, additional surcharges may apply.

Investment undertakings (gross roll-up funds and net funds). Under current Irish law and practice, an investment undertaking is not chargeable to Irish tax on its income and gains, other than gains arising on the happening of a "chargeable event." A chargeable event includes any distribution, redemption, cancellation or deemed disposal of shares or the appropriation or cancellation of shares by the shareholder. For investment undertakings (gross roll-up funds), distributions and other payments made are generally subject to an exit tax at a rate of 41%. This exit tax applies to the chargeable event and is imposed on the difference between the amount payable to the shareholder and the amount invested by the shareholder. A pro rata calculation applies for partial disposal, redemption, cancellation, repurchase or assignment of shares unless the company has elected to apply a first-in, first-out

basis of identification for such disposals. Investments in IFSC funds are now covered by the investment undertakings rules described above. Nonresidents are generally exempt from the exit tax in investment undertakings described above if they provide the relevant declarations (however, see *Irish Real Estate Funds*). Certain Irish residents are also exempt from the exit tax if the relevant declarations are provided. A reduced rate of 25% may apply to distributions to Irish companies.

A 60% exit tax applies to personal portfolio investment undertakings (PPIUs). A 60% rate also applies to foreign PPIUs that are equivalent to Irish investment undertakings, provided timely returns are provided to the Irish tax authorities.

Unit holders are deemed to dispose of units acquired by them every eight years from the date of acquisition. To the extent that a gain arises on this deemed disposal, exit tax must normally be deducted and paid by the investment undertaking to the Irish tax authorities. On the disposal of the relevant unit, a credit is available for the tax paid on the deemed disposal. Similarly, a refund is payable to the unit holder if the actual exit tax liability is less than the exit tax paid on the deemed disposals. This refund is generally paid by the investment undertaking which can set off the refund against future exit tax. The deemed disposal rules apply to units acquired on or after 1 January 2001.

Offshore funds that are domiciled in another EU member state, EEA state or a member state of the OECD with which Ireland has entered into a double tax agreement and that are deemed equivalent to Irish investment undertakings are subject to tax on a self-assessment basis similar to the rules applicable to foreign life policies (see *Life insurance companies*). Deemed disposal rules also apply to Irish residents after every eight years. Irish resident corporate investors are taxable on income or gains from such offshore funds at a rate of 25%.

Other offshore funds are subject to either marginal rate income tax (plus pay-related social insurance [PRSI] and the Universal Social Charge [USC]) on income distributions or CGT at 33% or 40% on the disposal of an interest in an offshore fund, depending on certain circumstances.

Investments in undertakings for collective investment (net funds) that are companies are subject to corporation tax at a rate of 30%.

Ireland has incorporated the revised EU Council Directive on Administrative Cooperation (DAC 2) into Irish law. Ireland has already implemented the OECD Common Reporting Standard (CRS).

Irish Real Estate Funds. A 20% withholding tax applies to payments from Irish Real Estate Funds (IREFs) to certain investors that are entitled to an exemption from the normal exit charge described above, typically nonresident investors. It applies to many forms of returns to investors of profits from certain real estate business activities, including dealing in or developing Irish land or an Irish property rental business. The withholding tax applies from 1 January 2017, regardless of when the profits arose. Although a general exemption is provided for distributions of

profits on disposals of property held for five years, this may not apply to many investor structures.

An IREF is an investment undertaking (or a subfund of such undertaking) in which at least 25% of the value of the assets at the end of the previous accounting period is derived from the following:

- Land or minerals in Ireland
- Certain offshore exploration rights
- Shares in a real estate investment trust
- Unquoted shares deriving their value directly or indirectly from the above
- Certain mortgages
- Another IREF

In addition, from 1 January 2017, acquirers of units in IREFs must apply a 20% withholding tax (regardless of the seller's status), unless the consideration does not exceed EUR500,000. A statutory advance clearance regime applies for certain indirect and direct investors with respect to this withholding tax.

Anti-avoidance measures in relation to IREFs include the imposition of a 20% tax charge on deemed interest income.

Knowledge Development Box. The Knowledge Development Box (KDB) regime complies with the OECD's modified nexus approach. The KDB provides that an effective tax rate of 6.25% applies to qualifying profits. The relief is granted through a tax deduction and applies for accounting periods beginning on or after 1 January 2016 and before 1 January 2024. For KDB purposes, qualifying assets are innovations protected by qualifying patents (including patents pending) and certain copyrighted software. Expenditure on marketing-related intellectual property such as trademarks and brands does not qualify. KDB claims must be made within 24 months after the end of the accounting period.

Chargeable capital gains. Chargeable capital gains are subject to corporation tax at a rate of 33% (except for development land gains which are subject to CGT at that rate). In computing a gain, relief is given for the effects of inflation by applying an index factor. However, indexation relief applies only for the period of ownership of an asset up to 31 December 2002.

In calculating the liability for CGT on the disposal of development land or unquoted shares deriving their value from such land, certain restrictions apply. The adjustment for inflation is applied only to that portion of the purchase price reflecting the current use value of the land at the date of purchase. The balance of the purchase price, without an adjustment for inflation, is still allowed as a deduction. Gains on development land may be reduced only by losses on development land. However, losses on development land may be set off against gains on disposals of other assets.

A nonresident company is subject to CGT or corporation tax on its chargeable capital gains from the following assets located in Ireland:

- Land and buildings

- Minerals and mineral rights
- Exploration or exploitation rights in the continental shelf
- Unquoted shares deriving the majority of their value from such assets
- Assets used in a business carried on in Ireland through a branch or agency

Exit charge. An exit charge, which is compliant with EU Anti-Avoidance Directive (Directive 2016/1164, or ATAD), is effective from 10 October 2018. Before the introduction of this measure, Ireland had a limited exit tax regime.

A company is deemed to have disposed of assets (and immediately reacquired them at market value) if any of the following events occur:

- A company resident in a member state (other than Ireland) transfers assets from an Irish permanent establishment to its head office or permanent establishment in another member state or third country.
- A company resident in a member state (other than Ireland) transfers a business carried on by an Irish permanent establishment to another member state or third country.
- A company ceases to be tax resident in Ireland and becomes resident in another member state or third country.

The tax charge does not apply if assets remain in Ireland and continue to be used for the purposes of an Irish trade through a permanent establishment.

The charge does not apply to certain financial transactions if the asset will revert to the permanent establishment or company within 12 months of the transfer, or to certain assets, such as Irish land or buildings that remain within the charge to Irish capital gains tax.

The 12.5% rate of tax applies to the deemed gains accruing. An option is available to elect to defer the payment of the exit tax if the assets are transferred to an EU/EEA country. If this election is made, the tax is payable in six equal installments, with statutory interest applying. The first installment is due nine months after the event triggering the exit charge if the company is subject to corporation tax, or on 31 October in the tax year following the year in which the tax event occurs. The remaining installments are due on each of the next five anniversaries of the initial due date. The 2020 Finance Act clarified that statutory interest on exit tax that is unpaid on or after 14 October 2020 is to be calculated on the full amount of exit tax that remains unpaid.

Anti-avoidance provisions deny the application of the 12.5% rate if the event forms part of a transaction to dispose of the asset and if the purpose of the transaction is to ensure that the gain accruing on the disposal of the asset is charged at the 12.5% rate. In this circumstance, a standard 33% rate of capital gains tax applies.

Substantial shareholding relief. An exemption from corporation tax applies to the disposal by an Irish company of a shareholding

in another company (the investee company) if the following conditions are satisfied:

- At the time of disposal, the investee company is resident for tax purposes in Ireland, in another EU member state or in a country with which Ireland has entered into a tax treaty.
- The Irish company has held (directly or indirectly), for a period of at least 12 months, a minimum holding of 5% of the shares in the investee company.
- The investee company is wholly or principally a trading company or, taken together, the holding company, its 5% group and the investee company are wholly or principally a trading group.

If the above conditions are satisfied, the relief applies automatically (no claim or election mechanism exists).

Administration. The corporation tax liability is determined by self-assessment. As a result, a company must estimate its own liability. Preliminary tax is payable in two installments if the company is not a “small company” (see below). The initial installment is due on the 21st day of the 6th month of the accounting period (assuming the accounting period ends after the 21st day of a month). This installment must equal the lower of 50% of the tax liability for the preceding year or 45% of the tax liability for the current year. The final installment of preliminary tax is due 31 days before the end of the accounting period and must bring the aggregate preliminary tax payments up to 90% of the tax liability for the year. If this date falls on or after the 21st day of a month, the 21st of that month becomes the due date.

“Small companies” alternatively may pay preliminary tax equal to 100% of their tax liability for the preceding year. A company qualifies as a “small company” if its corporation tax liability for the preceding year did not exceed EUR200,000.

A company that pays more than 45% of its corporation tax liability for a period as an initial installment of preliminary tax or more than 90% of its corporation tax liability for a period by the due date for its final installment of preliminary tax can elect jointly with another group company that has not met the 45% or 90% tests to treat the excess as having been paid by that latter company for interest calculation purposes only. Certain conditions apply.

Any balance of corporation tax due is payable by the due date for the filing of the corporation tax return (Form CT1). This is normally nine months after a company’s accounting year-end.

When the nine-month period ends on or after the 21st day of a month, the 21st of that month becomes the due date for filing the Form CT1 and the payment of any balance of corporation tax.

A startup company with a corporation tax liability of less than EUR200,000 is relieved from having to make any corporation tax payment until its tax return filing date.

Corporation tax returns and payments must normally be filed electronically via Revenue Online Service. Electronic filers may avail of a two-day extension of return filing and payment deadlines.

Accounts are required to be filed in iXBRL format, subject to limited iXBRL exemption criteria. A concessional three-month filing deadline may apply for iXBRL financial statements (not Form CT1).

If a company does not comply with the above filing obligation (including the requirement to submit accounts in iXBRL format), it is subject to one of the following surcharges:

- 5% of the tax, up to a maximum penalty of EUR12,695, if the filing is not more than two months late
- 10% of the tax, up to a maximum penalty of EUR63,485, in all other cases

In addition, the company suffers the reduction of certain tax reliefs, which consist of the set off of certain losses against current year profits and the surrender of losses among a group of companies. The following are the applicable reductions:

- A 25% reduction, up to a maximum of EUR31,740, if the filing is not more than two months late
- A 50% reduction, up to a maximum of EUR158,715, in all other cases

The above surcharges and restrictions also apply if a company fails to comply with its local property tax (see Section D) obligations with respect to residential properties that it owns.

A limited number of cases are selected for later in-depth Revenue examination, and the assessment can be increased if the return is inaccurate.

A company must file a CGT return reporting disposals of development land and related unquoted shares and pay CGT on such disposals. CGT may be due twice a year, depending on the date of realization of the chargeable gains. CGT on such chargeable gains arising in the period of 1 January to 30 November must be paid by 15 December of that same year. CGT on such gains arising in December of each year is due on or before 31 January of the following year.

Dividends

Dividend withholding tax. Dividend withholding tax (DWT) is imposed on distributions made by Irish companies at a rate of 25%.

The law provides for many exemptions from DWT. Dividends paid to the following recipients are not subject to DWT:

- Companies resident in Ireland
- Approved pension schemes
- Qualifying employee share ownership trusts
- Collective-investment undertakings
- Charities
- Certain sports bodies promoting athletic or amateur games
- Trustees of Approved Minimum Retirement Funds (funds held by qualifying fund managers on behalf of the individuals entitled to the assets)

Additional exemptions are provided for nonresidents. Distributions are exempt from DWT if they are made to the following:

- Nonresident companies, which are under the direct or indirect control of persons (companies or individuals) who are resident in an EU member country or in a country with which Ireland

has entered into a tax treaty (treaty country), provided that these persons are not under the control of persons not resident in such countries

- Nonresident companies, or 75% parent companies of nonresident companies, the principal class of shares of which is substantially and regularly traded on a recognized stock exchange in an EU member country or a treaty country
- Companies not controlled by Irish residents that are resident in an EU member country or a treaty country
- Non-corporate persons who are resident in an EU member country or a treaty country and are neither resident nor ordinarily resident in Ireland
- Certain qualifying intermediaries and authorized withholding agents

The above “treaty country” references are extended to any country with which Ireland has signed a double tax treaty (see footnote [p] in Section F).

Detailed certification procedures apply to some of the exemptions from DWT described above.

DWT does not apply to dividends covered by the EU Parent-Subsidiary Directive. Anti-avoidance provisions prevent the use of EU holding companies to avoid DWT. If a majority of an EU parent company’s voting rights are controlled directly or indirectly by persons not resident in an EU or tax treaty country, DWT applies unless it can be established that the parent company exists for bona fide commercial reasons and does not form part of a tax avoidance scheme. DWT may also be recovered under a double tax treaty. The benefit of the directive is denied if “arrangements” exist that “are not put in place for valid commercial reasons which reflect economic reality.”

Distributions paid out of certain types of exempt income, such as exempt woodland income, are not subject to DWT.

Companies must file a return within 14 days after the end of the calendar month of the distribution. The return is required regardless of whether DWT applies to the distributions. Any DWT due must be paid over to the Collector General when the return is filed.

Other. A company resident in Ireland can exclude from its taxable income distributions received from Irish resident companies (franked investment income).

Irish resident shareholders, other than companies, are subject to income tax on distributions received. DWT may be claimed as a credit against the recipient’s income tax liability. Recipients not subject to income tax may obtain a refund of DWT.

Foreign tax relief. Under tax treaty provisions, direct foreign tax on income and gains of an Irish resident company may be credited against the Irish tax levied on the same profits. However, foreign tax relief cannot exceed the Irish corporation tax attributable to the same profits.

For purposes of calculating the credit under tax treaties, income derived from each source is generally treated as a separate stream. Consequently, foreign tax may generally be credited only against

the Irish corporation tax on the income that suffered the foreign tax. However, a unilateral credit for otherwise unrelieved foreign tax on interest income may be offset against the corporation tax payable on the “relevant interest.” “Relevant interest” is defined as interest income from group companies, which are greater than 25% related and are resident in treaty countries. The unilateral credit relief effectively introduces a pooling mechanism for the calculation of the relief available.

If no treaty exists, a deduction for foreign tax paid may be allowed against such income and gains. A unilateral credit relief is available for foreign tax deducted from royalties received by trading companies. For royalties received after 1 January 2012, a limited corporate tax deduction is available for foreign tax suffered that would not otherwise qualify for double tax relief or unilateral credit relief.

An Irish tax credit is available for taxes equivalent to corporation tax and CGT paid by a branch if Ireland has not entered into a tax treaty with the country where the branch is located or if Ireland’s tax treaty with such country does not provide for relief (that is, unilateral relief for branch profits tax).

An Irish company that has branches in more than one country can pool its excess foreign tax credits between the different branches. This is beneficial if one branch suffers the foreign equivalent of corporation tax at a tax rate higher than 12.5% and another branch pays tax at a rate lower than 12.5%. Unused credits can be carried forward to offset corporation tax in future accounting periods.

Unilateral credit relief for foreign tax paid by a company on interest income that is included in the trading income of a company for Irish corporation tax purposes may also be available. The relief is available only if the company cannot claim relief under a double tax treaty for the foreign tax and if the tax has not been repaid to the company. The unilateral relief is equal to the lesser of the Irish corporation tax attributable to the relevant interest or the foreign tax attributable to the relevant interest.

Unilateral credit relief may be available for Irish resident companies, or Irish branches of companies resident in EEA countries (excluding Liechtenstein), that receive dividends from foreign subsidiaries. Companies are permitted to “mix” the credits for foreign tax on different dividends from 5% subsidiaries for purposes of calculating the overall tax credit in Ireland. Any unused excess can be carried forward indefinitely and offset in subsequent periods. The subsidiaries can be located in any country. However, credits arising on dividends taxed at 12.5% are ring-fenced to prevent these tax credits from reducing the tax on the dividends taxed at the 25% rate.

An additional foreign tax credit (AFC) is available with respect to certain dividends received from companies resident in EEA countries (excluding Liechtenstein) if the existing credit for actual foreign tax suffered on the relevant dividend is less than the amount that would be computed by reference to the nominal rate of tax in the country from which the dividend is paid. The total foreign tax credit, including the AFC, cannot exceed the Irish corporation tax attributable to the income. Certain dividends are excluded.

Ireland has implemented the EU Parent-Subsidiary Directive (as amended). These provisions, which overlap to a significant extent with the unilateral credit relief measures described above, extend to Switzerland.

A company that incurs a tax liability on a capital gain in one of six specified countries may claim a credit for foreign tax against Irish CGT on the same gain. This unilateral credit is targeted at those countries with which Ireland has entered into double tax agreements before the introduction of CGT.

C. Determination of trading income

General. The calculation of trading income is based on the company's accounts prepared in accordance with generally accepted accounting practice (GAAP), subject to adjustments required or authorized by law. For tax purposes, accounts can be prepared under Irish GAAP (applies to accounting periods commencing before 1 January 2015), International Financial Reporting Standards (IFRS) or Financial Reporting Standards (FRS) 101 or 102 (FRS applies for any accounting periods commencing on or after 1 January 2015). Detailed rules address any transition from Irish GAAP to IFRS and FRS 101 or 102 and, from 1 January 2018, changes in accounting policies more generally.

If derived from Irish sources, income derived from commercial woodlands is exempt from tax.

Expenses must be incurred wholly and exclusively for the purposes of the trade and be of a revenue (as distinct from capital) nature. However, entertainment expenses are totally disallowed, unless they are incurred for employees only.

Revenue expenditure incurred in the three years before the beginning of trading is generally deductible.

A tax deduction was available for expenditure incurred on acquiring know-how, which includes industrial information and techniques likely to assist in the manufacture or processing of goods or materials, for the purpose of a trade. The deduction was available for expenditure incurred before 7 May 2011. See *Tax depreciation (capital allowances)* for relief available on expenditure on intangible assets incurred on or after this date.

Depreciation of assets is not deductible. Instead, the tax code provides for a system of capital allowances (see *Tax depreciation [capital allowances]*).

Share-based payments. Consideration consisting directly or indirectly of shares in the company or a connected company that is given for goods or services or that is given to an employee or director of a company is generally not deductible except for the following:

- Expenditure incurred by the company on acquiring the shares (or rights to receive the shares)
- Payments made to a connected company for the issuance or the transfer of shares (or rights to receive the shares)

In effect, a tax deduction is denied for IFRS 2 or Financial Reporting Standard (FRS) 20 accounting costs unless these costs reflect actual payments. In addition, the timing of the tax

deduction for such payments is dependent on the employees' income tax positions.

Interest payments. Interest on loans used for trading purposes is normally deductible on an accrual basis in accordance with its accounting treatment unless specifically prohibited.

Certain types of interest paid in an accounting period may be classified as a distribution and, consequently, are not treated as an allowable deduction. However, interest may not be reclassified if it is paid by an Irish resident company to an EU resident company or to a resident of a treaty country (on election). Such interest is allowed as a trading deduction and is not treated as a distribution, subject to certain conditions and exceptions. To facilitate cash pooling and group treasury operations, in the context of a lending trade, a tax deduction may be allowed for interest payments to a connected company in a non-treaty jurisdiction, to the extent that the recipient jurisdiction levies tax on such interest.

A tax deduction for interest accrued on a liability between connected persons (including companies and individuals) may be deferred until such time as the interest is actually paid if all of the following circumstances exist:

- The interest is payable directly or indirectly to a connected person.
- Apart from the new measure, the interest would be allowable in computing the trading income of a trade carried on by the payer.
- The interest is not trading income in the hands of the recipient, as determined under Irish principles.

Detailed rules provide for the apportionment of interest between allowable and non-allowable elements.

The above restriction does not apply to interest payable by an Irish company to a connected nonresident corporate lender if the lender is not under the control, directly or indirectly, of Irish residents.

Banks may deduct interest payments made to nonresident group companies in calculating trading income (that is, the payments are not reclassified as distributions).

Charges on income, such as certain interest expenses and patent royalties, are not deductible in the computation of taxable trading income, but may be deducted when paid as a charge. A tax deduction may be claimed for interest as a charge (as a deduction from total profits, which consists of income and capital gains) if the funds borrowed are used for the following non-trading purposes:

- Acquisition of shares in a rental or trading company, or a company whose business principally consists of holding shares in trading or rental companies
- Lending to the companies mentioned in the first bullet, provided the funds are used wholly and exclusively for the purpose of the trade or business of the borrower or of a connected company

Deductions of interest as a charge have always been subject to certain conditions and anti-avoidance measures. These conditions and measures have added complexities to the implementation and maintenance of structures designed to qualify for this interest relief. In particular, interest relief is restricted if the borrower receives or is deemed to have received, a "recovery of capital" (as defined).

Interest on loans made on or after 2 February 2006 is not allowed as a tax deduction if the loan to the Irish company is from a connected party and if the loan is used, directly or indirectly, to acquire shares from a connected company. Further measures restrict the deductibility of interest as a trading expense and interest as a charge to the extent that an acquisition of assets from a connected company is funded by monies borrowed from another connected company.

Certain additional anti-avoidance rules may apply in connected party situations.

Ireland has implemented the interest limitation rules of ATAD, with effect for accounting periods of relevant entities commencing on or after 1 January 2022. A detailed review of these rules is outside the scope of this text, but in general these rules limit interest deductions (after all other provisions have been applied except the general anti-avoidance rule) to 30% of earnings before interest, taxes, depreciation and amortization (EBITDA) in any particular period, subject to several exceptions and reliefs, including a carryforward mechanism for unrelieved interest. These rules may be applied on an “interest group” (as defined) basis.

Foreign-exchange gains and losses. Realized and unrealized foreign-exchange gains and losses relating to monies held or payable by a company for the purpose of its business, or to hedging contracts with respect to such items, are included in the taxable income of a company to the extent the gains and losses have been properly recorded in the company’s accounts. If a company acquires a shareholding in a 25% subsidiary in a foreign currency and that acquisition is funded by a liability (borrowings, share capital or a capital contribution) in the same foreign currency, the company can elect to match the foreign currency gain or loss on the asset (the shares in the 25% subsidiary) with the foreign currency gain or loss on the liability. As a result, the company is taxable only on the real economic gain or loss on the asset and not on currency movements against which it is economically hedged. A company must make the matching election within three weeks of the making of the investment.

An additional foreign-exchange matching measure permits trading companies to elect to match exchange-rate movements on trading assets denominated in foreign currency against movements on redeemable share capital denominated in foreign currency. The election for this treatment must be made within three weeks of acquiring the relevant trading asset.

Inventories. Stock is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis or some approximation of FIFO; the last-in, first-out (LIFO) basis is not acceptable.

Provisions. General provisions and reserves are not allowable deductions. Some specific provisions and reserves, including reserves for specific bad debts, may be allowed. In general, provisions created in accordance with IFRS or Irish GAAP are acceptable for tax purposes subject to normal tax rules.

Tax depreciation (capital allowances)

Plant and machinery. Capital expenditure on plant and machinery and motor vehicles in use at the end of an accounting period is written off at an annual straight-line rate of 12.5%.

The maximum qualifying expenditure for capital allowances on motor vehicles is EUR24,000. Capital allowances and leasing expense deductions for new motor cars are subject to special provisions.

An immediate 100% write-off is allowed for capital expenditure on oil and gas exploration, development and abandonment, incurred under a license issued by the Minister for Energy. An immediate 100% write-off is also allowed for certain energy-efficient equipment.

Expenditure incurred on equipment and buildings used for the purposes of providing childcare services or a fitness center to employees qualifies for accelerated capital allowances.

On the disposal of plant and machinery, a balancing charge or allowance applies, depending on the amount received on disposal compared with the written-down value of the asset. Balancing charges are not imposed with respect to plant and machinery if the proceeds from the disposal are less than EUR2,000.

Computer software. If a company carrying on a trade incurs capital expenditure on the acquisition of software or a right to use software in that trade, the right and related software is regarded as plant or machinery and qualifies for capital allowances over eight years. Some computer software may qualify for tax depreciation under the intangible assets regime (see *Intangible assets*).

Patent rights. A company incurring capital expenditure on the purchase of patent rights for use in a trade may be entitled to writing-down allowances. Relief is given over 17 years or the life of the patent rights, whichever is the shorter. Ongoing patent royalties are typically deductible when paid (see information regarding charges in *Interest payments*). The allowances are available for expenditure incurred before 7 May 2011. See *Intangible assets* for relief available on expenditure incurred on or after this date.

Immovable property. The basic annual rate is 4% for industrial buildings. Capital expenditure incurred on hotels on or after 4 December 2002 is written off over 25 years (previously 7 years). Transitional measures applied to certain approved projects if the expenditure was incurred on or before 31 December 2006, and reduced rates applied in certain circumstances if the expenditure was incurred in the period 1 January 2007 through 31 July 2008.

Urban renewal schemes. Property-based tax incentives in urban renewal areas may be available for expenditure incurred before 31 July 2008. The reliefs include accelerated capital allowances for commercial and industrial buildings.

Telecommunication infrastructure. Capital allowances are available for capital expenditure incurred on the purchase of rights to use advanced telecommunication infrastructure. These intangible rights typically extend from 10 to 25 years. They are usually

purchased with an up-front lump-sum payment. The expenditure incurred by a company on such rights may be written off over the life of the agreement relating to the use of the rights, with a minimum period of seven years.

Other. Capital allowances are also available on expenditure incurred for scientific research, dredging, mining development, ships, agricultural buildings, airport buildings, runways, and petroleum exploration, development and production.

Intangible assets. Capital allowances are available on a broad range of specified intangible assets acquired on or after 8 May 2009. Capital allowances are available for expenditure incurred on many types of intangible assets including, but not limited to, customer lists, brands, trademarks, patents, copyrights, designs, know-how, some computer software, pharmaceutical authorizations and related rights, licenses and attributable goodwill.

Relief is generally granted in line with book depreciation and is claimed on the annual tax return.

However, the company can elect for a 15-year write-off period, which is useful if intangible assets are not depreciated for book purposes. This election is made on an asset-by-asset basis.

For capital expenditure incurred by a company on or after 11 October 2017, the aggregate relief (inclusive of any related finance interest) is capped annually at 80% of the trading income of the relevant trade (previously 100%) in which the intangible assets are used. Excess allowances can be carried forward indefinitely against income of the same trade.

For intangible assets acquired before 14 October 2020, allowances granted are clawed back if the asset is sold within a five-year period. For intangible assets acquired on or after 14 October 2020, allowances may be clawed back through a balancing charge if the asset is sold at any time.

Patent rights and know-how. For acquisitions before 6 May 2011, allowances for acquired patent rights were granted over the shorter of 17 years or the duration of acquired rights. Certain know-how was deductible in full in the year of acquisition. After that date, relief must be claimed under the new intangible asset regime (see *Intangible assets*).

Research and development expenditures. A corporation tax credit of 25% is available for qualifying research and development (R&D) expenditure incurred by companies for R&D activities carried on in EEA countries. The 2019 Finance Act provides for enhancements to the regime for micro and small companies, including an increase in the R&D credit rate from 25% to 30% (subject to State Aid approval, which is still awaited). The R&D credit is granted in addition to any existing deduction or capital allowances for R&D expenditure. As a result of this credit, companies may enjoy an effective benefit of up to 37.5% of R&D expenditure (micro and small companies may enjoy an increased effective benefit once the 2019 Finance Act enhancements are commenced).

R&D credits that cannot be used in an accounting period can be carried forward indefinitely to future accounting periods. Excess

R&D credits can be carried back against corporation tax paid in the immediately preceding accounting period. Any remaining excess credits may be refunded over a three-year period. This enhancement of the R&D credit regime represents a significant cash-flow opportunity for loss-making companies. However, a 12-month time limit for R&D claims applies. All R&D claims must be made within 12 months after the end of the accounting period in which the R&D expenditure giving rise to the claim is incurred.

A reward scheme allows companies to use all or part of the R&D credit to reward key employees.

Digital gaming credit. The 2021 Finance Act provides for a 32% corporation tax credit for the digital gaming sector, subject to EU State Aid approval. The relief will be available on eligible expenditure (net of grant assistance) on the design, production and testing of a digital game, on a minimum expenditure of EUR100,000 up to a maximum of EUR 25 million ceiling per project or 80% of total qualifying expenditure, whichever is lower. The credit will not be available on expenditure for which the film credit or R&D tax credit was claimed. Any excess credit that exceeds the corporation tax liability of the digital gaming company will be paid by the Revenue to the company. A cultural certificate from the Minister for Tourism, Culture, Arts, Gaeltacht, Sport and Media will be required to access the credit, which may be claimed on an annual basis as each project progresses. Certain exclusions will apply; for example, gambling and advertising projects will not be eligible. The scheme will run until 31 December 2025. Additional matters may be the subject of regulations to be made by the Revenue Commissioners.

Film credit. Film relief is only available to producer companies in the film and film production industry. The relief provides for a film corporation tax credit of 32% against the corporation tax liability of the producer company. Any excess is available for payment to the producer company. Detailed certification rules and conditions apply. The 2018 Finance Act provides for the extension of the relief to 31 December 2024. In addition, a time limited, tapered regional uplift of 5% for productions in designated areas was introduced. This uplift was scheduled to taper out over a period of four years, but the 2020 Finance Act extended this period to five years. The following will be the percentages of the credit over this period:

- Claims made on or before 31 December 2021: credit is 37%
- Claims made after 31 December 2021 but on or before 31 December 2022: credit is 35%
- Claims made after 31 December 2022 but on or before 31 December 2023: credit is 34%
- Claims made after 31 December 2023: credit is 32%

Relief for losses. Trading losses and charges incurred by a company in an accounting period in a trading activity that is not subject to the 25% corporation tax rate (effectively most trades) can be offset only against profits of that accounting period or the preceding accounting period to the extent that the profits consist of trading income subject to the 12.5% rate. Any unused trading losses may be carried forward to offset future trading income derived from the same trade.

Relief may be available through a reduction of corporation tax on a value basis. For example, in 2022, when the standard corporation tax rate on trading income is 12.5%, 12.5% of the trading loss may be offset against the corporation tax liability of a company with respect to profits from all sources. The full amount of the trading loss that is so utilized is regarded as being used up for purposes of calculating losses that may be carried forward. In effect, a company needs trading losses equal to twice the amount of its passive income to eliminate its tax liability on such income.

Terminal loss relief may be available if a company incurs a loss in its last 12 months of trading. This relief allows such losses to be carried back against income of the same trade in the preceding three years.

Groups of companies. Certain tax reliefs are available to a group of companies that meet the following requirements:

- The group companies have a minimum share relationship of 75%.
- The parent company is entitled to 75% of distributable profits.
- The parent company is entitled to 75% of assets available for distribution on a winding up.

Such companies may transfer surplus losses and excess charges on income. Surplus losses of companies owned by a consortium may also be transferred.

Group and consortium relief are available if all of the companies in the group or consortium are resident in an EEA member country (except Liechtenstein). Loss relief was historically restricted to losses incurred in a business carried on by a company subject to Irish corporation tax. However, group relief is now available for certain “trapped” trading losses incurred by non-Irish 75% subsidiaries resident in an EEA country (except Liechtenstein). Losses that can be used elsewhere are ineligible for surrender.

Losses can be transferred between two Irish resident companies if both companies are part of a 75% group involving companies that are tax resident in an EU or tax treaty country, or quoted on a recognized stock exchange. In determining whether a company is a 75% subsidiary of another company for the purpose of group relief (losses), the parent is no longer regarded as owning any shares that it owns directly or indirectly in a company that is not resident for tax purposes in a relevant territory. This effectively means that losses may not be surrendered if a company resident in a state that has not entered into a double tax treaty with Ireland is between a claimant and a surrendering company in the group structure.

The National Asset Management Agency Act 2009 provides for a limited form of loss surrender between certain financial institutions in the same group with respect to excess losses carried forward from earlier periods for which the surrendering financial institution cannot obtain relief.

In a 75% group, assets may be transferred without generating a chargeable gain. An asset retains its tax value while it is held within the group. The tax value is generally based on original cost; for assets acquired before 6 April 1974, the tax value is computed with reference to the market value on that date. If an asset is transferred to a company that leaves the group within 10 years after the

transaction, that company is deemed to have disposed of and immediately reacquired the asset at its market value at the time of its acquisition, effectively crystallizing the deferred gain.

A nonresident company that is resident in an EEA country (except Liechtenstein) and a company resident in a jurisdiction with which Ireland has a double tax treaty may be taken into account in determining whether a group exists for chargeable gains purposes. An Irish branch of a company resident in an EEA country (except Liechtenstein) and an Irish branch of a company resident in a jurisdiction with which Ireland has a double tax treaty, that is a member of a group may transfer assets to another member of a group on a tax-neutral basis. Any gain arising on the transfer is not taxable until the asset is sold outside the group. To qualify for such relief, the following conditions must be satisfied:

- Each of the companies in the group must be resident in Ireland or in an EEA country (except Liechtenstein) or in a jurisdiction with which Ireland has a double tax treaty.
- Any transferor/transferee companies not resident in Ireland must be carrying on a trade in Ireland through a branch.
- The transferred asset must be a chargeable asset for corporation tax purposes in Ireland.

Dividends paid between Irish resident companies are not subject to DWT (see Section B) if the appropriate declarations are made. However, a 51% subsidiary resident in Ireland may pay dividends free of DWT without the parent company making a formal declaration to the subsidiary that it is an Irish resident company. Withholding tax is not imposed on interest and royalty payments between members of a 51% group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods or services, other than an exempt supply made in or deemed to be made in Ireland, and on imports from other than EU member states at the point of entry	
Standard rate	23
Other rates	0/4.8/5.5/9/13.5
Stamp duty	
On certain documents (maximum rate)	7.5
On bulk/cumulative purchases of 10 or more residential units in a 12-month period	10
Local property tax (residential property); the tax is calculated based on valuation bands; each band has a basic rate of local property tax; there are 19 valuation bands for properties up to EUR1.75 million; the tax for properties with a market value of greater than EUR1.75 million is calculated based on the valuation of the property; the charge is the sum of 0.1029% of the first EUR1.05 million of the declared market value of the property, 0.25% of the portion of the declared market value between EUR 1.05 million and EUR1.75 million and 0.3% of the portion of the declared market value above EUR1.75 million	Various

Nature of tax	Rate (%)
Pay-related social insurance (PRSI) (for the period ending 31 December 2022), on employees' salaries; paid by Employers	
For employees earning a weekly salary of more than EUR410; on each employee's salary without limit	11.05
For employees earning a weekly salary of EUR410 or less	8.8
Employees; on annual salary	4
Universal Social Charge (USC); imposed on employees	
Annual salary of up to EUR12,012 (exempt if income is less than EUR13,000)	0.5
Annual salary of EUR12,013 to EUR21,295	2
Annual salary of EUR21,296 to EUR70,044	4.5
Annual salary in excess of EUR70,044	8
(A reduced 2% rate applies to individuals over 70 years old or who hold a full medical card and whose aggregate income for the year is less than EUR60,000.)	
Residential zoned land tax; the 2021 Finance Act provides for a new residential zoned land tax at a rate of 3% on the market value of land that meets the criteria of zoned serviced residential development land; lands within the scope of this provision will be chargeable to the tax from 1 January 2024 onward; lands that come within the scope of the tax after 1 January 2022 will be chargeable in the third year after coming within scope	3

E. Miscellaneous matters

Foreign-exchange controls. Foreign-exchange controls are not imposed, except in very limited circumstances at the discretion of the Minister for Finance. For example, the minister may impose foreign-exchange controls to comply with EU law or a United Nations resolution.

Debt-to-equity ratios. No thin-capitalization rules exist, but interest payments to 75%-nonresident affiliated companies may be treated as distributions of profit and consequently are not deductible (for details regarding this rule, see Section C).

Controlled foreign companies. The 2018 Finance Act transposes Option B of the EU ATAD controlled foreign company (CFC) rules into Irish law. The rules provide for a CFC income inclusion at the Irish parent level for accounting periods beginning on or after 1 January 2019.

The charge applies to undistributed income of greater than 50%-owned foreign entities based on share capital, voting rights or distributions on wind-up if both of the following conditions are satisfied:

- The relevant Irish activities, being significant people functions or key entrepreneurial risk-taking functions, are performed in Ireland on behalf of the CFC group.

- Such functions are relevant to the legal or beneficial ownership of assets held by the foreign entity or the assumption and management of the risks included in the relevant assets and risks of the foreign entity.

The charging provision excludes situations in which the undistributed income attributable to the relevant Irish activities is the result of arrangements that would have been entered into by persons dealing at arm's length or in which the essential purpose of the arrangements is not to secure a tax advantage. Other exemptions apply, in line with ATAD, with respect to effective tax rates, low-profit margins and low accounting profits. However, the 2020 Finance Act provides that the effective tax rate, low profit and low accounting profit margin exemptions do not apply for accounting periods beginning on or after 1 January 2021 if the CFC is resident in a jurisdiction listed in the EU list of non-cooperative jurisdictions. For accounting periods beginning between 1 January 2021 and 31 December 2021, the list published in October 2020 applies; for accounting periods beginning on or after 1 January 2022, the list published in October 2021 applies.

The provision includes a charge to Irish corporation tax at a rate of 12.5% on the basis that the attributable undistributed income would be treated as trading income had it accrued directly to the chargeable company and a charge to Irish corporation tax at a rate of 25% for attributable undistributed passive income. Any foreign tax paid or borne, corresponding to Irish corporation tax, with respect to the chargeable income of the CFC is allowed as a credit against Irish tax arising on a CFC income inclusion. No other form of relief is allowed to mitigate the CFC charge.

A 12-month exemption with respect to newly acquired CFCs applies if certain conditions are satisfied. Relief is also provided with respect to disposals of CFCs for which chargeable gains arise that allow for a deduction of a CFC tax charge in computing the arising gains.

Anti-avoidance rule. A general anti-avoidance rule (GAAR) empowers the Revenue Commissioners to reclassify a "tax avoidance" transaction in order to remove a tax advantage resulting from such transaction. An additional surcharge equal to 30% (20% for transactions begun on or before 23 October 2014) of the underpayment can be imposed if the Revenue Commissioners deny a tax advantage and if the taxpayer had not made a "protective notification" of the "tax avoidance" transaction to the Revenue within 90 days after the beginning of the transaction.

Transfer pricing. For accounting periods commencing on or after 1 January 2020, the relevant transfer-pricing guidance applicable under Irish law is the 2017 version of the OECD Transfer Pricing Guidelines.

Additional guidance specific to financial transactions was released by the OECD on 11 February 2020, namely the Transfer Pricing Guidance on Financial Transactions, Inclusive Framework on Base Erosion and Profit Shifting (BEPS): Actions 4, 8-10 ("OECD FTTP Guidance" or "Chapter X").

The Chapter X guidance has been formally adopted into Irish legislation by regulation.

Irish domestic legislation governing the computation of branch profits has been brought into line with international leading practices in this area. For accounting periods commencing on or after 1 January 2022, the new legislation incorporates a provision like Article 7(2) of the Model Tax Convention, which contains an Authorized OECD Approach (AOA) Rule, and adopts OECD AOA Guidance, as appropriate.

The rules apply to any arrangement between associated enterprises involving any goods, services, money and/or intangible assets, if such arrangement would be considered “trading.” Non-trading transactions are also in scope for transfer pricing with respect to accounting periods commencing on or after 1 January 2020, subject to some domestic carve-outs. The local transfer-pricing rules were also extended to capital transactions if the capital expenditure is incurred on or after 1 January 2020. The regulations apply to both domestic and cross-border transactions.

Irish borrowing entities need to consider the arm’s-length nature of the quantum of loans entered into in the context of the total debt held by the entity. If a taxpayer has received debt from a connected party and as a result is claiming interest deductions for tax purposes, the taxpayer needs to be able to demonstrate that the interest charges do not exceed those that it would have claimed had it been funded entirely by third-party debt (at “arm’s length”). It is important to determine the amount and price (interest rate) of debt that the company could borrow under arm’s-length conditions.

There is a general increased focus on substance over form: that is, the significant people functions; development, enhancement, maintenance, protection and exploitation (DEMPE) substance and control of risk; and the financial capacity to assume the risks. There is the potential for the Irish Revenue to recharacterize and to focus on the accurate delineation of the transaction.

The Irish tax code contains significant documentation requirements.

Given that the Irish transfer-pricing rules now apply the 2017 OECD Transfer Pricing Guidelines for accounting periods beginning on or after 1 January 2020, this update specifically brings certain companies into scope to prepare transfer-pricing documentation in accordance with Annex I and Annex II of the 2017 OECD Transfer Pricing Guidelines (that is, Master File and Local File approach). Technically, taxpayers with a 31 December 2021 year end who are due to file their corporation tax return by 23 September 2022 are also required to have a Local File transfer-pricing report in place (subject to a EUR50 million group consolidated revenue threshold) and have access to the group Master File (subject to a EUR250 million group consolidated revenue threshold) by this date.

There is a requirement for transfer-pricing documentation to be prepared by a company’s corporation tax filing deadline, and a fixed-rate penalty of EUR25,000 applies if such documentation

is not provided to the Irish Revenue on request (plus EUR100 per day that such requested documents remain outstanding). However, if the taxpayer prepares transfer-pricing documentation that demonstrates a reasonable effort to comply with the transfer-pricing legislation, there is protection from tax-gearred penalties in the careless behavior category.

The extension of transfer-pricing rules to small and medium-sized enterprises (SMEs) must be implemented by way of a Ministerial Commencement Order. Such rules would extend transfer-pricing rules to SMEs if the aggregate consideration for the related-party cross-border transaction is more than EUR1 million or if the value of assets is more than EUR25 million.

Country-by-Country Reporting. The 2015 Finance Act introduced Country-by-Country Reporting compliant with the OECD's recommendations. For accounting periods beginning on or after 1 January 2016, Irish-headquartered companies must file a Country-by-Country Report with the Irish Revenue within 12 months after the end of their accounting period. In addition, country-by-country notifications must be made no later than the last day of the fiscal year to which the report relates. Groups with annual consolidated group revenue in the immediately preceding accounting period of less than EUR750 million are exempt from this reporting requirement.

Mandatory disclosure rules. The 2019 Finance Act transposes into Irish domestic law amendments to the EU Directive on Administrative Co-operation applying the mandatory disclosure provisions to certain cross-border transactions that contain some of the characteristics of aggressive tax planning (DAC 6). Taxpayers and intermediaries are required to report cross-border reportable arrangements within 30 days. Penalties apply in cases of noncompliance.

Reporting requirement for digital platform operators. The 2021 Finance Act for the transposition of Council Directive EU 2021/514, amending the Directive on Administrative Cooperation (DAC7). DAC7 provides for the introduction of automatic reporting obligations for online "platform operators." The provision is subject to a Ministerial Commencement Order but is expected to apply from 1 January 2023 with first reporting by 31 January 2024.

Anti-hybrid rules. The 2019 Finance Act contains provisions to give effect to the anti-hybrid rules in the EU ATAD. These rules take effect for payments made or arising on or after 1 January 2020.

Anti-reverse hybrid rules. The 2021 Finance Act provides for the introduction of anti-reverse hybrid mismatch rules with effect for accounting periods commencing on or after 1 January 2022.

Construction operations. Special withholding tax rules apply to payments made by principal contractors to subcontractors with respect to relevant contracts in the construction, forestry and meat-processing industries. Under these rules, principal contractors must withhold tax from certain payments. Under this electronic system (within which all relevant contracts must be

registered), withholding rates of 0%, 20% and 35% apply. If subcontractors are not registered with the Revenue or if serious compliance issues that need to be addressed exist, the rate is 35%. All other subcontractors should qualify for the 20% rate.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

Non-treaty jurisdictions	0/20 (o)(p)	20 (b)(p)	0/20 (c)

- (a) Withholding tax at a rate of 25% applies to dividends distributed on or after 1 January 2020 (the rate was previously 20%). The table assumes that the recipient of the dividends is not a company controlled by Irish residents (that is, the domestic measure providing that DWT is not imposed on payments to residents of treaty countries applies). If domestic law allows the imposition of DWT, a refund of the DWT may be obtained under the terms of an applicable tax treaty.
- (b) Interest is generally exempt from withholding tax if it is paid by a company or investment undertaking in the ordinary course of its business to a company resident in an EU member country or a country with which Ireland has entered into a tax treaty. However, this exemption may be unavailable if the recipient is resident in a country that does not generally impose a tax on interest received from foreign sources.
- (c) Under Irish domestic law, withholding tax on royalties applies only to patent royalties and to other payments regarded as "annual payments" under Irish law. The Irish Revenue has confirmed that withholding tax need not be deducted from royalties paid to nonresidents with respect to foreign patents (subject to conditions). Effective from 4 February 2010, withholding tax does not apply to patent royalties paid by a company in the course of a trade or business to a company resident in a treaty country that imposes a generally applicable tax on royalties received from foreign sources (subject to conditions).

- (d) The normal withholding tax rate for royalties is 10%. However, the following royalties are exempt unless the recipient has a permanent establishment in Ireland and the income is derived there:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works (but not including royalties paid for motion picture films or for works on film or video-tape or other means of reproduction for use in connection with television broadcasting)
 - Royalties for the use of, or the right to use, computer software or patents or for information concerning industrial, commercial or scientific experience (but not including any such royalties in connection with rental or franchise agreements)
- (e) The 0% rate also applies in certain circumstances, such as if the interest is paid by, or received from, a central bank or local authority.
- (f) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.
- (g) The 0% rate also applies in certain circumstances, such as if the interest is paid by or received from a central bank or local authority. The 5% rate applies if the beneficial owner of the interest is a bank. The 10% rate applies to other interest.
- (h) A 0% rate also applies to royalties for the use of copyrights of literary, artistic or scientific works, including motion pictures, film recordings on tape, other media used for radio or television broadcasting or other means of reproduction or transmission.
- (i) The 0% rate also applies to interest paid to banks or financial institutions, interest paid on loans with a term of more than two years and interest paid in certain other circumstances.
- (j) The withholding tax rate for royalties is 10%, but only 60% of royalties for the use of, or the right to use, industrial, commercial or scientific equipment is taxable.
- (k) The 5% rate applies to royalties paid for the use of patents, designs or models, plans, secret formulas or processes or for information concerning industrial or scientific experience. The 10% rate applies to royalties paid for the use of trademarks or information concerning commercial experience. The 15% rate applies to other royalties.
- (l) The normal withholding tax rate for interest is 10%, but a 0% rate applies in certain circumstances.
- (m) Ireland has implemented Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between 25%-associated companies of different EU member states. The 2005 Finance Act extended these benefits to Switzerland. If the directive applies, the withholding tax rate is reduced to 0%.
- (n) The 10% rate applies to interest paid with respect to a loan or other debt claim for a period exceeding two years or interest paid to a financial institution.
- (o) Irish domestic law may provide for an exemption from DWT under certain circumstances (see Section B).
- (p) Certain withholding tax exemptions that are available to treaty countries under Irish domestic law (see footnotes [a] and [b]) may be extended to residents of any countries with which Ireland signs a double tax treaty (beginning on the date of signing of such agreement), subject to conditions.
- (q) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, computer software, industrial, commercial or scientific equipment or information concerning industrial, commercial or scientific experience.
- (r) The 2% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The higher rate applies to other royalties.
- (s) The 10% rate applies if the interest is beneficially owned by a financial institution or if it is beneficially owned by a resident of the other contracting state and is paid with respect to indebtedness arising from a sale on credit by a resident of that other state of equipment, merchandise or services, unless the sale is between persons not dealing with each other at arm's length. The 15% rate applies to interest in other cases.
- (t) The 5% rate applies to the right to use copyrights of literary, artistic or scientific works. The 10% rate applies to the use of, or the right to use, industrial, commercial or scientific equipment, or patents. The 15% rate applies to the use of, or the right to use, trademarks, designs or models, plans, secret formulas or processes and to information concerning industrial, commercial or scientific experience.

- (u) The 10% rate applies if the interest is beneficially owned by a resident of other contracting state. The 5% rate applies to interest paid in connection with the sale on credit of industrial, commercial or scientific equipment, or on loans granted by banks.
- (v) The 5% rate applies with respect to copyrights of scientific works, patents, trademarks, secret formulas or processes or information concerning industrial, commercial or scientific experience.
- (w) The 10% rate applies if the interest is beneficially owned by a resident of the other contacting state.
- (x) The 8% rate applies to royalties with respect to copyrights of scientific works, patents, trademarks, designs or models plans, secret formulas or processes, or information concerning industrial commercial or scientific experience.
- (y) For purposes of giving relief under a double tax agreement, IREF distributions (see *Irish Real Estate Funds* in Section B) are regarded as income from immovable property if the investor in an investment undertaking is beneficially entitled directly or indirectly to at least 10% of the IREFs units. Otherwise, the payment is regarded as a dividend for treaty purposes. The table assumes that the distribution is not from an IREF.

Ireland has entered into limited double tax agreements with Guernsey, the Isle of Man and Jersey, which do not provide for reductions in withholding taxes.

A treaty with Kosovo came into force on 24 February 2022 and will enter into effect on 1 January 2023.

Ireland has also signed new treaties with Ghana and Kenya. Procedures to ratify the treaties are underway

Negotiations on protocols to the existing double tax treaties with Guernsey, the Isle of Man and Mexico have concluded.

Negotiations have concluded on new double tax treaties with Oman and Uruguay.

Ireland's existing treaties are subject to the provisions of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI). The MLI entered into force for Ireland on 1 May 2019. The Irish changes under the MLI are generally effective for withholding taxes from 1 January 2020 and for other taxes for tax periods beginning on or after 1 November 2019.

Resident Corporation Income Tax Rate (%)	0 (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	0 (a)
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties	0
Net Operating Losses	
Carryback	1 (b)
Carryforward	Unlimited (b)

- (a) The standard 0% rate of corporate income tax applies to all profits derived by companies except for the following:
- Certain banking business in the Isle of Man and certain retail business in the Isle of Man, which are subject to tax at a rate of 10%
 - Profits arising from land and property in the Isle of Man, which are subject to tax at a rate of 20%
- (b) Loss relief is available in certain circumstances (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in the Isle of Man are subject to income tax on their worldwide income, but relief from double taxation may be available. A nonresident company with a branch carrying on a trade in the Isle of Man is subject to tax on the income of the branch. A company is resident in the Isle of Man if it is incorporated in the Isle of Man or if the central management and control of the company is exercised there.

Rates of corporation tax. The standard rate of corporate income tax is 0%. This rate applies to all profits derived by trading and investment companies, except for the following:

- Certain banking business in the Isle of Man and certain retail business in the Isle of Man, which are subject to tax at a rate of 10%

- Profits arising from land and property in the Isle of Man, which are subject to tax at a rate of 20%

Trading companies may also elect to be taxed at the 10% rate.

Substance requirements. The Isle of Man has introduced legislation that imposes economic substance requirements for tax resident companies that are in receipt of income from a “relevant sector.” The following are the relevant sectors:

- Banking
- Insurance
- Shipping
- Fund management
- Financing and leasing
- Headquartering
- Operation of a holding company
- Holding intangible property
- Distribution and service center

The legislation is effective for accounting periods commencing on or after 1 January 2019 and requires Isle of Man tax resident companies that are in receipt of income from a relevant sector to demonstrate that they have adequate substance by the following ways:

- They are being directed and managed in the Isle of Man.
- They have an adequate number of qualified employees in the Isle of Man.
- They have an adequate operating expenditure proportionate to the level of activity carried on in the Isle of Man.
- They have an adequate physical presence in the Isle of Man.
- They conduct their core income-generating activity in the Isle of Man.

Sanctions for failing to meet the substance requirements are progressive and include financial penalties (GBP10,000 to GBP100,000), exchange of information and, if incorporated in the Isle of Man, strike-off from the Companies Registry.

Capital gains. The Isle of Man does not impose a tax on capital gains.

Administration. Tax returns must be filed within 12 months and 1 day after the accounting year-end, and any tax payable is due at the same time. In certain circumstances, companies wholly subject to the 0% rate file shortened tax returns.

Filing penalties apply for the late submission of company returns. The first penalty is GBP250. A further penalty of GBP500 is imposed if the return is not filed within 18 months and 1 day after the end of the accounting period. If the return remains outstanding 24 months after the end of the accounting period, the company and its officers may be subject to criminal proceedings.

Withholding taxes. In general, no withholding tax is imposed on dividends, interest and royalties paid by Isle of Man resident companies. The Assessor of Income Tax may require a person who makes a payment or credit of taxable income to a person resident outside the Isle of Man to deduct income tax from such payment or credit at a rate specified by the Assessor. For example, a 20% withholding tax is imposed on Isle of Man rent paid by Isle of Man resident companies to nonresident companies and individuals.

Foreign tax relief. Foreign tax on income of a resident company may be credited against Manx income tax on the same profits. Foreign tax relief cannot exceed the income tax assessed by the Isle of Man on those profits.

C. Determination of trading income

General. The tax assessment is based on financial accounts prepared using generally accepted accounting principles, subject to certain adjustments and provisions.

Expenses must be incurred wholly and exclusively for the purpose of the trade and not be capital in nature. Dividends are not deductible in calculating taxable profit.

Inventories. Inventory is normally valued at the lower of cost or net realizable value. Cost must be determined on a first-in, first-out (FIFO) basis; the last-in, first-out (LIFO) basis is not acceptable.

Capital allowances (tax depreciation)

Plant and machinery. A first-year allowance of up to 100% may be claimed. Annual writing-down allowances of 25% may also be claimed.

Motor vehicles. Expenditures on motor vehicles qualify for an annual allowance of 25% of the declining balance. The maximum annual allowance is GBP3,000.

Industrial buildings, agricultural buildings and tourist premises. A 100% initial allowance may be claimed on capital investment to acquire, extend or alter a qualifying industrial building, agricultural building or tourist facility. This allowance is granted on expenditures in excess of any government grants received.

Disposals. On the ultimate disposal of assets on which capital allowances have been claimed, an adjustment is made by add-back or further allowance to reflect the net cost to the company of the asset.

Relief for trading losses. Trading losses may be used to offset other income of the year in which the loss was incurred or income of the preceding year if the same trade was carried on, or losses may be carried forward, without time limit, to offset future income from the same trade. Special rules apply to the carryback of losses on commencement or cessation of the trade.

Companies may also surrender losses to 75%-group companies. A recipient company can use surrendered losses only against profits earned in the same year of assessment.

Under the loss relief rules described above, relief is allowable only against profits chargeable at the same rate of tax. Losses arising from activities subject to tax at the rate of 0% may not be relieved against profits taxed at 10% or 20%.

D. Other significant taxes

The Isle of Man and the United Kingdom are considered one area for VAT, customs and excise purposes. VAT, customs and excise rates are levied in the Isle of Man at the same rates as in the United Kingdom. The Customs and Excise Division in the Isle of Man operates independently from the United Kingdom, but under similar legislation.

The Isle of Man has the same system for National Insurance contributions as the United Kingdom, but the contributions are calculated at lower rates.

E. Miscellaneous matters

Anti-avoidance provisions. The Assessor of Income Tax has the authority to make an assessment or an additional assessment in situations in which the Assessor considers Manx tax to have been avoided. Appeals are made to the Income Tax Commissioners. No assessment is made if the person involved provides evidence to the Assessor that the purpose of avoiding or reducing income tax liability was not the primary purpose or one of the primary purposes for which the transaction was carried out.

Foreign-exchange controls. The Isle of Man does not impose any foreign-exchange controls.

Transfer pricing. Isle of Man law does not include transfer-pricing rules. However, domestic anti-avoidance provisions need to be considered.

Debt-to-equity rules. The Isle of Man does not impose debt-to-equity requirements.

F. Tax treaties

The Isle of Man has entered into double tax treaties with Bahrain, Estonia, Guernsey, Jersey, Luxembourg, Malta, Qatar, Seychelles, Singapore, and the United Kingdom. It has also signed a double tax treaty with Belgium, but this treaty is not yet in force.

In addition, the Isle of Man has entered into agreements with the following jurisdictions to eliminate the double taxation of profits with respect to enterprises operating ships or aircraft in international traffic.

Denmark	Germany	Norway
Faroe Islands	Greenland	Poland
Finland	Iceland	Sweden
France	Netherlands	United States

The Isle of Man has signed tax information exchange agreements (TIEAs) with the following jurisdictions.

Anguilla	Finland	New Zealand
Argentina	France	Norway
Australia	Germany	Poland
Bermuda	Gibraltar	Portugal
Botswana	Greenland	Romania
British Virgin Islands	Iceland	Slovenia
Canada	India	Spain*
Cayman Islands	Indonesia	Sweden
China Mainland	Ireland	Switzerland
Czech Republic	Italy	Turkey
Denmark	Japan	Turks and Caicos Islands
Eswatini*	Lesotho	United Kingdom
Faroe Islands	Mexico	United States
	Netherlands	

* TIEAs with these countries are awaiting ratification.

- (a) This is the regular company tax rate for profits and real capital gains. Reduced rates of company tax are available in accordance with the Encouragement of Capital Investments Law (for details, see Section B).
- (b) See Section B for details.
- (c) The withholding tax may be reduced by applicable tax treaties.
- (d) The 0% rate generally applies to distributions to Israeli parent companies. In addition, reduced withholding tax rates of 4%, 15% and 20% may apply under the Encouragement of Capital Investments Law, provided certain conditions are met.
- (e) In principle, the withholding taxes on interest and royalties are not final taxes.
- (f) Interest paid to nonresidents on Israeli corporate bonds registered for trading on the Tel-Aviv Stock Exchange is exempt. In general, interest paid to nonresidents on Israeli governmental bonds is exempt. However, interest on short-term bonds (issued for 13 months or less) is taxable.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to Israeli tax on their worldwide income. Nonresident companies are subject to Israeli tax on income accrued or derived in Israel, unless otherwise provided for in an applicable tax treaty.

A company is considered resident in Israel for Israeli tax purposes if either of the following applies:

- It is incorporated in Israel.
- Its business is controlled and managed in Israel.

Rates of corporate tax. Effective from 1 January 2018, the regular rate of corporate income tax is 23%. The following are the combined Israeli taxes on profits, taking into account the 30% withholding tax on dividends paid to shareholders holding 10% or more of the company (material shareholders) and the 25% withholding tax imposed on shareholders holding less than 10% of the company:

- Material shareholders: 46.1% from 2018. Shareholders who are individuals may be subject to an additional tax at a rate of 3% on their taxable income in excess of ILS647,640 (linked to the Consumer Price Index each year).
- Other shareholders: 42.25% from 2018. For individual shareholders, an additional tax of 3% may apply (see above).

The dividend withholding tax rates mentioned above may be reduced based on applicable tax treaties.

Tax levy on oil and gas. Under the Windfall Profits Tax Law, a levy is imposed on oil and gas profits from an oil or gas project in the relevant tax year. The levy is designed to capitalize on the economic dividend arising from each individual reservoir. The levy is imposed only after the investments in exploration, development and construction are fully returned plus a yield that reflects, among other items, the developer's risks and required financial

expenses. The levy is progressive and has a relatively lower rate when first collected, and increases as the project's profit margins grow.

Tax reductions and exemptions. The major tax reductions and exemptions offered by Israel are described below.

Encouragement of Capital Investments Law. The Encouragement of Capital Investments Law has the following objectives:

- Achieving of enhanced growth targets in the business sector
- Improving the competitiveness of Israeli industries in international markets
- Creating employment and development opportunities in outlying areas

Precedence is granted to innovation and development areas.

The country is divided into national priority areas, which benefit from several reduced tax rates and benefits based on the location of the enterprise.

A reduced uniform corporate tax rate for exporting industrial enterprises (generally over 25% of turnover from export activity) applies. The reduced tax rate does not depend on a program and applies to the industrial enterprise's industrial income.

The reduced tax rates for industrial enterprises that meet the criteria of the law are 7.5% for Development Area A and 16% for the rest of the country. In addition, accelerated depreciation applies. The accelerated depreciation reaches 400% of the standard depreciation rate on buildings (not exceeding 20% per year and exclusive of land) and 200% of the standard depreciation rate on equipment or machines.

A reduced tax on dividends of 15% or 20% is imposed without distinction between foreign and local investors. These tax rates may be reduced under applicable tax treaties. On the distribution of a dividend to an Israeli company, no withholding tax is imposed (with certain exceptions).

A unique tax benefit is granted to certain large industrial enterprises. This entitles such companies to a reduced tax rate of 5% in Development Area A and 8% in the rest of the country.

In addition to the above tax benefits, fixed asset grants of 20% to 30% of the investment cost of fixed assets may be granted to enterprises in Development Area A.

Grants may also be made under the Employment Grant Program. These grants are made to create incentives for employment in the outlying areas of Israel. The grants are up to 27.5% of the cost of salaries for a period of two and one-half to four years, depending on the location, number of employees and the employees' salaries.

On 15 November 2021, Israel released its 2021-2022 Budget Law (Budget Law), which introduced a new dividend distribution ordering rule to cause the distribution of earnings that were tax exempt under the historical Approved or Beneficial Enterprise regimes (Trapped Earnings) to be on a pro rata basis from any dividend distribution. The new rule applies to distributions from 15 August 2021 onward. This means that the corporate income

tax clawback will apply on any dividend distribution, as long as the company has Trapped Earnings.

In parallel, the Budget Law also includes a Temporary Order to enhance the release of Trapped Earnings by reducing the clawback corporate income tax rate that is applicable on such a release or distribution by up to 60%, but not less than a 6% corporate income tax rate, during a one-year period beginning from 15 November 2021.

Innovation box. Israel approved an innovation box regime for intellectual property (IP)-based companies, effective from 1 January 2017. This regime is included in the Encouragement of Capital Investments Law.

The Israeli government tailored this regime to the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) framework, encouraging multinationals to consolidate IP ownership and profits in Israel, together with existing Israeli research and development (R&D) functions.

Tax benefits created to achieve this goal include a reduced corporate income tax rate of 6% on IP-based income and on capital gains from future sales of IP. The 6% rate applies to qualifying Israeli companies that are part of a group with global consolidated revenue of over ILS10 billion (approximately USD3.2 billion).

Other qualifying companies with global consolidated revenue below ILS10 billion are subject to a 12% tax rate. However, if the Israeli company is located in a development area, the tax rate is further reduced to 7.5%.

In addition, a 20% withholding tax should be applied on dividends distributed out of income that was subject to the tax incentives (unless further reduced by a treaty). Furthermore, a 4% dividend withholding tax may be applied for the taxable preferred technology income if at least 90% of the company's shares are held directly by one or more foreign companies.

Entering into the regime is not conditioned on making additional investments in Israel. A company can qualify if it invests at least 7% of the last three years' revenue in R&D (or incurs ILS75 million in R&D expenses per year) and if it meets one of the following conditions:

- It has at least 20% R&D employees (or more than 200 R&D employees).
- A venture capital investment of ILS8 million was previously made in the company.
- It had average annual growth over three years of 25% in sales or employees.

Companies not meeting the above conditions may still be considered qualified companies at the discretion of the Israel Innovation Authority (previously known as the Office of the Chief Scientist) in the Economy Ministry.

Companies wishing to exit from the regime in the future will not be subject to the clawback of tax benefits.

The Finance Committee also approved a stability clause to encourage multinationals to invest in Israel. Accordingly, companies will be able to confirm the applicability of tax incentives for a 10-year period under a ruling process.

In line with the OECD Nexus Approach, the Finance Minister promulgated regulations to ensure that companies are benefiting from the regime to the extent qualifying R&D expenses are incurred.

Research and development incentives. R&D programs are available to Israeli companies. The Israel Innovation Authority primarily provides these incentives. The company can obtain an R&D grant equal to about 20% to 50% of its R&D expenses, depending on the grant program, the company's technology innovation and its business model and marketing validation. Binational Funds and Agreements Programs can provide R&D incentives agreements for joint R&D projects. These agreements provide for grants of up to 50% of the R&D expenses of the Israeli partner and its foreign partner, incurred during the commercial phase of the project.

Eilat free trade zone. A value-added tax (VAT) exemption and employment benefits are granted to enterprises in the Eilat free trade zone.

Other incentives. Approved residential rental properties qualify for reduced company tax rates on rental income (and on gains derived from sales of certain buildings that have a residential element; a building has a residential element if at least 50% of the floor space is rented for residential purposes for a prescribed number of years, according to detailed rules). The reduced rates generally range from 11% (plus 15% withholding tax on dividends) for companies to 20% for individuals. Effective from November 2021, a new benefits track is introduced, while the existing benefits track will continue to apply only to rental properties for which an application for the benefits is submitted by 31 December 2023.

The new benefits track provides enhanced tax benefits compared to those provided in the existing benefits track in exchange for increased rental terms and certain further changes. The new track features a progressive system of increased tax benefits to encourage longer-term rentals, with the most favorable rates available after 15 years and higher quantitative threshold conditions for the minimum number of apartments rented out.

Preferential tax treatment may also be allowed with respect to the following:

- Real Estate Investment Trust (REIT) companies
- Agriculture
- Oil
- Movies
- International trading
- R&D financing
- Hotels and tourist ventures

Foreign resident investors may qualify for exemption from capital gains tax in certain circumstances (see *Capital gains and losses*).

Capital gains and losses

Residents. Resident companies are taxable on worldwide capital gains. Capital gains are divided into real and inflationary components. The following are descriptions of the taxation of these components:

- Effective from 1 January 2018, the tax rate on real capital gains is the standard corporate tax rate of 23%.
- The inflationary component of capital gains is exempt from tax to the extent that it accrued on or after 1 January 1994, and is generally taxable at a rate of 10% to the extent that it accrued before that date.

Gains derived from sales of Israeli real estate or from sales of interests in real estate associations (entities whose primary assets relate to Israeli real estate) are subject to Land Appreciation Tax at rates similar to those applicable to other capital gains.

Capital losses may be used to offset capital gains derived in the same or future tax years without time limit. In each year, capital losses are first offset against real gains and then offset against taxable inflationary amounts in accordance with the following ratio: ILS3.5 of inflationary amounts per ILS1 of capital losses. Capital losses from assets located abroad must be offset against capital gains on other assets abroad, then against capital gains from assets in Israel.

Capital losses incurred on securities can also be offset against dividend and interest income in the same year, subject to certain conditions.

Nonresidents. Unless a tax treaty provides otherwise, in principle, nonresident companies and individuals are subject to Israeli tax on their capital gains relating to any of the following:

- An asset located in Israel.
- An asset located abroad that is primarily a direct or indirect right to an asset, inventory or real estate in Israel or to a real estate association (an entity whose primary assets relate to Israeli real estate). Tax is imposed on the portion of the consideration that relates to such property in Israel.
- Shares or rights to shares (for example, warrants and options) in an Israeli resident entity.
- A right to a nonresident entity that primarily represents a direct or indirect right to property in Israel. Tax is imposed on the portion of the consideration that relates to such property in Israel.

Foreign residents not engaged in business in Israel may qualify for exemption from capital gains tax on disposals of the following investments:

- Securities traded on the Tel-Aviv stock exchange (with certain exceptions)
- Securities of Israeli companies traded on a recognized foreign stock exchange

The above exemption does not apply to the following:

- Gains attributable to a permanent establishment (generally a fixed place of business) of the investor in Israel
- Shares of Real Estate Investment Trust (REIT) companies
- Capital gains derived from the sale of Israeli governmental short-term bonds (issued for 13 months or less)

Foreign residents may also qualify for an exemption from capital gains tax on disposals of all types of Israeli securities not listed to trade that were purchased on or after 1 January 2009 if the seller (the company or individual who sold the Israeli securities to the foreign resident) was not a related party.

The above exemption does not apply to the following:

- Gains attributable to a permanent establishment (generally a fixed place of business) of the investor in Israel
- Shares of a company whose assets are principally Israeli real estate
- Shares of a company that has the value of its assets derived principally from the usufruct of immovable property and right to payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources (for example, companies that hold licenses to exploit gas and minerals in Israel's territory, which includes Israel's economic water)

In other cases, unless a tax treaty provides otherwise, foreign resident companies pay capital gains tax in accordance with the rules and rates applicable to Israeli resident companies, as described above. However, nonresidents investing with foreign currency may elect to apply the relevant exchange rate rather than the inflation rate to compute the inflationary amount.

Administration. The Israeli tax year is normally the calendar year. However, subsidiaries of foreign publicly traded companies may sometimes be allowed to use a different fiscal year.

Companies are generally required to file audited annual tax returns and financial statements within five months after the end of their fiscal year, but extensions may be obtained.

Companies must normally file monthly or bimonthly reports and make payments with respect to the following taxes:

- Company tax advances, which are typically computed as a percentage of a company's sales revenues
- Supplementary company tax advances with respect to certain nondeductible expenses
- Tax and social security contributions withheld from salaries and remittances to certain suppliers
- VAT

Nonresidents are required to appoint an Israeli tax representative and VAT representative if any part of their activities is conducted in Israel. The VAT representative is deemed to be the tax representative if no other tax representative is appointed. The tax representative is empowered to pay tax out of the foreign resident's assets.

Dividends. A 30% withholding tax is generally imposed on dividends paid to individual shareholders holding 10% or more of the shares in an Israeli company (material shareholders). A 25% withholding tax is imposed on dividends paid to individual shareholders holding less than 10% of the shares in an Israeli company and on regular dividends paid by a publicly traded company (regardless of whether the recipient is a material shareholder). However, resident companies are exempt from company tax on dividends paid out of regular income that was accrued or derived from sources within Israel. Companies are generally subject to tax at a rate of 23% on foreign dividend income that is paid from a foreign

source or from income accrued or derived abroad (foreign-source income that is passed up a chain of companies).

If certain conditions are met, a reduced withholding tax of 4%, 15% or 20% is imposed on dividends paid out of the income of a company entitled to the benefits of the Encouragement of Capital Investments Law. The rate may be further reduced under an applicable tax treaty. However, if such dividend is paid to an Israeli company, it is generally exempt from withholding tax (with certain exceptions).

Interest. Israeli resident companies are taxable on worldwide interest, original discount and linkage differentials income. The tax rate for these types of income is the standard corporate tax rate of 23%. Interest, original discount and linkage differentials income are treated as derived from Israeli sources if the payer is located in Israel. In principle, the same taxation rules apply to non-Israeli resident companies on Israeli-source interest, original discount and linkage differentials income, unless a tax treaty provides otherwise.

Nevertheless, an exemption from Israeli tax is available to foreign investors that receive interest income on bonds issued by Israeli companies traded on the Israeli stock exchange.

In addition, interest paid to nonresidents on Israeli governmental bonds that are issued for 13 months or more is exempt.

Israeli holding companies and participation exemption. To qualify for the participation exemption, an Israeli holding company must satisfy various conditions, including the following:

- It must be incorporated in Israel.
- Its business is controlled and managed in Israel only.
- It may not be a public company or a financial institution.
- It must not have been formed in a tax-deferred reorganization.
- For 300 days or more in the year, beginning in the year after incorporation, the holding company must have an investment of at least ILS50 million in the equity of, or as loans to, the investee companies, and at least 75% of the holding company's assets must consist of such equity investments and loans.

In addition, the foreign investee company must satisfy the following conditions:

- It must be resident in a country that entered into a tax treaty with Israel, or it must be resident in a foreign country that had a tax rate for business activity of at least 15% on the date of the holding company's investment (however, it is not required that the investee company pay the 15% tax [for example, it obtains a tax holiday]).
- At least 75% of its income in the relevant tax year is accrued or derived from a business or one-time venture abroad.
- The Israeli holding company must hold an "entitling shareholding" in the investee company for at least 12 consecutive months. An "entitling shareholding" is a shareholding that confers at least 10% of the investee's profits. The entitling shareholding must span a period of at least 12 months that includes the date on which the income is received.

An Israeli holding company is exempt from tax on the following types of income:

- Capital gains derived from the sale of an entitling shareholding in an investee company
- Dividends distributed during the 12-month minimum shareholding period with respect to an entitling shareholding in an investee company
- Interest, dividends and capital gains derived from securities traded on the Tel-Aviv Stock Exchange
- Interest and indexation amounts received from Israeli financial institutions

In addition, dividends paid by Israeli holding companies to foreign resident shareholders are subject to a reduced rate of dividend withholding tax of 5%.

Foreign tax relief. A credit for foreign taxes is available for federal and state taxes but not municipal taxes. Any excess foreign tax credit may be offset against Israeli tax on non-Israeli-source income from the same type in the following five tax years.

With respect to foreign dividend income, an Israeli company may receive a direct and an underlying tax credit for foreign taxes. The foreign dividend income is grossed up for tax purposes by the amount of the creditable taxes. The following are the alternative forms of the credit:

- Direct foreign tax credit only: corporate tax rate of 23% is imposed on foreign dividend income, and any dividend withholding tax incurred is creditable in Israel.
- Direct and underlying foreign tax credit: corporate tax rate of 23% is imposed on foreign dividend income, and a credit is granted for dividend withholding tax and underlying corporate tax paid abroad by 25%-or-greater affiliates and their direct 50%-or-greater subsidiaries. If an underlying foreign tax credit is claimed, any excess foreign tax credit may not be used to offset company tax in future years.

Foreign residents that receive little or no relief for Israeli taxes in their home countries may be granted a reduced Israeli tax rate by the Minister of Finance.

C. Determination of trading income

General. Taxable income is based on financial statements that are prepared in accordance with generally accepted accounting principles and are derived from acceptable accounting records. In principle, expenses are deductible if they are wholly and exclusively incurred in the production of taxable income. Various items may require adjustment for tax purposes, including depreciation, R&D expenses, and vehicle and travel expenses.

Inventories. In general, inventory may be valued at the lower of cost or market value. Cost may be determined using one of the following methods:

- Actual
- Average
- First-in, first-out (FIFO)

The last-in, first-out (LIFO) method is not allowed.

Provisions. Bad debts are deductible in the year they become irrecoverable. Special rules apply to employee-related provisions, such as severance pay, vacation pay, recreation pay and sick pay.

Depreciation. Depreciation at prescribed rates, based on the type of asset and the number of shifts the asset is used, may be claimed with respect to fixed assets used in the production of taxable income.

Accelerated depreciation may be claimed in certain instances. For example, under the Inflationary Adjustments Regulations (Accelerated Depreciation), for assets first used in Israel between 1 June 1989 and 31 December 2016, industrial enterprises may depreciate equipment using the straight-line method at annual rates ranging from 20% to 40%. Alternatively, they may depreciate equipment using the declining-balance method at rates ranging from 30% to 50%.

The following are some of the standard straight-line rates that apply primarily to non-industrial companies.

Asset	Rate (%)
Mechanical equipment	7 to 10
Electronic equipment	15
Personal computers and peripheral equipment	33
Buildings (depending on construction quality)	1.5 to 4
Goodwill	10 (a)
Patent rights and technology	12.5 (b)

(a) Subject to the fulfillment of certain conditions.

(b) For industrial companies, subject to the fulfillment of certain conditions.

Groups of companies. Subject to certain conditions, consolidated returns are permissible for an Israeli holding company and its Israeli industrial subsidiaries if the subsidiaries are all engaged in the same line of production. For this purpose, a holding company is a company that has invested at least 80% of its fixed assets in the industrial subsidiaries and controls at least 50% (or two-thirds in certain cases) of various rights in those subsidiaries. For a diversified operation, a holding company may file a consolidated return with the subsidiaries that share the common line of production in which the largest amount has been invested.

Group returns may also be filed by an Israeli industrial company and Israeli industrial subsidiary companies if the subsidiaries are at least two-thirds controlled (in terms of voting power and appointment of directors) by the industrial company and if the industrial company and the subsidiaries are in the same line of production.

Detailed rules concerning the deferral of capital gains tax apply to certain types of reorganizations, including corporate mergers, divisions and shares-for-assets exchanges. In many cases, an advance ruling is necessary.

Relief for losses. In general, business losses may be offset against income from any source in the same year. Unrelieved business losses may be carried forward for an unlimited number of years to offset business income, capital gains derived from business activities or business-related gains subject to the Land Appreciation

Tax (see Section B). According to case law, the offset of losses may be disallowed after a change of ownership and activity of a company, except in certain bona fide circumstances.

Special rules govern the offset of foreign losses incurred by Israeli residents. Passive foreign losses may be offset against current or future foreign passive income (for example, income from dividends, interest, rent or royalties). Passive foreign rental losses arising from depreciation may also be offset against capital gains from the sale of the relevant foreign real property.

Active foreign losses (relating to a business or profession) may be offset against the following:

- Active foreign income and business-related capital gains in the current year.
- Passive foreign income in the current year.
- Active Israeli income in the current year if the taxpayer so elects and if the foreign business is controlled and managed in Israel. However, in the preceding two years and in the following five years, foreign-source income is taxable up to the amount of the foreign loss.
- Active foreign income and business-related capital gains in future years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), standard rate	17
Wage and profit tax, imposed on financial institutions instead of VAT; this tax is imposed in addition to company tax	17
National insurance contributions on monthly employment income (subject to an upper income limit that fluctuates periodically)	
Employer payments; rates depend on residency of employee	Various
Employee payments; rates depend on residency of employee	Various
Payroll levy on salaries of foreign employees; levy does not apply if monthly salary exceeds twice the average monthly salary	10 to 20
Acquisition tax, imposed on purchasers of real estate rights; maximum rate	0 to 10
Annual municipal taxes on property	Various

E. Miscellaneous matters

Foreign-exchange controls. The Israeli currency is the new Israel shekel (ILS).

No exchange-control restrictions exist.

Debt-to-equity rules. No thin-capitalization rules are imposed in Israel.

Transfer pricing. Transactions between related parties should be at arm's length. Detailed transfer-pricing regulations apply. An Israeli taxpayer must report on each international transaction undertaken with a related party and indicate the arm's-length amount for such

transaction as well as the chosen method. Advance rulings may be requested regarding transfer pricing.

Measures to counteract tax planning involving foreign companies.

Certain measures are designed to counteract tax planning involving foreign companies.

Foreign professional companies. Israeli residents are taxed on deemed dividends received from foreign professional companies (FPCs) at the standard corporate tax rate; a foreign corporate tax credit is available. In addition, on the actual distribution of dividends by FPCs, Israeli residents are subject to dividend tax. A company is considered to be an FPC if a company meets all of the following conditions:

- It has five or fewer ultimate individual shareholders.
- It is owned 75% or more by Israeli residents.
- Most of its 10%-or-more shareholders conduct a special profession for the company.
- Most of its income or profits are derived from a special profession.

The special professions include engineering, management, technical advice, financial advice, agency, law, medicine and many others.

Controlled foreign corporations. Israeli residents are taxed on deemed dividends received from a controlled foreign corporation (CFC) if they hold 10% or more of the CFC. A foreign company (or any other body of persons) is considered to be a CFC if all of the following conditions exist:

- The foreign company primarily derives passive income or profits that are taxed abroad at a rate of 15% or less.
- The foreign company's shares are not publicly traded, or less than 30% of its shares or other rights have been issued to the public or listed for trade.
- One of the following requirements is satisfied:
 - Israeli residents own either directly or indirectly more than 50% of the foreign company.
 - An Israeli resident owns over 40% of the foreign company, and together with a relative, owns more than 50% of the company.
 - An Israeli resident has veto rights with respect to material management decisions, including decisions regarding the distribution of dividends or liquidation.

The shareholdings of the CFC are calculated as the higher of the following:

- The shareholdings at the tax year-end
- The shareholdings any day in the tax year plus any day in the following tax year

The deemed dividend is the taxpayer's share of passive undistributed income on the last day of the tax year.

Reportable transactions. Certain types of transactions with foreign companies must be reported to the tax authorities.

Withholding taxes on overseas remittances. Israeli banks must withhold tax, generally at a rate of 23%, from most overseas remittances unless the remittances relate to imported goods. An exemption or a reduced withholding rate may be obtained from

the Israeli tax authorities in certain circumstances, such as when a treaty applies or when the payments are for services that are rendered entirely abroad. A 30% withholding tax rate applies to dividends paid to recipients holding 10% or more of the payer entity.

Free-trade agreements. Israel has entered into free-trade agreements with Canada, Colombia, the European Free Trade Association, the European Union, the Southern Common Market (Mercado Común del Sur, or MERCOSUR) countries, Jordan, Mexico, Turkey, Ukraine, the United Kingdom and the United States.

F. Treaty withholding tax rates

The following table provides Israeli withholding tax rates for payments of dividends, interest and royalties to residents of various jurisdictions. Exemptions or conditions may apply, depending on the terms of the particular treaty.

	Dividends %	Interest %	Royalties (a) %
Albania	5/15 (ww)	0/10 (ggg)	5
Armenia	0/5/15 (ww)	10 (q)	5/10 (bbb)
Australia (aaa)	5/15 (m)	5/10 (c)	5
Austria	0/10 (zz)	0/5 (q)	0
Azerbaijan	15	10 (ee)	5/10 (ccc)
Belarus	10	5/10 (c)	5/10 (aa)
Belgium	15	15	10
Brazil	10/15 (l)	15 (c)	10/15 (jj)
Bulgaria	10/12.5 (b)	5/10 (c)	12.5 (d)
Canada	5/15 (kk)	0/5/10 (c)	0/10 (ccc)
China Mainland	10	7/10 (e)	7/10 (f)
Croatia	5/10/15 (h)	0/5/10 (c)(ll)	5
Czech Republic	5/15 (g)	10	5
Denmark	0/10 (oo)	0/5 (q)(mm)	0
Estonia	0/5 (oo)	5 (c)	0
Ethiopia	5/10/15 (h)	0/5/10 (c)(ll)	5
Finland	5/10/15 (h)	10 (i)	10
France	5/10/15 (h)	5/10 (i)(j)	10
Georgia	0/5 (oo)	0/5 (q)(mm)	0
Germany	5/10 (vv)	0/5 (rr)	0
Greece	25 (k)	10	10
Hungary	5/15 (g)	0	0
India	10	10	10
Ireland	10	5/10 (j)	10
Italy	10/15 (l)	10	10
Jamaica	15/22.5 (m)	15	10
Japan	5/15 (n)	10	10
Korea (South)	5/10/15 (h)	7.5/10 (c)	2/5 (o)
Latvia	5/10/15 (h)	5/10 (c)	5
Lithuania	5/10/15 (h)	0/10 (q)(ll)	5/10 (u)
Luxembourg	5/10/15 (h)	5/10 (c)	5
Malta	0/15 (uu)	0/5 (q)(ss)	0
Mexico	5/10 (p)	10 (q)	10
Moldova	5/10 (kk)	0/5 (q)(mm)	5
Netherlands	5/10/15 (h)	10/15 (r)	5
North Macedonia (pp)	5/15 (ww)	10 (xx)	5 (yy)
Norway	25	25	10
Panama	5/15/20 (qq)	0/15 (rr)	15

	Dividends	Interest	Royalties (a)
	%	%	%
Philippines	10/15 (s)	10	10/15 (t)
Poland	5/10 (g)	5	5/10 (u)
Portugal	5/10/15 (h)	10 (q)	10
Romania	15	5/10 (v)	10
Russian Federation	10	10 (q)	10
Serbia (aaa)	5/15 (ww)	10 (q)	5/10 (bbb)
Singapore	5/10 (g)	7 (c)	5 (x)
Slovak Republic	5/10 (g)	2/5/10 (y)	5
Slovenia	5/10/15 (h)	0/5 (q)(mm)	5
South Africa	25	25	0
Spain	10	5 (z)	5/7 (aa)
Sweden	0 (w)	25	0
Switzerland	5/10/15 (h)	5/10 (c)	5
Taiwan	10	7/10 (c)	10
Thailand	10/15 (bb)	10/15 (cc)	5/15 (dd)
Turkey	10	10 (ee)	10
Ukraine	5/10/15 (h)	5/10 (c)	10
United Arab Emirates	0/5/15 (eee)	0/5/10 (fff)	12
United Kingdom (ddd)	5/15 (m)	0/5/10 (rr)	0
United States	12.5/15/25 (ff)	10/17.5 (gg)	10/15 (hh)
Uzbekistan	10	10	5/10 (ii)
Vietnam	10	10 (q)	5/7.5/15 (u)
Non-treaty jurisdictions (nn)	25/30	23 (tt)	23 (tt)

- (a) Different rates may apply to cultural royalties.
- (b) The 10% rate applies to dividends that are paid out of profits taxed at a reduced company tax rate. For other dividends, the withholding tax rate may not exceed one-half the non-treaty withholding tax rate; because the non-treaty withholding tax rate for dividends is currently 25%, the treaty withholding tax rate is 12.5%.
- (c) Interest on certain government loans is exempt. The rate of 5% (Australia, Belarus, Bulgaria, Canada, Croatia, Ethiopia, Latvia, Luxembourg, Switzerland and Ukraine), 7% (Taiwan) or 7.5% (Korea) applies to interest on loans from banks or financial institutions (Australia: interest paid to pension funds). The 10% rate (Brazil, 15%; Estonia, 5%; and Singapore, 7%) applies to other interest payments.
- (d) The withholding tax rate may not exceed one-half the non-treaty withholding tax rate; because the non-treaty withholding tax rate is currently 26.5%, the treaty withholding tax rate is 13.25%.
- (e) The 7% rate applies to interest paid to banks or financial institutions.
- (f) Under a protocol to the treaty, the 7% rate is the effective withholding rate for amounts paid for the use of industrial, commercial or scientific equipment.
- (g) The 5% rate applies if the recipient holds directly at least 10% of the capital of the payer (Hungary, Singapore and Slovak Republic) or at least 15% of the capital of the payer (Poland), or if the recipient is a company that holds at least 15% of the capital of the payer (Czech Republic).
- (h) The 5% rate applies if the dividends are paid out of profits that were subject to the regular company tax rate (currently, 26.5%) and if they are paid to a corporation holding at least 10% (Ethiopia, Finland, France, Korea, Latvia, Lithuania, Luxembourg, Slovenia and Switzerland) or 25% (Croatia, Netherlands, Portugal and Ukraine) of the payer's capital. The 10% rate applies to dividends paid to such a corporation (under the Ukraine treaty, a corporation holding at least 10%) out of profits that were taxed at a reduced rate of company tax. The 15% rate applies to other dividends.
- (i) Alternatively, an interest recipient may elect to pay regular tax (currently, the company tax rate is 26.5%) on the lending profit margin.
- (j) The 5% rate applies to interest on a bank loan as well as to interest in connection with sales on credit of merchandise between enterprises or sales of industrial, commercial or scientific equipment.
- (k) Dividends are subject to tax at the rate provided under domestic law, which is currently 25% in Israel.

-
- (l) The 10% rate applies if the recipient holds at least 25% of the capital of the payer.
 - (m) The lower rate (Australia and United Kingdom: 5%; Jamaica: 15%) applies if the recipient is a company that holds directly at least 10% of the voting power of the payer.
 - (n) The 5% rate applies to corporate recipients that beneficially own at least 25% of the voting shares of the payer during the six months before the end of the accounting period for which the distribution is made.
 - (o) The 2% rate applies to royalties for use of industrial, commercial or scientific equipment.
 - (p) The 5% rate applies if the recipient holds at least 10% of the payer and if the payer is not an Israeli resident company that paid the dividends out of profits that were taxed at a reduced tax rate. The 10% rate applies to other dividends.
 - (q) Interest on certain government loans is exempt.
 - (r) The 10% rate applies to a Dutch bank or financial institution.
 - (s) The 10% rate applies if the recipient holds at least 10% of the capital of the payer.
 - (t) The 15% rate applies unless a lesser rate may be imposed by the Philippines on royalties derived by a resident of a third country in similar circumstances. The Philippines-Germany treaty specifies a 10% withholding tax rate on industrial and commercial royalties. Consequently, a 10% rate might apply to these royalties under the Israel-Philippines treaty.
 - (u) The 5% rate applies to royalties for the use of industrial, commercial or scientific equipment. The 7.5% rate (Vietnam) applies to technical fees.
 - (v) The 5% rate applies to interest on bank loans as well as to interest in connection with sales on credit of merchandise between enterprises or sales of industrial, commercial or scientific equipment. Interest on certain government loans is exempt.
 - (w) Under a disputed interpretation of the treaty, a 15% rate may apply to dividends paid out of the profits of an approved enterprise or property.
 - (x) The tax rate on the royalties in the recipient's country is limited to 20%.
 - (y) The 2% rate applies to interest paid on certain government loans. The 5% rate applies to interest received by financial institutions that grant loans in the course of its usual business activities. The 10% rate applies to other interest payments.
 - (z) This rate applies to interest in connection with sales on credit of merchandise between enterprises and sales of industrial, commercial or scientific equipment, and to interest on loans granted by financial institutions.
 - (aa) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment (and road transport vehicles under the Belarus treaty), or for copyrights of literary, dramatic, musical or artistic works. The rate for other royalties is 10% (Belarus) or 7% (Spain).
 - (bb) The 10% rate applies if the recipient is an Israeli resident or if the recipient is a Thai resident holding at least 15% of the capital of the payer.
 - (cc) The 10% rate applies to interest paid to banks or financial institutions, including insurance companies.
 - (dd) The 5% rate applies to royalties paid for the use of literary, artistic or scientific works, excluding radio or television broadcasting works.
 - (ee) Interest on certain government loans is exempt (under the Azerbaijan treaty, interest paid to the State Oil Fund is also included). The 10% rate applies to all other interest payments.
 - (ff) The 12.5% rate applies to dividends paid by a company that does not have an approved enterprise or approved property in Israel to US corporations that own at least 10% of the voting shares of the payer, subject to certain conditions. The 15% rate applies to dividends paid out of the profits of an approved enterprise or property. The 25% rate applies to other dividends.
 - (gg) The 10% rate applies to interest on a loan from a bank, savings institution, insurance company or similar company. The 17.5% rate applies to other interest. Alternatively, an interest recipient may elect to pay regular tax (the company tax rate is currently 26.5%) on the lending profit margin.
 - (hh) The 10% rate applies to copyright and film royalties. The 15% rate applies to industrial and other royalties.
 - (ii) The 5% rate applies to royalties paid for the use of literary, artistic or scientific works, excluding cinematographic films. The 10% rate applies to other royalties.
 - (jj) The 15% rate applies to royalties for the use of, or the right to use, trademarks. The 10% rate applies to other royalties.
 - (kk) The 5% rate applies if the dividends are paid to a corporation holding at least 25% of the payer's capital. The 10% (Canada, 15%) rate applies to other dividends.

- (ll) The 0% rate applies to interest with respect to sales on credit of merchandise or industrial, commercial or scientific equipment. Under the Lithuania treaty, such credit must not exceed six months and related parties are excluded.
- (mm) The 0% rate applies to interest with respect to a loan, debt-claim or credit guaranteed or insured by an institution for insurance or financing of international trade transactions that is wholly owned by the other contracting state (Denmark, Georgia and Moldova) or acts on behalf of the other contracting state (Slovenia), and with respect to interest paid on traded corporate bonds (Denmark and Georgia). The 5% rate applies to other interest.
- (nn) See Sections A and B. A 25% withholding tax rate applies to dividends and other payments to recipients who hold under 10% of the payer entity.
- (oo) The 0% rate applies if the recipient is a company that holds directly at least 10% of the capital of the payer for a consecutive period of at least 12 months.
- (pp) The treaty with North Macedonia, which was signed on 9 December 2015, is effective from 1 January 2019.
- (qq) The 5% rate applies to dividends paid to pension schemes. The 20% rate applies to distributions from a real estate investment company if the beneficial owner holds less than 10% of the capital of the company. The 15% rate applies to other dividends.
- (rr) The 0% rate applies to interest on certain government loans, interest paid to pension schemes and interest on certain corporate bonds traded on a stock exchange. The 5% rate (United Kingdom) applies to interest on loans from banks. The higher rate (Germany, 5%; Panama, 15%; United Kingdom, 10%) applies to other interest.
- (ss) The 0% rate applies to interest derived from corporate bonds listed for trading.
- (tt) This is the regular company tax rate for profits and real capital gains effective from 1 January 2018.
- (uu) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership or a real estate investment company) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies to dividends in all other cases. Distributions made by a real estate investment company that is a resident of Israel to a resident of Malta may be taxed in Malta. Such distributions may also be taxed in Israel according to the laws of Israel. However, if the beneficial owner of these distributions is a resident of Malta holding directly less than 10% of the capital of the distributing company, the tax charged in Israel may not exceed a rate of 15% of the gross distribution.
- (vv) The 5% rate applies if the recipient holds at least 10% of the payer's capital. The 10% rate applies to other dividends.
- (ww) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership or a real estate investment company) that holds directly at least 25% of the capital of the company paying the dividends (under the Albania and Serbia treaties, it is required that the holding be for a consecutive period of at least 12 months). The 15% rate applies in all other cases. Under the Armenia treaty, the 0% rate applies if the recipient is the other state, the central bank or a pension fund that does not hold more than 25% of the capital or voting power of the payer.
- (xx) The maximum tax rate is 10% if the beneficial owner of the interest is a resident of the other contracting state. However, interest arising in a contracting state is exempt from tax in that state if one of the following circumstances exists:
- The interest is paid to the government of the other contracting state, a local authority or the central bank thereof.
 - The interest is paid by the government of that contracting state, a local authority or the central bank thereof.
- (yy) The maximum tax rate is 5% if the beneficial owner of the royalties is a resident of the other contracting state.
- (zz) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.
- (aaa) The treaty with Australia was signed on 27 March 2019. In Israel, it is effective from 1 January 2020. In Australia, it is effective from 1 January 2020 for withholding taxes, 1 April 2020 for fringe benefits taxes and 1 July 2020 for all other taxes. The treaty with Serbia, which was signed on 22 November 2018, is effective from 1 January 2020.
- (bbb) The 5% (Serbia: 10%) rate applies to royalties paid for the use of patents; trademarks (Armenia); designs or models; plans; secret formulas or processes; industrial, commercial or scientific equipment; or for information

- (know-how) concerning industrial, commercial or scientific experience. The 10% (Serbia: 5%) rate applies to other royalties (under the Armenia and Serbia treaties, it applies to royalties for literary, artistic or scientific works, including cinematographic films).
- (ccc) The 0% rate applies to royalties paid for the use of copyrights of literary, dramatic, musical or artistic works; computer software or patents; or for information concerning industrial, commercial or scientific experience. The 10% rate applies to other royalties.
- (ddd) In Israel, the protocol to the treaty with the United Kingdom, which was signed on 17 January 2019, is effective from 1 January 2020. In the United Kingdom, it is effective from 1 January 2020 for withholding taxes, 1 April 2020 for corporation taxes and 6 April 2020 for income and capital gains taxes.
- (eee) The 0% rate applies if the recipient is the other state or a pension fund that does not hold more than 5% of the capital of the payer. The 5% rate applies if the beneficial owner of the dividends is either of the following:
- The government of the other contracting state that holds at least 5% of the capital of the company paying the dividends
 - A company that holds directly at least 10% of the capital of the company paying the dividends.
- The 15% rate applies in all other cases.
- (fff) The 0% rate applies to interest on certain government loans and interest paid to pension schemes. The 5% rate applies if the government of the other contracting state or the pension plan of the other contracting state holds 50% or more of the capital of the company paying the interest. The 10% rate applies to all other cases.
- (ggg) The 0% rate applies if the interest is paid to the government of the other contracting state, a political subdivision, a local authority or the central bank thereof or if the interest is paid by the government of that contracting state, a political subdivision, a local authority or the central bank thereof.

A. At a glance

Corporate Income Tax Rate (%)	24 (a)
Capital Gains Tax Rate (%)	1.2/24 (b)
Branch Tax Rate (%)	24 (a)
Withholding Tax (%)	
Dividends	0/1.2/26 (c)(d)
Interest	0/12.5/26 (e)(f)
Royalties from Patents, Know-how, etc.	0/22.5/30 (f)(g)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (h)

- (a) A 3.5% surcharge applies to banks and other financial entities. A local tax on productive activities (*imposta regionale sulle attività produttive*, or IRAP) is imposed on the net value of production at a standard rate of 3.9%. For further details regarding IRAP, see Section B.
- (b) For details concerning capital gains taxation, see Section B.
- (c) Withholding tax is not imposed on dividends paid between resident companies. The 26% rate applies to dividends paid to resident individuals with substantial and non-substantial participations (for information on substantial and non-substantial participations, see the discussion of capital gains taxation in Section B). The 26% rate applies to dividends paid to nonresidents. An exception applies to selected European Union (EU) or European Economic Area (EEA) investment funds which benefit from a dividend withholding tax exemption as set forth by the 2021 Budget Law. Nonresidents may be able to obtain a refund of the withholding tax equal to the amount of foreign tax paid on the dividends, up to a limit of 11/26 of the withholding tax paid. Tax treaties may provide for a lower tax rate. A 1.2% rate applies under certain circumstances (see Section B). If either the treaty or the 1.2% rate applies, the 11/26 tax refund cannot be claimed.

- (d) Under the EU Parent-Subsidiary Directive, dividends distributed by an Italian subsidiary to an EU parent company are exempt from withholding tax, if among other conditions, the recipient holds 10% or more of the shares of the subsidiary for at least 12 months. See Section B. Similar treatment (however, a 24-month minimum shareholding period is required) may apply to dividend payments to Swiss parents under the EU-Switzerland treaty.
- (e) The 0% rate applies under certain circumstances to interest derived by non-residents on the approved list (see Section B) from treasury bonds, bonds issued by banks and “listed” companies, “listed” bonds issued by “non-listed” companies (often referred to as “mini-bonds”), nonbank current accounts and certain cash pooling arrangements, and in other specific cases (for example, mid- to long-term loans with Italian or foreign banks or qualifying financial institutions). The term “listed” refers to a listing on the Italian exchange or on an official exchange or a multilateral system for exchange of an EU or EEA country. The 26% rate applies to interest derived by residents and non-residents from corporate bonds and similar instruments and from loans in the case of resident individuals and nonresident recipients, in general. The 26% rate also applies as a final tax to interest paid to residents on bank accounts and deposit certificates. The rate applicable to interest paid on treasury bonds issued by the Italian government and by approved-list countries is reduced to 12.5%. For resident individuals carrying on business activities in Italy and resident companies, interest withholding taxes are advance payments of tax. In all other cases, the withholding taxes are final taxes. Tax treaties may also provide for lower rates. For further details, see Section B.
- (f) No withholding tax is imposed on interest and royalties paid between associated companies of different EU member states if certain conditions are met. For details, see Section B. Similar treatment may apply to interest payments to Swiss companies under the EU-Switzerland treaty.
- (g) The withholding tax rate of 30% applies to royalties paid to nonresidents. However, in certain circumstances, the tax applies on 75% of the gross amount, resulting in an effective tax rate of 22.5%. These rates may be reduced under tax treaties.
- (h) Loss carryforwards are allowed for corporate income tax purposes only (not for IRAP). Losses may be carried forward indefinitely. Losses can generally be used against a maximum amount of 80% of taxable income, with an exception made for those incurred in the first three years of an activity, which can be used against 100% of taxable income. Anti-abuse rules may limit loss carryforwards.

B. Taxes on corporate income and capital gains

Corporate income tax. Resident companies are subject to corporate income tax (*imposta sul reddito delle società*, or IRES) on their worldwide income (however, effective from the 2016 fiscal year, an elective branch exemption regime is available; see Section E). A resident company is a company that has any of the following located in Italy for the majority of the tax year:

- Its registered office
- Its administrative office (similar to a “place of effective management” concept)
- Its principal activity

Unless they are able to prove the contrary, foreign entities controlling an Italian company are deemed to be resident for tax purposes in Italy (so-called “Esterovestizione”) if either of the following conditions is satisfied:

- The foreign entity is directly or indirectly controlled by Italian resident entities or individuals.
- The majority of members of the board of directors managing the foreign entity are resident in Italy.

Nonresident companies are subject to IRES on their Italian-source income only.

Rates of corporate income tax. The 2022 corporate tax rate is 24%. A 3.5% surcharge applies to banks and other financial entities for which the aggregate corporate tax rate is 27.5%.

Banks, insurance and financial entities are not subject to the general 30% Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) limitation discussed in *Limitations on interest deductions* in Section C. In particular, banks and financial intermediaries (as defined by Article 162-bis of the Italian Consolidated Law on Income Tax (Testo Unico delle Imposte sui Redditi, or TUIR) are allowed to deduct 100% of their net interest expenses, while insurance companies, parent companies of insurance groups, qualifying asset management companies and qualifying brokerage companies (Società di Intermediazione Mobiliare, or SIMs) are allowed to deduct 96% of their net interest expenses.

Local tax. Resident and nonresident companies are subject to a regional tax on productive activities (*imposta regionale sulle attività produttive*, or IRAP) on their Italian-source income. For manufacturing companies, IRAP is imposed at a standard rate of 3.9% on the “net value of production” (see below). However, different rates apply to the following:

- Corporations and entities granted concession rights other than those running highways and tunnels: 4.2%
- Banks, other financial entities and holdings (that is, companies whose main or exclusive activity is holding shares in other companies): 4.65%
- Insurance companies: 5.9%
- Public administration entities performing business activities: 8.5%

In addition, each of the 20 Italian regions may increase or decrease the rate of IRAP by a maximum of 0.9176 percentage point, and companies generating income in more than one region are required to allocate their tax base for IRAP purposes among the various regions in the IRAP tax return.

The IRAP tax base is the “net value of production,” which is calculated by subtracting the cost of production from the value of production (that is, in general, revenue less operating costs). The IRAP calculation must take into account the profit-and-loss scheme contained in provisions introduced by Legislative Decree No. 139/2015, as well as the corresponding tax provisions expressly applicable to IRAP, which were introduced by Law Decree No. 244/2016. Certain deductions are not allowed for IRAP purposes, such as the following:

- Bad debt losses.
- Labor costs (excluding certain compulsory social contributions and a fixed amount of the wages, in application of the so-called Cuneo Fiscale). However, under the 2015 Budget Law, labor costs incurred for employees hired on a permanent basis are fully deductible for IRAP purposes, beginning with the fiscal year including 31 December 2015. However, insurance companies, qualifying holding companies and qualifying brokerage companies (SIMs) can deduct 96% of interest expenses and are taxed on 100% of interest income.

In addition, special rules for the calculation of the tax base for IRAP purposes apply to banking institutions, insurance companies, public entities and noncommercial entities.

Capital gains

Resident companies and nonresident companies with a permanent establishment in Italy. In general, capital gains derived by resident companies or nonresident companies with a permanent establishment (PE) in Italy are subject to IRES and IRAP (gains derived from sales of participations and extraordinary capital gains derived from transfers of going concerns are excluded from the tax base for IRAP purposes). Capital gains on investments that have been recorded in the last three financial statements as fixed assets may be electively taxed over a maximum period of five years for IRES purposes.

Italian corporate taxpayers (that is, companies and branches) may benefit from a 95% participation exemption regime (that is, only 5% is taxable) for capital gains derived from disposals of Italian or foreign shareholdings that satisfy all of the following conditions:

- The shareholding has been classified in the first financial statements closed during the holding period as a long-term financial investment.
- The Italian parent company holds the shareholding for an uninterrupted period of at least 12 months before the disposal.
- The subsidiary has been carrying out uninterruptedly through the last three financial years prior to the year of the disposal an active business activity (real estate companies are assumed not to be carrying on a business activity; therefore, they can satisfy this requirement only under certain limited circumstances).
- The subsidiary must have not been resident in a low-tax jurisdiction uninterruptedly as of the beginning of the holding period or, under certain circumstances, through the last five years (unless the taxpayer can prove, also by way of an advance tax ruling, that the subsidiary was actually subject to a congruous level of taxation). For additional information regarding gains from low-tax participations, see *Dividends*).

In general, capital losses on participations are deductible. An exception exists for capital losses on participations that would benefit from the 95% participation exemption. These losses are 100% nondeductible. However, losses from sales of participations not qualifying for the participation exemption are nondeductible only up to the amount equal to the exempt portion of the dividends received on such participations during the 36 months preceding the sale.

Nonresident companies without a PE in Italy. Most tax treaties prevent Italy from levying tax on nonresidents deriving capital gains from the sale of Italian participations (exceptions are made for those cases in which treaties allow Italy to levy tax if the value of the company is mostly represented by real estate property).

If no treaty protection is available, effective from 2019, capital gains derived by a nonresident entity from the transfer of any substantial participations in Italian companies and partnerships are subject to a 26% substitute tax. A different treatment applied until 2018 under which such capital gains were subject to 24% IRES on 58.14% of the amount, resulting in an effective 13.95% taxation.

A “substantial participation” in a company listed on a stock exchange requires more than 2% of the voting rights at ordinary shareholders’ meetings or 5% of the company’s capital. For an unlisted company, these percentages are increased to 20% and 25%, respectively.

Capital gains on “non-substantial participations” are also subject to 26% source taxation. However, certain exemptions to the 26% rate may apply under domestic law, such as for the following:

- Nonresidents (including persons from a low-tax jurisdiction) selling listed shares
- Nonresident shareholders resident in approved-list jurisdictions (that is, with which Italy has a full exchange-of-information clause in place) under specified circumstances

The 2021 Budget Law has also introduced a capital exemption regime for selected EU/EEA investment funds.

Administration. Income tax returns for companies with a calendar year must be filed by 30 November of the following year. Income tax returns for companies with a non-calendar year must be filed by the end of the 11th month of the following year. Companies must make advance payments of their corporate and local tax liability based on a forecast method or a specified percentage of the tax paid for the preceding year.

IRES and IRAP must be paid in accordance with the following schedule:

- The first advance payment due for the current fiscal year, amounting to 40% of the tax paid for the previous year, must be paid by the same date as the balance due for the previous fiscal year (last day of the sixth month following the end of the previous fiscal year).
- The second advance payment of 60% must be paid by the last day of the 11th month following the end of the fiscal year.
- The balance payment must be paid by the last day of the sixth month following the end of the fiscal year.

Statute of limitations. The 2016 Budget Law introduced a change to the statute of limitations rules. Under the new measures, a company may be subject to a tax assessment up to the end of the fifth year following the year of filing of the relevant tax return (the previous term was the fourth year following the year of the filing of the tax return). In addition, the statute of limitations is now extended to seven years for a failure to file any tax return (the previous term was five years). The 2016 Budget Law repealed the doubling of the statute of limitations in the case of criminal tax investigations. The new rules apply to tax assessments issued with reference to the 2016 fiscal year and subsequent years.

Law Decree No. 193/2016 introduced new provisions with respect to the correction of tax returns. To correct mistakes or omissions, including those related to increased or reduced taxable income, tax debts or tax credits, taxpayers may now submit an amending return to the Revenue Agency before the statute of limitations period expires (that is, before 31 December of the fifth year following the year in which the relevant tax return is filed). Any

arising tax credits can then be offset against other amounts due, subject to certain conditions.

Tax rulings. Several tax ruling procedures are available in Italy.

The following are the main categories of rulings:

- Ordinary ruling (*interpello ordinario*), concerning the application of statutory provisions with objectively unclear interpretations
- Probative ruling (*interpello probatorio*), concerning the valuation and the fulfillment of the requirements necessary to qualify for specific tax regimes
- Anti-abuse ruling (*interpello antiabuso*), concerning the application of the abuse of law legislation to actual cases
- Exempting ruling (*interpello disapplicativo*), concerning the relief from application of specific anti-avoidance rules (for example, limitations to deductions or tax credits)

Advance Tax Agreements for Companies with International Operations. The scope of the Advance Tax Agreement for Companies with International Operations (commonly referred to also as the “International Ruling”) includes the following:

- Transfer-pricing issues (through the conclusion of advance pricing agreements [APAs])
- Cross-border flow matters
- Attribution of profits to domestic and foreign PEs
- Existence of PEs
- Agreements on the tax basis of assets in the case of inbound and outbound migrations

In principle, the International Ruling is valid for five years, which consists of the year in which it is signed and the following four years, to the extent that the underlying factual and legal circumstances remain unchanged.

During the period of validity of the agreement, the tax authorities may exercise their power of scrutiny only with respect to matters that are not covered in the agreement.

Rollback effects are possible. Also, under the 2021 Budget Law, an APA may cover all the previous fiscal years for which the statute of limitations has not yet expired. However, the law requires that the circumstances under which the APA was reached are likewise applicable to the previous fiscal years and that no investigations were started or tax assessments were noticed for the same fiscal years with respect to the issues subject to the APA. In addition, in the context of a bilateral or multilateral APA, this “extended rollback” is allowed, provided that the foreign competent authorities agree to extend the APA to the previous fiscal years.

A fixed fee amount, which may vary based on the turnover of the group, is required for filing a bilateral and multilateral APA ruling request before the competent Italian tax authorities.

Advance tax ruling for new investments. Another type of ruling is available for investments of at least EUR20 million that have a significant and durable impact on employment with respect to the particular business activity.

The ruling provides the taxpayer an advance confirmation of the tax treatment of the entire investment plan (including the various envisaged transactions to achieve the plan) as well as, if needed, assurance on whether a going concern is formed. In addition, the ruling may also confirm the absence of any abusive behaviors, the existence of prerequisites to exclude the application of anti-avoidance provisions or recognition of access to specific tax regimes.

Taxpayers conforming to the ruling response may also take advantage of the Cooperative Compliance Program (see *Cooperative Compliance Program* in Section C), regardless of their turnover threshold.

Dividends. Dividends distributed to Italian entities and Italian PEs of foreign companies are 95% excluded from corporate taxation regardless of the source (domestic or foreign) of such dividends and are taxable on a cash basis.

Dividends sourced in low-tax jurisdictions are taxed according to the following rules:

- Dividends derived from direct participations in low-tax subsidiaries are fully taxed.
- Dividends derived indirectly through controlled foreign approved-list subsidiaries with low-tax participations are fully taxed.
- Dividends sourced in a low-tax country may obtain 95% ordinary exemption treatment if the taxpayer can document that the participation in the foreign entity did not lead to an allocation of income to countries or territories with a privileged tax regime.
- Low-tax dividends are 50% excluded from corporate taxation if the taxpayer can document that the foreign entity carried out as its main activity an actual industrial or commercial activity in the relevant market or territory. In this case, the Italian company may also benefit from a 50% foreign tax credit on the foreign taxes paid by the subsidiary.
- Dividends accrued during any fiscal year before 2015 and paid by a low-tax entity in or after 2015 may obtain 95% exclusion treatment provided that the entity was considered approved-listed under the pre-2015 regime.

The definition of low-tax jurisdiction was amended by Legislative Decree No. 142/2018, which implements the EU Anti-Tax Avoidance Directive (ATAD) according to which foreign subsidiaries are considered low-tax if they are subject to either of the following:

- An effective level of income taxation lower than 50% of the Italian corporate income tax (IRES) rate had the company been resident in Italy
- A nominal tax rate lower than 50% (also considering tax rates resulting from special local tax regimes) of the Italian corporate income tax (IRES) rate in the event that the foreign subsidiary is not controlled by the Italian parent (for example, less than 50% participation)

Dividends distributed by Italian companies to nonresident companies without a PE in Italy are subject to a 26% withholding tax (double tax treaties may provide for lower rates). Nonresidents may obtain a refund of dividend withholding tax equal to the

amount of foreign tax paid on the dividends, but the maximum refund equals 11/26 of the withholding tax paid. Dividends paid by Italian entities (out of profits accrued in the fiscal year following the one in progress on 31 December 2007 and in subsequent fiscal years) to entities established in an EU member state or in an EEA country included in the approved list are subject to a reduced withholding tax rate of 1.2%. If a treaty withholding tax rate or the domestic 1.2% rate applies, the 11/26 tax refund cannot be claimed.

As a result of the implementation of the EU Parent-Subsidiary Directive (Directive 90/435/EEC), companies from EU member states that receive dividends from Italian companies may be exempted from the dividend withholding tax or obtain a refund of the tax paid if they hold at least 10% of the shares of the payer for at least one year. A similar provision is available for Swiss recipients under certain circumstances on the basis of Article 15 of the EU-Switzerland treaty of 2004.

For nonresident companies with a PE in Italy, dividends may be attributed to the Italian PE for tax purposes. In this case, the dividend is taxed at the level of the PE, and no withholding tax applies.

Effective from the 2021 fiscal year, Italian-source dividends paid to selected EU/EEA investment funds benefit from a dividend withholding tax exemption.

Effective from the 2021 fiscal year, 50% of dividends paid to Italian non-commercial entities or Italian PEs of foreign non-commercial entities are excluded from taxation (previously fully subject to tax).

Withholding taxes on interest and royalties. Under Italian domestic law, a 26% withholding tax is imposed on loan interest paid to nonresidents. Lower rates may apply under double tax treaties.

A 30% withholding tax applies to royalties (including rent for industrial equipment) paid to nonresidents. In certain circumstances, the tax applies to 75% of the gross amount, resulting in an effective tax rate of 22.5%. Lower rates may apply under double tax treaties.

As a result of the implementation of the EU Interest and Royalty Directive (Directive 2003/49/EC), interest payments and qualifying royalties paid between “associated companies” of different EU member states are exempt from withholding tax. A company is an “associated company” of a second company if any of the following circumstances exist:

- The first company has a direct minimum holding of 25% of the voting rights of the second company.
- The second company has a direct minimum holding of 25% of the voting rights of the first company.
- An EU company has a direct minimum holding of 25% of the voting rights of both the first company and the second company.

Under the EU directive, the shareholding must be held for an uninterrupted period of at least 12 months. If the 12-month requirement is not satisfied as of the date of payment of the interest or royalties, the withholding agent must withhold taxes on

interest or royalties. However, if the requirement is subsequently satisfied, the recipient of the payment may request a refund from the tax authorities.

To qualify for the withholding tax exemption, the following additional conditions must be satisfied:

- The recipient must be a company from another EU member state that is established as one of the legal forms listed in Annex A of the law.
- The company must be subject to corporate tax without being exempt or subject to a tax that is identical or similar.
- The recipient must be the beneficial owner of the payment.

An interest and royalty regime similar to the abovementioned Directive 2003/49/EC applies under certain circumstances to recipients residing in Switzerland on the basis of Article 15 of the EC-Switzerland tax treaty of 2004.

Domestic withholding taxes on interest and royalties may be reduced or eliminated under tax treaties.

An exemption also applies to interest derived by nonresidents on the approved list under certain circumstances (see footnote [e] in Section A).

Tax on financial transactions. A domestic tax on financial transactions (so-called “Tobin Tax,” which is also known as the “Italian Financial Transaction Tax”) is imposed on certain financial transactions regardless of where the transactions are executed and the nationalities of the parties. The tax is imposed on the following types of transfers:

- Transfers of shares and participating financial instruments issued by Italian resident entities (including the conversions of bonds into shares but excluding the conversion of bonds into newly issued shares in the case of the exercise of options of existing shareholders)
- Transfers of other instruments representing the above shares and participating financial instruments
- Derivatives transactions that have as a main underlying asset the above shares or participating financial instruments
- Transactions in “derivative financial instruments” in shares and participating financial instruments or in such instruments whose value depends mostly on the value of one or more of the above financial instruments
- Transactions in any other securities that allow the purchase or sale of the above shares and participating financial instruments or transactions that allow for cash regulations based on the shares

The tax on financial transactions also applies to high-frequency trading transactions executed on Italian financial markets if conditions listed in the Ministerial Decree issued on 21 February 2013 are met. Specific exemptions and exclusions are also provided by this decree (for example, the tax does not apply to new issues of shares or on intercompany transactions).

The tax is levied at the following rates, which depend on the type of transaction and relevant market:

- Transactions in shares and participating financial instruments are subject to a 0.1% tax if executed on a regulated market or a

multilateral trading facility established in an EU member state or in an EEA member state allowing an adequate exchange of information with Italy. The rate is 0.2% in all other cases.

- Transactions in derivatives and other financial instruments relating to shares and participating financial instruments are subject to a fixed tax ranging from EUR0.01875 to EUR200, depending on the type of instrument and the value of the agreements. If derivative contracts are executed on a regulated market or multilateral trade facility, the tax is reduced to 20% of these fixed amounts.
- High-frequency trading transactions are subject to a 0.02% tax on the counter-value of orders automatically generated (including revocations or changes to original orders). The tax is applied in addition to the tax on financial transactions due on transfers of shares and participating financial instruments as well as on transactions in the relevant derivative instruments.

The tax on financial transactions on share transactions is due from the transferee only, while the tax applicable to transactions in derivatives is due from each party to the transaction.

The tax payment must be made in accordance with the following rules:

- By the 16th day of the month following the month in which the transfer of the ownership occurred (if effected through the Centralized Management Company [Società di Gestione Accentrata], by the 16th day of the second month following the transaction date) for the following:
 - Shares and participating financial instruments issued by Italian resident entities
 - Instruments representing such shares and participating financial instruments
- By the 16th day of the month following the month in which the contract is concluded (if effected through the Centralized Management Company, by the 16th day of the second month following the transactions date) for the following:
 - Derivatives that have as a main underlying asset the above shares or participating financial instruments
 - “Derivative financial instruments” in shares and participating financial instruments
 - Instruments whose value depends mostly on the value of one or more of the above financial instruments
 - Other securities that allow the purchase and sale of the above shares and participating financial instruments or that allow for cash regulations (settlements) based on such financial instruments
- By the 16th day of the month following the month in which the annulment or amending order is sent for the high-frequency trading transactions executed on Italian financial markets

Digital Services Tax. The 2020 Budget Law enacted a Digital Services Tax (DST) immediately effective as of 1 January 2020 by building on the DST provision that was contained in the 2019 Budget Law but that never entered into force as result of the absence of a required implementing decree.

The DST is an indirect tax (that is, not eligible for double tax treaty protection) and is applied at a rate of 3% on revenues

deriving from the supply to third parties of the following “digital servicers:”

- Placement on a digital interface of an advertisement targeted at users of that interface
- Making available to users a multi-sided digital interface that allows the users to find other users and to interact with them and that may also facilitate the provision of the underlying supply of goods or services directly between users
- Transmission of data collected about users and generated from users’ activities on digital interfaces

The DST is imposed on resident and nonresident enterprises that during a fiscal year (to be assumed as the calendar year), individually or at group level, realized both of the following:

- An amount of revenue not lower than EUR750 million
- An amount of revenue derived from digital services realized in Italy not lower than EUR5,500,000

Revenues from the above digital services are deemed to be derived within Italy if the user (that is, the relevant device) is located in Italy at a qualifying point in time and on the basis of specific nexus criteria depending on the type of service.

Exit tax. The following transactions qualify as taxable events in Italy:

- The transfer of tax residence abroad
- The transfer of assets on cross-border mergers and demergers
- The transfer of assets from a resident company to a foreign exempt PE (a foreign PE for which the Italian head office had opted for the branch exemption regime)
- The transfer of assets from an Italian PE to the foreign headquarters or to other PEs

As a result, any unrealized capital gains must be computed on the basis of the fair market value principle and taxed immediately. Any of such transfers is not considered a taxable event only to the extent that the assets related to the Italian business remain attributed to an Italian PE.

As an alternative to an immediate levy, Italian companies shifting their tax residence (or undergoing any of the abovementioned cross-border reorganizations or transfers of assets) to other EU or EEA countries with which Italy has a full tax information exchange agreement in place may elect to spread the payment of the exit tax through five annual installments.

Inbound migration. The tax migration of companies from an approved-list jurisdiction to Italy entails the tax step-up of the company’s assets and liabilities at fair market value.

For entities migrating to Italy from low-tax jurisdictions, the tax basis of the assets must be agreed to in advance through an advance ruling (see *Administration*) or otherwise it must be considered equal to the lower of the acquisition cost, the book value or the fair market value, with the tax basis of the liabilities amounting to the higher of these items.

Patent Box Regime. The 2015 Budget Law introduced a favorable tax regime for income generated through the use of qualified intangible assets, such as industrial patents, models and designs

capable of being legally protected, know-how and other intellectual properties (IPs).

Taxpayers performing activities related to such intangibles are eligible, under a specific election, for a downward adjustment of the IRES and IRAP bases equal to 50% (for 2017 and subsequent years) of the income derived from the use of the qualifying IPs. The exemption applies to income earned both from the licensing of the IPs to related or unrelated parties and from the direct exploitation of the asset.

Law Decree No. 146 of 21 October 2021 (converted into law on 17 December 2021) repealed the above-mentioned old patent box regime by shifting from a profit-based incentive (50% exemption) to a cost-based incentive by introducing a super deduction for research and development (R&D) expenses. Under the new incentive the following rules apply:

- R&D expenses (other than those incurred with related parties) sustained in relation to qualifying IP may be recognized for tax purposes for an amount equal to 210% of the relevant expenditure for both IRES and IRAP.
- Qualifying R&D costs relate only to copyrighted software, patents, designs and models. (R&D expenses for trademarks and know-how are excluded.)
- If R&D expenses are incurred prior to the creation of a qualifying IP, the extra 110% deduction applies from the fiscal year in which the relevant IP is granted legal protection. The extra deduction includes R&D expenses incurred up to the eighth fiscal year before IP protection is granted.
- The election for the new incentive is irrevocable and lasts for five fiscal years with the possibility of subsequent renewals.
- Penalty protection is available if backup documentation is prepared by the taxpayers.

The 2022 Budget Law clarified that the new incentive is available starting the fiscal year in course as of 31 December 2021 (that is the 2021 fiscal year for calendar-year companies). Accordingly, 2020 is the last fiscal year with reference to which the old patent box regime election can be made (possibly with a five-year validity; that is, up to 2024 at the latest). However, taxpayers who are still waiting for the conclusion of an old patent box ruling (including renewals of prior agreements) may renounce such regime and elect the new incentive even for fiscal years before the one in course as of 31 December 2021. Such alternative is not available for fiscal years for which an old patent box ruling (including renewals of prior agreements) is already concluded, or with reference to which taxpayers have elected the self-computation method.

Foreign tax relief. A foreign tax credit may be claimed for foreign-source income. The amount of the foreign tax credit cannot exceed that part of the corporate income tax, computed at the standard rate, that is attributable to the foreign-source income. Accordingly, the foreign tax credit may be claimed up to the amount that results from prorating the total tax due by the proportion of foreign-source income over total income.

If income is received from more than one foreign country, the above limitation on the foreign tax credit is applied for each

country (per-country limitation). Excess foreign tax credits may be carried forward or back for eight years.

For corporate groups that elect the worldwide tax consolidation (see Section C), an Italian parent company may consolidate profits and losses of its foreign subsidiaries joining the tax group and compute a single group tax liability. Such group tax liability may be offset by a foreign tax credit granted to the resident parent company with respect to taxes paid abroad by foreign subsidiaries that are members of the tax group.

C. Determination of business income

General. To determine taxable income, profits disclosed in the financial statements are adjusted for exempt profits, nondeductible expenses, special deductions and losses carried forward. Exempt profits include interest on government bonds issued on or before 30 September 1986 and income subject to Italian withholding tax at source as a final tax.

The following general principles govern the deduction of expenses:

- Expenses are deductible if and to the extent to which they relate to activities or assets that produce revenue or other receipts that are included in income.
- Expenses are deductible in the fiscal year to which they relate (accrual basis rule). Exceptions are provided for specific items, such as compensation due to directors, which is deductible in the fiscal year in which it is paid.

Deductibility of municipal property tax. The municipal property tax (*Imposta Municipale Unica*, or IMU) is 60% deductible from corporate income tax for the 2020 and 2021 fiscal years and 100% deductible for the 2022 fiscal year and future years. For further details regarding this tax, see Section D.

Inventories. Inventory is normally valued at the lower of cost or market value for both fiscal and accounting purposes. For determination of “cost,” companies may select one of the various methods of inventory valuation specifically provided in the law, such as first-in, first-out (FIFO); last-in, first-out (LIFO); or average cost.

Depreciation and amortization allowances. Depreciation at rates not exceeding those prescribed by the Ministry of Finance is calculated on the purchase price or cost of manufacturing. Incidental costs, such as customs duties and transport and installation expenses, are included in the depreciable base. Depreciation is computed on the straight-line method. Rates for plant and machinery vary between 3% and 15%.

In general, buildings may be depreciated using a 3% annual rate. Land may not be depreciated. If a building has not been purchased separately from the underlying land, for tax purposes, the gross value must be divided between the non-depreciable land component and the depreciable building component. The land component may not be less than 20% of the gross value (increased to 30% for industrial buildings). As a result, the effective depreciation rate for buildings is 2.4% (2.1% for industrial buildings).

Purchased goodwill may be amortized over a period of 18 years. Know-how, copyrights and patents may be amortized in

accordance with financial statements, but over at least two fiscal years. The amortization period for trademarks is 18 years.

Research expenses and advertising expenses may be either entirely deducted in the year incurred or written off in equal installments in that year and in the four subsequent years, at the company's option.

Amortization allowances of other rights may be claimed with reference to the utilization period provided by the agreement.

A tax credit for the purchase of new tangible assets is available for purchases made from 16 November 2020 to 31 December 2021, with an extension to 30 June 2022, provided that purchase orders are accepted by the seller by 31 December 2021 and at least 20% of their price is paid by the same date.

The following are the amounts of the tax credit:

- In general, for new assets, the tax credit amounts to 10% (15% for investments related to smart working) of the purchase cost with a maximum annual investment amount of EUR2 million (for tangible assets) or EUR1 million (for intangible assets).
- For new high-tech assets qualifying under the Industry 4.0 Plan, the tax credit amounts to the following:
 - 50% of the purchase cost for investments up to EUR2,500,000
 - 30% of the purchase cost for investments from EUR2,500,000 to EUR10 million
 - 10% of the purchase cost for investments from EUR10 million to EUR20 million.

No additional tax credit is provided for investments over EUR20 million.

- For new software-related investments (that is, software, information technology systems and platforms) related to the Industry 4.0 Plan, the tax credit amounts to 20% of the purchase cost with a maximum annual investment amount of EUR1 million (considering also the investments made in the 2022-2023 timeframe).

The 2021 Budget Law includes an extension of the tax credit for assets that will be purchased in the period from 1 January 2022 through 31 December 2022 (with a further extension to 30 June 2023, provided that purchase orders are accepted by the seller by 31 December 2022 and at least 20% of their price is paid by the same date). In that case, the following is the amounts of the tax credit:

- In general, for new assets, the tax credit amounts to 6% of the purchase cost with a maximum annual investment amount of EUR2 million (tangible assets) or EUR1 million (for intangible assets)
- For new high-tech assets qualifying under the Industry 4.0 Plan, the tax credit amounts to the following:
 - 40% of the purchase cost for investments up to EUR2.5 million
 - 20% of the purchase cost for investments from EUR2.5 million to EUR10 million
 - 10% of the purchase cost for investments from EUR10 million to EUR20 million

No additional tax credit is provided for investments over EUR20 million.

- For new software-related investments (that is, software, information technology systems and platforms) related to the Industry 4.0 Plan, the tax credit amounts to 20% of the purchase cost with a maximum annual investment amount of EUR1 million (considering also the investments made in the 2021-2022 timeframe).

The tax credit applies in three equal annual installments as of the year in which the assets come into operation (and have the requirements provided by the Industry 4.0 Plan).

Furthermore, a third-party sworn appraisal is required in the case of any Industry 4.0 Plan purchase (high-tech and software related) with a value higher than EUR300,000.

The 2022 Budget Law extended the previously available tax credit for new high-tech investments to assets purchased during the period from 1 January 2023 to 31 December 2025, or even until 30 June 2026, provided that purchase orders are accepted by the seller by 31 December 2025 and at least 20% of their price is paid by the same date.

For investments in high-tech tangible assets purchased from 2023 to 2025, the tax credit amounts to the following:

- 20% of the purchase cost for investment up to EUR2.5 million
- 10% of the purchase cost for investment from EUR2.5 million up to EUR10 million
- 5% of the purchase cost for investment from EUR10 million up to EUR20 million

For investments in high-tech intangible assets, the tax credit amounts to the following:

- 20% of the purchase cost for investment made in 2023 with a maximum annual investment amount of EUR1 million
- 15% of the purchase cost for investment made in 2024 with a maximum annual investment amount of EUR1 million
- 10% of the purchase cost for investment made in 2025 with a maximum annual investment amount of EUR1 million

Step-up of Italian participations. The Italian government has revamped a one-off opportunity for resident individuals and non-resident entities to elect for a tax step-up of participations in unlisted Italian companies held as of 1 January 2022 through the payment of a substitute tax.

The base of the substitute tax equals the value of the participation as of 1 January 2022 and needs to be certified by a sworn appraisal prepared no later than 15 June 2022. The rate of the substitute tax is 14%.

The substitute tax may either be paid in full by 15 June 2022 or through three annual installments beginning 15 June 2022 (with the second and third installments due by 15 June 2023 and 15 June 2024 and subject to an annual 3% interest surcharge).

Tax credit for R&D. A tax credit is available for eligible R&D expenses for the 2022 fiscal year.

The eligible R&D activities are classified into three categories. The following are the amounts of the tax credit for each category:

- For R&D activities, the tax credit amounts to 20% of the eligible expenses with a maximum annual amount granted to each company of EUR4 million.

- For technological innovation, the tax credit amounts to 10% of the eligible expenses (increased to 15% in the case of ecological transition or if the relevant activity qualifies as a digital innovation under the Industry 4.0 Plan) with a maximum annual amount granted to each company of EUR2 million.
- For design activities carried out by companies in the textile and fashion, footwear, eyewear, goldsmith, furniture and ceramics sectors, and for the design and manufacture of new products and samples, the tax credit amounts to 10% of the eligible expenses with a maximum annual amount granted to each company of EUR2 million.

Beginning with the 2021 fiscal year, a third-party appraisal is required.

The old R&D tax credit (based on the “incremental approach”) is still available with respect to activities and expenses incurred in the 2016, 2017, 2018 and 2019 fiscal years, with slightly different rules in each fiscal year.

To obtain the benefit with respect to the past years, an amended tax return must be filed with the Italian Revenue Agency, provided that all the other requirements are met.

The Budget Law extends the previously available tax credit for R&D activities up to the fiscal year in course as of 31 December 2031 and revises the applicable tax credit rates.

The tax credit available for R&D activities amounts to the following:

- 20% in 2022 with a maximum amount of EUR4 million
- 10% from 2023 to 2031 with a maximum annual amount of EUR5 million.

The tax credit available for innovation, design and sustainable investments is extended to to the fiscal year in course as of 31 December 2025 with the following rates and annual maximum amounts:

	Innovation and design		Sustainability	
	Percentage	Maximum amount	Percentage	Maximum amount
Fiscal year	%	EUR	%	EUR
2023	10	2 million	10	4 million
2024	5	2 million	5	4 million
2025	5	2 million	5	4 million

Provisions. The Italian tax law provides a limited number of provisions.

Bad and doubtful debts. A general provision of 0.5% of total trade receivables at the year-end may be made each year until the total doubtful debt provision reaches 5%. Bad debts actually incurred are deductible to the extent they are not covered by the accumulated reserve. In this regard, losses on bad debts are deductible for corporate income tax purposes only if they derive from “certain and precise” elements and if the debtor has been subject to a bankruptcy procedure or insolvency procedure. The Internationalization Decree provides that, effective from the 2015 fiscal year, the deduction for bad debt losses is allowed with

respect to foreign bankruptcy and insolvency procedures, to the extent that they are equivalent to the Italian procedures and that the relevant foreign country allows a satisfactory exchange of information. “Certain and precise elements” are deemed to exist if one of the following conditions is met:

- The bad debt is not more than EUR2,500 (or EUR5,000 in the case of companies having a turnover not less than EUR100 million) and has been unpaid for at least six months.
- The right to collect the credit has expired. Under Article 2946 of the Italian Civil Law, the ordinary right to collect a credit expires after 10 years.
- The credit has been deleted from the financial statements in application of the relevant accounting rules.

For banks and financial entities, Law Decree No. 83/2015 repealed the rules concerning the tax deductibility of bad debt write-downs and bad debt losses arising from the transfer of receivables.

Redundancy and retirement payments. Provisions for redundancy and retirement payments are deductible in amounts stated by civil law and relevant collective agreements.

Limitations on interest deductions. For companies other than banks and other financial entities, the deductibility of net interest expenses is determined in accordance with an Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) test. Under this test, net interest expenses (that is, interest expenses exceeding interest income) are deductible only up to 30% of EBITDA and the excess can be carried forward indefinitely and used in the fiscal years in which 30% of EBITDA is higher than the net interest expense for the year. The 30% EBITDA rule may also apply at the level of a domestic tax group, meaning that the excess of interest expenses at the level of one entity may be deducted by the group if other members have a corresponding amount of excess EBITDA.

Legislative Decree No. 142/2018 (the ATAD decree) introduced the following amendments, effective from 2019:

- Qualifying EBITDA for purposes of the 30% limitation is now computed on the basis of tax relevant figures (and no longer on accounting figures).
- A new definition of interest expenses (based on a concept of substance over form) is introduced. For example, under the new definition, interest expenses capitalized in the cost of purchased goods are now included.
- Excess interest income of any fiscal year can now be carried forward to offset interest expenses in any following fiscal years.
- Excess 30% EBITDA can now be carried forward for five fiscal years only (no limits applied under the old rule).

Under grandfathering rules, the excess interest expenses accrued under the old regime can still be carried forward, and any excess 30% EBITDA computed under the old rules can be used against excess interest expenses on loans signed before 17 June 2016.

Foreign-exchange losses. Gains and losses resulting from the mark-to-market of foreign currency-denominated debts, credits and securities are not relevant. An exception is provided for those

hedged against exchange risk if the hedging is correspondingly marked-to-market at the exchange rate at the end of the fiscal year.

Relief for losses. For corporate income tax purposes only, losses may be carried forward with no time limit and deducted from income of the following periods for a total amount equal to 80% of taxable income (or a lower value if the tax-loss amount does not reach 80% of the amount of taxable income for the fiscal year).

Losses incurred in the first three years of an activity may also be carried forward for an unlimited number of tax periods, and the limit of 80% of taxable income does not apply. The three-year time limit is computed from the company's date of incorporation. In addition, to qualify for an unlimited loss carryforward, such losses must derive from a new activity; that is, companies within the same group may not have previously carried out the activity.

Restrictions on tax losses carried forward apply if ownership of the company is transferred and if the company changes its activity.

The company resulting from or surviving after a merger may carry forward unrelieved losses of the merged companies to offset its own profits. In general, tax losses carried forward may not exceed the lower of the net equity at the close of the last fiscal year or the net equity shown on the statement of net worth prepared for the merger of each company involved in the merger. This limitation is applied on a company-by-company basis. Contributions to capital made in the 24 months preceding the date of the net worth statement are disregarded. Special rules further limit the amount of the losses that can be carried forward. Additional measures combat abuses resulting from the use of losses with respect to mergers, demergers and the transparency regime (see *Consortium relief*).

Intragroup transfer of tax losses. Under new provisions introduced by the 2017 Budget Law, it is now possible for Italian resident companies, not being part of a tax group, but connected by at least 20% voting rights and profit share, to transfer tax losses accrued in the first three fiscal years to each other, provided that certain conditions are met.

The transfer must be related to the whole amount of the tax losses for the first three fiscal years of activity. The acquiring company must remunerate the seller for the losses transferred by using the same corporate tax rate of the fiscal year when the tax losses accrued. The remuneration is not subject to tax for the seller.

Limitation on tax attributes carryforward in the case of change of ownership and extraordinary transactions. Tax losses and other tax attributes of a company may not be carried forward if the majority of the shares giving voting rights in the ordinary shareholders' meeting of that company are transferred (that is, change of control) and if a change of the main business activity carried out by that company takes place, unless a vitality test is met. The vitality test is an anti-avoidance rule aimed at barring the transfer of net operating losses and other attributes (also through an inter-company reorganization) to profitable companies that could offset

all or a large part of the companies' taxable income with the inherited losses and other attributes.

Notional interest deduction. The Italian notional interest deduction (NID) or allowance for corporate equity (commonly referred to by the Italian acronym ACE) allows Italian enterprises (including Italian branches of foreign businesses) to claim a 1.3% deduction from taxable income corresponding to an assumed "notional return" on qualifying equity increases contributed after the 2010 fiscal year. In particular, Italian resident companies are permitted to deduct from their net taxable income (that is, after applying any tax loss carryforward) an amount corresponding to a notional return on the increase in equity as compared to the equity as of the end of the 2010 fiscal year. Such deduction may offset the annual taxable income but may not generate a loss. Any unused excess can be carried forward without time limitation.

Qualifying equity increases mainly include contributions in cash (also in the form of waiver of certain shareholder debt) and the setting aside of profits to available reserves. Qualifying equity decreases include any assignments to the shareholder such as dividend distributions and repayment of capital reserves. Qualifying equity decreases may also occur under specific anti-avoidance clauses (for example, in the case of cash contributions or the provision of loans to related companies and acquisitions of participations in related companies and going concerns from related companies). Clearance from anti-avoidance provisions may be obtained by a ruling if it can be demonstrated that there is no benefit duplication.

Non-operating companies. Italian resident companies and PEs of nonresident companies are deemed to be "non-operating companies" if the total of their average non-extraordinary revenues (proceeds from the ordinary activities of a company as shown on its financial statements) and increases in inventory are less than the sum of the average of the following during the preceding three years:

- 2% of the book value of the company's financial assets
- 6% of the book value of the company's real estate assets
- 15% of the book value of the company's other long-term assets

The following companies are also deemed to be non-operating companies:

- Companies that incurred tax losses for five consecutive fiscal years
- Companies that incurred tax losses for four consecutive fiscal years and in the fifth fiscal year generated income in an amount lower than the minimum resulting from the application of the percentages described in the next paragraph

If the company qualifies as a non-operating company, its taxable income cannot be lower than the sum of the following items (minimum income):

- 1.5% of the book value of the company's financial assets for the year
- 4.75% of the book value of the company's real estate assets for the year
- 12% of the book value of the company's other assets for the year

Non-operating companies may not generate tax losses. Previous tax losses (that is, those incurred when the company was operating) cannot be offset against the minimum income. In the (unlikely) event that the taxable income exceeds the minimum, only 80% of the amount exceeding the minimum can be offset.

The income of non-operating companies is subject to corporate income tax at a rate of 34.5% (rather than the ordinary 24% rate). IRAP (see Section B) also applies.

Non-operating companies that are in a value-added tax (VAT) credit position may no longer take the following actions:

- They may not claim such VAT for a refund.
- They may not use the VAT to offset other tax payments due.
- They may not surrender the VAT to other group companies.
- They may not carry forward the VAT.

Companies can be exempted from the abovementioned regime, for both income tax and VAT purposes, if they prove to the tax authorities that they were not able to reach the minimum income requirements because of extraordinary circumstances (an advance ruling must be obtained for such a determination). Certain companies are specifically excluded from the non-operating companies' regime (for example, listed groups, companies with 50 or more shareholders, companies with an amount of business income greater than the total assets value and companies that become insolvent or enter into an insolvency procedure).

Groups of companies. Groups of companies may benefit from tax consolidation and consortium relief. These regimes allow the offsetting of profit and losses of members of a group of companies.

Domestic tax consolidation. Italian tax consolidation rules provide two separate consolidation systems, depending on the residence of the companies involved. A domestic consolidation regime is available for Italian resident companies only. A worldwide consolidation regime, with slightly different conditions, is available for multinationals.

To qualify for consolidation, more than 50% of the voting rights of each subsidiary must be owned, directly or indirectly, by the common Italian parent company.

For a domestic consolidation, the election is binding for three fiscal years. However, if the holding company loses control over a subsidiary, such subsidiary must be immediately excluded from the consolidation. The tax consolidation includes 100% of the subsidiaries' profits and losses, even if the subsidiary has other shareholders. The domestic consolidation may be limited to certain entities, leaving one or more otherwise eligible entities outside the group filing election. Tax losses realized before the election for tax consolidation can be used only by the company that incurred such losses. Tax consolidation also allows net interest expenses (exceeding 30% of a company's EBITDA) to be offset with excess EBITDA capacity of another group company.

Dividends paid within a domestic consolidation are subject to the ordinary 1.2% tax at the level of the recipient.

Horizontal consolidation. To comply with Case C-40/13 of the Court of Justice of the EU, the Internationalization Decree introduced the possibility of electing a domestic tax consolidation between two or more Italian sister companies with a common parent residing in any EU or EEA country that provides adequate exchange of information with Italy. These new measures are effective from the 2015 fiscal year.

Under these measures, a nonresident parent company can designate an Italian resident subsidiary to elect for a tax-consolidation regime together with each resident company controlled by the same foreign entity.

In addition, the horizontal consolidation may also include Italian PEs of EU and qualifying EEA companies to the extent that the nonresident company with a PE in Italy is controlled by the same parent company.

Consortium relief. Italian corporations can elect consortium relief if each shareholder holds more than 10% but less than 50% of the voting rights in the contemplated Italian transparent company. Under this election, the subsidiaries are treated as look-through entities for Italian tax purposes and their profits and losses flow through to the parent company in proportion to the stake owned. These profits or losses can offset the shareholders' losses or profits in the fiscal year in which the transparent company's fiscal year ends. Tax losses realized by the shareholders before the exercise of the election for the consortium relief cannot be used to offset profits of transparent companies.

Dividends distributed by an eligible transparent company are not taken into account for tax purposes in the hands of the recipient shareholders. As a result, Italian corporate shareholders of a transparent company are not subject to corporate income tax on 5% of the dividends received (in all other circumstances this would mean an effective tax rate of 1.2%).

The election does not change the tax treatment of dividends distributed out of reserves containing profits accrued before the exercise of the election.

The consortium relief election is binding for three fiscal years and requires the consent of all the shareholders.

The consortium relief election may be beneficial for joint ventures that are not eligible for tax consolidation because the control test is not met. In addition, the election is also available for nonresident companies that are not subject to Italian withholding tax on dividend payments (that is, EU corporate shareholders qualifying under the EU Parent-Subsidiary Directive). If both EU corporate shareholders qualifying under the EU Parent-Subsidiary Directive and Italian corporate shareholders hold an Italian subsidiary, the EU corporate shareholders would want to elect consortium relief to allow the Italian corporate shareholders to benefit from tax transparency.

Group value-added tax. For groups of companies linked by more than a 50% direct shareholding, net value-added tax (VAT; see Section D) refundable to one group company with respect to its own transactions may be offset against VAT payable by another,

and only the balance is required to be paid by, or refunded to, the group.

European VAT Group. The 2017 Budget Law introduces, effective from 1 January 2018, the option for the European VAT Group (as provided by Article 11 of the EU Directive 2006/112/CE) in the Italian VAT law.

Companies included in the European VAT Group are treated as a single VAT taxable person, which means the following:

- Transactions carried out between the entities of the group are not subject to VAT.
- Transactions carried out between an entity of the group and a third party are treated as performed by the group as a single entity.
- Entities incorporated in Italy should be entitled to elect the group if, while legally independent, they are closely bound one to another by the following financial, economic and organizational links:
 - Financial link: a minimum corporate participation link must exist between the entities electing for the group (more than 50% of the voting rights).
 - Economic link: the entities must perform the same kind of activity or complementary, ancillary and auxiliary activities.
 - Organizational link: a link between the decision-making bodies of the entities must exist.

If the election is made, all entities fulfilling the requirements must adhere to the group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT), on goods, services and imports	
Standard rate	22%
Other rates	4%/10%
Municipal tax (Imposta Unica Comunale, or IUC); includes real property tax (Imposta Municipale Unica, or IMU) and tax on garbage disposal (Tassa per Rifiuti, or TARI)	
IMU; imposed on Italian property's re-evaluated cadastral value; rates may be modified by municipal authorities; not applicable to principal home; payable by the owner of the real property	Various
TARI; imposed on the user	Various

E. Miscellaneous matters

Foreign-exchange controls. The underlying principle of the foreign-exchange control system is that transactions with nonresidents are permitted unless expressly prohibited. However, payments by residents to foreign intermediaries must be channeled through authorized banks or professional intermediaries. In addition, transfers of money and securities exceeding EUR10,000 must be declared to the Italian Exchange Office. Inbound and outbound investments are virtually unrestricted.

Transfer pricing. Italy imposes transfer-pricing rules on transactions between related resident and nonresident companies. Under these rules, intragroup transactions must be carried out at arm's length. In principle, Italian transfer-pricing rules do not apply to domestic transactions. However, under case law, grossly inadequate prices in these transactions can be adjusted on abuse-of-law grounds.

No penalty applies as a result of transfer-pricing adjustments if Italian companies complied with Italian transfer-pricing documentation requirements, allowing verification of the consistency of the transfer prices set by the multinational enterprises with the arm's-length principle.

On 23 November 2020, the Italian tax authorities issued new instructions regarding the content and validity of the elective transfer-pricing documentation in order to adopt the Base Erosion and Profit Shifting (BEPS) Action 13 deliverable. Such documentation consists of the following documents:

- Masterfile
- Country-Specific Documentation

The Masterfile collects information regarding the multinational group. It must be organized in the following chapters.

Chapter	Information in chapter
1	Description of the group structure
2	Description of the activities carried out by the group, including information concerning main profit generator factors, transaction flows, main intercompany service agreements, main markets, brief functional analysis of the entities of the group describing their contribution to value creation and business restructuring transactions
3	Description of the intangible assets owned by the group
4	Description of the intercompany financial transactions
5	Description of the group financial reports, including consolidated financial statements (to be attached) and a list and summary of any APAs and other tax rulings related to the cross-border allocation of income

Under the 2010 instructions, taxpayers could prepare, in certain cases, a Masterfile only in relation to a subgroup, in order to avoid filing the group Masterfile. Such possibility no longer exists, given that the new instructions refer only to group Masterfiles, consistent with the applicable Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines. Also, under the new instructions, more than one Masterfile for each group can be prepared if it is possible to segregate in separate sets different operations and different transfer-pricing policies that are applicable within the same group.

The Country-Specific Documentation contains information regarding the enterprise. It must be organized in the following chapters and annexes.

Chapter	Information in chapter or annex
1	General description of the entity, including information concerning the relevant operating structure and business strategies
2	Intercompany transactions
3	Financial information, including individual financial statements and statements reconciling the Profit Level Indicators used to apply the transfer-pricing methodology with the figures in the annual financial statements
Annex 1	Copies of the contractual documentation for each covered transaction
Annex 2	Copies of APAs and other cross-border tax rulings of the Italian entity as well as of other companies, if any way linked to the covered transaction.

The transfer-pricing rules described above do not apply to transactions between resident entities.

Decree No. 50 of 2017 replaced the reference to the “fair market value” principle set out in Article 9 of the TUIR for purposes of computing transfer-pricing adjustments.

Under the new wording of Article 110, Paragraph 7 of the TUIR, the transfer-pricing adjustments are determined with reference to the conditions and prices that would have been agreed on by independent entities operating in conditions of free competition and in comparable circumstances, if an increase in income is derived. In other words, the transfer-pricing adjustments should be determined under a free-competition scenario, which is more in line with the OECD guidelines for national legislation.

The negative income tax adjustment under Article 110, Paragraph 7, of the TUIR, can occur in the following circumstances:

- In the execution of agreements concluded with the competent authorities of foreign states following the mutual agreement procedure provided under a double tax treaty.
- At the end of the checks carried out as part of the international cooperation activities whose results are shared by states’ participants.
- Following a ruling regarding the taxpayer by a state with which Italy has entered into a double tax treaty that allows an adequate exchange of information and is issued according to the methods and terms provided by the Director of the Revenue Agency, against a positive adjustment and in accordance with the arm’s-length principle. A facility exists for the taxpayer to request the activation of the mutual agreement procedure referred to in the first bullet, provided that the conditions are met.

Country-by-Country Reporting. The 2016 Budget Law introduced a new Country-by-Country Reporting (CbCR) obligation for multinational entities. Entities subject to this obligation must submit an annual report indicating the amounts of revenues, gross profits, taxes paid and accrued, and other indicators of effective economic activities.

Italian parent companies of certain groups and certain Italian resident companies controlled by a foreign company are subject to the CbCR obligation.

Italian parent companies are subject to the CbCR obligation if their groups meet the following conditions:

- They are required to submit group consolidated financial statements. These are groups that exceed two of the following two of the following thresholds for two consecutive years:
 - Total assets of EUR20 million
 - Turnover of EUR40 million
 - 250 employees
- They had consolidated annual turnover in the preceding fiscal year of at least EUR750 million.
- They are not controlled by other entities.

Italian resident companies controlled by a foreign company are subject to the CbCR obligation if they are required to submit group consolidated financial statements in a country where the CbCR does not apply or in a country that does not allow exchange of information regarding the CbCR.

In the case of a failure to submit a report or an incomplete submission of a report, penalties apply from EUR10,000 to EUR50,000.

On 8 March 2017, the Italian Ministry of Economy and Finance released the Ministerial Decree with implementation details for the CbCR process for Italian entities belonging to Multinational Enterprise (MNE) groups.

Cooperative Compliance Program. An elective Cooperative Compliance Program (CCP) is introduced for selected taxpayers that have adopted an adequate internal audit model to manage and control their tax risks with the purpose of promoting communication and cooperation between taxpayers and tax authorities.

Taxpayers that adhere to the CCP can benefit from certain advantages such as the following:

- Agreements on tax positions before the filing of the return
- Quicker rulings (45 days)
- No need for guarantees for tax refunds
- Reduction of applicable penalties to half of the minimum in the case of assessments concerning tax risks timely communicated by the taxpayer

Taxpayers that file a request to adhere to the CCP should receive an answer within 120 days.

In the case of a positive answer, admission to the regime is effective as of the fiscal year in which the request is filed and continues until the taxpayer files an end notice.

The tax authorities may exclude taxpayers from the CCP if during any of the years following the taxpayers' admission, the taxpayers no longer meet the CCP's requirements.

Taxpayers should adopt a collaborative attitude with Italian tax authorities by timely disclosing transactions that may be deemed to be aggressive tax planning, by promptly responding to any request and by promoting a corporate culture adhering to principles of fairness and respect of tax laws.

Controlled foreign companies. The income of a controlled foreign company (CFC) is attributed to the Italian parent under a flow-through taxation principle if both of the following circumstances exist:

- The foreign subsidiary is subject to an effective tax rate lower than 50% of the applicable Italian corporate income tax rate.
- More than 1/3 of the foreign subsidiary's revenues qualify as passive income, such as dividends, interest, royalties, and financial lease, insurance, bank and other financial activity income, as well as income derived from the sale of goods or provision of low-value services to related parties.

A CFC is deemed to be controlled by an Italian company if either of the following circumstances exist:

- Direct or indirect control is exercised in the foreign company's shareholders meeting, including by way of trust companies or intermediaries, through the majority of voting rights or a qualifying influence under Article 2359 of the Italian Civil Code.
- Over 50% of the participation in the foreign company's profits is held either directly or indirectly by way of other companies controlled under Article 2359 of the Italian Civil Code, including by way of trust companies or intermediaries.

CFC rules also apply to a foreign PE of a CFC, a foreign exempt PE of the Italian controlling company or an Italian subsidiary of the Italian controlling company.

An advance ruling may be electively obtained to demonstrate that the foreign entity (or PE) carried out an actual industrial or commercial activity.

Since the ruling is not mandatory, the conditions required for the exemption can also be proved during the tax audit process. Accordingly, tax assessments concerning the CFC regime cannot be issued if the taxpayer has not been given the opportunity to provide evidence of this exemption within 90 days after the clarification request.

In the absence of a positive ruling (and provided that the flow-through taxation has not been applied), the Italian parent needs to disclose in its tax return the ownership of the shares triggering the application of the CFC rules. Specific penalties of up to EUR50,000 apply for a failure to make such disclosure.

Anti-avoidance legislation. A general anti-avoidance rule is set forth by Article 10-bis of Law 212/2000 and applies to all direct and indirect taxes with the exclusion of custom duties.

The rule defines "abuse of law" as "one or more transactions lacking any economic substance which, despite being formally compliant with the tax rules, achieve essentially undue tax advantages."

Transactions are deemed to lack economic substance if they imply facts, actions and agreements, even related to each other, that are unable to generate significant business consequences other than tax advantages. As indicators of lack of economic substance, the anti-avoidance rule refers to cases in which inconsistency exists between the qualification of the individual transactions and their legal basis as a whole and cases in which the

choice to use certain legal instruments is not consistent with the ordinary market practice.

Tax advantages are deemed to be undue if they consist of benefits that, even if not immediate, are achieved in conflict with the purpose of the relevant tax provisions and the principles of the tax system.

Notwithstanding the above, the anti-avoidance rule establishes that no abuse of law exists if a transaction is justified by non-negligible business purposes (other than of a tax nature), including those aimed at improving the organizational and managerial structure of the business.

Taxpayers can submit ruling requests to the Italian authorities to verify whether any envisaged or realized transactions are considered abusive. The application must be filed before the deadline for the relevant tax return submission or before the satisfaction of other tax obligations associated with the transactions.

Anti-hybrid provision. Law Decree No. 142/2018 implemented the EU ATAD into domestic law.

Italian anti-hybrid rules apply as of the fiscal year starting after the one ongoing on 31 December 2019 (that is, as of 2020 for calendar-year companies). Rules applying to (Italian) reverse hybrids apply as of the fiscal year starting after the one ongoing on 31 December 2021 (that is, as of 2022 for calendar-year companies).

The Italian ATAD Decree applies to IRES and the Italian individual income tax (*imposta sul reddito delle persone fisiche*, or IRPEF), but it does not apply to IRAP. With reference to foreign jurisdictions, the Italian anti-hybrid rules take into consideration any tax covered by a bilateral tax treaty in place with the relevant country. However, if the applicable treaty also includes local taxes (that is, regional or cantonal), the anti-hybrid rules will only consider taxes applied at the highest governmental level (for example, at the federal level). Absent a bilateral tax treaty, reference is made to taxes with the same or equivalent nature of the Italian taxes applied at the highest governmental level.

Debt-to-equity rules. For information regarding restrictions on the deductibility of interest, see Section C.

Mergers and acquisitions. Mergers of two or more companies, demergers and asset contributions in exchange for shares are, in principle, tax-neutral transactions. However, companies undertaking mergers, demergers and asset contributions in exchange for shares may step up the tax basis of the assets for IRES and IRAP purposes by paying a step-up tax at rates ranging from 12% to 16%. Different types of step-up elections are available.

Tax benefits for selected business aggregations. The 2021 Budget Law introduced tax benefits for selected business aggregations between third parties or newly acquired targets, including merger and demerger transactions, as well as business contributions, implemented through 2021. The 2022 Budget Law extends certain tax benefits for selected business aggregations between third parties, including merger and demerger transactions, as well as business contributions, implemented on or before 30 June 2022.

The receiving entities involved in the aggregation may elect for the conversion into a tax credit of the deferred tax assets (DTAs) related to the tax losses carried forward and excess Italian NID.

The threshold for the convertible DTAs is generally 2% of the sum of the assets of the entities involved (but excluding the entity with the most valuable assets).

For such purposes, it is not required that the convertible DTAs be recorded in the financial statements. The threshold of convertible DTAs is set at EUR500 million.

Foreign PEs of Italian entities and Italian PEs of foreign entities

Foreign PEs of Italian entities. An election is available to exempt income generated through foreign PEs. For branches located in a low-tax country, CFC rules apply. The election is irrevocable and involves automatically all of a company's PEs (that is, "all in or all out").

Italian PEs of foreign entities. Income is attributed to Italian PEs in line with the "Authorized OECD Approach." The PE income is determined according to the ordinary rules for resident companies and on the basis of a specific statutory account prepared according to the Italian accounting principles applying to resident enterprises with similar features.

Dealings between Italian PEs and foreign headquarters are explicitly subject to Italian transfer-pricing rules. In this respect, a PE is treated as separate and independent from its headquarters, and profits attributed to the PE are those that the branch would have earned at arm's length as if it were a "distinct and separate" entity performing the same or similar functions under the same or similar conditions, determined by applying the arm's-length principle. A branch "free capital" (*fondo di dotazione*) is also attributed to the PE on the basis of OECD principles.

The 2018 Budget Law expanded the definition of PE to align it with the revised definition in the 2017 version of the OECD model. However, as a departure from the current OECD version, the Italian domestic rule includes the following definition of a digital PE: "A continuous and significant economic presence of a foreign company in Italy, regardless of whether it has a substantial Italian physical presence, will trigger the existence of a fixed base that could give rise to an Italian PE."

Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS. On 7 June 2017, Italy and 67 other jurisdictions signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (the MLI).

At the time of signature, Italy submitted a list of 84 tax treaties entered into by Italy and other jurisdictions that it would like to designate as covered tax agreements (tax treaties to be amended through the MLI).

Together with the list of covered tax agreements, Italy also submitted a provisional list of reservations and notifications (MLI positions) with respect to the various provisions of the MLI. The definitive MLI positions will be provided on the deposit of Italy's instrument of ratification, acceptance or approval of the MLI.

(1) Dividends paid by Italian companies to EU parent companies are exempt from withholding tax if the recipient company holds a participation of at least 10% in the distributing company for an uninterrupted period of at least one year. Otherwise, a 1.2% dividend withholding tax rate applies under domestic law to dividends paid to EU and EEA subject-to-tax companies.

(a) The lower rate applies to corporate shareholders satisfying the following qualifying tests:

- Armenia: at least 10% of the capital (equal to at least USD100,000 or the equivalent value in other currency) for 12 months
- Bangladesh, Canada, Estonia, India, Kazakhstan and Lithuania: at least 10% of the capital
- Colombia: at least 20% of the capital or if the beneficial owner is a recognized pension fund
- Denmark, Qatar and Saudi Arabia: at least 25% of the capital for 12 months before the date the dividend is distributed
- Finland: more than 50% of the capital
- France: more than 10% of the capital for 12 months
- Belarus, Georgia, Germany, Indonesia, Israel, Korea (South), Mauritius, Moldova, Morocco, North Macedonia, Pakistan, Slovenia, Syria, Trinidad and Tobago, United Arab Emirates and Zambia: at least 25% of the capital
- Ghana: at least 10% of the capital
- Iceland: beneficial owner is a company (other than a partnership) owning at least 10% of the capital for at least 12 months
- Japan: at least 25% of the shares with voting rights for six months
- Kuwait: at least 25% of the capital
- Latvia: beneficial owner is a company (other than a partnership) owning at least 10% of the capital
- South Africa: at least 25% of the capital for 12 months ending on the date the dividend is declared
- Sweden: at least 51% of the capital
- Thailand: at least 25% of the shares with voting rights
- Ukraine: at least 20% of the capital
- United Kingdom: at least 10% of the shares with voting rights for 12 months

(b) The 0% rate applies to interest paid to or by a government.

(c) The 5% rate applies to corporations that beneficially own more than 50% of the voting rights of the shares for the 12-month period ending on the date of declaration of the dividend. The 10% rate applies to the gross amount of the dividends if the beneficial owner is a company that is not entitled to the application of the 5% rate and that has held at least 10% of the voting shares of the company paying the dividends for the 12-month period preceding the date of declaration of the dividends. The 15% rate applies in all other cases.

(d) Interest paid to a “government” or central bank is exempt. The term “government” refers to the central government and any other local authority entirely owned by the state that receives interest on behalf of the central authority.

(e) Interest paid by a contracting state is exempt. Under the Philippines treaty, the loan must involve the issuance of bonds or financial instruments similar to bonds.

(f) The 5% rate applies to dividends paid to corporations that beneficially own at least 70% of the capital of the payer. The 10% rate applies to dividends paid to corporations that beneficially own at least 25% but less than 70% of the capital of the payer. The 15% rate applies to other dividends.

(g) The 5% rate applies if the recipient of the dividend is a corporation that beneficially owns more than 10% of the capital of the payer and if the value of the participation of the recipient is at least USD100,000 or an equivalent amount in another currency. The 10% rate applies to other dividends.

(h) The lower rate is for the use of or right to use literary, artistic and scientific copyrights. Under the Canada treaty, the lower rate applies only to literary and artistic copyrights.

(i) The higher rate applies if the recipient has an investment exceeding 50% of the capital of the payer.

(j) The 10% rate applies only if the payer is engaged in an industrial activity and the interest is paid to a financial institution (including an insurance company). The exemption also applies to bonds issued by a contracting state.

- (k) The 25% rate applies to trademark royalties only.
- (l) The lower rate applies to royalties for literature, plays, and musical or artistic works. Under the Germany treaty, royalties for films and recordings for television qualify for the lower rate. Under the Canada treaty, such royalties do not qualify for the lower rate. Under the Mexico treaty, royalties for films and recordings for television and radio do not qualify for the lower rate.
- (m) The lower rate applies to royalties paid for literary, artistic or scientific works and for films and recordings for radio or television.
- (n) The lower rate applies to patents, trademarks, trade names or other intellectual property.
- (o) The lower rate applies to royalties from the use of copyrights on literary, artistic or scientific works (excluding cinema and television films).
- (p) The lower rate applies to royalties paid for the use of, or the right to use, copyrights for literary, artistic or scientific works, including cinematographic films and recordings for radio and television broadcasts.
- (q) The lower rate applies to royalties paid for literary and artistic works, including films and recordings for radio and television.
- (r) In the case of royalties for the use of trademarks, films and industrial, commercial or scientific equipment, the withholding tax rate is 16%; for the use of copyrights for artistic, literary and scientific works, the rate is 5%. In all other cases, the rate is 12%.
- (s) The 0% rate applies to royalties for copyrights of literary, artistic or scientific works (excluding royalties for computer software, motion pictures, films, tapes or other means of reproduction used for radio or television broadcasting). The 5% rate applies to royalties for the use of, or the right to use, computer software or industrial, commercial, or scientific equipment. In all other cases, the 8% rate is imposed on the gross amount of the royalties.
- (t) The 18% rate applies if the dividends are paid by a company that is resident in Côte d'Ivoire and that is exempt from tax on its income or not subject to that tax at the normal rate. The 15% rate applies in all other cases.
- (u) The treaty with the former USSR remains applicable with respect to Kyrgyzstan, Tajikistan and Turkmenistan.
- (v) The treaty with the former Yugoslavia applies to Bosnia and Herzegovina, Montenegro and Serbia.
- (w) An exemption applies to the following:
- Interest on loans that are not in the form of bearer securities if the interest is paid to the following: the other contracting state; its political or administrative subdivisions; or its local authorities
 - Interest paid to credit institutions of the other contracting state if the interest is paid on loans that are not in the form of bearer securities and if the loans are permitted under an agreement between the governments of the contracting states
- (x) The 10% rate applies to royalties and commissions paid for the use of or right to use the following: industrial, commercial or scientific equipment; or information concerning industrial, business or scientific know-how. The 15% rate applies to other royalties.
- (y) The 10% rate applies to interest paid by banks and other financial entities (that is, insurance companies). The 15% rate applies to other interest.
- (z) Interest paid on loans made in accordance with an agreement between the governments of the contracting states is exempt. Under the Mexico treaty, the loan must have a term of at least three years.
- (aa) Interest withholding tax is not imposed if any of the following circumstances exist:
- The interest is beneficially owned by a resident of the other contracting state that is a qualified governmental entity and that holds, directly or indirectly, less than 25% of the capital of the person paying the interest.
 - The interest is paid with respect to debt obligations guaranteed or insured by a qualified governmental entity of that contracting state or the other contracting state and is beneficially owned by a resident of the other contracting state.
 - The interest is paid or accrued with respect to a sale on credit of goods, merchandise, or services provided by one enterprise to another enterprise.
 - The interest is paid or accrued in connection with the sale on credit of industrial, commercial, or scientific equipment.
- (bb) The lower rate applies to royalties for literature, musical and artistic works.
- (cc) The 26% rate is the rate under Italian domestic law for dividends paid to nonresidents.
- (dd) These are the rates under Italian domestic law. Under the treaty, the rate is 0% if the interest is paid to a Mauritian public body or bank resident in Mauritius.

- (ee) Exemption is provided for interest paid in connection with the following:
- Credit sales of industrial, commercial or scientific equipment
 - Credit sales of goods delivered from one enterprise to another enterprise
- (ff) A 15% rate, which is contained in the dividend article, applies to payments on profit-sharing loans and to silent partners. The 10% rate applies in other circumstances.
- (gg) A refund may be available for the underlying tax credit with respect to business profits attached to the dividends.
- (hh) If a resident of a contracting state receives payments for the use of, or the right to use, industrial, commercial or scientific equipment from sources in the other contracting state, the resident may elect to be taxed in the contracting state in which the royalties arise as if the property or right for which the royalties are paid is effectively connected with a PE or fixed base in that contracting state. If such election is made, no withholding tax is imposed on the payments.
- (ii) The treaty exempts the following types of interest:
- Interest on bank credits and loans
 - Interest on current accounts and deposits with banks or other credit institutions
- The 26% rate is the withholding tax rate under Italian domestic law.
- (jj) The lower rate applies to fees paid for technical assistance services. The higher rate applies to royalties paid for the use of the intangibles.
- (kk) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.
- (ll) The treaty provides the following exemptions:
- Interest paid by the government or its local authorities
 - Interest paid to the government of the other contracting state or its local authorities or other entities and organizations (including credit institutions) wholly owned by the other contracting state or its local authorities
 - Interest paid to other entities and organizations (including credit institutions) if the interest is paid on loans permitted under an agreement between the governments of the contracting states
- (mm) The treaty provides the following exemptions:
- Interest paid by the state of source, its political or administrative subdivisions or its local authorities
 - Interest paid on loans granted, guaranteed or secured by the government of the other contracting state, by its central bank or by other entities and organizations (including credit institutions) wholly owned by the other contracting state or under its control
- (nn) The lower rate applies to royalties paid for the use of, or the right to use, copyrights for literary, artistic or scientific works, excluding cinematographic films and other audio and visual recordings.
- (oo) The treaty provides the following exemptions:
- Interest paid by the government or a local authority thereof
 - Interest paid to the government, a local authority thereof or an agency or instrumentality (including a financial institution) wholly owned by the other contracting state or a local authority thereof
 - Interest paid to any other agency or instrumentality (including a financial institution) with respect to loans made under agreement entered into between the governments of the contracting states
- (pp) The 5% rate applies to companies (other than partnerships) that hold directly at least 15% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (qq) The treaty provides the following exemptions:
- Interest paid to a contracting state, a local authority thereof, or a corporation having a public status, including the central bank of that state
 - Interest paid by a contracting state or local authority thereof, or any corporation having a public status
 - Interest paid to a resident of a contracting state with respect to debt obligations guaranteed or insured by that contracting state or by another person acting on behalf of the contracting state
 - Interest paid with respect to sales on credit of industrial, commercial or scientific equipment or of goods or services between enterprises
 - Interest paid on bank loans
- (rr) Effective from 1 July 2005 a 0% rate may apply under the agreement between Switzerland and the EU. The rates shown in the table are the withholding tax rates under the Italy-Switzerland double tax treaty. Subject to fulfillment of the respective requirements, the taxpayers may apply either the Switzerland-EU agreement or the Italy-Switzerland double tax treaty.
- (ss) See Section A.

- (tt) The exemption applies to interest paid to a resident of the other contracting state with respect to debt claims indirectly financed by the government of that other contracting state, a local authority, the central bank thereof or a financial institution wholly owned by the government of the other contracting state.
- (uu) The lower rate applies to interest related to loans that are guaranteed by the government or a local authority. Under the Korea treaty, the guarantee must be evidenced by an agreement contained in an exchange of letters between the competent authorities of the contracting states.
- (vv) The 15% rate applies to dividends paid by a company established in Italy to a Cyprus resident beneficiary. Dividends paid by a company established in Cyprus to an Italian resident beneficiary are exempt from withholding tax in Cyprus.
- (ww) The 10% rate applies to dividends paid by an Italian company to a Malaysian resident. Dividends paid by a Malaysian company to an effective beneficiary resident in Italy are exempt from tax in Malaysia if the beneficiary is subject to tax on the dividends in Italy.
- (xx) The 5% rate applies to royalties for the use of, or the right to use, computer software or industrial, commercial, or scientific equipment. In all other cases, the rate for royalties is 10%.
- (yy) The treaty provides an exemption from withholding tax for the following types of interest payments:
- Interest paid by the state of source, its political or administrative subdivisions or its local authorities
 - Interest paid on loans granted, guaranteed or secured by the government of the other contracting state, by its central bank or by other entities and organizations (including credit institutions) wholly owned by the other contracting state or under its control
 - Interest paid or accrued in connection with the sale on credit of industrial, commercial, or scientific equipment
- (zz) The 15% rate applies if the royalties are paid by an enterprise registered with the Philippine Board of Investments and engaged in preferred areas of activities and to royalties with respect to cinematographic films or tapes for television or broadcasting. The 25% rate applies in all other cases.
- (aaa) The 5% rate applies if the recipient company has owned at least 10% of the capital in the Italian company for at least 12 months.
- (bbb) The 5% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, trademarks, designs or models, plans, and secret formulas or processes
 - The use of, or the right to use, industrial, commercial or scientific equipment that does not constitute immovable property, as defined in Article 6 of the treaty
 - Information concerning experience of an industrial, commercial or scientific nature
- (ccc) The treaty contains a specific anti-abuse provision. If the main purpose or one of the main purposes of the transaction is to benefit from the lower treaty rates, the lower rates may be denied.
- (ddd) On 10 August 2015, the income tax treaty between Italy and Hong Kong entered into force. The treaty is in effect with respect to Italian tax for years of assessment beginning on or after 1 January 2016. Under the treaty, Hong Kong has been removed from the Italian prohibited lists (for both cost deductions and for CFC purposes).
- (eee) On 23 February 2015, Italy and Switzerland signed a protocol to their double tax treaty as well as a road map for the continued dialogue in tax and financial matters.
- (fff) The 8% rate applies if the beneficial owner (different from a partnership or similar body) holds a minimum shareholding of 10% in the entity paying the dividends.
- (ggg) The 5% rate applies if the beneficial owner is a statutory body or an export financing agency or a recognized pension fund. The 10% rate applies in all the other cases.

A. At a glance

Corporate Income Tax Rate (%)	25/30/33 $\frac{1}{3}$ (a)
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	25/33 $\frac{1}{3}$ (a)
Withholding Tax (%)	
Dividends	15/33 $\frac{1}{3}$ (b)
Interest	33 $\frac{1}{3}$ (c)
Royalties	33 $\frac{1}{3}$ (d)
Management Fees	33 $\frac{1}{3}$ (d)
Insurance Premiums	15 (e)
Branch Remittance Tax	33 $\frac{1}{3}$
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (f)

- (a) Unregulated companies are taxed at a rate of 25%, and regulated companies (excluding life insurance companies and building societies) are taxed at a rate of 33 $\frac{1}{3}$ %. An unregulated company is a company that is not a regulated company. A regulated company is a company that is regulated by any of the following:
- Financial Services Commission (FSC)
 - Office of Utilities Regulation
 - Bank of Jamaica
 - The minister with responsibility for finance
- Building societies are taxed at a rate of 30%.
- (b) The dividend withholding tax of 33 1/3% is a tax imposed on payments of dividends to nonresidents (the rate may be reduced by double tax treaties). A dividend withholding tax is also required to be deducted from dividend payments made by a Jamaican resident company to a Jamaican resident shareholder at a rate of 15%, unless the Jamaican shareholder is a Jamaican resident company that holds more than 25% of the voting rights of the distributing company. In such cases, the rate of income tax payable on the dividends paid is nil.
- (c) This rate applies to interest paid to nonresident companies. Special rules apply to interest paid by prescribed persons (as defined). The withholding tax rates may be reduced under double tax treaties. The recipients of the payments must include the payments in taxable income reported on their annual income tax returns, and they may credit the tax against their annual income tax liability.
- (d) This is a final tax that is imposed on payments to nonresidents. The withholding tax rate may be reduced under double tax treaties.
- (e) This withholding tax applies to insurance premiums paid by residents to nonresidents. However, the withholding tax does not apply if a Jamaican resident insurance company registered with the FSC pays the premium to an entity that meets all of the following conditions:
- It is not a connected company.

- It is in the business of writing contracts of reinsurance in the international market.
 - It is not acting on behalf of a captive insurance company.
- (f) See Section C regarding a restriction on the loss carryforward.

B. Taxes on corporate income and gains

Corporate income tax. Companies are resident in Jamaica if the control and management of their affairs are exercised in Jamaica. Nonresident companies operating a branch on the island are taxed on profits derived from their Jamaican operations.

Tax rates. The standard rates of the income tax on profits are 33⅓% for regulated entities (excluding life insurance companies) and 25% for unregulated entities. Building societies are taxed at a rate of 30%. Life insurance companies are taxed at a rate of 25%.

Under the Betting, Gaming and Lotteries Act, the following are the amounts of the lottery tax payable:

- 25% of the gross weekly revenue derived from sales of lottery tickets with respect to a declared lottery
- 20% of the gross weekly revenue derived from promotion of a daily numbers game or instant lottery

Remittances overseas by branches of foreign companies are subject to branch remittance tax at a rate of 33⅓%. This rate may be different if a double tax treaty is in place.

The Special Economic Zones Act (SEZ Act) replaced the Free Zones Act (which provided certain tax benefits to companies that operated under that legislation; the act was repealed in 2015). However, under grandfathering provisions, companies that operated under the Free Zones Act are given a four-year period to transition to the new SEZ regime. Under the SEZ Act, chargeable income from a trade, vocation or profession of approved developers or occupants is subject to income tax at a rate of 12.5%. The income tax rate for approved developers or occupants may be reduced by a Promotional Tax Credit, which may be claimed for expenditure on research, development and trading.

Developers and occupants are exempt from income tax on profits derived from the rental of property in the SEZ, subject to certain restrictions. Dividend income is subject to income tax at a rate of 0%. Withholding tax of 0% applies to dividends paid out of profits from a profession or vocation in the SEZ.

Under the Urban Renewal Act, which was introduced to promote the improvement of depressed areas, approved entities may obtain various types of tax relief for development carried out in areas designated by the Jamaican government as special development areas. The tax relief relates to income tax, stamp duty and transfer tax.

Withholding tax on specified services. Recipients of specified services (as defined in the legislation) are required to withhold a 3% tax from payments made to suppliers of these services. The tax must be withheld if either of the following circumstances exist:

- The gross payment relates to a single transaction with an invoice value of JMD50,000 (approximately USD325) or more (before application of the General Consumption Tax [GCT; see Section D])

- A series of gross payments of less than JMD50,000 (before GCT) is made to the same service provider in a 30-day period, and these payments total JMD100,000 (approximately USD650) or more.

The service provider from whom the tax is withheld may claim, in the tax year of the withholding, a tax credit for the amount withheld against any quarterly income tax obligation or the tax due in the annual income tax return. Any excess credit for that tax year may be claimed as a refund or carried forward to be used in a future tax year.

Capital gains. No tax is imposed on capital gains. However, a transfer tax of 2% is imposed on transfers of certain Jamaican property, including land and securities (see Section D). The 2% rate took effect on 1 April 2019 (a 5% rate previously applied). Stamp duty may also apply. The stamp duty rates on certain transactions were abolished and replaced by a flat fee of JMD5,000 per document.

Capital allowances are subject to recapture on the disposal of assets (see Section C).

Administration. The tax year is the calendar year. The Commissioner General may allow companies with an accounting year-end other than 31 December to pay tax based on income earned in that accounting year.

Income tax returns must be filed and payments made by 15 March of the year following the tax year to which the income tax return relates. Quarterly advance payments of tax must be made.

Interest of 16.63% per year is levied on late income (corporation) tax payments, and a penalty of 50% per year may also be imposed.

Dividends. In general, dividends paid to nonresidents are subject to a final withholding tax, and the tax withheld must be paid to the tax authorities in Jamaica. In general, withholding tax at a rate of 15% is imposed on dividends paid by Jamaican resident companies to Jamaican resident shareholders. However, if the company receiving the dividend holds more than 25% of the voting rights, the rate of income tax payable on such dividend is nil. Preference dividends that are deductible for income tax purposes are fully taxable in the hands of the shareholder at the income tax rate of the shareholder, regardless of whether the shareholder is resident or nonresident. Dividends paid out of capital are not subject to income tax, but they are generally subject to a transfer tax at a rate of 2% (the 2% rate took effect on 1 April 2019).

Foreign tax relief. For income derived from treaty countries, the tax rate is the treaty rate applicable to the direct corporate investor. The regular Jamaican corporate tax rate of 25% or 33 $\frac{1}{3}$ % is applied to income derived from non-treaty countries.

C. Determination of trading income

General. Taxable income is based on accounting income with appropriate adjustments. To be deductible, expenses must be incurred wholly and exclusively in earning income.

Non deductible expenses include capital expenditures, incorporation expenses and interest accrued but not paid. Contributions or

donations made to charities approved under the Charities Act by the Department of Cooperatives and Friendly Societies are deductible, up to a maximum of 5% of taxable income.

Inventories. The first-in, first-out (FIFO) and weighted average methods of inventory valuation are allowed.

Provisions. To be deductible, bad debts must be specific. General provisions are not allowed.

Tax depreciation (capital allowances). The capital allowances are described below.

Initial allowance. An initial allowance of 25% of the cost of an asset is granted for certain types of assets, including office equipment, computers, and plant and machinery used in the production or manufacturing of primary products or goods, as defined in the Income Tax Act. However, some office equipment and plant and machinery are not entitled to the initial allowance. Initial allowances are granted in the year of purchase and are deducted from the depreciable value of the asset.

Investment allowance. A 20% investment allowance is granted instead of the initial allowance for buildings and plant and machinery used in “basic industries,” such as the electricity and steam industries. Plant and machinery purchased in Jamaica must be new to qualify for the investment allowance. However, both new and used plant and machinery purchased overseas qualify for the allowance. The initial allowance is substituted for the investment allowance if the asset is disposed of within three years after its purchase. The investment allowance does not reduce the depreciable value of an asset.

Annual allowance. Plant and machinery qualify for an annual allowance of 12.5%, calculated using the straight-line method. A 20% annual allowance, calculated using the straight-line method, is granted to trade vehicles. However, the maximum depreciable cost for vehicles that are not trade vehicles is an amount in Jamaican dollars that is equivalent to USD35,000 converted at the Bank of Jamaica weighted average selling rate as at 30 June in the year the vehicle was purchased. The annual allowance rate for non-trade vehicles is 12.5%, calculated using the straight-line method. Office equipment qualifies for an annual allowance of 20%, calculated using the straight-line method. Nonresidential and industrial buildings generally qualify for annual allowances, calculated using the straight-line method, at rates that range from 4% to 12.5%, depending on the type of material used to construct the building or structure.

Disposal of depreciable assets. Initial and annual allowances are generally subject to recapture on the sale of an asset, to the extent the sales proceeds exceed the tax value after depreciation. The amount recaptured (balancing charge) may not exceed the total of the initial and annual allowances granted. Any amounts recaptured are subject to tax at the regular corporate tax rate. If the proceeds are less than the tax-depreciated value, an additional allowance (balancing allowance) is granted.

Relief for losses. Losses may be carried forward indefinitely. However, each year, a loss carryforward may offset only 50% of the aggregate amount of income of the taxpayer from all sources

after allowing the appropriate tax deductions and tax exemptions. However, the limitation does not apply in the following circumstances:

- For the first five tax years following the tax year in which the trade commenced
- If the taxpayer's gross revenue from all sources for the relevant tax year is less than JMD10 million (this threshold is effective from 1 April 2019; the threshold was JMD3 million up to 31 March 2019)

A carryback of losses is not permitted.

Groups of companies. The law does not contain any group loss relief or consolidated return provisions.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Customs Administrative Fee; rates vary depending on the product	Various
Environmental levy; imposed on the Cost, Insurance and Freight (CIF) value of all imported goods with a few exceptions	0.5%
General Consumption Tax, on the value added to goods and services; certain items are exempt	
Standard rate	15%
Telephone services, cards and instruments	25%
Tourism sector	
Hotels previously operating under the Hotel Incentives Act (HIA), but which now operate under the Fiscal Incentives Act	10%
Hotels remaining under the HIA	15%
Electricity for residential premises (electricity supply in excess of 150 kilowatt hours)	15%
Electricity for commercial and industrial premises	15%
Certain commercial imports	15%
	(advance rate of 5%)
Group health insurance	15%
Exports, government supplies and services of diplomats and international agents	0%
Assets tax; on taxable value of assets	
Life insurance and other regulated entities (Effective from the 2019 tax year, the assets tax for nonfinancial institutions was abolished.)	0.25%
Property tax; on gross asset	
First JMD400,000 of asset	JMD1,000
Asset in excess of JMD400,000 up to JMD800,000; rate on excess	0.50%
Asset in excess of JMD800,000 up to JMD1,500,000; rate on excess	0.55%
Asset in excess of JMD1,500,000 up to JMD3 million; rate on excess	0.60%

Nature of tax	Rate
Asset in excess of JMD3 million up to JMD4,500,000; rate on excess	0.65%
Asset in excess of JMD4,500,000 up to JMD7 million; rate on excess	0.70%
Asset in excess of JMD7 million up to JMD12 million; rate on excess	0.75%
Asset in excess of JMD12 million up to JMD30 million; rate on excess	0.80%
Asset that exceeds JMD30 million; rate on excess	0.90%
Transfer tax, on transfers of certain Jamaican property, including land and securities	2%
Transfer tax on death for estates	1.5%
Stamp duty	Various
Social security contributions	
National insurance scheme (NIS); imposed on annual earnings (income for self-employed individuals) up to JMD3,000,000 (JMD5,000,000 as of 1 April 2022); paid by	
Employer	3%
Employee	3%
Self-employed individual	6%
National Housing Trust (NHT); paid by	
Employer, on payroll	3%
Employee, on salary	2%
Self-employed individual, on income	3%
Human Employment and Resource Training program (HEART), on total payroll if it exceeds JMD173,328 a year; paid by employer	
	3%
Education Tax, on taxable salary; paid by	
Employer, on payroll	3.5%
Employee, on salary	2.25%
Self-employed individual, on net earnings	2.25%

E. Miscellaneous matters

Foreign-exchange controls. Jamaica does not impose foreign-exchange controls.

Debt-to-equity rules. No debt-to-equity restrictions are imposed.

Foreign-controlled companies. Subsidiaries of nonresident corporations are subject to income tax on their profits at a rate of 25% for unregulated companies or 33 $\frac{1}{3}$ % for regulated companies. Withholding tax at a rate of 33 $\frac{1}{3}$ % is generally imposed on dividends remitted, unless a treaty provides a different rate.

Anti-avoidance legislation. Several anti-avoidance measures are in force. These measures generally apply to transactions between related parties that were not made at arm's length.

Employment tax credit. A person other than a regulated company may be eligible to claim a nonrefundable tax credit (referred to as an employment tax credit [ETC]), up to a maximum amount of 30% of the income tax payable for each year. The amount eligible for the ETC is the total of Education Tax, NHT, NIS and HEART

payments made by an eligible person that are declared and paid on a timely basis during the year. The ETC that may be claimed is therefore the lower of the total statutory payments during the year and 30% of the tax payable. The application of this ETC is subject to certain additional criteria. It may not be claimed against income tax chargeable on non-trading income, such as interest and dividend income. If a company that has claimed the ETC makes a distribution, it is, with respect to the ETC claimed, liable to repay as income tax 10% of the distributed amount less any tax payable by the recipient with respect to the distribution. However, if the tax payable on the distribution exceeds 10% of the amount of the distribution, no amount of the ETC is payable. In addition, the amount of the ETC repayable cannot exceed the total amount of the ETC claimed by the company.

Corporate tax credit. Effective from 1 January 2020, a body corporate subject to income tax with gross annual revenues or sales of less than JMD500 million is entitled to claim a credit of JMD375,000 against income tax payable in any tax year. Any corporate tax credit that is not claimed in the tax year cannot be credited against the income tax payable in any other tax year and cannot be refunded. The following companies are not eligible to claim the corporate tax credit:

- Building societies and societies registered under the Industrial and Provident Societies Act
- A body corporate that has been declared to be an approved developer or approved organization under the Urban Renewal (Tax Relief) Act
- A body corporate that is a developer or occupant and is entitled to benefit from tax reliefs and incentives in the First Schedule of the Special Economic Zones Act
- A body corporate that has been declared to be a recognized bauxite producer or a recognized alumina producer, or both, under the Bauxite and Alumina Industries (Encouragement) Act
- Any person entitled to benefit from the incentives in the Seventh Schedule of the Income Tax Act

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends	Interest	Royalties	Management fees
	%	%	%	%
Antigua and Barbuda (h)	0	15	15	15
Barbados (h)	0	15	15	15
Belize (h)	0	15	15	15
Canada	15/22.5 (a)	15	10	12.5
China Mainland	5	7.5	10	0
Denmark	10/15 (b)	12.5	10	10

- (a) Higher rate applies if payment is made to a company owning 10% or more of the voting stock of the payer.
- (b) Lower rate applies if payment is made to a company owning 25% or more of the capital or voting stock of the payer.
- (c) Lower rate applies if payment is made to a company owning 25% or more of the shares of the payer.
- (d) Lower rate applies to interest received by a bank recognized as a banking institution under the laws of the state from which the payment is made.
- (e) Lower rate applies if payment is made to a company owning 10% or more of the voting stock of the payer.
- (f) Lower rate applies if payment is made to a company owning 25% or more of the voting stock of the payer.
- (g) Management fees are not subject to withholding tax, but they are included in business profits. Consequently, net management fees are subject to tax in Jamaica only if the recipient has a permanent establishment there.
- (h) These are the rates under the Caribbean Community and Common Market (CARICOM) tax treaty, which the listed country has ratified.
- (i) Lower rate applies if payment is made to a company owning 25% or more of the capital of the payer.
- (j) Lower rate applies if the beneficial owner is a company that has owned directly or indirectly throughout a 365-day period the following:
- At least 20% of the voting power or capital if a resident of Jamaica is the paying company
 - At least 20% of the voting power if a resident of Japan is the paying company
- (k) Lower rate applies to amounts paid for the use of, or the right to use, industrial, commercial or scientific equipment.

A. At a glance

Corporate Income Tax Rate (%)	23.2 (a)
Capital Gains Tax Rate (%)	23.2 (a)
Branch Tax Rate (%)	23.2 (a)
Withholding Tax (%) (b)	
Dividends	20 (c)
Interest	15/20 (c)(d)
Royalties from Patents, Know-how, etc.	20 (c)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1 (e)
Carryforward	10

(a) Local income taxes (see Section D) are also imposed. The resulting effective corporate income tax rate is approximately 31% (35% for corporations with stated capital of JPY100 million or less).

- (b) Except for the withholding taxes on royalties and certain interest (see footnote [d] below), these withholding taxes are imposed on both residents and non-residents. For nonresidents, these are final taxes, unless the income is effectively connected with a permanent establishment in Japan. Royalties paid to residents are not subject to withholding tax.
- (c) Under the special law to secure funds for reconstruction related to the 11 March 2011 disasters, a special additional income tax (2.1% of the normal withholding tax due) is imposed for a 25-year period running from 1 January 2013 through 31 December 2037. As a result, the 20% withholding tax rate is increased to 20.42%, and the 15% rate is increased to 15.315%. However, this special additional income tax does not affect reduced withholding taxes under existing income tax treaties.
- (d) Interest paid to residents on bonds, debentures or bank deposits is subject to a 20% withholding tax, which consists of a national tax of 15% and a local tax of 5%. Other interest paid to residents is not subject to a withholding tax. Interest paid to nonresidents on bonds, debentures or bank deposits is subject to a 15% withholding tax. Interest paid to nonresidents on national and local government bonds under the Book-Entry Transfer System is exempt from withholding tax if certain requirements are met.
- (e) The loss carryback is temporarily suspended (see Section C).

B. Taxes on corporate income and gains

Corporate tax. Japanese domestic companies are subject to tax on their worldwide income, but nonresident companies pay taxes only on Japanese-source income. A domestic corporation is a corporation that is incorporated or has its head office in Japan. Japan does not use the “central management and control” criteria for determining the residence of a company.

Rates of corporate tax. The basic rate of national corporation tax is 23.2% for fiscal years beginning on or after 1 April 2018. For corporations with stated capital of JPY100 million or less, a tax rate of 15% applies to the first JPY8 million of taxable income. The tax rate of 15% applies for fiscal years beginning between 1 April 2012 and 31 March 2023.

Local income taxes, which are local inhabitant tax and enterprise tax, are also imposed on corporate income (see Section D). The resulting effective corporate income tax rate for companies subject to the 23.2% rate is approximately 35%. Under Business Scale Taxation (Gaikei Hyojun Kazei; see Section D), for certain corporations, the effective rate is reduced to approximately 31%.

Capital gains. In general, for Japanese corporate tax purposes, capital gains are not taxed separately. Such gains are treated as ordinary income to which normal tax rates apply. Transferor corporations in qualified reorganizations may defer the recognition of capital gains and losses arising in such transactions. Mergers, corporate spin-offs, share exchanges and contributions in kind are considered qualified reorganizations if they satisfy certain conditions.

A special surplus tax is imposed on capital gains from the sale of land located in Japan. However, this tax is suspended for sales conducted through 31 March 2023. The tax is calculated by applying the following rates, which vary depending on the length of time the property was held, to the capital gains.

Number of years held		Rate %
Exceeding	Not exceeding	
0	5	10
5	—	5

The 2009 tax reform introduced two temporary capital gains reliefs with respect to the holding of land investments. Under one of these measures, a special deduction of JPY10 million may be claimed with respect to capital gains arising from the sale of land acquired during the period from 1 January 2009 to 31 December 2010 and held for a period of five years or more, subject to certain conditions. The other measure is a capital gain deferral mechanism applicable to qualifying land acquired in the period from 1 January 2009 through 31 December 2010. This measure provides a deferral of 80% or 60% of the amount of capital gains arising from land disposed within a certain time period after the date on which the land is acquired, subject to certain conditions and filing obligations.

Administration. The tax year for a corporation is its fiscal year. A corporation must file a tax return within two months of the end of its fiscal year, paying the tax at that time. A one-month extension is normally available on application to the tax authorities. If certain conditions are met, a four-month extension is allowed. Except for newly established corporations, and corporations with a tax amount of JPY100,000 or less in the preceding year, if the fiscal year is longer than six months, the corporation must file an interim return within two months of the end of the first six months and make an advance payment at the time of filing the interim return equal to either 50% of its prior year's tax liability or 100% of its estimated tax liability for the first six months of the current year.

Dividends received/paid. Dividends received from another domestic corporation, net of any related interest expense incurred for acquisition of the shares, are generally excluded from gross income. However, if the recipient corporation owns more than 5% and up to 33 $\frac{1}{3}$ % of the domestic corporation distributing the dividends, 50% of the net dividend income is includible in gross income. If the recipient corporation owns 5% or less of the domestic corporation distributing the dividends, 80% of the net dividend income is includable in gross income. Dividends distributed by a domestic corporation are subject to a 20% (20.42%, inclusive of the 2.1% special additional income tax) withholding tax.

A foreign dividend exemption system is available for Japanese companies holding a minimum interest of 25% for a period of at least six months before the date on which the decision to distribute the dividend is made. Under certain tax treaties, the minimum holding interest can be lower than 25%, subject to certain conditions. Under the foreign dividend exemption, 95% of foreign dividends received is excluded from taxable income. No credit for withholding tax or underlying tax on the foreign dividends is available.

If foreign dividends received by a domestic corporation are wholly or partially included as deductible expenses under the laws of the country where the headquarters of the foreign subsidiary is located, such foreign dividends are excluded from the foreign dividend exemption system. If a portion of the dividends that a domestic corporation receives from its foreign subsidiary are included as deductible expenses, the domestic corporation may elect to exclude only such portion from the foreign dividend exemption system (the domestic corporation is required to attach

prescribed statements to the tax return and preserve certain documents). Foreign tax credits are available for the amount of withholding taxes imposed on dividends that are excluded from the foreign dividend exemption system.

There is a special measure that was introduced to prevent tax avoidance by producing capital losses through the transfer of subsidiary shares following the receipt of nontaxable dividends from a subsidiary.

If an entity receives a certain amount of dividends from a subsidiary over which it has a certain degree of control and if the dividends exceed an amount equivalent to 10% of the book value of such subsidiary shares, the reduction of the book value of those subsidiary shares by the amount of the dividends that are excluded from taxable income is required. The reduction of the book value decreases the amount of capital losses incurred at the time of subsidiary share transfer by an amount equivalent to the reduction in book value. "A certain degree of control" refers to a relationship in which the entity directly or indirectly owns more than 50% of shares of another entity.

However, exempted from this measure are cases in which the subsidiary is a domestic entity and 90% or more of its total shares from the time the subsidiary was incorporated to the time the control relationship was established were owned by domestic entities. This measure does not apply to cases in which total dividends are less than the amount of net increase in the retained earnings of the subsidiary after the control relationship was established and cases in which the dividends are received after 10 years since the control relationship was established. In addition, dividends of JPY20 million or less are not be subject to this measure.

Foreign tax credit. A Japanese company may be entitled to claim a foreign tax credit against both Japanese corporation tax and local inhabitant tax (see Section D). Creditable foreign income taxes for a Japanese company include foreign income taxes paid directly by a Japanese company and its foreign branches (direct tax credit). In addition, under tax treaties, a tax-sparing credit may be available to domestic companies with a branch or subsidiary in a developing country.

C. Determination of trading income

General. The tax law prescribes which adjustments to accounting income are required in computing taxable income. Expenditures incurred in the conduct of the business, except as otherwise provided by the law, are allowed as deductions from gross income.

Remuneration paid to directors cannot be deducted as an expense unless it is fixed compensation, remuneration determined and reported in advance or performance-based remuneration. The deductibility of entertainment expenses is restricted according to the size (capitalization) of the corporation (see *Entertainment expenses*). Deductions of donations, except for those to national or local governments or similar organizations, are limited.

Entertainment expenses. Entertainment expenses cannot be deducted from taxable income. However, all corporations (corporations with stated capital in excess of JPY10 billion are excluded) may deduct 50% of entertainment expenses related to meal and

drink from taxable income for fiscal years beginning on or after 1 April 2014 until 31 March 2022. Small or medium-sized corporations can choose the 50% deduction or the fixed deduction of up to JPY8 million.

Inventories. A corporation may value inventory at cost under methods such as the following:

- Actual cost
- First-in, first-out (FIFO)
- Weighted average
- Moving average
- Most recent purchase
- Retail

Alternatively, inventory may be valued at the lower of cost or market value. If a corporation fails to report the valuation method to the tax office, it is deemed to have adopted the most recent purchase price method.

Depreciation. The cost of tangible fixed assets, excluding land, may be recovered using statutory depreciation methods, such as straight-line or declining-balance. Depreciation rates are stipulated in the Japanese tax law, which provides a range of rates for each asset category based on the useful life. Depreciation for tax purposes may not exceed the amount of depreciation recorded for accounting purposes. Revised depreciation rates apply to assets acquired on or after 1 April 2007. In addition, statutory salvage value and limit of depreciation are abolished in conjunction with the introduction of the revised depreciation rates. The following are the ranges of the revised depreciation rates for the straight-line and declining-balance methods for selected asset categories.

Asset category	Straight-line		Declining-balance	
	From	To	From	To
Buildings	0.143	0.020	—	—
Building improvements	0.334	0.056	—	—
Other structures	0.334	0.013	—	—
Motor vehicles	0.500	0.050	1.000	0.100
Machinery and equipment	0.500	0.046	1.000	0.091

In the year of acquisition of specified machinery or equipment, a corporation may take additional depreciation. A corporation has the option of taking such additional depreciation or claiming the investment tax credit (see *Investment tax credit*).

Intangible assets, including goodwill, are amortized using the straight-line method over their useful lives. The useful life of goodwill is five years.

Investment tax credit. A specified small or medium-sized corporation that acquires or produces certain qualifying machinery or equipment (for use in its business within one year of acquisition) during the period of 1 June 1998 through 31 March 2023 may receive a credit against its corporate tax liability. The credit generally equals 7% of the cost or 20% of the corporate tax, whichever is less, and acts as a substitute for additional depreciation (see *Depreciation*).

Entities qualifying as specified business operators implementing 5G systems and certain other items (for example, radio transmitting facilities and switching facilities that are structured to cover whole telecommunication operation) in accordance with Certified Introduction Plans recognized under the Act to Promote the Spread of Specified Advanced Information Communication Systems that acquire and place into service certified equipment and facilities and other items (for example, production and construction) in Japan between the period from 31 August 2020 and 31 March 2022 are eligible to elect between a 30% special depreciation or 15% tax credit in relation to the acquisition cost. However, the credit is limited to 20% of the corporation tax amount in the applicable fiscal year.

For fiscal years beginning between 1 April 2021 and 31 March 2023, a corporation may claim a credit equal to 2% to 14% (12% to 17% for a small or medium-sized corporation) of total current research and development (R&D) expenditure, up to a maximum amount equal to 25% (in principle) of the corporate tax due for the relevant fiscal year. The maximum tax credit available to companies that have increased investment in R&D despite a decrease in sales above a certain level increases from 25% to 30% of corporate tax liability.

The general R&D tax credit limitation for certain startups that conduct R&D (that is, those that were established within the previous 10 years and that have net operating losses carried over into the next fiscal year) is 40% of corporate income tax liability in the applicable fiscal year.

If the R&D cost ratio (R&D costs ÷ average sales) is over 10%, a “top-up” measure can be applied to the gross-type credit maximum (25% of current year corporate tax). Depending on the R&D cost ratio (10% to 15%), the total cost incentive maximum may be increased to 35%.

In addition, tax credits relating to special open innovation R&D expenses (such as R&D expenses arising from joint research with special R&D institutions or universities) is available. The tax credit rate is 20%, 25% or 30% depending on the types of expenses. The maximum credit is 10% of corporation tax liability in the applicable fiscal year.

If a business company or a person specified by the Minister of Economy, Trade and Industry as a stock company or other similar entity that engages in certain specified business activities jointly with a certain startup company invests in a startup company that meets certain criteria through the acquisition of shares in the startup company between the period 1 April 2020 to 31 March 2022, that company is allowed to deduct 25% or less of the acquisition cost of the shares on the condition that it records that portion in its own special account. The amount invested must be at least JPY100 million (or at least JPY500 million in the case of investment in a foreign entity). There is a limit on the amount invested to which the incentive applies.

If a business company or person applies this tax incentive and later transfers the shares or fulfills certain other criteria (for example, receives dividends in the case of the dissolution of corporation that issues certain shares), an amount stipulated in

relation to the corresponding criteria in the special account must be reversed and included in taxable income. However, this does not apply if the shares have been owned for a period of five years.

Tax credits for other investments in certain fields, such as job development and environmental operation, or specific facilities are also available for certain periods. Some of these credits apply to small or medium-sized corporations only.

A new tax incentive for digital transformation investment promotion was introduced by the 2021 tax reform. Companies that conduct digital transformation activities, such as cloud system implementations, which constitute digital capital investments to transform a business pursuant to a business plan approved by the national government, can choose between a 30% special depreciation or a 3% tax credit (5% if sharing data with a non-group company) of the relevant acquisition costs. This is a temporary measure lasting two years. The maximum capital investment eligible for this tax incentive is JPY30 billion.

Under a new tax incentive introduced by the 2021 tax reform, companies that invest in facilities and equipment contributing to the reduction of greenhouse gas emissions pursuant to a business plan approved by the national government may choose between a 50% special depreciation or a tax credit of 5% (10% if certain requirements are fulfilled) of the relevant acquisition costs. This is a temporary measure lasting three years. However, if this tax credit is used together with the tax credit offered by the digital transformation investment promotion tax incentive, the total tax credit is capped at 20% of corporate tax liability for a relevant fiscal year. The maximum facility or equipment investment amount eligible for this tax incentive is JPY50 billion.

Net operating losses. Net operating losses of certain corporations may be carried forward for 10 years (9 years for losses arising until 31 March 2018), and may be carried back 1 year. Except for certain small or medium-sized corporations, the deductible amount is limited to 50% of taxable income. The loss carryback is suspended for fiscal years ending from 1 April 1992 through 31 March 2022. However, this suspension does not apply to specified small or medium-sized corporations.

Groups of companies. The Consolidated Tax Return System (CTRS) applies to a domestic parent corporation and its 100% domestic subsidiaries. A consolidated group must elect the application of the CTRS, subject to the approval of the National Tax Agency (NTA). If a consolidated group wants to terminate its CTRS election, it must obtain the approval of the NTA.

Replacing the current consolidated taxation regime, a new group income and loss-sharing regime was introduced by the 2020 tax reform and is applicable to fiscal years beginning on or after 1 April 2022. The new regime maintains the basic framework of the current consolidated taxation regime (for example, the offsetting of profits and losses) while also reflecting the consideration given to reducing the administrative workload of companies. The

design of a new regime that is better aligned with the tax rules governing corporate reorganizations, in terms of market value taxation and the restriction on utilization of net operating losses on an initial tax consolidation or entry into an existing tax group, will reduce both the number of entities subject to market value taxation and the number of entities subject to the restriction on the utilization of net operating losses.

Corporate tax law also contains special taxation for intragroup transactions in 100% groups, under which certain gains and losses are tax deferred. This taxation is separate from the CTRS or the new group income and loss-sharing regime.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Consumption tax; on a broad range of goods and services	10%
Enterprise tax	
Companies that are subject to Business Scale Taxation; Business Scale Taxation (Gaikei Hyojun Kazei) applies to companies with stated capital of more than JPY100 million; under Business Scale Taxation, a company is subject to tax on the basis of its added value, its capital amount and its taxable income	
Rate on added value	1.26%
Rate on capital amount	0.525%
Rates on taxable income	0.4% to 1.18%
Companies that are not subject to Business Scale Taxation; rates applied to taxable income	3.5% to 7.48%
Special enterprise tax; a national tax, which is levied on companies that are subject to enterprise tax; imposed on local enterprise tax liability with respect to taxable income	
Companies subject to business scale enterprise tax	260%
Companies not subject to business scale enterprise tax	37%
Local inhabitant tax, which consists of an income levy and a capital levy	
Income levy; computed as a percentage of national income tax; rate depends on the company's capitalization and amount of national income tax	7.0% to 10.4%
Capital levy; based on the company's capitalization and number of employees; annual assessments vary depending on the cities and prefectures in which the company's offices are located	JPY70,000 to JPY3,800,000

Nature of tax	Rate
Local corporate tax; a national tax, imposed on standard corporate tax liability	10.3%
Social insurance contributions, on monthly standard remuneration and bonuses	
Basic contribution, paid by	
Employer	14.97%
Employee	14.37%
Nursing insurance premium for employees who are age 40 or older, paid by	
Employer	0.90%
Employee	0.90%

E. Miscellaneous matters

Foreign-exchange controls. The Bank of Japan controls inbound and outbound investments and transfers of money. Effective from 1 April 1998, the reporting requirements were simplified.

Transfer pricing. The transfer-pricing law stipulates that pricing between internationally affiliated entities should be determined at arm's length. Entities are considered to be internationally affiliated entities if a direct or indirect relationship involving 50% or more ownership or substantial control exists. The law provides that the burden of proof as to the reasonableness of the pricing is passed to the taxpayer, and if the taxpayer fails to provide proof or to disclose pertinent information to the tax authorities, taxable income is increased at the discretion of the tax authorities. The 2011 revision of the law eliminated the hierarchy-based selection of transfer-pricing methods and allows the selection of the most appropriate transfer-pricing method in each specific case.

Under the 2019 tax reform, the discounted cash flow recognized under the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines was added as a new transfer-pricing methodology.

It is possible to apply for advance-pricing arrangements with the tax authorities. In cases in which a taxpayer has received a transfer-pricing assessment as a result of an examination, a taxpayer applying for a Mutual Agreement Procedure between Japan and the relevant treaty partner country may be granted a grace period for the payment of taxes due by assessment, including penalty taxes. The length of the grace period depends on the specific circumstances of the assessment.

Controlled foreign companies. The special provisions of income tax related to specified foreign subsidiaries of Japanese domestic companies (so-called "foreign subsidiary income inclusion taxation") are the Japanese equivalent to most jurisdictions' controlled foreign company (CFC) rules.

If a Japanese domestic company (including individuals who have a special relationship with a Japanese domestic company) owns 10% or more of the issued shares of a foreign related company of which more than 50% is owned directly or indirectly by Japanese domestic companies and Japanese resident individuals (including nonresident individuals who have a special relationship with Japanese domestic companies or Japanese resident individuals),

the income of the foreign related company must be included in the Japanese parent company's taxable income in proportion to the equity held. Losses of a foreign related company may not offset the taxable income of the Japanese parent company. To avoid double taxation, a Japanese company can claim a foreign tax credit on the corporate income tax paid by a foreign related company that is subject to CFC income inclusion.

Determination of foreign entities subject to income inclusion. The indirect ownership ratio for the determination of a foreign related company that is subject to income inclusion is calculated based on the equity ratio of a foreign entity with a chain relationship with a domestic company through the ownership of more than 50% of equity. If there is a relationship between a resident or Japanese domestic company and a foreign entity in which the resident or Japanese domestic company is able to make claim to basically all of the foreign entity's residual property, the foreign entity is included in the scope of foreign related companies and the resident or Japanese domestic company is subject to income inclusion.

Income inclusion taxation on an entity-wide basis. The foreign related companies that do not satisfy any of the economic activity criteria (business criteria, substance criteria, control criteria and location or unrelated party criteria) are subject to income inclusion on an entity-wide basis. If the tax liability ratio of a foreign related company's fiscal year is 20% or more, the company is exempt from the application of income inclusion on an entity-wide basis. The tax liability ratio is calculated on a company-by-company basis.

Partial income inclusion rules for certain income. Foreign related companies that fulfill all of the economic activity criteria are subject to partial income (passive income) inclusion. The following types of income are subject to partial income inclusion:

- Interest
- Dividends
- Consideration for securities lending, and capital gains or losses on securities
- Gains or losses from derivative trading
- Gains or losses from foreign exchange
- Consideration for the lease of tangible fixed assets
- Royalties from intangible assets
- Capital gains or losses from intangible assets and other assets

If the tax liability ratio of a foreign related company's fiscal year is 20% or more, the foreign related company is exempt from the application of partial income inclusion. The materiality threshold related to partial income inclusion is JPY20 million or less; that is, the foreign related company is exempt if its partial income inclusion is JPY20 million or less.

Income inclusion on an entity-wide basis for certain foreign related companies. Paper companies, cashbox companies and prohibited list territory companies are subject to income inclusion on an entity-wide basis. If the tax liability ratio of a foreign related company mentioned above is 30% or more for the fiscal year, the company is exempt from the application of income inclusion on an entity-wide basis.

Dividends distributed by a foreign related company cannot generally be excluded from the income inclusion added back to the Japanese parent company's taxable income. However, the following dividends received by a foreign related company can be excluded from the apportionment to the Japanese parent company's income:

- Dividends from a foreign subsidiary in which the foreign related company has held 25% or more of the total issued shares or the total voting shares for a period of at least six months. The equity ratio requirement relating to dividends excluded from the inclusion amount is 10% or more for dividends received from foreign subsidiaries whose primary business is the extraction of crude oil, oil gas, combustible natural gas or coal (collectively, fossil fuels), including businesses closely related to such extracted fossil fuels, and that possess an extraction site in a jurisdiction that has entered into a tax treaty with Japan.
- Dividends that have already been added to the Japanese parent company's taxable income as another foreign related company's income under the foreign subsidiary income inclusion taxation rules

The 2019 tax reform clarifies that local tax laws of the foreign related companies, such as those relating to tax consolidation and distributive share of partnership income, are disregarded in determining the tax liability ratio test, income inclusion or indirect foreign tax credit with respect to foreign related companies.

Debt-to-equity rules. Thin-capitalization rules limit the deduction for interest expense for companies with foreign related-party debt if the debt-to-equity ratio exceeds 3:1.

Earnings-stripping rules. Earnings-stripping rules limit the deductibility of interest paid by corporations to foreign related persons. Net interest paid to foreign related persons by a corporation in excess of 20% of its adjusted taxable income is disallowed as a tax deduction. Interest deductions disallowed under this provision are carried forward for up to seven years. If earnings-stripping rules and thin-capitalization rules both apply, the rule that results in a larger disallowance is applied.

F. Treaty withholding tax rates

For treaty jurisdictions, the rates reflect the lower of the treaty rate and the rate under domestic tax laws on outbound payments.

- (a) The treaty withholding rate is increased to 15% or 20% if the recipient is not a corporation owning at least 25% (Kazakhstan, 10%; Spain, directly 25%) of the distributing corporation for 6 months (Indonesia, 12 months).
- (b) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 50% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning directly or indirectly at least 10% of the voting shares of the payer. The 10% rate applies to other dividends.
- (c) Interest paid to a contracting state, subdivision or certain financial institutions is exempt.
- (d) Dividends are exempt from withholding tax if the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying the dividends for a period of 18 months ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The withholding tax rate of 5% applies to dividends paid to a company owning at least 10% of the voting shares of the company paying the dividends for a period of six months ending on the date on which entitlement to the dividends is determined. The 15% rate applies to other dividends.
- (e) Interest paid to a Swiss resident pursuant to debt claims guaranteed or insured by Switzerland is exempt.
- (f) The withholding rate for trademark royalties is 20%; for motion picture films and videotapes, the rate is 15%. The 12.5% rate applies to other royalties.
- (g) The withholding rate for motion picture films is 15%.
- (h) The withholding rate for motion picture films is 0% and for patent royalties is 10%.
- (i) The withholding tax on cultural royalties is exempt (Romania, 10%) and on industrial royalties is 10% (Romania, 15%).
- (j) The rate is generally 15% (Thailand, or 20%), except it is reduced to 10% for interest paid to banks.
- (k) The USSR treaty applies to Armenia, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan and Ukraine.
- (l) The withholding rate is increased to 10% (Philippines, 15%) if the recipient is not a corporation owning at least 10% of the voting shares (Philippines and Saudi Arabia, or the total shares) of the distributing corporation during the six-month (Saudi Arabia, 183-day, Portugal, 12-month) period ending on the date on which entitlement to the dividends is determined (Philippines, the day immediately preceding the date of payment of the dividends).
- (m) Dividends are exempt from withholding tax if the beneficial owner of the dividends owns directly at least 80% of the voting shares of the company paying the dividends for a period of 12 months ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning directly at least 10% of the voting shares of the payer. The 10% rate applies to other dividends.
- (n) The Czechoslovakia treaty applies to the Czech and Slovak Republics.
- (o) The 5% rate applies if the recipient of the dividends is a corporation owning at least 25% of the payer during the 6-month period immediately before the end of the accounting period for which the distribution of profits takes place. The 0% rate applies if the recipient of the dividends is a "specified parent company," as defined in the treaty. The 15% rate applies to other dividends.
- (p) The general rate is 15%. The 10% rate applies to certain types of interest payments such as interest paid to or by banks.
- (q) Loan interest paid to nonresidents is subject to a 20% withholding tax. Interest paid to nonresidents on bonds, debentures or bank deposits is subject to a 15% withholding tax.
- (r) The withholding rate for the use of, or the right to use, industrial, commercial or scientific equipment is 5%.
- (s) The 15% rate applies if the dividends are paid by a company engaged in an industrial undertaking to a company owning at least 25% of the payer of the dividends. The 20% rate applies to other dividends.

-
- (t) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The 10% rate applies in other cases.
- (u) The 0% rate applies if the beneficial owner of the dividends owns directly at least 15%, or owns at least 25% (regardless of whether ownership is direct or indirect), of the voting shares of the payer of the dividends for the six-month period ending on the date on which the entitlement to dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning directly or indirectly at least 10% of the voting shares of the payer for the six-month period ending on the date on which the entitlement to dividends is determined. The 10% rate applies to other dividends.
- (v) The 5% rate applies if the beneficial owner of dividends owns directly or indirectly at least 50% of the voting shares of the payer of the dividends for the 6-month period ending on the date on which the entitlement to dividends is determined. The 7.5% rate applies to dividends paid to a company owning directly or indirectly at least 25% of the voting shares of the payer for the 6-month period ending on the date on which the entitlement to dividends is determined. The 10% rate applies to other dividends.
- (w) The withholding tax rate on royalties is 10% under the treaty. However, the reduced rate of 5% provided in the protocol dated 19 December 2008 applies.
- (x) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met.
- (y) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 50% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined and if certain other conditions are met. The 5% rate applies to dividends paid to a company owning at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined. The 10% rate applies to other dividends.
- (z) Interest paid to a contracting state, subdivision or certain financial institutions is exempt. The 10% rate applies to other interest payments.
- (aa) Royalties are exempt from withholding tax if certain conditions are met.
- (bb) Interest is exempt from withholding tax if certain conditions are met.
- (cc) Interest paid to a contracting state or subdivision is exempt. A 5% rate applies to interest paid to banks. The 10% rate applies to other interest payments.
- (dd) Interest is exempt from withholding tax if certain conditions are met.
- (ee) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined or if the beneficial owner of the dividends is a pension fund. A 10% rate applies to other dividends.
- (ff) Dividends are exempt from withholding tax if the company receiving the dividends owns directly or indirectly at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined or if the beneficial owner of the dividends is a pension fund.
- (gg) Dividends are exempt from withholding tax if the beneficial owner of the dividends is a pension fund. A 5% rate applies to dividends paid to a company owning directly at least 15% of the voting shares of the payer for a 365-day period ending on the date on which entitlement to the dividends is determined. A 15% rate applies to dividends on shares of companies that derive at least 50% of their value directly or indirectly from immovable property. A 10% rate applies to other dividends.
- (hh) Dividends are exempt from withholding tax if any of the following circumstances exist:
- The company receiving the dividends owns directly at least 10% of the voting shares of the payer for a six-month period if the payer is a resident of Japan.
 - The company receiving the dividends owns 10% of the capital of the payer for a six-month period if the payer is a resident of Denmark.
 - The beneficial owner of the dividends is a pension fund.
- A 15% rate applies to other dividends.

- (ii) Dividends are exempt from withholding tax if the beneficial owner of the dividends is a pension fund and if such dividends are not derived from the carrying on of a business by such pension fund. A 5% rate applies to dividends paid to a company owning at least 25% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined. A 15% rate applies to other dividends. The above provisions do not limit the application of the additional tax payable in Chile.
- (jj) A 4% withholding tax rate applies to interest paid to the following:
- A bank.
 - An insurance company.
 - An enterprise substantially deriving its gross income from the active and regular conduct of a “lending or finance business” involving transactions with unrelated persons, if the enterprise is unrelated to the payer of the interest. For purposes of this clause, “lending or finance business” includes the business of issuing letters of credit, providing guarantees or providing credit card services.
 - An enterprise that sold machinery or equipment, if the interest is paid with respect to indebtedness arising as part of the sale on credit of such machinery or equipment.
 - Any other enterprise, provided that in the three tax years preceding the tax year in which the interest is paid, the enterprise derives more than 50% of its liabilities from the issuance of bonds in the financial markets or from taking deposits at interest, and more than 50% of the assets of the enterprise consist of debt claims against unrelated persons.
- A 10% rate applies to other interest payments. However, a 15% rate replaces this rate for the two-year period beginning on 28 December 2016.
- (kk) Royalties for the use of, or the right to use, industrial, commercial or scientific equipment are subject to withholding tax at a rate of 2%. A 10% rate applies to other royalties.
- (ll) Dividends and interest payments are exempt from withholding tax if the beneficial owner is a person other than an individual. A 10% rate applies to other dividend and interest payments.
- (mm) Dividends are exempt from withholding tax if the company receiving the dividends owns directly or indirectly at least 10% of voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined. A 10% rate applies to other dividends. Interest paid to a contracting state, subdivision or certain financial institutions is exempt from withholding tax. A 10% rate applies to other interest payments.
- (nn) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 25% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined or if the beneficial owner of the dividends is a pension fund. A 5% rate applies to dividends paid to a company owning at least 10% of the voting shares of the payer for the six-month period ending on the date on which entitlement to the dividends is determined. A 15% rate applies to other dividends.
- (oo) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 10% of the voting shares of the payer for the 12-month period ending on the date on which entitlement to the dividends is determined or if the beneficial owner of the dividends is a pension fund. A 5% rate applies to other dividends.
- (pp) Interest is exempt from withholding tax if certain conditions are met. A 10% rate applies to other interest payments.
- (qq) Dividends are exempt from withholding tax if the company receiving the dividends owns at least 25% (Switzerland, 10%) of the voting shares of the payer for the 365-day period ending on the date on which entitlement to the dividends is determined. A 5% (Switzerland, 10%) rate applies to other dividends.
- (rr) Interest is exempt from withholding tax if it is beneficially owned by the other contracting state, a political subdivision or local authority thereof, the central bank of the other contracting state or any institution wholly owned by the other contracting state or a political subdivision or local authority. A 5% rate (Jamaica, 10%) applies to other interest.
- (ss) The 5% rate applies if the company receiving the dividends owns at least 20% (Serbia and Uzbekistan, 25%) of the voting shares (if paid by a company of Jamaica or Serbia, capital or voting power) of the payer for the 365-day period ending on the date on which entitlement to the dividends is determined. A 10% rate applies to other dividends.

- (tt) Royalties for the use of, or the right to use, equipment is subject to withholding tax at a rate of 2%. A 10% rate applies to other royalties.
- (uu) The withholding tax rate for copyright is 0%. A 5% rate applies to other royalties.
- (vv) The 5% rate applies if the company receiving the dividends owns at least 10% of the voting shares (if paid by a company of Uruguay, capital or voting power) of the payer for the 183-day period ending on the date on which entitlement to the dividends is determined. A 10% rate applies to other dividends.
- (ww) The withholding tax rate for copyrights is 5%. A 10% rate applies to other royalties.

- (a) The general rate is 0%. The 10% rate applies to certain regulated financial services companies. The 20% rate applies to utility companies, companies in the business of importation and supply of hydrocarbon oil to Jersey, companies in the cannabis industry, and rental income, development profits and certain income derived from Jersey land. A rate of up to 20% applies to companies that are considered large corporate retailers.
- (b) See Section B.
- (c) Debt is considered short-term if it cannot exceed 364 days.
- (d) A 20% rate applies to certain interest on long-term debt if the loan agreement was entered into before 1 January 2004 by a Jersey individual and if no election is made to pay the interest gross. This rate is unlikely to be applied except in rare cases.
- (e) The 20% rate applies to patent royalties paid to individuals resident in Jersey.
- (f) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide profits excluding capital gains.

In general, all companies incorporated in Jersey are considered resident. However, a company incorporated in Jersey is considered nonresident if the company's business is centrally managed and

controlled outside Jersey in a country or territory where the highest rate at which any company may be subject to tax on any part of its income is 10% or higher and if the company is tax resident in that country or territory. A company incorporated outside Jersey is regarded as Jersey resident if its business is managed and controlled in Jersey.

Rates of corporate income tax. Jersey has a general corporate income tax rate of 0% and a rate for certain regulated entities of 10%. Utility companies, companies in the business of importation and supply of oil to Jersey, companies in the cannabis industry, and rental income, development profits and certain profits derived from Jersey land are subject to income tax at a rate of 20%.

Effective from the 2018 year of assessment, large corporate retailers (as defined) are subject to tax at a rate of 20% on their assessable profits if their annual taxable profits are above GBP500,000, with tapering relief on profits between GBP500,000 and GBP750,000.

Regulated entities subject to the 10% tax rate are certain financial services companies that are registered or hold a permit in accordance with various laws administered by the Jersey Financial Services Commission and operate through a permanent establishment in Jersey. These companies include the following:

- Entities carrying out banking business, trust business or investment business
- Fund administrators or custodians

The definition of a “financial services company” was widened from 2018 and includes the following:

- Companies registered under the Financial Services (Jersey) Law 1998 to carry out general insurance mediation business.
- Companies registered as a registrar of companies with the Jersey Financial Services Commission.
- Companies holding a permit under the Insurance Business (Jersey) Law 1996.
- “Finance companies,” which are companies engaged in the provision of credit or financing to customers. In this context, customers do not include related parties and, as a result, intra-group finance companies are not generally subject to tax at 10%.

The 10% rate applies to such financial services business conducted through a Jersey company or a branch.

Unless certain conditions are met, an agent or tenant must deduct tax at a rate of 20% before paying rent on a Jersey property to a nonresident landlord.

International Business Companies. The International Business Company status was abolished, effective from 1 January 2012.

Exempt companies. Jersey’s former exempt company status was abolished, effective from the 2009 year of assessment. An alternative exemption regime for eligible investment schemes was introduced from 2010. However, because of the existence of the 0% tax rate, this regime is rarely used.

Capital gains. Jersey does not impose a tax on capital gains.

Economic substance. Economic substance requirements have been introduced and are effective for accounting periods beginning on or after 1 January 2019. The requirements apply to Jersey tax resident companies, regardless of their country of incorporation. Companies carrying on any of the following types of business are required to meet the economic substance test:

- Banking
- Insurance
- Fund management
- Finance and leasing
- Headquarters
- Shipping
- Holding company
- Intellectual property holding
- Distribution and service center

The economic substance test looks at whether a company is directed and managed in Jersey (different from management and control), whether it has adequate expenditure, physical assets and employees in Jersey and whether the company is undertaking its core income-generating activities in Jersey.

Penalties for failing to meet the economic substance test range from financial penalties of up to GBP100,000 to strike off (dissolution of company at the instigation of the Jersey Financial Services Commission) and exchange of information.

Administration. Corporate income tax returns must be filed by midnight on 31 December in the year following the year of assessment. A GBP300 penalty is imposed for a failure to file or the late filing of tax returns. If the return is not delivered within three months of the deadline, a further penalty of GBP100 applies for each month thereafter the return remains undelivered, up to a maximum of nine months. Assessments are normally issued to taxpayers in the year following the year of assessment (the Jersey fiscal year coincides with the calendar year).

From 2020 (the 2019 year of assessment), companies (other than large companies) are required to pay an installment payment on account by 31 May with the balance due on 30 November. Large companies are required to make an installment payment on account by 31 March with the balance due on 30 September. A large company is defined as a company whose income tax liability exceeds GBP500,000 for each of the two years preceding the year of assessment with respect to which an installment is being made. The payment that must be made by the installment date is 50% of the company's estimated liability. The final balance of tax is then payable by the balance due dates specified above. A 10% surcharge is imposed on any outstanding tax liability if tax remains unpaid as of the deadlines mentioned above.

The basis of assessment for trading is profits arising in the current accounting period.

Although no statutory clearance mechanism exists, on specific request, the tax authorities provide advance rulings on the Jersey tax treatment of transactions if the tax treatment is unclear as a result of no specific legislation or guidance on a matter.

Dividends. Dividends paid by Jersey resident companies may be deemed to be paid net of tax. The rate depends on the tax rate applicable to the profits from which the dividend was paid.

Effective from 1 January 2013, Jersey resident individuals who own more than 2% of a Jersey resident company whose profits are taxed at less than 20% are subject to tax on any value taken by them out of the company that is less than or equal to their share of specified profits. This applies to any distributions made on or after 1 January 2013. The definition of a distribution is quite broad. Before 2012, a deemed distribution regime applied.

European Union Savings Directive. All agreements related to the European Union Savings Directive have now been terminated.

Automatic exchange of information. Jersey has entered into inter-governmental agreements (IGAs) with the United Kingdom and the United States, and has also adopted the Common Reporting Standard (CRS). The UK IGA has been replaced by the CRS, but transitional rules were introduced. These transitional rules ensure that certain requirements set out under the UK IGA remain applicable.

Foreign tax relief. Jersey has entered into full double tax treaties with Cyprus, Estonia, Guernsey, the Hong Kong Special Administrative Region (SAR), Isle of Man, Liechtenstein, Luxembourg, Malta, Mauritius, Qatar, Rwanda, Seychelles, Singapore, the United Arab Emirates and the United Kingdom. It has entered into limited treaties with Australia, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Iceland, New Zealand, Norway, Poland and Sweden. The arrangements with Guernsey and the United Kingdom give credit for tax on all sources of income.

Unilateral relief applies for income that is not covered by a tax treaty to the extent of taxing foreign income net of foreign taxes suffered.

Jersey has entered into various tax information exchange agreements (TIEAs) and some limited double tax agreements (see above). The TIEAs provide for the exchange of information between tax authorities, on request, with respect to the tax position of resident persons. The limited double tax agreements provide for the allocation of taxing rights with respect to certain income derived by individuals and enterprises operating ships and aircraft in international traffic.

C. Determination of trading income

General. The amount assessable is based on the accounting profit, adjusted for tax purposes.

Revenue expenses incurred wholly and exclusively for the purposes of a trade or the managing of investments are deductible.

Inventories. No statutory rules prescribe which methods of stock valuation are acceptable. Under International Financial Reporting Standards, inventory is normally valued at the lower of cost or net realizable value.

Provisions. Only provisions relating to specific expenses are allowed as deductions.

Tax depreciation (capital allowances). Capital allowances, normally at 25% of the declining balance, are given on capital expenditure incurred to acquire machinery or plant to be used wholly and exclusively for the purposes of the trade.

Capital allowances are calculated on a pool of assets. A balancing charge is imposed if the proceeds from the sale of an asset (limited to the cost of the asset) exceed the written-down tax value of the pool or if the business is terminated.

Groups of companies. A qualifying company that suffers a loss may surrender the loss to another qualifying company in the same group. The company receiving the loss can then offset the loss against its profits or gains. The loss can be offset only against profits or gains determined for an accounting period that is the same as, or overlaps with, the financial period in which the loss arises. For these purposes, a qualifying company is a regulated entity that is taxed at a rate of 10% (see Section B).

Companies taxed at 0% that are part of a group may also surrender losses to offset the profits of another company taxed at 0% in the group.

Relief for losses. Companies subject to tax at the 0% or 10% rates can relieve losses by carrying the losses forward and offsetting them against future profits or by surrendering losses under the group relief measures (see *Groups of companies*).

Losses incurred by companies subject to tax at a rate of 20% may be used to offset either income for the year in which the losses were incurred or profits derived from the same trade in the immediately preceding year of assessment. Unused losses may be carried forward, without time limit, to offset income from the same trade for any subsequent year of assessment.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Social security contributions; on salaries of employees resident in Jersey (the 2022 amounts are shown); payable by Employer (maximum monthly contribution for each employee of GBP309.66) (Employers are required to pay an additional contribution of 2% on the earnings of employees above GBP4,764 and up to GBP21,724 per month.) Employee (maximum monthly contribution of GBP285.84)	6.5 6
Goods and services tax; on domestic supplies of goods and services; an exception applies to certain entities that are able to elect for a fee to have International Services Entity status	5

Nature of tax	Rate (%)
Land transaction tax; applies to the sale of shares in a company that give the owner of the shares the right to occupy a dwelling; the tax is the equivalent to the stamp duty levied on the sale of freehold property; a GBP80 charge also applies; the rate is reduced for reduced rate properties (below GBP700,000) and first-time buyers; other charges may also apply	0.5 to 9.5

E. Miscellaneous matters

Anti-avoidance legislation. The Income Tax (Jersey) Law contains a general anti-avoidance provision. The Comptroller may make assessments or additional assessments to counteract transactions if the primary purpose is the avoidance or reduction of income tax.

Foreign-exchange controls. Jersey does not apply any form of exchange controls, and capital can be freely repatriated.

Related-party transactions. No special legislation applies to related-party transactions.

Debt-to-equity rules. Jersey does not impose debt-to-equity requirements.

Transfer pricing. Jersey's law does not include transfer-pricing rules. However, see *Anti-avoidance legislation*.

A. At a glance

Corporate Income Tax Rate (%)	35 (a)
National Contribution Tax Rate (%)	7 (a)
Capital Gains Tax Rate (%)	35 (a)
Branch Tax Rate (%)	35 (a)
Withholding Tax (%)	
Dividends	0 (b)
Interest	5/7/10 (c)
Other Payments to Nonresidents	10 (d)
Branch Remittance Tax	0 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This is the maximum rate. For a listing of rates and further details, see Section B.
- (b) See Section B for details on the domestic tax treatment of distributions of dividends.
- (c) This withholding tax is imposed on interest paid by banks to depositors (excluding interest paid on local interbank deposits). In addition, a national contribution tax ranging from 1% to 7% may apply. For further details, see Section B.
- (d) In addition to the 10% withholding tax, payments made to nonresident individuals in excess of JOD200,000 are subject to a 1% national contribution tax, and payments made to nonresident corporate entities are subject to a national contribution tax at rates ranging from 1% to 7%. For further details, see Section B.

- (e) Jordan's income tax law is silent on whether profit distributions made by a branch to its foreign head office are subject to tax (with the exception of banks), and the matter is currently under debate. If profit distributions are taxable, it is expected that the same rates and principles applicable to payments made to nonresidents would apply. For further details, see footnote (d) above.

B. Taxes on corporate income and gains

Corporate income tax. In general, income tax is levied on corporate entities and foreign branches with respect to all income earned in, or derived from, Jordan, regardless of where the payment is made, and on income generated from investing Jordanian capital outside Jordan.

Rates of corporate tax. Corporate income tax in Jordan is imposed at flat rates. Rates for resident corporations vary from 20% to 35%, depending on the type of sector. The following are the corporate income tax rates for the various sectors.

Sector	Rate (%)
Banking	35
Electricity generation	24
Basic mining companies	24
Finance, financial intermediaries and financial leasing	24
Telecommunication	24
Insurance and reinsurance	24
Other	20

In addition, a tax rate of 10% applies to the net income of Jordanian companies' foreign branches and net income realized by residents of Jordan from foreign sources, if such income is generated from Jordanian monies or deposits.

National contribution tax. A national contribution tax is imposed on taxable income of all corporate entities and foreign branches in Jordan. The national contribution tax rates vary from 1% to 7%, depending on the type of sector. The following are the national contribution tax rates for the various sectors.

Sector	Rate (%)
Basic mining companies	7
Finance, financial intermediary and financial leasing	4
Banking	3
Electricity generation	3
Telecommunication	2
Insurance and reinsurance	2
Other	1

The above national contribution tax rates also apply to payments made to nonresident juridical persons at the rate applicable to the recipient's sector. For payments from Jordan to nonresident natural persons in excess of JOD200,000, the excess amount is subject to the national contribution tax at 1%.

Capital gains. Capital gains derived from the sale of depreciable assets are subject to the corporate income tax and national contribution tax rates as applicable to the type of activity in which the company engages. In addition, except for the first sale, capital gains derived from the sale of stocks or shares of

information technology companies and institutions that deal with creating, processing and storing information using electronic devices and software are subject to tax at the applicable corporate income tax rate if the sale occurs after the lapse of 15 years from the date of establishment of such companies.

Capital gains derived from the sale of shares or stocks by a juridical person are subject to capital gains tax, which is assessed using either of the following:

- A deemed profit method, whereby a tax rate ranging between 0.5% to 5% is applied on the gross sale consideration
- An actual profit method, whereby the capital gain is calculated based on the audited financial statements of the Jordanian entity in which the shares are being disposed of, at the prevailing corporate income tax and national contribution tax rates as applicable to the sector of the company in which the shares were disposed per current practice

Sales of listed shares are subject to tax at the rate of 0.08% of the transaction value payable by each party to the transaction (that is, both the buyer and the seller are each liable to pay a 0.08% tax). The tax is withheld by the financial intermediary facilitating the sale.

Administration. The tax year for corporations is their accounting (financial) year. Tax returns must be filed electronically on a prescribed form in Arabic within four months after the tax year-end.

The tax return includes a payroll listing and information pertaining to goods and services supplied for the year, including details related to the corporation's income, expenses, exemptions and tax due.

The total amount of tax due must be paid at the time of filing to avoid penalties. If a taxpayer fails to electronically submit a complete filing package using the Income and Sales Tax Department (ISTD) web portal by the filing deadline, the taxpayer will be subject to late filing penalties at JOD1,000 (approximately USD1,410) for private and public shareholding companies, and JOD300 (approximately USD423) for other entities.

The ISTD may conduct an income tax audit for up to four previous years and may assess the taxpayer additional taxes (together with the applicable penalties) during these tax audits.

Taxpayers whose gross income equaled or exceeded JOD1 million in the preceding financial year are required to make an advance tax payment within 30 days following the end of the first half of the tax year and another advance tax payment within 30 days following the end of the tax year. Each advance payment is equal to 40% of the preceding year's tax if the current year's interim financial statements are not available.

Dividends. Dividends distributed by limited liability companies, general partnerships, limited partnerships, public shareholding companies and private shareholding companies resident in Jordan are exempt from tax, except for dividends received by the following, which are subject to tax at the corporate income tax

and national contribution tax rates that correspond to the recipient's industry:

- Banks
- Main telecommunication companies
- Basic mining companies
- Insurance companies
- Reinsurance companies
- Financial intermediaries
- Financial companies and legal persons engaged in financial leasing activities

However, if a company owns at least 10% of another company's capital, distributions of profits are subject to tax at a rate not exceeding 10%.

If the recipient of the dividend income is a Jordanian entity, the lower of 25% of dividend income or the total claimed expenses of the recipient is disallowed.

Interest. Interest paid by banks to depositors, except for interest on local interbank deposits, is subject to a 7% withholding tax for corporate entities and a 5% withholding tax for natural persons. The withholding tax is considered to be a payment on account for resident companies and a final tax for individuals and nonresident companies. Interest paid from Jordan to nonresident banks and nonresident finance companies for deposits that are held in Jordan is not subject to withholding tax in Jordan. Any other type of interest (non-depository) paid to nonresidents is subject to a 10% withholding tax. Interest payments on loans from nonresidents are subject to withholding tax at 10% and a reverse general sales tax at 16%.

Interest payments subject to withholding tax are also subject to national contribution tax at the following rates:

- Interest payments made to resident entities are subject to national contribution tax at the rate applicable to the sector of the loan provider (for further details, see *National contribution tax*).
- Interest payments made to nonresident entities are subject to national contribution tax at the rate applicable to the sector of the recipient entity (for further details, see *National contribution tax*).
- For interest payments made to individuals (resident or nonresident) that are in excess of JOD200,000, the excess amount is subject to a 1% national contribution tax.

Foreign tax relief. Foreign tax relief is granted in accordance with tax treaties signed with other countries.

C. Determination of trading income

General. All income earned in Jordan from trading or other sources, except for income exempt under Jordanian legislation, is taxable.

Business expenses incurred to generate income are generally allowable, with limitations on certain items, such as entertainment and donations. A certain percentage of entertainment expenses is deductible. Head office charges are limited to 5% of the branch's net taxable income.

Provisions and reserves. Provisions and reserves are not allowed as tax deductions, except for insurance companies' reserves and doubtful debts' provisions for banks.

Tax depreciation. Regulation No. 55 of 2015 (as amended) sets out the maximum depreciation rates applicable to various fixed assets for corporate income tax purposes. If the rates used for accounting purposes are greater than the prescribed tax depreciation rates, the excess is disallowed for tax purposes. The following are some maximum straight-line depreciation rates.

Tangible assets	Rate (%)
Industrial, ordinary and temporary buildings	2/4/10
Furniture for dwelling, sleeping and work purposes, manufactured from iron, wood and fixed plastics	5
Furniture for hospitals, tourist services, hotels and restaurants	15
Other furniture	20
Means of transport	15
Computers, appliances, machinery used in production and medical equipment	35
Others machinery and equipment	20

A taxpayer is entitled to benefit from an accelerated depreciation method up to three times the straight-line amount if the taxpayer uses the accelerated-depreciation method until the asset is fully depreciated.

Machinery, equipment and other fixed assets that are imported on a temporary-entry basis (equipment that the government allows foreign contractors to import on a temporary basis for the purpose of carrying out certain contractual work in Jordan) do not qualify for the accelerated depreciation method.

Used assets are depreciated at the above statutory rates applied to the purchase price.

The following are some straight-line amortization rates.

Intangible assets	Rate (%)
Key franchising (in practice, money paid to a business owner to vacate the premises so that the payer can take over the lease)	25
Computer software and programs	50
Other intangible assets, such as goodwill, trademarks and publishing rights	10

Relief for losses. Taxpayers can carry forward unabsorbed losses up to five years to offset net profits of subsequent periods. Losses may not be carried back.

Groups of companies. The Jordanian income tax law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies. Companies must file separate tax returns and financial statements for Jordanian tax purposes.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
General sales tax (similar to value-added tax)	16
Social security contributions, on salaries and all benefits except overtime; the maximum salary subject to social security contributions is JOD3,349 for individuals joining the social security system on or after 1 March 2014 (adjusted for inflation on an annual basis); different rules regarding maximum salary apply to individuals who joined the social security system before 1 March 2014; the amount of the social security contribution is based on the employee's January salary; changes to the salary made during the year are not reflected in the employee's social security contribution until the following January; contribution paid by	
Employer	14.25
Employee	7.50
Withholding tax on the value of imports; paid on account against the taxpayer's final tax liability	2
Withholding tax on payments to nonresident service providers (also, see footnote [d] in Section A)	10

E. Miscellaneous matters

Foreign-exchange controls. The currency is the Jordanian dinar (JOD). Jordan does not currently impose any foreign-exchange controls.

Debt-to-equity rules. A 3:1 debt-to-equity ratio applies with respect to related-party debt. Interest paid on related-party debt exceeding this ratio is not deductible for tax purposes.

Transfer pricing. On 7 June 2021, Jordan introduced transfer-pricing rules that adopt the arm's-length principle reflected in the Associated Enterprise article of Jordan's tax treaties and in the Organisation for Economic Co-operation and Development Transfer Pricing Guidelines for Multinational Enterprises (MNEs). The rules also introduce new compliance requirements for Jordanian entities that engage in related-party transactions with an annual value exceeding JOD500,000 (approximately USD705,000) for any reporting period ending after 7 July 2021.

The following are the specific requirements:

- A transfer-pricing disclosure form to be submitted with the annual income tax return (that is, within four months after the end of the fiscal year)
- A Master File on the global business operations and transfer-pricing policies of the taxpayer's MNE group to be submitted within a period not exceeding 12 months following the tax period
- A Local File containing information on all transactions with related parties to be submitted within a period not exceeding 12 months following the tax period

The taxpayer also needs to present a signed affidavit from the taxpayer's appointed chartered accountant confirming the taxpayer's compliance with the group's transfer-pricing policy and detailing the impact of such policy on its financial statements.

Members of an MNE group also need to submit a Country-by-Country Report within 12 months following the end of the group's tax period if the total consolidated revenue in the group financial statements exceeds JOD600 million (approximately USD846 million).

F. Tax treaties

Jordan has entered into double tax treaties with Algeria, Azerbaijan, Bahrain, Bulgaria, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iran, Italy, Korea (South), Kuwait, Lebanon, Malaysia, Malta, Morocco, the Netherlands, Pakistan, the Palestinian Authority, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, Ukraine, the United Arab Emirates, the United Kingdom, Uzbekistan and Yemen.

In addition, Jordan has entered into tax treaties, which primarily relate to transportation, with Austria, Belgium, Cyprus, Denmark, Italy, Pakistan, Spain and the United States.

The following is a table of treaty withholding tax rates.

	Dividends	Interest	Royalties
	%	%	%
Algeria	15	15	15
Azerbaijan	8	8	10
Bahrain	10	10	10
Bulgaria	10	10	10
Canada	10/15	10	10
Croatia	10	10	10
Czech Republic	10	10	10
Egypt	15	15	20
France	5/15	0/15	5/15/25
India	10	10	20
Indonesia	10	10	10
Iran	5/7.5	5	10
Italy	10	10	10
Korea (South)	10	10	10
Kuwait	5/10	5	30
Lebanon	10	10	10
Malaysia	10	15	15
Malta	10	10	10
Morocco	10	10	10
Netherlands	15	5	10
Pakistan	10	10	10
Palestinian Authority	— *	— *	— *
Poland	10	10	10
Qatar	10	5	10
Romania	15	12.5	15
Saudi Arabia	5	5	7
Sudan	15	15	15
Syria	10	10	18
Tajikistan	10	10	10
Tunisia	— *	— *	— *

	Dividends	Interest	Royalties
	%	%	%
Turkey	10/15	10	12
Ukraine	10	10	10
United Arab Emirates	7	7	10
United Kingdom	10	10	10
Uzbekistan	7/10	10	20
Yemen	10	10	10

* The treaty does not provide for a maximum withholding tax rate.

Interest	15 (c)
Royalties from Patents, Know-how, etc.	15 (c)
Capital Gains	15 (c)
Other Income	20

Net Operating Losses (Years)

Carryback	0
Carryforward	10

- This tax is imposed on the taxable profits of permanent establishments after deduction of corporate income tax.
- This withholding tax applies to dividends paid to nonresident legal entities. Dividends paid to resident legal entities are generally exempt from tax (with some exceptions).
- A 20% withholding tax rate applies to Kazakh-source income paid to entities registered in tax havens.

B. Taxes on corporate income and gains

Corporate income tax. Kazakhstan legal entities and foreign legal entities operating through a permanent establishment are subject to tax. The definition of “permanent establishment” is generally similar to the definition in the model treaty of the Organisation for Economic Co-operation and Development, without the standard exemptions but with certain peculiarities. Kazakhstan tax-resident legal entities are subject to tax on their worldwide income. Taxable income of controlled foreign companies (CFCs) and permanent establishments of CFCs (including those registered in tax-haven countries) is subject to tax in accordance with special rules. Nonresident legal entities are subject to tax on income from Kazakh sources that are earned through a permanent establishment.

Rates of corporate tax. The regular corporate income tax rate is 20%. This rate applies to Kazakhstan companies, including enterprises with foreign participation (joint ventures) and companies with 100% foreign participation, and permanent establishments of foreign companies.

Permanent establishments are also subject to a 15% branch profits tax on their profits after deduction of corporate income tax. The 15% branch profits tax is imposed regardless of whether the profits are remitted to the home country of the permanent establishment. The branch profits tax rate may be reduced by an applicable double tax treaty.

Payments to foreign or nonresident legal entities without a permanent establishment are subject to withholding tax. The rate is 15% for dividends, interest, royalties, capital gains and insurance premiums. For reinsurance premiums and international transportation services, the rate is 5%. For all other payments, the rate is 20%. The rate is 20% for payments of any type of Kazakh-source income to tax-haven entities. The withholding tax rates may be reduced by an applicable tax treaty.

Taxation of subsurface users. Businesses engaging in the exploration and extraction of mineral resources in Kazakhstan (usually referred to as subsurface users under Kazakhstan law) operate under subsurface use contracts. The taxation under such contracts differs from the standard regime.

Tax incentives. Expenditure on certain qualifying fixed assets can be deducted in the first three years after commissioning, with each deduction equaling one-third of the initial value of the asset. Alternatively, it can be deducted in full in the tax year in which the expenditure is incurred.

Special-Economic Zones. The Kazakhstan Tax Code provides certain tax benefits for entities carrying out their activities in a special-economic zone in Kazakhstan. These tax benefits generally include a reduction of the corporate income tax payable by 100% and exemptions from land and property taxes and payments for the use of land plots. In addition, an exemption from social tax may be applied by entities carrying out their activities in the Innovation Technology Park special-economic zone. Also, sales of goods to entities in special-economic zones may be subject to value-added tax at a 0% rate if certain conditions are met. The tax benefits may be claimed by entities that meet certain requirements established by the Tax Code.

Other incentives. Tax benefits that are similar to the special-economic-zone benefits are provided to entities outside special-economic zones that carry out priority investment projects based on investment agreements concluded with the government. Certain requirements and conditions must be met.

Capital gains. Capital gains are included in taxable profit and subject to tax at the regular corporate income tax rates. For non-residents, certain capital gains are taxed by withholding tax.

Administration. The tax year is the calendar year.

Legal entities must make advance payments of tax on or before the 25th day of each month. These payments are generally based on the estimated income and corporate income tax due for the current year. Annual tax returns must be filed by 31 March of the year following the tax year. Corporate income tax due generally must be paid within 10 calendar days after the deadline for filing annual tax returns. The following legal entities are not required to make advance payments of tax:

- Taxpayers that had adjusted aggregate annual income not exceeding 325,000 monthly calculation indices (this index is established annually) in their antepenultimate tax year
- Taxpayers in their year of registration and in the following year

Dividends. Dividends paid to nonresident legal entities are subject to withholding tax at a rate of 15% (for legal entities from tax-haven countries, a 20% rate applies). Dividends paid to resident legal entities are generally exempt from withholding tax (with some exceptions). Dividends received by resident legal entities are generally exempt from corporate income tax (with some exemptions).

For purposes of the Tax Code, resident legal entities are legal entities created in accordance with Kazakhstan legislation and legal entities with their place of effective management (actual management body) located in Kazakhstan.

Foreign tax relief. A foreign tax credit is available for foreign tax paid on income earned abroad, unless such income is exempt from tax in Kazakhstan. The amounts that may be offset are determined for each country separately and equal the lowest amount of the following:

- The amount actually paid in a foreign state on income received by a taxpayer outside of Kazakhstan

- The amount of income tax on income received by a taxpayer outside Kazakhstan, calculated in accordance with the Tax Code and the provisions of an international treaty

C. Determination of taxable income

General. Under accounting legislation, large business entities, financial institutions, joint stock companies and certain other companies must prepare their financial reporting in accordance with International Financial Reporting Standards (IFRS). Other entities may choose to prepare their financial reporting in accordance with IFRS. Entities that do not choose to follow IFRS must prepare their financial reporting in accordance with National Accounting Standards.

In general, taxable profit equals the difference between annual aggregate income and allowable deductions. Income and expenses in accounting records generally serve as the basis for the calculation with adjustments.

In general, under the Tax Code, all actually incurred and properly documented expenses related to activity aimed at generation of revenues are deductible, unless the Tax Code explicitly indicates that a certain expense is nondeductible.

Interest (in certain cases, the amount actually paid within the amount of accrued interest expense) is deductible up to an amount calculated on the basis of the following formula:

$$(A + E + F) + \left[\left(\frac{OC}{AL} \right) \times (MC) \times (B + C + D) \right]$$

The following are descriptions of the items contained in the above formula:

- “A” is the amount of the interest, excluding amounts included in values B, C, D, E and F.
- “B” is the amount of interest payable to a related party, excluding amounts included in values E and F.
- “C” is the amount of remuneration payable to persons registered in a state with a preferential tax regime (tax haven), excluding amounts included in value B.
- “D” is the amount of interest payable to an independent party with respect to loans granted against a deposit of a related party (D1) or against a secured guarantee, surety bond or other form of security provided by a related party in the event of the enforcement of the guarantee, surety bond or other form of security in the reporting period (D2), excluding amounts included in value C.
- “E” is the amount of remuneration for credits (loans) issued by a credit partnership established in Kazakhstan and/or by a bank that is a national development institution controlled by the National Management Holding.
- “F” is the amount of interest in the form of a discount or coupon (including the discount or premium from the cost of the initial placement and/or the acquisition cost) on debt securities of fully owned subsidiaries held by the parent company that is a national company fully owned by the National Management Holding and interest on loans received by fully owned subsidiaries from the parent company that is a national company fully owned by the National Management Holding.

- “MC” is the marginal coefficient – seven for financial institutions and four for others.
- “OC” is the average annual amount of owners’ capital.
- “AL” is the average annual amount of liabilities.

The amount of interest in excess of the amount calculated under this formula is not deductible.

Subsurface users (see Section B) may deduct in the form of depreciation deductions expenses incurred during the exploration period on geological studies, exploration and preparation work for the extraction of mineral resources, including expenses for assessment, expenses for equipping, general administrative expenses and expenses connected with the payment of bonuses. Subsurface user operations are works related to geological studies and to the exploration and production of natural resources. Enterprises begin to calculate depreciation when the extraction of mineral resources begins after commercial discovery. They may set the annual depreciation rate at their discretion, but the rate may not exceed 25%.

Provisions. Banks and insurance companies may deduct provisions for doubtful and bad debts created in accordance with IFRS in the order established by the National Bank of Kazakhstan and agreed to by the authorized state body. Other entities may generally deduct actual bad debts that are three years past due if certain other conditions are met.

Tax depreciation. Buildings may be depreciated using an annual declining-balance rate of up to 10%. The maximum annual declining-balance depreciation rate for machinery and equipment (with the exception of machinery used in the oil and gas extraction industry) is 25%. The maximum depreciation rate for computers and software is 40%. Other fixed assets not included in the above categories are depreciated at a rate of up to 15%. Depreciation rates for subsurface users may be doubled in the tax year in which fixed assets are first placed into service in Kazakhstan if these fixed assets are used in the business for at least three years.

Relief for losses. Enterprises may generally carry forward tax losses from business activities to offset annual taxable profits in the following 10 tax years. Loss carrybacks are not allowed.

Groups of companies. The Tax Code does not include any measures permitting related enterprises to offset profits and losses among group members.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on supplies of goods, work and services that are considered to be supplied in Kazakhstan, as well as on imports of goods	
Standard rate	12
Exports of goods	0

Nature of tax	Rate (%)
Value-added tax; imposed on electronic trade of goods and provision of services to individuals by foreign companies in electronic form	12
Export duties on certain types of goods (for example, crude oil and specified oil products); the duty is calculated as a specific percentage of the customs value, with a minimum duty of a specified amount of euros or US dollars per unit of measurement	Various
Import duty on certain goods; the duty is calculated as a specific percentage of the customs value, with a minimum duty of a specified amount of euros or US dollars per unit of measurement	Various
Excise taxes on certain goods; the tax is calculated as a specified amount of tenge per unit or a specified percentage of the customs value	Various
Property tax; imposed on annual average balance-sheet value of immovable property	1.5
Payroll taxes Personal income tax, payable by employee; calculated at a flat general rate	10
Social tax, paid by employer; calculated at a flat rate	9.5
Pension fund contributions; withheld from employees' salaries; the maximum base used to calculate the monthly contributions is KZT3 million(approximately USD6,905)	10
Additional professional pension fund contributions; paid by employers for employees working in hazardous health conditions (according to a list of professions); calculated at a flat rate	5
Social insurance contributions paid by employers and self-employed individuals; the base used to calculate the monthly contributions may not exceed KZT420,000 (approximately USD967)	3.5
Medical insurance contributions paid by employers and self-employed individuals; the base used to calculate the monthly contributions may not exceed KZT600,000 (approximately USD1,381)	3
Rent tax on crude oil and gas condensate for export	0 to 32
Percentage rates	0 to 32

Other taxes include land tax and vehicle owners' tax.

E. Miscellaneous matters

Foreign-exchange controls. The currency in Kazakhstan is the tenge (KZT).

The principal measures governing foreign-exchange controls in Kazakhstan are the Law on Currency Regulations and Currency Control and the resolutions of the National Bank of Kazakhstan. The foreign-exchange control system operates largely through the following two sets of rules:

- Rules for residents (that is, Kazakhstan citizens and foreign citizens having a Kazakh residency permit, Kazakhstan legal entities (except international organizations), representative offices and branches of Kazakhstan legal entities, international organizations located in Kazakhstan (in case their residency status is established by international agreement), Kazakhstan foreign establishments, branches of foreign financial organizations with the right to perform banking and/or insurance activities in Kazakhstan and branches (representative offices) of foreign nonfinancial organizations that are permanent establishments of such foreign nonfinancial organizations in Kazakhstan)
- Rules for nonresidents (that is, foreign citizens, foreign legal entities and organizations, as well as their branches [representative offices]) without permanent establishments in Kazakhstan, branches (representative offices) of foreign nonfinancial organizations for which the status of nonresident is established by the terms of relevant agreements, international organizations, and diplomatic and other official representative offices of foreign countries

In general, payments between residents may only be made in tenge.

Under the Civil Code, an obligation between two residents may not be denominated in foreign currency, with certain exceptions. This rule generally does not apply to contracts between residents and nonresidents.

Transfer pricing. The Transfer Pricing Law strengthens controls over prices used by taxpayers in cross-border transactions and certain domestic transactions related to cross-border transactions. The law does not differentiate between related and unrelated parties in applying transfer-pricing controls (for example, no price deviation allowed for unrelated parties). The law contains extensive transfer-pricing documentary and monitoring requirements that include, among other items, industry, market, functional and risk analysis. Under the law, the following methods may be used to determine the market price:

- Comparable uncontrolled price method
- Cost-plus method
- Subsequent resale price method
- Profit-split method
- Net margin method

F. Treaty withholding tax rates

The following table lists the withholding tax rates under Kazakhstan's tax treaties.

	Dividends	Interest	Royalties
	%	%	%
Armenia	10	10	10
Austria	5/15 (a)	10	10
Azerbaijan	10	10	10
Belarus	15	10	15
Belgium	5/15 (a)	10	10
Bulgaria	10	10	10
Canada	5/15 (a)	10	10

Netherlands	5/15 (a)	10	10
North Macedonia	5/15 (b)	10	10
Norway	5/15 (a)	10	10
Pakistan	12.5/15 (a)	12.5	15
Poland	10/15 (c)	10	10
Qatar	5/10 (a)	10	10
Romania	10	10	10
Russian Federation	10	10	10
Saudi Arabia	5	10	10
Serbia	10/15 (b)	10	10
Singapore	5/10 (b)	10	10
Slovak Republic	10/15 (e)	10	10
Slovenia	5/15 (b)	10	10
Spain	5/15 (a)	10	10
Sweden	5/15 (a)	10	10
Switzerland	5/15 (a)	10	10
Tajikistan	10/15 (e)	10	10
Turkey	10	10	10
Turkmenistan	10	10	10
Ukraine	5/15 (b)	10	10
United Arab Emirates	5/15 (a)	10	10
United Kingdom	5/15 (a)	10	10
United States	5/15 (a)	10	10
Uzbekistan	10	10	10
Vietnam	5/15 (f)	10	10
Non-treaty jurisdictions	15 (g)	15 (g)	15 (g)

- (a) The lower rate applies to dividends paid to companies owning at least 10% of the payer.
- (b) The lower rate applies to dividends paid to companies owning at least 25% of the payer.
- (c) The lower rate applies to dividends paid to companies owning at least 20% of the payer.
- (d) The lower rate applies to dividends paid to companies owning at least 15% of the payer.
- (e) The lower rate applies to dividends paid to companies owning at least 30% of the payer.
- (f) The lower rate applies to dividends paid to companies owning at least 70% of the payer.
- (g) For payments to entities registered in tax havens (according to a list), the rate is 20%.

- (a) A gain on the transfer of securities traded on any securities exchange licensed by the Capital Markets Authority is exempt from capital gains tax. Gains derived from the transfer of property by an insurance company other than property connected to life insurance business is subject to capital gains tax.
- (b) This rate applies to dividends paid to nonresidents. A 5% rate applies to dividends paid to residents or citizens of other states in the East African Community.
- (c) This rate applies to payments to residents and nonresidents. However, a 25% withholding tax rate applies to interest arising from bearer instruments. In addition, a 5% withholding tax applies to interest paid by any Special Economic Zone enterprise, developer or operator to a nonresident person.
- (d) This rate applies to payments to nonresidents. A 5% withholding tax is imposed on royalties paid to residents.
- (e) This rate applies to payments to nonresidents. For insurance commissions paid to residents, a 5% withholding tax rate applies to payments to brokers and a 10% rate applies to payments to others. The following commissions are exempt from withholding tax:
- Commissions paid to nonresident agents with respect to flower, fruit or vegetable auctions
 - Commissions paid by resident air transport operators to nonresident agents to secure tickets for international travel
 - Commissions or fees paid or credited by insurance companies to other insurance companies
- (f) This rate applies to management, professional and training fees paid to nonresidents. However, for consultancy fees, payments to citizens of other East African Community countries are subject to a reduced withholding tax rate of 15%. For residents, management, professional and training fees are subject to a withholding tax rate of 5%. The resident withholding tax rate for contractual fee payments is 3%. For management, training or professional fees paid by contractors in the petroleum industry to nonresident persons, the rate is 12.5%.
- (g) Payments made by film agents and film producers approved by the Kenya Film Commission to approved actors and crew members are exempt from withholding tax.
- (h) This withholding tax applies only to payments to nonresidents. The withholding tax rate applicable to payments made to resident persons as rent, premium or similar consideration for the use or occupation of immovable property is 10%.
- (i) This rate applies to rent paid to nonresidents under leases of machinery and equipment. Rent paid to residents under leases of machinery and equipment is exempt from withholding tax. In addition, leasing of aircrafts, aircraft engines, locomotives or rolling stock is exempt from withholding tax.
- (j) The net gain derived on the disposal of an interest in a person is taxable as business income if the interest derives 20% or more of its value directly or indirectly from immovable property in Kenya.
- (k) This rate applies to payments to nonresidents. A 5% withholding tax is imposed on natural resource royalties paid to residents.
- (l) This rate applies to payments to nonresidents. A 20% withholding tax is imposed on winnings paid to residents.
- (m) This rate applies to payments to nonresidents. Insurance or reinsurance premiums paid for insurance for aircraft are exempt from withholding tax.
- (n) See Section C.
- (o) This withholding tax applies to payments to nonresidents. East African Community citizens are exempted from withholding tax on transportation of goods. Air and shipping transport services are exempt from withholding tax.

B. Taxes on corporate income and gains

Corporate income tax. Kenya income tax is payable by companies and by unincorporated organizations and associations (excluding partnerships). Taxable trading income consists of income arising or deemed to arise in Kenya.

Rates of corporate tax. The corporate tax rate is 30% for resident companies and 37.5% for nonresident companies.

For a company that constructs at least 100 residential units in the tax year, the tax rate is 15% for that tax year, subject to the approval of the cabinet secretary responsible for housing.

Lower corporate income tax rates apply to companies licensed under the Special Economic Zones. The rate for the first 10 years is 10%; the rate for the next 10 years is 15%; and thereafter, normal rates apply.

For a company that is engaged in a business under a special operating framework arrangement with the government, the corporate tax rate as specified in the agreement continues to apply for the unexpired period as provided in the agreement.

Minimum tax. Minimum tax is payable at the rate of 1% of the gross turnover of an entity. The tax is payable by persons whose income is not specifically exempt and whose income does not include employment income, rental income from residential property, capital gains, income from the extractive sector and income subject to turnover tax. In addition, the tax applies to persons whose installment tax is lower than the minimum tax payable for the specific year of income. Minimum tax is payable in four installments by the 20th day of the 4th, 6th, 9th and 12th months of the financial year.

In September 2021, the High Court of Kenya declared minimum tax provisions to be unconstitutional and barred the Kenya Revenue Authority (KRA) from implementing the provisions.

Administration. A company's year of assessment (tax year) coincides with its financial accounting year. A change in a financial accounting year must be approved by the Commissioner of Income Tax.

A company must make payments, each equal to 25% of its estimated tax for the year, by the 20th day of the 4th, 6th, 9th and 12th months of its financial accounting year. The estimated tax must equal either 110% of the previous year's tax or 100% of the tax estimated to be due for the current year.

A company must file a self-assessment return within six months after the end of its financial year. It must also file financial statements within six months after the end of its financial year. Late filing of a return is subject to a penalty of 5% of the tax payable for the year. The minimum penalty is KES20,000. The tax on the self-assessment, reduced by installment tax paid, is due within four months after a company's financial year-end. Late payments are subject to a penalty of 5% plus 1% per month (or part of a month) of the tax balance.

Capital gains. Capital gains tax applies to gains realized by companies and individuals on the transfer of property located in

Kenya. The general tax rate is 5%. The gain equals the amount by which the transfer value exceeds the adjusted cost of the property. The adjusted cost is the sum of the cost of acquisition of the property and other costs incurred subsequently to enhance or preserve the property, provided that such costs had not been previously allowed for tax purposes. A gain on the transfer of securities traded on any securities exchange licensed by the Capital Markets Authority is exempt from capital gains tax. In addition, an exemption from capital gains tax applies if a transfer of property is necessitated by a transaction involving the restructuring of a corporate entity or a legal or regulatory requirement, subject to specific conditions.

Dividends. Dividends paid to resident companies are exempt if the recipient controls at least 12.5% of the distributing company's voting power. Taxable dividend income is subject to a final withholding tax of 15% for nonresidents and 5% for residents.

Compensating tax arises when a company pays dividends from untaxed gains or profits. The company is charged compensating tax at the corporate tax rate of 30% on the gains or profits from which such dividends are distributed. However, compensating tax does not apply to income that is exempt under the domestic tax law.

Foreign tax relief. Relief for foreign taxes paid is granted in accordance with tax treaties with other jurisdictions. Foreign tax paid to a jurisdiction that does not have a tax treaty with Kenya qualifies as a tax-deductible expense in Kenya if the associated income is deemed to be accrued in Kenya.

C. Determination of trading income

General. Taxable income is accounting income adjusted for non-taxable income, such as dividends and capital gains, and for nondeductible expenses such as depreciation. Expenses are deductible if incurred wholly and exclusively in the production of income.

Inventories. The normal accounting basis of the lower of cost or net realizable value is generally accepted for tax purposes. In certain circumstances, obsolescence provisions may be challenged.

Provisions. Provisions included in computing financial accounting income are generally not deductible for tax purposes.

Tax depreciation. Depreciation charged in the financial statements is not deductible for tax purposes. It is replaced by tax depreciation allowances, which are calculated using the straight-line method.

The following are the depreciation rates.

Asset class	Rate (%)
Buildings used for manufacturing	50 (a)
Civil works and structures forming part of the building used for manufacturing purposes	50 (a)
Hotel buildings	50 (a)(b)
Hospital buildings	50 (a)(b)
Petroleum or gas facilities	50 (a)

Asset class	Rate (%)
Educational buildings, including student hostels	10 (b)
Commercial buildings	10
Machinery used for manufacturing	50 (a)
Hospital equipment	50 (a)
Ships or aircrafts	50 (a)
Motor vehicles and heavy earth-moving equipment	25
Computer and peripheral computer hardware and software, calculators, copiers and duplicating machines	25
Furnitures and fittings	10
Telecommunications equipment	10
Filming equipment for a local film producer	25 (b)
Machinery used to undertake operations under a prospecting right	50 (a)
Machinery used to undertake exploration operations under a mining right	50 (a)
Other machinery	10
Indefeasible right to use fiber-optic cable	10 (b)
Farm works	50 (a)

- (a) Fifty percent is claimable in the first year of use; residual value is claimed at 25% per year in equal installments in the subsequent years.
- (b) Hotel, hospital and educational buildings are required to be licensed by the competent authority. For filming equipment, the local film producer must be licensed by the Cabinet Secretary responsible for filming.

Capital allowances are subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. Amounts recaptured are treated as ordinary income and subject to tax at the regular corporate income tax rate.

Relief for losses. Tax deficits (losses) are allowable deductions in the year in which they arise and in the succeeding years of income. Profits and losses arising from specified sources (rental income, income from agriculture and similar activities, and other profits from business) are computed separately. If a company has a loss in a year from one of the specified sources, the loss may be offset only against subsequent profits derived from the same specified source.

Groups of companies. The income tax law does not permit consolidated returns combining the profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on the supply of goods and services in Kenya and on imported goods and services	0/8/16

Nature of tax	Rate (%)
Railway Development Levy; imposed on the import value of all imported goods; import value is the Cost, Insurance and Freight value	2
Contributions to the National Social Security Fund (NSSF); expatriates who are members of social security schemes in their home countries and those expected to be in Kenya for not more than three years are exempt; contributions are payable monthly by Employer (maximum contribution of KES200)	5
Employee (maximum contribution of KES200) (A new NSSF Act was enacted on 24 December 2013. Under the new act, both the employer and employee are required to contribute 6% of the employee's monthly pensionable pay subject to an upper earnings limit based on the national average earnings provided by the Kenya Bureau of Statistics. The contributions are categorized into Tier I and Tier II contributions. Tier I contributions must be remitted to the NSSF, while Tier II contributions may be remitted to a contracted-out (private) scheme. However, these contributions are not yet operational because of an Industrial Court ruling blocking the implementation of the new act.)	5
Digital services tax; payable by a nonresident person whose income from the provision of services is derived from or accrues in Kenya through a business carried out over the internet or an electronic network, including through a digital marketplace (online or electronic platform that enables users to sell or provide services, goods or other property to other users)	1.5

E. Miscellaneous matters

Foreign-exchange controls. The Central Bank of Kenya imposes certain foreign-exchange regulations.

Transfer pricing. The transfer-pricing rules include measures regarding the following matters:

- Entities and transactions to which the rules apply
- Methods that may be used to determine arm's-length prices
- Records regarding transactions that must be maintained

The methods for determining arm's-length prices are consistent with those approved by the Organisation for Economic Co-operation and Development.

Interest restriction. Interest expense for both locally and foreign controlled entities is restricted to 30% of earnings before interest, tax, depreciation and amortization (EBITDA). Therefore, any interest expense above 30% of the EBITDA is disallowed for corporation tax purposes.

In the determination of EBITDA, exempt income is excluded. In addition, interest consists of interest on all loans, all payments

equivalent to interest and expenses incurred to raise the financing.

The following local entities are not subject to the 30% EBITDA interest restriction:

- Banks or financial institutions licensed under the Banking Act
- Micro and small enterprises registered under the Micro and Small Enterprises Act, 2012

F. Treaty withholding tax rates

The withholding tax rates under Kenya's tax treaties are listed below. If the treaty rate is higher than the non-treaty rate, the non-treaty rate applies.

Payee resident in	Dividends %	Interest %	Royalties/ management and professional fees %
Canada	15	15	15
Denmark	15	20 (a)	20
France	10	12	20 (e)
Germany	15	15 (a)	15
India	10	10	10
Iran	5	10	20 (e)
Korea (South)	10 (f)	12	20 (e)
Norway	15	15 (a)	20
Qatar	10 (g)	10	20 (e)
Seychelles	5	10	10
South Africa	10	10	20 (e)
Sweden	15	15	20
United Arab Emirates	5	10	20 (e)
United Kingdom	15	15 (a)	15 (b)
Zambia	0 (c)	15	20
Non-treaty jurisdictions	15	15	20 (d)

- (a) Interest paid by the government and the Central Bank of Kenya is tax exempt.
- (b) The rate is 12.5% for management and professional fees.
- (c) No Kenya tax is due if the dividend is subject to tax in Zambia.
- (d) The withholding tax rate is 15% for consultancy fees paid to residents of other East African Community countries.
- (e) A 10% rate applies to royalties.
- (f) The rate is 8% for beneficial owners with a shareholding of at least 25%.
- (g) The rate is 5% for beneficial owners with a shareholding of at least 10%.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)(b)
Capital Gains Tax Rate (%)	25 (a)(b)(c)
Branch Income Tax Rate (%)	25 (a)(b)
Branch Profits Tax Rate (Additional Tax) (%)	— (d)
Withholding Tax (%)	
Dividends	0 (e)
Interest	14 (b)(e)(f)
Royalties from Patents, Know-how, etc.	0 (e)
Net Operating Losses (Years)	
Carryback	1 (g)
Carryforward	15 (h)

- (a) This is the maximum rate (see Section B).
- (b) Local income tax (formerly referred to as resident surtax) is also imposed at a rate of 10% of corporate income tax payable before offsetting tax credits and exemptions (see Section D).
- (c) Capital gains are included in ordinary taxable income for corporate tax purposes.
- (d) This tax is imposed on income that is remitted or deemed to be remitted by a Korean branch of a foreign corporation. The branch profits tax may be payable if the foreign company is resident in a country with which Korea has entered into a tax treaty and if the treaty requires the imposition of a branch profits tax. For a list of these countries and the rates of the tax, see Section B. The branch profits tax is imposed in addition to the income tax imposed on branches.
- (e) For payments to domestic corporations and foreign corporations with a place of business in Korea. For withholding rates applicable to payments to foreign corporations that do not have a place of business in Korea, see Section B.
- (f) The 25% rate applies to interest from noncommercial loans.
- (g) Only small and medium-sized enterprises are entitled to carry back losses.
- (h) Except for small and medium-sized enterprises and certain other companies (for example, companies under court receivership), the annual deductibility limit for loss carryforwards is 60% of taxable income for domestic corporations.

B. Taxes on corporate income and gains

Corporate income tax. Korean domestic corporations are taxed on their worldwide income, including income earned by their foreign branches. A domestic corporation is one that has its head or main office or place of effective management in Korea. Foreign corporations are taxed on Korean-source income only.

Rates of corporate income tax. The rates are indicated below.

Domestic corporations. Corporate income tax is imposed at a rate of 10% on taxable income up to KRW200 million, at a rate of 20% on taxable income in excess of KRW200 million up to KRW20 billion, at a rate of 22% on taxable income in excess of KRW20 billion up to KRW300 billion and at a rate of 25% on taxable income exceeding KRW300 billion. Local income tax (formerly referred to as resident surtax), equal to 10% of corporate income tax payable before offsetting tax credits and exemptions, is also imposed (see Section D), resulting in an effective tax

rate of 27.5% on taxable income exceeding KRW300 billion if no tax credits and exemptions are available.

Accumulated earnings tax. Korean domestic large corporations with equity capital (total assets minus total liabilities) of KRW50 billion or more and Korean corporations that are members of an enterprise group with restrictions on cross shareholding are taxed on their excess earnings at a rate of 22% (including local income tax) in addition to the above corporate income tax.

Excess earnings are calculated by applying one of two methods. Under Method A, excess earnings equal 70% of adjusted taxable income less amounts spent on investments (excluding investments in land), salary and wage increases of employees whose annual salaries and wages are less than KRW80 million, and certain other items. If the number of regular employees increased during the year, 150% of the existing regular employees' increases and 200% of the new regular employees' increases are also included in computing the deduction amount. Under Method B, the calculation is the same except that a 15% percentage is applied, and the amount spent on the investment is not deducted from the excess earnings. The computation of adjusted taxable income under the two methods are the same, except that Method A includes the add-back of depreciation and amortization expenses relating to the amount spent on the investment. The amount of adjusted taxable income considered for purposes of computing accumulated earnings tax is capped at KRW300 billion.

Foreign corporations with a domestic business operation. The same tax rates as those for domestic corporations apply.

A Korean branch of a foreign corporation is also subject to a branch profits tax, which may be imposed if the foreign company is resident in a country with which Korea has entered into a tax treaty and if the treaty requires the imposition of a branch profits tax. However, according to the reciprocal principle, branch tax is not levied if the foreign corporation's residence country (the location of the head office) does not levy the branch tax on the domestic business place of the domestic corporation. Companies resident in the following countries are subject to the branch profits tax at the rates indicated, which include the resident surtax.

Country	Rate (%)
Australia	15
Brazil	15*
Canada	5
France	5
India	15
Indonesia	10
Kazakhstan	5
Morocco	5
Panama	2
Peru	10
Philippines	11
Thailand	10

* Applicable only when Korean companies have entered Brazil.

Foreign corporations without a domestic business operation. A foreign corporation that does not have a domestic business place (that is, a "permanent establishment") in Korea is subject to the

following withholding tax rates on its Korean-source income (unless other rates apply under a tax treaty).

Type of income	Rate
Leasing income from vessels, aircraft, heavy equipment and other assets, and business income	2%
Personal services income	3%/20%*
Interest on bonds	14%
Interest on items other than bonds, dividends, royalties and other income	20%
Gain from transfer of securities or shares	Lesser of 10% of the gross sales price and 20% of net gain

* The 20% tax rate applies to income accrued from services performed in Korea. Income accrued from services performed outside Korea are subject to withholding tax at a rate of 3% if the income is deemed to have been accrued in Korea under the relevant tax treaty.

Local income surtax (formerly referred to as resident surtax) at a rate of 10% is imposed in addition to the above rates.

Domestic place of business. A foreign corporation that has any of the following fixed operations in Korea is deemed to have a domestic place of business:

- A branch, office or any other business office
- A store or any other fixed sales place
- A workshop, factory or warehouse
- A construction site or place of installation or assembly, which exists for more than six months
- A place where services are rendered through employees for more than six months during a consecutive 12-month period or a place where services are rendered recurrently or repeatedly through employees over a period of two years or more
- A mine, quarry or other location for natural resources exploitation

A fixed place of business does not include the following (also, see the next paragraph):

- A purchasing office
- A storage or custody area for property that cannot be sold
- An office involved in advertising, public relations, collecting and furnishing information, market survey, and other preparatory or auxiliary activities
- The place to maintain an asset belonging to the enterprise solely for the purpose of processing by another enterprise

Effective for fiscal years beginning on or after 1 January 2019, the above exemption applies only if the activity of the fixed place is of a preparatory or auxiliary character.

A foreign corporation that does not have a fixed place of business in Korea may be considered to have a domestic place of business if it operates a business through a person in Korea authorized to conclude contracts, perform similar activities or continuously play a principal role leading to the conclusion of contracts without material modification even without legal authority to conclude contracts on the corporation's behalf.

Tax Incentives Limitation Law. The tax exemption benefit of the high technology tax incentive, individual-type Foreign Investment

Zone (FIZ) tax incentive and Free Economic Zone (FEZ) tax incentives, which applied to foreign investors, is repealed as of 1 January 2019.

The repeal has no effect on local tax; accordingly, the tax incentives on local taxes (acquisition tax, property tax, value-added tax, special excise tax and customs duty on imported capital goods) continue to apply.

Capital gains. Capital gains are included in ordinary taxable income for corporate tax purposes.

Administration. A corporation must file a tax return within three months after the end of its fiscal year. In general, tax due must be paid at the time of submitting the tax return. However, if tax liability exceeds KRW10 million, the tax due may be paid in installments.

Dividends. A corporation must include dividends received in taxable income. However, a certain portion of dividends received by a domestic corporation from another domestic corporation are deductible from taxable income according to a formula provided in the measure entitled “Dividends Received Deduction.”

Foreign tax relief. A tax credit is allowed for corporate taxes paid to a foreign government. The foreign tax credit relief is limited to the lesser of the tax paid abroad or the Korean tax amount multiplied by the ratio of income from foreign sources to total taxable income. If a company has places of business abroad in two or more countries, it can only determine the foreign tax credit limitation on a country-by-country basis for each country individually. If the amount of the foreign tax credit is limited by this rule, the excess foreign tax paid over the limitation may be carried forward for up to 10 tax years. If a tax credit is not applied, the corporate tax paid to a foreign government may be claimed as a tax deduction (the deduction method).

C. Determination of taxable income

General. The tax law defines the specific adjustments that are required in computing taxable income. If not specified by law, the accrual basis is applied.

Inventories. A corporation must select and notify the tax office of its basis for the valuation of inventories on its first annual income tax return. It may select the cost method or the lower of cost or market value method. The cost method may be applied using any of the following methods:

- First-in, first-out (FIFO)
- Last-in, first-out (LIFO)
- Moving average
- Total average
- Individual costing (specific identification)
- Retail

If a corporation fails to notify the tax office, it must use FIFO for tax purposes.

Reserves

Reserves for employee retirement allowance. Under the Korea Labor Standards Act, employees with one year or more of service

are entitled to a retirement allowance equal to 30 days' salary or more for each year of service on termination of employment. However, a tax deduction for companies for the reserves for employee retirement allowance is no longer permitted.

A company may claim a tax deduction for the remainder of the estimated retirement allowances by funding the portion of the reserve in excess of the tax-deductible limit. The permitted funding methods specified by the tax law include the depositing of an amount equal to the excess portion in a retirement pension account with qualified institutions, such as insurance companies, banks, and the Korea Workers' Compensation and Welfare Service.

Bad debt reserve. A corporation is allowed to set up a reserve for bad debts. The maximum amount of the reserve is the greater of the following:

- 1% of the book value of receivables at the end of the accounting period
- Historical bad-debt ratio multiplied by the book value of receivables at the end of the accounting period

However, for financial institutions, the maximum amount of the reserves is the greatest of the following:

- The amount to be accumulated based on reserve guidelines issued by the Financial Services Commission in consultation with the Ministry of Strategy and Finance
- 1% of the book value of the receivables at the end of the accounting period
- Historical bad-debt ratio multiplied by the book value of receivables at the end of the accounting period

Depreciation and amortization. In general, corporations may depreciate tangible fixed assets using the straight-line, declining-balance or unit-of-production (output) depreciation methods. However, buildings and structures must be depreciated using the straight-line method. Intangible assets must be amortized using the straight-line method. A corporation must select from among the depreciation methods and useful lives specified in the tax law and notify the tax office of its selections in its first annual income tax return. Otherwise, the depreciation method and useful life designated in the tax law for the respective class of asset are applied. The following are the statutory rates of depreciation under the declining-balance method and useful lives for certain types of assets.

Asset	Annual depreciation rate under declining-balance method (%)	Years of useful life
Commercial buildings	—	20 or 40
Industrial buildings	—	20 or 40
Office equipment	45.1	5
Motor vehicles	45.1	5
Plant and machinery	45.1 to 14	5 to 20

Relief for losses. Tax losses can be carried forward for 15 years. The carryforward of tax losses is subject to an annual deductibility

limitation of 60% of taxable income for domestic corporations. The annual deductibility limitation does not apply to small and medium-sized enterprises and certain other companies (for example, companies under court receivership). The annual deductibility limitation is also 60% of taxable income for a foreign corporation's domestic place of business (for example, a branch) in Korea. Small and medium-sized enterprises may carry back losses one year.

Groups of companies. A consolidated tax return is available for a group containing a parent company and its 100%-owned subsidiaries. The consolidated tax return allows losses of group companies to be offset against profits of other group companies. The cap on deductions of losses carried forward for consolidated companies and foreign corporations is 60% of the taxable income of the company. After the parent company elects tax consolidation, it must maintain the consolidation for five fiscal years (including the first fiscal year of tax consolidation) and apply the consolidation to all 100%-owned subsidiaries.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Local income tax; levied on corporate taxable income	
Taxable income up to KRW200 million	1
Taxable income in excess of KRW200 million up to KRW20 billion	2
Taxable income in excess of KRW20 billion up to KRW300 billion	2.2
Taxable income exceeding KRW300 billion	2.5
(The above rates result in a local income tax rate of 10% of corporate income tax payable before offsetting tax credits and exemptions.)	
Value-added tax	
Standard rate	10
Acquisition tax, including surtax, on land, buildings, ships, automobiles and heavy equipment	Various
Registration license tax, including local education surtax	
Normal rate on registration of incorporation	0.48
Registration of incorporation in the Seoul metropolitan area	1.44
Withholding of payroll taxes, including local income surtax, on salaries and wages	6.6 to 49.5

E. Transfer pricing

Korea has transfer-pricing rules. The acceptable transfer-pricing methods include comparable uncontrolled price, resale price, cost-plus, profit-split, the transactional net margin method (TNMM) and other reasonable methods designated by the tax law. It is possible to reach transfer-pricing agreements in advance with the tax authorities.

A Controlling parent.

B Other shareholders.

C Industrial royalties.

D Other royalties.

(a) Reduced to 10% if repayment period is over two years.

(b) Local income surtax, which equals 10% of the corporate income tax, is included.

- (c) Reduced to 10% if repayment period is over seven years.
- (d) For royalties for trademarks, the rate is increased to 25%.
- (e) Reduced to 10% if the repayment period is more than three years.
- (f) Reduced to 5% for interest paid to banks (Most Favored Nation article is applied).
- (g) Applicable to the income of foreign corporations that do not have a place of business in Korea and to income that is not attributed to a place of business in Korea.
- (h) Reduced to 7.5% for interest paid to banks or financial institutions.
- (i) Royalties for the right to use copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting, are exempt from withholding tax.
- (j) Reduced to 5% for interest paid to banks.
- (k) Reduced to 5.5% for interest paid to banks or financial institutions.
- (l) See Section B.
- (m) Reduced to 10% for interest beneficially owned by a financial institution (including an insurance company).
- (n) Reduced to 5% for royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including software, motion pictures and works on film, tape or other means of reproduction for use in connection with radio or television broadcasting.
- (o) Reduced to 11% for interest paid on public issues of bonds or debentures.
- (p) Reduced to 0% for interest paid to the central bank or financial institutions performing functions of a governmental nature.
- (q) Under Korean tax law, the statutory withholding tax rate on dividends paid to nonresidents is 22% (inclusive of local income tax). Because the statutory withholding tax rate is less than the treaty withholding tax rate of 27.5% provided in the Korea-Philippines tax treaty, Korean-source dividends paid to residents of the Philippines are taxed at the statutory withholding tax rate of 22%.
- (r) Reduced to 7.5% in the case of technical fees.

- (a) Interest on financial instruments issued or guaranteed by a public authority of Kosovo are exempt from tax.
(b) This withholding tax applies to payments to residents and nonresidents.

- (c) Under the corporate income tax law, a “nonbusiness natural person” is a natural person without a registered business activity.
- (d) This withholding tax applies to payments to nonresidents.
- (e) If the percentage of services performed in Kosovo does not exceed 10% of the total amount of the services, the services are not subject to withholding tax.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Kosovo are companies that are established in Kosovo or have their place of effective management in Kosovo. Kosovo-resident companies are subject to corporate income tax on their worldwide income. Foreign companies are subject to tax on profits generated from activities performed through a permanent establishment in Kosovo and on income from Kosovo sources.

Rate of corporate income tax. The rate of corporate income tax in Kosovo is 10%.

Capital gains and losses. Capital gains derived from the disposal of capital assets, including real estate and securities, are subject to tax at the standard rate of 10%, together with operating income. Capital losses are deductible for tax purposes. Capital gains derived by a foreign company that does not have a permanent establishment in Kosovo to which such capital gains are attributable are not subject to tax in Kosovo.

Administration. The tax year is the calendar year.

Taxpayers must make quarterly advance payments of corporate income tax no later than 15 days after the close of each calendar quarter.

Taxpayers with annual gross income from business activities of up to EUR30,000 that do not keep books and records must make the following quarterly payments:

- 3% of each quarter’s gross income from trade, transport, agriculture and similar economic activities, but not less than EUR37.50 per quarter
- 9% of each quarter’s gross income from professional, vocational and entertainment services and similar activities, but not less than EUR37.50 per quarter
- 10% of gross rental income for the quarter reduced by any amount withheld during the quarter

Taxpayers with annual gross income from business activities in excess of EUR30,000 and taxpayers that keep books and records (including partnerships and groups of persons) must make the following advance payments for each calendar quarter:

- One-fourth of the total tax liability for the current tax period based on estimated taxable income reduced by any amount withheld during the quarter with respect to that income in accordance with the relevant legislation on corporate income tax
- For the second and subsequent tax periods, one-fourth of 110% of the total tax liability for the tax period immediately preceding the current tax period, reduced by any amount of tax withheld

By 31 March, taxpayers with annual turnover in excess of EUR30,000 and taxpayers that keep books and records must file an annual tax return and pay the corporate tax due for the tax year, less advance payments made.

Taxpayers not complying with the filing and payment deadlines described above are subject to interest and penalties.

For the second year of making quarterly advance payments and future years, no interest and penalties apply to taxpayers that calculate the advance payments based on the prior year tax liability increased by 10%.

For the first year of taxation on real income, if a taxpayer's advance payments are insufficient (below 80% of the total tax liability, including the fourth quarter instalment) compared to the total tax liability at year-end, sanctions are applied only in the last quarter of the first year, based on the cumulative installment amounts compared with annual liability, as opposed to considering the last installment as an isolated payment.

For the second year of the business and the following years, taxpayers can pay tax without incurring interest and penalties by paying advance installments based on the prior year tax liability increased by 10%. As a result, taxpayers who make insufficient payments during the year are subject to penalties applied for each quarterly installment until the submission of the annual declaration or the deadline for submission of the annual declaration.

Late filing of the corporate income tax return is subject to a penalty of 5% of the tax due for each month of delay, capped at 25% of the unpaid tax liability.

Late payment of a tax liability results in a penalty amounting to 1% of tax due for each month or part of the month in delay, up to a maximum of 12 months.

The penalties do not apply cumulatively. Instead, the late payment penalty begins to apply to the extent that the unpaid liability is not paid by the time the late filing penalty reaches its ceiling.

In addition, interest may apply on such penalties if the underlying tax liability remains unpaid for more than 120 days. Such interest accrues at a rate that is 0.5 percentage point higher than the inter-bank lending interest rate in Kosovo after a notice is issued to the taxpayer, starting from the first day of the month following the 120-day period.

Erroneous completion of a tax filing or of a tax refund claim is subject to a penalty of 15% of the undeclared tax liability or the excess tax refund claimed if such understatement or overstatement is 10% or less of such tax, or to a 25% penalty if the understatement or overstatements is more than 10% of such tax.

Dividends. Dividends received by resident and nonresident companies are exempt from corporate income tax.

Foreign tax relief. Foreign direct tax on income and gains of a Kosovo resident company may be credited against the corporate tax on the same profits. The foreign tax relief cannot exceed the Kosovo corporate income tax charged on the same profits. If a company receives income from a country with which Kosovo has entered into a double tax treaty, other forms of foreign tax relief may apply, as stipulated in the provisions of the treaty.

C. Determination of trading income

General. For taxpayers with an annual turnover exceeding EUR30,000 and taxpayers that keep books and records, the assessment of trading income is based on the financial statements prepared in accordance with the generally accepted accounting principles; International Financial Reporting Standards for large, medium and small business organizations; and Kosovo Accounting Standards for microenterprises, subject to certain adjustments for tax purposes.

All necessary and reasonable expenses incurred wholly and exclusively for the business activity that are properly documented are deductible, including health insurance premiums paid on behalf of employees and their dependents, training expenses paid by employers related to employees' work, and advertising and promotion costs, but excluding, among others, the following:

- Fines and penalties and interest related to them
- Tax losses from sales or exchanges of property between related persons
- Voluntary pension contributions made by employers above a maximum amount of 15% of an employee's gross salary
- Costs regarding acquisitions of and improvements to land
- Expenses for presents (however, presents with the name and logo of the business are part of the expenses of representation and are allowed as tax-deductible expenses)
- Losses in specific weight or substance, damages, remains (leftovers or remnants) or surplus, and destruction or demolition during production, transport or storage, beyond certain norms
- Rent for apartments serving as accommodation and lodging of resident and nonresident employees, regardless of the terms of the contract of employment or service
- Benefits in kind in the form of meals and transport tickets, unless it is organized by the business
- Expenditure covered by grants, subsidies and donations, in compliance with regulations and earning criteria (regulations related to conditions for benefiting from the grant and criteria determined by the documents of the grant, subsidy or donations documents)

Other types of expenses may be deducted up to a ceiling. These expenses include, but are not limited to, the following:

- Representation costs are deductible up to a maximum of 1% of gross annual income.
- Contributions made for humanitarian, health, education, religious, scientific, cultural, environmental protection and sports purposes are deductible up to a maximum of 10% of taxable income before deducting such contributions.

Inventories. The inventory valuation rules stipulated in the accounting law also apply for tax purposes. Inventory is valued at historical cost, which is determined by using the weighted average, first-in, first-out (FIFO) or other specified methods. The method must be applied in the year in which it has been selected and for at least three additional tax periods. Changes in the method after such period are subject to an ad hoc ruling from the Kosovo tax administration.

Provisions. Companies may not deduct provisions, except for certain levels of provisions and special reserve funds of financial institutions as specified by the Central Bank of Kosovo.

Tax depreciation. Tangible property is depreciated separately for tax purposes using the straight-line method at the rates mentioned below.

Buildings and other constructed structures are depreciated at a rate of 5%.

Vehicles, computers and information systems, office furniture and equipment, instruments and livestock are depreciated at a rate of 20%.

Plant and machinery, trains, airplanes, ships, trees and all other tangible assets are depreciated at a rate of 10%.

Acquisition costs for assets amounting up to EUR1,000 are deducted in full from business income in the current year, unless the asset functions as part of one entirety and the value of the entirety is over EUR1,000.

Intangible assets, including patents, copyrights, licenses for drawings and models, contracts, and franchises, are amortized for tax purposes using the straight-line method over the useful life of the asset. If the useful life cannot be determined, the amortization expenses are allowed for 20 years.

Exploration and development costs incurred for the extraction of natural resources and interest attributable to such costs are capitalized and amortized at the following coefficient:

$$\text{Amortization coefficient} = \frac{\text{Quantity of minerals extracted during the year}}{\text{Total estimated quantity in deposit}}$$

Relief for losses. Losses may be carried forward for four consecutive years. However, if a change in the type of business organization occurs or a change in the ownership of the company of more than 50% occurs, the remaining losses are forfeited. Loss carry-backs are not allowed.

Groups of companies. Each company forming part of a group must file a separate return. The law does not provide for consolidated tax returns or other group relief.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; exempt supplies include supply of land, welfare, financial services and insurance	
Standard rate	18
Reduced rate	8
Exports of goods and international transport	0
Real estate property tax	
Residential and commercial properties; the taxable value is the appraised value of the property after the principal residence deduction amounting to EUR150,000	0.15 to 1

Nature of tax	Rate (%)
Agricultural properties	0.15 to 0.5
Forest units' properties	0.15 to 0.3
Industrial properties	0.15 to 0.8
Mandatory social security contributions on monthly salary paid by	
Employer	5
Employee	5
Excise duties imposed on specified goods (tobacco products, natural mineral and non-carbonated water, alcoholic beverages, petrol, diesel, kerosene, fuels, lubricants, gas, cars and other motor vehicles, used tires, electric bulbs, and plastic bags); the tax is calculated as a specific amount per unit	Various

E. Miscellaneous matters

Foreign-exchange controls. Kosovo has a free foreign-exchange market. Since 2002, the euro (EUR) has been the official currency in Kosovo. All entities must properly document all of their money transfers to comply with the regulations of the Central Bank of Kosovo. No limits are imposed on the amount of foreign currency that may be brought into Kosovo. Hard-currency earnings may be repatriated after the deduction of any withholding tax.

Transfer pricing. New transfer-pricing rules, which are aligned with the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines, entered into force through Administrative Instruction MF – No. 02/2017 on Transfer Pricing, which was issued by the Ministry of Finance on 28 July 2017. The preferred method is the uncontrolled price method. If this method cannot be used, taxpayers may use the resale price method, cost-plus method and, in certain circumstances, the transactional net margin method and profit-split method. The acceptance of the transfer-pricing method by the tax authorities depends on whether the method is supported by appropriate transfer-pricing documentation.

Only cross-border controlled transactions are subject to the transfer-pricing rules. Consequently, domestic transactions are not subject to the rules. Controlled transactions are considered to be transactions between related parties, dealings between a permanent establishment and its head office, and transactions with entities resident in tax-haven jurisdictions. Two persons are considered related parties if any of the following circumstances exist:

- One person holds or controls 50% or more of the shares or voting rights in the other person's company
- One person directly or indirectly controls the other person
- Both persons are directly or indirectly controlled by a third person
- Persons are relatives of the first, second and third row, as specified by the Law on Heritage of Kosovo

Taxpayers are required to submit by 31 March of the following year a Controlled Transaction Notice, which lists the intercompany transactions and the transfer-pricing methods applied to

these transactions, if their controlled transactions exceed in aggregate EUR300,000.

Taxpayers must maintain sufficient supporting documentation to show that the prices applied in transactions with related parties are in line with the arm's-length principle and to justify the transfer-pricing method used in determining such prices. The documentation must be made available within 30 days after it is requested by the Tax Administration of Kosovo.

Failure to timely submit transfer-pricing documentation or to submit the Annual Transaction Notice is subject to a penalty ranging from EUR125 to EUR2,500 for each failure to comply.

F. Treaty withholding tax rates

The table below provides the treaty withholding tax rates for illustrative purposes only. It does not reflect the various special provisions of individual treaties or the withholding tax regulations in domestic law.

	Dividends	Interest	Royalties
	%	%	%
Albania	0	10	10
Austria	0/15 (a)	10	0
Belgium (b)	10/15 (a)	15	10
Croatia	5/10 (a)	5	5
Finland (b)	5/15 (a)	0	10
Germany (b)	15	0	10
Hungary	0/5 (a)	0	0
Latvia	0/10	0/10	0/5
Luxembourg	0/10 (d)	5	0
Malta	0/10 (d)	5	0
North Macedonia	0/5 (a)	10	10
Saudi Arabia	0/5	5	5/10
Slovenia	5/10 (a)	5	5
Switzerland	5/15 (a)	5	0
Turkey	5/10 (a)	10	10
United Arab Emirates	5	5	0
United Kingdom	0/15 (c)	0	0
Non-treaty jurisdictions	0	10	10

- (a) The lower rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
- (b) Kosovo honors the treaties entered into by the former Republic of Yugoslavia with respect to these countries.
- (c) The higher rate applies if the beneficial owner of the dividends is a pension scheme and if the dividends are paid out of income directly or indirectly from immovable property.
- (d) The lower rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.

Kosovo has signed double tax treaties with the Czech Republic, Lithuania and the Netherlands, but these treaties are not yet effective.

Kosovo is negotiating double tax treaties with Ireland, Italy and Portugal.

A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15 (a)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	15 (b)
Interest	0 (c)
Royalties	0 (d)
Management Fees	0 (d)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (e)

- (a) Under Law No. 2 of 2008, for fiscal years beginning after 3 February 2008, the tax rate is a flat 15%. Before the approval of this new law, Amiri Decree No. 3 of 1955 had provided that the maximum tax rate was 55%. The maximum rate under Law No. 23 of 1961, which applies to profits derived from the operations in the Divided Neutral Zone, is 57%. For further details, see Section B.
- (b) This rate applies only to dividends distributed from profits pertaining to the period before 10 November 2015 by companies listed on the Kuwait Stock Exchange (see Section B).
- (c) Under Article 2 of the Bylaws, income derived from the granting of loans by foreign entities in Kuwait is considered to be taxable income in Kuwait, which is subject to tax at a rate of 15%. Previously, foreign banks that solely granted loans in Kuwait were not taxed on the interest income received with respect to these loans.

- (d) This income is treated as ordinary business income and is normally assessed on a deemed profit ranging from 98.5% to 100%.
- (e) Article 7 of the Bylaws provides that losses can be carried forward for a maximum of three years (as opposed to an unlimited period under the prior tax law) if the entity has not ceased its operations in Kuwait.

B. Taxes on corporate income and gains

Corporate income tax. Foreign “bodies corporate” are subject to tax in Kuwait if they carry on a trade or business in Kuwait, directly or through an “agent” (see below), including in the islands of Kubr, Qaru, and Umm Al Maradim or in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia. Kuwaiti-registered companies wholly owned by Kuwaitis and companies incorporated in Gulf Cooperation Council (GCC) countries that are wholly owned by GCC citizens (GCC entities) are not currently subject to income tax. The members of the GCC are Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and United Arab Emirates.

The term “body corporate” refers to an association that is formed and registered under the laws of any country or state and is recognized as having a legal existence separate from that of its individual members. Partnerships fall within this definition.

Law No. 2 of 2008 includes a definition of an “agent.” As per this definition, an “agent” is a person authorized by the principal to carry out business, trade or any activities stipulated in Article 1 of the law or to enter into binding agreements with third parties on behalf and for the account of the person’s principal. A foreign principal carrying on business in Kuwait through an agent (as defined in the preceding sentence) is subject to tax in Kuwait.

Foreign companies carrying on a trade or business in Kuwait are subject to income tax under Amiri Decree No. 3 of 1955 and its amendments contained in Law No. 2 of 2008.

Foreign companies carrying on a trade or business in the islands of Kubr, Qaru and Umm Al Maradim are subject to tax in Kuwait under Law No. 23 of 1961.

Foreign companies carrying on a trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of the taxable profit under Law No. 23 of 1961. In practice, the tax department computes the tax on the total income of the taxpayer and expects that 50% of such tax should be settled in Kuwait. Many taxpayers are currently contesting this practice. Law No. 2 of 2008 and Law No. 23 of 1961 differ primarily with respect to tax rates.

Foreign companies can operate in Kuwait either through an agent or as a minority shareholder in a locally registered company. In principle, the method of calculating tax is the same for companies operating through an agent and for minority shareholders. For minority shareholders, tax is levied on the foreign company’s share of the results (whether or not distributed) from a Kuwaiti company and amounts received as, among other items, interest, royalties, technical services and management fees.

Virtual permanent establishment. Kuwait's tax authorities have recently changed their approach on the interpretation of the permanent establishment (PE) concept on account of services rendered by nonresidents in Kuwait. The tax authorities have now introduced the concept of a Virtual Service PE, which may result in the denial of income tax relief claimed by nonresidents under the applicable double tax treaties of Kuwait.

The tax authorities' approach does not consider the physical presence of employees or contractors of a nonresident service provider for establishing the nexus to the source country, even if such threshold is clearly specified under the applicable double tax treaty.

Tax rates. Under Law No. 2 of 2008, the tax rate is 15%.

The following are the tax rates under Law No. 23 of 1961.

Exceeding (KWD)	Taxable profits		Rate (%)
	Not exceeding (KWD)		
0	500,000		20
500,000	–		57

Investment incentives. Kuwait offers the investment incentives described below.

Industry Law. To encourage investments in local industrial undertakings, Industry Law No. 56 of 1996 offers the following incentives:

- Reduced import duties on equipment and raw materials
- Protective tariffs against competing imported goods
- Low-interest loans from local banks
- Export assistance
- Preferential treatment on government supply contracts

Law for the Promotion of Direct Investment in the State of Kuwait. The Law for the Promotion of Direct Investment in the State of Kuwait (PDISK; Law No. 116 of 2013) was published in the Kuwait *Official Gazette* on 16 June 2013 and took effect six months from the date of issuance (that is, in December 2013). PDISK replaced the Direct Foreign Capital Investment Law (DFCIL; Law No. 8 of 2011). Under PDISK, the Kuwait Direct Investment Promotion Authority (KDIPA) is established. The KDIPA took over from its predecessor, the Kuwait Foreign Investment Bureau. The new authority is a part of the Ministry of Commerce and Industry.

PDISK adopts a negative-list approach to determine the applicability of the law. All business sectors and activities not on the negative list are entitled to the benefits of PDISK. PDISK maintains the current incentives for investors including, but not limited to, the following:

- Tax incentives for a maximum period of 10 years from the date of commencement of the licensed entity
- Customs duty exemptions for the importation of materials and equipment if the material and equipment is held for a period of five years from the date of obtaining the incentive
- Protection from Kuwaitization requirements
- Allocation of land and real estate to investors

In addition, PDISK provides that all foreign investors may take advantage of double tax treaties and other bilateral treaty benefits.

In addition to a 100% foreign-owned Kuwaiti company, PDISK introduced two new types of investment entities, which are a licensed branch of a foreign entity and a representative office. The representative office may only prepare marketing studies and may not engage in any commercial activity.

After the application for the license is approved by the KDIPA, the investor needs to establish a legal entity, legal branch or representative office (as requested in the application). The process of establishment is facilitated by the KDIPA through the one-stop shop in Kuwait.

In line with the key objectives of the Kuwait 2035 vision document, to enhance the local economy by providing an investor-friendly environment, KDIPA has introduced amendments under Decision 329 of 2019 to further attract foreign investments. The following amendments aim to enhance the possibility of ease in setting up an entity in Kuwait:

- Revision of key evaluation criteria (including introduction of new criteria)
- Modified scoring mechanism for obtaining the license
- Revised tax credit mechanism (including the introduction of new criteria)
- Assistance in the allocation of a land license

In addition to the above amendments, in 2019, KDIPA introduced Ministerial Order 49 of 2019, which defines rules and procedures for the allocation of commercial plots by the KDIPA. The key evaluation criteria as per the Ministerial Order are the following:

- Transfer and settlement of technology
- Human capital
- Market development
- Economic diversification
- Sustainable development

Based on the above modified criteria, the following is the scoring mechanism for obtaining the license:

- If the total points are less than 30%, both the applications for the investment license and the granting of incentives are not accepted.
- If the total points are 30% to 55%, only the application for the investment license is approved (without incentives).
- If the total points are 60% to 80%, the investment license is granted with one selected incentive.
- If the total points are 85% or higher, the investment license is granted with all the incentives stipulated in the law.

The investment entity must submit a tax-exemption report from an auditor on an annual basis. After reviewing the tax-exemption report (including underlying documents), the KDIPA issues a tax-exemption certificate approving the tax credit for the year, based on the tax credit mechanism established by the KDIPA through Decision No. 16 of 2016, as amended by Decision No. 180 of 2020. The decision on the tax credit mechanism includes the definitions of some of the important terms used when calculating the tax exemption.

The tax credit varies by category criteria, as shown in the following table.

Criteria	Measure	Mechanism
Technology transfer and settlement of	Cost of advanced equipment	20% of value of equipment (spread over remaining period of tax incentives) technology
Human capital	Number of national hires in excess of quota	KWD36,000 per additional employee
Human capital	Salaries to national labor in excess of quota	5 times the annual salary
Human capital	Costs of training the national labor employees	10 times the training expenditure
Local content	Use of local inputs	2 times the value of the contracts
Local content	Office rent, local supplies and raw materials	The value of the contracts
Corporate Social Responsibility (CSR)	Total expenditure on CSR programs	Value of the annual expenditure on CSR programs

In October 2019, the KDIPA issued the following:

- Ministerial Decision 393 of 2019 on the Principles, Conditions & Controls of Licensing the Representative Offices of Foreign Companies
- Ministerial Decision 394 of 2019 on the Principles, Conditions & Controls of Licensing Branches of Foreign Companies

The proposed set of rules is focused on providing clear transparency in the establishing and monitoring of representative and branch offices of the foreign companies.

Kuwait Free Trade Zone. To encourage exporting and re-exporting, the government has established the Kuwait Free Trade Zone (KFTZ) in the vicinity of the Shuwaikh port. The KFTZ offers the following benefits:

- Up to 100% foreign ownership is allowed and encouraged.
- All corporate and personal income is exempt from tax.
- All imports into and exports from the KFTZ are exempt from tax.
- Capital and profits are freely transferable outside the KFTZ and are not subject to any foreign-exchange controls.

Public Private Partnership Law. The Public Private Partnership Law (Law No. 116 of 2014), which was published in the *Official Gazette* on 17 August 2014, provides incentives for investors in

private public partnership projects including exemptions from income tax and other taxes, customs duties and other fees. The new law also improves corporate governance and investment security by providing protection for the intellectual property rights of a concept or idea originator. The Executive Regulations to the Public Private Partnership Law were issued on 29 March 2015.

Capital gains. Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at the rates stated above.

Article 1 of Law No. 2 of 2008 and Article 8 of the Bylaws provide for a possible tax exemption for profits generated from dealing in securities on the Kuwait Stock Exchange (KSE), whether directly or through investment portfolios. However, no further clarifications have been provided regarding the definitions of “profits” and “dealing.” On 3 January 2016, the Kuwait Ministry of Finance (MOF) issued Administrative Resolution No. 2028 of 2015, which amended certain executive regulations. It includes an amendment with respect to the tax exemption on listed securities. This amendment reconfirms the tax exemption for capital gains on the disposal of Kuwaiti listed securities.

Administration. The calendar year is generally used for Kuwaiti tax purposes, but a taxpayer may request in writing for permission to prepare financial statements for a year ending on a date other than 31 December. For the first or last period of trading or carrying on a business, a taxpayer may be allowed to file a tax declaration covering up to 18 months.

Accounting records should be kept in Kuwait, and it is normal practice for the tax authorities to insist on inspecting the books of account (which may be in English) and supporting documentation before agreeing to the tax liability.

The tax authorities have issued notifications restating the requirement that taxpayers comply with Article 13 and Article 15 of the Bylaws, which relate to the preparation of books and accounting records and the submission of information together with the tax declaration.

Article 13 requires taxpayers to enclose the prescribed documents, such as the trial balance, list of subcontractors, list of fixed assets and inventory register, along with the tax declaration.

Article 15 requires that taxpayers prepare the prescribed books of accounts, such as the general ledger and the stock list.

The tax authorities issued Executive Rules during 2013, which are effective for fiscal years ending on or after 31 December 2013. These rules require analyses of contract revenues, tax retentions, expenses, depreciation rates and provisions included in the tax declaration. In addition, they require that these analyses and the financial statements contain comparative figures for the preceding year.

In the event of noncompliance with the above regulations, the tax authorities may finalize an assessment on a basis as deemed reasonable by the tax authorities. The Bylaws provide that a taxpayer must register with the tax authorities within 30 days after signing

its first contract in Kuwait. In addition, a taxpayer is required to inform the tax authorities of any changes that may affect its tax status within 30 days after the date of the change. The taxpayer must also inform the tax authorities of the cessation of activity within 30 days after the date of cessation.

Under the Bylaws, a new system of tax cards is introduced. The information required to be included in the tax card application form is generally the information that is provided to the tax authorities at the time of registration. The tax cards are renewed for all taxpayers on an annual basis.

However, the tax authorities recently issued unique Tax Registration Numbers (TRNs) to all taxpayers in Kuwait. The tax authorities are using the TRNs in all matters and correspondence relating to taxpayers. The taxpayers must also use their TRNs in all correspondence with the tax authorities.

A tax declaration must be filed on or before the 15th day of the 4th month following the end of the tax period (for example, 15 April in the case of a 31 December year-end). Tax is payable in 4 equal installments on the 15th day of the 4th, 6th, 9th and 12th months following the end of the tax period, provided that the tax declaration is submitted on or before the due date for filing. The Bylaws provide that a request for extension of time for the filing of the tax declaration must be submitted to the tax authorities by the 15th day of the 2nd month (the 3rd month under the prior law) after the fiscal year-end. The maximum extension of time that may be granted is 60 days (75 days under the prior law).

In the event of a failure to file a tax declaration by the due date, a penalty that equals 1% of the tax for each 30 days or fraction thereof during which the failure continues is imposed. In addition, in the event of a failure to pay tax by the due date, a penalty that equals 1% of the tax payment for each period of 30 days or fraction thereof from the due date to the date of the settlement of the tax due is imposed.

The tax authorities have also issued Circular No. 1 of 2014. This Circular applies to all taxpayers filing tax declarations after the issuance of the Circular.

If tax declarations are prepared on an actual-accounts basis, the Circular requires that they be prepared in accordance with the tax laws and the Executive Rules issued by the tax authorities. For these types of declarations, the Circular also requires the submission of a draft income and expense adjustment (self-assessment) computed in accordance with the last assessment finalized by the tax authorities within three months after the date of submission of the tax declaration.

If tax declarations are prepared on a deemed-profit basis, the Circular requires that the percentage applied in the tax declaration be the same as the percentage that was applied in the last assessment. It also requires that details regarding all subcontractors and certain supporting documents be provided together with the tax declaration.

Articles 24 to 27 of the Bylaws provide for the filing of objections and appeals against tax assessments.

Article 24 of the Bylaws provides that an objection may be filed against an assessment within 60 days after the date of the assessment. The tax department must consider and issue a revised assessment within 90 days from the date of filing of the objection. If the department fails to issue a revised assessment during this period, the objection is considered to be rejected.

The Bylaws allow companies to submit a revised tax declaration if a tax assessment has not yet been issued by the tax authorities.

If the tax authorities accept the amended tax declaration, the date of filing of the revised tax declaration is considered to be the actual date of filing the declaration for the purpose of imposing delay fines.

Law No. 2 of 2008 introduced a statute of limitation period of five years into the tax law.

Article 13 of the Bylaws provides that companies that may not be subject to tax based on the application of any tax laws or other statutes or based on double tax treaties must submit tax declarations in Kuwait.

Dividends. Under the prior tax law, no tax was imposed on dividends paid to foreign shareholders by Kuwaiti companies. However, tax was assessed on the share of profits attributable to foreign shareholders according to the audited financial statements of the company, adjusted for tax purposes.

Under Law No. 2 of 2008, dividends received by the investors in companies listed on the KSE are subject to a 15% withholding tax. However, recently issued Administrative Resolution No. 2028 of 2015 provides an exemption on any returns from securities listed on the KSE, bonds and other similar securities, regardless of whether the listed company is a Kuwaiti or non-Kuwaiti company. This amendment confirms the tax benefits approved by the Capital Market Authority through Law No. 22 of 2015, effective from 10 November 2015. As a result, dividends related to profits earned on or after 10 November 2015 are not subject to withholding tax. Dividends that are declared out of profits pertaining to the period before 10 November 2015 are still subject to the withholding tax.

The obligations with respect to dividends declared out of profits pertaining to the period before 10 November 2015 are described below.

The tax was required to be withheld by the foreign investor's custodian or broker in Kuwait. The tax authorities required the local custodian or broker of the foreign investor to provide information about the foreign investor, deduct 15% tax on payments of dividends to the foreign investor and deposit the tax with the tax authorities.

One hundred percent GCC-owned investors were also subject to withholding tax in Kuwait by local custodians or brokers until they were able to obtain a tax-clearance certificate indicating that they were not subject to tax in Kuwait.

The tax authorities had issued forms to allow 100% GCC-owned investors and investors from jurisdictions with which Kuwait has

a double tax treaty to obtain a tax-clearance certificate for exemption or reduction of withholding tax on dividends received from companies listed on the KSE.

An entity that wanted to claim a lower withholding tax rate in accordance with a tax treaty was required to approach the tax authorities and apply for a refund.

Article 46 of the Bylaws provides that investment companies or banks that manage portfolios or funds or act as custodians of listed shares for foreign entities must withhold corporate tax due from amounts paid to such foreign entities. The amount withheld must be deposited within 30 days after the date of withholding, together with a list showing the names of the foreign entities and the amounts of corporate tax withheld. The tax authorities require investment companies or banks that manage portfolios or funds to comply with this rule with respect to dividends distributed from profits pertaining to the period before 10 November 2015.

Foreign shareholders in unlisted Kuwaiti companies continue to be assessed on the share of profits attributable to foreign shareholders according to the audited financial statements of the company, adjusted for tax purposes.

C. Determination of trading income

General. Tax liabilities are generally computed on the basis of profits disclosed in audited financial statements, adjusted for tax depreciation and any items disallowed by the tax inspector on review.

The tax declaration, supporting schedules and financial statements, all of which must be in Arabic, are to be certified by an accountant in practice in Kuwait who is registered with the Ministry of Commerce and Industry.

Foreign-currency exchange gains and losses. Under Executive Rule No. 37 of 2013, gains and losses on foreign currency conversion are classified into realized gains and losses and unrealized gains and losses.

Realized gains and losses resulting from the fluctuation of exchange rates are considered taxable gains and allowable losses if the taxpayer can substantiate the basis of the calculations and provides documents in support of such transactions.

Unrealized gains are not considered to be taxable income, and unrealized losses are not allowed as deductible expenses.

Design expenses. Under Executive Rule No. 26 of 2013 (applicable for fiscal years ending on or after 31 December 2013), costs incurred for engineering and design services provided are restricted to the following percentages:

- If design work is carried out in the head office, 75% of the design revenue is allowed as costs.
- If design work is carried out by an associated company, 80% of the design revenue is allowed as costs, provided the company complies with the regulations for retention of 5% and submission of the contract with the associated company to the tax authorities.

- If design work is carried out by a third party, 85% of the design revenue is allowed as costs, provided the company complies with the regulations for retention of 5% and submission of the contract with the third company to the tax authorities.
- If the design revenue is not specified in the contract, but design work needs to be executed outside Kuwait, the tax authorities may use the following formula to determine the revenue:

$$\text{Design revenue for the year} = \frac{\text{Design costs for the year} \times \text{annual contract revenue}}{\text{Total direct costs for the year}}$$

Consultancy costs. Under Executive Rule No. 26 of 2013, costs incurred for consultancy costs incurred outside Kuwait are restricted to the following percentages:

- If consultancy work is carried out in the head office, 70% of the consultancy revenue is allowed as costs.
- If consultancy work is carried out by an associated company, 75% of the consultancy revenue is allowed as costs if the company complies with the regulations for the 5% retention on payments and the submission of the contract with the associated company to the tax authorities.
- If consultancy work is carried out by a third party, 80% of the consultancy revenue is allowed as costs if the company complies with the regulations relating to the 5% retention and the submission of the contract with the third party to the tax authorities.
- If the consultancy revenue is not specified in the contract, but consultancy work needs to be executed outside Kuwait, the tax authorities may use following formula to determine the revenue:

$$\text{Consultancy revenue for the year} = \frac{\text{Consultancy costs for the year} \times \text{annual contract revenue}}{\text{Total direct costs for the year}}$$

Imported material costs. Under Executive Rule No. 25 of 2013, the Kuwaiti tax authorities deem the following profit margins for imported materials and equipment:

- Imports from head office: 15% of related revenue
- Imports from related parties: 10% of related revenue
- Imports from third parties: 5% of related revenue

The imputed profit described above is normally subtracted from the cost of materials and equipment claimed in the tax declaration. If the revenue from the materials and equipment supplied is identifiable, the tax authorities normally reduce the cost of such items to show a profit on such materials and equipment in accordance with the percentages described above. If the related revenue from the materials and equipment supplied is not identifiable or not stated in the contract, the following formula may be applied to determine the related revenue:

$$\text{Material and equipment revenue for the year} = \frac{\text{Material \& equipment costs for the year} \times \text{annual contract revenue}}{\text{Total direct costs for the year}}$$

Interest paid to banks. Interest paid to local banks relating to amounts borrowed for operations (working capital) in Kuwait may normally be deducted. Interest paid to banks or financial institutions outside Kuwait is disallowed unless it is proven that the funds were specifically borrowed to finance the working capital needs of operations in Kuwait. In practice, it is difficult to claim deductions for interest expenses incurred outside Kuwait. Interest paid to the head office or agent is disallowed. Interest that is directly attributable to the acquisition, construction or production of an asset is capitalized as part of the cost of the asset if it is paid to a local bank.

Leasing expenses. The Kuwait tax authorities may allow the deduction of rents paid under leases after inspection of the supporting documents. The deduction of rent for assets leased from related parties is restricted to the amount of depreciation charged on those assets, as specified in the Kuwait Income Tax Law. The asset value for the purpose of determining depreciation is based upon the supplier's invoices and customs documents. If the asset value cannot be determined based on these items, the value is determined by reference to the amounts recorded in the books of the related party.

Agency commissions. The tax deduction for commissions paid to a local agent is limited to 2% of revenue, net of any subcontractors' costs paid to the agent and reimbursed costs.

Head office overhead. Article 5 of the Bylaws provides that the following head office expenses are allowed as deductions:

- Companies operating through an agent: 1.5% of the direct revenue
- Companies participating with Kuwaiti companies: 1% of the foreign company's portion of the direct revenue generated from its participation in a Kuwaiti company
- Insurance companies: 1.5% of the company's direct revenue
- Banks: 1.5% of the foreign company's portion of the bank's direct revenue

Article 5 of the Bylaws also provides that for the purpose of computation of head office overheads, direct revenue equals the following:

- For companies operating through an agent, companies participating with Kuwaiti companies and banks: gross revenue less subcontract costs, reimbursed expenses and design cost (except for design cost carried out by the head office)
- For insurance companies: direct premium net of share of reinsurance premium, plus insurance commission collected

Reimbursed costs. For deemed profit filings, reimbursed costs are allowed as a deductible expense if the following conditions are satisfied:

- Such costs are necessary and explicitly mentioned in the contract.
- Such costs do not exceed 30% of gross revenues.
- Supporting documentation is available for such costs.

In addition, if reimbursable costs exceed 30% of gross revenues, the taxpayer must file its tax declaration on an accounts basis instead of on a deemed-profit basis.

Inventory. Inventory is normally valued at the lower of cost or net realizable value, on a first-in, first-out (FIFO) or average basis.

Provisions. Provisions, as opposed to accruals, are not accepted for tax purposes.

Tax depreciation. Tax depreciation is calculated using the straight-line method. The following are some of the permissible annual depreciation rates.

Asset	Rate (%)
Buildings	4
Prefabricated buildings	15
Furniture and office equipment	15
Drilling equipment	25
Electrical equipment and electronics	15
Plant and equipment	20
Computer and its accessories	33.3
Software	25
Trucks and trailers	15
Cars and buses	20

Relief for losses. Article 7 of the Bylaws provides that approved losses can be carried forward for a maximum of three years (as opposed to an unlimited period under the prior tax law) if the entity has not ceased its operations in Kuwait.

Aggregation of income. If a foreign company has more than one activity in Kuwait, one tax declaration aggregating the income from all activities is required.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Social security contributions; levied only with respect to Kuwaiti employees and employees who are citizens of other GCC countries; payable monthly by employers and employees; for Kuwaiti employees, social security is payable on monthly salary up to KWD2,750 at the following rates	
Employer (payable on monthly salary up to KWD2,750)	11.5%
Employee	
If monthly salary does not exceed KWD1,500	10.5%
If monthly salary exceeds KWD 1,500 but does not exceed KWD2,750	2.5% of KWD1,500 plus 8% of total salary
If monthly salary exceeds KWD2,750	2.5% of KWD1,500 plus 8% of KWD2,750

(Different monetary ceilings and percentages are prescribed for citizens of other GCC countries who are employed in Kuwait.)

Nature of tax	Rate
Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS); contribution payable by Kuwait shareholding companies; contribution levied on profits after transfer to the statutory reserve and offset of loss carryforwards	1%
National Labour Support Tax; imposed annually on the profits derived from activities in Kuwait by a Kuwaiti Company listed on the KSE; Ministerial Resolution No. 24 of 2006 provides rules for the application of the tax	2.5%
<i>Zakat</i> ; imposed on annual net profits of public and closed Kuwaiti shareholding companies; Ministerial Order 58 of 2007 provides rules for the application of <i>zakat</i>	1%

E. Miscellaneous matters

Foreign-exchange controls. No foreign-exchange restrictions exist. Equity capital, loan capital, interest, dividends, branch profits, royalties, management and technical services fees, and personal savings are freely remittable.

Supply and installation contracts. In supply and installation contracts, a taxpayer is required to account to the tax authorities for the full amount received under the contract, including the offshore supply element, which is the part of the contract (cost, insurance and freight to the applicable port) pertaining to the supply of goods.

Contractors' revenue recognition. Tax is assessed on progress billings (excluding advances) for work performed during an accounting period, less the cost of work incurred. Previously, the authorities did not accept the completed contract or percentage-of-completion methods of accounting. However, the new Executive Rules of 2013 do not specifically prohibit the percentage-of-completion method in determining the revenue to be offset against the cost recognized.

Subcontractors' costs. The Kuwait tax authorities are normally stringent with respect to the allowance of subcontractors' costs, particularly subcontractors' costs incurred outside Kuwait. Subcontractors' costs are normally allowed if the taxpayer provides the related supporting documentation (contract, invoices, settlement evidence and other documents), complies with the regulations for the 5% retention on the payments made to the subcontractors and the submission of the contracts to the tax authorities (see *Retention on payments to subcontractors*) and fulfills certain other conditions. The tax authorities have also taken the view that they no longer accept losses from work that is subcontracted to other entities.

Retention on payments to subcontractors. Article 37 of the Bylaws and Executive Rules Nos. 5 and 6 of 2013 require that every business entity operating in Kuwait must take all of the following actions:

- It must notify the names and addresses of its contractors and subcontractors to the tax authorities.

- It must submit copies of all the contracts and subcontracts to the tax authorities.
- It must retain 5% from each payment due to the contractors or subcontractors until the contractor or subcontractor provides a valid tax-clearance certificate issued by the tax authorities.

In the event of noncompliance with the above rules, the tax authorities may disallow the related costs from the contract or subcontract.

Article 39 of the Bylaws empowers the Ministry of Finance to demand payment of the 5% retained amount from the entities holding the amounts, if the concerned contractors or subcontractors fail to settle their taxes due in Kuwait. It also provides that if business entities have not retained the 5%, they are liable for all of the taxes and penalties due from the contractors and subcontractors.

Work in progress. Costs incurred but not billed by an entity at the end of the fiscal year may be carried forward to the subsequent year as work in progress. Alternatively, revenue relating to the costs incurred but not billed may be estimated on a reasonable basis and reported for tax purposes if the estimated revenue is not less than the cost incurred.

Salaries paid to expatriates. In a press release issued on 23 September 2003, the Ministry of Social Affairs announced that it would impose stiff penalties if companies fail to comply with the requirement to pay salaries to employees in their local bank accounts in Kuwait. These penalties apply from 1 October 2003. This requirement has been further emphasized through the new labor law issued in 2010. The tax authorities may disallow payroll costs if employees do not receive their salaries in their bank accounts in Kuwait.

Offset program. The MOF had issued Ministerial Order 13 of 2005 to reactivate the offset program. In 2006, the National Offset Company (NOC) was formed to manage and administer the implementation of the offset program on behalf of the Kuwait government and the MOF. Under Decision No. 890 of the Council of Ministers, which was taken in their session No. 2014/2-30 on 7 July 2014, the offset program was officially suspended in Kuwait. The offset program has now been canceled with respect to all tenders issued after Decision No. 890 on 7 July 2014 and all other tenders that were issued earlier but had not closed as of the date of the decision.

The following were significant aspects of the earlier offset program:

- All civil contracts with a value of KWD10 million or more and defense contracts with a value of KWD3 million or more attracted the offset obligations for contractors. The obligations became effective on the signing date of the contract.
- Contractors subject to the offset obligation were required to invest 35% of the value of the contract with Kuwaiti government bodies.

- Contractors subject to the offset obligation were allowed to take any of the following actions to fulfill their offset obligation:
 - Option 1: equity participation in an approved offset business venture (direct participation in a project company)
 - Option 2: contribution of cash and/or in-kind technical support
 - Option 3: participation in any of the offset funds managed by certain banks or investment companies in Kuwait
 - Option 4: purchase of commodities and services of Kuwaiti origin
- Contractors covered by the offset obligation were required to provide unconditional, irrevocable bank guarantees issued by Kuwaiti banks to the MOF equal to 6% of the contract price. The value of the bank guarantee was gradually reduced based on the actual execution by the foreign contractor or supplier of its work. The MOF was able to cash in the bank guarantee if the company subject to the offset obligation failed to fulfill such obligation.

The following were practical considerations:

- Option 3 above was not a viable option because the NOC has indicated that investment in funds is not considered for the completion of offset obligations.
- The NOC insisted that every offset venture have a local equity partner and had issued guidelines in this respect.
- A combination of Options 1, 2 and 4 was being used.

The offset program was implemented through the inclusion of clauses in supply contracts that referred to an offset obligation of the foreign contractor.

F. Treaty withholding tax rates

Kuwait has entered into tax treaties with several jurisdictions for the avoidance of double taxation. Treaties with several other jurisdictions are at various stages of negotiation or ratification.

Disputes about the interpretation of various clauses of tax treaties between taxpayers and the tax authorities are not uncommon. Disputes with the tax authorities regarding tax treaties normally arise with respect to the following issues:

- Existence of a permanent establishment
- Income attributable to a permanent establishment
- Tax deductibility of costs incurred outside Kuwait

Kuwait has also entered into treaties with several jurisdictions relating solely to international air and/or sea transport. Kuwait is also a signatory to the Arab Tax Treaty and the GCC Joint Agreement, both of which provide for the avoidance of double taxation in most areas. The other signatories to the Arab Tax Treaty are Egypt, Iraq, Jordan, Sudan, Syria and Yemen.

The domestic tax law in Kuwait does not provide for withholding taxes except in the case of dividend income received by investors in companies listed on the KSE (see Section B). As a result, it is not yet known how the Kuwaiti government will apply the withholding tax procedures related to interest and royalties included in the treaties listed in the table below. The withholding rates listed in the table are for illustrative purposes only.

- (a) The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.
- (b) The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for interest paid to entities in which the government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.
- (c) The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.
- (d) The rate is 10% for dividends paid to the government of Kuwait or any of its institutions or any intergovernmental entities. The rate is 15% for other dividends.
- (e) The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
- (f) The rate is increased to 5% if the beneficial owner of the interest carries on business in the other contracting state through a permanent establishment and the debt on which the interest is paid is connected to such permanent establishment.
- (g) The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid-up capital.
- (h) For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 49% of the capital is owned directly or indirectly by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.
- (i) A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.
- (j) The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 25% of the capital is owned directly or indirectly by, the government or a governmental institution of the other contracting state.
- (k) The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed directly or indirectly by a financial entity or other local body wholly owned by the government of the other contracting state.
- (l) The 0% rate applies if the beneficial owner of the dividends is a company that has invested more than USD3 million or its equivalent in local currency. The 5% rate applies in all other cases.
- (m) The rate is 5% if the beneficial owner of the dividends is a company that owns 10% or more of the issued and outstanding voting shares or 25% or more of the value of all of the issued and outstanding shares. The 15% rate applies to other dividends.

- (n) Dividends or interest paid by a company that is a resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is one of the following:
- The government
 - A political subdivision or a local authority of the other contracting state
 - The Central Bank of the other contracting state
 - Other governmental agencies or governmental financial institutions as may be specified and agreed to in an exchange of notes between the competent authorities of the contracting states
- (o) The rate is 10% in the case of financial institutions (including insurance companies) and 15% in all other cases.
- (p) The rate is 5% if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. The rate is 10% in all other cases.
- (q) The rate is 15% for the use of, or the right to use, cinematographic films, tapes for radio or television broadcasting and copyrights of literary or artistic works. The rate is 10% for the right to use patents, trademarks, designs, models, plans, secret formulas or processes, copyrights of scientific works and industrial, commercial or scientific equipment.
- (r) This rate applies only to dividends distributed by companies listed on the KSE (see Section B).
- (s) The 0% rate applies if either of the following circumstances exists:
- The beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends, such holding is possessed for an uninterrupted period of at least one year, and the dividends are declared within that period.
 - The beneficial owner is the other contracting state, a governmental institution or an entity resident in the other contracting state.
- (t) The 5% rate applies if the beneficial owner of the dividends is the government of that contracting state, an administrative-territorial or political subdivision, a local authority or a governmental institution created in that contracting state under public law, such as a corporation, central bank, fund, authority, foundation, agency or other similar entity. The 10% rate applies in all other cases.
- (u) The 0% rate applies if the beneficial owner of the dividends is the government of the other contracting state or an institution or other entity wholly owned directly by the government of that other contracting state. The 5% rate applies in all other cases.
- (v) The 5% rate applies if the beneficial owner of the interest is a resident of the other contracting state. In the case of the Hong Kong Special Administrative Region (SAR), the 0% rate applies if the interest is paid to the following:
- The government of the Hong Kong SAR
 - The Hong Kong Monetary Authority
 - An institution set up by the government of the Hong Kong SAR under statutory law, such as a corporation, fund, authority, foundation, agency or other similar entity
 - An entity established in the Hong Kong SAR, all the capital of which is provided by the government of the Hong Kong SAR or any institution as defined in Subparagraph (a)(3) of Paragraph 3 of Article 11 of the tax treaty
- In the case of Kuwait, the 0% rate applies to interest paid to the following:
- The government of Kuwait
 - A governmental institution created in Kuwait under public law, such as a corporation, central bank, fund, authority, foundation, agency or similar entity
 - An entity established in Kuwait, all the capital of which is provided by the Kuwaiti government or a governmental institution
- (w) The 5% rate applies if the beneficial owner of the dividends, interest or royalties is a resident of the other contracting state.
- (x) The 15% rate applies if the beneficial owner of the royalties is a resident of the other contracting state.
- (y) The 5% rate applies if the beneficial owner is a company that has owned directly or indirectly for the period of six months ending on the date on which entitlement to the dividends is determined at least 10% of the voting shares of the company paying the dividends. The 10% rate applies in all other cases.
- (z) The 10% rate applies if the beneficial owner of the interest is a resident of the other contracting state.
- (aa) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

- (bb) The 2.5% rate applies if the beneficial owner of the dividends is the government of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (cc) The 0% rate applies if the beneficial owner of the dividends is an entity mentioned in Paragraph 2 of Article 4 of the treaty. The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (dd) The 2% rate applies if the beneficial owner of the interest is a resident of the other contracting state.
- (ee) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends or if the beneficial owner of the dividends is a resident of the other contracting state. The 10% rate applies in all other cases.
- (ff) The 10% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (gg) The 0% rate applies if the beneficial owner of the interest is the government or the central bank of the other contracting state or an institution or other entity wholly owned directly by the government of that other contracting state. The 15% rate applies in all other cases.
- (hh) This treaty applies to the separate republics of Montenegro and Serbia.
- (ii) The rate is 4.9% for interest paid to banks. The rate is 10% in all other cases.
- (jj) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 15% rate applies in all other cases.
- (kk) The 10% rate applies if the beneficial owner of the interest is a resident of the other contracting state. Interest paid by a company that is a resident of a contracting state is not taxable in that contracting state if the beneficial owner of the interest is one of the following:
- The government or a local authority of the other contracting state
 - The central bank of the other contracting state
 - Other governmental agencies or governmental financial institutions specified and agreed to in an exchange of notes between the competent authorities of the contracting states
- (ll) The 0% rate applies if the beneficial owner of the dividends is a resident of the other contracting state and is one of the following:
- The government or any political subdivision or local authority thereof
 - Any governmental institution created under public law such as a corporation, central bank, fund, foundation, agency or other similar entity
 - Any entity established, all the capital of which has been provided by that state or any political subdivision or local authority thereof or any local governmental institution as defined in the second bullet above, together with other states
- The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (mm) The 10% rate applies if the beneficial owner of the interest is a resident of the other contracting state. Interest paid by a company that is a resident of a contracting state is not taxable in that contracting state if the beneficial owner of the interest is one of the following in the other contracting state:
- The government or any political subdivision or local authority thereof
 - Any governmental institution created in that contracting state under public law such as a corporation, central bank, fund, authority, foundation, agency or other similar entity
 - Any entity established in that state, all the capital of which has been provided by that state or any political subdivision or local authority thereof
- (nn) The 0% rate applies if the beneficial owner of the dividend or interest is a government entity of Kuwait, which is defined as the following:
- The government of Kuwait or a local authority thereof
 - Any governmental institution created under public law such as a corporation, central bank, fund, authority, foundation, agency or other similar entity
 - Any entity established in Kuwait, all the capital of which has been provided by Kuwait or local authority thereof or any governmental institution as defined in the second bullet above, together with other states
- The 5% rate applies in all other cases.

- (oo) Interest arising in a contracting state is exempt from tax in that state if derived by the following from the other contracting state:
- Political subdivision
 - Local authority
 - The government
- The 10% rate applies in all the other cases.

A. At a glance

Corporate Income Tax Rate (%)	20 (a)
Capital Gains Tax (%)	– (b)
Branch Tax Rate (%)	20 (c)
Withholding Tax (%) (d)	
Dividends	10
Interest	10
Royalties	5
Net Operating Losses (Years)	
Carryback	0
Carryforward	5/10 (e)

- (a) This tax is known as the “profit tax.” Tobacco businesses are subject to tax at a rate of 22%, while mining companies are subject to tax at a rate of 35%.
- (b) The tax law does not provide a specific rule for the taxation of capital gains derived from the transfer of tangible assets. Income from the sale of shares is subject to income tax at a rate of 2%.
- (c) Lao income tax regulations do not contain a definition of a “permanent establishment.” A foreign company may establish a branch only in certain sectors of the economy. Only a foreign bank, financial institution, insurance company or airline company may establish a branch in Laos.
- (d) These are withholding taxes that are imposed on Lao and foreign legal entities and individuals.
- (e) Business operators engaged in agriculture and livestock activities can carry forward losses resulting from an outbreak of diseases or a natural disaster for 10 years.

B. Taxes on corporate income

Profit tax. Companies and individuals engaged in manufacturing, trading and services are subject to profit tax on their Lao-source income. Foreign companies deriving income from Laos or entering into joint venture contracts with project owners in Laos are also subject to profit tax.

The accounts of a branch of a Lao company are consolidated with the accounts of the parent company for purposes of calculating profit tax.

Rates of profit tax. The standard rate of profit tax for business activities is 20%.

Companies in certain industries, such as hydropower, are taxed at different rates, depending on their agreement with the government of Laos.

Foreign investors may be entitled to profit tax exemptions for certain periods, depending on the activities and location of the business.

Listed companies in Laos are entitled to a reduced tax rate of 13% for a four-year period.

Lump Sum Tax. Lump Sum Tax applies to the income of individuals and small businesses with less than LAK400 million of annual turnover. The portion of turnover between LAK50 million and LAK400 million is taxed at the following rates:

- 1% for agriculture and industrial activities
- 2% for supply of goods
- 3% for supply of services

The tax is payable periodically as agreed with the tax authority on a case-by-case basis.

Capital gains. The tax law does not provide a specific rule on the taxation of capital gains arising from the transfer of tangible assets. However, income derived from sales of shares is subject to a withholding tax of 2%.

Administration. The fiscal year in Laos is the calendar year.

For resident companies and individuals compliant with accounting standards, profit tax must be paid on a semester installment basis (that is, profit tax is paid two times a year through advance payments [installments]) by 20 July of the current year and 20 January of the following year. An annual profit tax return must be submitted together with the annual financial statements before 31 March of the following year in order to recalculate total profit tax for the year. The semester installment payments are based on the final corporate income tax liability of the preceding year, the actual profit of the semester or the estimated corporate income tax mentioned in the annual tax payment plan for the current year. Any excess payment may be credited to future profit tax liability.

For companies or individuals not compliant with accounting standards and for nonresidents, the buyers of their services or goods must deduct a compulsory profit tax that is calculated based on an estimated profit, which is calculated at the following percentages, multiplied by a 20% tax rate:

- 7% of the value of the transaction, sales or turnover for agriculture and handicraft activities
- 10% for industrial and processing activities
- 15% for trade and service activities
- 30% for electric power and mining activities

The profit tax is declared and paid to the tax authority by the buyer within 10 days following the date of payment by the buyer.

Dividends. A 10% withholding tax is imposed on dividends paid.

Foreign tax relief. Laos has entered into double tax treaties with several countries (see Section F).

C. Determination of taxable business income

General. The calculation used to determine the taxable income of companies and individuals subject to profit tax depends on whether the taxpayers are compliant with accounting standards.

Taxpayers that are compliant with accounting standards determine their taxable profit by either of the following methods:

- Deducting from their annual turnover their annual tax-deductible expenses
- Deducting from their annual accounting profit their annual non-tax-deductible expenses

Taxpayers that are not compliant with accounting standards or that are nonresident in Laos must pay profit tax based on their compulsory profit (see *Administration* in Section B).

Taxable income consists of all income from available sources, such as the following:

- Income from handicraft and agriculture
- Income from the exploration of natural resources
- Income from import and export business
- Income from banking, insurance and financial activities
- Income from tourism including hotels
- Income from lottery, casino and sports activities
- Income from the provision of general services

Deductions from gross income include the following:

- General business expenses such as electricity, repair charges, salaries and wages, welfare and social security expenses, rent, interest and insurance
- Depreciation (see *Depreciation*)
- Cost of travel
- Cost of guest entertainment and telephone
- Donations and support
- Advertising

Expenses not related to business activities are not deductible. Other nondeductible expenses include the following:

- Profit tax
- Interest paid on loans from shareholders and partners (of partnerships) for capital contribution purposes
- Penalties or fines
- Golf expenses, dancing expenses, gifts and awards
- All types of provisions and reserves

Inventories. The law does not prescribe a basis for the valuation of inventory. Inventory for a tax year is valued at the lower of cost or net realizable value.

Depreciation. Depreciation for accounting persons can be calculated based on the straight-line, double-declining or unit of production method. In the year of acquisition or disposal, depreciation may be claimed for the portion of the asset that was put in use. The following are straight-line depreciation rates that are also used for tax purposes.

Assets	Annual rate (%)
Intangible fixed assets	20/50
Buildings	
Industrial	2/5
Commercial and residential	5/10
Plant and machinery	20
Motor vehicles	20
Office equipment	20
Software	20

Establishment expenses are expensed over two years.

Relief for losses. Losses can be carried forward for a period of five consecutive years. Business operators engaged in agriculture and livestock activities can carry forward losses resulting from an outbreak of diseases or a natural disaster for 10 years. Losses may not be carried back.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Goods, materials and services	7
Exportation of goods to foreign countries	0
Tax on income from the lease of immovable property; payable by the recipient each time the income is received	10
Excise duty; on the domestic production, import or service value of various commodities	
Fuel	5 to 40
Alcoholic drinks	20 to 80
Soft drinks and mineral water	7
Cigarettes and cigars	42 to 57
Perfume and cosmetics	25
Motorbikes	3 to 110
Cars	3 to 102
Motorboats	25
Electrical products (televisions, cameras and musical instruments)	15
Sport related (for example, snooker, football and any game cabinet)	35
Entertainment (nightclub, disco and karaoke)	40
Internet services	2
Lottery and casino activities	30
Social security contributions; imposed on salaries of up to LAK4,500,000 million per month	
Employee	5.5
Employer	6

E. Foreign-exchange controls

The Bank of Laos determines foreign-exchange controls. Foreign investors can freely repatriate their after-tax profits (including withholding tax on dividends) and capital to other countries, subject to certain substantiation requirements.

The currency of Laos is the kip (LAK). Bank accounts may be held in other currencies.

F. Treaty withholding tax rates

	Dividends	Interest	Royalties
	%	%	%
Belarus	5/10	8	5

Because of the rapidly changing tax law in Latvia, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	20
Branch Tax Rate (%)	20
Withholding Tax (%) (a)	
Dividends	0/20 (b)
Interest	0/20 (c)
Royalties	0/20 (d)
Management and Consulting Fees	0/20 (e)
Gains on Transfers of Real Estate or Shares of Real Estate Companies	
Located in Latvia	3/20 (f)
Gains on Rent of Real Estate Located in Latvia	5/20 (g)

- (a) These taxes apply to payments by Latvian residents or permanent establishments to nonresidents.
- (b) Withholding tax is not imposed on dividends, except for dividends paid to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations. Dividends are subject to 20% corporate income tax at the level of the resident distributing companies (for further details, see Section B).
- (c) No withholding tax is imposed on interest payments made by Latvian entities except for interest paid to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations.
- (d) No withholding tax is imposed on royalties, except for royalties paid by Latvian entities to a resident of a state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations.
- (e) The 20% rate applies to management and consulting fees. The 0% rate applies to management and consulting fees paid to residents of countries that have entered into double tax treaties with Latvia (the residence certificate must be submitted).
- (f) The 3% rate is a final withholding tax rate imposed on gains derived by non-resident companies without a permanent establishment in Latvia from sales of Latvian real estate. This tax also applies to sales of shares if certain conditions are met (see Section B). Withholding tax is also imposed if a Latvian non-resident company disposes of real estate by investing it in the share capital of another company (except if the respective alienations are performed within a legal reorganization). A 20% rate can be applied on profits realized from the sale of real estate or shares of a real-estate-rich entity if the taxpayer is a resident of a European Union (EU) country or a country with which Latvia has concluded a double tax treaty. For further details, see *Capital gains* in Section B.

- (g) The 5% withholding tax rate is imposed on gains derived by nonresident companies in Latvia from the rent of Latvian real estate. A 20% rate can be applied on profits realized from rent of real estate located in Latvia if a taxpayer is resident of an EU country or a country with which Latvia has concluded a double tax treaty.

B. Taxes on corporate income and gains

Corporate income tax. Under the Corporate Income Tax Law, corporate income tax is payable at the time when profit is distributed. As a result, the taxable base comprises distributed profits and notional distributed profits.

Distributed profits include the following:

- Dividends, including extraordinary dividends
- Expenses that are equivalent to dividends
- Notional dividends (a notional dividend is a profit share [for example, undistributed profit of current or previous years on which corporate income tax was not paid] for which equity is increased; tax is paid at the moment of decrease of equity [including the case of a company liquidation] or at the moment when a legal entity is registered as a payer of micro-enterprise tax)

Notional distributed profits comprise the following:

- Non-operating expenses
- Doubtful receivables
- Increased interest payments
- Loans to related parties
- Adjustments for transactions with related parties below the arm's-length value
- Liquidation quotas and other specific items
- Value of assets transferred in the course of a reorganization
- Value of assets that a Latvian resident transfers to its foreign permanent establishment if the local tax base is reduced (exit taxation)
- Value of assets that a Latvian permanent establishment transfers to a nonresident if the local tax base is reduced (exit taxation)
- Outcomes of a hybrid mismatch

Resident companies are companies registered in Latvia and companies incorporated in foreign countries that are registered in Latvia as branches or permanent establishments. All other companies are considered to be nonresident companies.

Payments made by a permanent establishment to a nonresident that owns the permanent establishment are treated as expenses that are equivalent to dividends (except expenses that are necessary for the economic activity of the permanent establishment and justified with third-party supporting documents, expenses related to the permanent establishment's operations or general administrative and operational management expenses, to the extent of 10% of the eligible costs). Taxable income of nonresidents is income from business activities or related activities in Latvia. Tax is withheld from payments that residents (except natural persons) and permanent establishments make to nonresidents, if such payments are not subject to personal income tax (including remuneration for management and consultancy services, fees paid for the alienation of real estate located in Latvia, rental income and

dividends, interest payments, royalties and other payments to low-tax or tax-free countries or territories).

Tax rates. Resident companies are subject to tax at a rate of 20% on the gross taxable amount. The net taxable base (distributed profits and notional distributed profits) is divided by coefficient of 0.8 when determining the gross taxable base for the tax period.

Capital gains. Capital gains derived by resident companies are included in the taxable amount. The Latvian legislative acts provide an exception; the amount of distributed profit can be reduced by the portion of income derived from the alienation of shares if the holding period is at least 36 months (not applicable to the transfer of shares of an entity whose real estate proportion in the total amount of assets exceeds 50%). Withholding tax is not applied on capital gains derived by Latvian nonresidents without a permanent establishment in Latvia (except capital gains from real estate). For nonresident companies without a permanent establishment in Latvia, a final withholding tax at a rate of 3% is imposed on proceeds received from the sale of Latvian real estate, as well as from the sale of shares of a company if in the tax year of the sale or in the preceding year, 50% or more of the company's assets, directly or indirectly, consists of real estate located in Latvia. A taxpayer who is a resident of an EU country or a country with which Latvia has concluded a double tax treaty may choose to tax gains realized due to the sale of real estate located in Latvia or the sale of shares of a real-estate-rich company under the standard taxation regime. In this case, 20% tax applies to the profits gained from the sale of real estate.

Administration. The tax period is a calendar month. Tax returns must be filed by the 20th day of the following month. However, the income tax must be paid by the 23rd day of the following month.

Foreign tax relief. A foreign tax credit is available to resident companies for foreign tax paid on taxable income earned abroad. The amount of credit may not exceed an amount equal to the tax that would be imposed in Latvia on dividends from the income earned abroad. Resident companies are allowed to decrease the dividend amount included in their taxable base by dividends that are received from a dividend payer who is a corporate income taxpayer in its country of residence or by dividends received from which tax was withheld. This does not apply to dividends received from low-tax or tax-free jurisdictions or territories.

A resident company is entitled to reduce the amount of dividends included in the taxable base during the tax period to the extent that the resident company received the income from a foreign permanent establishment during the tax period, if the foreign permanent establishment pays tax on the income received or withholding tax is withheld abroad from the income received. This is not applicable to cases in which the permanent establishment is located or registered in the state or territory that has been recognized as a low-tax or no-tax state or territory in accordance with Cabinet Regulations.

C. Determination of taxable income

General. The net taxable base consists of distributed profits and notional distributed profits divided by a coefficient of 0.8 (see *Corporate income tax* and *Tax rates* in Section B).

Thin capitalization. For corporate income tax purposes, companies must include in the taxable base the following amounts:

- The amount of interest payments in proportion to the excess of the average liability over an amount equal to four times shareholders' equity at the beginning of the tax year less any revaluation reserve
- If interest payments exceed EUR3 million in the accounting year, the amount of interest payments in excess of 30% of the profit stated in the income or loss statement prior to the calculation of the corporate income tax, increased by interest payments and calculated depreciation

The thin-capitalization rules do not apply to interest on loans obtained from the following:

- Credit institutions that are residents of Latvia, another EU/European Economic Area (EEA) country or a country with which Latvia has concluded a double tax treaty that has entered into force
- Latvian Treasury
- Development Finance Institution
- Nordic Investment Bank
- European Bank for Reconstruction and Development
- European Investment Bank
- Council of Europe Development Bank
- World Bank Group
- Publicly traded Latvia, EU or EEA state debt securities
- Governmental financing, foreign trade lending or guarantee organizations, which are residents of a country with which Latvia has concluded a double tax treaty that has entered into force or are stated in the respective double tax treaty

The first calculation described above for calculating the limitation on the interest payments does not apply if the loans are obtained from financial institutions that are resident in Latvia, another EU/EEA country or a country with which Latvia has concluded a double tax treaty that has entered into force and if such financial institutions provide crediting or financial leasing services and are under the supervision of credit institutions or the financial monitoring agency.

The thin-capitalization rules' debt-equity ratio should not be applied for interest costs in the 2021 and 2022 financial years (special regulation as a result of the COVID-19 pandemic).

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax on goods and services, including imports	
Standard rate	21

Nature of tax	Rate (%)
Supplies of medical products, infant products and tourist accommodation services	12
Fresh fruits, berries and vegetables, books and subscriptions	5
Exports	0
Social security contributions, paid by	
Employer	23.59
Employee	10.5
Property tax; rates applied to the cadastral value	
Standard rate; applicable to land, engineering structures and buildings, except for residential buildings	1.5
Increased property tax rate; applicable to buildings in poor conditions and uncultivated agriculture land	3
Rates on residential buildings	
Cadastral value under EUR56,915	0.2
Cadastral value between EUR56,915 and EUR106,715	0.4
Cadastral value above EUR106,715	0.6

E. Miscellaneous matters

Foreign-exchange controls. The official currency of Latvia is the euro (EUR). No significant foreign-exchange controls are imposed in Latvia.

Transfer pricing. Latvian law requires the arm's-length principle to be followed in all related-party transactions. The Latvian tax authorities may reassess transactions between related parties and recalculate the tax base if the prices applied in related-party transactions are not arm's length. Transfer-pricing methods, such as the comparable uncontrolled price, resale price, cost-plus, profit-split and transactional net margin methods, may be used to assess whether the prices applied in controlled transactions are consistent with the arm's-length principle.

For transactions carried out on or after 1 January 2018, the following transfer-pricing documentation must be prepared and submitted to the tax authorities within 12 months after the end of the respective financial year:

- The Base Erosion and Profit Shifting (BEPS) Master File must be prepared and submitted if the annual amount of related-party cross-border transactions exceeds EUR5 million and the taxpayer's net turnover exceeds EUR50 million or if the annual amount of related-party cross-border transactions exceeds EUR15 million.
- The BEPS Local File must be prepared and submitted if the amount of related-party cross-border transactions exceeds EUR5 million.

For transactions carried out on or after 1 January 2018, the following transfer-pricing documentation must be prepared within 12 months after the end of the respective financial year and submitted to the tax authorities within 1 month after request:

- The BEPS Master File must be prepared and filed after request if the annual amount of related-party cross-border transactions does not exceed EUR15 million and the taxpayer's net turnover

does not exceed EUR50 million, but the annual amount of related-party cross-border transactions exceeds EUR5 million.

- The BEPS Local File must be prepared and filed after request if the amount of related-party cross-border transactions exceeds EUR250,000, but does not exceed EUR5 million. The Local File must include all transactions that exceed EUR20,000 in the particular financial year.

The Country-by-Country Report notification applies to all resident entities that are part of a qualifying group (the threshold is EUR750 million). The Country-by-Country Report for the financial year should be filed at the end of the respective financial year.

Transfer-pricing disclosures regarding the total amount of transactions with related parties during the financial year must be included in the 12th month's corporate income tax return, which is due on the 20th day of the following month.

The generally accepted practice for transfer-pricing issues is based on the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

Taxpayers can enter into an advance pricing agreement (APA) with the tax administration on the establishment of an arm's-length price (value) for a transaction conducted with a related foreign company if the transaction annual value is planned to exceed EUR1,430,000. If a taxpayer complies with an APA, the tax administration may not adjust in a tax audit the arm's-length price established for the transaction.

F. Treaty withholding tax rates

The domestic withholding tax rate for dividends, interest and royalties is 0% (with certain exceptions, but these exceptions do not apply to treaty countries). The following table lists the withholding tax rates under Latvia's tax treaties.

	Dividends %	Interest %	Royalties %
Albania	5/10 (a)	5/10 (p)	5
Armenia	5/15 (a)	10	10
Austria	5/10 (a)	10	5/10 (b)

Vietnam	5/10 (aa)	10	7.5/10 (bb)
Non-treaty jurisdictions	0/20 (e)	0/20 (e)	0/20 (e)

(a) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends.

(b) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.

- (c) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting power of the payer of the dividends.
- (d) The 0% rate applies if the recipient of the dividends is a company (or a partnership) that holds 25% of the capital and voting power of the payer of the dividends.
- (e) See Section A.
- (f) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 75% of the capital of the payer of the dividends. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to all other dividends.
- (g) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting power of the payer of the dividends.
- (h) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the payer of the dividends.
- (i) The 0% rate applies to interest paid on loans granted by banks, or to the government, the central bank or any financial institution controlled by the government of Tajikistan.
- (j) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 20% of the capital of the payer of the dividends.
- (k) The 7% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting, patents, trademarks, designs, and models, plans, secret formulas or processes. The 5% rate applies to other royalties.
- (l) The 10% rate applies to royalties paid for the use of, or the right to use, cinematographic films or films or tapes for radio or television broadcasting. The 5% rate applies to other royalties.
- (m) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 10% of the capital of the payer of the dividends and if the dividends are paid out of profits that are exempt from tax or subject to tax at a rate lower than the normal Israel tax rate under the Israel investment encouragement law.
- (n) The 5% rate applies to interest paid by Israel-registered banks. The 10% rate applies to other interest payments.
- (o) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes and other means of image or sound reproduction for radio or television broadcasting. The 10% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial or scientific equipment
 - Information concerning industrial, commercial or scientific experience
- (p) The 5% rate applies to interest paid on loans granted by banks.
- (q) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the voting capital of the company paying the dividends.
- (r) The 6% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- (s) Latvia has ratified the tax treaty with Kuwait, which will enter into force when Latvia receives notification that Kuwait has also ratified the treaty.
- (t) The 0% rate applies if the beneficial owner of the dividends or interest is a company (other than a partnership). The 5% rate applies to dividends or interest in all other cases.
- (u) The 0% rate applies if the beneficial owner of the dividends or interest is a company (other than a partnership). The 10% rate applies to dividends or interest in all other cases.
- (v) The 0% rate applies if the beneficial owner of the royalties is a company (other than a partnership). The 5% rate applies to royalties in all other cases.
- (w) The 0% rate applies if the interest is paid by a company that is a resident of a contracting state to a company (other than a partnership) that is a resident of the other contracting state and is the beneficial owner of the interest. The 10% rate applies to interest in all other cases.

-
- (x) The 0% rate applies to royalties for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience, if the royalties are paid by a company that is a resident of a contracting state to a company (other than a partnership) that is a resident of the other contracting state and is the beneficial owner of the royalties. The 3% rate applies to royalties in all other cases.
- (y) The 0% rate applies if the royalties are paid by a company that is a resident of a contracting state to a company (other than a partnership) that is a resident of the other contracting state and is the beneficial owner of the royalties. The 5% rate applies to royalties in all other cases.
- (z) The 0% rate applies if the beneficial owner of the dividends is a company (other than a partnership). Dividends arising in the Hong Kong Special Administrative Region (SAR) are exempt from tax in the Hong Kong SAR if they are paid the following:
- The government of the Hong Kong SAR
 - The Hong Kong Monetary Authority
 - The Exchange Fund
 - An institution wholly or mainly owned by the government of the Hong Kong SAR (as may be agreed from time to time between the competent authorities)
- The 10% rate applies to dividends in all other cases.
- (aa) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 70% of the capital of the payer of the dividends.
- (bb) The 7.5% rate applies to royalties for technical services. The 10% rate applies to other royalties.

A. At a glance

Corporate Income Tax Rate (%)	17
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	17
Withholding Tax (%)	
Dividends	10 (a)
Interest	10 (a)(b)
Royalties from Patents, Know-how, etc.	10 (c)
Payments for Services Provided by	
Nonresidents	7.5
Branch Remittance Tax	10 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) Applicable to both residents and nonresidents.
 (b) Bank interest is subject to a 10% withholding tax for residents and nonresidents.
 (c) Applicable if the royalties are received by Lebanese holding companies (see Section B).
 (d) Profits derived by branches operating in Lebanon are presumed to be distributed and consequently are subject to remittance tax.

B. Taxes on corporate income and gains

Corporate income tax. Lebanese companies and branches of foreign companies carrying on business in Lebanon are subject to tax only on their income derived from Lebanon. A company is considered Lebanese if it is registered in Lebanon. The following

are the two main conditions for registering a company in Lebanon:

- The company's registered office is located in Lebanon.
- The majority of the company's board of directors is of Lebanese nationality (unless the government authorizes the company to have less than a majority).

Rates of corporate income tax. In general, companies are subject to tax at a flat rate of 17% under Law No. 64, published on 26 October 2017.

Under Law No. 64, the gain realized from the revaluation of fixed assets (not exceptional revaluation) is subject to 10% capital gains tax unless certain conditions are met. The tax is payable with the corporate income tax (that is, within five months following the end of the fiscal year).

Profits derived in Lebanon by branches of foreign companies are presumed to be distributed and consequently are subject to the 10% remittance tax.

Contractors on government projects are subject to tax at the regular corporate income tax rate on a deemed profit of 10% or 15% of actual gross receipts, depending on the type of project.

Lebanese holding companies and offshore companies are exempt from corporate income tax. However, special taxes apply to these companies (see Section D). A Lebanese holding company is a special type of company that is formed to hold investments in and outside Lebanon ("holding company" is not synonymous with "parent company"). An offshore company is a company that engages exclusively in business transactions outside Lebanon.

Insurance companies are subject to tax at the regular corporate income tax rate of 17% under Law No. 64 on a deemed profit ranging from 5% to 10% of their premium income.

Lebanese air and sea transport companies are exempt from corporate income tax. Foreign air and sea transport companies are also exempt from corporate income tax if their home countries grant reciprocal relief to Lebanese companies. However, dividends distributed remain subject to movable capital tax.

Profits derived by industrial enterprises established in Lebanon after 1 January 1980 are exempt from income tax for up to 10 years from the date of commencement of production if such enterprises satisfy all of the following conditions:

- The factory is built in certain areas the government intends to develop.
- The object of the enterprise is to manufacture new goods and materials that were not manufactured in Lebanon before 1 January 1980.
- The total value of property, plant and equipment used in Lebanon by the new enterprise and allocated for the production of new goods and materials is at least LBP500 million.

Profits qualifying for this tax holiday may not exceed the original cost of the property, plant and equipment used by the enterprise on the date production begins.

Under Law No. 248, dated 15 April 2014, an exemption of 50% applies to profits realized from the exportation of goods produced

in Lebanon. A certificate-of-origin document is needed to prove that the exports are from Lebanon. Companies engaged in the extraction of natural resources are excluded from this exemption. Decision 854/1, which was released in September 2016, explains the mechanism of the application of this law.

Capital gains. Capital gains on the disposal of fixed assets are taxed at a rate of 15% under Law No. 64.

If a company reinvests all or part of a capital gain subject to the 15% rate to construct permanent houses for its employees during a two-year period beginning with the year following the year in which the gain was realized, it may obtain a refund of the tax imposed on the reinvested gain.

Administration. The official tax year is the calendar year. Companies or branches may use a different tax year if they obtain the prior approval of the tax authorities.

Corporations with a financial year-end of 31 December must file their tax returns by 31 May of the year following the year in which the income is earned. Other corporations must file their returns within five months of their financial year-end. The tax authorities may grant a one-month extension at the request of the taxpayer if the taxpayer's circumstances warrant the extension. Tax must be paid by the same deadline.

If a taxpayer does not submit timely returns, the tax authorities may levy tax on an amount of deemed profit and impose a fine of 5% of the tax due for each month or part of a month that the return is late. The minimum penalty is LBP750,000 for joint stock companies, LBP500,000 for limited liability companies, and LBP100,000 for other taxpayers. The maximum penalty is 100% of the tax due. For failure to pay tax by the due date, a penalty of 1% of the tax due is imposed for each month or part of a month that the tax remains unpaid.

Dividends and interest. Dividends are subject to a withholding tax of 10%. Interest is subject to a 10% or 7.5% withholding tax, depending on each case.

Dividends received by a Lebanese corporation from another Lebanese corporation are excluded from the taxable income of the receiving company. However, dividends redistributed by a parent company to its shareholders or partners are subject only to a withholding tax of 10%.

Dividends distributed by Lebanese holding companies and off-shore companies are exempt from dividend withholding tax.

Dividends and interest income earned by banks and financial institutions and generated from trading activity are subject to tax at the regular corporate tax rate of 17%.

Dividends received by banks from their subsidiaries are subject to a 10% dividend tax at the level of subsidiary.

C. Determination of trading income

General. Taxable income is calculated based on the accounting profit together with the tax adjustments. Lebanese taxpayers

should follow International Financial Reporting Standards in maintaining their books of accounts.

Deductions are allowed for expenses incurred wholly and exclusively for business purposes. Branches, subsidiaries and affiliates of foreign companies may deduct the portion of foreign head office overhead charged to them if the auditors of the head office present to the tax authorities a certificate confirming that the overhead was fairly and equitably allocated to the various subsidiaries, associated companies and branches and that the amount of head office overhead charged back to the Lebanese entity is in accordance with the limits set by the Ministry of Finance. However, the deductible portion of the overhead charged back to the Lebanese entity is subject to a tax of 7.5% (see Section D).

Inventories. Inventories are normally valued at the lower of cost or net realizable value. Cost is usually determined using the first-in, first-out or weighted average cost method.

Provisions. The following are the only provisions that are allowed for tax purposes:

- The actual amount due at the balance-sheet date for employees' end-of-service indemnities
- Doubtful debts owed by debtors that have been declared legally bankrupt
- A provision for obsolete inventory if the procedures described below are followed

Banks and financial institutions may deduct provisions for doubtful debts before declaration of bankruptcy of the debtor if they obtain the approval of the Banking Control Commission of the Central Bank of Lebanon.

Tax depreciation. Depreciation must be calculated using the straight-line method. The Ministry of Finance has specified the minimum and maximum depreciation rates. A company may select appropriate rates within these limits for its activities. Companies must notify the relevant income tax authorities of the adopted depreciation rates before the declaration deadline. Otherwise the company is considered eligible for the minimum depreciation rates only.

Assets	Minimum rate (%)	Maximum rate (%)
Developed buildings from concrete for use in the commercial, tourism and service sectors (for example, offices, shops, stores, restaurants, hotels and hospitals)	2	5
Developed buildings from concrete that are used for industry and handcrafts	3	10
Developed buildings from metal for commercial and industrial use	6	20
Large renovations, maintenance and decoration works for buildings	6	25
Technical installations, industrial equipment and accessories	8	25
Computer hardware and software	20	50
Cars	10	25

Assets	Minimum rate (%)	Maximum rate (%)
Vehicles for transportation of goods and people	6	20
Means of sea transport	5	10
Means of air transport	20	25
Office equipment, furniture and fixtures	8	25
Non-consumable tools in restaurants and coffee shops (for example, glass cups and silver spoons)	— *	— *
Gas bottles	8	20

* These items are subject to count each year and are valued at cost.

Relief for tax losses. Tax losses may be carried forward for three years.

Groups of companies. Parent companies are not required for statutory purposes to prepare consolidated financial statements that incorporate the activities of their associated companies and subsidiaries. Each legal entity is taxed separately.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); imposed on the supply of goods and services by a taxable person in the course of an economic activity in Lebanon and on imports; certain supplies are exempt; registration with the Directorate of VAT is required if an entity's total taxable turnover exceeded LBP100 million in any period varying from one to four prior consecutive quarters; all persons performing taxable economic activities have the option of registering if their turnover exceeds LBP50 million in a period varying from one to four prior consecutive quarters; importers and exporters of VAT-able or zero-rated activities are now required to register with the Directorate of VAT, regardless of their turnover	
Standard rate	11%
Tax on portion of foreign head office overhead allocated to a Lebanese subsidiary, associated company or branch	7.5%
Customs duties on imported goods	Various
Social security contributions	
Sickness and maternity, on monthly salaries up to LBP2,500,000; paid by	
Employer	8%
Employee	3%
Family allowances, on monthly salaries up to LBP1,500,000; paid by employer	6%

Nature of tax	Rate
End-of-service indemnity, on monthly salaries; paid by employer	8.5%
Proportional stamp duty; imposed on deeds and contracts, except for some contracts that are subject to a lump-sum stamp duty such as the issuance of share capital, commercial bills and other agreements; employment contracts for Lebanese employees are exempt from stamp duty if the employees are registered with the National Social Security Fund; contracts related to foreign transactions of Lebanese offshore companies are also exempt	0.4%
General rate	4%
Built property tax; imposed on rental income generated by entities subject to income tax; such income is not subject to corporate income tax and is excluded from the taxable results together with the related expenses; the annual net income from each parcel of real estate is separately subject to built property tax	
Net income not exceeding LBP40 million	4%
Net income exceeding LBP40 million, but not exceeding LBP80 million	6%
Net income exceeding LBP80 million, but not exceeding LBP120 million	8%
Net income exceeding LBP120 million, but not exceeding LBP200 million	11%
Net income exceeding LBP200 million	14%
Municipal taxes on developed property	
Sidewalk and sewage tax, paid by landlords on annual gross rental from buildings (since 1989, the municipalities have collected this tax from tenants)	1.5%
Security and cleaning tax, paid by tenant on a percentage of the rental value of buildings (nonprofit enterprises are exempt from this tax)	
Residential buildings (minimum tax of LBP5,000)	5%
Nonresidential buildings (minimum tax of LBP10,000)	7%
Registration duty; paid by purchaser of land or buildings; levied on the fair-market value of the building at a rate of 3% on the part that does not exceed LBP375 million and a rate of 5% on the part that exceeds LBP375 million	3% to 5%
Fee on the sale contract amount; payable within 15 days of the contract date; considered as a tax credit with respect to the total registration fees, provided that the registration occurs within one year after the contract date	2%

Nature of tax	Rate
Annual tax on total capital and reserves of Lebanese holding companies, up to a maximum tax of LBP5 million (tax is due in full from the first year of company's operations, regardless of the month operations begin); imposed on amounts	
Not exceeding LBP50 million	6%
Exceeding LBP50 million but not exceeding LBP80 million	4%
Exceeding LBP80 million	2%
Annual tax on Lebanese offshore companies (tax is imposed in full from the first year of company's operations, regardless of the month operations begin)	LBP1 million

E. Miscellaneous matters

Foreign-exchange controls. Lebanon does not impose any formal foreign-exchange controls.

Anti-avoidance legislation. Under the Lebanese tax law, criminal or tax penalties may be imposed for specified tax-avoidance schemes.

Related-party transactions. Transactions with related entities must be carried out on an arm's-length basis.

F. Tax treaties

Lebanon has entered into double tax treaties with Algeria, Armenia, Bahrain, Belarus, Bulgaria, Cuba (not enforced), Cyprus, the Czech Republic, Egypt, France, Gabon (not enforced), Iran, Italy, Jordan, Kuwait, Malaysia, Malta, Morocco, Oman, Pakistan, Poland, Qatar, Romania, the Russian Federation, Senegal, Sudan (not enforced), Syria, Tunisia, Turkey, Ukraine, the United Arab Emirates and Yemen.

A double tax treaty between Lebanon and Saudi Arabia is currently under negotiation; however, at the time of writing, its content was not yet available and there was no information regarding its date of entry into force.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate (%)	25 (a)
Withholding Tax (%)	
Dividends	25 (b)(c)
Interest	25 (b)(d)(e)
Royalties	25 (b)(d)
Management Charges	25 (b)(d)
Payments for Services	10 (b)
Payments to Resident Contractors	5
Branch Remittance Tax	25 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited

- (a) For manufacturing companies and commercial farming operations, the rate is 10%. For companies that manufacture and export outside the Southern African Customs Union, the rate is now also 10%.

- (b) These withholding taxes apply to payments to nonresidents only.
- (c) Dividends paid by manufacturing companies subject to a concessional corporate tax rate are exempt from withholding tax.
- (d) For interest, royalties and management charges paid by manufacturing companies subject to a concessional corporate tax rate, the rate is 15%.
- (e) A 10% withholding tax is imposed on interest paid to residents.
- (f) This tax is imposed on repatriated income. Repatriated income is the chargeable income of the branch less Lesotho income tax paid on the chargeable income and any profits reinvested in the branch. This tax is potentially subject to relief under a double tax treaty.

B. Taxes on corporate income and gains

Company tax. Lesotho resident companies are subject to company tax on income from all sources located in and outside Lesotho. Nonresident companies are subject to tax in Lesotho on Lesotho-source income only.

Rates of company tax. The standard tax rate is 25%.

The rate is reduced to 10% for income from manufacturing and commercial farming operations and for companies that manufacture and export to countries outside the Southern African Customs Union. The special rate for manufacturing income does not apply to a Lesotho branch of a nonresident company.

Capital gains. Capital gains are treated as ordinary income and subject to tax at the regular corporate income tax rate.

Administration. The year of assessment runs from 1 April to 31 March. However, a company may select a year of assessment other than 1 April to 31 March, subject to the approval of the Commissioner of Income Tax.

Returns must be filed by the last day of the third month following the end of the year of assessment. If a return is not filed, the Commissioner may issue an estimated assessment.

Tax is payable in three installments, which are due on 30 September, 31 December and 31 March of each year of assessment. The fourth and final payment is due on submission of the return. For companies whose year-end is other than 31 March, the installments of tax are due on the last day of the 6th, 9th and 12th months of the year of assessment.

Withholding taxes are payable when the payee becomes legally entitled to the payment.

If tax levied under the Income Tax Act is not paid by the due date, additional tax of 22% per year is payable, compounded annually and apportioned per month or part of a month.

Dividends. Resident companies are exempt from tax on dividends received, but they may not deduct related expenses or dividends declared. A resident company is a company that satisfies one of the following conditions:

- It is incorporated and formed under the laws of Lesotho.
- Its management and control are located in Lesotho.
- It undertakes the majority of its operations in Lesotho.

Dividends paid to nonresidents are subject to a final withholding tax at a rate of 25%. Dividends paid by manufacturing companies

subject to a concessionary corporate tax rate are exempt from withholding tax.

Resident companies that pay dividends are liable for advance corporation tax (ACT).

The following is the calculation for ACT:

$$\frac{A}{100 - A} \times 100$$

In the above calculation, A is the corporate tax rate for income other than manufacturing income.

Installment tax is set off against ACT; that is, installment tax paid settles the ACT due.

Foreign tax relief. In the absence of treaty relief provisions, unilateral relief is granted through a credit for foreign taxes paid on income earned abroad. The amount of the credit is the lesser of the foreign tax paid and the Lesotho tax on the foreign-source income.

C. Determination of trading income

General. Taxable income is financial statement income, adjusted as required by the Income Tax Act. To be eligible for deduction, expenses must be incurred in the production of income, and they must not be of a capital nature.

Inventories. Inventories are valued at the lower of cost or realizable value. Cost is determined using the first-in, first-out (FIFO) method or the average-cost method.

Provisions. Specific provisions are allowable for tax purposes. General provisions are not allowed.

Depreciation. Depreciation is computed using the declining-balance method at the following rates.

Asset	Rate (%)
Motor vehicles	25
Furniture, fixtures and office machines	20
Plant and machinery	20
Industrial buildings and public utility plant	5
Mining	100
Other assets	10

Relief for losses. Assessed losses may be carried forward for an unlimited period. A carryback of losses is not allowed.

Groups of companies. Companies in a group may not share their tax losses with profitable companies in the group.

D. Value-added tax

Value-added tax is levied at the following rates:

- Specified basic commodities and exports: 0%
- Electricity: 10%
- Telecommunications: 15%
- Liquor and tobacco: 15%
- Other commodities: 15%

E. Tax treaties

Lesotho has entered into tax treaties with Botswana, Eswatini, Mauritius, South Africa and the United Kingdom. The following are the withholding tax rates for dividends, interest, royalties and management and technical fees under these treaties.

	Dividends	Interest	Royalties	Management and technical fees
	%	%	%	%
Botswana	15 (d)	10	10	10
Eswatini	12.5 (d)	10	10	10
Mauritius	10	10	10	0
South Africa	15 (a)	10	10	7.5
United Kingdom	10 (c)	10	7.5	0
Non-treaty jurisdictions (b)	25	25	25	25

- (a) The tax rate is reduced to 10% of the gross amount of the dividends if the beneficial owner of the dividends is a company that holds at least 10% of the capital of the company paying the dividends.
- (b) See applicable footnotes to Section A.
- (c) The tax rate is reduced to 5% of the gross amount of the dividends if the beneficial owner of the dividends is a company that holds at least 10% of the capital of the company paying the dividends.
- (d) The tax rate is reduced to 10% of the gross amount of the dividends if the beneficial owner of the dividends is a company that holds at least 25% of the capital of the company paying the dividends.

This chapter reflects the law in Libya as of the time of writing. In view of the current transition in Libya, the legislative situation is difficult to assess and may be subject to change. Consequently, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	20 (a)
Capital Gains Tax Rate (%)	20 (a)(b)
Branch Tax Rate (%)	20 (a)
Withholding Tax (%)	
Dividends	0 (c)
Interest	0
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (d)

- (a) Corporate income tax is imposed at a flat rate of 20%. In addition, Jihad Tax at a rate of 4% is imposed on the profits of Libyan companies and branches. Oil companies are subject to a composite rate of 65%, which includes income tax, Jihad Tax and a surtax.
- (b) Capital gains are treated as trading income.
- (c) Tax on dividends has been reinstated, but regulations relating to rates and rules of collection have not yet been issued.
- (d) Oil companies may carry forward losses 10 years.

B. Taxes on corporate income and gains

Corporate income tax. Libyan companies and foreign branches are subject to tax on their worldwide income. A national company or foreign branch is considered to be resident in Libya if it is registered with the Ministry of Economy. A foreign company that does not register but engages in activities in Libya is deemed to immediately have de facto permanent establishment status in Libya and is subject to tax on its income.

Tax rates. Corporate income tax is imposed at a flat rate of 20% of profits.

In addition, Jihad Tax is payable at a rate of 4% of profits.

Oil companies are subject to a composite rate of 65%, which includes income tax, Jihad Tax and a surtax.

Companies established under Law 9/2010 (Investment Law) or Law 7/2003 (Tourism Law) are exempt from corporate taxes for up to 5 years and a possible additional 3 years or 10 years, respectively, as well as from stamp duty and import duties.

Capital gains. Capital gains are included in ordinary income and are taxed at the regular corporate income tax rate.

Administration. The financial year is the calendar year, but, on application, the Tax Department may allow a different financial year.

An annual tax return must be filed within one month after approval of the company or branch accounts or four months after the year-end, whichever is earlier. Consequently, for companies using the calendar year as their financial year, tax returns must be filed by 30 April.

Tax is payable in four quarterly installments beginning with the first quarterly due date after the issuance of an assessment. The quarterly due dates are 10 March, 10 June, 10 September and 10 December.

Dividends. Tax on dividends has been reinstated, but regulations relating to rates and rules of collection have not yet been issued.

Royalties. Subject to the provisions of double tax treaties, royalties are treated as trading income.

Foreign tax relief. Libya does not grant any relief for foreign taxes unless a double tax treaty applies.

C. Determination of trading income

General. Taxable income is based on financial statements prepared in accordance with generally accepted accounting principles (GAAP), subject to certain adjustments. A detailed body of Libyan GAAP does not exist.

Business expenses are generally deductible if incurred for business purposes unless specifically disallowed by the tax law.

Basis of assessment. The Commercial Code (Law 23/2010) requires that a report be issued on the accounts. Tax Law 2010 states that this will be relied on, and tax will be assessed on declared profits. Tax audits of accounts will be discretionary.

Notwithstanding the Commercial Code and Tax Law, in practice, tax continues to be assessed on private Libyan and foreign companies (joint stock companies and branches) based on a percentage of turnover. This is known as the “deemed profit” basis of assessment. Consequently, tax is payable even if losses are declared.

The percentage of deemed profit based on turnover varies according to the type of business activity. These percentages include the following:

- Civil works and contracting: 10% to 15%
- Oil service: 15% to 25%
- Design and consulting engineers: 25% to 40%

Each case is reviewed individually and a percentage is determined within the above broad ranges. After the preliminary final assessments are issued, taxpayers have a period of 45 days in which to negotiate an agreed settlement or to appeal. Thereafter, appeals may be made to the First and Second Appeal Committees, the Court of Appeal and finally the Supreme Court.

The deemed profit percentage applied to any year is higher than the profit percentage declared in the annual tax return, unless the actual profit declared is significantly higher than the deemed rate usually applied.

The deemed profit basis of assessment does not apply to Libyan public companies, which are assessed on an actual basis.

Inventories. Inventories are valued at cost.

Provisions. General provisions are not allowed.

Tax depreciation. Depreciation must be computed using the straight-line method. The following are some of the standard depreciation rates allowed in Libya.

Asset	Rate (%)
Furniture and tools	15 to 25
Buildings	4 to 10
Passenger cars	20
Computer hardware	25
Computer software	50

Head office overhead charges are limited to 5% of allowable general and administrative expenses.

Relief for losses. In general, losses may be carried forward five years. However, oil companies may carry forward losses 10 years. Losses may not be carried back.

Groups of companies. Libyan law does not provide for the fiscal integration of related parties.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Social security contributions; on employee's annual salary; paid by Employer	11.25
Employee	3.75

Nature of tax	Rate (%)
Stamp duty; the Stamp Duty Law contains 45 schedules; the most relevant items for companies and branches are the duties to register contracts and subcontracts; customers do not pay invoices unless contracts are registered and duty paid; duty for registration is based on the contract value	
Contracts	1
Subcontracts	0.1
Import duties	
Basic rate	5
Vehicles and plant	10
Luxury items	15

E. Foreign-exchange controls

The Libyan currency is the dinar (LYD).

By concession, Libyan branches of foreign companies may be paid directly offshore (up to 100%).

Libyan joint stock companies with a foreign shareholding (which may be up to 49%) may be paid in foreign currency, but the payments must be made into accounts held at Libyan banks.

As a result, under the law, no issue exists with respect to the remittance of profits.

F. Tax treaties

Libya has entered into a multilateral tax treaty with the other Maghreb Union countries (Algeria, Mauritania, Morocco and Tunisia). It has also entered into double tax treaties with Egypt, France, India, Malta, Pakistan, Singapore, the Slovak Republic and the United Kingdom.

Libya has signed double tax treaties with many other Asian and European countries, but these treaties have not yet been ratified.

Libya has entered into a treaty of "Friendship and Co-Operation" with Italy.

A. At a glance

Corporate Income Tax Rate (%)	12.5 (a)
Capital Gains Tax Rate (%)	24 (b)
Branch Tax Rate (%)	12.5 (a)
Withholding Tax (%)	
Dividends	0
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (c)

- (a) The minimum corporate income tax is CHF1,800 per year.
 (b) This is the maximum rate that is applicable for real estate profits. See Section B.
 (c) The amount of the offsetting loss is limited (see Section C).

B. Taxes on corporate income and gains

Corporate income tax. The current Liechtenstein tax law entered into force on 1 January 2011. Certain tax-favorable situations may result by applying the notional interest deduction (see *Notional interest deduction*). In June 2013 and September 2014, parliament passed amendments of the Liechtenstein tax law to reduce the budget deficit (for example, changes to notional interest deduction; see *Notional interest deduction*). Further amendments were enacted, effective from 2017, to incorporate the Base Erosion and Profit Sharing (BEPS) measures into the Liechtenstein tax law. In 2017, the European Union (EU) Code of Conduct group published a review of Liechtenstein's tax system and requested amendment of the country's corporate taxation regime. To avoid inclusion on the EU's list of non-cooperative tax jurisdictions, Liechtenstein revised its tax law in June 2018 and introduced anti-avoidance rules generally applicable as of the 2019 tax year. The new rules have implications for dividend income

and capital gains derived from participations in foreign entities as well as for the notional interest deduction.

Resident corporations carrying on activities in Liechtenstein are generally taxed on worldwide income other than income from foreign real estate. Income from permanent establishments abroad is exempt from income tax.

Branches of foreign corporations and nonresident companies owning real property in Liechtenstein are subject to tax on income attributable to the branch or real property.

Rates of corporate tax. Companies resident in Liechtenstein and foreign enterprises with permanent establishments in Liechtenstein are subject to income tax. The corporate income tax rate is 12.5%. The minimum corporate income tax is CHF1,800 per year, effective from 1 January 2017.

Notional interest deduction. Deemed interest on the equity of the taxpaying entity may be deducted from taxable income. Parliament sets the applicable interest rate annually in the financial law, based on the market development. The rate is 4% for 2022. The notional interest deduction on equity can reduce taxable income only to CHF0. As a result, loss carryforwards cannot be generated by the notional interest deduction. The 2018 tax law revision provided new anti-avoidance rules in connection with intercompany relationships and transactions. Interest payments for debt capital at the level of the parent company may no longer be fully tax-deductible if the parent company invests such debt capital to acquire a subsidiary and if the respective subsidiary is entitled to a notional interest deduction. In addition, the deduction is restricted for intercompany transactions that are performed for the reason of tax avoidance only (for example, cash or in-kind contributions of related parties, acquisitions of businesses held by related parties and intragroup transfers of participations).

Capital gains. Capital gains, except those derived from the sales or liquidations of investments in shares or similar equity instruments and from the sales of real property, are included in income and subject to tax at the regular rate.

Capital gains derived from sales, liquidations or unrealized appreciations of investments in shares or similar equity instruments are not taxed in Liechtenstein, subject to the rule described in the next sentence. Under the 2018 tax law revision, the tax exemption for capital gains derived from participations in foreign entities generally applies only if at least one of the following circumstances exists:

- The total gross revenue of the foreign subsidiary derived from passive sources is less than 50%.
- The net profits of the foreign subsidiary are not subject to overall low taxation (including potential foreign taxes).

Real estate profits tax applies to capital gains from the sale of real property. The tax rate depends on the amount of taxable profit. The maximum rate is 24%.

Administration. The tax year for a company is its fiscal year.

Companies with operations in Liechtenstein must file their tax return and financial statements no later than 1 July of the year following the end of the fiscal year (extension of the filing deadline of up to six months is possible in specific cases if the provisional invoice for such fiscal year is paid). The tax authorities issue a tax assessment, generally in the second half of the calendar year, which must be paid within 30 days of receipt. If they obtain approval from the tax administration, companies may pay their tax in installments.

Dividends. Dividends are generally not included in the taxable income of companies subject to tax. However, in the course of the incorporation of the BEPS measures, a correspondence principle was introduced. Under this principle, income, such as dividend income received by a Liechtenstein parent from investments of at least 25% in the capital of a company, may be reclassified to taxable income if such a payment qualifies as tax-deductible expense at the level of the paying subsidiary. In addition to this already established exception, the 2018 tax law revision further limits the application of the tax exemption by also applying the new rule described in *Capital gains* to dividends.

Distributions of Liechtenstein stock corporations (and other companies with capital divided into shares) are generally not subject to a withholding tax (the so-called coupon tax was abolished, effective from 1 January 2011).

C. Determination of trading income

General. Taxable income is accounting income, subject to adjustments for tax purposes and excluding income from capital gains from sales of shares or similar equity instruments, dividends on investments in shares or similar equity instruments, foreign real property and income from permanent establishments located abroad.

Expenses related to the company's business are generally deductible. Taxes are not deductible.

Nondeductible expenses include hidden distributions to shareholders or related persons and excessive depreciation.

Inventories. Inventories must be valued at the lower of cost or market value, with cost calculated using the first-in, first-out (FIFO) or average-cost method. Companies may establish a general inventory reserve of up to one-third of the inventory cost or market value at the balance sheet date if detailed inventory records are available for review by the tax authorities. The need for a reserve exceeding this amount must be documented to the satisfaction of the tax authorities.

Depreciation. Depreciation of fixed assets that is commercially justified and recorded in the statutory accounts may be deducted for tax purposes. However, depreciation of participations is not tax-deductible. The straight-line and declining-balance methods are acceptable. The following are acceptable declining-balance rates:

- 5% for industrial buildings
- 20% for office equipment and furnishings

- 30% for machinery, equipment, computers and vehicles other than automobiles
- 35% for automobiles

Relief for losses. Losses may be carried forward to offset income for an unlimited number of years following the year of the loss. Losses may not be carried back.

The offsetting loss is limited to 70% of taxable income (even if unused loss carryforwards exist). Consequently, at least 30% of the positive taxable income is taxed. In addition, the notional interest deduction on equity can only reduce taxable income to a minimum of CHF0. This means that loss carryforwards cannot be generated as a result of the notional interest deduction.

Groups of companies. On request, associated companies (corporations) may form a group for tax purposes. Under group taxation, losses of group members may be credited against profits of other group members within the same year. To apply for group taxation, the following conditions, among others, must be met:

- The parent company must have its legal seat in Liechtenstein.
- The parent company must hold at least 50% of the voting rights and the capital of the subsidiaries as of the beginning of the respective year.

For purposes of group taxation, the subsidiaries in a group may be located in foreign countries.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	
Standard rate	7.7
Hotels and lodging services (overnight stays only)	3.7
Basic necessities, such as food and medicine	2.5
Stamp duty on capital; imposed on incorporations and increases in capital; the first CHF1 million is exempt	1
Payroll taxes	
Social security contributions, on gross salary; paid by	
Employer (including child allowance)	7.1910
Employee	4.7
Accident insurance, imposed on gross salary; rates vary depending on the extent of coverage	
On the job, paid by employer; rate depends on class of risk and insurance company	Various
Off the job, paid by employee	Various
Unemployment insurance; paid by	
Employer (yearly maximum, CHF630)	0.5
Employee (yearly maximum, CHF630)	0.5
Company pension fund, imposed on gross salary; minimum contribution (approximate rate, depending on plan); paid by	

Nature of tax	Rate (%)
Employer (approximate rate)	4
Employee (approximate rate)	4
Child allowance, imposed on gross salary; paid by employer	1.9
Health insurance, imposed on gross salary; paid in equal amounts by employer and employee; rate depends on the contribution of the mandatory insurance company	Various

E. Transfer pricing

Intercompany charges should be determined at arm's length. It is possible to reach an agreement in advance with the tax authorities concerning arm's-length pricing.

Following the recommendations of the Organisation for Economic Co-operation and Development (OECD) on BEPS Action 13, on 1 January 2017, Liechtenstein introduced the legal basis for a three-tiered approach to transfer-pricing documentation consisting of a Master File, a Local File and the Country-by-Country Report (CbCR).

Companies must provide on request of the tax authorities (no general filing obligation) documentation regarding the adequacy of transfer prices of transactions with related companies or related permanent establishments. If a company is part of a group with consolidated revenue exceeding CHF900 million, it is required to apply internationally recognized guidelines on transfer pricing (that is, a Master File and a Local File) for its documentation. Companies not part of such a group must meet certain, less complex documentation requirements if they are considered large according to Liechtenstein company law. Under such law, they are considered large if all of the following criteria are exceeded:

- Total assets of CHF25,900,000
- Net revenue of CHF51,800,000
- Annual average of 250 full-time employees

For smaller companies, lower documentation requirements apply (principle of reasonableness).

Liechtenstein-headquartered multinational groups with annual consolidated group revenue of at least CHF900 million must file CbCRs. The Country-by-Country (CbC) legislation closely follows the model legislation related to CbC reporting outlined in BEPS Action 13 and contains a secondary filing mechanism as well as the possibility to appoint a surrogate entity for filing purposes. The CbC legislation entered into force as of 1 January 2017 and, consequently, only covers tax periods beginning in or after 2017. However, for tax periods beginning in 2016, a voluntary filing is generally possible if requested by the taxpayer. In addition, groups with consolidated group revenue of less than CHF900 million may also file CbCRs on a voluntary basis.

F. Treaty withholding tax rates

Based on the fundamental freedoms of the European Economic Area agreement and international tax agreements (tax information exchange agreements between Liechtenstein and the EU), withholding tax on dividends may also be reduced in relation to

other jurisdictions when no double tax treaty exists. Since Liechtenstein does not levy withholding taxes on dividends, the table below only considers jurisdictions with which Liechtenstein has concluded a double tax treaty. The rates shown in the following table are the lower of the treaty rates or the normal domestic rates.

	Dividends	Interest	Royalties
	%	%	%
Andorra	0	0	0
Austria	0*	0*	0
Czech Republic	0	0	0
Georgia	0	0	0
Germany	0	0	0
Guernsey	0	0	0
Hong Kong SAR	0	0	0
Hungary	0	0	0
Iceland	0	0	0
Jersey	0	0	0
Lithuania	0	0	0
Luxembourg	0	0	0
Malta	0	0	0
Monaco	0	0	0
Netherlands	0	0	0
San Marino	0	0	0
Singapore	0	0	0
Switzerland	0	0	0
United Arab Emirates	0	0	0
United Kingdom	0	0	0
Uruguay	0	0	0
Non-treaty jurisdictions	0	0	0

* Under the tax cooperation agreement between Austria and Liechtenstein, companies from Liechtenstein may be required to deduct 25% of dividend and interest payments made to parties in Austria and transfer such amounts to the Austrian tax authorities as tax from the parties in Austria.

Liechtenstein has initialed, but not yet signed, double tax treaties with Bahrain, Italy and Romania.

In addition, Liechtenstein has entered into tax information exchange agreements with various jurisdictions, including Andorra, Antigua and Barbuda, Australia, Belgium, Canada, China Mainland, Denmark, the Faroe Islands, Finland, France, Germany, Greenland, Iceland, India, Ireland, Italy, Japan, Mexico, Monaco, the Netherlands, Norway, Sweden, St. Kitts and Nevis, St. Vincent and the Grenadines, South Africa, the United Kingdom and the United States.

In 2019, the Liechtenstein government approved for ratification the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI), which Liechtenstein signed in 2017. For Liechtenstein, the MLI entered into force as of 1 April 2020.

A. At a glance

Corporate Profit Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15 (b)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%) (c)	
Dividends	0/15 (d)
Interest	0/10 (e)(f)
Royalties and Know-how	0/10 (e)(g)
Sale, Rent or Other Transfer of Real Estate Located in Lithuania	15 (e)
Compensation for Violations of Copyrights or Related Rights	0/10 (e)(g)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5/Unlimited (h)

- (a) This is the standard rate of profit tax. Reduced rates apply to small or agricultural companies and to companies registered and operating in free-economic zones that satisfy certain conditions. A 5% additional rate applies to the taxable profit of credit institutions if their taxable profit exceeds EUR2 million.
- (b) In general, capital gains are included in taxable profit and are subject to tax at the regular profit tax rate. A capital gain derived from the sale of shares of a company registered in a European Economic Area (EEA) country or in a tax treaty country is exempt from tax if either of the following conditions is satisfied:
- The shares have been held for at least two years and the holding represents more than 10% of shares of the company throughout that period.
 - The shares were transferred in a reorganization (as stipulated in the Law on Corporate Income Tax), the shares have been held for at least three years, and the holding represents more than 10% of the shares of the company throughout that period.
- This rule does not apply if the shares are sold to the issuer of the shares.
- (c) The withholding tax rates may be reduced by applicable tax treaties.
- (d) The dividend withholding tax is a final tax. Under the participation exemption rule, the rate is 0% if the recipient is a company (not located in a tax haven) that holds at least 10% of the shares of the payer of the dividends for a period of at least 12 months. The participation exemption is denied for entities or a group of entities if the main purpose or one of the main purposes of putting in place the arrangements was to obtain a tax advantage.
- (e) These withholding taxes apply to payments to nonresident companies.
- (f) Interest paid to an entity registered in an EEA country or in a tax treaty country is exempt from tax. In other cases, a 10% withholding tax is applied.
- (g) Royalties, payments for know-how and compensation for violations of copyrights or related rights are subject to a 0% withholding tax if the criteria stipulated in the Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between associated companies of different member states are met. In other cases, the 10% withholding tax rate applies.
- (h) Losses from disposals of securities and derivative financial instruments may be carried forward five years to offset gains derived from disposals of such items. Losses from the disposal of shares of companies registered in an EEA country or in another tax treaty country cannot be carried forward if the shares have been held for at least two years and if the holding represents at least 10% of shares of the company throughout that period. However, these losses can be offset against capital gains derived from disposals of securities and derivative financial instruments in the current year. Losses resulting from the use, sale or any other transfer of an intangible asset for which a 5% tax rate has been applied (see *Relief for research and development works* in Section C) may be carried forward for an unlimited time, but such losses may cover only the taxable profit from the use, sale or any other transfer of the intangible asset. Other losses may be carried forward for an unlimited period, unless the entity ceases to carry on the activity that resulted in the loss. Also, see Section C.

B. Taxes on corporate income and gains

Profit tax. Under the Law on Corporate Income Tax, Lithuanian companies are subject to profit tax on their worldwide income.

Lithuanian (resident) companies are defined as enterprises with the rights of legal persons registered in Lithuania. For purposes of the profit tax, Lithuanian companies include companies formed in Lithuania and companies incorporated in foreign countries that are registered in Lithuania as branches or permanent establishments.

Profits of Lithuanian companies earned through permanent establishments in the EEA or in tax treaty countries are exempt in Lithuania if the profit from activities carried out through these permanent establishments is subject to corporate income tax or equivalent tax in such countries.

Foreign (nonresident) companies, which are defined as companies not incorporated in Lithuania, are subject to profit tax on their Lithuanian-source income only.

A foreign enterprise is deemed to have a permanent establishment in Lithuania if it satisfies any of the following conditions:

- It permanently carries out activities in Lithuania.
- It carries out its activities in Lithuania through a dependent representative (agent).
- It uses a building site or a construction, assembly or installation object in Lithuania.
- It uses installations or structures in Lithuania for prospecting or extracting natural resources, including wells or vessels used for that purpose.

International telecommunication income and 50% of income derived from transportation that begins in Lithuania and ends in a foreign country or that begins in a foreign country and ends in Lithuania are considered to be income received through a permanent establishment if such activities relate to the activities of a foreign enterprise through a permanent establishment in Lithuania.

Tax rates. The standard profit tax rate is 15%.

For the first tax year, a 0% rate applies to small entities with annual income not exceeding EUR300,000 and an average number of employees that does not exceed 10. For further tax years, if the conditions mentioned in the preceding sentence are met, a 5% rate applies.

For the first tax year, a 0% rate applies to small entities owned by individuals if in the further three tax periods, the small entity does not stop its activity, is not liquidated or reorganized, and its shares are not transferred. A 5% rate applies in subsequent tax years if the conditions mentioned in the preceding sentence are met.

A 5% rate applies to the taxable profit of cooperative companies if more than 50% of the companies' income is derived from agricultural activities.

A 5% additional rate applies to the taxable profit of credit institutions if their taxable profit exceeds EUR2 million. Under the Lithuanian Law on Corporate Income Tax, credit institutions consist of banks operating under the applicable Lithuanian law, including branches of foreign commercial banks, and credit

unions and central credit unions operating under the applicable Lithuanian law.

A 5% rate applies to the taxable profit from the use, sale or other transfer of an intangible asset, if the taxpayer created the intangible asset while engaged in qualifying research and development (R&D) activities (for further details, see *Relief for research and development works* in Section C).

Entities registered and operating in a free-economic zone benefit from 100% exemption from profit tax for 10 years and a further 50% reduction in profit tax for an additional 6 years if they satisfy either of the following conditions:

- They make investments in fixed assets of at least EUR1 million, and at least 75% of their income is derived from various activities, except trading.
- They make investments in fixed assets of at least EUR100,000, their average number of employees is not less than 20, and at least 75% of their income is derived from the provision of services.

The free-economic zone benefits mentioned above apply if such benefits are compatible with Commission Regulation (EU) No. 651/2014 of 17 June 2014, declaring certain categories of aid compatible with the internal market in application of Articles 107 and 108 of the Treaty on the Functioning of the European Union 2012/C 326/01.

Currently, seven free-economic zones are located in Akmenė, Kaunas, Kėdainiai, Klaipėda, Marijampolė, Panevėžys and Šiauliai.

Also, see *Relief for large-scale investment projects* in Section C.

Nonprofit entities can reduce their taxable profit by the funds directly allocated in the current tax period or to be directly allocated in the two subsequent tax periods for financing activities related to the public interest.

Entities engaged in international transportation by ships or in a directly related activity can elect to be taxed on a special tax base related to the net tonnage of their fleet. The tax on such entities is calculated by applying the 15% corporation tax to the net tonnage instead of the taxable profit of the entities.

Collective investment undertakings. Income, dividends and capital gains of collective investment entities and venture and private capital entities are exempt from the tax if the source of income or the final recipient of income is not located in a tax haven.

Capital gains. Capital gains are included in taxable profit and are subject to tax at the regular profit tax rate, except for gains and losses derived from disposals of securities and derivatives. Gains and losses on securities and derivatives are included in a separate tax base that is subject to tax at the regular profit tax rate. A capital gain derived from the sale of shares of a company registered in an EEA country or in a tax treaty country is exempt from tax if the shares have been held for an uninterrupted period of at least two years and if the holding represents more than 10% of the shares of the company throughout that period.

The exemption mentioned above does not apply if the shares are transferred to the issuer of the shares.

Capital gains derived from the transfer of shares in a reorganization or from another transfer specified in the law is exempt from tax if the shares have been held for an uninterrupted period of at least three years and if the holding represents more than 10% of the shares of the company throughout that period.

Exit taxation. Starting in 2020, the anti-tax avoidance Council Directive 2016/1164/EU was implemented in Lithuania regarding exit taxation. In general, a taxpayer is subject to tax at the time of exit of the assets and/or business from Lithuania to another member state or to a third country. A taxpayer is subject to tax on an amount equal to the market value of the transferred assets less their residual tax value.

Administration

Tax year. The tax year is the calendar year. Companies may request permission to use a different 12-month tax year, which must be used continuously.

Profit tax. Companies must file profit tax returns with the tax inspectorate by the 15th day of the 6th month following the end of the tax year.

Companies must make quarterly advance payments of profit tax by the 15th day of the last month of each quarter. The law specifies two methods that companies may choose to calculate their advance profit tax. The chosen method must be applied consistently throughout the year, but it can be changed once in the tax year. The following are the specified methods:

- The results of prior financial years. The advance payments for the first six months are calculated based on the profit tax for the year before the preceding year. Each of these advance payments equals 25% of the profit tax for such year. For the 7th through 12th months of the tax year, the advance payment equals 25% of the profit tax calculated for the preceding tax year.
- The forecasted profit tax of the current year. Each of the advance payments equals 25% of the forecasted profit tax for such year. However, the total of the advance profit tax payments made during the tax year must total at least 80% of annual profit tax.

If companies choose to pay the advance profit tax based on the results of prior financial years, they must file two profit tax advance payment returns. The first return covers the first 6 months of the tax year and must be filed by the 15th day of the 3rd month of the tax year. The second return covers the last 6 months of the tax year and must be filed by the 15th day of the 9th month of the tax year.

If the advance profit tax payment is based on the forecasted profit tax of the current year, the profit tax advance payment return must be filed by the 15th day of the 3rd month of the tax year.

Newly registered enterprises in their first tax year and enterprises with taxable profit not exceeding EUR300,000 in the preceding tax year are not required to make advance payments of profit tax.

Any balance of tax due for a tax year must be paid by the 15th day of the 6th month following the tax year. If the total of the advance payments exceeds the tax due for the tax year, a company may obtain a refund or apply the excess to future taxes. Taxes must be paid in euros.

Withholding taxes. Withholding taxes together with returns for such taxes must be submitted to the tax inspectorate by the 15th day of the month following the month in which the taxes are withheld.

Withholding taxes. Withholding tax at a rate of 10% is imposed on the following types of payments to nonresident companies:

- Interest
- All types of royalties
- Compensation for violations of copyrights or related rights

Interest paid to an entity registered in an EEA country or in a tax treaty country is exempt from tax.

Royalties, payments for know-how and compensation for violations of copyrights or related rights are exempt from withholding tax if the criteria stipulated in the Council Directive 2003/49/EC of 3 June 2003 on a common system of taxation applicable to interest and royalty payments made between associated companies of different member states are met.

Withholding tax at a rate of 15% is imposed on the following types of payments to nonresident companies:

- Dividends (for further details, see *Dividends*)
- Payments with respect to the sale, rent or other transfer of immovable property located in Lithuania
- Payments for performance and sport activity in Lithuania
- Directors' fees to members of the Supervisory Board

Dividends. Dividends received from Lithuanian and foreign companies are subject to corporate profit tax at a rate of 15%. The 15% tax on dividends paid by Lithuanian companies is withheld at source.

For dividends paid by Lithuanian companies to other Lithuanian companies, profit tax for the preceding tax year is reduced for the company receiving dividends by the withholding tax calculated on the dividends. However, the amount of the reduction may not exceed the amount of profit tax for the preceding tax year. The amount of the withholding tax not used to reduce the preceding year's tax may be set off against other taxes or refunded by the tax authorities. Payers of dividends must pay the withholding tax on the dividends to the tax authorities by the 15th day of the month following the month of payment of the dividends.

Lithuanian resident companies receiving dividends from foreign companies must pay the tax on the dividends to the tax authorities by the 15th day of the month following the month of receipt of the dividends.

Under the participation exemption rule, dividends are not subject to profit tax if the recipient is a company (not located in a tax haven) that holds at least 10% of the shares of the payer of the dividends for a period of at least 12 months.

Dividends paid by foreign companies to Lithuanian companies are not subject to tax if the company paying the dividends is registered in an EEA country and if the company's profits were subject to corporate profit tax or an equivalent tax. This exemption and the participation exemption for dividends paid by foreign companies to Lithuanian companies does not apply to dividends that the foreign company deducted in computing its taxable profit.

The participation exemption also applies to the following:

- Dividends that are attributed to the permanent establishment of a foreign company in Lithuania
- Cash payments made to reduce the company's capital that was formed using the company's earnings

The above-mentioned participation exemptions for dividends paid by Lithuanian companies to foreign companies and the dividends received by Lithuanian companies from foreign companies may be denied under a general anti-abuse rule, which provides that the participation exemption may be denied for entities or a group of entities if the main purpose or one of the main purposes of the arrangements that were put in place was to obtain a tax advantage.

Foreign tax relief. In general, a foreign tax credit may be claimed in an amount not exceeding the amount of Lithuanian profit tax payable on the foreign income. Special rules apply to particular types of income, unless a double tax treaty provides otherwise.

The exemption method is applied to profit from activities carried out through permanent establishments of Lithuanian entities in EEA countries or in tax treaty countries if profit from activities carried out through these permanent establishments is subject to corporate income tax or equivalent tax in such countries.

C. Determination of taxable income

General. Profit before tax equals gross revenue, minus expenses incurred in earning such revenue.

Taxable profit is calculated by taking the following actions:

- Subtracting non-taxable income (for example, after-tax dividends, revenues from the revaluation of fixed assets under certain circumstances and payments received from insurance companies up to the amount of incurred losses) from the accounting profit
- Taking into account nondeductible expenses and deductible expenses of a limited amount

Deductions are allowed if they are incurred during the usual business activity and are necessary to earn revenues or obtain economic benefits, provided that documentary evidence is presented.

Expenses incurred for the benefit of employees are allowable deductions if the benefit received by employees is subject to personal income tax.

Expenses that may be deducted up to certain limits include, among others, the following:

- Depreciation and amortization
- Business trip expenses
- Business entertainment expenses
- Provisions for bad debts

- Natural losses
- Interest

A double deduction is allowed for sponsorship payments (except payments in cash exceeding EUR10,500 (250 times the basic social benefit [EUR42 for 2022], which is an indicator for defining and calculating social security benefits and other amounts in accordance with the applicable Lithuanian law; the Lithuanian government sets the amount) to a single sponsorship recipient), up to a maximum deduction equal to 40% of the taxable profit.

A triple deduction is allowed for R&D costs if the scientific R&D activities are related to the usual or intended activities of the entity that generate or will generate income or economic benefits.

Nondeductible amounts include dividends and costs that are incurred outside the usual business operations, that are inappropriately documented or that are related to earning non-taxable income.

Payments to tax havens may be deducted only if the Lithuanian enterprise can prove that certain conditions evidencing the economic basis of the transaction were met.

Other taxes (for example, social insurance contributions and real estate tax) may be deducted from taxable income.

The income and expenses of enterprises must be converted to euros.

Inventories. Inventories must be valued at actual cost, which is calculated using the first-in, first-out (FIFO) method. On approval of the tax authorities, a taxpayer may apply the average cost or last-in, first-out (LIFO) method.

Tax depreciation. To calculate tax depreciation, companies may select the straight-line method, double-declining value method or production method. The selected depreciation method must be applied for all assets of the same type. To change the depreciation method, companies must obtain the approval of the local tax authorities.

Under the straight-line method, depreciation is claimed each year in equal portions. Under the double-declining value method, the depreciation or amortization coefficient is calculated by multiplying the straight-line rate by two. For the purpose of calculating the amount of depreciation or amortization for the tax period during the first year, the acquisition price of long-term assets is multiplied by the depreciation coefficient. To calculate the depreciation or amortization of long-term assets during the other years, except for the last year, the residual value of long-term assets at the beginning of the tax year is multiplied by the depreciation coefficient. Under the production method, depreciation is calculated based on the number of units produced over the asset's useful life.

Accelerated depreciation may be claimed for assets used in R&D activities. The law sets the maximum depreciation rates. These rates determine the minimum number of years over which assets may be depreciated. The following are some of the minimum periods.

Assets	R&D Minimum period for depreciation Years	Other Minimum period for depreciation Years
Intangible assets	2 to 15	3 to 15
Buildings and premises		
Constructed or reconstructed on or after 1 January 2002	8	8
Constructed or reconstructed before 1 January 2002	15 to 20	15 to 20
Plant and machinery	2 to 15	5 to 15
Computers	2	3
Vehicles	4 to 10	4 to 10
Other assets	2	4

Relief for research and development works. In the calculation of profit tax, three times the amount of R&D expenses, except for depreciation or amortization costs of fixed assets, may be deducted from income in the corresponding tax year. Fixed assets that are used for R&D may be depreciated or amortized applying accelerated depreciation (amortization) rates.

In addition, taxable profit from the use, sale or other transfer of an intangible asset may be taxed at a 5% rate if the following conditions are met:

- The taxpayer created the intangible asset while engaged in qualifying R&D activities.
- Income from the use, sale or other transfer of the intangible asset is received only by the entity that created it, and only that entity incurs all related expenses.
- The intangible asset is protected by copyright or a patent.

Relief for investment projects. The taxable profit of a Lithuanian entity may be reduced by up to 100% by the amount of expenses that are incurred in the acquisition of fixed assets used in an “investment project.” For this purpose, an “investment project” is investment in certain categories of fixed assets (machinery, equipment, information technology hardware and software, acquired intellectual property rights and lorries, trailers and semitrailers that are not older than five years), required for the manufacturing or supply of new products (or services), increasing production volume, the implementation of a new process of production (or supply of services), essential changes to an existing process (or part of the process) and the implementation of new technologies that are protected by international patent law. Acquisition costs of lorries, trailers and semitrailers purchased during a tax year may reduce taxable profit only up to EUR300,000. This relief may be applied in the 2009 through 2023 tax years, and the balance of unused relief may be carried forward to the subsequent four years.

Relief for large-scale investment projects. The taxable profit of a Lithuanian or a foreign entity that invests substantial capital in Lithuania may be reduced by up to 100%. Effective from the 2021 tax year, the relief for corporate income tax may be applied for up to 20 years if the following conditions are met:

- The capital invested in a project is at least EUR20 million (EUR 30 million in Vilnius city or district).

- The developer of a large-scale investment project has concluded a contract with the Ministry of the Economy and Innovation of the Republic of Lithuania.
- The average number of jobs created is not less than 150 (200 in Vilnius city or district).
- At least 75% of the income consists of income received from data processing, internet server services (hosting), other related activities or manufacturing.
- The developer of the large-scale investment project is not using other reliefs (that is, relief for companies in free-economic zones).
- The developer of the large-scale investment project has an auditor's report confirming the required amount of capital investment.

If the above-mentioned conditions are not met during a tax year, the relief is not applied (it can be renewed during a tax year when the project again meets the requirements).

If the capital invested exceeds EUR100 million, the relief can be applied only if approval from the European Commission is obtained (additional requirements apply).

Relief for film production. A Lithuanian entity or a foreign entity operating through a permanent establishment in Lithuania that makes a contribution to a Lithuanian film producer for the production of a film or parts of a film may deduct 75% of the contribution from its taxable income and reduce its profit tax payable by the amount of the contribution if certain conditions are met. Profit tax payable for the tax year may be reduced up to 75%, and the balance of unused relief may be carried forward to the subsequent two years. This tax relief may be applied in the 2019 through 2023 calendar years.

Relief for losses. Losses, except losses resulting from disposals of securities and derivative financial instruments, may be carried forward for an unlimited period. Effective from the 2014 tax year, taxpayers except for small entities can cover only up to 70% of their taxable profit with accumulated tax losses. The carryforward of such losses is no longer allowed if the activity that resulted in the loss ceases. Loss resulting from disposals of securities and/or derivative financial instruments may be carried forward for five years. However, such losses may be covered only by future gains from the disposal of securities and/or derivative financial instruments.

Losses resulting from the use, sale or any other transfer of an intangible asset for which a 5% tax rate has been applied (see *Relief for research and development works*) may be carried forward for an unlimited time, but such losses may cover only the taxable profit from the use, sale or any other transfer of the intangible asset.

For a reorganization or transfer, the acquiring entity may carry forward the acquired losses, except for losses of entities (non-financial institutions) resulting from the disposal of securities and derivatives, incurred before the completion of the reorganization or transfer if the acquiring entity continues to carry on the activity taken over or a part of such activity for a period of at least three

years. Effective from the 2014 tax year, taxpayers except for small entities can cover only up to 70% of their taxable profit with tax losses acquired during a reorganization or transfer.

Starting in 2020, Lithuanian companies may deduct tax losses transferred from their permanent establishments in other EEA countries from their taxable income (additional requirements apply).

Groups of enterprises. Corporations are taxed separately in Lithuania. Consolidated returns are not allowed. The transfer between group entities of tax losses incurred in the 2010 tax year and subsequent tax years is allowed. Certain conditions apply.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; intra-EU supplies and exports are zero-rated	0/5/9/21
Real estate tax, on the taxable value of real estate (the value is calculated by real estate registry institutions using methodology established by the government); maximum rate	3
Social security tax; paid by Employer	
Fixed-term employment contact	2.49 to 3.75
Regular employment contact	1.77 to 3.03
Employee	12.52
(An employee can write a request to the pension accumulation company that it pay additional contributions from his or her salary to the pension accumulation fund [2.7% or 3% from 1 January 2022]; in such cases, an employer must withhold 15.22% or 15.52% as social security contributions.)	
Health insurance contributions; paid by Employer	0
Employee	6.98

Other significant taxes include excise duty, land and land lease tax, tax on the use of Lithuanian natural resources and pollution tax.

E. Miscellaneous matters

Foreign-exchange controls. The Lithuanian currency is the euro (EUR).

If agreed to by the parties, foreign currency may be used for bank payments between business entities, and the euro may be used for both bank and cash payments. Commercial operations involving foreign currency, such as purchasing, selling and exchanging, may be performed by the following:

- Credit, payment and electronic money institutions or other payment service providers if it is related to provision of payment service

- Financial brokerage companies if it is related to provision of investment service
- Currency exchange operators working under the Law on Currency Exchange Operators

Transfer pricing. Entities operating in Lithuania that had revenues exceeding EUR3 million for the tax year preceding the tax year during which transactions with related parties are undertaken are subject to the Lithuanian transfer-pricing rules. Under these rules, they must maintain supporting documentation establishing that all transactions with associated parties are carried out on an arm's-length basis. Lithuanian transfer-pricing rules are based on the Organisation for Economic Co-operation and Development Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

Starting from 1 January 2019, Lithuanian entities and foreign entities that operate in Lithuania through a permanent establishment must prepare the following:

- A return reporting the transactions entered into with associated parties, together with their profit tax returns, if the total value of the transactions exceeds EUR90,000
- A local file, if the revenues exceed EUR3 million for the tax year preceding the tax year during which transactions with related parties are undertaken
- A master file, if the revenues exceed EUR15 million for the tax year preceding the tax year during which transactions with related parties are undertaken

Starting 2020, there is no obligation to prepare a master and/or local file if the transactions entered into with associated parties are between Lithuanian taxpayers and are related to activities performed in Lithuania. Also, from 2020, a use of simplified approach for taxpayers preparing transfer-pricing documentation for low value-added services transactions is allowed.

Under Lithuanian transfer-pricing rules, data submitted in the documents relating to the controlled transactions must be prepared and updated each tax period.

The Country-by-Country Reporting (CbCR) requirements were introduced in Lithuania and are effective from 5 June 2017. All Lithuanian tax-resident entities that are part of a multinational enterprise group with annual consolidated group revenue equal to or exceeding EUR750 million must comply with the CbCR requirements for fiscal years beginning on or after 1 January 2016.

Controlled foreign companies. Certain income of controlled entities is added to taxable income of Lithuanian entities and taxed at the standard profit tax rate.

An entity is considered a controlled foreign company (CFC) if the controlling person alone or together with related persons, directly or indirectly, holds over 50% of the foreign entity's shares (interests and member shares). As a rule, a permanent establishment is also considered to be a CFC.

The CFC's income is taxed in Lithuania if both of the following conditions are satisfied:

- The CFC is registered or organized in a tax haven or the CFC's passive income (interest, royalties and dividends) exceeds one-third of the total CFC's income.
- The effective tax liability of the CFC is less than 50% of the tax liability that would have been applicable in accordance with the Lithuanian tax rules.

However, the CFC's income is not taxed in Lithuania if the CFC has sufficient staff and assets that are required to be engaged in actual economic activity.

Interest deduction limitation rule. The positive difference between an entity's interest expenses and interest income shall be deductible only up to 30% of the entity's taxable earnings before interest, taxes, depreciation and amortization (EBITDA).

The following rules also apply:

- The entity is able to deduct exceeding interest expenses up to EUR3 million.
- The entity is able to fully deduct exceeding interest expenses if its financial results are included in the consolidated financial statements of a group, and the equity-to-asset ratio of the entity is not more than two percentage points lower than the equivalent ratio of the group.
- The amount of undeducted interest expenses may be carried forward for an unlimited period.
- If the entity is a part of a group of entities, the interest deduction limitation rules apply to all Lithuanian entities jointly.

Rules for neutralizing hybrid mismatches. A hybrid mismatch is a situation that results in double deduction or deduction without inclusion due to different financial instruments, payments or financial instruments transfer, as well as permanent establishment or revenues (costs) treatment.

Starting in 2020, complex rules are implemented with respect to hybrid mismatches (following the anti-tax avoidance Council Directive 2016/1164/EU). In general, Lithuania follows the principle that to the extent that a hybrid mismatch results in a double deduction, the deduction is given only in the member state in which such payment has its source and that when a hybrid mismatch results in a deduction without inclusion, the member state of the payer denies the deduction of such payment.

F. Treaty withholding tax rates

The Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) entered into force in Lithuania on 1 January 2019.

The following table lists the maximum withholding rates under Lithuania's tax treaties.

	Dividends %	Interest %	Royalties %
Armenia	5/15 (a)	10	10
Austria	5/15 (a)	10	5/10 (b)
Azerbaijan	5/10 (a)	10	10

Uzbekistan	10	10	10
Non-treaty jurisdictions	0/15 (j)	10	10

-
- (a) The 5% rate applies if the recipient owns more than 25% of the authorized capital of the payer.
 - (b) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to other royalties.
 - (c) The 0% rate applies if the recipient owns more than 10% of the authorized capital of the payer.
 - (d) The 5% rate applies if the recipient owns at least 10% of the authorized capital of the payer.
 - (e) The 5% rate applies if the recipient owns at least 20% of the authorized capital of the payer.
 - (f) The 5% rate applies if the recipient owns more than 25% of the authorized capital of the payer and if the total value of the recipient's investment is at least USD75,000.
 - (g) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment or for transmission by satellite, cable, optic fiber or similar technology. The 10% rate applies to other royalties.
 - (h) The 0% rate applies if the recipient owns more than 25% of the authorized capital of the payer.
 - (i) The 5% rate applies if the recipient owns more than 25% of the authorized capital of the payer and if the total value of the recipient's investment is at least USD100,000.
 - (j) The 0% rate applies if the recipient holds more than 10% of the shares of the payer of the dividends for a period of at least 12 months.
 - (k) The 0% rate applies if the recipient owns at least 10% of the authorized capital of the payer.
 - (l) The 5% rate applies if the recipient owns at least 25% of the authorized capital of the payer.
 - (m) The 0% rate applies if the recipient is not a natural person.

A. At a glance

Corporate Income Tax Rate (%)	17 (a)
Capital Gains Tax Rate (%)	17 (b)
Branch Tax Rate (%)	17 (a)
Withholding Tax (%)	
Dividends	0/15 (c)
Interest	0/20 (d)
Royalties	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	17 (e)

- (a) This is the 2022 maximum rate. In addition, a municipal business tax and an additional employment fund contribution (employment fund surcharge) are levied on income (see Section B).
- (b) Capital gains are generally subject to corporate income tax at the standard rate. If certain conditions are met, full (see Section B) or partial (see Section C) exemption may apply depending on the nature of the asset sold.
- (c) A 15% dividend withholding tax is imposed on payments to resident and nonresidents. Under Luxembourg domestic law, a full withholding tax exemption applies to dividends if they are paid to qualifying entities established in European Union (EU) or European Economic Area (EEA) member states (that is, Iceland, Liechtenstein or Norway), Switzerland or a country with

which Luxembourg has entered into a double tax treaty and if certain conditions are met (see Sections B and F).

- (d) For details, see *Interest* in Section B.
- (e) The loss carryforward is limited to 17 years for losses incurred from financial years closing after 31 December 2016 (see Section C). No time limitation applies with respect to losses incurred between 1 January 1991 and 31 December 2016.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income. Companies whose registered office or central administration is in Luxembourg are considered resident companies subject to corporate income tax.

Taxation in Luxembourg of foreign-source income is mitigated through double tax treaties. In addition, if no tax treaty applies, a foreign tax credit is available under domestic law.

Nonresident companies whose registered office and place of management are located outside Luxembourg are subject to corporate income tax only on their income derived from Luxembourg sources.

Tax rates. Corporate income tax rates currently range from 15% to 17%, depending on the income level. In addition, a surcharge of 7% is payable to the employment fund. A local income tax (municipal business tax) is also levied by the different municipalities. The rate varies depending on the municipality, with an average rate of 8.9%. The municipal business tax for Luxembourg City is 6.75%, and the maximum overall tax rate for companies in Luxembourg City is 24.94%. The following is a sample 2022 tax calculation for a company in Luxembourg City.

Profit	EUR100.00
Corporate income tax at 17%	(17.00)
Employment fund surcharge at 7%	(1.19)
Municipal business tax	(6.75)
	<u>EUR75.06</u>
Total income taxes	<u>EUR24.94</u>
As percentage of profit	<u>24.94%</u>

Corporate income tax is levied at a reduced rate of 15% for taxable profits not exceeding EUR175,000. The maximum rate applies to amounts exceeding EUR200,000. For taxable profits between EUR175,000 and EUR200,001, an intermediary rate is applied, corresponding to EUR26,250 plus 31% of the taxable profit exceeding EUR175,000.

Net wealth tax. Net wealth tax is imposed annually on the taxable wealth of businesses. Resident companies are taxable on their worldwide net wealth, and nonresident companies are subject to net wealth tax on their Luxembourg net wealth only. The value of the net wealth for taxation purposes, called unitary value, is determined on 1 January every year and corresponds basically to the sum of assets less liabilities and provisions as valued according to the provisions of the Luxembourg Valuation Law, excluding any assets and/or liabilities for which a domestic exemption applies (for example, qualifying participations, that is,

participations of at least 10% in the capital of qualifying domestic or foreign subsidiaries or a participation therein with an acquisition cost of at least EUR1,200,000) and assets for which the taxation right is allocated to another country based on a tax treaty.

Net wealth tax is levied at a rate of 0.5% on the unitary value up to and including EUR500 million plus 0.05% on the part of unitary value exceeding EUR500 million.

Resident companies must always pay a minimum annual net wealth tax equal to either of the following:

- EUR4,815 if the sum of financial fixed assets, amounts owed by affiliated undertakings and by undertakings with which the company is linked by virtue of participating interests, transferable securities, cash in banks, cash in postal check accounts, checks and cash in hand exceeds 90% of the company's balance sheet and EUR350,000
- An amount ranging from EUR535 to EUR32,100, depending on the balance sheet total at the closing of the preceding financial year

The net wealth tax due from a resident company is the higher of the net wealth tax calculated on the unitary value and the minimum net wealth tax calculated on the balance sheet total. If the minimum net wealth tax applies, it is reduced by the amount of corporate income tax (including the contribution to the employment fund but after deduction of possible tax credits) due from the company for the preceding year.

The Luxembourg law allows a net wealth tax reduction equal to one-fifth of a special reserve created for a given tax year and to be kept for the following five years. The amount of net wealth tax that can be reduced is limited to the amount of corporate income tax that is due for the preceding tax year (including the contribution to the employment fund and before deduction of any tax credits). The net wealth tax can only be reduced to the amount of minimum net wealth tax (determined as described above) that would apply, but this amount can further be reduced by the amount of corporate income tax (including the contribution to the employment fund but after deduction of any tax credits) due by the company for the preceding year.

The following entities are exempt from regular net wealth tax, but subject to the minimum net wealth tax:

- Securitization vehicle
- Venture capital company (*société d'investissement en capital à risque*, or SICAR) and reserved alternative investment fund (RAIF; *fonds d'investissement alternatif réservé*, or FIAR) incorporated under the form of a corporation and subject to the same tax regime as a SICAR
- Corporate pension fund (SEPCAV)
- Pension savings association (ASSEP)
- Commercial companies duly accredited as societal impact companies

Luxembourg investment vehicles. Luxembourg offers a large number of investment vehicles (companies and funds) that can be used for various classes of assets and investment strategies.

Luxembourg Undertakings for Collective Investment in Transferable Securities. Luxembourg Undertakings for Collective Investment in Transferable Securities (UCITs) are investment funds that invest in liquid assets and that can be distributed publicly to retail investors across the EU. They are subject to an annual subscription tax (*taxe d'abonnement*) of 0.05%, levied on their total net asset value. A reduced rate of 0.01% or a tax exemption may apply in certain specific cases. Collective-investment funds or individual compartments of such funds that invest a specific portion of their net asset value in determined sustainable economic activities, as defined by the EU Taxonomy Regulation (Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending Regulation (EU) 2019/2088) may also benefit from reduced subscription tax rates. For the rates of the subscription tax, see Section D. Distributions made by UCITs are not subject to withholding tax.

Specialized Investment Funds. Specialized Investment Funds (SIFs) are lightly regulated investment funds for “well-informed investors.” In this context, a “well-informed investor” is one of the following:

- An institutional investor
- A professional investor
- Any other type of investor who has declared in writing that he or she is a “well-informed investor” and either invests a minimum of EUR125,000 or has an appraisal from a bank, an investment firm or a management company (all of these with a European passport), certifying that he or she has the appropriate expertise, experience and knowledge to adequately understand the investment made in the fund

An exemption for corporate income tax, municipal business tax and net wealth tax applies to investment funds in the form of a SIF. These funds are subject only to a subscription tax at an annual rate of 0.01% calculated on the quarterly net asset value of the fund, unless an exemption regime applies (for example, investments in funds already subject to the subscription tax, certain money market funds and pension pooling vehicle funds). Distributions by SIFs are not subject to withholding tax.

Certain double tax treaties signed by Luxembourg apply to a SIF incorporated as an investment company with variable capital (*société d'investissement à capital variable*, or SICAV) or an investment company with fixed capital (*société d'investissement à capital fixe*, or SICAF). In general, an SIF constituted as a common fund (*fonds commun de placement*, or FCP) does not benefit from double tax treaties; however, certain exceptions exist (Andorra, Brunei Darussalam, Croatia, Estonia, Germany, Guernsey, Isle of Man, Jersey, Saudi Arabia, Seychelles, Tajikistan and Uruguay).

Reserved alternative investment funds. A reserved alternative investment fund (RAIF; *fonds d'investissement alternatif réservé*, or FIAR) can be incorporated under the form of a common investment fund (FCP; *fonds commun de placement*) or of an investment company (SICAV or SICAF). RAIFs are reserved to well-informed investors (see *Specialized Investment Funds*).

The law provides for a dual tax regime. The general tax regime is the same as for SIFs, with subscription tax levied at an annual rate of 0.01% (subject to certain exemptions), and applies unless the RAIF invests exclusively in risk capital and is set up under Article 48 of the Reserved Alternative Investment Fund Law, in which case its tax regime is identical to the venture capital companies' tax regime) (see *Venture capital companies*).

Venture capital companies. A venture capital company (*société d'investissement en capital à risque*, or SICAR) can be set up under a transparent tax regime as a limited partnership or under a nontransparent tax regime as a corporate company. SICARs are approved and supervised by the Commission for the Supervision of the Financial Sector, but they are subject to few restrictions. They may have a flexible investment policy with no diversification rules or leverage restrictions. SICARs in the form of a corporation are subject to corporate income and municipal business tax, but benefit from an exemption for income derived from securities (interest income, capital gains or dividends) and from funds held pending their investment in risk capital (under conditions), while losses on disposals and value adjustments made against such investments are not deductible from taxable profits. SICARs benefit from a net wealth tax exemption, except that they are subject to the minimum net wealth tax regime and, accordingly, must pay annual net wealth tax under this regime (see *Net wealth tax*). Distributions by SICARs are not subject to withholding tax.

Securitization companies. A securitization company can take the form of a regulated investment fund or a company (which, depending on its activities, may or may not be regulated). Securitization companies are available for securitization transactions in the broadest sense. They are subject to corporate income tax and municipal business tax. However, commitments to investors (dividend and interest payments) are deductible from the tax base. Distributions of proceeds are qualified as interest payments for Luxembourg income tax purposes and are consequently not subject to withholding tax. Securitization companies benefit from a net wealth tax exemption, except that they are subject to the minimum net wealth tax regime and, accordingly, must pay annual net wealth tax under this regime (see *Net wealth tax*).

Private asset management companies. The purpose of a private asset management company (*société de gestion de patrimoine familial*, or SPF) is the management of private wealth of individuals without carrying out an economic activity. However, they are not entitled to hold real estate properties, neither directly nor through one or more tax transparent entities or mutual investment funds. SPFs are subject to subscription tax levied at a rate of 0.25% with a minimum amount of EUR100 and a maximum amount of EUR125,000. An exemption from corporate income tax, municipal business tax and net wealth tax applies.

SPFs may not benefit from double tax treaties entered into by Luxembourg or from the EU Parent-Subsidiary Directive. Dividend and interest income arising from financial assets may be subject to withholding tax in the state of source in accordance with the domestic tax law of that state. Dividend distributions to

shareholders are not subject to Luxembourg withholding tax. Interest payments are exempt from withholding tax unless the recipient is a Luxembourg resident individual (see *Interest*).

Holding companies. Holding companies (*sociétés de participations financières*, or SOPARFI) are fully taxable Luxembourg resident companies that take advantage of the participation exemption regime. They may benefit from double tax treaties signed by Luxembourg as well as the provisions of the EU Parent-Subsidiary Directive. For information regarding debt-to-equity rules, see Section E. A SOPARFI can be set up as a public company limited by shares (*société anonyme*), limited company (*société à responsabilité limitée*) or a partnership limited by shares (*société en commandite par actions*, or SCA).

Levy on income derived from real estate located in Luxembourg. Effective from 1 January 2021, a real estate levy (*prélèvement immobilier*) of 20% is due from certain exhaustively listed investment vehicles (SIFs, certain Undertakings for Collective Investment [UCIs] and RAIFs with a legal personality distinct from that of their partners) receiving or realizing income from real estate located in Luxembourg (that is, immovable assets according to Luxembourg civil law). SIFs, UCIs or RAIFs incorporated under the legal form of a limited partnership, as well as mutual investment funds, are excluded from the measure. The levy only applies to income derived from immovable property located in Luxembourg; investment vehicles owning real estate located abroad are not subject to this measure. Income subject to the real estate levy includes rental income derived from property located in Luxembourg, capital gains derived from the transfer of property located in Luxembourg and income derived from the transfer of interests or units held by a targeted investment vehicle in a tax transparent entity or mutual investment fund owning, either directly or indirectly (that is, through one or more other tax transparent entities or mutual investment funds), real estate located in Luxembourg.

Capital gains. The capital gains taxation rules described below apply to fully taxable resident companies and to determined domestic permanent establishments.

Capital gains are generally regarded as ordinary business income and are taxed at the standard rates. However, capital gains on the sale of shares may be exempt from tax if all of the following conditions apply:

- The seller is one of the following:
 - A resident capital company fully subject to tax in Luxembourg or a qualifying resident entity.
 - A Luxembourg permanent establishment of an entity that is resident in another EU state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
 - A Luxembourg permanent establishment of a capital company resident in a state with which Luxembourg has entered into a tax treaty.
 - A Luxembourg permanent establishment of a capital company or cooperative company resident in an EEA state other than an EU state.

- The shares have been held for 12 months or the shareholder commits itself to hold its remaining minimum shareholding in order to fulfill the minimum shareholding requirement for an uninterrupted period of at least 12 months.
- The holding represents at least 10% of the capital of the subsidiary throughout that period, or the acquisition cost is at least EUR6 million.
- The subsidiary of which shares are sold is a resident capital company fully subject to tax, a nonresident capital company fully subject to a tax comparable to Luxembourg corporate income tax or an entity resident in an EU member state that is covered by Article 2 of the EU Parent-Subsidiary Directive.

However, capital gains qualifying for the above exemption are taxable to the extent that related expenses in excess of exempt dividends received are deducted in the current year or have been deducted in prior years. These related expenses include interest on loans used to finance the purchase of such shares and write-offs.

Administration. In general, the tax year coincides with the calendar year unless otherwise provided in the articles of incorporation. Tax returns must be filed before 31 May in the year following the fiscal year. Luxembourg corporations must file their corporate income tax, municipal business tax and net wealth tax returns by electronic means. The date for filing the tax returns may be extended on request by the taxpayer. Late filing may be subject to a surcharge of up to 10% of the tax due. In addition, non-compliance with orders or instructions given by the tax authorities within the assessment process may trigger a penalty of up to EUR25,000.

Taxes are payable within one month after receipt of the tax assessment notice. However, advance payments must be made quarterly by 10 March, 10 June, 10 September and 10 December for corporate income tax, and by 10 February, 10 May, 10 August and 10 November for municipal business tax and net wealth tax. In general, every payment is equal to one-quarter of the tax assessed for the preceding year. If payments are not made within these time limits, an interest charge of 0.6% per month may be assessed.

Luxembourg has introduced a partial self-assessment procedure that is optional for the authorities. This procedure allows the authorities to release tax assessments without verifying the filed tax returns, while keeping a right of verification within a statute of limitations period of five years.

Dividends. Dividends received by resident companies are generally taxable. However, dividends received are fully exempt from corporate income tax if the following conditions are fulfilled:

- The recipient is one of the following:
 - A resident capital company fully subject to tax in Luxembourg or a qualifying resident entity.
 - A Luxembourg permanent establishment of an entity that is resident in another EU state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
 - A Luxembourg permanent establishment of a capital company resident in a state with which Luxembourg has entered into a tax treaty.

- A Luxembourg permanent establishment of a capital company or cooperative company resident in an EEA state other than an EU state.
- The recipient owns at least 10% of the share capital of the distributing company or the acquisition cost of the shareholding is at least EUR1,200,000.
- The recipient holds the minimum participation in the distributing company for at least 12 months. The 12-month period does not need to be completed at the time of the distribution of the dividends if the recipient commits itself to hold the minimum participation for the required period.

Dividends received from nonresident companies are fully exempt from tax if the above conditions are met and if any of the following applies:

- The distributing company is a fully taxable resident capital company.
- The distributing entity is a nonresident capital company fully subject to a tax comparable to Luxembourg corporate income tax (that is, subject to a mandatory corporate tax at a nominal rate of at least 8.5%, levied on a tax base that is determined according to rules and criteria that are similar to those applicable in Luxembourg).
- The distributing entity is resident in another EU member state and is covered by Article 2 of the EU Parent-Subsidiary Directive.

The exemption for dividends also applies to dividends on participations held through qualifying fiscally transparent entities.

Expenses (for example, interest expenses or write-downs with respect to participations that generate exempt income) that are directly economically related to exempt income (for example, dividends) are deductible only to the extent that they exceed the amount of exempt income.

If the minimum holding period or the minimum shareholding required for the dividend exemption granted under Luxembourg domestic law is not met, the recipient can still benefit from an exemption for 50% of the dividends under certain conditions.

On the distribution of dividends, as a general rule, 15% of the gross amount must be withheld at source; 17.65% of the net dividend must be withheld if the withholding tax is not charged to the recipient, unless a more favorable rate is provided by a tax treaty. No dividend withholding tax is due if either of the following conditions is met:

- The recipient holds directly, or through a qualifying fiscally transparent entity, for at least 12 months (the holding period requirement does not need to be completed at the time of the distribution if the recipient commits itself to eventually hold the minimum participation for the required 12-month period) at least 10% of the share capital of the payer, which must be a fully taxable resident capital company or other qualifying resident entity, or shares of the payer that had an acquisition cost of at least EUR1,200,000, and the recipient satisfies one of the following additional requirements:
 - It is a fully taxable resident capital company or other qualifying resident entity or a permanent establishment of such company or entity.

- It is an entity resident in another EU member state and is covered by Article 2 of the EU Parent-Subsidiary Directive.
- It is a capital company resident in Switzerland that is fully subject to tax in Switzerland without the possibility of being exempt.
- It is a Luxembourg permanent establishment of an entity that is resident in another EU member state and that is covered by Article 2 of the EU Parent-Subsidiary Directive.
- It is a company resident in a state with which Luxembourg has entered into a tax treaty and is subject to a tax comparable to the Luxembourg corporate income tax (that is, subject to a mandatory corporate tax at a nominal rate of at least 8.5%, levied on a tax base that is determined according to rules and criteria that are similar to those applicable in Luxembourg), or it is a Luxembourg permanent establishment of such a company.
- It is a company resident in an EEA member state and is subject to a tax comparable to the Luxembourg corporate income tax (that is, subject to a mandatory corporate tax at a nominal rate of at least 8.5%, levied on a tax base that is determined according to rules and criteria that are similar to those applicable in Luxembourg), or it is a Luxembourg permanent establishment of such a company.
- The distributing company is an investment fund, a SIF, a SPF, a SICAR or a RAIF.

Luxembourg has enacted the anti-hybrid clause and the anti-abuse clause, as adopted by the European Commission through Directives 2014/86/EU and 2015/121/EU, respectively. The Luxembourg tax exemption for dividends derived from an otherwise qualifying EU subsidiary (see above) does not apply to the extent that this income is deductible by the EU subsidiary. In addition, the participation exemption for dividends from qualifying EU subsidiaries and the exemption from Luxembourg dividend withholding tax for income (dividend) distributions to qualifying EU parent companies of Luxembourg companies does not apply if the income is allocated in the context of “an arrangement or a series of arrangements which, having been put into place for the main purpose or one of the main purposes of obtaining a tax advantage that defeats the object or purpose of the PSD (Parent-Subsidiary Directive), are not genuine having regard to all relevant facts and circumstances.” In line with the European Council’s directive, the law continues by stating that “an arrangement, which may comprise more than one step or part, or a series of arrangements, shall be regarded as not genuine to the extent that they are not put into place for valid commercial reasons which reflect economic reality.”

Interest. Except for the cases discussed below, no withholding tax is imposed on interest payments. For interest linked to a profit-sharing investment, dividend withholding tax may apply.

Withholding tax at a rate of 20% is imposed on interest payments made to individuals resident in Luxembourg by the following:

- Luxembourg paying agents
- Paying agents established in the EU or in an EEA state other than an EU state, if a specific form is filed by the recipient by 31 March of the calendar year following the year of receipt of the interest

The withholding tax is final if the interest income is derived from assets held as part of the private wealth of the individual.

Foreign tax relief. A tax credit is available to Luxembourg resident companies for foreign-source income (derived from a country with which no double tax treaty is in place) that has been subject to an equivalent income tax abroad. The same applies to withholding tax levied in the country of source of the income in accordance with the provisions of an applicable double tax treaty and Luxembourg tax law. The maximum tax credit corresponds to the Luxembourg corporate income tax that would have been payable on the net foreign-source income but for the tax credit.

C. Determination of trading income

General. The taxable income of corporations is generally based on the annual financial statements prepared in accordance with generally accepted accounting principles. Profits disclosed are adjusted for exempt profits, nondeductible expenses, special deductions, loss carryforwards, transfer-pricing adjustments and inclusion of undistributed net income of controlled foreign companies (CFCs).

Expenses incurred exclusively for the purposes of the business are generally deductible, except to the extent disallowed by interest limitation rules or by anti-hybrid mismatch rules introduced by the laws transposing the EU Anti-Tax Avoidance Directive (ATAD) and the Council Directive (EU) 2017/952 of 29 May 2017 amending the ATAD regarding hybrid mismatches with third countries (ATAD 2). The anti-hybrid mismatch rules are designed to neutralize the effect of determined hybrid mismatches arising between associated enterprises, between a Luxembourg taxpayer and an associated enterprise, between the head office and its permanent establishment, between two or more permanent establishments of the same entity, or under a structured arrangement. The neutralization is achieved either by denying the deduction of expenses in Luxembourg or by including the corresponding income in the Luxembourg tax base. Also, see *Interest limitation rules* in Section E.

Effective from 1 March 2021, under certain circumstances, the deduction of interest and royalties owed by Luxembourg corporate taxpayers to related enterprises that are corporations established in a country listed on the EU list of non-cooperative jurisdictions for tax purposes is disallowed. This measure does not apply if the taxpayer proves that the transaction that gives rise to the interest or royalties owed “is used for valid economic reasons which reflect economic reality.”

Accounting rules. International Financial Reporting Standards (IFRS), as adopted by the EU, were introduced in Luxembourg in 2010. However, a tax balance sheet is required to bring valuation of assets and liabilities in line with tax valuation rules, which generally avoids the taxation of unrealized gains. Companies that prepare their accounts under the Luxembourg generally accepted accounting principles’ standards may also opt for the use of fair value accounting. Such companies must set up a tax balance sheet aligning the assets and liabilities at the value foreseen by tax laws.

Unless an exception applies, Luxembourg companies are generally subject to the Luxembourg standard chart of accounts (*plan compatible normalize*, or PCN).

Inventories. Inventory must be valued at the lower of acquisition (or production) cost or going concern value. The cost may be calculated either on the basis of weighted-average prices, first-in, first-out (FIFO), last-in, first-out (LIFO) or a similar method, provided the business situation justifies such a method. The method chosen should be applied consistently.

Provisions. The tax law does not provide for specific rules with respect to provisions. Based on the principle that tax follows accounting, a provision is tax deductible if it follows accounting rules; that is, the provision is intended to cover losses or debts the nature of which is clearly defined and which are either likely to be incurred or certain to be incurred but uncertain as to their amount or as to the date on which they will arise.

Tax depreciation. The straight-line depreciation method and, under certain conditions, the declining-balance method (except for buildings) are allowed.

Assets are depreciated over their normal useful life, taking into account the type of asset and the conditions of its use. It is generally accepted that commercial buildings are depreciated at straight-line rates ranging from 1.5% to 4%. The straight-line rate for industrial buildings is 4%. Land may not be depreciated.

The depreciation rates that are generally accepted under the straight-line method are 10% for plant and machinery, 20% for office equipment and 25% for motor vehicles. The declining-balance depreciation rates may be as high as three times the straight-line depreciation rate without exceeding 30% (four times and 40% for equipment exclusively used for research and development).

Depreciable assets with a useful life of one year or less and those with a value not exceeding EUR870 may be deducted in full from business income in the year of acquisition.

Taxpayers may also opt for a deferred depreciation; the linear depreciation of an asset for a given financial year can, on request of a taxpayer, be deferred until the end of the useful life of such asset, at the latest. This measure allows taxpayers to better manage tax credits that can only be used for a specified period (tax credit for investment or tax credit for hiring unemployed persons) as well as the carryforward of tax losses, which is also limited in time (17 years).

Special tax depreciation for investments in clean technology. Businesses making eligible investments aimed at protecting the environment and providing for the rational use of energy may elect an accelerated tax amortization of 80% of the depreciation base.

Intellectual property. Eighty percent of the net income derived from qualifying intellectual property (IP) rights is exempt from income tax (Luxembourg corporate income tax and municipal business tax) and net wealth tax under certain conditions. Capital

gains derived from the disposal of qualifying IP rights also benefit from the exemption regime. The scheme covers inventions legally protected under national or international provisions by patents or other IP assets that are functionally equivalent to patents (such as utility models or supplementary protection certificates on patents for pharmaceutical and plant protection products). The scheme may also apply to software protected by copyright under national or international provisions in force (copyrighted software). The aforementioned assets are only eligible for the IP regime if they result from an actual research and development activity undertaken by the taxpayer.

Based on the agreed nexus approach, the net eligible income benefiting from the tax exemption of 80% is determined by applying the nexus ratio (that is, the proportion of qualifying expenditures compared to overall expenditures) to the adjusted and compensated (in this context, compensated refers to the offsetting of losses incurred on one qualifying IP asset against profits derived from another qualifying IP asset) net eligible income.

Tax credits

General investment tax credit. A tax credit of 13% is granted for additional investments in qualifying assets made during the tax year. Qualifying assets consist of depreciable tangible fixed assets other than buildings that are physically used in EU or EEA member states. Certain assets are excluded from this tax credit, such as motor vehicles, assets that have a useful life of less than three years and secondhand assets. In addition, an 8% credit is granted for qualifying new investments up to EUR150,000, and a 2% credit is granted for investments over that amount.

The investment tax credit is granted for investments in the following:

- Electric cars, which are passenger cars with zero emissions, functioning exclusively on electricity or on hydrogen fuel cells. The measure applies to those cars whose date of first registration is after 31 December 2017 and is capped to the first tranche of EUR50,000 of the acquisition price per car.
- Acquired software, subject to certain limits and conditions. The investment tax credit on the acquisition of software is 8% for investment amounts not exceeding EUR150,000 and 2% for the investment exceeding that amount. The maximum amount of the tax credit for the acquisition of software cannot exceed 10% of the corporate income tax due for the tax year in which the financial year of the acquisition of the software ends.

Tax credit for ecological equipment. The rates for the general investment tax credit (see *General investment tax credit*) are increased from 8% to 9% and from 2% to 4% for certain investments intended to protect the environment.

The above credits reduce corporate income tax and may be carried forward for 10 years.

Tax credit for hiring of the unemployed. For a duration of 12 months from the month of hiring and subject to the continuation of the employment contract for a period of 12 months, 10% of the monthly gross salary paid to persons who were unemployed can be offset against corporate income tax under certain conditions.

Relief for losses. Trading losses, adjusted for tax purposes, incurred in or after 1991 may be carried forward without a time limitation. For losses incurred in financial years closing after 31 December 2016, the use of loss carryforwards is limited to 17 years. The oldest losses are deemed to be used first. Losses may not be carried back.

Groups of companies. A Luxembourg company and its wholly owned (at least 95% of the capital, which may be reduced to 75% in exceptional situations) Luxembourg subsidiaries may form a “vertical fiscal unity.” The fiscal unity allows the affiliated subsidiaries to combine their respective tax results with the tax result of the parent company of the consolidated group. To qualify for a fiscal unity, both the parent and its wholly owned subsidiaries must be resident capital companies that are fully subject to tax. A Luxembourg permanent establishment of a nonresident capital company fully subject to a tax comparable to Luxembourg corporate income tax also qualifies as a parent company of the group. The fiscal unity rules also allow a fiscal unity between a Luxembourg parent company and its indirectly held Luxembourg subsidiary through a nonresident qualifying company or a tax-transparent entity.

Companies that are part of a fiscal unity suffer the minimum net wealth tax at the level of each entity, but the consolidated amount of minimum tax is capped at EUR32,100.

Companies may also form a “horizontal fiscal unity.” The fiscal unity can be formed by two or more Luxembourg-resident companies owned by the same nonresident parent, provided that the parent company is resident in an EEA state and fully subject to a tax comparable to Luxembourg corporate income tax. In addition, Luxembourg permanent establishments of a nonresident company, regardless of its fiscal residence, are allowed to be included in a fiscal unity, provided that this company is fully liable to a tax corresponding to Luxembourg corporate income tax.

The members of a vertical or horizontal fiscal unity must bind themselves for a period of at least five accounting years. If any of the conditions to form a fiscal unity are no longer met within this minimum five-year period of existence of the fiscal unity, there will be rectifying tax assessments on a stand-alone basis for the members no longer meeting these conditions. If a group of companies in a vertical fiscal unity requests to form a horizontal fiscal unity, this may, on the satisfaction of certain conditions, exceptionally occur without triggering any adverse tax consequences for the individual members of the vertical fiscal unity that is dissolved.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on the supply of goods and services within Luxembourg and on the import of goods and services into Luxembourg	
General rate	17
Other rates	3/8/14

Nature of tax	Rate (%)
Subscription tax (<i>taxe d'abonnement</i>), annual tax on the value of a company's shares; rate depends on type of company	
Société de Gestion de Patrimoine Familial (SPFs)	0.25
Investment funds	
Certain funds of funds, certain institutional monetary funds, Pension Fund Pooling Vehicles (PFPVs), microfinance UCIs and Exchange Traded Funds	0
Specialized Investment Funds (SIFs), dedicated funds (funds owned exclusively by institutional investors), institutional compartments of funds, monetary funds and cash funds, on the condition that the exemption regime does not apply	0.01
Collective-investment funds or individual compartments of such funds that invest a specific portion of their net asset value in determined sustainable economic activities	0.01 to 0.04
Other funds	0.05
Social security contributions on salaries (2022 rates); paid by	
Employer (including health at work contribution but excluding accident and mutual insurance)	11.2
Employee (including care insurance)	12.45
Payroll taxes, for accident insurance; paid by employer; as of 1 January 2022, the accident insurance rates vary depending on a "bonus-malus" factor ranging from 0.9 to 1.5 applied on a base rate of 0.75%; this factor is attributed considering the costs generated by the accidents that occurred at work during an observation period; every employer in Luxembourg has received a communication informing it of the rate to be applied (2022 rates)	0.675 to 1.125
Health at work contribution, on salaries; paid by employer (2022 rate)	0.14
Care insurance on gross employment income; paid by employee (2022 rate)	1.4
Mutual insurance (2022 rates); paid by employer	0.6 to 2.98

E. Miscellaneous matters

Foreign-exchange controls. Luxembourg does not impose transfer restrictions. The Banque Centrale de Luxembourg (BCL) and the Service Central de la Statistique et des Etudes Économiques (the national statistical institute of Luxembourg) monitor the transfer of funds. Effective from 1 January 2012, this obligation was transferred to the companies themselves on a monthly basis. The reporting obligation also applies to selected companies in the non-financial sector that, based on previous activity, are expected to realize large volumes of transactions, mainly services, with foreign counterparts.

Debt-to-equity rules. The Luxembourg tax law does not contain any specific thin-capitalization rules. In principle, borrowed money that is necessary for financing an operation is not limited to a

percentage of paid-in capital. The ratio between debt and equity must be determined according to transfer pricing principles.

Anti-avoidance rules. According to the general anti-avoidance rule (GAAR), the tax law cannot be circumvented by an abuse of forms or institutions of law. An abuse exists when the legal path, having been chosen for the main purpose or one of the main purposes of obtaining a circumvention or reduction of the tax burden that defeats the object or purpose of the tax law, is not authentic (that is, it is not put in place for valid commercial reasons that reflect economic reality) having regard to all relevant facts and circumstances. The GAAR allows tax authorities to disregard legal constructions characterized as abusive and levy tax on the structure or transaction that they would consider as adequate.

Anti-hybrid rules. Luxembourg implemented anti-hybrid rules through the transposition of ATAD and ATAD 2. The ATAD was implemented into Luxembourg law with effect from financial years starting on or after 1 January 2019 and introduced a provision dealing only with intra-EU hybrid mismatches. Effective from financial years starting on or after 1 January 2020, the territorial scope of the anti-hybrid mismatch provision was extended to third countries, and the provision addresses hybrid permanent establishment mismatches, hybrid transfers, imported mismatches and dual resident mismatches. The aforementioned hybrid mismatches trigger corrective tax adjustments to the extent they give rise to a mismatch outcome, meaning either a double deduction, a deduction or non-taxation without inclusion, or a double tax credit. Effective from the 2022 tax year, the reverse hybrid entity rule also applies, meaning that transparent entities or arrangements that are incorporated or established in Luxembourg are, under certain conditions, treated as corporate taxpayers and subject to Luxembourg corporate income tax.

Interest limitation rules. The deductibility of “exceeding borrowing costs” is limited to the higher of EUR3 million or 30% of the total of net taxable income as per the Luxembourg Income Tax Law, increased by exceeding borrowing costs, the tax value of any impairment, depreciation and amortization that have reduced net taxable income (earnings before interest, taxes, depreciation and amortization). Exceeding borrowing costs may be carried forward with no time limit, and unused interest capacity may be carried forward for five years. Interest on loans concluded before 17 June 2016 and not subsequently modified is grandfathered; an equity escape rule is available to members of a group consolidated for financial accounting purposes; stand-alone entities and financial undertakings specified by the ATAD Law (essentially credit institutions, regulated investment firms, insurance and re-insurance undertakings, Undertaking for Collective Investments in Transferable Securities [UCIT] management companies, Alternative Investment Fund Managers [AIFMs], UCITs, Alternative Investment Funds [AIFs; see *Special tax regime for carried interest*] managed by an AIFM, and certain pension institutions) are not subject to interest limitation.

For companies that are members of a fiscal unity (see *Groups of Companies* in Section C), the interest limitation rules apply to the

fiscal unity as a whole, unless all the members opt for the rules to apply to each company individually.

Controlled foreign companies. Income of a CFC, as defined by the ATAD Law, that is not distributed directly to the Luxembourg controlling entity and that results from arrangements put in place for the essential purpose of obtaining a tax advantage and that are “non-genuine arrangements,” is included in the Luxembourg entity’s taxable income to the extent that it arises from assets and risks in relation to which the Luxembourg entity carries out significant people functions.

Transfer pricing. With respect to the transfer-pricing legislation, according to Article 56 of the Income Tax Law, if associated enterprises enter into transactions that do not meet the arm’s-length principle, any profits that would have been realized by one of the enterprises under normal conditions are included in the profits of that enterprise and taxed accordingly. Based on this measure and on the general anti-abuse provision, the tax authorities can substitute an arm’s-length price if transactions with a related party are entered into at an artificial price or if transactions are entered into in an abnormal manner and are solely tax-motivated.

Article 56bis of the Luxembourg Income Tax Law further clarifies the concept of the arm’s-length principle. This article contains the basic framework of a transfer-pricing analysis based on principles revised in the context of BEPS Action Plan. It particularly focuses on the comparability analysis and contains new elements to be considered, incorporating the conclusions from Actions 8 to 10 of the BEPS Plan into domestic law.

An administrative circular on the transfer-pricing framework for companies carrying out intragroup financing activities in Luxembourg provides additional guidance regarding the substance and transfer-pricing requirements in line with the Organisation for Economic Co-operation and Development (OECD) guidelines.

Chamber of Commerce fee. Membership in the Chamber of Commerce, which requires an annual membership fee, is mandatory for all commercial companies having their legal seat in Luxembourg and for Luxembourg branches of foreign companies. The fee ranges from 0.025% to 0.20%, depending on the taxable profit of the company, before loss carryforwards, as provided by the Luxembourg income tax law. The fee is assessed on the basis of the taxable profit realized two years before the year the contribution is due. For companies in a loss situation, partnerships and limited companies (*société à responsabilité limitée*) must make a minimum contribution of EUR70, while other corporations must make a minimum annual contribution of EUR140. Companies that mainly perform a holding activity and that are listed as such in the Statistical Classification of Economic Activities in the European Community (Nomenclature statistique des activités économiques dans la communauté européenne, or NACE) Code must pay a lump-sum fee of EUR350.

Special tax regime for expatriate highly skilled employees. Luxembourg first introduced an expatriate tax regime as from 2011 through a Tax Circular that has been amended since it was originally issued. The 2021 Budget Law anchored this regime in

law and made some amendments to the rules currently in place. If certain conditions to be fulfilled both at the employee and employer level are met, some components of the employee's salary package are considered to be tax exempt (for example, moving costs, certain travel costs and school fees). Other qualifying salary components (for example, housing costs, and the annual return trip) can also be considered to be tax exempt, subject to certain limits. These costs are considered tax exempt up to the lower of EUR50,000 per year (EUR80,000 in cases in which the employee uses the housing jointly with their spouse or partner) or 30% of the employee's annual base salary. The expatriate tax regime is applicable for eight years, provided that all the conditions continue to be satisfied. Employers that have employees who enjoy such regime must report by 31 January of the following year the related information to the tax office in charge of wage tax.

Limitation of corporate tax deductibility of "golden handshakes."

To limit excessive "golden handshakes" to departing employees, voluntary departure indemnities or dismissal indemnities above EUR300,000 are not tax-deductible for employers. Tax rules at the level of the employee remain fully applicable. A fractioned payment that is made over several years is deemed to be a single payment.

Islamic finance. The Luxembourg tax administration provides guidance covering the Luxembourg tax treatment of some contracts and transactions with respect to Islamic finance. This clarifies the revenue repatriation mechanism of Luxembourg's Sharia-compliant financing instruments as well as structuring capacities.

VAT Group. In 2018, Luxembourg introduced a VAT Group regime. The VAT Group is considered to be a single taxable person with the result that intra-group transactions are disregarded for VAT purposes and VAT returns are due only in the name of the VAT Group.

VAT free zone. Luxembourg has a temporary exemption regime for VAT purposes. This regime provides a VAT suspension system for transactions concerning goods stored in specific locations.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under Luxembourg domestic tax law. Dividend distributions to companies resident in a treaty jurisdiction are covered by the Luxembourg participation exemption regime. As a result, a full exemption from Luxembourg dividend withholding tax may apply if certain conditions are met (see Section B).

- (a) The 5% rate (Netherlands, 2.5%; Indonesia, Korea (South), Morocco and Thailand, 10%) applies if the beneficial owner is a company that holds directly at least 25% of the capital of the payer of the dividends.
- (b) The 0% rate applies if the beneficial owner is a company that, on the date of payment of the dividends, has owned directly at least 25% of the voting shares of the payer for an uninterrupted period of at least two years and if such dividends are derived from an industrial or commercial activity effectively operated in Luxembourg. The 5% rate applies if the beneficial owner of the dividends is a company that owns directly at least 10% of the voting shares of the payer. The 15% rate applies to other dividends.
- (c) The 10% rate applies if the recipient is a company that, since the beginning of the fiscal year, has a direct holding in the capital of the company paying the dividends of at least 25% or paid a purchase price for its holding of at least EUR6,197,338.
- (d) Under an EU directive, withholding tax is not imposed on dividends distributed to a parent company resident in another EU state if the recipient of the dividends holds directly at least 10% of the payer or shares in the payer that it acquired for a price of at least EUR1,200,000 for at least one year. This holding period does not need to be completed at the time of the distribution if the recipient commits itself to eventually holding the participation for the required period.
- (e) The 15% rate applies if the beneficial owner of the dividends is a collective-investment vehicle established in the other jurisdiction and treated as a body corporate for tax purposes in that other jurisdiction. The 10% rate applies to other dividends.
- (f) The 0% rate applies if, at the time of the distribution, the beneficial owner is a company that has held at least 25% of the share capital of the payer for an uninterrupted period of at least two years. The 5% rate applies if the beneficial owner is a company that holds directly at least 25% of the share capital of the payer. The 15% rate applies to other dividends.
- (g) The second listed rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer.
- (h) The 5% rate applies if the beneficial owner is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends. The 15% rate applies to other dividends.
- (i) The 5% rate applies if the beneficial owner of the dividends is a company that meets either of the following conditions:
- It holds directly or indirectly at least 50% of the capital of the payer.

- It has invested in the payer more than USD10 million or the equivalent in Luxembourg or Vietnamese currency.
The 10% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 25%, but less than 50%, of the capital of the payer and if such beneficial owner's investment in the payer does not exceed USD10 million or the equivalent in Luxembourg or Vietnamese currency. The 15% rate applies to other dividends.
- (j) The lower rate of 5% only applies to defined categories of beneficial owners (for example, insurance company, pension fund and central bank).
- (k) The 7.5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the shares of the payer. The 10% rate applies to other dividends.
- (l) The 0% rate applies if the beneficial owner is a company that holds at least 10% of the payer for a continuous period of 12 months before the decision to distribute the dividend. The 15% rate applies to other dividends.
- (m) Interest payments may be subject to withholding tax in certain circumstances. For details, see Section B.
- (n) The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 30% of the paying company's capital and if the value of its investment in the paying company is at least USD300,000 at the payment date.
- (o) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the payer and that has invested more than EUR2 million or its equivalent in the currency of Georgia. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the payer and that has invested more than EUR100,000 or its equivalent in the currency of Georgia. The 10% rate applies to other dividends.
- (p) The 0% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer. The 5% rate applies to individuals who own directly at least 10% of the capital of the company paying the dividends and who have been residents of the other contracting state for at least 48 months preceding the year in which the dividends are paid. The 10% rate applies to other dividends.
- (q) The lower rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the shares in the payer or if it acquired the shares in the payer for a price of at least EUR1,200,000. The 10% rate applies to other dividends.
- (r) Withholding tax is not imposed on dividends distributed to a parent company if the beneficial owner of the dividends is a company that, at the time of the payment of dividends, has held directly for an uninterrupted period of 12 months at least 10% of the capital of the company paying the dividends or that has a capital participation with an acquisition cost of at least EUR1,200,000 in the company paying the dividends. The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer of the dividends. The 15% rate applies to other dividends.
- (s) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the payer. The 15% rate applies to other dividends.
- (t) The 5% rate applies if the beneficial owner is a company that holds directly at least 20% of the capital of the payer. The 10% rate applies to other dividends.
- (u) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the payer. The 10% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and if the payer company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate lower than the normal rate of Israeli company tax. The 15% rate applies to other dividends.
- (v) The 5% rate applies if the beneficial owner is a company that holds at least 25% of the voting shares of the payer of the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
- (w) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital in the distributing company. In other cases, the 15% rate applies, including dividends arising from real estate companies that benefit from a full or partial tax exemption or that treat distributions as tax deductible. SICAVs, SICAFs, SICARs and qualifying FCPs are in the scope of the new double tax treaty with Germany and may benefit from the withholding tax regime.
- (x) The 0% rate applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends for an uninterrupted period of 24 months. The 15% rate applies to other dividends.

- (y) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly at least 15% of the shares of the payer. The 15% rate applies to other dividends. As from 1 January 2021, a 0% rate applies to dividends paid to the government of Kazakhstan or one of its central or local collectivities, the National Bank of Kazakhstan, the government of Luxembourg, or one of its local collectivities, the Central Bank of Luxembourg or the Société Nationale de Crédit et d'Investissement.
- (z) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the shares of the payer. The 10% rate applies to other dividends.
- (aa) The 0% rate applies if the beneficial owner is a company (other than a partnership) that holds for an uninterrupted period of at least one year directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (bb) The 0% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. A 10% rate applies to other dividends.
- (cc) The 0% rate applies if the beneficial owner holds directly and for an uninterrupted period of 12 months at least 10% of the shares of the payer or paid a purchase price for its holding of at least EUR1,200,000. The 5% rate applies if the beneficial owner is a company other than a partnership holding directly at least 10% of the share capital of the payer. The 15% rate applies in all other cases.
- (dd) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (ee) The 0% rate applies if the beneficial owner is a company that holds, for an uninterrupted period of three years preceding the date of payment of the dividends, a direct participation of at least 50% in the paying company and if an investment of at least USD1 million or its equivalent in the local currencies of the contracting states has been made in the capital of the paying company. This rate applies only insofar as the distributed dividend is derived from an industrial or commercial activity. The 5% rate applies if the beneficial owner is a company that holds directly at least 20% of the capital of the payer. The 15% rate applies to other dividends.
- (ff) The 0% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the payer.
- (gg) The 0% rate applies if the beneficial owner holds directly and for an uninterrupted period of 12 months at least 10% of the shares of the payer or paid a purchase price for its holding of at least EUR1,200,000. The 5% rate applies if the beneficial owner is a company, other than a partnership, holding directly at least 20% of the share capital of the payer. The 15% rate applies in all other cases.
- (hh) The 0% rate applies if the beneficial owner holds directly at least 5% of the payer's capital during a period of 365 days, including the day of the payment.

Luxembourg has signed and enacted new tax treaties or amendments to existing tax treaties with Argentina and Kuwait, but these treaties and amendments are not yet in force. The withholding tax rates under these new treaties and amendments are not reflected in the table above.

Following treaty negotiations, treaty drafts or amendments to existing treaties have been initialed with Ghana, Kyrgyzstan, Oman and South Africa. New treaties or amendments to existing treaties have been signed with Albania, Cape Verde and Rwanda.

Tax treaty negotiations with Chile, Egypt, Ethiopia, Mali, New Zealand, Pakistan, the Slovak Republic and the United Kingdom are under way.

Since 2009, Luxembourg has signed numerous new treaties or treaty amendments with other countries. As a result, Luxembourg complies with OECD standards with respect to information exchange between tax authorities and reinforces international fiscal cooperation against tax fraud.

After signing the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (the MLI) on 7 June

2017 and following the adoption of the law of 7 March 2019 approving the MLI, Luxembourg deposited its instrument of approval with the OECD on 9 April 2019. It also submitted its final MLI positions and a list of 81 tax treaties that Luxembourg has entered into with other jurisdictions and that it wishes to designate as a Covered Tax Agreement (CTA). The MLI entered into force for Luxembourg on 1 August 2019. The provisions of the MLI with respect to a CTA have effect after Luxembourg and the other party to the relevant CTA have deposited their instrument of ratification, acceptance or approval of the MLI and a specified time has passed, with a further distinction between different provisions:

With respect to taxes withheld at source on amounts paid or credited to nonresidents, the provisions will have effect when the event giving rise to such taxes occurs on or after the first day of the calendar year that begins on or after the latest of the dates on which the MLI enters into force for each of the contracting jurisdictions to the CTA. For contracting jurisdictions to a CTA that have already deposited their instrument of ratification, acceptance or approval or that deposit it before the end of September 2019, the provisions of the MLI have effect when the event giving rise to taxes withheld at source occurs on or after 1 January 2020.

With respect to all other taxes levied by a contracting jurisdiction, the first taxes for which the provisions will enter into effect are those that are levied with respect to tax periods beginning on or after the expiration of a period of six calendar months from the latest of the dates on which the MLI enters into force for each of the contracting jurisdictions to the CTA. For contracting jurisdictions to a CTA that have already deposited their instrument of ratification, acceptance or approval or that deposit it before the end of April 2019, the provisions of the MLI have effect for taxes levied with respect to tax periods beginning on or after 1 February 2020.

The most important changes that will affect Luxembourg's tax treaties relate to the introduction of a principal purpose test and an amendment of the preamble that states that the relevant tax treaty is not intended to create opportunities for non-taxation or reduced taxation. Luxembourg also decided to apply mandatory binding arbitration.

This chapter relates to the tax jurisdiction of the Macau Special Administrative Region (SAR) of China.

A. At a glance

Corporate Income Tax Rate (%)	12 (a)
Capital Gains Tax Rate (%)	12 (a)(b)
Branch Tax Rate (%)	12 (a)
Withholding Tax (%) (c)	
Dividends	0 (d)
Interest	0
Royalties from Patents, Know-how, etc.	0
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	3 (e)

- (a) For the 2021 tax year, complementary tax is imposed on taxable profits in excess of MOP600,000 at a rate of 12%.
- (b) For details regarding the taxation of capital gains, see Section B.
- (c) Macau law does not contain any specific measures imposing withholding taxes except for service fees paid to individuals. Under certain circumstances, interest or royalties received by nonresidents from Macau may be regarded as income from commercial or industrial activities in Macau and taxed at the normal corporate income tax rates.
- (d) Dividends are not taxable if they are distributed by entities that have paid corporate income tax at the corporate level on the distributed income.
- (e) For details regarding tax losses, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies and individuals carrying on commercial or industrial activities in Macau are subject to complementary tax in Macau. An entity established in Macau is regarded as carrying on business in Macau, and its profits are subject to complementary tax. Non-Macau entities that derive profits from commercial or industrial activities in Macau are also subject to complementary tax.

Rates of corporate income tax. The same complementary tax rates apply to companies and individuals. The following are the complementary tax rates for the 2021 tax year.

Exceeding MOP	Taxable profits		Tax on lower amount MOP	Rate on excess %
	Not exceeding MOP			
0	600,000		0	0
600,000	–		0	12

For the 2022 tax year, income derived from Portuguese-speaking countries is exempt from Macau corporate income tax, provided that it is taxed in those countries.

In addition, the interest income and gains from the sale or redemption of bonds issued by the China Mainland government and state-owned enterprises are exempt from Macau complementary tax under the Macau Complementary Tax Law. For the 2022 tax year, all interest income and gains from the sale or redemption of bonds issued in Macau is exempt from Macau complementary tax under the Law 21/2021 Fiscal Budget.

Capital gains. The Macau Complementary Tax Law does not distinguish between a “capital gain” and “revenue profit.” Companies carrying on commercial or industrial activities in Macau are subject to complementary tax on their capital gains derived in Macau.

Administration. The tax year is the calendar year.

For tax purposes, companies are divided into Groups A and B. These groups are described below.

Group A. Group A companies are companies with capital of over MOP1 million (USD125,000) or average annual taxable profits over the preceding three years of more than MOP1 million. Other companies maintaining appropriate accounting books and records may also elect to be assessed in this category by filing an application with the Macau Financial Services Bureau before the end of the tax year. Companies that are considered as the Ultimate Parent Entities (UPEs) of multinational groups are also classified as Group A companies.

Income of Group A companies is assessed based on their financial accounts submitted for tax purposes. These companies are required to file between April and June of each year complementary tax returns with respect to the preceding year. The tax returns must be certified by local accountants or auditors registered with the Macau Financial Services Bureau.

Group A companies may carry forward tax losses to offset taxable profits in the following three years.

Group B. All companies that are not Group A companies are classified as Group B taxpayers.

For Group B companies, tax is levied on a deemed profit basis. Financial information in tax returns submitted by Group B companies normally serves only as a reference for tax assessment.

Group B companies are normally deemed to earn profits for each year of assessment, regardless of whether the taxpayers have earned no income or incurred losses for the year.

Group B companies are required to file annual tax return forms for the preceding year between February and March. Certification of the tax return forms by registered accountants or auditors is not required.

Group B companies may not carry forward tax losses.

Dividends. Dividends are normally paid out of after-tax profits. Consequently, no tax is imposed on dividends.

Group A companies (see *Administration*) may claim deductions for dividends declared out of current-year profits. Under such circumstances, the recipients of the dividends are subject to complementary tax on the dividends.

Foreign tax relief. Macau does not grant relief for foreign taxes paid except for those specified under double tax treaties with Macau.

C. Determination of trading income

General. As discussed in Section B, companies are divided for tax purposes into Groups A and B. For Group A companies, taxable profits are based on the profits shown in the signed complementary tax return, subject to adjustments required by the tax law. Group B companies are taxed on a deemed profit basis.

To be deductible, expenses must be incurred in the production of taxable profits. Certain specific expenses are not allowed, such as life insurance and fines. The deduction of provisions is restricted.

For the 2022 tax year, subject to satisfaction of certain conditions, for costs incurred for innovation and technology development purposes by Group A taxpayers, the first MOP3 million are eligible for a three times tax deduction, and the remaining expenses for the same purpose are entitled to a two times tax deduction, up to a maximum total deduction of MOP15 million.

Inventories. Inventories are normally valued at the lower of cost or net realizable value. Cost can be determined using the weighted average or first-in, first-out (FIFO) methods.

Provisions. The following are the rules for the tax-deductibility of provisions in Macau:

- Provision for bad debts: deductible up to 2% of trade debtor's year-end balance
- Provision for inventory loss: deductible up to 3% of the value of the closing inventory at the end of the year
- Provision for taxes: not deductible
- Other provisions: subject to approval by the tax authorities

Tax depreciation. Tax depreciation allowances are granted for capital expenditure incurred in producing taxable profits. These allowances are calculated based on the actual cost of purchase or construction, or, if the amount of the cost is not available, the book value accepted by the Macau Financial Services Bureau. The following are the maximum straight-line depreciation rates in Macau.

Asset	Maximum rate (%)
Industrial buildings (including hotels)	
First year	20
Subsequent years	4
Commercial and residential buildings	
First year	20
Subsequent years	2
Central air-conditioning plant	14.29
Central telecommunication, telephone and telex systems	10
Elevators and escalators	10
Vessels, dredgers and floating cranes	10
Transport equipment	
Light vehicles	20
Heavy vehicles	16.66
Furniture	
Office	20
Residential	16.66
Computers, minicomputers and word processors	25
Other office equipment	20
Non-electronic equipment and machinery	14.29
Electronic equipment and machinery	20
Computer software	33.33
Molds	33.33
Patents	10
Other assets	Various

Relief for losses. Group A companies (see Section B) may carry forward losses for three years. Loss carrybacks are not allowed.

Groups of companies. Macau does not allow consolidated returns or provide other relief for groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Property tax, levied annually on owners of real property in Macau; the tax is applied to the actual rental income for leased property and to the deemed rental value for other property as determined by the Macau Financial Services Bureau; up to 10% of the rent or rental value may be deducted to cover repairs and maintenance, and other expenses related to the property; certain buildings are exempt including industrial buildings occupied by their owners for industrial purposes, new residential or commercial buildings for the first 6 years on the islands of Coloane and Taipa and for the first 4 years in other parts of Macau, and new industrial buildings for the first 10 years on Coloane and Taipa and for the first 5 years in other parts of Macau Rental property (tax incentive granted under Law No. 21/2021 for the reduction of property tax for leased properties to 8% for 2022)	8%

Nature of tax	Rate
Other property	6%
Stamp duty, on selling price or assessable value of transferred property; payable by purchaser	1% to 3% (plus 5% surcharge)
Additional stamp duty; payable on the acquisition of residential properties by corporations or non-Macau residents	10%
Additional stamp duty; payable on the acquisition of a second residential property by an individual or corporation who owns a residential property	5%
Additional stamp duty; payable on the acquisition of a third residential property or additional residential properties by an individual or corporation who owns residential properties	10%
Special stamp duty, on transaction price; payable by transferor of residential properties, shops, offices and car parks; subject to exemptions under certain special circumstances	
Property acquired by the vendor on or after 14 June 2011 (for residential properties) and 30 October 2012 (for shops, offices and car parks) and sold within one year after acquisition (from the issuance date of the stamp duty demand note)	20%
Property acquired by the vendor on or after 14 June 2011 (for residential properties) and 30 October 2012 (for shops, offices and car parks) and sold in the second year after acquisition (from the issuance date of the stamp duty demand note)	10%

E. Miscellaneous matters

Foreign-exchange controls. The currency in Macau is the pataca (MOP). Since 1977, the pataca has been closely aligned with the Hong Kong dollar (HKD), moving within a narrow band around an exchange rate of MOP103 to HKD100. Because the Hong Kong dollar is officially pegged to the US dollar, the value of the pataca is closely associated with the value of the US dollar. The current exchange rate is approximately MOP8:USD1.

Macau does not impose foreign-exchange controls.

Debt-to-equity rules. Except for the banking and financial services sector, no statutory debt-to-equity requirements or capitalization rules are imposed in Macau.

Country-by-Country Reporting. A company that is the UPE of a multinational group is classified as a Group A taxpayer and must comply with the Country-by-Country (CbC) Reporting requirement.

The CbC Report filing threshold, which is set in accordance with the Organisation for Economic Co-operation and Development (OECD) recommendation, is consolidated turnover exceeding MOP7 billion in the preceding year.

The primary obligation for CbC Report filing falls on the UPEs of multinational groups that are resident in Macau. A CbC Report must be prepared for each accounting period beginning on or after 1 January 2019.

Macau UPEs that hold overseas subsidiaries should file a notification with the Macau Financial Services Bureau within three months after the end of the relevant accounting period. For those UPEs that have consolidated turnover exceeding MOP7 billion, an annual notification form must be filed within three months after the end of the relevant accounting period and the deadline for filing a CbC Report is 12 months after the end of the relevant accounting period.

F. Tax treaties

Macau has entered into double tax treaties with Cape Verde, China Mainland, the Hong Kong SAR, Mozambique, Portugal and Vietnam. Macau has signed a double tax treaty with Belgium and Cambodia, but these treaties are not yet in force.

A. At a glance

Corporate Income Tax Rate (%)	10/20 (a)
Capital Gains Tax Rate (%)	20 (a)
Branch Tax Rate (%)	20 (a)
Withholding Tax (%)	
Dividends	10 (b)
Interest	20 (c)
Royalties	10 (d)
Other Non-salary Payments	5/10 (e)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The 10% rate applies to entities carrying out activities within the framework of health and/or education. The 20% rate applies to companies with turnover of MGA200 million (approximately USD50,000) or more. For companies with a lower amount of turnover, a special corporate income tax called Synthetic Tax is applied at a rate of 5%. For further details, see Sections B and C.
- (b) Withholding tax on dividends applies to payments of dividends to foreign companies and/or individuals. A parent-subsidiary regime exists for local entities (see Section B).
- (c) This withholding tax applies to resident and nonresident corporations and individuals.
- (d) This withholding tax applies to nonresident corporations.
- (e) The 5% withholding tax applies to residents, and the 10% withholding tax applies to nonresident corporations and individuals.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies deriving taxable income from activities carried out in Madagascar are subject to corporate income tax. Resident companies are companies incorporated in Madagascar, which include subsidiaries, permanent establishments and branches of foreign companies.

Tax rates. For companies with turnover of MGA200 million (approximately USD50,000) or more, as well as for companies that opt for the actual regime regardless of their turnover, the corporate income tax rate is 20%.

The minimum tax is MGA100,000 (approximately USD25) plus 0.5% of annual turnover (including capital gains) for companies carrying out the following activities:

- Agricultural
- Craft
- Mining
- Industrial
- Tourism
- Transport

This minimum tax equals 0.1% of annual turnover for fuel station filling companies. For inland carriers, the minimum tax will be revised by regulatory text. For companies engaged in other activities, the minimum tax is MGA320,000 (approximately USD80) plus 0.5% of annual turnover.

The minimum tax applies if the company incurs a loss or if the corporate income tax calculated using the 20% rate is less than the minimum tax to be paid as stated above.

The holders or beneficiaries of public procurement contracts and the first-level subcontractors, whether resident or nonresident or individuals or companies, that exclusively perform public procurement contract activities are subject to one specific withholding tax at a rate of 8%, designated as the public procurement contracts tax (Impôt sur les Marchés Publics), and are exempt from minimum tax.

For holders or beneficiaries of some public procurement contracts that are not subject to this public procurement contracts tax, a special installment at a rate of 0.5% of the amount of the contract should be paid on registration of the public procurement contract. This installment is a specific installment, which is totally independent from the standard corporate income tax and its corresponding standard installments.

For entities carrying out activities within the framework of the health and/or education framework, the applicable rate is 10%, and the minimum tax is MGA100,000 (approximately USD25) plus 0.1% of annual turnover.

For companies with turnover of less than MGA200 million (approximately USD50,000) or non-registered resident suppliers, a special corporate income tax called Synthetic Tax is applied at a rate of 5%.

Free zones' companies. Free zones' companies are exempt from corporate income tax for the following time periods.

- In general for free zones' companies: the first 10 years of their activities in the free zone
- For free Industrial Processing Enterprises (Entreprises Industrielles de Transformation, or EITs) and Basic Intensive Production Enterprises (Entreprises de Production Intensive de Base, or EPIBs): the first 3 years of their activities
- For free Service Enterprises (Entreprises Service, or ESs): the first year of their activities

The above companies are subject to corporate income tax at a rate of 10% for subsequent years and to minimum tax at a rate of 0.5%.

Large mining investments. Mining companies making investments over approximately USD12 million can benefit from legal and tax incentives if they are eligible under a special law called *Loi sur les Grands Investissements Miniers (LGIM)*. They are exempt from minimum tax for five years from the beginning of exploitation. The corporate income tax rates are 25% for owners of mining permits and 10% for the transformation entities.

Capital gains. Capital gains are included in taxable income and subject to corporate income tax. Income from the following is subject to capital gains tax at a rate of 20%:

- Possession of property or rights relating to that property
- The sale of shares in entities of which all or part of the value comes, directly or indirectly, from property located in Madagascar, or rights relating to this property

Administration. The standard tax year is the calendar year. However, companies may select a tax year running from 1 July to 30 June or another tax year.

Companies using the standard tax year must file financial statements and the corporate income tax return with the Malagasy tax authority by 15 May of the year following the tax year. For companies choosing a tax year-end other than the standard tax year-end, the filing must be made by the 15th day of the fourth month following the year-end. Companies must make six installments of corporate income tax for each tax year. Each payment must equal one-sixth of the preceding year's tax amount. The installments are payable by 15 February, 15 April, 15 June, 15 August, 15 October and 15 December. The financial statements should also be filed online.

For taxpayers engaged in import or export operations, a corporate income tax installment at the rate of 2% is applied on the customs value of the imported and/or exported goods for their first seven tax years. Taxpayers that benefit from a special or preferential tax regime in Madagascar and that import or export goods or that import raw materials and goods to be booked as fixed assets, subject to the presentation of a certificate approved by the tax authority, are excluded from the payment of this corporate income tax installment. This tax installment is calculated and collected by the customs service before removal of imported goods and before shipment of goods intended for export.

Before engaging in activities in Madagascar, an entity must apply for tax registration by completing a specified form during the company creation procedure. The tax registration for wholesalers requires the filing of a specific declaration. A tax identification card is issued to a new taxpayer on the completion of registration.

The tax identification card must be renewed every year at the time of submission of the corporate income tax return.

Taxpayers that compute taxable income under the actual regime must open a bank account in their name.

Financial statements provided to private or public entities require the visa or certification of the tax administration.

Nonresident entities must file a declaration that details all goods and services purchased during a tax year (annual third-party declaration).

Shareholders' current-account transactions (loans granted by shareholders to the company) must be evidenced by registered-loan agreements and be regularly recorded.

Taxpayers that carry out one or more financial or commercial transactions involving tangible or intangible goods and services with a related company located outside Madagascar or with a company located in a jurisdiction with a privileged tax regime are required to file transfer-pricing documentation (Master File and Local File) at the same time as the corporate income tax return. Failure to comply with this obligation or a failure or delay in filing any element of the transfer-pricing documentation is sanctioned by a fine of MGA10 million (approximately USD2,000).

During a tax audit, the tax authority may require complementary documents and information regarding the transfer-pricing documentations. The tax authority should indicate in the request any additional information that is relevant, and to the extent possible, specify the nature of activity or product, the country or territory concerned, the undertaking, company or group concerned and, when appropriate, the amounts involved. A failure to provide documents and information to the tax authority is subject to a fine of MGA10 million (approximately USD2,000), in addition to an automatic tax adjustment in the event of an unsuccessful reminder from the tax authority.

Industrialists and commercial enterprises under the value-added tax regime are required to have an analytical accounting and a stock card. A failure to comply with this obligation is subject to a fine of 1% of annual turnover. Analytical accounting is a system that is primarily intended to track expense and revenue accounts by categories in order to determine profit and loss for each activity. A stock card is a statement of goods kept regularly on hand for use or sale.

Tax litigation claims may be made only if prior payment of accepted tax is made. The relevant receipt must be attached to the claim.

Tax may be collected through various legal means, including the seizure of assets. However, sales of seized objects are subject to prior written authorization of the Head of Tax Office.

Dividends. Dividends paid to foreign companies and/or individuals are subject to withholding tax.

A special local parent-subsidiary regime exists. Under this regime, only 5% of the dividends received by parent companies from their subsidiaries is subject to corporate income tax. To benefit from this regime, the company receiving the dividends must satisfy the following requirements:

- It must submit an application for the parent-subsidiary regime to the tax authority before the end of the tax year.
- It must be resident in Madagascar.
- It must hold at least 75% of the share capital of the subsidiary.
- It must be a public limited company or a private limited company.
- It must be subject to corporate income tax.
- It must have a consolidated annual turnover of more than MGA200 million (approximately USD50,000).

- It must not have subsidiaries and branches located in jurisdictions that have lower tax rates than Madagascar.
- It must not be subject to another preferential regime.

Withholding income tax. All payments made to nonresident service suppliers are subject to withholding income tax at a rate of 10%, regardless of whether the service is rendered inside or outside Madagascar. This is a final tax. The tax is withheld and paid by the recipient of the service to the competent tax authority before the 15th of the month following the month of the withholding.

Unregistered resident individuals and companies that import and export goods and/or provide services and goods to registered individuals and companies are subject to income tax at a rate of 5%. This income tax is withheld by the following:

- Custom agents for imported and exported goods
- Purchasers for resident suppliers of goods and services

For specifically defined activities whose sales or service prices are regulated, a mechanism of withholding income tax imposed on a “real taxpayer” is instituted. The “legal taxpayer” is responsible for the “repayment of the withheld income tax.” A regulatory text will provide guidance for the application of this provision.

The following are definitions pertaining to the above paragraph:

- The “real taxpayer” is the person who bears the tax burden and in whose name the tax debt is legally established (that is, the person who is liable to the tax).
- The “legal taxpayer” is the person authorized or designated by the General Tax Code to collect or withhold the tax from the real taxpayer and to report and repay it to the tax authority.
- “Repayment of the withheld income tax” is when the legal taxpayer pays back to the tax authority the tax collected or withheld from the real taxpayer.

C. Determination of trading income

General. For companies with turnover of MGA200 million (approximately USD50,000) or more and for companies that opt for actual regime regardless of their turnover, taxable income is based on financial statements prepared according to the Chart of Account or the Plan Comptable Général (PCG 2005), which conforms to the International Financial Reporting Standards (IFRS’ 2003 version) and International Accounting Standards (IAS).

Business operating expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on shareholder loans in excess of the interest rate determined for the interest applicant by the central bank plus two percentage points on an amount not exceeding two times the authorized capital equity. None of the interest on shareholder loans is deductible if the capital is not fully paid up.
- Certain specified charges and subsidies.
- Taxes, penalties and most liberalities (payments that do not produce a compensatory benefit to the company).
- Interest, arrears, income from bonds, loans, deposits, royalties on operating licenses, patents, trademarks, manufacturing

processes or formulas, or other similar rights and remuneration for services paid by residents to nonresident individuals or companies, unless it is established that these payments are in line with the resident's business, regularly evidenced and not exaggerated.

- Forty percent of the amount of the difference between the total fringe benefits and the value of the fringe benefits included in the tax base for the Payroll Tax (Impôts sur les Revenus Salariaux et Assimilés, or IRSA; IRSA applies to any remuneration and fringe benefits earned by resident or nonresident employees sourced from their assignment or employment in Madagascar).
- The "per diem" employee benefits to cover living expenses exceeding the threshold provided by regulatory text.
- Capital losses on title transfers.
- Losses related to public procurement contracts incurred by a company performing simultaneously public procurement contracts activities and other activities.
- Salaries or parts of salaries that have not been duly declared to the National Social Security Fund (Caisse Nationale de la Prévoyance Sociale, or CNaPS) and/or similar bodies and that have not given rise to the payment of payroll tax if they are not exempt.
- Medical expenses that have not been declared in a third-party declaration, which is a filing requirement for every local taxpayer. A third-party declaration is a declaration to the tax authority before 1 May of each year of the amounts that the taxpayer has invoiced and accounted for during the preceding calendar year, regardless of the closing date of its accounting period.

For taxpayers who perform public procurement contracts activities and other activities, the turnover and the exclusive charges and the share of common charges relating to public procurement contracts are not included in the corporate income tax base, and losses incurred in public procurement contracts activities are not deductible.

For taxpayers with both taxable and nontaxable income, exclusive charges, and share of common charges relating to activities whose income is exempt from corporate income tax are not deductible from the corporate income tax base.

Deficits generated by other activities generating the overall income are also not deductible from the taxable profits from property and income from the liberal professions. In addition, taxpayers that generate income from land, transport, the liberal professions, health, education and other professional activities are required to produce a separate statement of such income at the end of each tax year.

Expenses incurred on transactions with unregistered individuals or companies that have been subject to withholding tax of 5% are deductible if the correct tax has been paid to the tax authority, and the payment of the transaction is evidenced by a document prepared either by the registered company (the client) or by the unregistered vendor or supplier, which is used as an invoice. This document should contain the following mandatory provisions:

- The date of the operation

- The name and exact address of both the registered company and the unregistered vendor or supplier
- The identity card or passport number of the unregistered vendor or supplier
- The online tax registration number of the registered company
- The nature and quantity of the goods and/or services concerned
- The unit and the total price in number and in word

The above statements must be certified as accurate by the supplier on the document itself if provided by the unregistered party.

All indemnities allocated to pensioners, whatever they may be called, including the amount exceeding one year's salary per retired employee giving rise to the payment of payroll tax, are deductible from taxable income.

Expenses related to any form of social contribution paid by employers for the benefit of all employees are deductible up to a limit of 5% of the total payroll.

Value-added tax (VAT) credits recorded as expense at the end of the tax year because they have not been discharged at the end of the tax year, the status of taxable person for VAT purposes has been withdrawn, the right to reimbursement is subject to foreclosure or the reimbursement has been rejected, are deductible to the taxable income, provided that expenses giving rise to the VAT credit are incurred in the acquisition or retention of income, necessary for the normal operation of the business and subject to a regular invoice.

For entities with turnover of less than MGA200 million (approximately USD50,000), taxable income is based on the turnover for the tax year.

Inventories. Inventory is normally valued at the lower of cost or market value. For goods that are not identifiable, cost must be determined through the use of the weighted average cost-price method or the first-in, first-out method.

Provisions. Provisions are generally deductible for tax purposes if they are established for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Depreciation. Land is not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at rates generally used in the industry. The following are some of the applicable straight-line rates.

Asset	Rate (%)
Commercial and industrial buildings	5
Office equipment	10
Motor vehicles	20 or 25
Plant and machinery	10

In certain circumstances, plant and machinery and other assets may be depreciated using the declining-balance method or an accelerated method.

Tax credit. Entities engaged in renewable energy production and distribution activities may benefit from a tax credit equal to the tax corresponding to 50% of the invested amount. This incentive also applies to other specified investments by entities in the tourism, industrial or construction sectors. The credit is annually capped to 50% of the amount of corporate income tax. The excess amount may be carried forward without time limitation, subject to the above limit of 50%.

Entities subject to Synthetic Tax receive a tax reduction of 2% of the amount of purchased goods and equipment supported by regular invoices. However, the tax to be paid cannot be less than 3% of turnover. The same reduction applies to personnel expenses that are regularly declared to the CNaPS and/or similar body, and that have given rise to payroll tax payments.

For companies carrying out multiple activities, this tax reduction does not apply to purchases of goods and services made, as well as to personnel costs in the context of public procurement contracts subject to the specific public procurement contract tax.

For basic producers, such as farmers, stockbreeders, fisherpersons, miners and foresters, the reduction of 1% is applied to the amount of sales covered by regular invoices or by documents instead of invoices justifying their sales that include the name, exact address and online tax registration number of the supplier, the nature of the goods and services, and the unit prices and the total price. These statements must be certified as accurate by the supplier on the document itself.

Relief for losses. Losses may be carried forward for five years. Losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. Malagasy law does not provide for consolidated tax filings.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); on goods sold and services rendered in Madagascar; also imposed on public and private companies engaged in telecommunications activities, redistribution of broadcasting and television programs or the providing of services electronically; entities that have annual turnover of less than MGA400 million (approximately USD100,000) are not liable to VAT; materials and equipment for the production of renewable energy are exempt from VAT; cash payments made between entities liable to VAT are forbidden; only payments by bank check, wire transfer, credit card, non-endorsed bill of exchange and mobile banking are allowed	General rate

Nature of tax	Rate (%)
<p>Special Tax on Public Procurement Contracts (Impôt sur les Marchés Publics, or IMP); discharges entities from corporate income tax, Synthetic Tax and VAT; for public procurement contracts paid by the public accountant; the tax is withheld by the public accountant, and the related tax return should be filed by the taxpayer at the latest on the 15th of the month following the withholding, enclosing the supporting document certifying the withholding and the list of its suppliers and its purchases of goods and services, in accordance with a model provided by the tax authority; for public procurement contracts paid by financial backers, the tax return and payment should be made by the holder of the contract at the latest on the 15th of the month following collection of down payments or advances, price, or remuneration of the public procurement contract; for subcontractors, the tax is withheld by the holder of the public procurement contract (the person who signed the contract with the public entity or state); the subcontractor should file the related tax return no later than the 15th day of the month following the month in which the price, advances or down payments were collected, enclosing the supporting document attesting to the withholding and copies of the initial and subcontracting contracts; the tax base is the amount of the transaction; the operator must file the financial statements or summary statement of revenue and expenditure for the year before 1 May of the following year with the competent tax authority</p>	8
<p>Urban tax; annual tax on the rental value of property that is part of business assets</p>	Various
<p>Registration duties on transfers of real property, businesses or movable property, donations from parents to children outside inheritance and free inter vivos transfers (other than donations from parents to children) (The occupying or use of movable or immovable property must be supported by a lease agreement. This implies that registration fees at a rate of 2% are imposed on the total amount of rent plus charges during the lease agreement period.)</p>	5
<p>Social security contributions</p>	
<p>For family allowances; on gross monthly remuneration; amount of remuneration subject to contributions is limited based on the minimum salary provided by decree</p>	
<p>Employer</p>	13
<p>Employee</p>	1
<p>For illness and pregnancy; on gross monthly remuneration, which is not limited; payable by</p>	
<p>Employer</p>	5
<p>Employee</p>	1

E. Miscellaneous matters

Foreign-exchange controls. The currency in Madagascar is the ariary (MGA).

Exchange-control regulations exist in Madagascar. For foreign-exchange control purposes, the two kinds of operations are current operations and capital operations.

Current operations include transfers abroad of profits after payments of taxes, dividends, earned income, expatriate allowances and savings. Current operations require only a transfer declaration to a local bank.

Capital operations include operations relating to stock transfers, shares of liquidation bonuses, sales of businesses or assets and compensation for expropriations. Capital operations involving transfers abroad require an authorization from the Ministry of Finance.

Madagascar is a member of the South African Development Community (SADC) and the Common Market for Eastern and Southern Africa (COMESA).

Transfer pricing. The arm's-length principle for cross-border payments made between affiliated entities (including cross-border payments related to a permanent establishment located in Madagascar), and payments made to entities located in a country with a privileged tax regime applies in Madagascar. Taxpayers subject to corporate income tax should electronically file transfer-pricing documentation (Master File and Local File in French or Malagasy languages) at the same time as the corporate income tax return. Taxpayers should also readjust the taxable profits when filing the corporate income tax return if the transfer prices charged on cross-border transactions do not comply with the arm's-length principle.

F. Treaty withholding tax rates

The table below provides the withholding tax rates under the Canada, France, Mauritius and Morocco treaties. The domestic rates apply if they are lower than the treaty rates.

	Dividends	Interest	Royalties
	%	%	%
Canada (b)	5/15	10	5/10
France	15/25	15	10/15
Mauritius	5/10	10	5
Morocco (b)	10	10	10
Non-treaty jurisdictions	0	10	10 (a)

(a) This withholding tax applies to nonresident companies.

(b) The treaties are still awaiting ratification.

- (a) For other rates and information regarding a mineral royalty, see Section B.
 (b) See Section B.
 (c) See Section B for an extended list of withholding taxes and for further details regarding these taxes.

- (d) This withholding tax is imposed on dividends paid to residents and nonresidents.
- (e) This withholding tax is imposed on foreign companies with a permanent establishment in Malawi.
- (f) The 10% rate applies to income derived from a mining project by way of interest, royalties, payment for independent personal services or dividends. The 15% rate applies to management fees and other payments.
- (g) The 6-year period applies to all taxpayers except for mining projects, which have a carryforward period of 10 years.

B. Taxes on corporate income and gains

Corporate income tax. Locally incorporated companies and branches of foreign companies are subject to corporate income tax on their income deemed to be from a source in Malawi. Income is deemed to be from a source within Malawi if it is derived from the carrying on in Malawi of a “trade.” For this purpose, “trade” covers any employment, profession, business, calling, occupation, or venture, including the leasing of property. Foreign-source income is exempt from corporate income tax.

Rates of corporate income tax. Locally incorporated companies are subject to corporate income tax at a rate of 30%. Branches of foreign companies are subject to tax at a rate of 35%.

Effective from 1 July 2016, income tax is imposed on income from life insurance business at a rate of 30%. Life insurance companies are subject to tax on their investment income, including income from the leasing of property, in accordance with the general provisions of the Taxation Act.

Income from a pensions business is taxed at a rate of 15%. Taxable income of a pensions business includes administration fees and investment income.

Effective from 1 July 2016, Malawi introduced a new mining tax regime under the 16th and 17th Schedules to the Taxation Act, which introduced a mineral royalty payable as a tax with respect to mining products at the following rates:

- All minerals other than precious stones and semiprecious stones and commercial minerals exported in an unmanufactured state: 5%
- Commercial minerals exported in an unmanufactured state: 5%
- Precious stones and semiprecious stones: 10%

The mineral royalty is payable to the Malawi Revenue Authority on a quarterly basis within 21 days after the end of each quarter of the year of assessment.

Additional mineral resource rent was also introduced and is imposed at a minimum of 15% on after-tax resource rent from a project. After-tax resource rent is determined in accordance with Paragraph 23 of the 16th Schedule to the Taxation Act.

Presumptive taxes. Presumptive taxes on turnover have been introduced for taxpayers with a turnover of less than MWK12,500,000. Taxpayers with turnover of less than MWK12,500,000 can now elect to pay presumptive taxes. Presumptive tax is payable quarterly. The following are the annual taxes:

- Taxpayers with a turnover of more than MWK4 million but less than MWK7 million: annual tax of MWK110,000

- Taxpayer with a turnover of more than MWK7 million but less than MWK10 million: annual tax of MWK170,000
- Taxpayer with turnover of more than MWK10 million but less than MWK12,500,000: annual tax of K225,000

Capital gains and losses. Pending enactment of the Capital Gains Tax Act, capital gains derived by companies are included in taxable income and are subject to tax at the applicable corporate income tax rate.

Effective from 3 November 2020, the definition of “amount realized” for Capital Gains Tax purposes is amended by substituting a new paragraph relating to the disposal of an asset by sale for cash. For such a disposal, “amount realized” is defined to mean cash received or contracted to be received, including any contingent amount agreed to at the time of the disposal.

For assets qualifying for capital allowances, capital gains and losses equal the difference between the sales proceeds and the written-down tax value of the assets. For assets not qualifying for capital allowances, capital gains equal the difference between the sales proceeds and the basis of the asset, which is either the cost of the asset or the open market price of the asset at the time of acquisition. The basis of a capital asset may be determined under either of the following methods:

- Applying the consumer price index published by the National Statistical Office at the date of disposal of the asset that is applicable to the year in which the purchase or the construction of the asset was effected or completed
- Using the value of the asset as of 1 April 1992 that was submitted to and accepted by the Commissioner of Taxes, adjusted by the consumer price index published by the National Statistical Office at the date of disposal of the asset

Capital gains are not subject to tax if they are used within 18 months to purchase a qualifying asset like, or related in service or use to, the asset that was sold.

Capital losses on assets not qualifying for capital allowances can be offset only against current or future capital gains. However, such capital losses may be set off against other income in the year in which a company ceases to exist. Capital losses with respect to assets on which capital allowances have been granted are fully deductible from taxable income.

Effective from 3 November 2020, gains realized on the transfer of property from an individual to a trust are exempt from income tax, provided the individual transferring the property is a settlor of the trust.

Additional income for mining companies on change of control. For mining companies, under the Taxation Act, if there is change in control or effective control of the conduct of the taxpayer’s mining project or of the taxpayer or if the benefit of the conduct of the taxpayer’s mining project changes, whether by a transaction to which the taxpayer is a party or by some other transaction, the taxpayer is required to include in its income in relation to the project the excess of the value of the assets of the project over the value of the liabilities of the project.

Administration. The tax year runs from 1 April to 31 March with effect from 1 April 2022. The year of assessment for income tax is any period of 12 months with respect to which tax is chargeable. Financial years ending on or before 31 August 2021 were normally treated as relating to the tax year ended in June of that calendar year.

Companies must file an income tax return with the Commissioner General of the Malawi Revenue Authority within 180 days after the end of the year of assessment.

At the beginning of each year of assessment, the company must estimate the tax payable in that year. This estimated tax, which is known as provisional tax, must be paid quarterly by the 25th day of the month following the end of each quarter. The total installments must equal at least 90% of the actual tax liability for the year of assessment.

If the amount of tax unpaid as a percentage of the total tax liability exceeds 10% but does not exceed 50%, a penalty equal to 25% of the unpaid tax is imposed. If the percentage of unpaid tax exceeds 50%, a penalty equal to 30% of the unpaid tax is imposed.

Effective from 1 July 2015, interest on unpaid tax is charged at the prevailing bank lending rate plus 5% per year.

Under a self-assessment system, taxpayers are responsible for calculating their tax liability and submitting tax returns together with any outstanding tax due. The Malawi Revenue Authority accepts the return as filed and does not issue any administrative assessments. If it is not satisfied, it will undertake to verify the correctness of the information contained in the return.

Dividends. A final withholding tax at a rate of 10% is imposed on dividends distributed to resident and nonresident companies and individuals. Dividends are not subject to another 10% withholding tax if they are redistributed. Declaration of the dividend by companies should be made within 30 days of the declaration to the tax authority.

Tax on deemed interest. Interest income is deemed with respect to interest-free loans and is subject to income tax, effective from 1 July 2015.

Effective from 1 July 2018, the law was amended to include interest if 0% or no interest is charged on loans between related parties. Interest on domestic loans is at the prevailing bank rate plus 5% per year, and interest on foreign loans is at 5% on the US dollar equivalent of the loan.

Withholding taxes. Certain payments are subject to withholding tax. The tax is withheld by the payer and remitted to the Malawi Revenue Authority monthly by the 14th day of the following month. Recipients of the payments treat the withholding tax as an advance payment of tax that offsets income tax subsequently assessed.

Withholding Tax Exemption Certificates may be issued to qualifying taxpayers whose affairs are up to date (that is, companies that have no outstanding tax liabilities or who have

made satisfactory arrangements to settle any outstanding tax liabilities). Under the Income Tax Act, no exemption from withholding tax is granted for bank interest, rent, royalties, fees, commission, payments for casual labor and payments to contractors and subcontractors. The Commissioner General may exempt from withholding tax the receipts of certain persons or organizations that are exempt from tax under the Income Tax Act. The following table provides withholding tax rates for payments to residents and to nonresidents with a permanent establishment in Malawi. For tax purposes, resident companies are companies incorporated in Malawi.

Payment	Withholding tax rate (%)
Interest	20
Royalties	20
Rent	20
Commissions for individual insurance agents and individual banking agents	1
Payments for carriage and haulage	10
Payments for tobacco and other farm products:	
Sale of tobacco by tobacco clubs	1
Payments for tobacco and other farm produce	3
Payments to contractors in the building and construction industries	4
Payments for public entertainment	20
Payments for casual labor:	
Payments of up to MWK35,000	0
Payments in excess of MWK35,000	20
Payments for services	20
Winnings on betting and gambling, including lotteries	
First MWK100,000 of winnings from betting	0
First MWK500,000 of winnings from gambling including lotteries	0
Winnings in excess of MWK100,000 if the winnings are from betting including lotteries	5
Winnings in excess of MWK500,000 if the winnings are from gambling including lotteries	5

The tax withheld from winnings, commissions for individual insurance agents and individual banking agents, and the sale of tobacco by tobacco clubs is a final tax.

A 3% withholding tax is imposed on imports. Taxpayers with a valid tax clearance certificate are exempted from this advance tax.

The income of nonresidents arising or deemed to arise from a source within Malawi that is not attributable to a permanent establishment of the nonresident in Malawi is subject to a final withholding tax at a rate of 15% on management fees and other payments and 10% on income derived from a mining project by way of interest, royalties, payments for independent personal services or dividends, unless the income is specifically exempt from tax under a double tax treaty or tax law.

A withholding tax is also imposed on dividends (see *Dividends*).

Foreign tax relief. If foreign income that has been taxed in a foreign country is included in taxable income in Malawi, a tax credit is available to reduce the tax payable in Malawi. To qualify for this relief, the company must prove to the Commissioner General that it has paid the tax on the income in the foreign country. On receipt of this proof, the Commissioner General grants the relief.

C. Determination of trading income

General. Taxable income is the income reported in the companies' financial statements, subject to certain adjustments.

Amounts received for the right of use or occupation of land and buildings or plant and machinery or for the use of patents, designs, trademarks or copyrights or other property, which in the opinion of the Commissioner General is of a similar nature, is included in taxable income.

Certain income is specifically exempt from tax under the Taxation Act, including foreign-source income.

Realized foreign-exchange gains and losses are assessable. Unrealized foreign-exchange gains and losses are not taxable or deductible.

Expenditure that is not of a capital nature and losses, wholly and exclusively and necessarily incurred for the purposes of trade or in the production of income, are allowable as deductions in determining the taxable income of a company. For tax purposes, certain expenses are not allowed as deductions, including the following:

- Losses or expenses that are recoverable under insurance contracts or indemnities
- Tax on the income of the taxpayer or interest payable on such tax
- Income carried to any reserve fund or capitalized
- An expense relating to income that is not included in taxable income
- Contributions by an employer to any pension, sickness, accident or unemployment fund that has not been approved by the Commissioner General
- An expense for which a subsidy has been or will be received
- Rent or cost of repairs to premises not occupied for purposes of trade
- Fringe benefits tax and any penalty chargeable on the fringe benefits tax

Expenditure incurred within 18 months before the start of a manufacturing business is allowable as a deduction if it would normally be allowable in the course of business.

Deductions of employer pension contributions are limited to 15% of the employees' gross annual salary.

If land is sold and if timber that is intended for sale is growing on the land, the market value of the timber is included in the seller's taxable income. However, a deduction is allowed. If the land was acquired by the taxpayer for valuable consideration, the Commissioner General apportions a reasonable portion of that consideration to the timber and this amount may be deducted. If

no valuable consideration was given for the land, the Commissioner General sets a reasonable value for the standing timber, which may be deducted.

In determining taxable income derived from farming, expenses with respect to the following are allowed as deductions:

- The stamping, leveling and clearing of land
- Works for the prevention of soil erosion
- Boreholes
- Wells
- Aerial and geophysical surveys
- Water control work with respect to the cultivation and growing of rice, sugar or other crops approved by the Minister of Finance and water conservation work (reservoir, weir, dam or embankment constructed for the impounding of water)

Inventories. Trading stock and work in progress must be valued based on the cost or market sales price.

Livestock may be valued for tax purposes at either cost or market selling value.

Capital allowances

Investment allowance. An investment allowance is granted at a rate of 100% of the cost of new or unused industrial buildings and plant or machinery that is used by the company for “manufacturing,” which includes hotels and farming. The rate is 40% if these items are used.

For purposes of investment allowance, plant and machinery does not include motor vehicles intended or adapted for use on roads.

Staff housing does not qualify for the investment allowance.

The investment allowance reduces the value of the asset for purposes of calculating the annual allowance in subsequent years of assessment.

Initial allowance. The initial allowance is granted with respect to capital expenditure incurred during the year of assessment on certain assets that are used for the purposes of the company’s trade or business or for farming purposes. “Manufacturers” can claim either initial allowances or investment allowances on industrial buildings and plant and machinery, but they cannot claim both allowances for the same asset. The following are the rates for the initial allowance.

Assets	Rate (%)
Farm improvements, industrial buildings and railway lines	10
Articles (includes working instruments), implements, machinery and utensils (private passenger vehicles are excluded)	20
Farm fencing	33½

Annual allowances. Annual allowances are claimed on cost in the first year and subsequently on written-down values. For newly constructed commercial buildings, other than industrial buildings, with a cost of at least MWK100 million, the rate is 2.5%. For farm improvements, industrial buildings and railway lines, the rate of the annual allowance is 5%. For farm fencing, the rate is 10%.

For other assets, the allowances granted are determined by the Commissioner General. The rates vary between 10% and 40%, depending on the type of asset.

For purposes of granting capital allowances, a commercial building means a shopping center with a collection of independent retail stores, services and a parking area conceived, constructed and maintained by a management firm as a unit.

Mining allowance. An allowance equal to 100% of expenditure incurred by mining companies may be claimed. The export allowance and transport allowance (see *Special allowances*) may not be claimed by mining companies.

Balancing charge or allowance. If an asset for which capital allowances have been claimed and allowed is disposed of during the year of assessment, the proceeds of disposal, if any, are set off against the written-down tax value of the asset, and either a balancing charge or allowance arises.

Special allowances. Malawi offers special tax allowances, which are described below.

Export allowance. An allowance equal to 25% of taxable income from export proceeds is granted with respect to sales of goods that are classified as nontraditional exports. The Commissioner General has issued a directive providing that the export allowance should be calculated on “taxable” export proceeds less export-related expenses. This remains an area of controversy with much debate surrounding the interpretation of the meaning of “taxable income.” Tea, tobacco, sugar and coffee do not qualify for this allowance.

International transport allowance. An allowance equal to 25% of the international transport costs with respect to non-traditional exports may be claimed. Tea, tobacco, sugar and coffee do not qualify for this allowance.

Research expenditure. Expenditure not of a capital nature that is incurred by a company on experiments and research with respect to the company’s business are allowed as a deduction from taxable income. Similar deductions apply to contributions, bursaries (broadly, scholarships) and donations to research institutions for the purposes of industrial research or scientific experimental work or education connected with the business of the company.

Relief for losses. In general, losses incurred in trading operations may be carried forward and offset against profits in the following six years. Loss carrybacks are not allowed.

Effective from 1 July 2016, losses attributable to a mining start-up expenditure, or to a deductible expenditure incurred before the issuance of a small-scale mining license, a medium-scale mining license, a large-scale mining license or an artisanal mining permit that first applies to the mining project may be deducted in the year that the losses arise and in the following year up to a period of 10 years after the losses arise, or in the following year up to a period of 10 years after a mining permit first applies to the mining project, whichever is later. The taxpayer may choose which losses to deduct to gain the most deductions for these and other losses.

Groups of companies. Malawi does not allow consolidated returns or provide other types of relief for groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; levied on a wide range of imported and locally manufactured goods and services; collected by the Malawi Revenue Authority from the importer, manufacturer, wholesaler, retailer or provider of services	16.5%
Stamp duties	
Transfer of shares	0%
Sale of real property; imposed on sales proceeds	1.5%
Partnership instruments	MWK20
Mortgages, bonds, debentures or covenants exceeding MWK1,000	MWK1.20 per each MWK200
Registration fee of a company	MWK75,000
Property tax; levied by local authorities on the value of industrial, commercial or private properties owned by a taxpayer in the district; payable semiannually	Various
Commercial properties	0.875%
Residential properties	0.518%
Fringe benefits tax; imposed on employers other than the government with respect to fringe benefits provided to employees, excluding employees earning less than MWK1,200,000 per year	30%
Resource rent tax; imposed on after-tax profits of mining companies if the company's rate of return exceeds 20%	15%

E. Miscellaneous matters

Foreign-exchange controls. The currency in Malawi is the kwacha (MWK).

The Reserve Bank of Malawi is responsible for enforcing foreign-exchange control regulations in Malawi, which include the following:

- Approval for foreign equity investments in Malawian companies must be obtained from the Reserve Bank of Malawi.
- Foreign currency denominated loans to Malawian entities must be approved by the Reserve Bank of Malawi.

Tax clearance certificate. The following transactions require a tax clearance certificate from the Commissioner General:

- Transfer of land and buildings
- Application for or renewal of a Certificate of Fitness for commercial vehicles
- Renewal of Business Residence Permit
- Application for or renewal of professional business licenses and permits of medical practitioners, dentists, legal practitioners, engineers, architects and accountants who are engaged in a

- private practice on his or her own behalf or in partnership with another private practitioner
- Application for or renewal of a customs agent license
 - Application for or renewal of a certificate of registration under the National Construction Industry Act
 - Transfer of a company as a going concern
 - Externalization of funds to nonresident service providers whose source is deemed to be Malawi
 - Renewal of Temporary Employment Permits
 - Renewal of business licenses by the Ministry responsible for industry and trade and councils under local government areas
 - Application for or renewal of export and import licenses
 - Renewal of tourism licenses by the Ministry responsible for tourism
 - Renewal, extension or transfer of mining licenses, or transfers of mineral rights by the Ministry responsible for energy and natural resources
 - Renewal of telecommunications licenses by the Malawi Communications Regulatory Authority
 - Application for or renewal of a license for gaming premises
 - Application for or use of a Customs Procedure Code by a privileged organization
 - Change of ownership of a company
 - Renewal of registration of public transport conveyances by the Road Traffic Directorate
 - Supply of goods or services to the Malawi government and its agencies

Transfer pricing. Under the Taxation Act, any person not liable to tax in Malawi who engages directly or indirectly in one or more transactions with a related person not liable to tax in Malawi and the transaction is in relation to a permanent establishment in Malawi of one of the two related persons, the amount of each person's taxable income is determined in a manner that is consistent with the arm's-length principle.

Effective from 1 July 2017, new transfer-pricing regulations were introduced to strengthen the prevention of tax avoidance. The new regulations provide for transfer-pricing guidelines and transfer-pricing documentation. The Transfer Pricing Documentation Regulations provides that any person engaged in controlled transactions should prepare contemporaneous transfer-pricing documentation coinciding with transactions and that this documentation should be in place at the time of the filing of annual returns.

The documentation required under these regulations must be submitted to the Commissioner General within 45 days following a written request issued by the Commissioner General. Any person who fails to comply with the notice is subject to an initial penalty not exceeding the Malawi kwacha equivalent of USD1,400 at the prevailing exchange rate and further penalties not exceeding the Malawi kwacha equivalent of USD2,100 at the prevailing exchange rate for each month that the failure continues. The Transfer Pricing Regulations provides a threshold of USD135,000 for domestic related-party transactions. For transactions below this amount, no transfer-pricing compliance is required.

Thin-capitalization rules. Malawi has introduced thin-capitalization rules, which are effective from 1 July 2018. These rules limit the debt-to-equity ratio to 3:1 for all controlled transactions.

F. Tax treaties

Malawi has entered into double tax treaties with France, Kenya, the Netherlands, Norway, South Africa, Sweden, Switzerland and the United Kingdom. The treaty with Kenya is not operational. The Malawi-Netherlands double tax treaty was suspended, effective from 1 January 2014, and a new double tax treaty is under negotiation. A new tax treaty between Malawi and Denmark has been concluded but not yet promulgated. The governments of Malawi and Mauritius are negotiating a double tax treaty.

The treaties vary in the definition of “exempt income.” Malawi has not yet ratified the Multilateral Instrument under the Base Erosion and Profit Shifting Project.

- (a) The main rate of corporate tax is 24%. From the 2020 year of assessment, the rates for resident companies incorporated in Malaysia that have paid-up capital with respect to ordinary shares of MYR2,500,000 or less at the beginning of the tax-basis period, that have gross income from a source or sources consisting of a business of not more than RM50 million for the relevant year of assessment and that satisfy other specified conditions (small and medium enterprises [SMEs]) are 17% on the first MYR600,000 of chargeable income and 24% on the remaining chargeable income. For the 2022 year of assessment only, a one-off higher corporate income tax rate of 33% is imposed on chargeable income above RM100 million. Chargeable income of up to RM100 million continues to be taxed at the prevailing corporate tax rate of 24%. The above rates do not apply to companies carrying on upstream oil and gas activities under a production-sharing contract, which are taxed at a rate of 38%. For further details, see Section B.
- (b) Real property gains tax is imposed on gains derived from disposals of real property or shares in real property companies. The maximum rate is 30% (see Section B).
- (c) This is a final tax applicable only to payments to nonresidents.
- (d) Bank interest paid to nonresidents without a place of business in Malaysia is exempt from tax. Interest paid to nonresident companies on government securities and on *sukuk* or debentures issued in Malaysian ringgits, other than convertible loan stock, approved or authorized by, or lodged with the Securities Commission (SC), is exempt from tax. Interest paid to nonresident companies with respect to *sukuk* originating from Malaysia issued in any currency other than Malaysian ringgit, other than convertible loan stock, approved or authorized by, or lodged with the SC or approved by the Labuan Financial Services Authority, (LFSA) is also exempt from tax. The exemptions do not apply to interest paid or credited to a company in the same group. Effective from 1 January 2022, the exemptions no longer apply if the interest is paid or credited by a special purpose vehicle (SPV) to a company, if the interest is paid pursuant to asset-backed securities (ABS) lodged with the SC and/or approved by the LFSA and if the company receiving the interest and the originator (that is, the person who established the SPV solely for the issuance of the ABS) are in the same group. Other tax exemptions may apply to interest and other conditions may apply to the exemptions.
- (e) The 24% withholding tax is imposed on distributions to nonresident corporate unit holders by Real Estate Investment Trusts (REITs) and Property Trust Funds (PTFs) if the REITs or PTFs have been exempted from Malaysian income tax as a result of meeting certain distribution conditions. Distributions by such REITs and PTFs to individuals, trust bodies and other non-corporate unit holders are subject to withholding tax at a rate of 10%.

- (f) This withholding tax is treated as a prepayment of tax on account of the final tax liability.
- (g) This is a final tax applicable to payments to nonresidents for services rendered in Malaysia and to payments for the use of movable property excluding payments made by Malaysian shipping companies (as defined) for the use of ships under voyage charter, time charter or bare-boat charter. The rate is reduced under certain tax treaties.
- (h) Withholding tax is imposed on “other gains or profits,” which includes, among other payments, commissions and guarantee fees that do not form part of the business income of the nonresident.
- (i) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident and nonresident companies have for many years been taxed only on income accruing in or derived from Malaysia. Resident companies engaged in banking, insurance, shipping or air transport are taxed on their worldwide income. A company is resident in Malaysia if its management and control is exercised in Malaysia; the place of incorporation is irrelevant. Effective from 1 January 2022, the longstanding income tax exemption on foreign-source income received by Malaysian residents (other than resident companies carrying on the business of banking, insurance or sea or air transport) is removed. The Ministry of Finance has however announced that foreign-source dividend income of companies and limited liability partnerships continues to be exempt from tax from 1 January 2022 to 31 December 2026, subject to conditions that will be outlined in guidelines to be issued in due course.

Rates of corporate tax. From the 2020 year of assessment, resident companies incorporated in Malaysia that have paid-up capital with respect to ordinary shares of MYR2,500,000 or less, and have gross income from a source or sources consisting of a business of not more than RM50 million for the relevant year of assessment (SMEs) are taxed at a rate of 17% on their first MYR600,000 of chargeable income with the balance taxed at 24%. This concessionary tax rate does not apply if the company controls, or is controlled directly or indirectly by, another company that has paid-up capital with respect to ordinary shares of more than MYR2,500,000 or is otherwise related directly or indirectly to another company that has paid-up capital with respect to ordinary shares of more than MYR2,500,000. For the 2022 year of assessment only, a one-off higher corporate income tax rate of 33% is imposed on chargeable income above RM100 million. Chargeable income of up to RM100 million continues to be taxed at the prevailing corporate tax rate of 24%.

Special rates apply to nonresident companies on income from interest (15%) and from royalties, services rendered in Malaysia and payments for the use of movable property (10%). Rental payments for ships made by Malaysian shipping companies (as defined) for voyage charter, time charter or bare-boat charter are exempt from withholding tax. Withholding tax (10%) is imposed on “other gains or profits” derived by nonresident companies from Malaysia, which may include, among other payments, commissions and guarantee fees, to the extent that these payments are not business income to the recipient. For treaty withholding tax rates applicable to interest and royalties, see Section F.

For resident and nonresident companies carrying on upstream oil and gas operations under a production-sharing contract, petroleum income tax is charged at a rate of 38% instead of income tax at the above rates.

Tax incentives. Malaysia offers a wide range of incentives such as tax holidays or investment allowances, which are granted to promote investments in selected industry sectors and/or promoted areas.

Labuan international business and financial center. In 1990, the Malaysian government enacted legislation that created a business and financial center on the island of Labuan with a separate and distinct tax and regulatory regime.

A Labuan entity is required to have one director that may be a foreign corporation and at least one secretary who must be an officer of a Labuan trust company.

Labuan entities may transact business with Malaysian residents and may hold shares, debt obligations or other securities in domestic companies. However, historically Labuan entities that transacted with Malaysian residents were not allowed to benefit from the preferential Labuan tax regime (with certain exceptions). Effective from 1 January 2019, the restriction on transactions between Labuan entities with Malaysian residents is abolished.

Labuan entities are subject to tax at a rate of 3% on their net audited profits derived from their Labuan trading activities (as defined) if prescribed substance conditions are met (see below).

Instead of paying tax at the 3% rate, historically Labuan entities could have elected to pay a fixed annual tax of MYR20,000 on their Labuan trading activities. Labuan trading activities include banking, insurance, trading, management, licensing and shipping operations. Income derived from wholly non-trading activities, such as dividends and interest, is not subject to tax if prescribed substance conditions are met. A Labuan entity carrying on both trading and non-trading activities is deemed to be carrying on a trading activity. However, effective from the 2020 year of assessment (as defined), the option to pay income tax at the fixed annual tax of MYR20,000 is abolished.

Labuan entities may alternatively elect to be taxed under the Income Tax Act, 1967 (ITA). If they make such election, the rules described above in *Corporate income tax* and *Rates of corporate tax* apply. Labuan entities are generally exempt from the obligation to withhold tax on payments made to nonresidents. These exemptions may be subject to conditions.

Labuan entities may open and maintain bank accounts in foreign currency in Malaysia or abroad. In general, no restrictions are imposed on the movement of funds through these accounts.

Similar to non-Labuan entities, Country-by-Country (CbC) reporting regulations for Labuan entities have been legislated and apply from 1 January 2017 (see *Transfer pricing* in Section E for further details). Penalty provisions have also been introduced for failure to comply with the CbC reporting. Effective from the

2020 year of assessment, anti-avoidance and transfer-pricing provisions are included in the Labuan tax legislation.

Effective from 1 January 2019, to be taxed at the preferential Labuan rates, Labuan entities must carry on prescribed activities and have a minimum number of employees and a minimum amount of annual business spending in Labuan, with limited exceptions. In addition, income from intellectual property assets held by Labuan entities is now subject to tax under the ITA and can no longer be taxed under the Labuan tax legislation. Labuan entities that do not comply with the prescribed substance requirements are taxed at 24% of net audited profits.

Real property gains tax. Real property gains tax is levied on capital gains derived from disposals of real property located in Malaysia and shares in closely controlled companies with substantial real property interests. The tax applies to gains derived by residents and nonresidents.

Effective from 1 January 2020, the following are the real property gains tax rates for disposals by companies:

Time of disposal	Companies incorporated in Malaysia Rates (%)	Companies incorporated outside Malaysia Rates (%)
Disposal within three years after the acquisition date	30	30
Disposal in the fourth year after the acquisition date	20	30
Disposal in the fifth year after the acquisition date	15	30
Disposal in the sixth or subsequent year after the acquisition date	10	10

Persons other than companies are also subject to real property gains tax on relevant disposals at prescribed rates.

Purchasers of real property located in Malaysia or shares in real property companies must withhold tax at a rate of up to 3% of the purchase price, except in limited circumstances. Effective from 1 January 2018, the rate of 3% was increased to 7% for persons disposing of real property who are neither citizens nor permanent residents of Malaysia. Effective from 1 January 2020, the 7% rate applies to disposals by foreign-incorporated companies. Effective from 1 January 2021, the 7% rate also applies to disposals by an executor of a deceased person who is not a citizen and is not a permanent resident in Malaysia. Effective from 1 January 2022, a 5% withholding rate applies to disposals by companies incorporated in Malaysia if the disposals are made within three years after the date of acquisition. Losses incurred on disposals of real property may be carried forward indefinitely to offset future real property gains. Losses on the disposal of shares in real property companies are disregarded.

Administration. For tax purposes, companies may adopt their accounting year as the basis period for a year of assessment. Income tax is chargeable in the year of assessment on the income earned in the basis period for that year of assessment.

Malaysia has a self-assessment regime under which companies must file their tax returns within seven months after the end of their accounting period. A tax return is deemed to be an assessment made on the date of filing the return. Effective from the 2014 year of assessment, the tax return must be filed electronically and based on audited accounts.

Companies must provide an estimate of their tax payable no later than 30 days before the beginning of their basis period (different rules may apply to a company in the year of assessment in which it commences operations). The estimated tax is payable in 12 equal monthly installments by the 15th day of each month beginning in the second month of the basis period. SMEs (as defined) that begin their operations during a year of assessment are exempt from paying their tax by installments in the year of assessment in which they commence business and in the immediately following year of assessment. They are required only to settle the tax due when they file their income tax returns. All companies may revise their estimate of tax payable in the sixth and/or ninth months of their basis period. Special revisions may apply in limited circumstances. For example, for the 2021 and 2022 years of assessment, a special 11th-month revision may be available for companies whose 11th month of the basis period falls between November 2021 and November 2022. Effective from the 2018 year of assessment, estimates and revised estimates may only be filed electronically.

Companies must pay any balance of tax due by the tax filing deadline.

Different rules apply under the Labuan tax legislation and to taxpayers undertaking upstream oil operations.

Dividends. Effective from the 2008 year of assessment, a single-tier system of taxation replaced the full imputation system. Under the single-tier system, dividends paid, credited or distributed by a company are exempt from tax in the hands of the shareholders. Certain transitional rules applied up until 31 December 2013.

Foreign tax relief. Malaysian law allows both bilateral and unilateral foreign tax relief, subject to conditions.

C. Determination of trading income

General. The assessment is based on the audited financial statements, subject to certain adjustments. A nonresident company trading in Malaysia prepares the financial statements of its Malaysian branch in accordance with the Malaysian Companies Act. This act sets out disclosure requirements for financial statements, but does not prescribe the accounting treatment for specific transactions. Malaysian Financial Reporting Standards, which are based on the International Financial Reporting Standards (IFRS), govern the accounting treatment for transactions.

Deductions are allowed for expenses incurred wholly and exclusively in the production of income and for bad debts. No deduction is allowed for the book depreciation of fixed assets, but statutory depreciation (capital allowances) is granted. In general, the cost of leave passages is not deductible. Limits on the

deductibility of entertainment expenses may be imposed. However, a full deduction for entertainment expenses may be claimed in specified circumstances. Double deductions are available with respect to certain expenses relating to the following:

- Participation at approved trade fairs, exhibitions or trade missions
- Maintenance of overseas trade offices
- Research and development

Effective from 1 January 2019, Malaysian residents making payments to Labuan entities are not able to claim a full tax deduction on such payments; 25% of lease and interest payments to Labuan entities are disallowed as tax deductions, while 97% of all other payments to Labuan entities are disallowed.

Inventory. Trading inventory is valued at the lower of cost or net realizable value. Cost must be determined under the first-in, first-out (FIFO) method; the last-in, first-out (LIFO) method is not accepted.

Provisions. General provisions and reserves for anticipated losses or contingent liabilities are not deductible.

Capital allowances

Plant and machinery. Depreciation allowances are given on capital expenditure incurred on the acquisition of plant and machinery used for the purposes of trade or business. An initial allowance of 20% and an annual allowance ranging from 10% to 20% are granted for qualifying expenditure. An accelerated capital allowance (20% initial allowance and 40% annual allowance) is given for the purchase of machinery and equipment during the period of 1 March 2020 to 31 December 2021.

Industrial buildings. An initial allowance of 10% and an annual allowance of 3% are granted for qualifying expenditure on the construction or purchase of industrial buildings. As a result of these allowances, qualifying expenditure on industrial buildings is fully written off in the 30th year after the year of construction or purchase. Certain buildings may qualify for higher rates of industrial building allowances. For purposes of the allowances, industrial buildings include hotels.

Effective from the 2016 year of assessment, for certain types of buildings, industrial building allowances are available only to taxpayers that own the building and operate the relevant business in the building (that is, lessors may not be eligible to claim industrial building allowances with respect to certain buildings).

Childcare centers. An annual allowance of 10% is granted for expenditure incurred for the construction or purchase of buildings used as childcare facilities for employees.

Employee housing. An annual allowance of 10% is granted for expenditure incurred by manufacturers and certain approved service companies for the purchase or construction of buildings for the accommodation of employees. Buildings occupied by management or administrative staff do not qualify for this allowance.

Educational institutions. An annual allowance of 10% is granted for expenditure on the construction or purchase of buildings used as schools or educational institutions or for industrial, technical or vocational training.

Motor vehicles. Capital expenditure incurred on motor vehicles qualifies for an annual allowance of 20%. Qualifying capital expenditure on noncommercial vehicles is restricted to MYR100,000 per vehicle if the vehicle is new and if the total cost of the vehicle does not exceed MYR150,000. Qualifying capital expenditure is restricted to MYR50,000 per vehicle if the vehicle is not new or costs more than MYR150,000.

Office equipment. An initial allowance of 20% and an annual allowance of 10% are granted for capital expenditure on office equipment.

Computer equipment. An initial allowance of 20% and an annual allowance of 20% are granted for capital expenditures on information and communication technology (ICT) equipment and computer software. Certain conditions must be met to benefit from these accelerated capital allowances. Effective from the 2018 year of assessment, these capital allowance rates also apply to other expenditures such as consultation fees, payment for rights of software ownership and incidental fees for the development of customized software, subject to conditions. An accelerated capital allowance (20% initial allowance and 40% annual allowance) is given for the purchase of ICT equipment during the period of 1 March 2020 to 31 December 2021.

Small value asset. For assets with a value not exceeding MYR1,300, a 100% allowance is given in the year in which the asset is acquired. However, the total allowance granted for such assets is capped at MYR13,000 for non-SMEs. Effective from the 2020 year of assessment, a 100% allowance is given for assets with a value not exceeding MYR2,000. The total allowance granted for such assets is capped at MYR20,000 for non-SMEs. Only SMEs having gross income from a source or sources consisting of a business of not more than MYR50 million for the relevant year of assessment are eligible for the unlimited 100% allowance claim.

Agriculture. Annual allowances are given on capital expenditure incurred on new planting (50%), roads or bridges (50%), farm buildings (10%) and buildings for accommodation of farm workers (20%). Accelerated allowances may be allowed at the discretion of the Minister of Finance.

Forestry. Annual allowances are given on capital expenditure incurred for purposes of extraction of timber from a forest. Effective the 2015 year of assessment, the capital allowances are available only to persons with a concession or license to extract timber. The rates are 10% for a road or building and 20% for a building for accommodation of employees.

Other matters. Capital allowances are generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax written-down value. To the extent sales proceeds are less than the tax-depreciated value, an additional allowance is given.

Relief for trading losses. Current-year trading losses may offset all other chargeable income of the same year. Unused losses may be carried forward for offset against chargeable income from business sources only. Excess capital allowances from a business source may be carried forward indefinitely for offset against income from the same business source that generated the capital allowances.

The carryforward of losses and excess capital allowances is subject to the shareholders remaining substantially (50% or more) the same at the end of the year in which the losses or capital allowances arose and on the first day of the year of assessment in which the losses or unabsorbed capital allowances are to be used. If the shareholder of the loss company is another company, the loss company is deemed to be held by the shareholders of that other company. Under an administrative concession, the authorities have indicated that they will not enforce the shareholding test except in the case of dormant companies. In addition, under the concession, the substantial change in shareholder rule only applies to changes in the immediate shareholder of the loss company. As a result, unused losses of non-dormant companies may continue to be carried forward even if a substantial change in shareholders occurs.

Effective from the 2019 year of assessment, the carryforward of unused losses is limited to 10 years of assessment. Any unused losses will be disregarded thereafter. To ease the transition for taxpayers, special provisions stipulate that unused losses for any year of assessment before the 2018 year of assessment, and current year losses for the 2018 year of assessment, can be carried forward for 10 consecutive years from the 2018 year of assessment; that is, until the 2028 year of assessment. Similar rules apply for unused reinvestment allowances and investment allowances but with a shorter carryforward period of seven years of assessment.

Groups of companies. Under group relief provisions, 70% of current-year adjusted losses may be transferred by one company to another company in a group. A group consists of a Malaysian-incorporated parent company and all of its Malaysian-incorporated subsidiaries. Two Malaysian-incorporated companies are members of the same group if either of the following circumstances exist:

- One is at least 70% owned (through other companies resident and incorporated in Malaysia) by the other.
- Both are at least 70% owned by a third Malaysian-incorporated company.

To obtain group relief, the recipient of the losses and the transferor of the losses must have the same accounting period and each must have paid-up capital in respect of ordinary shares exceeding MYR2,500,000. Effective from the 2019 year of assessment, a company can only surrender its losses after it has been in operation for more than 12 months, and the surrendering period is limited to 3 consecutive years of assessment from the year of assessment in which the surrendering company commences operations. In addition, a claimant company is not eligible to claim the group relief if it has carryforward or current-year investment allowances or pioneer losses. Other conditions also

apply. Effective from the 2022 year of assessment, for the scenario in the second bullet above, in the case of indirect shareholdings, surrendering and claimant companies are treated as being in the same group of companies only if both companies are at least 70% owned by a third Malaysian-incorporated resident company, through the medium of other companies resident and incorporated in Malaysia. Limited exceptions apply.

D. Sales Tax and Service Tax

Goods and Services Tax was abolished and replaced with Sales Tax and Service Tax, effective from 1 September 2018. Sales Tax is imposed at a rate of 5%, 10% or at a specific rate with respect to petroleum, while Service Tax is imposed at a rate of 6% or at a specific rate for credit card services. Sales Tax applies to locally manufactured and imported taxable goods (unless exempted). Service Tax applies to certain prescribed services locally supplied or imported into Malaysia. Any person that manufactures taxable goods and/or provides taxable services in Malaysia, and that has annual taxable turnover exceeding the prescribed registration threshold in a 12-month period, is required to register for Sales Tax and/or Service Tax.

Effective from 1 January 2020, Service Tax is also charged and levied on any digital service provided by a foreign service provider to any consumer in Malaysia. If a foreign service provider provides digital services to consumers in Malaysia and if the value of the digital services for a period of 12 months or less exceeds the threshold or MYR500,000, the service provider is required to register for Service Tax in Malaysia, and account for Service Tax accordingly.

E. Miscellaneous matters

Foreign-exchange controls. Over the years, the foreign exchange administration policies have been progressively liberalized and simplified. Nonresidents are now free to make direct or portfolio investments in Malaysia in either Malaysian ringgit or foreign currency. No restrictions are imposed on the repatriation of capital, profits or income earned in Malaysia.

Malaysian companies generally need to transact with each other in Malaysian ringgit, with limited exceptions. Nonresidents may obtain any amount of foreign currency credit facilities from licensed onshore banks.

Nonresidents may lend in foreign currency to residents if the resident's total foreign currency borrowings are within permitted limits. However, no limits are imposed on loans in foreign currency by nonresident entities within a group of entities (as defined) to resident companies.

Foreign-equity restrictions. Foreign-equity restrictions have been liberalized over the years. As a result, no restrictions are imposed on the ownership of most companies except those in certain regulated industries.

Anti-avoidance legislation. Legislation permits the tax authorities to disregard or vary any transaction that is believed to have the effect of tax avoidance.

Transfer pricing. The tax authorities have issued transfer-pricing legislation, rules and guidelines requiring taxpayers to determine and apply an arm's-length price in their intercompany transactions. The transfer-pricing rules also require the preparation of contemporaneous transfer-pricing documentation to substantiate the arm's-length contention.

The guidelines provide a detailed list of information, documentation and records with respect to related-party transactions that need to be compiled to meet the contemporaneous documentation requirement. The guidelines are based on the arm's-length principle set forth in the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines and provide several methods for determining an arm's-length price.

In addition, companies carrying out cross-border transactions with associated persons may apply for an advance pricing arrangement (APA) from the tax authorities subject to conditions. The earnings stripping rules (ESR), which are based on the principles in Action 4 of the OECD's Base Erosion and Profit Shifting (BEPS) Project, took effect on 1 July 2019 and restrict the deduction of interest on financial assistance granted in controlled transactions, if the total amount of the interest expense for all such financial assistance exceeds MYR500,000 in the basis year for a year of assessment. The ESR applies only to cross-border financial assistance from associated parties and cross-border financial assistance from third parties if such assistance is guaranteed by related parties in or outside Malaysia. Limited exceptions apply.

Penalty provisions have been introduced for failure to comply with CbC reporting that is facilitated under the Mutual Administrative Assistance arrangements, in line with Action 13 of the OECD's BEPS and other exchange-of-information requirements. The penalty provisions are effective from 17 January 2017. The rules to introduce CbC reporting have been legislated and apply from 1 January 2017, with the first filing of the CbC report required by 31 December 2018.

Effective from 1 January 2021, the Director General is given the power to disregard certain structures in a controlled transaction, as well as impose and collect surcharges of not more than 5% on transfer-pricing adjustments (even when there is no increase in tax payable). In addition, penalty provisions have been introduced for failure to furnish contemporaneous transfer-pricing documentation.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

A. At a glance

Corporate Income Tax Rate (%)	15
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	0
Withholding Tax (%)	10*

* The 10% withholding tax is imposed on specified payments made to persons not resident in the Maldives. These payments include the following:

- Rent with respect to immovable property located in the Maldives
- Royalties
- Interest (other than interest paid or payable to a bank or non-banking financial institution approved by the Maldives Inland Revenue Authority)
- Dividends
- Fees for technical services
- Commissions paid for services provided in the Maldives
- Payments for performances by public entertainers in the Maldives
- Payments for carrying out research and development in the Maldives
- Payments to contractors (payments made to nonresident contractors are subject to withholding tax at a rate of 5% on the full contract value)
- Insurance premiums paid (insurance premiums do not include reinsurance premiums)

B. Taxes on corporate income and gains

Although a tax specifically applicable to corporate profits does not currently apply, a tax of 15% is imposed on the taxable profits of any person other than an individual or a bank. Capital Gains Tax at a rate of 15% is imposed on the disposal of movable, immovable and intellectual or intangible property for which a capital allowance is not allowed.

Also, resident and nonresident banks are subject to a tax of 25% on taxable profits.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax; the tax is passed on to the end consumer	6
Tourism Goods and Services Tax (TGST); applies to goods and services supplied by tourist establishments	12

Nature of tax	Rate (%)
Customs duties; imposed on imports; rates vary according to the type of import	Various

D. Foreign-exchange controls

The Maldivian currency is the rufiyaa (MVR).

The Maldives does not impose any strict foreign-exchange controls.

(a) For further details, see *Capital gains* in Section B.

(b) For further details, see Section F.

B. Taxes on corporate income and gains

Corporate income tax. Companies that are considered to be ordinarily resident and domiciled in Malta are subject to income tax on their worldwide income. Companies incorporated in Malta are considered ordinarily resident and domiciled in Malta. In addition, companies incorporated outside Malta, the management and control of whose business are exercised in Malta, are considered to be ordinarily resident but not domiciled in Malta and are subject to tax in Malta under the remittance basis of taxation.

Rates of corporate tax. Income tax is the only tax imposed on the chargeable income of companies. The standard rate of income tax is 35%.

Tax incentives. Tax incentives are offered in the Malta Enterprise Act and in regulations to the act, as well as in the Income Tax Act.

The Malta Enterprise Act contains several incentives for the promotion and expansion of business, covering a wide range of sectors and activities. The incentives available under the act may be divided into six categories, which are described in the following six subsections. Other tax incentives available in Malta are discussed in the subsequent subsections.

Access to finance. The Access to Finance Scheme provides eligible undertakings with a guarantee of up to 80% on loans, which may be used to finance projects leading to business establishment, enhancement, growth and development. The guarantee may be used to cover a specific percentage of a loan that may not exceed EUR10 million.

Research and development and innovation programs. Fiscal incentives and cash grants are offered to stimulate innovative enterprises to engage in research and development.

Business Development. A tax credit or cash grant of up to EUR200,000 is offered to undertakings to facilitate value-added projects that contribute to the regional development of Malta. This incentive is available until 31 December 2023.

Patent box regime. Effective from 1 January 2019, Malta introduced a patent box regime that grants the option to eligible persons deriving qualifying income from qualifying intellectual property (IP) to benefit from a super deduction. The maximum super deduction, which may be available after applying the nexus ratio, is equal to 95% of the net income or gains derived from the qualifying IP, resulting in an effective tax rate of 1.75%. Taxpayers wishing to benefit from the patent box regime must request a determination from Malta Enterprise.

Enterprise support. Assistance is offered to businesses to support them in developing their international competitiveness, improving their processes and networking with other businesses.

Employment and training. The Employment and Training Corporation (ETC) administers the employment and training incentives. Enterprises are supported in recruiting new employees and training their staff. These incentives help generate more employment opportunities and training activities.

Shipping. On 19 December 2017, the European Commission issued a press release confirming that it conditionally approved the Malta Tonnage Tax System (MTTS) under the European Union (EU) state-aid rules for a period of 10 years.

The updated MTTS rules retain a blanket exemption from Maltese income tax for the shipping income of eligible shipping organizations. The exemption from income tax should also apply with respect to income derived by eligible shipping organizations from activities that are ancillary to shipping activities, subject to a capping based on gross revenues. The blanket exemption of the MTTS is available if, in addition to meeting some other conditions, the eligible shipping organization has paid the prescribed tonnage taxes.

In addition to the above exemption, eligible shipping organizations should also continue to be able to benefit from other generally available provisions, including the following:

- An exemption on dividends distributed by eligible shipping organizations if the underlying profits were exempt from Maltese income tax pursuant to the MTTS
- An exemption on capital gains derived by nonresidents on the transfer of shares held in a Maltese company
- The non-taxation of passive capital gains arising on the transfer of a ship
- A blanket stamp duty exemption for companies having the majority of their business interests located outside Malta

Shipping organizations that should be eligible to apply the MTTS are those having ships engaged in the international carriage of goods or passengers by sea and those having cable-laying ships, pipe laying ships, crane ships and research ships. Among others, the MTTS should be available to shipping organizations chartering tonnage tax ships on a bareboat basis if either of the following circumstances exist:

- The ship is bareboat chartered to a shipping organization forming part of the same group of companies.
- The licensed shipping organization demonstrates, to the satisfaction of the Registrar-General, that all of the following conditions are satisfied:
 - The ship was bareboat chartered due to short-term overcapacity.
 - The term of the charter does not exceed three years.
 - The bareboat chartered-out capacity does not exceed 50% of the shipping companies' fleet, calculated on a group basis.

In such a case, excess capacity specifically acquired for chartering out is not treated as eligible under the MTTS. Certain thresholds relating to the proportion of European Economic Area (EEA)-flagged vessels are to be met for a shipping organization to be eligible to apply the MTTS.

Ship managers may also benefit from the MTTS with respect to any income derived from ship management activities.

In line with previously existing limitations and limitations common to tonnage tax regimes in the EEA, shipping organizations

operating the following vessels are not able to avail themselves of the updated MTTs:

- Fishing and fish factory ships
- Private yachts and ships used primarily for sport or recreation
- Fixed offshore installations and floating storage units
- Non-ocean-going tugboats and dredgers
- Ships whose main purpose is to provide goods or services normally provided on land
- Stationary ships employed for hotel or catering operations in the form of floating hotels or restaurants
- Ships employed mainly as floating or cruising gambling establishments or casinos
- Non-propelled barges

Collective Investment Schemes or Funds. Collective Investment Schemes or Funds must be licensed under the Investment Services Act or notified under the Investment Services Act (List of Notified AIFs) Regulations. Collective Investment Schemes usually take the form of corporate funds, including open-ended (SICAVs) and close-ended funds, or non-corporate funds, such as unit trusts.

The income of Collective Investment Schemes (other than income from immovable property located in Malta and local investment income earned by prescribed funds) is exempt from tax. Income earned by Collective Investment Schemes from immovable property situated in Malta is brought to charge in the same manner as that applicable to other persons, such as companies (see *Property transfer tax* in the case of gains derived from the transfer of immovable property situated in Malta). For local investment income earned by prescribed funds, such prescribed funds are subject to a 15% final withholding tax on bank interest received and to a 10% final withholding tax on other investment income received, such as interest on bonds and government stocks (units issued by the government to which the general public is invited to subscribe). Under regulations issued by the Minister for Finance, prescribed funds are funds whose assets in Malta amount to 85% or more of their total assets. Capital gains derived by funds from disposals of investments and assets are also exempt from tax.

Capital gains derived by nonresident unit holders on the disposal of their units in Maltese Collective Investment Schemes are generally exempt from income tax in Malta. Similarly, capital gains derived by unit holders on disposals of their units in prescribed funds listed on the Malta Stock Exchange are generally exempt from tax. Unit holders in unlisted prescribed funds are subject to tax on their gains. Tax at 15% is withheld from the capital gains realized by resident investors on certain disposals of listed shares in non-prescribed funds. For nonresident Collective Investment Schemes, the withholding tax provisions apply only if the disposal of the shares is effected through an authorized financial intermediary. If the disposal of shares in nonresident non-prescribed funds is not effected through an authorized financial intermediary, no withholding tax is due and any capital gains must be disclosed by the resident investor in the individual's tax return and taxed at the normal rates of income tax, up to a maximum of 35%.

Aviation income. Income derived from the ownership, lease or operation of aircraft and aircraft engines used in the international transport of passengers or goods (aviation income) is deemed to arise outside Malta regardless of whether the aircraft is operated from Malta. Consequently, a company that is incorporated outside Malta but managed and controlled in Malta (resident but not domiciled for income tax purposes, or a “non-dom co”) must pay tax on income derived from its aviation income on a remittance basis. Aviation income that is not received in Malta is not taxed in Malta.

Notional interest deduction. The notional interest deduction (NID) is an optional deduction that may be applied by companies or partnerships resident in Malta, as well as by nonresident companies or partnerships having a permanent establishment located in Malta. The NID may only be claimed against profits that stand to be allocated to the company’s Foreign Income Account or Maltese Taxed Account, or to profits that would have been so allocated in the case of undertakings other than companies (Eligible Profits). The NID may be claimed only if it is demonstrated that all shareholders or owners of the undertaking approve the claim of such deduction with respect to the particular year of assessment. The NID for a year of assessment is calculated as follows:

$$Y = A \times B$$

Y represents the NID that may be claimed in the relevant year of assessment.

A represents the reference rate that is equivalent to the risk-free rate plus a premium of 5%. The risk-free rate is determined by the current yield to maturity on Malta government stocks with a remaining term of approximately 20 years.

B represents the risk capital of the undertaking at the end of the accounting period ending in the year preceding the year of assessment less the invested risk capital to the extent of either of the following:

- Such invested risk capital is not employed by the undertaking in producing any income in the year preceding the year of assessment and if any income been produced, it could have been exempt from tax under the terms of the Income Tax Act.
- Such invested risk capital is employed in producing income in the year preceding the year of assessment that is exempt from tax under the terms of the Income Tax Act.

For companies and partnerships resident in Malta, risk capital consists of the following:

- Share or partnership capital of the undertaking
- Any share premium
- Positive retained earnings
- Loans or other debt borrowed by the undertaking that do not bear interest
- Any other reserves resulting from a contribution to the undertaking
- Any other positive balance that is shown as equity in the undertaking’s financial statements

For permanent establishments of nonresident companies or partnerships, risk capital consists of the capital of the undertaking that is attributable to the permanent establishment located in Malta.

The NID that may be claimed during a year of assessment is capped to an amount equal to 90% of the undertaking's Eligible Profits gross of the NID for the year preceding the year of assessment. Any excess NID may, at the option of the undertaking, be carried forward indefinitely for deduction and be added to the deduction due for the following years until it is absorbed.

If an undertaking claims the NID, an amount equal to 110% of the profits relieved from tax for the undertaking claiming the NID is to be allocated to the undertaking's Final Tax Account in the following manner:

- An amount corresponding to 100% of the amount of profits that are so relieved from tax shall be allocated directly to the Final Tax Account (Direct Allocation).
- An additional reallocation of profits of an amount corresponding to 10% of the relieved profits, out of the tax account to which such relieved profits would, ignoring the NID Rules, otherwise fall to be allocated (Additional Reallocation). The Additional Reallocation is to be effected after the second allocations in accordance with the terms of Sub-rules 5(4) and 5(7) of the Tax Accounts (Income Tax) Rules.

The Direct Allocation and the Additional Reallocation shall not be effected with respect to deemed interest that is claimed as a deduction in terms of Sub-rule 3(1) of the NID Rules against interest income deemed to be received by the shareholder or partner of the undertaking in terms of Rule 5 of the NID Rules. Second allocations refer to those profits that companies must be reallocated from the Maltese Taxed Account and/or Foreign Income Account to the Immovable Property Account in order to achieve the following:

- Ensure that those profits that are to be allocated to the Immovable Property Account in gross are so allocated
- Reflect the ownership and usage of immovable property located in Malta by the company and/or other Maltese related companies, where applicable

This limits the shareholders' or partners' ability to claim, under the refundable tax credit system, a refund of a portion of the Maltese tax paid by the undertaking on a distribution of the taxed profits by the undertaking. If the undertaking does not have sufficient profits to allocate to the Final Tax Account the Additional Reallocation, the amounts not so allocated are ignored.

The NID Rules further provide that the amount claimed as the NID by the undertaking should give rise to an equal deemed interest income, which is subject to Maltese tax in the hands of the undertaking's shareholders or partners in a proportion corresponding to the proportion of the nominal value of the risk capital pertaining to each shareholder or partner or as otherwise allowed by the Commissioner for Revenue. The deemed interest income is treated as interest for tax purposes, and all provisions dealing with taxation of interest apply, except for the investment

income provisions (which provide for a 15% final tax). As a result, if the shareholder or partner is tax resident outside of Malta, the nonresidents exemption applicable to interest income may apply.

Shareholders or partners receiving this deemed interest income are entitled to deduct against it any NID that they are eligible for, pursuant to their own risk capital. The 90% limitation referred to above does not apply in this respect. The Direct Allocation and the Additional Reallocation to the Final Tax Account may not be effected with a respect to the NID claimed as a deduction by a shareholder or partner against interest income deemed to be received by the shareholder or partner.

Capital gains. Income tax is imposed on capital gains derived from the transfer of ownership of the following assets only:

- Immovable property. However, gains on transfers of immovable property or rights over immovable property that are subject to the new property transfer tax (see *Property transfer tax*) are not subject to income tax.
- Securities (company shares that do not provide for a fixed rate of return, units in Collective Investment Schemes and units relating to linked long-term business of insurance [life insurance contracts under which benefits are wholly or partially determined by reference to the value of, or income from, property]).
- Goodwill, business permits, copyrights, patents, trademarks, trade names and any other IP.
- Beneficial interests in trusts.
- Full or partial interests in partnerships.

In certain cases, value shifting and degrouping may result in taxable capital gains.

If a person acquires or increases a partnership share, a transfer of an interest in the partnership to that partner from the other partners is deemed to occur, and is accordingly subject to tax.

For purposes of the capital gains rules, “transfer” has a broad definition that is not restricted to sale. It also includes any assignment or cession of any rights, reduction of share capital, liquidation or cancellation of units or shares in Collective Investment Schemes and other types of transactions. The definition does not include inheritance.

Transfers that are exempt from tax include the following:

- Donations to philanthropic institutions
- Transfers of chargeable assets between companies belonging to the same group of companies
- Transfers by nonresidents of securities in Maltese companies that are not primarily engaged in holding immovable property in Malta
- Transfers of securities listed on the Malta Stock Exchange as well as transfers of units relating to linked long-term business of insurance if the benefits derived by the units are wholly determined by reference to the value of, or income from, securities listed on the Malta Stock Exchange
- Transfers by nonresidents of units in Collective Investment Schemes

Rollover relief for assets used in business is also available if the asset has been used in the business for at least three years and if it is replaced within one year by an asset used only for a similar purpose.

Taxable capital gains are included in chargeable income and are subject to income tax at the normal income tax rates. Capital losses may be set off only against capital gains. Trading losses may be carried forward to offset capital gains in future years.

Provisional tax of 7% of the consideration or of the value of the donation must be paid by a seller on the transfer of property if the transaction is subject to the capital gains regime. A higher rate of provisional tax applies if the property being transferred consists of securities in a property company or an interest in a property partnership. The Commissioner for Revenue may authorize a reduction in the rate of provisional tax if it can be proved that the capital gain derived from the transaction is less than 20% of the consideration. Provisional tax paid is allowed as a credit against the income tax charge.

In the course of a winding up or distribution of assets, if a company transfers property to its shareholders, or to an individual related to a shareholder, who owned 95% of the share capital of the company transferring the property in the five years immediately preceding the transfer, the transfer is exempt from tax if certain conditions are satisfied.

Property transfer tax. Under Article 5A of the Income Tax Act, in general, the transfer of immovable property in Malta is taxed at a rate of 8% on the higher of the consideration or market value of the immovable property on the date of the transfer. No deductions may reduce the tax base, except for agency fees subject to value-added tax (VAT). However, different tax rates apply in certain circumstances. Broadly, from a corporate perspective, the following are the circumstances in which the different rates apply:

- If the property transferred was acquired before 1 January 2004, the seller is taxed at 10% of the transfer value.
- A 5% rate applies if the property not forming part of a project is transferred before five years from the date of acquisition or if the transferred property is a certain restored property.
- If immovable property was acquired through a donation more than five years from the date of transfer, a 12% rate applies to the excess of the transfer value over the acquisition value.

If several conditions are satisfied, companies that have issued debt securities to the public on the Maltese Stock Exchange and that are transferring immovable property forming part of a project may opt out of the above provisions and have the relevant proceeds brought to charge under Article 27G of the Income Tax Act.

Securitization. The total income or gains of a securitization vehicle is realized or deemed to arise during the year in which such income or gains are recognized for accounting purposes. For purposes of calculating the chargeable income or gains of the

securitization vehicle for income tax purposes, the following expenses are deductible:

- Relevant expenses provided under Article 14 of the Income Tax Act
- Amounts payable by the securitization vehicle to the originator or assignor
- Premiums, interest or discounts with respect to financial instruments issued or funds borrowed by the securitization vehicle
- Expenses incurred by the securitization vehicle with respect to the day-to-day administration of the securitization vehicle

Tax is chargeable on any remaining total income of the securitization vehicle, although a further deduction of an amount equal to the remaining total income may be claimed at the option of the securitization vehicle, subject to certain provisos and anti-abuse provisions.

Administration. The year of assessment is the calendar year. Income tax for a year of assessment is chargeable on income earned in the corresponding basis year, which is generally the preceding calendar year. A company may adopt an accounting period other than the calendar year, subject to approval by the Commissioner for Revenue.

Companies with a January to June accounting year-end must file their income tax returns by 31 March (extended if filed electronically) of the year of assessment. Companies with other accounting year-ends must file their income tax returns within nine months after the end of their accounting year (extended if filed electronically).

A self-assessment system applies in Malta. The Commissioner for Revenue issues an assessment only if it determines that a greater amount of income should have been declared or that the company omitted chargeable income from its tax return.

Companies must make three provisional payments of tax, generally on 30 April, 31 August and 21 December. The provisional payments are equal to specified percentages of the tax due as reported in the last income tax return filed with the Commissioner for Revenue on or before 1 January of the year in which the first provisional tax payment is due. The percentages are 20% for the first payment, 30% for the second and 50% for the third. Companies must pay any balance of tax payable on the due date for submission of the income tax return for that year of assessment.

Penalties are imposed for omissions of income, and interest is charged for late payments of tax. The Commissioner for Revenue pays interest on certain late refunds.

Advance Revenue Rulings. Advance Revenue Rulings may be obtained from the Commissioner for Revenue on certain transactions, activities and structures. Rulings survive any change in legislation for a period of two years. In all other circumstances, rulings are binding for five years. Renewals may be requested.

Allocation and distribution of profits. The distributable profits of a company are allocated to the following five tax accounts:

- Final Tax Account

- Immovable Property Account
- Foreign Income Account
- Maltese Taxed Account
- Untaxed Account

The Final Tax Account contains distributable profits that have been subject to a final tax. The Immovable Property Account contains profits connected with immovable property located in Malta. The Foreign Income Account contains, broadly, foreign-source passive income and foreign-source active income attributable to a permanent establishment located outside Malta. The Maltese Taxed Account contains profits that are not included in the Final Tax Account, Immovable Property Account or Foreign Income Account. The Untaxed Account contains an amount of profits or losses that is calculated by deducting the total sum of amounts allocated to the other accounts from the total amount of profits shown in the profit-and-loss account for that year.

The Full Imputation System applies to distributions from the Immovable Property Account, Foreign Income Account and Maltese Taxed Account. Under this system, the tax paid by the company is imputed as a credit to the shareholder receiving the dividends. Profits allocated to the Foreign Income Account and the Maltese Taxed Account result in tax refunds under the Refundable Tax Credit System (see *Refundable Tax Credit System*).

Refundable Tax Credit System. In 2007, the Maltese House of Representatives passed a law that implemented an agreement with the EU relating to a refundable tax credit system for all companies distributing dividends out of taxed profits to shareholders. The imputation system under which the tax paid by a company is essentially treated as a prepayment of tax on behalf of the shareholder was retained but this refundable tax credit system was introduced. The refundable tax credit system applies both to profits allocated to a company's Maltese Taxed Account and to profits allocated to its Foreign Income Account and is available both to residents and nonresidents.

A person receiving a dividend from a company registered in Malta from profits allocated to its Maltese Taxed Account or its Foreign Income Account that do not consist of passive interest or royalties may claim a refund of six-sevenths of the tax paid by the distributing company on the profits out of which the dividends were paid. As a result of the introduction of the new system, the dividend recipient receives a full imputation credit plus a refund of six-sevenths of the tax paid by the distributing company.

Distributions of profits derived from passive interest or royalties or dividends derived from a participating holding in a body of persons that does not satisfy the anti-abuse provision (see *Participation exemption and participating holding system*) do not qualify for the six-sevenths refund. Instead, they qualify for a refund of five-sevenths of the tax paid by the company.

In addition, the five-sevenths refunds apply to distributions made by companies that do not claim any form of double tax relief. Dividends paid out of profits allocated to the Foreign Income Account with respect to profits for which the distributing company has claimed any form of double tax relief (double tax treaty

relief, unilateral relief or the flat-rate foreign tax credit; see *Foreign tax relief*) are entitled to a refund equal to two-thirds of the tax that was imposed on the distributing company gross of any double tax relief. However, for the purposes of this calculation, the amount of tax imposed on the company is limited to the actual tax paid in Malta by the distributing company.

The refundable tax credit system is extended to shareholders of foreign companies that have Maltese branches. Tax paid in Malta by branches on profits attributable to activities performed in Malta is refunded when such profits are distributed.

Persons must register with the Commissioner for Revenue to benefit from the tax refunds described above.

Participation exemption and participating holding system. The Maltese income tax system grants companies registered in Malta the option to exempt from income tax dividends received from a participating holding or capital gains derived from the disposal of such holding. This exemption is referred to as the participation exemption.

A holding in another company is considered to be a participating holding if any of the following circumstances exist:

- A company holds directly at least 5% of the equity shares of a company whose capital is wholly or partly divided into shares, and such holding confers an entitlement to at least 5% of any two of the following:
 - Right to vote
 - Profits available for distribution
 - Assets available for distribution on a winding up

The Commissioner for Revenue may determine that the above provisions are satisfied if the minimum level of entitlement exists in the circumstances referred to in the proviso to the definition of “equity holding.” See below for the definition of “equity holding.”

- A company is an equity shareholder in another company, and the equity shareholder company may at its option call for and acquire the entire balance of the equity shares not held by that equity shareholder company to the extent permitted by the law of the country in which the equity shares are held.
- A company is an equity shareholder in a company, and the equity shareholder company is entitled to first refusal in the event of a proposed disposal, redemption or cancellation of all of the equity shares of that company not held by that equity shareholder company.
- A company is an equity shareholder in a company and is entitled to either sit on the board or appoint a person to sit on the board of that company as a director.
- A company is an equity shareholder that holds an investment representing a total value, as of the date or dates on which it was acquired, of a minimum of EUR1,164,000 (or the equivalent sum in a foreign currency) in a company and that holding in the company is held for an uninterrupted period of not less than 183 days.

A holding of a company in certain partnerships, certain bodies of persons or collective-investment vehicles that provide for limited

liability of investors constituted, incorporated or registered outside Malta is deemed to constitute a participating holding if it satisfies the provisions of any of the six bullets above.

For the purposes of the above rules, an “equity holding” is a holding of the share capital in a company that is not a property company and which shareholding entitles the shareholder to at least any two of the following rights (equity holding rights):

- Right to vote
- Right to profits available for distribution to shareholders
- Right to assets available for distribution on a winding up of the company

The terms “equity shares,” “equity shareholder” and “equity shareholding” are construed in accordance with the above definition.

The Commissioner for Revenue may determine that an equity holding exists even if such holding is not a holding of the share capital in a company or does not consist solely of such a holding of share capital, provided that it can be demonstrated that at any time an entitlement to at least two of the equity holding rights exists in substance.

A “property company” is a company that owns immovable property located in Malta or any rights over such property, or a company that holds, directly or indirectly, shares or interests in a body of persons owning immovable property located in Malta or any rights over such property.

A company or body of persons carrying on a trade or business that owns immovable property located in Malta or rights over such property is treated as not owning the immovable property or rights over such property if all of the following conditions are satisfied:

- The property consists only of a factory, warehouse or office used solely for the purpose of carrying on such trade or business.
- Not more than 50% of its assets consist of immovable property located in Malta.
- It does not carry on an activity from which income is derived directly or indirectly from immovable property located in Malta.

The application of the participation exemption is subject to an antiabuse provision. The participation exemption applies to participating holdings if the body of persons in which the participating holding is held satisfies any one of the following three conditions:

- It is resident or incorporated in a country or territory that forms part of the EU.
- It is subject to a foreign tax of at least 15%.
- It does not derive more than 50% of its income from passive interest or royalties.

If none of the above conditions is satisfied, both of the following two conditions must be fulfilled:

- The equity holding by the company registered in Malta in the body of persons not resident in Malta is not a portfolio investment. For this purpose, the holding of shares by a company registered in Malta in a company or partnership not resident in

Malta that derives more than 50% of its income from portfolio investments is deemed to be a portfolio investment.

- The body of persons not resident in Malta or its passive interest or royalties has been subject to a foreign tax of at least 5%.

In addition, Malta has also incorporated the amendments to the EU Parent-Subsidiary Directive. Consequently, effective from 1 January 2016, the participation exemption on dividends does not apply if the relevant profits were deductible to the distributing company in the other EU member state.

The participation exemption applies also to gains or profits derived from transfers of holdings in companies resident in Malta, but certain restrictions are envisaged. Conversely, the participation exemption cannot be applied with respect to dividends received from a participating holding in companies tax resident in a jurisdiction that is included in the EU list of non-cooperative jurisdictions for a minimum period of three months during the financial year in question, unless it is proved to the satisfaction of the Commissioner for Revenue that the company maintains sufficient significant people functions in that jurisdiction as is commensurate with the type and extent of the activity carried on in that jurisdiction and the income earned from the jurisdiction.

Moreover, the participation exemption is extended to branch profits. This applies to income and gains derived by a company registered in Malta that are attributable to a permanent establishment (including a branch) located outside Malta or that are attributable to the transfer of such permanent establishment, regardless of whether such permanent establishment belongs exclusively or in part to the particular company, including a permanent establishment operated through an entity or relationship other than a company.

Foreign tax relief. Under tax treaty provisions and the domestic law, a tax credit against Maltese tax is granted for foreign tax paid. The amount of the credit is the lower of Maltese tax on the foreign income and the foreign tax paid.

Maltese companies may also reduce their tax payable in Malta by claiming double tax relief with respect to British Commonwealth income tax.

Unilateral tax relief, which is another form of double tax relief, applies if treaty relief is not available and if the taxpayer has proof of the foreign tax paid. The unilateral relief is also available for underlying tax.

Another form of double tax relief is a flat-rate foreign tax credit (FRFTC), which may be claimed by companies that have a special empowerment clause in their Memorandum and Articles of Association. The FRFTC, which is equivalent to 25% of the net income received (before any allowable expenses), applies to all foreign-source income that may be allocated to the Foreign Income Account. An auditor's certificate stating that the relevant income is foreign-source income is sufficient evidence that profits may be allocated to the Foreign Income Account. The FRFTC is added to chargeable income and credited against the Maltese tax charge. The credit is limited to 85% of the Maltese tax due before deducting the credit.

The interaction of the four types of double tax relief not only ensures that tax is not paid twice on the same income; it also reduces the overall effective rate of the Maltese tax.

C. Determination of trading income

General. Chargeable income is the net profit reported in the companies' audited financial statements, subject to certain adjustments. Expenses incurred wholly and exclusively in the production of income are deductible.

Expenses that are not deductible include the following:

- Amortization of goodwill
- All types of provisions
- Voluntary payments
- Expenses recoverable under insurance
- Pre-trading expenses (except for expenditure incurred with respect to staff training, salaries or wages and advertising within the 18 months preceding the date on which the company begins to carry on its trading activities)
- Unrealized exchange differences
- Other expenses that are not incurred in the production of income

Inventories. Inventories are normally valued at the lower of cost or net realizable value in accordance with generally accepted accounting principles.

Tax depreciation (capital allowances). Tax depreciation allowances include initial allowances and annual wear-and-tear allowances.

Initial allowances are granted at a rate of 10% with respect to new industrial buildings and structures.

Wear-and-tear allowances for plant and machinery are calculated using the straight-line method. Industrial buildings and structures are also depreciated using the straight-line method.

The following are the minimum number of years over which the principal categories of plant and machinery may be depreciated.

Asset	Years
Computers and electronic equipment	4
Computer software	4
Motor vehicles	5*
Furniture, fitting and soft furnishings	10
Aircraft, airframes, aircraft engines, aircraft engine or airframe overhaul, and aircraft interiors and other parts	4
Ships and vessels	10
Other machinery	5
Other plant	10

* The cost of non-commercial motor vehicles is limited to EUR14,000.

The annual straight-line rate for industrial buildings and structures, including hotels and certain offices, is 2%.

Capital allowances are generally subject to recapture on the sale of an asset to the extent the sale proceeds exceed the tax value after capital allowances. Any amounts recaptured are added to taxable income for the year of sale or are used to reduce the cost

of a replacement asset. To the extent sales proceeds are less than the asset's depreciated value, an additional allowance is granted.

Groups of companies. A company that is part of a group of companies may surrender tax-trading losses to another member of the group. Two companies are deemed to be members of a group of companies for tax purposes if they are resident in Malta and not resident in any other country for tax purposes, and if one of the companies is a 51% subsidiary of the other or both are 51% subsidiaries of a third company that is resident in Malta. A company is considered to be a 51% subsidiary of another company if all of the following conditions exist:

- More than 50% of the subsidiary's ordinary shares and more than 50% of its voting rights are owned directly or indirectly by the parent company.
- The parent company is beneficially entitled to receive directly or indirectly more than 50% of profits available for distribution to the ordinary shareholders of the subsidiary.
- The parent company is beneficially entitled to receive directly or indirectly more than 50% of the assets of the subsidiary available for distribution to the ordinary shareholders of the subsidiary in the event of a liquidation.

The group company surrendering the losses and the group company receiving the losses must have accounting periods that begin and end on the same dates, except for newly incorporated companies and companies in the process of liquidation.

Tax consolidation rules. With effect from accounting periods starting on or after 1 January 2019, the Consolidated Group (Income Tax) Rules allow groups to elect to form a "fiscal unit" and bring to charge the income derived by the companies within the fiscal unit on a consolidated basis of taxation. For the purposes of these rules, the term "company" includes any entity that is treated as a company, including a partnership that has elected to be treated as a company but excludes securitization vehicles and licensed finance leasing companies.

A "fiscal unit" is formed through the submission of an election made by the parent company for itself and its 95% subsidiaries to form such a fiscal unit. A 95% subsidiary is a company in which the parent company's shareholding therein satisfies any two of the following conditions:

- The parent company holds at least 95% of its voting rights.
- The parent company is beneficially entitled to at least 95% of any profits available for distribution to its ordinary shareholders.
- The parent company would be beneficially entitled to at least 95% of any assets of the subsidiary company available for distribution to its ordinary shareholders on a winding-up.

All companies forming part of the fiscal unit must have their accounting periods beginning and ending on the same dates.

Once such a fiscal unit is formed, the parent company is treated as the principal taxpayer and is required to submit the income tax return for the whole fiscal unit. The 95% subsidiaries are treated as transparent subsidiaries and are not required to submit any income tax returns. To be in a position to submit the consolidated

income tax return, the principal taxpayer is required to prepare an audited consolidated balance sheet and profit-and-loss account covering the fiscal unit in accordance with the relevant requirements contained in the Companies Act.

In determining the chargeable income of the fiscal unit, the following rules apply:

- The principal taxpayer must bring forward in its consolidated income tax return any tax attributes carried forward by the transparent subsidiaries, such as unabsorbed capital allowances, tax trading losses and/or tax credits, and profits carried forward by the transparent subsidiaries in their respective taxed accounts other than the untaxed account in their income tax returns covering the previous year of assessment.
- The principal taxpayer is deemed to have derived all income earned by the transparent subsidiaries and entitled to claim a deduction of the expenses incurred by the transparent subsidiaries.
- Any transactions between the companies forming part of the fiscal unit must be ignored, and exemptions should remain available.
- Income derived by a transparent subsidiary that is not tax resident in Malta is deemed income attributable to a permanent establishment, which the principal taxpayer has outside Malta.
- If the principal taxpayer is a company that is not incorporated in Malta but tax resident in Malta, the principal taxpayer is subject to tax on the following:
 - All income and capital gains derived by a transparent subsidiary incorporated in Malta
 - All income and capital gains arising in Malta that are derived by a transparent subsidiary incorporated outside Malta
 - All foreign-source income derived by a transparent subsidiary incorporated outside Malta but tax resident in Malta that is either received in or remitted to Malta

In determining the tax liability of the fiscal unit, the principal taxpayer is entitled to claim double taxation relief with respect to any tax incurred by any of the transparent subsidiaries outside Malta. The chargeable income derived by the fiscal unit is taxed at a rate that is determined by deducting from the applicable corporate tax rate the result of dividing the total amounts claimable by all members of the fiscal unit and/or persons entitled to receive distributions from the principal taxpayer by the chargeable income of the fiscal unit.

If the parent company's shareholding in a subsidiary satisfies the relevant conditions with a percentage of 100%, the tax payment by the fiscal unit is determined in a manner that the principal taxpayer deems fit. Otherwise, the tax due by the fiscal unit may also be apportioned to a transparent subsidiary that is a 95% subsidiary but not a 100% subsidiary, in accordance with an agreement agreed to by the principal taxpayer and all the other minority shareholders.

Certain anti-abuse provisions are envisaged.

Relief for losses. Tax losses incurred in a trade or business may be carried forward indefinitely to offset all future income.

Unabsorbed tax depreciation may also be carried forward indefinitely, but may offset only income derived from the same source. A carryback of losses is not allowed.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; standard rate	18
Stamp duty on various documents and transfers of ownership	
Sales of real property	5
Transfers of marketable securities	2
Life insurance policies	0.1
Other insurance policies	11
Excise duty, on various commodities including alcohol and alcoholic beverages, manufactured tobacco, energy products, mobile telephone services, cement, pneumatic tires, ammunition cartridges, chewing gum, water and other non-alcoholic beverages, and plastic sacks and bags; although levied on producers or importers when they distribute the products for general consumption, the duty is ultimately borne by consumers because it is included in the price of the products	Various

E. Miscellaneous matters

Foreign-exchange controls. When Malta became a member of the EU, it abolished foreign-exchange controls and introduced some reporting obligations under the External Transactions Act.

Anti-avoidance legislation. Maltese law includes no specific transfer-pricing rules. However, it does contain general anti-avoidance provisions to prevent the avoidance of tax through arrangements that are solely tax-motivated. Under these provisions, the Commissioner for Revenue may ignore an arrangement and add an amount to chargeable income if it establishes that a transaction has the effect of avoiding or postponing tax liability.

Anti-Tax Avoidance Directive 1. Malta has transposed the EU Anti-Tax Avoidance Directive 1 (ATAD 1). The ATAD 1 introduces some major tax policy changes into Maltese law by providing for a group of norms that were previously not contemplated in Maltese tax law. It provides for structured mandatory controlled foreign company (CFC) rules (to deter profit shifting to a low or no-tax jurisdiction) and exit taxation (to prevent companies from avoiding tax when relocating assets). In addition, the ATAD 1 introduces interest limitation rules to discourage artificial debt arrangements designed to minimize taxes and a general anti-abuse rule (GAAR) to counteract aggressive tax planning. Although Maltese law did previously provide for some basic interest limitation rules, the policy impact of interest-limitation rules driven by the ATAD 1 is expected to be significant. Because the wording of the GAAR contemplated by the ATAD 1 is comparable to the wording in Article 51 of the Income Tax Act, the ATAD 1's introduction of a new GAAR is not expected to have a significant impact.

From a domestic perspective, the provisions of the ATAD 1 apply from 1 January 2019 (and from 1 January 2020 in the case of exit taxes) to all companies as well as other entities, trusts and similar arrangements that are subject to tax in Malta in the same manner as companies. This includes entities that are not resident in Malta but have a permanent establishment in Malta, provided that they are subject to tax in Malta as companies.

Anti-Tax Avoidance Directive 2. Malta has also transposed the EU Anti-Tax Avoidance Directive (ATAD 2). The ATAD 2 expands on the minimum standards targeting tax avoidance on certain hybrid mismatches that were originally contemplated by the ATAD 1 to target additional hybrid mismatches. While the ATAD 1 was aimed at hybrid mismatches arising from differences in the legal characterization of financial instruments and entities, the ATAD 2 widens the definition of “hybrid mismatch” to incorporate hybrid transfers, hybrid permanent establishment mismatches and imported mismatches. It also addresses reverse hybrid mismatches and tax residency mismatches.

The provisions of ATAD 2 are effective from 1 January 2020 and apply to all companies and other entities, trusts and similar arrangements that are subject to tax in Malta in the same manner as companies, including entities that are not resident in Malta but have a permanent establishment in Malta insofar as they are subject to tax in Malta as companies. The only exception applies to reverse hybrid mismatches. The applicable measures for reverse hybrid mismatches entered into effect on 1 January 2022, and they will also apply to all entities that are treated as transparent for Maltese tax purposes, such as partnerships that have not elected to be treated as a company.

Exchange of information requirements. Both the United States Foreign Account Tax Compliance Act (FATCA) and the Organisation for Economic Co-operation and Development (OECD) Common Reporting Standard were transposed into local law. Malta, as a member state of the EU, has also transposed the provisions requiring the automatic exchange of information relating to advance cross-border rulings or advance pricing arrangements. Similarly, Malta has also transposed the provisions of the Mandatory Disclosure Regime.

Transfer pricing. Although Maltese tax law does not provide any detailed transfer-pricing requirements or guidelines, certain provisions incorporate a concept analogous to the arm’s-length principle. In the absence of detailed guidelines, the Maltese tax authorities tend to refer to the OECD Transfer Pricing Guidelines. Consequently, it is advisable that the terms of any cross-border transaction entered into between two associated enterprises adhere to the arm’s-length principle as contemplated in the guidelines. No transfer-pricing documentation requirements apply other than Country-by-Country Reporting.

On 22 December 2021, the Commissioner for Revenue published draft Transfer Pricing Rules for public consultation. The aim is to introduce these new rules with effect from 1 January 2024 or after. If it is adopted in the current form, the rules would apply to companies that are not considered to be a micro, small or medium-size enterprises and whose aggregate arm’s-length value of its cross-border arrangements in the relevant year exceeds a value that is yet to be determined. Companies falling within the purview of these transfer-pricing rules would be required to ensure

that any cross-border arrangement entered into with an associate enterprise be at arm's length. Based on the draft rules, the arm's-length amount is to be determined on the basis of such methodologies to be prescribed via guidelines to be published by the Commissioner, and companies are expected to maintain transfer-pricing documentation on a timely basis. The draft rules also provide for a formal framework pertaining to Unilateral Transfer Pricing Rulings and Advanced Pricing Arrangements.

F. Treaty withholding tax rates

Under Maltese domestic tax law, dividends, interest, discounts, premiums and royalties paid to nonresidents are not subject to withholding tax. Interest and royalties paid to nonresidents are exempt from income tax in Malta if they are not effectively connected with a permanent establishment in Malta through which the nonresidents engage in a trade or business.

Under Malta's tax treaties, the maximum tax rates applicable to dividends paid by Maltese companies to persons resident in the other treaty jurisdictions do not exceed the tax rate payable by the recipient companies in Malta.

Malta has also signed and transposed the OECD's Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument, or MLI). The MLI entered into force on 1 April 2019.

The following table provides the maximum withholding tax rates for dividends, interest and royalties under Malta's tax treaties.

	Dividends		Required percentage for major shareholding	Interest	Royalties

Corporate Income Tax Rate (%)	2/25 (a)
Capital Gains Tax Rate (%)	25
Branch Tax Rate (%)	2/25
Withholding Tax (%)	
Dividends	10
Interest	10
Royalties from Patents, Know-how, etc.	15 (b)
Payments to Nonresidents for Services	15 (b)
Directors' Fees	10
Payments to Resident Individuals for Services	2.5 (c)
Branch Remittance Tax	10 (d)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) The Mauritanian tax code no longer provides for a minimum tax (see Section B).
 (b) This tax applies to payments by residents to nonresidents. A tax treaty may reduce the rate applicable to nonresidents.
 (c) This tax applies to service fees paid to local (Mauritania-based) consultants. A failure to pay the 2.5% withholding tax results in the non-deductibility of the service fees paid to the consultants.
 (d) See Section B.

B. Taxes on corporate income and gains

Corporate income tax. Mauritanian companies are taxed on the territoriality principle. As a result, Mauritanian companies carrying on a trade or business outside Mauritania are not taxed in Mauritania on the related profits. However, profits deriving from export sales of goods or services of a Mauritania-based company are subject to tax in Mauritania. Foreign companies performing activities in the country are subject to Mauritanian corporate tax on profits generated if such activities are performed through a permanent establishment (PE).

Under the new General Tax Code, effective from 1 January 2020, foreign companies are deemed to have a PE if they wholly or partly carry on their activity through a fixed place of business such as a place of management, a branch, an office, a factory, a

workshop, a mine, an oil or gas well, a quarry or any other place of extraction of natural resources.

A PE also encompasses a construction site, an assembly or installation project as well as provision of services that last over six months in Mauritania, except for oil subcontractors/operators, for which the period is extended to 12 months.

Tax rates. The regular corporate income tax rate is the higher of 25% of net taxable profit or 2% of turnover (except transfer or reversal of expenses). The corporate income tax cannot be less than MRU100,000.

Profits realized in Mauritania by branches of foreign companies are deemed to be distributed and, consequently, are subject to a branch withholding tax of 10% on after-tax income.

The Mauritanian investment code provides for a preferential tax regime for the following types of companies:

- Small-Sized Companies
- Free-Export Companies

Small-Sized Companies qualify for a preferential tax regime if they invest between MRO50 million and MRO200 million. The preferential regime grants certain tax advantages during the installation phase (limited to three years) and the operation phase.

Free-Export Companies qualify for a preferential tax regime if they satisfy the following conditions:

- They invest at least MRO500 million.
- They create at least 50 new permanent jobs.
- They intend to devote least 80% of their production to export sales.
- They are located in a free economic zone.

Free-Export Companies are eligible for certain tax exemptions and other tax advantages.

A simplified tax regime designed for the oil and gas sector provides for an 8% withholding tax.

Capital gains. Capital gains are taxed at the regular corporate income tax rate.

Administration. The fiscal year is the calendar year. Tax returns must be filed by 31 March of the year following the fiscal year.

Companies must pay the corporate tax (see *Tax rates*) in two equal installments, which are due on 31 March and 30 June of the year following the tax year. Companies must pay any balance of tax due by 30 September.

Dividends. Dividends are subject to a 10% withholding tax.

Foreign tax relief. Foreign tax credits are not allowed. Income subject to foreign tax that is not exempt from Mauritanian tax under the territoriality principle is taxable net of the foreign tax.

C. Determination of taxable income

General. Taxable income is based on financial statements prepared according to generally accepted accounting principles and the rules contained in the National General Accounting Plan.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on loans from shareholders to the extent that the rate exceeds the current rate of the central bank plus two percentage points and the company cannot provide a copy of the loan contract duly registered by a notary and a withholding tax certificate pertaining to the said interests
- Head-office expenses to the extent that they exceed 2% of annual turnover
- Corporate income tax (see Section B)
- Certain specified charges
- Corporate income tax, penalties, gifts and most liberalities, as well as donations exceeding 1% of the annual turnover within an MRU2 million limit
- Charges paid in cash to another company if their unit amount exceeds MRU200,000, or MRU50,000 for companies involved in the export and processing of fishery products

Inventories. Inventory is normally valued at the lower of cost or market value.

Provisions. In determining accounting profit, companies must establish certain provisions, such as a provision for a risk of loss or for certain expenses. These provisions are normally deductible for tax purposes if they provide for clearly specified losses or expenses that are probably going to occur and if they appear in the financial statements and in a specific statement in the tax return.

Capital allowances. Land and intangible assets, such as goodwill, are not depreciable for tax purposes. Other fixed assets may be depreciated using the straight-line method at maximum rates specified by the tax law. The following are some of the applicable straight-line rates.

Asset	Rate (%)
Commercial buildings	4
Industrial buildings	5
Office equipment	10
Motor vehicles	25
Plant and machinery	20

Certain industrial assets may be depreciated using the declining-balance method. The Mauritanian tax law does not allow accelerated depreciation methods.

Relief for tax losses. Losses may be carried forward for five years. Losses may not be carried back.

Groups of companies. Fiscal integration of Mauritanian companies equivalent to a consolidated filing position is not allowed.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on sales of goods and services, and on imports	
Standard rate	16
Export of goods and services	0
Telecom services	18

Nature of tax	Rate (%)

Registration duties, on transfers of real property or businesses	1/2/5/10/15
Social security contributions, on an employee's annual gross salary up to MRO70,000; paid by	
Employer	15
Employee	1

E. Foreign-exchange controls

The Mauritanian currency is the ouguiya.

Effective from January 2018, Mauritania has changed its currency from the old ouguiya (MRO) to the new ouguiya (MRU). Mainly, the currency unit changes (MRO100,000 becomes MRU10,000). From a tax point of view, Mauritanian tax authorities have issued an internal memorandum that provides the following:

- Documents filed, such as financial statements and returns, should take into account the new currency units.
- Documents issued by revenue authorities to the attention of taxpayers should also refer to the new currency units.

Some amounts mentioned in this chapter refer to the former currency because relevant legal codes and documents referring to the currency have not yet been formally amended. However, in practice, payments should now be performed with the new Mauritanian currency.

Exchange-control regulations exist in Mauritania for foreign financial transactions.

Transfer pricing. The Mauritanian legal framework relating to transfer pricing has been significantly amended through the implementation of additional rules contained in the 2018 Finance Act. Under the act, important tax obligations are imposed on Mauritania-based entities that have annual net turnover or gross assets of MRU30 million or more and either of the following circumstances exists:

- At the end of the fiscal year, they hold, directly or indirectly, more than half of the share capital or voting rights of another company incorporated in Mauritania or abroad that meets the turnover condition mentioned above.
- At the end of the fiscal year, more than half of the share capital or voting rights of the entity are held, directly or indirectly, by another company meeting the turnover condition mentioned above.

The above companies are now required to take the following actions:

- They must file an annual transfer-pricing return (statement): This statement should be filed by 31 March of each year through an official form that Mauritanian tax authorities will be issuing in upcoming months. The return should include, among other items, general information on the group of related companies, including a general description of the business

activities, the transfer-pricing policy, a list of immaterial assets, information on financial transactions (loans) and a statement of transactions performed between related parties.

- They must make available to the Mauritania tax authorities transfer-pricing documentation demonstrating compliance with the arm's-length principle. This documentation should be available to the tax authorities from the beginning of an on-site formal tax audit. In the event of a lack of production of complete documentation, a notice can be addressed to the taxpayer to provide requested information within a 15-day period.

A failure to submit the annual transfer-pricing return should trigger a tax fine of MRU2,500,000. A failure to submit documentation requested by the tax authorities should trigger a penalty of 0.5% per fiscal year of the amount of transactions related to the documents that have not been provided to the tax authorities. The minimum penalty is MRU500,000.

F. Tax treaties

Mauritania has entered into double tax treaties with France, the Maghreb Arab Union, Senegal and Tunisia.

A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	0 (a)
Branch Tax Rate (%)	15 (a)
Withholding Tax (%)	
Dividends	0
Interest	15 (b)
Royalties	10/15 (c)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) See Section B.
- (b) This withholding tax applies to interest paid to any person, other than a company resident in Mauritius, by a person, other than a Mauritian bank or a person authorized to carry on deposit-taking business in Mauritius. This rate may be reduced if the recipient is a tax resident of a treaty-partner country.
- (c) The withholding tax rate is 10% for royalties paid to residents. For nonresidents, the rate is 15% unless the recipient is resident in a treaty jurisdiction and the applicable treaty provides for a lower rate. The withholding tax rate does not apply if the payer is a corporation holding a Global Business Licence (GBL) under the Financial Services Act 2007 (GBL company) and if it pays the interest out of its foreign-source income.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in Mauritius are subject to income tax on their worldwide income. Resident companies are companies with their central management and control in Mauritius. If a nonresident company has a branch carrying on business in Mauritius, the nonresident company is subject to tax on the income of the branch.

Rates of corporate income tax. The corporate income tax rate is 15% of the annual taxable net profits.

A 3% rate applies to the taxable profits attributable to the export of goods, effective from 1 July 2017. Export of goods includes international buying and selling of goods, whereby the goods are shipped in the original country to the final importer in the

importing country, without the goods being physically landed in Mauritius. A manufacturing company that is engaged in the medical, biotechnology or pharmaceutical sector and that holds an Investment Certificate issued by the Economic Development Board (EDB) is subject to tax at a rate of 3% if the company satisfies the prescribed conditions on the substance of its activities and has not applied any of the exemptions specified in Part II of the Second Schedule. A Higher Education Institution registered under the Higher Education Act set up in Mauritius is also subject to tax at the rate of 3%.

From the 2020-21 year of assessment, banks are subject to a separate tax regime. Subject to certain exceptions, the first MUR1.5 billion is taxed at a rate of 5% and a tax rate of 15% applies to the taxable profits exceeding MUR1.5 billion. If the taxable profits of the bank exceed MUR1.5 billion in a year and the 2017-18 year of assessment (the base year) and if the bank satisfies certain conditions, the 15% tax rate applies to only the excess of the taxable profits for the base year over MUR1.5 billion. The prescribed conditions for the 2020-21 and 2021-22 years of assessment are satisfied if the bank grants at least 5% of its new credit facilities to the following:

- Small and medium enterprises in Mauritius
- Enterprises engaged in agriculture, manufacturing or production of renewable energy in Mauritius
- Operators in African or Asian jurisdictions

For this purpose, a credit facility is either of the following:

- A facility, whether fund-based or non-fund-based, made available to a person and containing an obligation to disburse a sum of money in exchange for a right to repayment of the amount disbursed and outstanding and to payment of interest or other charges on such amount, including a loan, overdraft and leasing facility
- An extension of the due date of a debt, any guarantee issued and any commitment to acquire a debt security or other right to payment of a sum of money

The tax rate is 5% if the taxable profits of the bank do not exceed MUR1.5 billion for the base year even if the taxable profits for the year in question exceeds MUR1.5 billion and if the bank satisfies certain conditions that have not yet been prescribed. Under the Mauritian tax laws, banks are not allowed to claim a foreign tax credit.

From the 2021-22 year of assessment, the tax payable by a life insurance company is based on the higher of the tax payable under the normal rule or 10% of the relevant profit. For this purpose, relevant profit is defined as profit attributable to shareholders as adjusted by any capital gain or capital loss reflected in the income statement of the company.

A tax of 10% applies to any winnings exceeding MUR100,000 that are paid to a winner by the Mauritius National Lottery Operator, operator of the Loterie Vert, a casino operator, a hotel casino operator or a gaming house operator licensed under the Gaming Regulatory Authority Act.

Interest income on debentures, bonds or sukuks (debt instruments used in Islamic banking) issued by a company to finance renewable energy projects, the terms and conditions of which have been approved by the Mauritius Revenue Authority (MRA), is exempt from tax, effective from 1 July 2017.

A requirement to establish a Corporate Social Responsibility (CSR) fund applies to companies. Companies must set up a CSR fund equal to 2% of chargeable income for the preceding year. Companies use this fund to implement a CSR program in accordance with their own CSR framework. For this purpose, the CSR program must have as its object the alleviation of poverty, the relief of sickness or disability, the advancement of education of vulnerable persons or the promotion of any other public object beneficial to the Mauritian community.

If the contribution is less than the 2% minimum, the difference must be paid to the MRA when the company submits its annual tax return. Certain companies, such as Global Business Corporations set up under the Financial Services Act 2007, companies that hold an Integrated Resort certificate referred to in the Investment Promotion (Real Estate Development Scheme) Regulations, 2007, companies issued a certificate as a freeport operator or private freeport developer under the Freeport Act on income from export and Real Estate Investment Trusts (REITs) are excluded from the purview of the CSR rules. Effective from the 2013 year of assessment, companies may spend up to 20% more than their statutory CSR obligation in any year but not more than two consecutive years and the excess CSR spending may then be offset in five equal consecutive annual installments against its future CSR liability. Subject to the approval of the CSR committee, up to 20% of the CSR liability may be carried forward to the following year.

Under amendments contained in the Finance (Miscellaneous Provisions) Act 2016 (FMPA 2016) and the Finance (Miscellaneous Provisions) Act 2017, at least 50% of any CSR fund set up during the period from 1 January 2017 to 31 December 2018 must be paid to the National Social Inclusion Foundation (CSR Foundation) through the MRA. Effective from 1 January 2019, the contribution to the CSR Foundation will be 75%. The balance must be applied to the entity's own CSR framework for CSR funds set up by 31 December 2018. Thereafter, the entity is allowed to contribute to a non-governmental organization implementing a CSR program in the following priority areas of intervention:

- Dealing with health problems
- Educational support and training
- Family protection, including gender-based violence
- Leisure and sports
- Peace and nation building
- Road safety and security
- Social housing
- Socio-economic development as a means of poverty alleviation
- Supporting people with disabilities
- Such other areas as the MOFED may determine
- Fields of advocacy, capacity building and research for consideration relating to the other priority areas of intervention

The above priority areas target individuals and families registered under the Social Register of Mauritius and vulnerable groups under the Charter of the National CSR Foundation. Contributions to the restoration of a building designated under the National Heritage Fund Act also qualify as a CSR program.

The CSR does not apply to a company that has elected to pay its tax under the presumptive tax system.

Otherwise, the balance must be remitted to the MRA at the time of submission of the annual tax return.

Any excess CSR contribution made before the change to the law contained FMPA 2016 can be offset against the CSR liability that should be made to the CSR contribution, effective from the 2016-17 year of assessment over a period of five years.

The law now specifically provides that no CSR money can be specified regarding the following activities:

- Activities discriminating on the basis of race, place of origin, political opinion, color, creed or sex
- Activities promoting alcohol, cigarettes or gambling
- Activities targeting shareholders, senior staff or their family members
- Contributions to any government department or parastatal body
- Contributions to natural disasters mitigation programs
- Contributions to political or trade union activities
- Sponsorship for the purpose of marketing for companies
- Staff welfare and training of employees

The amount payable to the MRA may be reduced by 25% of the total CSR liability if a company intends to use the fund to finance a CSR program that has been approved by the CSR Foundation on or after 1 January 2019; the prior written approval of the CSR Foundation is mandatory.

The CSR liability cannot be reduced by any credit.

A special levy is imposed on banks. The levy does not apply if, in the preceding year, the bank had incurred a loss or if its book profit did not exceed 5% of its operating income. For the 2009 through 2013 years of assessment, the levy equaled the sum of 3.4% of book profit and 1% of operating income. For the 2014, 2015, 2015-16, 2016-17, 2017-18 and 2018-19 years of assessment, the tax base and rates remain unchanged for Segment B banking business. Segment B banking business refers to banking transactions with nonresidents and corporations that hold a Global Business License (GBL) under the Financial Services Act 2007. The levy is computed at 10% of the chargeable income from other sources for the 2014, 2015, 2015-16, 2016-17, 2017-18 and 2018-19 years of assessment. From the 2019-20 year of assessment, the levy is included in the Value Added Tax Act. It is based on the aggregate net interest income and other income from banking transactions before deducting any expenses. The levy does not apply to banking transactions with nonresidents and companies holding a GBL under the Financial Services Act and is not payable if the bank incurs a loss. If the income that is subject to the levy is less than MUR1.2 billion, the rate of the levy is 5.5%; otherwise, the rate is reduced to 4.5%. For a bank that has

been in operation since 30 June 2018, the levy is restricted to 1.5 times the levy for the 2017-18 year of assessment. The levy must be paid within five months after the year-end of the bank. The levy is not deductible for the purposes of computing the taxable profits of the bank.

“Telephony service providers,” defined as a provider of public fixed or mobile telecommunication networks and services, are subject to a solidarity levy for the 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2015-16, 2016-17, 2017-18, 2018-19 and 2019-20 years of assessment. The levy equals the sum of 5% of book profit and 1.5% of turnover. The levy does not apply if, in the preceding year, the service provider incurred a loss or if its book profit did not exceed 5% of its turnover. From the 2020-21 year of assessment, the levy is based on the aggregate of 5% of the accounting profit and 1.5% of the turnover of the operator. For this purpose, the accounting profit is the profit of an operator from all its activities and computed in accordance with the International Financial Reporting Standards.

Tax advantages for certain companies. The following types of companies may qualify for tax advantages:

- Freeport companies.
- Information and Communication Technology companies.
- Companies engaging in innovation-driven activities for intellectual property assets developed in Mauritius or deriving income from intellectual property assets developed in Mauritius on or after 10 June 2019.
- Companies set up on or before 30 June 2025 that are engaged in the operation of an e-commerce platform and that are issued an e-commerce certificate by the EDB are exempt from tax on their income, provided that the company satisfies its substance requirements. The exemption is restricted to five successive years starting from the year the company starts its activities.
- Companies engaged in the exploitation and use of deep-sea ocean water activities for certain specific purposes.
- Companies engaged in spinning, weaving, dyeing or knitting.

Freeport companies. Freeport operators and private Freeport developers are exempt from corporate income tax on sales made to persons outside Mauritius up to 30 June 2021, if the freeport certificate was issued on or before 14 June 2018. If the freeport certificate was issued on or after 14 June 2018, no corporate tax exemption applies. A freeport operator or private freeport developer is not subject to the CSR rules with respect to its income from exports. A freeport operator or private freeport developer is subject to tax at a rate of 3% if it satisfies all of the following conditions:

- It is engaged in the manufacturing of goods on the local market.
- The entity employs a minimum of five staff members.
- It incurs an annual expenditure of more than MUR3,500,000.

Information and Communication Technology companies. Information and Communication Technology (ICT) companies are classified as tax-incentive companies. If the investment certificate of an ICT company is issued before 30 September 2006 and if the ICT company is engaged in business-process outsourcing and back-office operations or in the operation of call centers or contact centers, the ICT company may elect within 60 days of the

date of the issuance of its investment certificate to have two-thirds of its net income exempted from tax up to and including the income year ended 30 June 2012. This reduces the effective tax rate to 5% of taxable income. Income derived by other ICT companies from nonresidents is exempt from tax through the income year ended 30 June 2012. Income derived from residents is taxable at the incentive rate of 15%. Losses incurred during the exemption period may be carried forward to years following the expiration of the exemption period.

Innovation-driven activities. The income of a company set up on or after 1 July 2017 that is involved in innovation-driven activities for intellectual property assets developed in Mauritius is exempt from tax from the year the company starts its innovation-driven activities for a period of eight years.

Expenditure on fast charger for electric car. Expenditure on a fast charger used for an electric car used in the production of gross taxable income (essentially turnover before deduction of any expenses) qualifies for a 200% deduction.

Expenditure on medical research and development. A person engaged in medical research and development is eligible to deduct 200% of any expenditure on medical research and development performed in Mauritius. The extra deduction is not available if the person has claimed annual allowances on the relevant expenditure.

Expenditure on patents and franchises. A company is allowed to deduct 200% of its expenditure on the acquisition of patents and franchises and the costs to comply with international quality standards and norms.

Manufacturing of pharmaceutical products, medical devices and high-tech products. Income of a company that started operations on or after 8 June 2017 and that is engaged in the manufacturing of pharmaceutical products, medical devices and high-tech products is exempt from tax for a period of eight years from the year the company begins its operations.

Exploitation and use of deep ocean water. Income of a company from the exploitation and use of deep-sea ocean water for providing air conditioning installations, facilities and services is exempt from tax.

Contribution to COVID-19 Solidarity Fund. Contributions made to the COVID-19 Solidarity Fund, which is referred to in the Finance and Audit (COVID-19 Solidarity Fund) Regulations 2020, during the 2019-20 and 2020-21 income years qualify for a deduction in the year in which the contribution is made. Any unrelieved amount may be utilized in the following two years.

Income derived in collaboration with the Mauritius Africa Fund. Income of a company from activities carried out as a developer or project financing institution in collaboration with the Mauritius Africa Fund for the purpose of developing infrastructure in a Special Economic Zone is exempt for a period of five years from the year in which the company begins performing the qualifying activities. A Special Economic Zone is defined as a part of a foreign territory where business activity may be conducted under

preferential terms and which is being developed, managed or promoted by the Mauritius Africa Fund Limited or any of its subsidiaries or affiliates.

Sheltered farming scheme. Income of a person from any activity under the sheltered farming scheme set up by the Food and Agricultural Research and Extension Institute is exempt from income tax for eight years from the year in which the person starts the relevant activity.

Companies engaging in offshore activities. Offshore business activities may be conducted through GBL companies or companies holding an Authorized Company License (AC companies). AC companies must conduct their activities outside of Mauritius or with such category of persons as may be specified in the Financial Services Commission (FSC) Rules. For this purpose, the categories of persons specified in the FSC Rules are the following:

- An AC company
- A holder of a GBL
- A holder of a GBL1 issued on or before 16 October 2017
- A holder of a GBL2 issued on or before 16 October 2017

AC companies must have their central management and control outside of Mauritius.

Mauritian residents, including GBL companies, are eligible for a foreign tax credit on their foreign-source income. The foreign tax credit is generally the lower of the Mauritian tax and the foreign tax. If the shareholding in the foreign company is 5% or more, an underlying tax credit can be claimed. A tax-sparing credit can also be claimed. Dividends paid to residents and nonresidents and royalties paid by GBL companies out of their foreign-source income to nonresidents are exempt from tax. Interest paid by GBL companies to nonresidents that do not have a place of business in Mauritius is exempt from tax to the extent that the interest is paid out of its foreign-source income. Effective from 1 January 2019, a royalty paid by any company to a nonresident out of its foreign-source income is exempt from tax. GBL1 companies may be considered residents of Mauritius for purposes of double tax treaties.

Under an amendment to the FSA contained in the FMPA 2018, the FSC no longer issues a Category 1 Global Business License (GBL1) from 1 January 2019; instead, it issues a GBL. A GBL company is required to carry on its core income-generating activities (CIGA) in Mauritius and is required to have its central management and control in Mauritius. It should be administered by a management company. Its CIGA must be carried out in Mauritius as a result of the following:

- The direct or indirect employment of a reasonable number of suitably qualified persons
- The fact that it incurs expenses that are proportionate with to its level of activities

The FSA provides that the CIGA for a company with a GBL is supposed to be in Mauritius, but this should be determined in accordance with the Income Tax Act. However, the Income Tax Act does not require the CIGA for a company with a GBL to be in Mauritius. The Income Tax Act only requires that the CIGA to

be in Mauritius in the context of certain exempt income, such as foreign dividend and interest income.

A GBL is exempt from the CSR rules, and any outgoing interest from its foreign-source income is exempt from tax in Mauritius.

If a GBL1 was issued on or before 16 October 2017, the company will be deemed to be a GBL from 1 July 2021; otherwise, it will be deemed to be a GBL from 1 January 2019.

The FSC no longer issues a Category 2 Global Business License (GBL2). The corporate tax exemption for GBL2 companies will terminate on 30 June 2021 if the GBL2 was issued on or before 16 October 2017. The exemption does not apply to income from the following:

- Intellectual property assets acquired from a related party after 16 October 2017
- Intellectual property assets acquired from a third party after 30 June 2018
- New intellectual property assets created after 30 June 2018
- Specific assets acquired or projects started after 31 December 2018, as may be determined by the MRA

A company may be granted the status of Authorized Company by the FSC if all of the following conditions are satisfied:

- A majority of the shares, voting rights or the legal or beneficial interests in the company, other than a bank, are held or controlled by non-Mauritian citizens.
- The company conducts business principally outside of Mauritius or with such category of persons, as may be specified in the FSC Rules.
- The company has its central management and control outside of Mauritius.

An Authorized Company is not supposed to transact in Mauritius. Consequently, it is not generally expected to have Mauritian-source income.

From 1 January 2019, transactions with nonresidents and other GBL companies are not automatically considered to be foreign-source income for GBL1 companies and banks. If a GBL1 has been issued on or before 16 October 2017, the income is considered to be foreign-source income up to 30 June 2021. For a bank, the current definition applies up to the 2019-20 year of assessment.

The presumed foreign tax no longer applies from 1 January 2019. Under transitional rules, it will continue to apply to a GBL1 company up to 30 June 2021 if the GBL1 was issued on or before 16 October 2017. This excludes income from the following:

- Intellectual property assets acquired from a related party after 16 October 2017
- Intellectual property assets acquired from a third party after 30 June 2018
- Intellectual property assets created after 30 June 2018
- Specific assets acquired or projects started after 31 December 2018, as may be determined by the MRA

In the case of banks, the presumed foreign tax will continue to apply up to the 2019-20 year of assessment.

It is no longer possible for certain trusts to deposit a declaration of nonresidence to the MRA that enables such trusts to benefit from an income tax exemption. Under the transitional rules, the exemption continues to apply up to the 2024-25 year of assessment if the trust was set up before 30 June 2021 and deposits a declaration of nonresidence within three months after the expiration of the relevant basis year. The transitional rules do not apply to the following:

- Intellectual property assets acquired from a related party after 30 June 2021
- Intellectual property assets acquired from an unrelated party, or such intellectual property assets newly created after 30 June 2021
- Income from such specified asset acquired, or projects started, after 30 June 2021 as may be determined by the MRA

For the purposes of the transitional rules, intellectual property assets include copyrights of literary, artistic or scientific works; patents, trademarks, designs or models; and plans or secret formulas or processes.

It is no longer possible for a foundation to deposit a declaration of nonresidence to the MRA that enables such trusts to benefit from an income tax exemption. Under the transitional rules, the exemption continues to apply up to the 2024-25 year of assessment if the foundation was set up before 30 June 2021 and deposits a declaration of nonresidence within three months after the expiration of the relevant basis year. The transitional rules do not apply to the following:

- Intellectual property assets acquired from a related party after 30 June 2021
- Intellectual property assets acquired from an unrelated party, or such intellectual property assets newly created after 30 June 2021
- Income from such specified asset acquired, or projects started, after 30 June 2021 as may be determined by the MRA

For the purposes of the transitional rules, intellectual property assets include copyrights of literary, artistic or scientific works; patents, trademarks, designs or models; and plans or secret formulas or processes.

Companies engaged in qualifying activities. Companies engaged in dyeing, knitting, spinning, or weaving activities that began their operations before 30 June 2006 are exempt from income tax for a period of up to 10 income years. If a company began operations during the period of 1 July 2006 through 30 June 2008, its income is exempt from income tax up to and including the income year ended 30 June 2016. Losses incurred during the exemption period may be carried forward to years following the expiration of the exemption period.

A company that subscribes to the stated capital of a spinning company on or before 30 June 2008 for an amount of MUR60 million or more is granted a tax credit equal to 60% of the investment in share capital over a period of either four or six income years. This tax credit is also granted to a company subscribing to the stated capital of a company engaged in dyeing, knitting and weaving activities on or before 30 June 2008 for an

amount of MUR10 million or more. The credit is available beginning in the income year preceding the income year in which the shares are acquired and is spread equally over the four- or six-year period. Any unused portion of the tax credit may be carried forward to subsequent income years, subject to a maximum period of five consecutive income years beginning with the income year of the investment.

Under an amendment contained in the FMPA 2016, a company that has invested MUR60 million or more or at least 20% in the stated capital of a spinning factory, whichever is higher, during the years of 2003 to 2008 is allowed an investment tax credit (ITC) of either 15% of the investment over a four-year period or 10% of the investment over six years. The credit is allowed from the year the investment is made and is reduced by any credit previously claimed with respect to the same investment. A similar form of credit applies to a company that has invested in the stated capital of a company engaged in dyeing, knitting and weaving activities during the same period; the minimum amount of the investment is MUR10 million or at least 20% of the stated capital of the company. The ITC may be carried forward for a consecutive period of six years from the year of the investment and may be applied against any past tax liability; however, no refund is made for tax already paid. The ITC may be set off against the 30% of the tax claimed that was required to be paid for an objection to a notice of assessment to be valid; any excess ITC can be offset against any tax payable from 1 September 2016. The ITC can offset against any past tax liability for any case under dispute. If the ITC is offset against the tax liability for a pending case before any court, judicial or quasi-judicial body, the company should withdraw its case.

Manufacturing companies or companies producing “specified goods or products” can claim a tax credit on the total capital expenditure incurred on the acquisition of new plant and machinery (excluding motor cars) exceeding MUR100 million during the period of 1 January 2014 through 30 June 2016. The annual tax credit equals 5% of the cost of the plant and machinery. The credit is subtracted from the income tax liability in the year of acquisition and the two subsequent income years. Any unrelieved tax credit with respect to an income year may be carried forward to the following income year. The carryforward applies to a maximum of five consecutive income years following the income year in which the capital expenditure is incurred. The following are the “specified goods or products”:

- Computers
- Electrical equipment
- Film
- Furniture
- Jewelry and bijouterie
- Medical and dental instruments, devices and supplies
- Pharmaceuticals or medicinal chemicals
- Ships and boats
- Textile
- Wearing apparel

For tax purposes, manufacturing activities include the following:

- The assembly of parts into a piece of machinery or equipment or other product

- Retreading of used tires
- Recycling of waste

Under an amendment contained in the FMPA 2016, companies engaged in manufacturing activities or companies producing the “specified goods or products” are also allowed a credit in the year of acquisition and the subsequent two years at the following rates for capital expenditure incurred on the following new assets during the period from 1 July 2016 through 30 June 2020.

Asset	Rate of credit (%)
Computers	15
Electronic or optical products	5
Electrical equipment	5
Film	15
Furniture	5
Jewelry and bijouterie	5
Medical and dental instruments, devices and supplies	5
Pharmaceuticals or medicinal chemicals	15
Ships and boats	15
Textiles	15
Wearing apparels	15

Any excess credit may be carried forward to the next year. However, the credit cannot be used in a period beyond 10 years following the year in which the capital expenditure is incurred. If the asset is sold within five years from the date of its acquisition, the credit is clawed back.

A company that invests in the share capital of a subsidiary company engaged in the setting up and management of an accredited business incubator is allowed to claim a credit in the year of investment and the subsequent two years. The credit equals 15% of the amount invested, subject to a maximum amount of MUR3 million. Any excess can be carried forward to the next income year and is clawed back if the shares are disposed of within five years after the year of the investment.

Income of a company incorporated on or after 1 July 2021 and holding an Investment Certificate issued by the EDB is exempt for a period of eight succeeding years from the year the company is incorporated.

Income of a corporation holding a Family Office (Single) Licence or a Family Office (Multiple) Licence issued on or after 1 September 2016 by the FSC is exempt from tax for a period of 10 years from the year the corporation was granted the license, provided that the income is from activities covered under the relevant license and the corporation satisfies the conditions of minimum employment and the substance of its activities as specified by the FSC.

Partial exemption. Eighty percent of the following types of income is exempt from tax from 1 January 2019:

- Foreign dividends
- Interest income received by companies, other than banks
- Profits attributable to a foreign permanent establishment
- Leasing of ships, aircrafts, locomotives and trains, including rail leasing

- Income of a collective-investment scheme (CIS), closed-end fund, CIS manager, CIS administrator, investment advisor, investment dealer or asset manager, set up under the Financial Services Act
- Income of a company from reinsurance and reinsurance brokering activities
- Income of a company from the leasing and provision of international fiber capacity
- Income of a company from the sale, financing arrangement and asset management of aircraft and its spare parts, and related aviation advisory services

The exemption for foreign dividend income applies only if all of the following conditions are satisfied:

- The dividend has been treated as nondeductible in the state of source.
- The receiving company has satisfied its compliance obligations under the Companies Act or the FSA.
- The company must have adequate resources to hold and manage share participations.

The exemption for interest income and ship and aircraft leasing income applies only if all of the following conditions are satisfied:

- The company carries on its core income-generating activities in Mauritius.
- The company employs directly or indirectly an adequate number of suitably qualified persons to conduct its core income-generating activities.
- The company incurs a minimum level of expenditure proportionate with its level of activities.

If a company outsources any relevant activities to third party service providers, the company should be able to demonstrate adequate monitoring of the outsourced activities. The outsourced activities should be conducted in Mauritius. The economic substance of the service providers is not counted multiple times by multiple companies.

A company may opt to apply the credit system instead of the partial exemption if the income has been subject to foreign tax.

Other tax exemptions. Income derived from the operation of an e-commerce platform by a company set up on or before 30 June 2025 and issued an e-commerce certificate by the EDB is exempt from income tax for a period of five years as from the year the company starts its operations provided that the company satisfies such conditions as may be prescribed relating to its substance requirements.

Income derived from the operation of a peer-to-peer lending platform by a person operated under a license issued by the FSC under the FSA is exempt from income tax for a period of five years if the following conditions are satisfied:

- The person started their operations before 31 December 2020.
- The income is from the activities covered by the license.
- The person satisfies the conditions relating to the substance of its activities as specified by the FSC.

Other tax benefits

Tax credit on new plant and machinery. A company engaged in the importation of goods in semi-knocked down form can benefit from a tax credit of 5% on the expenditure incurred on any new plant and machinery during the period from 1 July 2018 to 30 June 2020. The credit applies in the year the capital expenditure is incurred and in the following two years. The credit does not apply if the local value addition incorporated in the goods is less than 20%. Expenditure on motor cars does not qualify for the credit.

If a manufacturing company incurs capital expenditure on new plant and machinery, excluding motor cars, during the period of 1 July 2020 to 30 June 2023, it is entitled to a tax credit of 15% of the total cost in the year of acquisition and the two subsequent years. Any unutilized tax credit may be carried forward to the subsequent year up to a maximum of 10 years following the year the capital expenditure is incurred.

Tax credit to medical, biotechnology or pharmaceutical companies. A manufacturing company engaged in the medical, biotechnology or pharmaceutical sector is entitled to a tax credit based on the capital expenditure incurred on the acquisition of patents. Any unutilized tax credit can be carried forward to subsequent years up to a maximum of five years. The tax credit is withdrawn in total or in part if within five years of the year of acquisition the company ceases to be engaged wholly or mainly in the qualifying activity or the company sells or otherwise transfers the patents.

Additional investment allowance to companies affected by the COVID-19 pandemic. A company that has incurred capital expenditure on the acquisition of new plant and machinery, excluding motor cars, during the period from 1 March to 30 June 2020 is entitled to 100% additional investment allowance provided that it satisfies the MRA that it has been adversely affected by the COVID-19 pandemic.

Extra deduction for emoluments for homeworkers. An extra deduction (that is, the expense is effectively relieved twice for corporate income tax purposes) applies to employers that have full-time homeworkers if the following conditions are satisfied:

- The employer has acquired the necessary information technology system to enable the worker to work from home.
- The employer has more than five homeworkers at any time during the year.
- The monthly emoluments do not exceed MUR100,000.
- The homeworker started to work from home on or after 1 July 2018.
- The emoluments relate to July 2018 or a later month and apply for a period not exceeding 24 months.

Tax credit on information technology system. A tax credit applies to expenditure incurred on an information and technology system for the purpose of employing homeworkers. The credit equals 5% of the expenditure incurred and can be claimed in the year the capital expenditure is incurred and in the following two years.

Investment in nurseries. An expenditure by a company on nurseries is eligible for a 200% deduction.

Capital gains. Capital gains are not subject to income tax. The Finance (Miscellaneous Provisions) Act 2010 (FMPA 2010) introduced a capital gains tax regime for transactions in immovable properties or interests in immovable properties; however, it was repealed by the Finance (Miscellaneous Provisions) Act 2011, effective from 5 November 2011.

Withholding taxes. Withholding taxes apply to certain payments. The tax withheld at source is an interim tax payment that may or may not be the final tax liability. Amounts deducted are credited to the final tax liability of the taxpayer for the relevant tax year.

The following are the withholding tax rates.

Payment	Rate (%) (a)
Interest	15 (b)
Royalties	10/15 (c)
Rent for buildings	5
Commission	3
Payments to contractors and subcontractors	0.75
Payments to accountants or accounting firms, architects, attorneys, barristers, engineers, land surveyors, legal consultants, medical service providers, project managers in the construction industry, property valuers, quantity surveyors, solicitors, tax advisors and their representatives	3
Payments made by a ministry, government department, local authority, statutory body or the Rodrigues Regional Assembly on contracts, other than payments to contractor and subcontractors and payments to service providers specified in the preceding entry above	
For the procurement of goods and services under a single contract, if the payment exceeds MUR300,000	1
For the procurement of goods under a contract, if the payment exceeds MUR100,000	1
For the procurement of services under a contract, if the payment exceeds MUR30,000	3
Payments made to the owner of immovable property or agent, other than a hotel, unless the payments are made to a body of persons specified in Part I of the Second Schedule or a person exempt from income tax as a result of any other enactment, by a tour operator or travel agent, other than an individual, an Integrated Resort Scheme (IRS) or Real Estate Development Scheme (RES) company or a provider of property management services designated by an IRS or RES company, under the Investment (Real Estate Development) Regulations 2007, or any other agent, other than an individual, carrying on the business of providing services with respect to the leasing of properties	5

Payment	Rate (%) (a)
Payments made to nonresidents for services rendered in Mauritius	10
Payment of management fees	
To residents	5
To nonresidents	10
Payments to nonresident entertainers or sportspersons	10

- (a) The withholding taxes do not apply to a company, partnership or succession (estate of a deceased person) with an annual turnover MUR6 million or less, except for the award of a contract for construction works.
- (b) This withholding tax applies to interest paid by any person, other than by a bank or nonbank deposit-taking institution under the Banking Act, to any person, other than a company resident in Mauritius.
- (c) This withholding tax is imposed on residents and nonresidents. The withholding tax rate is 10% for residents and 15% for nonresidents. For a recipient of royalties that is resident in a treaty country, the treaty rate applies if it is lower than 15%. The treaty rate does not apply if the royalty is paid out of the foreign-source income of a company.

If a recipient of a payment proves to the Director-General of the MRA that the recipient is not liable for tax, the Director-General may, by written notice to the payer, direct that no tax be withheld from the payment to the recipient.

Administration. The income year is 1 July to 30 June of the year preceding the year of assessment. Companies may choose a financial year-end other than 30 June for tax purposes. The income year-end was previously 31 December.

Companies are generally required to file their tax returns within six months after their year-end. If the year-end of a company is 30 June and if the company does not have any tax payable, the tax return can be submitted by 15 January of the following year. A company with a 30 June year-end may submit its annual tax return by 31 January in the following year if it has submitted and paid tax for the quarter ending on 30 June.

The FMPA 2016 contains a section on amended tax returns. Under this section, an amended tax return is not allowed if it is submitted more than three years from the end of the year of assessment to which the return relates. The time limit of three years does not apply if the company has underdeclared its income. If an amended tax return is filed, the return for the relevant year is deemed to have been made on the date on which the amended tax return is made. As a result, interest and penalties may apply.

Any tax payable in accordance with the annual return must be paid at the time of filing the return. The Advance Payment System (APS) requires companies to pay tax electronically on a quarterly basis. For purposes of the APS, companies can either use the taxable profits of the preceding tax year or the results of the relevant quarter. A company with annual turnover of MUR10 million or less is not required to pay tax under the APS. The APS requirement also does not apply if the company did not have any chargeable income in the preceding year. Under an amendment contained in the FMPA 2016 with respect to CSR, APS also applies to the contributions that must be made to the National CSR Foundation.

Any company that is engaged in any activity in the tourism sector specified in Part I of the Income Tax Regulations and that has an accounting period ended on any date during the period September 2019 to June 2020 is required to pay half of its tax on or before 29 December 2020 and the remainder on or before 28 June 2021. The same time limit applies to any quarterly tax payment. The companies that are within the scope of Part I of the Income Tax Regulations include hotels, guest houses, travel agencies and amusement parks.

If a payment is late or an incorrect return is filed, a penalty of 5% of the tax payable is imposed. The penalty is reduced to 2% if the taxpayer is a small enterprise with an annual turnover of less than MUR10 million. Interest at a rate of 0.5% for each month or part of a month the tax remains unpaid also applies. In addition, a penalty of MUR2,000 is imposed for each month or part of a month that the annual tax return is late. The penalty is limited to a maximum amount of MUR20,000. The maximum penalty is reduced to MUR5,000 if the taxpayer is a small enterprise with an annual turnover of less than MUR10 million.

After the MRA issues a notice of assessment, the taxpayer may object to the assessment. For an objection to be valid, 10% of the total tax claimed must be paid to the MRA. If the MRA is satisfied that the taxpayer cannot pay the 10% tax, a bank guarantee may be provided. If a notice of determination is issued by the objection department of the MRA, written representations may be made to the Assessment Review Committee. In such a case, 5% of the amount determined in the notice of determination should be remitted to the MRA.

Dividends. Dividends paid to residents and nonresidents are exempt from tax. Dividends should be paid in either cash or shares.

Foreign tax relief. Residents of Mauritius may claim a foreign tax credit (FTC), regardless of whether they may claim other tax credits. The FTC equals the lower of the Mauritian tax liability and the amount of the foreign taxes. In computing the FTC, all foreign-source income may be pooled. An underlying FTC is also available if the residents, including individuals and trusts, own directly or indirectly at least 5% of the share capital of the foreign company. The underlying FTC is extended to all previous tiers. The FTC takes into account any tax sparing credits granted to the payer of the dividends.

C. Determination of trading income

General. Taxable income of resident companies and foreign branches comprises gross income less cost of goods sold and expenses incurred exclusively in the production of income, unless specifically excluded by law. Income and expenses are determined in accordance with generally accepted accounting principles. The levy imposed in accordance with Section 114 of the Gambling Authority Act is not deductible.

Inventories. Inventories may be valued according to International Accounting Standard 2. However, the income tax rules provide that the last-in, first-out (LIFO) method of valuation may not be used.

Provisions. No provisions are allowed for tax purposes.

Tax depreciation. No deduction is allowed for book depreciation of non-current assets, but statutory depreciation (capital allowances) is granted. Mauritian law provides for investment allowances and annual allowances. However, the investment allowance and the additional investment allowances have been repealed and are now available only in limited cases under transitional rules.

Under the transitional rules, a company whose application has been approved under the Investment Promotion Act, or whose proposed activity has been approved under any other enactment, may elect by irrevocable notice in writing to the Director-General to claim annual allowances for capital expenditure incurred on or before 30 June 2009 at the rates prevailing on 30 June 2006. Manufacturing companies may claim additional investment allowances on state-of-the-art technological equipment for acquisitions made in the years ended 30 June 2007 and 30 June 2008. ICT companies may claim additional investment allowances on computer equipment and plant and machinery for acquisitions made on or before 30 June 2008.

The following investment allowances are provided.

Allowance	Rate (%)
Investment allowance on certain new assets, including industrial buildings, office equipment, plant and machinery, and buses with a seating capacity of at least 30	25
Additional investment allowance for a manufacturing company that has incurred capital expenditure on the acquisition of state-of-the-art technological equipment in the year ended 30 June 2008	10
Additional investment allowance for an ICT company that incurs capital expenditure on the acquisition of new plant and machinery or computer software	25

The following are the rates of annual allowances computed using the declining-balance method.

Asset	Rate (%)
Hotels	30
Plant and machinery	35
Heavy equipment (such as agricultural tractors or excavators)	35
Computer hardware, peripherals and computer software	50
Motor vehicles	25
Setting up of golf courses	15

The following are the rates of annual allowances computed using the straight-line method.

Asset	Rate (%)
Commercial premises	5
Green technology equipment	50
Landscaping and other earthwork for embellishment purposes	50
Industrial premises excluding hotels	5

Asset	Rate (%)
Any item of a capital nature not listed above that is subject to depreciation under the normal accounting principles	5
Plant and machinery costing MUR60,000 or less	100
Aircraft and aircraft simulators leased by aircraft leasing companies	100
Electronic, high-precision machinery or equipment and automated equipment	100

The following are the rates of annual allowances for capital expenditure incurred during the period from 1 January 2013 through 30 June 2018.

Asset	Rate (%)
Industrial premises dedicated to manufacturing	30
Plant and machinery costing MUR60,000 or less	100
Electronic and high-precision equipment	50
Plant and machinery, except passenger cars, acquired by a manufacturing company	50
Scientific research	50

Except for the annual allowance rates on industrial premises, the above rates will be applied on a straight-line basis.

For the purposes of the annual allowances, green technology equipment includes the following types of equipment:

- Renewable energy equipment
- Energy-efficient equipment or noise-control devices
- Water-efficient plant and machinery and rainwater harvesting equipment and systems
- Pollution-control equipment or devices, including wastewater recycling equipment
- Effective chemical hazard control devices
- Desalination plant
- Composting equipment
- Equipment for shredding, sorting and compacting plastic and paper for recycling
- Equipment and machinery used for eliminating, reducing or transforming industrial waste

Any unused annual allowances that arise as a result of the above increased rates can be carried forward indefinitely. Expenditure on passenger cars is not eligible for increased annual allowances.

Capital allowances are subject to recapture on the sale of an asset to the extent the sales price exceeds the tax value after depreciation. Amounts recaptured are included in ordinary income and are subject to tax at the normal tax rate. To the extent that the sales price is lower than the depreciated value, an additional allowance is granted.

Under an amendment contained in the Finance (Miscellaneous Provisions) Act 2010, the total annual allowances on a motor car cannot exceed MUR3 million. The MUR3 million cap does not apply to persons engaged in the business of tour operator or car rental.

Expenditure on deep ocean water air conditioning. Expenditure on deep ocean water air conditioning is eligible for a 200% deduction over a period of five years from the year of the incurrence of

the expenditure. This measure is effective as from 1 July 2017. A tax loss resulting from expenditure on deep ocean water air conditioning is not subject to the five-year restriction on the utilization of tax losses (see *Relief for losses*).

Expenditure on water desalination plant. Expenditure on the acquisition and setting up of a water desalination plant is eligible for a 200% deduction from 1 July 2017. A tax loss that results from expenditure on a water desalination plant is not subject to the five-year restriction on the utilization of tax losses (see *Relief for losses*).

Research and development. Any qualifying expenditure on research and development (R&D) incurred during the period of 1 July 2017 through 30 June 2027 (the qualifying period) is eligible for a 200% deduction if the relevant expenditure is directly related to an existing trade or business and if the R&D is carried on in Mauritius. If the qualifying expenditure incurred during the qualifying period does not relate to an existing trade or business, the MRA may allow the expenditure. The qualifying expenditure relates to any R&D and specifically includes expenditure on innovation, improvement or development of a process, product or service, staff costs, consumable items, computer software directly used in R&D and subcontracted R&D. The time limit of five years on the utilization of tax losses does not apply to a tax loss resulting from the 200% deduction.

Expenditure on cleaning, renovation and embellishment works. A company operating a hotel can deduct 150% of any expenditure on cleaning, renovation and embellishment work in the public realm.

Expenditure on arbitration, conciliation or mediation under an Alternative Dispute Resolution Mechanism. Expenditure on filing fees for the purposes of filing a request for arbitration, conciliation or mediation is eligible for 150% deduction if the application is made to a recognized arbitration institution, such as the Mauritius International Arbitration Centre, the Mauritian Chamber of Commerce and Industry Arbitration and Mediation Centre or the Mediation Division of the Supreme Court of Mauritius.

Expenditure incurred by manufacturing companies on products manufactured locally by small enterprises. Expenditure on the direct purchase of products manufactured locally by small and medium enterprises whose yearly turnover does not exceed MUR50 million is eligible for an extra deduction of 10% of the expenditure incurred.

Expenditure on international accreditation. A company registered as a health institution under the Private Health Institutions Act is eligible for an extra deduction on any expenses incurred on international accreditation.

Expenditure on market research and product development for the African market. A manufacturing company is eligible for an extra deduction on any expenditure on market research and product development for the African market.

Expenditure on specialized software and systems. Expenditure incurred on the acquisition of specialized software and systems

by a company is eligible for a 200% deduction provided that the company has not treated the software as an asset for tax purposes. The new regulation broadly provides the following:

- The amount eligible for the extra deduction
- Timing of expenditure
- Use of the software
- Components of the software
- Cases in which software is considered as specialized software (positive list)
- Cases in which software is not considered as software (negative list)

The new regulations provide that the specialized software must meet the following conditions:

- It must be acquired on or after 1 July 2021.
- It must be used in business for income-producing activities.
- It must have a lifetime exceeding one year.

The term software comprises the following:

- Non-customized software available to the general public under a non-exclusive license
- Software acquired from a third-party contractor who is at economic risk should the software not perform
- Software that is leased
- Such other type of software as may be approved by the Minister of Finance and Economic Development

The eligible deduction shall be with respect to the cost of the following:

- Purchase or lease of the software
- Installation of the software on the taxpayer's computer hardware
- Configuration of the software to the taxpayer's needs

The expenses qualifying for the extra deduction must exceed MUR100,000, with a maximum of MUR100 million in any year.

Positive list. Specialized software includes software used in relation to the following:

- Additive manufacturing
- Optimization of manufacturing processes, including production planning and execution
- Robotics
- Artificial intelligence
- Simulation
- Augmented and virtual reality
- Horizontal and vertical system integration
- Industrial internet of things
- Cybersecurity
- Big data and analytics, including efficient data sharing
- Cloud technology
- Digitization outreach to customers
- Enable work from home
- Improve energy efficiency
- Engineering tools
- Product lifecycle management

Negative list. Qualifying expenditure for the double deduction does not include expenditure on the following:

- Hardware

- Operating system software
- Software performing general and administrative functions such as payroll, bookkeeping, personnel management, spreadsheets, word processing, presentation tools or providing non-computer services such as accounting, banking services and auditing
- Programming software
- Database software
- Basic enterprise resource planning and customer relationship management software
- Websites
- Mobile applications
- Gaming software, including computer games
- Point-of-sale system

Relief for losses. Losses can be offset against future corporate income in the following five income years. Losses attributable to annual allowances claimed with respect to assets acquired on or after 1 July 2006 can be carried forward indefinitely. Losses may not be carried back. Under an amendment contained in the FMPA 2016, the claiming of an excess loss is subject to a penalty of 5% of the excess amount.

If a company takes over a company engaged in manufacturing activities or if two or more companies engaged in manufacturing activities merge into one company, any unrelieved losses of the acquired company or merging companies may be transferred to the acquirer or to the company resulting from the merger in the income year of the takeover or merger, subject to certain conditions relating to the safeguarding of employment or to such other terms and conditions that may be established by the MOFED. The loss transferred is withdrawn if, within three years from the date of the takeover or merger, more than 50% of the employees is made redundant. The FMPA 2016 extended the scope of this provision to a transaction in which a company takes over or acquires the whole or part of the undertaking of another company if the MOFED has deemed such transaction to be in the public interest. If a change of more than 50% in the shareholding of a manufacturing company occurs, the tax loss may nevertheless be carried forward if the MOFED certifies that the change in the shareholding is in the public interest and is satisfied that there is compliance with the conditions relating to the safeguard of employment. In addition, if there is a change in the shareholding of more than 50% in a manufacturing company or in a company facing financial difficulty, any unrelieved tax loss may be carried forward if the MOFED is satisfied that the conditions relating to the safeguard of employment or other conditions that the MOFED may impose are complied with by the company.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	15
Social Contribution	
Employer contribution	
Monthly salary up to MUR50,000	1.5
Monthly salary up to MUR50,000	3

Nature of tax	Rate (%)
Employee contribution	
Monthly salary up to MUR50,000	3
Monthly salary more than MUR50,000	6
Land transfer tax; payable by transferor based on the value of the immovable property transferred; also applies to transfers of shares that result in a change in control of a company that owns immovable property	5
Tax on transfer of leasehold rights in state land; based on the open market value of the leasehold rights; payable equally by the transferor and the transferee	20
Registration duty; payable on the registration of certain transactions, such as the sale of land; based on the value of the property transferred; payable by the transferee; certain transactions are not subject to the duty	5

E. Miscellaneous matters

Foreign-exchange controls. The Exchange Control Act was suspended in 1993. Consequently, approval of the Bank of Mauritius is no longer required for transactions involving foreign exchange.

Anti-avoidance legislation. Anti-avoidance provisions apply to interest on debentures issued by reference to shares, excessive remuneration to shareholders or directors, benefits to shareholders, excessive management expenses, leases with inadequate rent, rights over income retained and other transactions designed to avoid tax liability. Certain of these items are discussed below.

Interest on debentures issued by reference to shares. If a company issues debentures in the proportion of shares held by each shareholder, the interest on the debentures is treated as a dividend and is therefore not an allowable deduction for the company. The 2004 Finance Act provides that such interest on the debentures is not treated as a dividend for the shareholder.

Benefits to shareholders. If a benefit of any nature, whether in money or money's worth, is granted by a company to a shareholder or a party related to the shareholder, the value of the benefit is deemed to be a taxable benefit in the hands of the shareholder or the related party.

Rights over income retained. If a person transfers property or any right to income to a related party and retains or obtains power to enjoy income from the property or the right, the income is deemed to be derived by the transferor.

Controlled foreign companies. A foreign entity is considered to be a controlled foreign company (CFC) if its non-distributed income arises from non-genuine arrangements that have been implemented for the essential purpose to obtain a tax benefit. A foreign company is considered to be a CFC if more than 50% of its participation rights are held directly or indirectly by the Mauritian resident company and its "related parties." For this purpose, related parties are the following:

- An entity in which the Mauritian resident company holds directly or indirectly a participation of voting rights, capital or entitlement to profit of at least 25%

- An individual or entity that holds directly or indirectly a participation of the voting rights or capital ownership in the company of at least 25% of the profits of the company

The income to be attributed to the Mauritian resident company should be consistent with the arm's-length principle and be limited to the assets and risks linked to the significant people functions carried on by the controlling company. The foreign tax credit applies in connection with any foreign tax suffered by the CFC.

A company is not regarded as a CFC if any of the following conditions are satisfied:

- The accounting profit and non-trading income are both less than EUR750,000.
- The accounting profit is less than 10% of its operating costs.
- The tax rate in the country of residence of the CFC is more than 50% of the tax rate in Mauritius.

COVID-19 Levy. A company that has benefited from the allowance under the Wage Assistance Scheme is required to repay the allowance through the COVID-19 Levy over a period of two years. The levy is restricted to a maximum of 15% of the taxable profits of the company before any tax loss brought forward.

F. Treaty withholding tax rates

Under Mauritian domestic law, dividends paid to resident and nonresident shareholders are exempt from tax. Royalties payable to nonresidents are exempt from tax insofar as the royalties are payable to a nonresident out of the foreign-source income of a company. Interest payments are exempt from tax if they are paid by Mauritian banks or GBL companies to nonresidents out of their foreign source income to nonresidents that do not have a place of business in Mauritius. The table below lists the tax rates for dividends, interest and royalties under the tax treaties entered into by Mauritius. However, Mauritian domestic law prevails if it exempts the payments from tax.

Recipient's country of residence	Dividends %	Interest %	Royalties %
Bangladesh	10	15	15
Barbados	5	5	5
Belgium	5 (i)	0/10	0
Botswana	5 (j)	12	12.5
Cape Verde	0/5 (w)	10	7.5

United Arab Emirates	0	0	0
United Kingdom	10 (c)	15 (f)	15 (d)
Zambia (y)	5 (q)	10	5
Zimbabwe	10 (e)	10 (f)	15
Non-treaty jurisdictions	0	0/15 (m)	0/15 (n)

- (a) Applicable if the recipient has a direct shareholding of at least 10% of the capital of the Mauritian company; otherwise, the rate is 15%.
- (b) Applicable if the recipient has a direct shareholding of at least 25% of the capital of the Mauritian company; otherwise, the rate is 15%.
- (c) Applicable if the recipient has a direct or indirect shareholding of at least 10% of the capital of the Mauritian company; otherwise, the rate is 15%.
- (d) The reduced rate applies only if the royalties are subject to tax in the United Kingdom.
- (e) Applicable if the recipient controls directly or indirectly 25% of the voting power of the Mauritian company; otherwise, the rate is 20%.
- (f) The rate is 0% if the interest is paid to a bank resident in the treaty country (subject to additional conditions) and, under the France treaty, if the loan is made or guaranteed by the Banque Française du Commerce Extérieur.
- (g) The rate is 0% for literary, artistic or scientific copyright royalties and for royalties for the use of motion picture films or works recorded for broadcasting or television.
- (h) Applicable if the recipient is the beneficial owner of the dividends and if the payer of the dividends is a venture capital company; otherwise, the rate is 10%.
- (i) Applicable if the recipient is a company that holds at least 10% of the voting power of the company paying the dividends. Otherwise, the rate is 15% if the shareholder is the beneficial owner of the dividend income. The limitations-of-benefits clause of the tax treaty should be considered.
- (j) Applicable if the recipient has a direct or indirect shareholding of at least 25% of the capital of the Mauritian company; otherwise, the rate is 10%.
- (k) Applicable if the recipient has invested at least USD500,000 in the authorized capital of the payer of the dividends; otherwise, the rate is 10%.
- (l) This treaty has been signed, but it has not yet been ratified.

- (m) Interest paid by GBL1 companies to nonresidents or by Mauritian banks to nonresidents is exempt. Interest paid by other resident companies to nonresidents is taxed at a rate of 15%.
- (n) Royalties paid by GBL1 companies to nonresidents are exempt from tax. Royalties paid by other companies to nonresident companies are subject to tax at a rate of 15%.
- (o) The 5% rate applies if the recipient of the dividends holds directly at least 15% of the capital of the payer. The 10% rate applies if the recipient of the dividends holds directly at least 10%, but less than 15%, of the capital of the payer. The 15% rate applies to other dividends.
- (p) The 10% rate applies if the recipient of the interest is a financial institution or an insurance company. The 15% rate applies to other interest payments.
- (q) The 5% rate applies if the recipient is a company that owns at least 25% of the share capital of the paying company. Otherwise, the rate is 15%.
- (r) The 5% rate applies if the recipient is a company with a shareholding of at least 10%. Otherwise, the rate is 15%.
- (s) The 5% rate applies if the recipient owns less than 25% of the company paying the dividends.
- (t) The 5% rate applies if the recipient is a company with a shareholding of at least 10%. Otherwise, the rate is 10%.
- (u) The 0% rate applies if the interest arises on a debt instrument listed on the Stock Exchange of Mauritius, the Johannesburg Stock Exchange or any other stock exchange agreed to by the competent authorities of the contracting states.
- (v) The 5% rate applies if the recipient is a company with a direct or indirect shareholding of at least 25% in the share capital of the paying company. Otherwise, the rate is 10%.
- (w) The 5% rate applies if the recipient is the beneficial owner of the dividends and owns less than 25% of the share capital of the company.
- (x) The 5% rate applies if the recipient is a company with a direct shareholding of at least 10% in the share capital of the paying company. Otherwise, the rate is 7.5%.
- (y) The tax treaty has been terminated and the year ending 30 June 2021 is the last year of application in Mauritius.
- (z) The right to tax rests with the country of residence if the recipient is a company. Interest is not subject to tax in Estonia if it is paid to the following:
- The government of Mauritius or a local authority thereof
 - The Bank of Mauritius
 - Any institution wholly or mainly owned by the Republic of Mauritius as may be agreed from time to time by the competent authorities of the contracting states

Interest is not subject to tax in Mauritius if it is paid to the following:

- The government of Estonia or a local authority thereof
- The Bank of Estonia
- The Rural Development Foundation
- The Foundation KredEx
- The Enterprise Estonia Foundation
- Any institution wholly or mainly owned by the government of Estonia as may be agreed from time to time between the competent authorities of the contracting states

Interest is also exempt from tax in Estonia or Mauritius, as the case may be, if it is paid to an investment fund established in and supervised by the state of Estonia or Mauritius, as the case may be.

Tax treaties with Angola, Côte d'Ivoire, Gambia, Gibraltar and Malawi await signature. Mauritius is negotiating tax treaties with Algeria, Burkina Faso, Canada, the Czech Republic, Greece, the Hong Kong Special Administrative Region, Iran, Mali, Montenegro, Portugal, St. Kitts and Nevis, Saudi Arabia, Senegal (to replace the existing treaty), Spain, Sudan, Tanzania, Turkey, Vietnam, Yemen and Zambia (to replace the existing treaty; also, see footnote [y] above).

From Railroad Cars	5 (d)
Branch Remittance Tax	10 (c)

Net Operating Losses (Years)

Carryback	0
Carryforward	10

- A 10% tax is imposed for employee profit sharing (see Section D).
- The capital tax rate for foreign residents may be 25% or 35% (see Section B).
- This tax applies to dividends paid out of profits generated after 2013 (see Section B).
- This is a final tax applicable to nonresidents. Payments to tax havens are generally subject to a 40% withholding tax.
- This rate can be reduced to 4.9% if certain requirements are met.
- A reduced rate of 4.9% is granted each year to banks resident in treaty countries.

B. Taxes on corporate income and gains

Corporate income tax. Corporations resident in Mexico are taxable on their worldwide income from all sources, including profits from business and property. A nonresident corporation in Mexico is subject to profits tax on income earned from carrying on business through a permanent establishment in Mexico and on Mexican-source income. Corporations are considered residents of Mexico if their principal place of management is located in Mexico.

Corporations are taxed on profits in Mexico by the federal government only. Resident corporations are not subject to tax on dividends received from other Mexican residents. Dividends paid to individuals and nonresidents are subject to a 10% withholding tax.

The income tax law recognizes the effects of inflation on the following items and transactions:

- Depreciation of fixed assets
- Cost on sales of fixed assets
- Sales of capital stock (shares)
- Monetary assets and liabilities
- Tax loss carryforwards

The tax basis of investments in capital stock may be adjusted for inflation at the time of capital stock reductions or liquidation. Taxes are also indexed for inflation in certain circumstances.

Tax rate. Corporations are subject to federal corporate income tax at a rate of 30%.

Capital gains. Mexican tax law treats capital gains obtained by Mexican corporate residents as normal income and taxes them at the regular 30% tax rate. However, losses on sales of shares are restricted and may only be used to offset gains from the sale of shares. Nonresidents are subject to a 25% tax rate on gross income or, if certain requirements are met, a 35% rate on net income from the sale of shares. Capital gains derived from sales of publicly traded shares by individuals or non-Mexican residents are taxed at a rate of 10%. To determine the deductible basis for sales of real estate, fixed assets and shares, the law allows for indexation of the original cost for inflation.

Administration. The tax period always ends on 31 December and cannot exceed 12 months. The tax return must be filed by the end of the third month following the tax year-end. Monthly tax installments must be paid during the corporation's tax year.

Dividends. Resident individuals and nonresident shareholders of a Mexican corporation are subject to a 10% income tax on dividends received that are paid out of profits generated after 2013. Dividends are not subject to corporate income tax at the distributing company level if the distribution is from previously taxed earnings and if the distributing corporation has sufficient accumulation in its “net after-tax profit” (CUFIN) account to cover the dividend. If the dividend is in excess of the CUFIN account, the dividend is also taxed at the distributing company level at a rate of 30% on a grossed-up basis. The following is an illustration of how to compute the annual net after-tax profit for the CUFIN account.

	MXN
Corporate taxable income	1,000
Income tax (30%)	(300)
Paid profit sharing to employees (estimated)	(150)
Nondeductible expenses	<u>(50)</u>
Net after-tax profit added to the CUFIN account	<u>500</u>

If the CUFIN balance is not sufficient to cover an earnings distribution, the remaining amount triggers corporate income tax on the dividend grossed up by a factor of 1.4286. The corporate income tax rate is then applied to the grossed-up dividend. The following is an illustration of the calculation.

	MXN
<i>Calculation of excess dividend</i>	
Amount of dividend	700
Dividend from CUFIN	<u>500</u>
Excess dividend	<u>200</u>
<i>Tax on excess dividend</i>	
Grossed-up income (Gross-up factor of 1.4286 x excess dividend of MXN200)	<u>285.72</u>
Tax at 30%	<u>85.72</u>

Income tax paid on distributed profits in excess of the CUFIN balance may be credited against corporate income tax in the year in which the dividend is paid and in the following two years.

Similar rules apply to remittances abroad by branches of foreign corporations.

Foreign tax relief. A tax credit is allowed for foreign income tax paid or deemed paid by Mexican corporations, but the credit is generally limited to the amount of Mexican tax incurred on the foreign-source portion of the company’s worldwide taxable income. This calculation must generally be made on a country-by-country basis.

C. Determination of trading income

General. Taxable profits are computed in accordance with generally accepted accounting principles, with certain exceptions, including the following:

- Nondeductibility of penalties and unauthorized donations

- Nondeductibility of increases to reserves for bad debts, obsolescence, contingencies, indemnities and so forth
- Monetary gain on debts, and monetary loss on credits, to recognize the effect of inflation
- Nondeductibility of 53% of exempt salaries (percentage may be decreased to 47% if the exempt salaries are not reduced from previous year)
- Nondeductibility of payments to residents of low-tax jurisdictions, unless business activity and substance requirements are met

Employee profit-sharing (see Section D) is effectively deductible.

Inventories. Inventories are deducted on a cost-of-sales basis.

Depreciation. The straight-line method is used to depreciate tangible fixed assets and to amortize intangible assets. Depreciation must be computed using the annual percentages set by law. The depreciation of new assets must be computed on a proportional basis relating to the months in which the assets are used. Depreciation is computed on original cost of fixed assets, with the amount of depreciation indexed for inflation as measured by price indices.

The following are the maximum annual depreciation rates for certain types of assets.

Asset	Rate (%)
Buildings	5
Motor vehicles	25
Office equipment	10
Computers	
Mainframe equipment	30
Peripheral equipment	30
Plant and machinery	
General rate	10
Machinery and equipment used in the generation and distribution of electricity	5
Machinery and equipment used in the mining industry	12
Machinery and equipment used in the construction industry	25
Machinery and equipment related to hydrocarbon infrastructure	10
Environmental machinery and equipment	100

Relief for losses. Net operating losses may be carried forward for 10 years.

Groups of companies. A Mexican holding company may obtain an authorization to effectively compute income tax on a consolidated basis (integration regime), but each company of the group is responsible for filing and paying the tax individually. This option is subject to several rules and limitations, including a recapture of benefits.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods or services and on imports	
General rate	16
Certain foods and medicines and exports	0
Excise tax, on the supply of goods or services, excluding exports, and on imports; goods and services subject to tax include food with high caloric density, alcoholic beverages, alcohol, tobacco, gasoline, diesel and telecom services	Various
Real estate acquisition tax; local tax on market value of real estate transferred (approximate rates)	2 to 4.5
State tax on salaries	2 to 3
Residence tax, on each employee's salary (approximate rate)	5
Employee profit sharing, on taxable profits of resident entities and permanent establishments of nonresident entities (loss carryforwards may not be deducted)	10
Social security contributions, on salaries up to a specified amount; paid by	
Employer (approximate rate)	15
Employee (approximate rate)	4

E. Miscellaneous matters

Foreign-exchange controls. Mexico has no foreign-exchange controls.

Mandatory Disclosure Regime. Since 2020, disclosure of certain schemes considered as aggressive tax planning is required. Penalties up to 75% and denial of tax benefits may be imposed.

Transfer pricing. Mexico has transfer-pricing rules based on Organisation for Economic Co-operation and Development (OECD) standards. Acceptable transfer-pricing methods include the comparable uncontrolled price method, the resale price method, the cost-plus method, the profit-split method, the residual profit-split method and the transactional net-margin method. In certain cases, specific appraisals are used. Transactions between related parties are subject to greater scrutiny. It may be possible to reach transfer-pricing agreements in advance with the tax authorities. These agreements may apply for a period of up to five years.

Under the 2016 tax reform, beginning in 2016, certain Mexican taxpayers must file additional transfer-pricing documentation, including a Local File, a Master File and Country-by-Country Reports, as inspired by Action 13 of the Base Erosion and Profit Shifting report.

Interest expense limitation rules. Interest deductions on cross-border related-party debt may be disallowed if the debt-to-equity ratio exceeds 3 to 1. In addition, as a general rule, net interest expense cannot exceed 30% of taxable earnings before interest, taxes, depreciation and amortization.

Anti-abuse rules. Mexico has enacted a general anti-abuse rule that allows the tax authorities in certain instances to recharacterize transactions that lack business purpose. In addition, a business purpose is required for most reorganization transactions to be considered tax free.

F. Treaty withholding tax rates

Non-treaty jurisdictions	10	4.9/10/21/35 (i)	25/35 (i)

(a) The lower rate applies if the recipient is a corporation owning at least 25% (20% under the Brazil treaty) of the shares of the payer. Under the Panama treaty, the lower rate applies if the recipient owns at least 25% of the shares of the payer.

(b) These treaties have a most favorable nation (MFN) clause with respect to interest and/or royalties. Under the MFN clause in the Chile treaty, the withholding tax rate for interest may be reduced to 5% for banks or 10% for other recipients and the withholding tax rate for royalties may be reduced to 10%, if Chile enters into a tax treaty with another country that provides for a lower withholding tax rate than 15% for such payments. Under the MFN clause in the France treaty, the withholding tax rate for interest and royalties is reduced if Mexico enters into a tax treaty with an OECD member that provides for withholding tax rates that are lower than the rates under the Mexico-France treaty. However, the rate may not be lower than 10% if the OECD member country is not a member of the European Union (EU). Under the Italy treaty, the MFN clause applies only to interest. It may reduce the withholding tax rate for interest to as low as 10% only if Mexico enters into a treaty with an EU country that provides for a withholding tax rate for interest of less than 15%. Under the MFN clause in the Spain treaty, the withholding tax rates for interest and royalties may be reduced if Mexico enters into a tax treaty with an EU country that provides for withholding tax rates that are lower than the rates under the Mexico-Spain treaty. Under the Brazil treaty, if this country agrees with another country regarding a lower rate for dividends, interest or royalties, such rate will apply. For interest and royalties, the applicable rate may not be lower than 4.9% and 10%, respectively. Under the New Zealand treaty, if this country agrees with another country regarding a lower rate for dividends, such rate will apply. Under the MFN clause in the Colombia treaty, the withholding tax rate for royalties related to technical services and assistance will be automatically reduced if Colombia enters into a tax treaty with a third country that provides a lower rate. The standard rate for interest and for patent and know-how royalties under all of the above treaties is generally 15%. However, as a result of the operation of the MFN clause, the lower rates listed in the table may apply in certain circumstances.

(c) The 0% rate applies if the recipient of the dividends is the effective beneficiary of the dividends. The 5% rate applies if the recipient is a company that is resident in France and if more than 50% of such recipient is owned by residents of countries other than France or Mexico.

- (d) The 5% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer. Under the US treaty, the 0% rate applies if the recipient owns 80% of the voting shares and if other requirements are met. Under the Switzerland treaty, the 0% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer or if the beneficiary of the dividend is a pension fund. Under the Sweden treaty, the 0% rate applies if the recipient is a corporation owning at least 25% of the voting shares of the payer of the dividends and if at least 50% of the voting shares of the company that is the effective beneficiary of the dividends is owned by residents of that contracting state. Under the Luxembourg treaty, the 8% rate applies to Mexico if the recipient is a corporation that owns at least 10% of the voting shares of the payer.
- (e) The 10% rate applies to interest derived from loans granted by banks and insurance companies. Under the Germany treaty, the 10% rate also applies to interest paid to pension funds. Under the Australia and Japan treaties, the 10% rate also applies to interest paid on bonds or with respect to sales by suppliers of machinery and equipment. Under the Poland treaty, the 10% rate also applies to interest paid on publicly traded securities.
- (f) The 5% rate applies if the recipient is a corporation that owns at least 10% of the shares of the payer and if the tax levied in Israel is not less than the corporate tax rate.
- (g) The effective beneficiary of royalties is subject to withholding tax on the gross payments. Royalties on cultural works (literature, music and artistic works other than films for movies or television) are not subject to withholding tax if they are taxed in the recipient's country.
- (h) A 10% rate applies to interest paid on bank loans or publicly traded bonds, as well as to interest paid with respect to sales by suppliers of machinery and equipment.
- (i) See Section A and the applicable footnotes in the section.
- (j) The 5% rate applies if the beneficial owner of the interest is a bank or insurance company or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to interest paid by a bank or by a purchaser with respect to a sale on credit of machinery if the seller is the beneficial owner of the interest. The 15% rate applies to other interest.
- (k) The 0% rate applies if the recipient is a corporation owning at least 10% of the shares of the payer.
- (l) Under Mexican domestic tax rules, dividends are subject to a 10% withholding tax rate. As a result, treaty rates in excess of the 10% rate should not apply.
- (m) Beginning in the sixth year the treaty is in effect, the 15% rate is reduced to 10% if the beneficial owner of the interest is a bank. For the first five years, however, the 15% rate applies to such interest.
- (n) The lower rate applies if the beneficial owner of the interest is a bank. Under the Colombia treaty, a 0% rate also applies if the beneficial owner of the interest is an insurance company. Under the Estonia treaty, the 4.9% rate also applies if the beneficial owner is a pension fund.
- (o) The 5% rate applies if the recipient is a corporation owning at least 25% of the shares of the payer. The 0% rate applies if the condition described in the preceding sentence is satisfied and if both of the following conditions are satisfied:
- The recipient's shares are regularly traded on a recognized stock exchange.
 - More than 50% of the recipient's shares are owned by one or any combination of the following:
 - The state of residence of the recipient.
 - Individuals resident in the state of residence of the recipient.
 - Corporations resident in the state of residence of the recipient if their shares are traded on a recognized stock exchange or if more than 50% of their shares are owned by individuals resident in the state of residence of the recipient.
- (p) The 5% rate applies if the interest is derived from loans granted by banks, pension funds or insurance companies or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest.
- (q) The 10% rate applies to interest derived from loans granted by banks.
- (r) The 4.9% rate applies if the beneficial owner of the interest is a bank or insurance company or if the interest is derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies to other interest.
- (s) Under a protocol to the treaty with the Netherlands, the 5% rate is reduced to 0% if the dividends are paid on a shareholding that qualifies for the participation exemption under the corporate tax law of the Netherlands.

- (t) The 10% rate applies if the beneficial owner of the interest is a bank.
- (u) The 5% rate applies if the recipient is a corporation owning at least 20% of the shares of the payer.
- (v) The treaty does not limit the withholding tax rate on this income.
- (w) Dividends are taxed only in the country of residence of the recipient.
- (x) In general, dividends are exempt if the beneficial owner is resident in the United Kingdom. However, if the dividend derives from rental income from real property located in Mexico through an investment vehicle and if the majority of the rents are distributed annually and are not subject to tax, the dividend rate may not exceed 15%.
- (y) The 5% rate applies if the recipient owns at least 70% of the capital of the distributing company. The 10% rate applies if the recipient owns at least 10%. The 15% rate applies in all other cases.

(a) See Section B.

(b) In general, a 6% withholding tax applies to dividends paid to nonresidents and residents. A 15% rate applies to dividends related to the 2008 through 2011 fiscal years.

(c) A 3% withholding tax rate is applied to interest from deposits and securities paid to resident individuals by banks, savings and loan associations, and issuers of corporate securities.

(d) A 12% withholding tax rate applies to royalties paid to nonresidents and to resident individuals.

(e) This withholding tax applies to services rendered by nonresidents and to certain payments made to resident individuals.

- (f) The 6% rate applies to a list of agricultural products. The 12% rate applies to other types of goods acquired from resident individuals (with certain exceptions).
- (g) This withholding tax applies to insurance premiums paid to nonresidents.
- (h) The 18% rate applies to winnings from gambling. A 12% rate applies to winnings from advertising campaigns paid to nonresidents. The amount that exceeds MDL27,000 of winnings from advertising campaigns paid to residents is also subject to a 12% withholding tax. A 0% rate applies to the amount of winnings from lotteries paid to residents up to MDL270 per winning.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide income. Resident companies are companies with activities managed or organized in Moldova (an activity is organized in Moldova if it is carried out by a company that is registered in Moldova as a legal entity) and companies that carry out their business activities primarily in Moldova.

Permanent establishments of nonresident companies in Moldova are subject to tax on their income from Moldovan sources. For tax purposes, permanent establishments are considered to be resident entities.

Rates of corporate income tax. The rates of corporate income tax in Moldova are described below.

Standard corporate income tax rate. The standard corporate income tax rate in Moldova is 12%.

Small and medium-sized companies (except for farmers and individual entrepreneurs) that are not registered as value-added taxpayers. The following are the tax rates applicable to small and medium-sized companies (except for farmers and individual entrepreneurs):

- If the company is not registered as a value-added tax (VAT) payer, it can choose to be taxed at a 4% tax rate applied to the income established according to the statutory books in the current reporting period or at the standard corporate income tax rate of 12% in the following cases:
 - In the previous fiscal reporting period (ending 31 December), the company obtained income from VAT-exempt supplies or income both exempt from VAT and taxable in an amount up to MDL1,200,000, provided that the supplies exempt from VAT exceeded 50% of the taxable supplies.
 - In the previous fiscal reporting period (ending 31 December), the company did not obtain any income.
 - The company is registered during the current fiscal reporting period.

The 4% tax rate applies to the total amount of income registered in the statutory books during the current reporting period, except for certain items of income that are exempt from tax in accordance with local tax legislation.

- If the company becomes a VAT payer, it must apply the standard corporate income tax rate of 12%.

Farmers. The income tax rate for farmers is 7%.

Individual entrepreneurs. For individual entrepreneurs, the income tax rate is 12% of annual taxable income.

Tax incentives. The main tax incentives available in Moldova are described below.

Free-economic zones. Residents of free-economic zones benefit from the following incentives:

- A 50% reduction of the standard corporate profits tax rate on income derived from the exportation outside Moldova of goods originating in the free-economic zone
- A 25% reduction of the standard corporate profits tax rate on income other than the income indicated in the preceding bullet
- A three-year exemption from corporate profits tax on income derived from the exportation of goods originating in a free-economic zone, beginning with the quarter following the quarter in which investments made in fixed assets or in the development of the free-economic zone infrastructure are at least of USD1 million
- A five-year exemption from corporate profits tax on income derived from the exportation of goods originating in a free-economic zone, beginning with the quarter following the quarter in which investments made in fixed assets or in the development of the free-economic zone infrastructure are at least of USD5 million

Residents that benefited from exemptions mentioned in the third and fourth bullets above and that make additional investments in fixed assets or in the development of the free-economic zone infrastructure are entitled to benefit repeatedly from a corporate profits tax exemption on income derived from the exportation of goods originating in a free-economic zone beginning with the quarter following the quarter in which the required amount of additional investments is reached, if the average number of employees registered in the calendar year following the year in which the required amount of additional investments is reached exceeds by 20% the average number of employees registered in the previous calendar year. The length of the exemption depends on the amount of invested capital. The following are the required amounts of the investments and the corresponding exemptions:

- Invested capital of least USD1 million: exemption for a one-year period
- Invested capital of at least USD3 million: exemption for a three-year period
- Invested capital at least USD5 million: exemption for a five-year period

IT parks. Companies that are residents of IT parks benefit from incentives.

A single tax in the amount of 7% is the only charge applied to sales revenue, which includes the following taxes and contributions:

- Corporate income tax
- Personal income tax (applied on salaries)
- Social security contributions due from employees and employers
- Health insurance contributions due from employees and employers
- Local taxes on real estate
- Tax on roads for vehicles registered in Moldova

The park residents pay the other taxes under the existing general rules.

The single tax of 7% must be declared and paid monthly, and it cannot be lower than 30% of the “average salary per economy forecasted” for the respective fiscal year multiplied by the number of employees hired by the company. The “average salary per economy forecasted” is an annual amount established by the government. For 2022, the average salary per economy forecasted is MDL9,900.

Business entities that create new jobs. Business entities can benefit from a reduction of taxable income if they increase annually the number of employees. The amount of taxable income subject to reduction is determined by multiplying the prior-year average national monthly salary with the increase in the average number of employees on payroll compared with the prior year.

Capital gains. Capital gains are taxed under the same general rules as business income.

Administration. In general, the tax year is the calendar year. A company may elect a different tax year. In particular, if, in accordance with the local accounting legislation, a company elects a financial reporting period that is different from the calendar year, the company’s tax year should correspond to the company’s financial reporting period.

The corporate income tax return must be filed by 25 March of the year following the tax year.

An amended tax return can be filed to correct errors contained in the original tax return if no tax audit was announced or performed by the tax authorities for the respective fiscal period.

Under the Moldovan Tax Code, companies may either obtain a refund of an overpayment of tax or offset the overpayment against existing or future tax liabilities.

All taxes in Moldova must be paid in Moldovan lei (MDL). To calculate the tax on income realized in foreign currency, the income must be converted into lei using the official exchange rate on the payment date.

Dividends. In general, a 6% withholding tax is imposed on dividends paid to nonresidents and residents. A 15% withholding tax continues to be imposed on dividends related to the 2008 through 2011 fiscal years.

Foreign tax relief. Companies may claim a credit against corporate income tax for foreign tax paid on income that is subject to tax in Moldova. The foreign tax credit is granted for the year in which the relevant income is subject to tax in Moldova.

C. Determination of trading income

General. Taxable income includes income earned from all sources, less deductible expenses and allowances provided for by the tax law. In general, companies may deduct ordinary and necessary expenses accrued during the tax year with respect to its business activities. However, they may not deduct the following items:

- Personal and family expenses of the company founders and employees
- Amounts paid for the acquisition of depreciable property

- Losses resulting from sales or exchanges of property, performance of works and provisions of services between related parties
- Unjustified expenses paid to related parties, including compensation, interest and rent
- Amounts paid to the holders of business patents
- Expenses related to exempt income
- Provisions for bad debts

Inventories. Assets valuation income is non-taxable. Assets valuation and impairment losses are nondeductible.

Provisions. If a court decision confirms that a debt owed to a company will not be recovered, the company may deduct for tax purposes the amount of the debt. Provisions for bad debts are not deductible for tax purposes.

Tax depreciation. Starting in 2021, taxpayers are required to use the straight-line depreciation method to calculate the tax depreciation of fixed assets used in business activities instead of the declining-balance depreciation method.

For the use of the straight-line depreciation method, records on fixed assets' depreciation must be maintained for each item separately. The depreciation rate for each fixed asset is determined as a ratio between 100% and its useful life set in the Catalogue of Fixed Assets approved by the Moldovan government. The transition from the declining-balance depreciation method to the new mandatory straight-line depreciation method will be performed under specific rules established by the government. For the 2018, 2019 and/or 2020 tax years, taxpayers may choose between the declining-balance depreciation method and the straight-line depreciation method to calculate the tax depreciation of fixed assets used in business activities.

Relief for losses. Companies incurring a tax loss may deduct the loss in the following five tax years. Losses may not be carried back.

Groups of companies. The Moldovan tax law does not contain any measures regarding groups of companies in Moldova. Consequently, the filing of consolidated returns or the granting of relief for losses on a group basis is not permitted.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods and services delivered in or imported into Moldova	
Standard rate	20
Bread and bread products, milk and dairy products, medicines, natural and liquefied gases, beet sugar and agricultural products	8
Exports of goods and services, international cargo and passenger transport, certain distributions of electric power, thermic energy and hot water, and other specified goods and services relating to diplomatic missions and international organizations	0

Nature of tax	Rate (%)
Food and non-alcoholic beverages supplied by the hotel, restaurant and catering (HORECA) sector; a reduced VAT rate of 6% applies for HORECA during the state of emergency period declared in Moldova by the parliament or by the National Extraordinary Public Health Commission	6/12
Excise taxes, on certain consumption goods; tax is imposed at a fixed amount per unit of the good or by applying an ad valorem rate to the market value of the good	Various
Social security contributions, on remuneration; paid by employer	24
Medical insurance contributions, on remuneration; paid by employee	9
Customs duties; rates set by Customs Tariff Law	Various
Local taxes on real estate (other than real estate used for agricultural or dwelling purposes)	0.3

E. Foreign-exchange controls

The Moldovan leu (MDL) is the only currency that may be used to make payments in Moldova. The National Bank of Moldova (NBM) establishes the official exchange rate for the leu in relation to other foreign currencies. Both resident and nonresident companies may open leu or foreign currency accounts in authorized banks of Moldova.

Resident companies are not required to convert proceeds received in foreign currency into lei (plural of leu). However, they may not transfer foreign currency from their accounts to the accounts of other residents of Moldova, except for authorized banks.

Nonresidents may transfer abroad currency if the currency was registered in their account or if the funds were previously held in a leu deposit account with a Moldovan authorized bank.

Payments in currency by resident companies to nonresidents may be made only from foreign-currency accounts at authorized Moldovan banks (or at foreign banks that are authorized by NBM), and these payments may be made by bank transfer only.

For a distribution of profits during the year, a company should be ready to present to interested bodies the statutory act of the company that indicates the amount of the distribution. For a distribution of profits at the end of the fiscal year, the company should have ready for inspection a copy of the filed annual tax return and the statutory act of the company that indicates the amount of the distribution.

F. Treaty withholding tax rates

The following table shows the applicable withholding rates under Moldova's bilateral tax treaties.

	Dividends		Interest	Royalties
	A	B		
	%	%	%	%

A These are the general dividend withholding tax rates.

B In general, the rates apply if the beneficiary of the dividends is a company that holds directly at least 25% of the share capital of the payer.

-
- (a) This rate applies if the effective beneficiary of the dividends is a company that has invested foreign capital of at least USD250,000 in the payer of the dividends.
 - (b) This rate applies if the beneficiary of the dividends is a company holding directly at least 25% of the capital of the payer.
 - (c) The 3% rate applies to royalties paid for the use of, or the right to use, patents, computer software, designs or models, plans, and secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 7% rate applies to other royalties.
 - (d) This rate applies if the beneficiary of the dividends is a company holding directly at least 10% of the payer of the dividends.
 - (e) This treaty has been signed, but it is not yet in effect.
 - (f) Royalties received for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films and films or tapes for radio or television broadcasting, are exempt from tax.
 - (g) No tax is withheld if the effective beneficiary of the interest is a financial institution.
 - (h) No tax is withheld if the effective beneficiary of the dividends is a company that directly holds at least 50% of the capital of the payer of the dividends and that has invested USD300,000 or an equivalent amount of national currency of a European Union (EU) member state in the capital of the payer of the dividends.
 - (i) The 10% rate applies to royalties paid for the use of patents, trademarks, drawings or patterns, plans, secret formulas or manufacturing procedures as well as for industrial, commercial or scientific information. The 15% rate applies to other royalties.
 - (j) No tax is withheld if the beneficial owner of the dividends is a company (other than a partnership) that holds directly at least 50% of the capital of the payer of the dividends.
 - (k) No withholding tax is imposed on interest paid on bank loans or on interest paid with respect to the following:
 - Sales on credit of industrial, commercial or scientific equipment
 - Sales of goods between enterprises
 - (l) No tax is withheld if either of the following conditions is satisfied:
 - The beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends and that has invested at least GBP1 million (or the equivalent amount in another currency) in the capital of the company paying the dividends at the date of payment of the dividends.
 - The beneficial owner of the dividends is a pension scheme.
 - (m) In general, the withholding tax rate for dividends is 6%. For dividends related to the 2008 through 2011 fiscal years, the withholding tax rate is 15%.

A. At a glance

Corporate Income Tax Rate (%)	25 (a)
Capital Gains Tax Rate (%)	25 (a)
Branch Tax Rate	25 (a)
Withholding Tax (%)	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (b)

(a) This is the corporate income tax rate for financial years beginning on or after 1 January 2022.

(b) The amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit exceeding this limit for such year.

B. Taxes on corporate income and gains

Corporate tax. In accordance with Article 1 of the tax treaty between France and Monaco of 18 May 1963, corporate income tax was introduced in Monaco.

The following entities are subject to this tax:

- Companies of any legal status that carry out industrial or commercial activities, if at least 25% of the turnover is generated outside Monaco
- Companies whose income relates to the sale or licensing of patents, trademarks, processes or formulas and to royalties from intellectual property rights

Administrative offices are also subject to corporate income tax, but the tax is applied according to the specific terms relevant to

their situation. The tax is determined by a flat rate, generally equal to 8% of the total annual operating expenses.

The legal form of the company is irrelevant with respect to the application of the tax. The nature of the activities and the location of the transactions determine the liability for the tax.

Taxable profit is calculated according to the profits derived from activities of any nature carried out by the company. It is determined after deduction of all costs. However, under specific rules, the salary of the owner or directors can only be deducted for individuals who carry out a real function within the company and at a total value that is reasonable for their role.

For small businesses (defined as companies with a turnover of less than EUR3,500,000) for the provision of services or EUR7 million for other activities), a scale determines the maximum amount of deductible income per turnover bracket.

For other companies, the director's salary can only be deducted from taxable profit if the amount is not excessive in comparison to recognized practices on an international level, particularly within the European Union (EU).

Rates of corporate tax. The corporate income tax rate is 25% for financial years beginning on or after 1 January 2022.

Capital gains from asset sales that are part of business activities may, under certain conditions, be exempt if they are reinvested in the company.

Administrative offices are generally taxed at a reduced rate (see *Corporate tax*).

Tax reliefs. In addition to the special rules applicable to administrative offices (see *Corporate tax*), Monaco has two categories of tax relief, which are discussed below.

Business startup scheme. Companies established in Monaco that fall within the scope of corporate income tax that carry on a genuinely new business are exempt from the tax for a period of two years and subsequently benefit from a favorable regime for the following three years. The following is the tax regime:

- First and second years: no corporate income tax is imposed.
- Third year: the tax is calculated on 25% of taxable profit.
- Fourth year: the tax is calculated on 50% of taxable profit.
- Fifth year: the tax is calculated on 75% of taxable profit.
- Sixth year: the tax is calculated on 100% of taxable profit.

Tax credit for research and development. A tax credit is granted for research and development.

Administration. In general, companies must file a tax return within three months following the end of their financial year. If the financial year coincides with the calendar year, the tax return must be filed by 1 April of the following year.

Provisional tax installments of corporate income tax must be made in the months of February, May, August and November of each year. Each installment is equal to 20% of the tax calculated on taxable profit on the closing of accounts at the end of the preceding financial year.

The balance of corporate tax is due by the deadline date for filing the tax return, which is 1 April if the financial year coincides with the calendar year.

In general, late filing is subject to a penalty averaging between EUR15 and EUR75. In case of the late payment of installments or of the balance of corporate tax, a 3% penalty is applied. An additional 1% penalty is charged per month in case of additional delay of payment.

Dividends. In general, an individual or legal entity who pays investment income and interest on receivables, deposits or guarantees to individuals or legal entities domiciled or established in France or to persons of French nationality resident in Monaco who do not hold a certificate of residence must, within the first quarter of the year, declare to the Department of Tax Services the income or revenue earned by the beneficiaries in the preceding year.

Under the parent-subsidiary regime, dividends received by Monegasque companies from their Monegasque or foreign subsidiaries are exempt from corporate income tax, except for a 5%, 10% or 20% service charge computed on the gross dividend income that is added back to the recipient's taxable income.

Foreign tax relief. Any tax paid abroad is deductible from the amount of Monegasque tax on profits related to this income.

An enterprise that receives foreign-source income, such as products of industrial, artistic or literary property or income from movable capital, subject to withholding tax or to income tax in the country of its realization may, subject to justification, deduct the tax paid abroad of the tax on the profits for which it is liable in Monaco for the same income.

For the calculation of the tax due in Monaco, the amount of the foreign tax is, in such case, added to the gross receipts of the company.

C. Determination of trading income

General. The assessment is based on financial statements prepared according to Monegasque generally accepted accounting principles, subject to certain adjustments.

Deductibility of interest. Under Sovereign Order No. 7.334 of 1 February 2019, the general deduction of net financial expenses was replaced by new deduction limitation rules. These new rules apply to fiscal years beginning on or after 1 January 2019.

Under the new rules, the deduction of net financial expenses is capped at the highest of the following amounts:

- EUR3 million per fiscal year, reduced to 12 months where appropriate
- 30% of the taxable income subject to corporate income tax, increased by the relevant net financial expenses; any amortizations and provisions allowed as deductions, as well as capital gains or losses resulting from the transfer of assets

By way of exception, the portion of the net financial expenses paid by a company to related parties is subject to a more restrictive deduction limitation rule.

Inventories. The inventory must be valued at the cost or the market value at the closing date of the financial year if this market value is lower than the cost. Work-in-progress is valued at the cost.

Reserves. In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes, subject to conditions.

Capital allowances. In general, assets are depreciated using the straight-line method. The calculation of depreciation by using the declining-balance method, when possible, is always optional. Companies may depreciate assets, falling within the scope of declining-balance method, on a straight-line basis.

The following are some of the acceptable general straight-line rates:

Asset	Rates (%)
Commercial buildings	2 to 5
Industrial buildings	5
Office equipment	10 to 20
Motor vehicles	20 to 25
Plant and machinery	100

Relief for tax losses. Losses may be carried forward indefinitely. However, for fiscal years closed on or after 31 December 2012, the amount of losses used in a given year may not exceed EUR1 million plus 50% of the taxable profit above that amount for such fiscal year (as is the case in France).

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT); an indirect tax on consumption; all persons (firms or self-employed workers) regularly involved in business transactions are subject to VAT; French and Monegasque territories, including their territorial waters, form a customs union organized by the Franco-Monegasque customs agreement of 18 May 1963; French customs regulations apply directly in Monaco; Monaco is incorporated into European customs territory (although it remains a third country with regard to the EU) and as a result, goods and services in the Single European Market can be accessed from Monaco; key transactions subject to VAT are transactions forming part of business activities that are performed for a charge by a taxpayer either ordinarily or occasionally, whatever the taxpayer's legal status, transactions specifically designated by the law (for example, self-supplies of goods, certain purchases and imports), transactions that are usually exempt but may be taxed at the	

Nature of tax	Rate (%)
option of the person performing them (transactions performed by persons carrying out exempt noncommercial activities, transactions performed by banking and financial institutions, and rentals of unfurnished property for industrial, commercial or professional use) and transactions contributing to the production and delivery of property	5.5/10/20
Registration duties; levied at either a fixed rate or a proportional rate, depending on the nature of the document; the fixed rate duty is usually EUR10; the most commonly applied duties are listed below	
Tenancy agreements; levied on the annual rent plus charges	1
Convictions	2
Mortgage agreement documents, for the engrossed copy	3
Sale of movable property (the rate is reduced to 2% for some sales at public auctions)	5
Sales of real estate	6.5
Transfers of a business or customer list	7.5
Transaction fees for land publication	1
Transaction fees for mortgages	0.65

E. Country-by-Country Reports

Monaco has made enforceable the multilateral agreement between competent authorities on the exchange of Country-by-Country Reports (CbCRs) (Sovereign Ordinance No. 6.712, dated 14 December 2017).

This measure is part of the international project of countering Base Erosion and Profit Shifting, which led to the passing by the Organisation of Economic Co-operation and Development of a set of measures (15 Actions), including new rules on the documentation of transfer pricing to increase the transparency for the tax administrations (Action 13). Action 13 includes provisions regarding CbCRs.

Mongolia is currently in the process of undergoing potentially significant tax reform. At the time of writing, it was not known what changes would be enacted. Because of this expected tax reform, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	1/10/25 (a)
Capital Gains Tax Rate (%)	1/10/25 (a)(b)
Nonresident Corporate Income Tax Rate (%)	1/10/25 (a)
Withholding Tax (%) (c)	
Dividends	20
Interest	20
Royalties	20
Rent	20
Management and Administrative Fees	20
Lease Interest	20
Use of Tangible and Intangible Assets	20
Goods Sold, Work Performed or Services Provided	20
Branch Profits Remittance Tax	20
Net Operating Losses (Years)	
Carryback	0
Carryforward	4 (d)

- (a) The corporate tax system is progressive, with annual taxable income of up to MNT6 billion subject to tax at a rate of 10%, and taxable income in excess of this amount is taxed at a rate of 25%. In addition, entities (except those engaged in exploring and mining minerals, selling and importing alcoholic beverages and tobacco, producing and wholesaling crude oil, and trading and importing gasoline and diesel fuel) with annual taxable income up to MNT300 million are subject to tax at a rate of 1%.
- (b) Gross proceeds derived from the sale of immovable property are subject to tax at a rate of 2%.
- (c) These withholding tax rates apply to payments to nonresidents.
- (d) The general rule is that losses can be carried forward for four years, and the use of such losses is limited to 50% of taxable income in any year.

B. Taxes on corporate income and gains

Corporate income tax. Permanent residents of Mongolia are taxed on their worldwide income. A company is regarded as a permanent resident of Mongolia if any three of the following conditions are met:

- More than 50% of shareholders (or their nominees) reside in Mongolia.
- More than 50% of shareholder meetings have been held during preceding four years.
- Accounting or financial documents are maintained in Mongolia.
- More than 25% of board members or their nominees reside in Mongolia.
- More than 60% of total income is sourced from Mongolia.

Permanent residents may qualify for a tax credit with respect to income generated from the production and planting of specified products (see *Tax incentives*).

Nonresidents of Mongolia are taxed on Mongolian-source income only. The term nonresident is generally defined to include foreign corporate entities that conduct business in Mongolia through a permanent establishment and foreign entities that generate income sourced in or from Mongolia.

Rates of corporate tax. The corporate tax system is progressive, with annual taxable income of up to MNT6 billion subject to tax at a rate of 10%, and taxable income in excess of this amount is taxed at a rate of 25%. Small companies with annual taxable income up to MNT300 million are taxed at a rate of 1%. This concessionary rate applies to all companies except for those engaging in exploring and mining minerals, selling and importing alcoholic beverages and tobacco, producing and wholesaling crude oil, and trading and importing gasoline and diesel fuel.

Certain types of income received by residents are taxed at different tax rates, as indicated in the following table.

Income	Rate (%)
Dividends	10
Royalties	10
Interest	10
Sale of rights	10
Insurance compensation	10
Gambling and lottery income	40
Sale of immovable property	2
Sale of intellectual property	5

Tax incentives. A 50% tax credit is available to taxpayers that generate income from the production and planting of the following:

- Cereal, potatoes and vegetables
- Milk
- Fruits and berries
- Fodder plants
- Meat and meat products produced in the chicken industry

A tax credit of 50% or 90% is available to taxpayers that are located in remote provinces. The credit is 50% for taxpayers that are 500 or more kilometers away from Ulaanbaatar and 90% for taxpayers that are 1,000 or more kilometers away from

Ulaanbaatar. However, the following activities are excluded from this incentive:

- Exploring and mining of minerals
- Sale, production and importation of alcoholic beverages and tobacco
- Crude oil imports or sales
- Providing communication services
- Construction of energy sources and networks, and production, sale and distribution of energy
- Aviation operations
- Construction and repair of roads

A tax credit of 90% is available to taxpayers that have annual taxable income of not greater than MNT1.5 billion, except for those in the following sectors:

- Mineral resources, radioactive mineral resource exploration, mining, transportation and sale
- Sale and importation of alcoholic beverages and tobacco
- Crude oil production, and wholesaling, trading and importing of gasoline and diesel fuel

Domestic law provides that foreign tax credit relief is limited to jurisdictions that have legal arrangements with Mongolia regarding information exchange.

An exemption from corporate tax is available to investors that operate in the oil industry in Mongolia under a product-sharing contract with the Mongolian government.

Certain tax incentives are available to infrastructure developers in free-trade zones in Mongolia, subject to certain qualifying conditions, such as an investment threshold. They include tax incentives for projects with respect to power generation, heating facilities, sanitary facilities, auto roads, railways, airports and telecommunication infrastructure.

Both foreign and domestic companies may apply for a tax-stabilization certificate (subject to meeting certain criteria such as introducing new technology and creating stable jobs) to govern their investment in Mongolia. This certificate provides for stable tax conditions for a fixed term (consistent tax treatment regardless of changes in the tax law) across four different taxes; which are corporate income tax, customs duty, value-added tax (VAT) and tax on royalties. The term (5 years to 18 years) of a tax-stabilization certificate depends on the industry, the amount of investment and the geographical location of the investment. For investments over MNT500 billion (approximately USD185 million), if requested by an investor, the government may enter into an “investment agreement” to stabilize the environment in which the investor will be carrying out its operations. The areas of the stabilization arrangements that can be of interest to investors include not only taxation, but also more secure legal protection, government incentives, licensing and permitting, repatriation of profits and other areas.

Capital gains. Capital gains and losses are treated in the same manner as other taxable income and losses. Gains are subject to the progressive Mongolian corporate tax rates of 10% and 25%. The exception to this rule is that gains derived from the sale of

immovable property are subject to tax at a rate of 2% on a gross basis.

Administration. The tax year in Mongolia is the calendar year.

Taxpayers with taxable income of MNT6 billion or more must file quarterly returns within 20 days after the end of each quarter. Taxpayers with taxable income up to MNT6 billion must file semiannual returns by 20 July. An annual return is due on 10 February following the end of the tax year, and the taxpayer must settle all outstanding liabilities by that date.

If it is necessary to withhold tax on dividends, royalties, sales of rights, transfers of profits overseas by permanent establishments of foreign companies and other Mongolian-source income earned by nonresident taxpayers, the withholding tax must be remitted to the state within 10 working days. All withholding tax statements must be submitted within 20 days after the end of the quarter, and an annual statement must be filed by 10 February following the end of the tax year.

On submission of the tax returns, the Mongolian tax authorities generally conduct an administrative check of the returns to ensure that all requirements have been satisfied with respect to the filing. At a later stage, the tax authorities can conduct a more detailed review of the returns through a tax audit.

Dividends. Dividends paid between permanent residents of Mongolia are subject to a 10% withholding tax. Dividend income received by a nonresident from a permanent resident is subject to withholding tax at a rate of 20%. This rate may be reduced under an applicable double tax treaty.

Foreign tax relief. Domestic law provides a unilateral foreign tax credit, regardless of whether a tax treaty is in place.

C. Determination of trading income

General. Taxable income is broadly defined as total revenue less the following:

- Deductible expenses
- Exempt income
- Tax losses

Taxable revenue falls under the following four categories:

- Income from operations. This is primarily income generated from business activity. However, it also includes, among other items, income from lottery and gambling, income from management and consulting services, and income from goods and services received from others without consideration.
- Income associated with property. This includes rental income, royalties, dividends and interest income.
- Income from the sale of property. This includes the sale of movable and immovable property and the sale of intangible assets.
- Other income. This includes gains on realized foreign-currency exchange rates, insurance compensation, and penalties and interest received from others as a result of the failure of contractual obligations.

Different sources of taxable income are taxed at different rates (see Section B).

The following types of income are exempt from tax (this is not an exhaustive list):

- Interest earned on government bonds (which includes bonds issued by the Development Bank of Mongolia, a government-owned bank)
- Income and dividends earned by taxpayers trading in the oil industry in Mongolia under a product-sharing contract and derived from the sale of its share of product
- Income earned by certain education and health institutions
- Income earned from the mediation of intellectual property rights from one party to another (type of commission income)
- Interest income from a loan secured by intellectual property rights

The tax law provides specific criteria for deductible expenses. Any expense items that have not met such criteria or additional qualifying conditions for deduction must be added back when computing taxable income.

In general, deductible expenses should fulfill the following criteria:

- They are incurred for the reporting period.
- They are incurred for income-generating purpose.
- They are recognized according to accounting laws with supporting documents.
- They are recorded in the VAT system or customs clearance with some exceptions, if applicable.
- They are paid or expected to be paid by the taxpayer.

Specific restrictions apply to the deductibility of the following:

- Regular maintenance expenses
- Voluntary insurance premium fees
- Reserves accumulated in the risk funds of banks and other nonbanking financial institutions
- Per diem expenses
- Depreciation of inventory

Third-party interest payments on loans to finance the company's primary and auxiliary production, operations, services and purchases of properties are generally deductible for tax purposes. Mongolia has an earnings before interest, tax, depreciation and amortization (EBITDA)-based restriction and a thin-capitalization restriction to limit related-party loan interest for tax deduction purposes. Thin capitalization arises when an investor's debt-to-equity exceeds a 3:1 ratio; any interest attributable to the debt exceeding such ratio is nondeductible for tax purposes. In addition, such related-party loan interest should not exceed 30% of EBITDA for any given year.

Nonresidents carrying out trading activities in Mongolia through a permanent establishment may deduct business expenses in accordance with the rules applicable to permanent residents, subject to certain restrictions specific to permanent establishments.

Tax depreciation. Tax depreciation of noncurrent assets is calculated using the straight-line method. The following are the useful economic lives of various noncurrent assets.

Noncurrent assets	Useful economic life (years)
Building and construction	
Mining	40
Non-mining	25
Machinery and equipment	10
Computers, computer parts, software	2
Intangible asset with definite useful life (includes licenses for mineral exploration and extraction)	Validity period
Other noncurrent assets	10

Relief for losses. In general, tax losses can be carried forward for up to four years and the use of such losses is restricted to 50% of taxable profits in any tax year.

The carryback of losses is not allowed.

Groups of companies. Tax grouping is not allowed in Mongolia.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Royalties; paid on the sale of mining products; the two types of royalties are standard flat rate royalties and surtax royalties; the rates of the standard flat rate royalties depend on the type of minerals and whether they are sold within Mongolia; the rates of the surtax royalties vary depending on the type of minerals, their market prices and their degree of processing; surtax royalties are not imposed on minerals below a certain market price	
Standard flat rate royalties	5 (with certain exceptions)
Surtax royalties	
Copper	0 to 30
Other minerals	0 to 5

Value-added tax (VAT); applicable to the supply of taxable goods and services in Mongolia and to goods imported into Mongolia; taxpayers must register for VAT if taxable turnover exceeds MNT50 million; taxpayers can voluntarily register for VAT if taxable turnover reaches MNT10 million; the tax law specifically indicates zero-rated and exempt items; taxable supplies are subject to VAT on the fair market value of the goods sold, work performed or services provided; the taxpayer is responsible for VAT on goods and services received from nonresidents; the Mongolian tax law allows VAT-registered taxpayers to offset output VAT with input VAT if this is supported

Nature of tax	Rate (%)
by appropriate documentation; the excess of input VAT over output VAT can be carried forward for offset against future VAT or other tax liabilities; VAT exemptions are available in certain industries; VAT grouping is not possible; VAT is accounted for monthly and VAT payments must be made by the 10th day of the following month; VAT returns must be filed by the 10th day of each month	10
Excise tax; levied on individuals and legal entities that manufacture or import goods, such as alcoholic beverages, tobacco, gasoline and diesel fuel and automobiles; physical units of technical devices and equipment used for betting and gambling are also subject to excise tax; rate varies depending on the amount and the product	Various
Customs duty; levied on the majority of goods imported into Mongolia; information technology, medical equipment and pure-bred livestock are zero-rated and specified equipment imported into Mongolia by small and medium-sized enterprises and renewable energy sectors are exempt	5 to 40
Stamp duty; levied on various types of services; the rate depends on the type of services involved	Various
Immovable property tax; levied on the value of the immovable property; the value on which the tax is levied is the value registered with the government registration authority; if the property has not been registered, the insured value is used; if neither the registered nor the insured value is available, the accounting value is used in the calculation; rate depends on the size, location and market demand	0.6 to 1
Air pollution payment; applies to domestically produced raw coal, used or imported organic solvents and vehicles	Various
Social security taxes; applicable to Mongolian citizens and foreign citizens employed on a contract basis by economic entities, the government or religious or other organizations undertaking activities in Mongolia; consists of compulsory health and social insurance taxes; charges are capped at MNT483,000 per month for employees	
Employers	12.5 to 14.5
Employees	11.5

E. Miscellaneous matters

Foreign-exchange controls. The Mongolian currency is the tugrik (MNT).

Foreign revenue and expenses must be converted into tugriks on the date of the transaction.

Realized foreign-exchange gains and losses are taxable and deductible, respectively.

Transfer pricing. Transactions between the taxpayer and a related party must follow arm's-length principles. If these principles are not followed, the tax authorities may seek to adjust the transaction to fair market value. The Ministry of Finance has released guidelines setting out the pricing methodologies that can be used by taxpayers and the documentation requirements for related-party transactions.

Debt-to-equity rules. Interest paid to certain related parties is subject to a debt-to-equity ratio of 3:1.

F. Treaty withholding tax rates

The table below provides Mongolian withholding tax rates for dividends, interest and royalties paid from Mongolia to residents of various treaty jurisdictions. The rates reflect the lower of the treaty rate and the rate under domestic law. The table below is for general guidance only.

	Dividends %	Interest %	Royalties %
Austria	5/10 (a)	10	5/10 (b)
Belarus (c)	10	0/10 (d)	10
Belgium	5/15 (e)	10 (f)(q)	5 (q)
Bulgaria	10	10	10
Canada	5/15 (g)	0/10 (h)	5/10 (i)
China Mainland	5	10	10
Czech Republic	10	0/10 (j)	10
France	5/15	0/10	0/5
Germany	5/10 (k)	0/10 (l)	10
Hungary	5/15 (m)	0/10 (n)	5
India	15	0/15 (o)	15
Indonesia	10	0/10 (p)	10
Kazakhstan	10	10	10
Korea (South)	5	5	10
Kyrgyzstan	10	10	10
Malaysia	10	10	10
Poland	10	0/10 (r)	5
Russian Federation	10	10	20 (s)
Singapore	0/5/10 (t)	5/10 (q)(u)	5
Switzerland	5/15 (v)	10	5
Thailand (c)	10	10/15 (w)	5/15 (x)
Turkey	10	10	10
Ukraine	10	0/10 (y)	10
United Kingdom	5/15 (z)	7/10 (aa)	5
Vietnam	10	10	10
Non-treaty jurisdictions	20	20	20

- (a) The 5% rate applies if the recipient of the dividends is a company (excluding partnerships) that holds directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to all other dividends.
- (b) The 5% rate applies to royalties paid for patents, trademarks, designs or models, plans, secret formulas or processes, or information concerning industrial, commercial or scientific experience. The 10% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films.
- (c) This treaty is not yet in force.
- (d) The 0% rate applies if the loan is provided to the government or the central bank. The 10% rate applies in all other cases.
- (e) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 10% of the capital of the company paying the dividends. The 15% rate applies to all other dividends.

- (f) The following types of interest are exempt from tax in the contracting state in which the interest arises:
- Interest on commercial debt claims
 - Interest paid with respect to loans made, guaranteed or insured by public entities or credits extended, guaranteed or insured by public entities, the purpose of which is to promote exports
 - Interest on loans granted by banking enterprises
 - Interest on deposits and interest paid to the other contracting state, or a political subdivision or local authority thereof
- (g) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends (except in the case of dividends paid by a nonresident-owned investment corporation that is a resident of Canada). The 15% rate applies to other dividends.
- (h) The 0% rate applies to interest paid on loans made to the government or a political subdivision. The 10% rate applies in all other cases.
- (i) The 5% rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting) and royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid with respect to rental or franchise agreements). The 10% rate applies in all other cases.
- (j) The 0% rate applies to interest paid to (or by) the government (or specified institutions), subject to further conditions.
- (k) The 5% rate applies if the recipient of the dividends is a company (other than a partnership) that owns directly at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends. Silent partnership income is taxed at the domestic rate of 25%.
- (l) The 0% rate applies to interest arising in Germany that is paid to the Mongolian government or a Mongolian bank.
- (m) The 5% rate applies if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
- (n) The 0% rate applies to interest paid on loans to the government, the central bank, a political subdivision or a local authority. The 10% rate applies in all other cases.
- (o) The 0% rate applies to interest paid on loans to the government, the central bank, a political subdivision or a local authority, the Trade and Development Bank in Mongolia or the Industrial Development Bank of India or another recipient approved by the government. The 15% rate applies in all other cases.
- (p) The 0% rate applies to interest paid on loans to the government or central bank. The 10% rate applies in all other cases.
- (q) Please consult treaty for further details.
- (r) The 0% rate applies to interest arising in the contracting state and derived by the government of the other contracting state or a political subdivision, local authority or the central bank thereof or a financial institution wholly owned by that government or by a resident of the other contracting state, with respect to a debt claim indirectly financed by the government of that contracting state, a local authority or the central bank thereof or a financial institution wholly owned by the government.
- (s) Royalties may be taxed in the contracting state in which they arise and according to the laws of that state.
- (t) The 0% rate applies to dividends paid by a company that is resident in a contracting state to the government of the other contracting state. The 5% rate applies if the beneficial owner of the dividends is a company that holds directly 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
- (u) The 5% rate applies to interest received by banks or similar financial institutions. The 10% rate applies in all other cases. Interest is exempt from tax under certain circumstances.
- (v) The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that holds directly 25% of the capital of the company paying the dividends. The 15% rate applies to all other dividends.
- (w) The 10% rate applies if the interest is received by a financial institution (including an insurance company). The 15% rate applies in all other cases.
- (x) The 5% rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works. The 15% rate applies in all other cases.

- (y) The 0% rate applies to interest paid with respect to bonds, debentures or similar obligations of the government, political subdivisions, local authorities or the central bank. The 10% rate applies in all other cases.
- (z) The 5% rate applies if the beneficial owner of the dividends is a company that controls directly or indirectly at least 10% of the voting power in the company paying the dividends. The 15% rate applies to other dividends.
- (aa) The 7% rate applies to interest paid to banks and other financial institutions. The 10% rate applies in all other cases.

Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This tax applies to resident and nonresident legal entities and individuals.
 (b) This tax applies to nonresident legal entities. Individuals are taxed under the Personal Income Tax Law at rates of 9% and 15%.
 (c) This tax applies to nonresident and resident individuals.
 (d) This tax applies to nonresident legal entities.

B. Taxes on corporate income and gains

Corporate income tax. Companies resident in the Republic of Montenegro (RM) are subject to tax on their worldwide income. A company is resident in the RM if it is incorporated in the RM or if its central management and control is actually exercised in the RM. Nonresident companies are subject to tax only on their income derived from the RM. Nonresident companies are companies registered in other countries that do not have its central management and control in the RM, but have a permanent place of business in the RM.

Rate of corporate income tax. Corporate income tax is payable at a scale ranging from 9% to 15% in the RM. Annual profit up to EUR100,000 is subject to the 9% rate; profit from EUR100,000 to EUR1.5 million is subject to a 12% rate; profit exceeding EUR1.5 million is subject to a 15% rate.

Tax incentives. Newly established companies that perform business activities in undeveloped municipalities are exempt from corporate profit tax for an eight-year period from the date of the commencement of their business activities.

The corporate profit tax liability of companies that have business units established in undeveloped municipalities that engage in production activities may be reduced proportionally based on the percentage of the business unit's profit in the total profit of the company. This tax relief can be claimed for an eight-year period from the date of the incorporation of the business unit. The total amount of the tax incentive cannot exceed EUR200,000. In addition, under the Corporate Income Tax Law, newly established companies who perform business activities in undeveloped municipalities may be exempt from paying salary tax (and the surtax on salary tax) for newly employed individuals and disabled persons under the conditions specifically mentioned in the legislation.

For a legal entity that is a non-governmental organization and is registered for business activities, the tax base is reduced by the amount of EUR4,000 if the profit is used to realize the purposes for which the entity was founded.

Capital gains. Capital gains derived from the disposal of land, real estate, industrial property rights, capital participations and shares and other securities are included in taxable income and are subject to tax at the regular corporate income tax rate.

Capital gains realized by a nonresident legal entity from another nonresident legal entity or a resident or nonresident individual in Montenegro is subject to a 15% capital gains tax (determined by a decision of the tax authorities), unless otherwise specified by a double tax treaty.

Capital gains realized by a nonresident legal entity from a resident legal entity in Montenegro is subject to a 15% withholding tax.

Capital gains may be offset by capital losses incurred in the same year, and net capital losses may be carried forward to offset capital gains in the following five years.

Administration. The tax year is the calendar year, except in the case of liquidation or the beginning of business activities during the year. A company may not elect a different tax year. Companies must file annual tax returns in electronic form and pay tax due by 31 March of the year following the tax year.

Dividends. Resident companies include dividends received from its nonresident affiliates in taxable income.

Corporate and dividend taxes paid abroad may be claimed as a tax credit up to the amount of domestic tax payable on the dividends. Any unused amount of the tax credit for dividend taxes paid abroad can be carried forward to offset corporate income tax in

the following five years. This tax credit applies only to dividends received by companies with a shareholding of 10% or more in the payer for at least one year before the date of submission of the tax return.

A 15% withholding tax is imposed on dividend payments.

An applicable double tax treaty may provide a reduced withholding tax rate for dividends (see Section F). To benefit from a double tax treaty, a nonresident must verify its tax residency status and prove that it is the true beneficiary of the income.

Foreign tax relief. Companies resident in the RM that perform business activities through permanent establishments outside the RM may claim a tax credit for corporate income tax paid in other jurisdictions. The credit is equal to the lower of the foreign tax and the Montenegrin tax paid on the foreign-source income.

C. Determination of trading income

General. The assessment is based on the profit or loss shown in the financial statements prepared in accordance with Montenegrin accounting regulations, subject to certain adjustments for tax purposes.

Taxable income is the positive difference between income and expenses. Dividend income of taxpayers is not included in the tax base if the payer of the dividend is a taxpayer according to the Montenegrin Corporate Income Tax Law.

Tax-deductible expenses include expenses incurred in performing business activities. Expenses must be documented. Certain expenses, such as depreciation (see *Tax depreciation*) and donations, are deductible up to specified limits.

Salary costs, severance payments and redundancy payments to employees are recognized for tax purposes in the period in which the payment is made.

Inventories. Inventories must be valued using average prices or the first-in, first-out (FIFO) method.

Write-offs (provisions). Legal entities may claim deductions for adjustments or write-offs (provisions) of receivables if such actions are in conformity with the Accounting Law. This conformity exists if the following conditions are satisfied:

- It can be proved that the amounts of receivables were previously included in the taxpayer's revenues.
- The receivable is written off from the taxpayer's accounting books as uncollectible.
- The taxpayer can provide clear evidence that the litigation process has been started or that the receivables have been reported as a part of liquidation or bankruptcy proceedings against the debtor.
- The receivable is longer than 365 days.

Long-term provisions made for renewal of the natural resources, expenses payable in a guarantee period and expected losses on the basis of court disputes are recognized as expenses in accordance with the local accounting regulations. In addition, increases in provisions for receivables and loss provisions for off-balance items made by banks that are in accordance with their internal

regulations and with Montenegrin Central Bank regulations are recognized as expenses for tax purposes.

Severance and jubilee payments that are calculated but not paid are deductible up to the amount determined in the Labor Law.

Asset impairment costs are recognized as tax deductible in the period in which the impaired assets are disposed of or damaged due to *force majeure*.

Tax depreciation. Assets with the value over EUR300 are subject to tax depreciation. Intangible and fixed assets are divided into five groups, with depreciation and amortization rates prescribed for each group. A ruling classifies assets into the groups. Group I includes immovable assets.

The straight-line method must be used for Group I, while the declining-balance method must be used for the assets in the other groups.

The following are the depreciation and amortization rates.

Group of assets	Rate (%)
I	5
II	15
III	20
IV	25
V	30

Relief for losses. Tax losses incurred in business operations may be carried forward for five years.

Loss carrybacks are not allowed.

Groups of companies. Under group relief provisions, companies in a group that consists only of companies resident in the RM may offset profits and losses for tax purposes. Tax consolidation is available if a parent company holds directly or indirectly at least 75% of the shares of subsidiaries. To obtain group relief, a group must file a request with the tax authorities. If tax consolidation is allowed, the group companies must apply the group relief rules for five years. Each group company files its own annual income tax return and the parent company files a consolidated tax return based on the subsidiaries' tax returns. Any tax liability after consolidation is paid by the group companies with taxable profits on a proportional basis.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on supplies of goods and services in the RM and on imports of goods; certain tax exemptions with or without the right to deduct input VAT are granted; VAT taxpayers are legal entities and entrepreneurs who had turnover of goods and services in excess of EUR30,000 in the preceding 12 months or who expect to have annual turnover greater than the threshold	
Standard rate	

Nature of tax	Rate (%)
Lower rate	7
Property tax; paid on rights over immovable property in the RM, including residential and business buildings, apartments, garages, buildings and rooms for resting and recreation, and other buildings; certain immovable property is exempt; tax credits are available for the dwellings of owners and their immediate families and for certain accommodation facilities; the amount of tax due is determined by a tax authority's ruling, which should be issued by 30 April of the year for which the tax is rendered; the tax is payable in two installments, which are due on 30 June and 31 October; tax rate varies depending on the municipality in which the immovable property is located	0.25 to 5
Transfer tax; imposed on the transfer of the immovable property located in Montenegro; the tax base equals the market value of the transferred property at the time of acquisition; the acquirer of the property is the taxpayer; the tax is due within 15 days after the moment of transfer of the immovable property	3
Tax on income; paid by employee; higher rate applies to gross salary exceeding EUR1,000	9/15
Surtax on salary tax; paid by employer	10/15
Social security contributions (for pension and disability funds and unemployment insurance); paid by	
Employer	6
Employee	15.5
Additional contributions for the Association of Labor Unions of Montenegro, labor fund and chamber of commerce; total rate	0.67

E. Miscellaneous matters

Foreign-exchange controls. The official currency in the RM is the euro (EUR).

Capital transactions (investments), current foreign-exchange transactions and transfers of property to and from the RM are generally free.

Transfer pricing. Under general principles, transactions between related parties must be made on an arm's-length basis. The difference between the price determined by the arm's-length principle and the taxpayer's transfer price is included in the tax base for the computation of corporate income tax payable.

As of January 2022, the RM's Corporate Income Tax Law has introduced more comprehensive rules on transfer pricing, which are loosely based on the Organisation of Economic Co-operation and Development (OECD) Transfer Pricing Guidelines. Furthermore, it is expected that the Ministry of Finance will issue a rulebook, which will regulate this topic in more detail. It is also envisaged that the Ministry of Finance will annually publish the safe harbor interest rates for the purpose of analyzing

intercompany loans. Large taxpayers that have transactions with related parties must submit transfer-pricing documentation by 30 June 2022, while other taxpayers are required to possess documentation by 30 June 2022. These deadlines are applicable until 2027 (as an exemption from the general deadline for submission, which is 31 March).

F. Treaty withholding tax rates

Montenegro became an independent state in June 2006. The government has rendered a decision that it will recognize tax treaties signed by the former Union of Serbia and Montenegro and the former Yugoslavia until new tax treaties are signed. The following table lists the withholding tax rates under the treaties of the former Union of Serbia and Montenegro and under the treaties of the former Yugoslavia that remain in force. It is suggested that taxpayers check with the tax authorities before relying on a particular tax treaty.

A. At a glance

Corporate Income Tax Rate (%)	31 (a)
Capital Gains Tax Rate (%)	31 (a)(b)
Branch Tax Rate (%)	31 (a)
Withholding Tax (%)	
Dividends	15 (c)
Interest	10/20/30 (d)
Royalties, Scientific Know-how Payments, Technical Assistance Fees and Remuneration for Most Services	10 (e)
Wages and Indemnities Paid to Non-permanent Employees	30 (f)
Rent on Equipment Used in Morocco	10 (e)
Branch Remittance Tax	15 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	4 (g)

- (a) Corporate income tax is imposed at proportional rates ranging from 10% to 31% (for details, see Section B). The corporate income tax rate is 37% for banks, financial institutions and insurance companies. Corporate income tax incentives are available (see Section B).
- (b) See Section B.
- (c) The dividend withholding tax is a final tax for nonresidents. Withholding tax does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax if a property attestation (a certificate containing the company's tax number and attesting that the company is the owner of the shares) is delivered by the beneficiary company. Withholding tax does not apply to dividends paid by companies benefiting from Casablanca Finance City (CFC) status. This exemption is subject to certain conditions for companies that obtained CFC status before 2020.
- (d) The 10% rate applies to interest paid to nonresidents on loans or other fixed-interest claims. The 10% tax is a final tax. The 20% rate applies to interest paid to resident companies and interest paid to resident self-employed individuals in connection with a business conducted by the recipient. The 20% tax may be credited by recipients against their total income tax. The 30% rate applies to interest payments made to resident individuals if the payments are unrelated to a business conducted by the recipient. The 30% tax is a final withholding tax.

- (e) This is a final tax applicable only to nonresidents. Rental and maintenance of aircraft used for international transport are exempt from this withholding tax.
- (f) This withholding tax applies only to payments to persons who are not salaried employees and do not hold a special function in the company paying the indemnities. The rate is 17% for teachers.
- (g) Losses attributable to depreciation may be carried forward indefinitely.

B. Taxes on corporate income and gains

Corporate income tax. The following companies are subject to corporate income tax:

- Resident companies (those incorporated in Morocco)
- Nonresident companies deriving taxable income from activities carried out in Morocco
- Nonresident companies deriving capital gains from sales of unlisted shares and bonds in Morocco (unless a double tax treaty between Morocco and the residence country of the beneficiary provides otherwise)
- Branches of foreign companies carrying on business activities independent of those performed by their head office

In general, only Moroccan-source income is subject to tax unless a provision of a double tax treaty provides otherwise.

Tax rates. The proportional tax rates in the following scale apply for corporate income tax returns submitted for financial years beginning on or after 1 January 2022.

Taxable income		Rate %
Exceeding MAD	Not exceeding MAD	
0	300,000	10
300,000	1,000,000	20
1,000,000	5,000,000	31*

* The marginal rate of 31% is reduced to 26% for companies carrying out industrial activities with a net profit of less than MAD100 million.

Banks, financial institutions and insurance companies are subject to tax at a rate of 37%.

The minimum tax equals the greater of the minimum fixed amount of MAD3,000 and 0.5% of the total of the following items:

- Turnover from sales of delivered goods and services rendered
- Other exploitation income (for example, directors' fees received when the company acts as an administrator of another company, revenues from buildings that are not used in the company's activities, and profits and transfers of losses with respect to shared operations)
- Financial income (excluding a financial reversal and a transfer of financial expenses; a financial reversal refers to an accounting record reflecting the decrease or cancellation of the financial provision [generally related to foreign-exchange risk] already recorded in the previous fiscal year, while a transfer of financial expenses refers to an accounting record to allocate expenses over multiple years)
- Subsidies received from the state and third parties

The rate of minimum tax is reduced to 0.25% for sales of petroleum goods, gasoline, butter, oil, sugar, flour, water, electricity and medicine. The minimum tax applies if it exceeds the corporate income tax resulting from the application of the proportional

rates or if the company incurs a loss. New companies are exempt from minimum tax for 36 months after the commencement of business activities.

If a company declares a negative operating income, excluding depreciation, for two consecutive fiscal years and is beyond the 36-month exemption period, the minimum tax rate is increased to 0.6%. However, if the current result excluding depreciation is declared positive, the minimum tax rate is decreased to 0.4%.

Nonresident contractors may elect an optional method of taxation for construction or assembly work or for work on industrial or technical installations. Under the optional method, an 8% tax is applied to the total contract price including the cost of materials, but excluding VAT.

Social Solidarity Contribution. Under the 2022 Finance Law, the Social Solidarity Contribution (SSC) is imposed on the profits and income in 2022 of companies subject to corporate income tax, as defined by Article 2-III of the Moroccan Tax Code, excluding the following:

- Companies that are permanently exempt from corporate income tax
- Companies operating in industrial acceleration zones (former free trade zones)
- Companies operating under the CFC tax regime

For companies subject to the SSC, this contribution is calculated on the basis of the taxable income on which corporate income tax is computed, equal to or greater than MAD1 million for the latest closed financial year. The following are the rates of the SSC:

- 1.5% for companies with taxable income ranging from MAD1 million to MAD5 million
- 2.5% for companies with taxable income ranging from MAD5 million to MAD10 million
- 3.5% for companies with taxable income ranging from MAD10 million to MAD40 million
- 5% for companies with taxable income exceeding MAD40 million

Tax incentives. Morocco offers the same tax incentives to domestic and foreign investors. Various types of companies benefit from tax exemptions and tax reductions, which are summarized below.

Permanent exemptions. Permanent tax exemptions are available to agricultural enterprises and cooperatives with annual turnover of less than MAD5 million, excluding VAT.

Capital risk companies are exempt from corporate income tax on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

Total exemption followed by permanent reduction. Hotel companies benefit from a tax exemption and a tax reduction with respect to their profits corresponding to their foreign currency revenues that are generated by their hotels and are remitted to Morocco either directly or through travel agencies. Hotel companies are fully exempt from tax on such profits for the first five

years following their first foreign currency sale operation, and they benefit from a maximum proportional tax rate of 20% on such profits in subsequent years. Management companies of “real estate residences for tourism promotion” also benefit from this measure, under the same conditions. A “real estate residence for tourism promotion” is a residence assimilated to a hotel in which the housing units belong to one or more owners and of which a minimum percentage of the housing units (fixed by regulations at 70%) is managed by a licensed management company for at least nine years.

Companies that obtained Casablanca Finance City (CFC) status as of 1 January 2020 benefit from a total corporate income tax exemption for a period of five consecutive fiscal years from the first fiscal year of obtaining their CFC status. Subsequently, a reduced flat rate of 15% applies. The 2021 Finance Law excludes from the benefit of such tax advantages the following companies:

- Credit institutions
- Insurance and reinsurance companies
- Insurance and reinsurance brokerage companies

Transitional regimes apply to companies that obtained CFC status before 1 January 2020. The tax regime that was in force before 1 January 2020, providing for the application of a reduced corporate income tax rate of 8.75% on income from export turnover and the taxation of income from local turnover at the standard corporate income tax rates, remains applicable until 2022 for service companies that obtained their CFC status before 1 January 2020.

Export companies that establish in Moroccan industrial acceleration zones (formerly called free zones [*zones franches*]) as of 1 January 2021 will benefit from a total corporate income tax exemption for five consecutive fiscal years. Subsequently, a reduced flat rate of 15% applies. Transitional measures apply to companies already established in such zones, which will be set up before 1 January 2021.

From the 2020 fiscal year, companies carrying out service outsourcing activities within or outside the integrated industrial platforms benefit from a total corporate income tax exemption for the first five years of their activity. Subsequently, a maximum proportional tax rate of 20% applies.

Sports companies benefit from a total corporate income tax exemption for the first five years of their activity. Subsequently, a maximum proportional tax rate of 20% applies.

Permanent reductions. Mining companies, including those that sell products to export companies, benefit from a maximum proportional corporate income tax rate of 20%. As of 1 January 2020, export companies are taxed up to a maximum proportional tax rate of 20%. Exporters of recycled metals cannot benefit from the 20% rate.

Under a transitional measure, export companies that carried out their first export transaction before 1 January 2020 are exempt from corporate income tax on their income relating to export

turnover during the first five years following their first export transaction.

For exports of services, the 20% rate applies if both of the following conditions are met:

- The related turnover must be realized in foreign currencies (other than dirhams) that is properly repatriated to Morocco.
- The currencies must be repatriated to the Moroccan bank account of the company.

Agricultural companies that become taxable (turnover exceeds MAD5 million) are taxed up to a maximum proportional tax rate of 20%.

Temporary exemption. Companies holding a hydrocarbon exploration and exploitation permit are exempt from corporate income tax for 10 years from the beginning of hydrocarbon regular production.

Subject to certain conditions, real estate developers benefit from a total exemption from corporate income tax and other taxes with respect to construction programs for social housing under agreements entered into with the government. This temporary regime applies from 1 January 2010 through 31 December 2020.

Temporary reduction. Handicraft companies, private schools and educational institutes benefit from a maximum proportional corporate income tax rate of 20% for their first five years of operations.

Tax-free intragroup restructuring. The 2017 Finance Law introduced a new provision establishing a tax-neutrality mechanism for the sale of fixed assets between companies of the same group. This regime allows the transfer or sale of these assets without affecting the taxable income of the transferor. It applies if the concerned companies are part of a group created by a parent company and includes only companies in which it holds directly or indirectly at least 80% of the share capital. At the transferee level, depreciation on fixed assets is tax deductible, but such deduction is limited. These transactions are subject to a fixed registration duty of MAD1,000.

The 2020 Finance Law provides for the extension of this regime to transfers of intangible and financial assets.

Exemption for newly incorporated industrial companies. To promote investment in the industrial sector, the 2017 Finance Law provides for an exemption from corporate income tax for newly created industrial companies for a period of five consecutive years from the starting date of business operations. The eligible industrial activities for this tax incentive will be defined by decree.

Capital gains. Capital gains on the sale of fixed assets are taxed at the proportional corporate income tax rates (see *Tax rates*).

Nonresident companies are taxed on profits derived from sales of unlisted shares of Moroccan companies at the proportional corporate income tax rates, unless a double tax treaty between Morocco and the residence country of the beneficiary provides otherwise.

In addition, they must file an income declaration before the end of the month following the month in which the sales occurred.

Companies will temporarily benefit from a reduction of 70% on the net capital gain arising from the disposal of fixed assets, excluding land and buildings. This measure applies only for fiscal years beginning in 2022.

The 2022 Finance Law provided the following conditions for the application of this measure:

- Eight-year holding period for the disposed assets
- Commitment to reinvest the total disposal amount within 36 months
- Obligation to maintain the new assets for at least five years
- Reporting to the tax administration

Special rules apply to mergers and liquidations of companies (see Section E).

Administration. Within three months after the end of their financial year, companies must file a corporate income tax return with the local tax administration where their headquarters are located. The companies' financial statements must be enclosed with the return.

Companies must make advance payments of corporate income tax. For companies with a 31 December year-end, the payments must be made by 31 March, 30 June, 30 September and 31 December. Each payment must be equal to 25% of the previous year's tax.

Companies must report the SSC within three months after the closing date of the preceding financial year. In addition, they must pay SSC due at the same time as the reporting.

If the minimum tax does not exceed MAD3,000, it is fully payable in one installment. Payment of the minimum tax exceeding this amount is made in accordance with the rules applicable to the corporate income tax.

Dividends. Dividends are generally subject to a 15% withholding tax. However, withholding tax does not apply to dividends paid to Moroccan companies subject to Moroccan corporate tax if a property attestation is delivered by the beneficiary company. Such companies are also exempt from corporate income tax on the dividends.

Foreign tax relief. Foreign tax relief is granted in accordance with the provisions of Morocco's double tax treaties and the Moroccan Tax Code.

C. Determination of trading income

General. The computation of taxable income is based on financial statements prepared according to generally accepted accounting principles, subject to modifications provided in the Moroccan Tax Code.

Business expenses are generally deductible unless specifically excluded by law. The following expenses are not deductible:

- Interest paid on shareholders' loans in excess of the interest rate determined annually by the Ministry of Finance or on the portion of a shareholder's loan exceeding the amount of capital

stock that is fully paid up. No interest on shareholders' loans is deductible if the capital stock is not fully paid up.

- Certain specified charges, gifts, subsidies, corporate income tax and penalties.

Inventories. Inventory is normally valued at the lower of cost or market value.

Provisions. Provisions included in the financial statements are generally deductible for tax purposes if they are established for clearly specified losses or expenses that are probably going to occur.

Provisions on bad debts are deductible if a court action is instituted against the debtor within 12 months after the booking of the provision.

Depreciation. Land may be amortized only if it contributes to production (for example, mining lands). Other fixed assets may be depreciated using the following two methods:

- The straight-line method at rates generally used in the sector of the activity.
- A declining-balance method with depreciation computed on the residual value by applying a declining coefficient that ranges from 1.5 to 3 and that is linked to the term of use. The declining-balance method may not be used for cars and buildings.

The following are some of the annual applicable straight-line rates.

Asset	Rate (%)
Commercial and industrial buildings	4 or 5
Office equipment	10 to 15
Motor vehicles (for vehicles used in tourism, the maximum depreciable value is MAD300,000 including VAT)	20 to 25
Plant and machinery	10 to 15

Certain intangible assets, such as goodwill, do not depreciate over time or by use and, consequently, are not amortizable.

Relief for tax losses. Losses may be carried forward for four years; losses attributable to depreciation may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. Moroccan law does not provide tax-consolidation rules for Moroccan companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on goods sold and services rendered in Morocco	
General rate	20
Electric power, transport of tourists and certain other items	14
Restaurants, hotels, cooking salt, bank operations and certain other items	10
Utilities (water provided through public distribution network and oil), pharmaceuticals, sugar, preserved sardines and dried milk	7

Nature of tax	Rate (%)
Professional tax, on gross rental value of the business premises	10 to 30
Communal services tax (tax base similar to professional tax)	6.5/10.5
Registration duties, on transfers of real property or businesses	1 to 6
Professional training tax, on gross salaries including fringe benefits	1.6
Social security contributions, paid by employer	
For family allowances, on gross monthly remuneration (no maximum limit of remuneration applies)	6.4
For illness and pregnancy, on gross monthly remuneration, up to a maximum remuneration of MAD6,000 a month	8.6
For required medical care	3.5

E. Miscellaneous matters

Foreign-exchange controls. Remittances of capital and related income to nonresidents are guaranteed. No limitations are imposed on the time or amount of profit remittances. The remittance of net profits on liquidation, up to the amount of capital contributions, is guaranteed through transfers of convertible currency to the Bank of Morocco.

As a result of the liberalization of foreign-exchange controls, foreign loans generally do not require an authorization from the exchange authorities. However, to obtain a guarantee for the remittance of principal and interest, notes are commonly filed at the exchange office, either through the bank or directly by the borrower. In general, if the loan's conditions are equivalent to those prevailing in foreign markets, the exchange office approves the loan agreement. The loan agreement must be filed with the exchange office as soon as it is established.

To promote exporting, Moroccan law allows exporters of goods or services to hold convertible dirhams amounting to 50% of repatriated currency. Exporters must spend these convertible dirhams on professional expenses incurred abroad. Such expenses must be paid through bank accounts of convertible dirhams, called "Convertible Accounts for the Promotion of Export" (Comptes Convertibles de Promotion des Exportations).

Transfer pricing. The 2019 Finance Law introduced the requirement of electronic communication to the tax authorities of the pricing documentation to support a company's price policy, notably in the case of a tax audit.

Such documentation should include the following:

- Information relating to activities with the group entities, the global pricing policy practiced and the breakdown of the worldwide profit and activities
- Specific information relating to the transactions performed by the Moroccan entities with group entities

The above provisions apply to tax audits opened from 1 January 2020. Practical procedures for these provisions are to be detailed in a decree still to be published.

The 2021 Finance Law introduces the obligation to provide transfer-pricing documentation in the event of a tax audit for companies that have carried out cross-border intragroup transactions, in order to justify their transfer-pricing policy. The Finance Law provides that this documentation must include the following:

- A Master File containing information on all activities of affiliated entities, the overall transfer-pricing policy applied and the distribution of profits and activities worldwide
- A Local File containing specific information on the transactions that the audited company carries out with other companies with dependency links

This obligation applies to the companies meeting either of the following conditions:

- Turnover equal to or greater than MAD50 million
- Gross assets of MAD50 million or more

The 2021 Finance Law introduces a sanction for a failure to produce transfer-pricing documentation, calculated at a rate of 0.5% on the amount of transactions related to the non-produced documents with a minimum of MAD200,000.

The details of application of the transfer pricing documentation provisions will be determined by decree, which had not yet been issued at the time of writing.

Country-by-Country reporting. The 2020 Finance Law introduced an obligation to report the worldwide distributions of profits of multinational groups of companies (Country-by-Country [CBC] reporting) and a sanction for failure to produce such report.

CBC reporting is a country-by-country breakdown of tax and accounting data and information on the identity, place of operation and nature of activities relating to multinational groups to which Moroccan companies belong.

This measure applies to companies that meet the following criteria:

- They hold, directly or indirectly, an interest in one or more companies or establishments located outside Morocco, which requires them to prepare consolidated financial statements in accordance with applicable accounting standards or they would be required to do so if their shares were listed on the Moroccan stock exchange.
- They achieve an annual consolidated turnover, excluding taxes, higher than or equal to MAD8,122,500,000 for the fiscal year preceding the one concerned by the report.
- They are not owned directly or indirectly, as described in the first bullet above, by any other company located in or outside Morocco.

This obligation also applies to any company that fulfills one of the following conditions:

- It is directly or indirectly owned by a company located in a country that does not require the filing of CBC Reports (CBCRs) and which would be required (that is, the parent company) to file such reports if it were located in Morocco.
- It is owned directly or indirectly by a company located in a country with which Morocco has not concluded an agreement

containing provisions on exchange of information for tax purposes.

- It has been appointed for such purposes by the multinational group to which it belongs and has informed the Moroccan tax authorities accordingly.

In addition, this obligation applies to any company subject to corporate income tax in Morocco and held directly or indirectly by a company located in a country that has entered into an agreement with Morocco, permitting the exchange of information for tax purposes through which it is required to file a CBCR pursuant to the legislation in force in such country, or which would be required to file such report if it were located in Morocco, when informed by the tax administration of the failure of said country to exchange information due to the suspension of automatic exchange or to the persistent neglect of the automatic transmission to Morocco of the CBCRs in its possession.

Finally, if two or more enterprises subject to Moroccan corporate income tax that belong to the same multinational group are subject to the Moroccan CBCR requirements, one of them can be appointed by the group to submit the declaration on behalf of the others within the allowed deadline and in accordance with the aforementioned procedure if it informs the tax authorities beforehand.

Failure to declare or file such report is punishable by a MAD500,000 fine.

Mergers and liquidations. The Moroccan Tax Code provides two types of taxation for mergers, which are the common tax regime and the specific regime.

Under the common tax regime, the absorbed company is subject to tax on all profits and capital gains relating to the merger and on the profits realized between the beginning of the fiscal year and the effective date of the merger.

The specific regime, which was made permanent by the 2017 Finance Law, allows deferred taxation of profits related to goodwill and land, if certain conditions are met. This preferential regime also provides additional incentives such as an exemption for profits derived from share transfers at the level of the shareholders. The preferential regime also applies to total scissions (demergers) of companies.

Liquidations of companies trigger immediate taxation in accordance with the tax rules described above and, if applicable, a 15% withholding tax on liquidation profit called “Boni de liquidation.” The “Boni de liquidation” is the balance of assets that remains for shareholders on the liquidation of a company after settlement of all liabilities, and the reimbursement of the share capital and reserves aged more than 10 years.

(a) No withholding tax is imposed in France if the recipient is subject to tax on the dividend in Morocco.

(b) Tax is payable in the country in which the recipient is domiciled.

- (c) The 7% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The higher rate applies to other dividends.
- (d) The Maghreb Arab Union countries are Algeria, Libya, Mauritania, Morocco and Tunisia.
- (e) Under Moroccan domestic law, the withholding tax rate for interest is 10%. Consequently, for interest paid from Morocco, the treaty rates exceeding 10% do not apply. In addition, the domestic withholding tax rate for dividends is 15%, effective from 1 January 2013. Consequently, for dividends paid from Morocco, the treaty rates exceeding 15% do not apply.
- (f) The 5% rate applies if the beneficiary of the dividends holds more than USD500,000 of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (g) The 5% rate applies if the beneficiary of the dividends holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (h) The 5% rate applies if the beneficiary of the dividends is a company that holds directly at least 10% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (i) The 5% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (j) The 6.5% rate applies if the beneficiary of the dividends is a company, other than a partnership, that holds directly at least 25% of the capital of the payer of the dividends. The 10% rate applies to other dividends.
- (k) The 8% rate applies if the beneficial owner of the dividend is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (l) The 7% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
- (m) The 6% rate applies if the beneficial owner of the dividends is a company that owns directly at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

Morocco has ratified tax treaties with Albania, Azerbaijan, Cameroon, Estonia, Ethiopia, Ghana, Lithuania, Madagascar, Mauritius, Rwanda, São Tomé and Príncipe, Saudi Arabia, Serbia, Slovenia, South Sudan, Yemen and Zambia, but these treaties are not yet in force.

Morocco has signed tax treaties with Bangladesh, Burkina Faso, Congo (Republic of), Guinea-Bissau and Iran, but these treaties have not yet been ratified.

- (a) Income earned by nonresident companies or other entities without a head office, effective management control or a permanent establishment in Mozambique is generally subject to withholding tax at a rate of 20% (see Section B).
- (b) A 10% rate applies to dividends paid on shares listed on the Mozambique Stock Exchange earned by nonresident companies or other entities without a head office, effective management control or a permanent establishment in Mozambique. The 20% rate applies to other dividends paid to nonresident companies.
- (c) The 10% rate applies to fees paid with respect to the rendering of telecommunication services and associated installation and assembling of equipment, international transport services, aircraft maintenance, freight services, and the chartering of fishing vessels and vessels used in coasting activities, as well as income derived from the rendering of construction services and rehabilitation of infrastructure for the production, transport and distribution of electricity in rural areas within the scope of rural electrification projects.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (IRPC) is levied on resident and nonresident entities.

Resident entities. Resident entities are companies and other entities with their head office or effective management and control in Mozambique. Resident companies, including unincorporated entities, whose main activity is commercial, industrial or agricultural, are subject to IRPC on their worldwide income, but a foreign tax credit may reduce the amount of IRPC payable.

Nonresident entities. Companies and other entities operating in Mozambique through a permanent establishment are subject to IRPC on the profits attributable to the permanent establishment.

Companies and other entities without a permanent establishment in Mozambique are subject to IRPC on income deemed to be obtained in Mozambique.

Tax rates. The standard corporate income tax rate is 32%.

Income earned by nonresident companies or other entities without a head office, effective management control or a permanent establishment in Mozambique is generally subject to withholding tax at a rate of 20%. However, the rate is reduced to 10% for income derived from the rendering of telecommunication services and associated installation and assembling of equipment, international transport services, aircraft maintenance, freight services, and the chartering of fishing vessels and vessels used in coasting activities. The 10% rate also applies to income from construction services and rehabilitation of infrastructure for the production, transport and distribution of electricity in rural areas within the scope of rural electrification projects, as well as income from titles listed on the Mozambique Stock Exchange, excluding treasury bills and public debt titles. Income that is subject to a 20% withholding tax includes, but is not limited to, the following:

- Income derived from the use of intellectual or industrial property and the providing of information in the industrial, commercial or scientific sectors
- Income derived from the use of, or the assignment of, rights to industrial, commercial or scientific equipment
- Income from the application of capital
- Income from the rendering of any services realized or used in Mozambique

Tax incentives. Mozambique offers various tax incentives to investors, which are summarized below.

The tax incentives described in the following three paragraphs are available for five tax years beginning with the tax year in which the company commences activities within the scope of an investment project approved by the Investment Promotion Agency.

Companies implementing investment projects benefit from the following main incentives:

- Tax credit for investment that ranges from 5% to 10%, depending on the location of the project
- Tax deductions ranging from 5% to 10% of the taxable income for investments with acquisition of state-of-the-art technology and training of Mozambican employees
- Tax deductions of up to 110% of investments for the construction and rehabilitation of public infrastructure

- Accelerated depreciation of buildings and equipment by increasing the normal rates by 50%

Companies implementing investment projects are also exempt from import duties and value-added tax on the importation of equipment classified as Class K in the Customs Manual.

Special tax incentives may be granted to the following projects:

- Projects in agriculture and tourism
- Projects with respect to basic infrastructure
- Projects located in Special Economic Zones
- Projects located in Industrial Free Zones
- Manufacturing

Special tax rules apply to manufacturing units that intend to operate under an Industrial Free Zone (IFZ) regime or in a Special Economic Zone. The main requirements for the IFZ regime are that at least 70% of production is exported and that a minimum of 250 workplaces are created. The government establishes the Special Economic Zones, which provide benefits similar to those of IFZs.

Capital gains. Capital gains derived by resident entities are combined with the other income of the taxpayer and taxed at the end of the financial year. Capital gains derived by nonresident entities are also taxable in Mozambique at a rate of 32%. Gains derived from direct or indirect transfers between two nonresident entities of shares or other participation interests or rights involving assets located in Mozambique are considered to be derived in Mozambique, regardless of the location of the transaction.

Administration. The tax year is the calendar year. However, companies may apply to the tax authorities for a different year-end if more than 50% of the company is held by entities that adopt a different financial year and if the different year-end is justified by the type of activity of the company.

Companies must make two types of provisional payments of corporate income tax. The two types are known as advance payments and special advance payments. The advance payments are made in three equal monthly installments in May, July and September of the tax year to which the tax relates. The total amount of these payments equals 80% of the tax assessed in the preceding year. The special advance payments are made in three equal monthly installments, in June, August and October. They equal the difference between 0.5% of the company's turnover and the total of advance payments made in the preceding tax year. The minimum amount of the special advance payments is MZN30,000, while the maximum amount of such payments is MZN100,000. Companies that have adopted a tax year other than the calendar year make advance payments in the 5th, 7th and 9th months of the tax year and make special advance payments in the 6th, 8th and 10th months of the tax year.

Dividends. Dividends paid to nonresident companies are subject to a 20% withholding tax, except for dividends on shares listed on the Mozambique Stock Exchange, which are subject to a 10% final withholding tax.

Foreign tax relief. Foreign-source income derived by resident entities is taxable in Mozambique. However, foreign tax may be

credited against the Mozambican tax liability up to the amount of IRPC allocated to the income taxed abroad. Foreign tax credits may be carried forward for five years.

C. Determination of trading income

General. Taxable income is determined according to the following rules:

- For companies with a head office or effective management control in Mozambique that are mainly engaged in commercial, agricultural or industrial activities, taxable income is the net accounting profit calculated in accordance with Mozambican generally accepted accounting principles, adjusted according to the tax norms.
- For companies with a head office or effective management control in Mozambique that do not mainly engage in commercial, industrial or agricultural activities, taxable income is the net total of revenues from various categories of income as described in the Individual Income Tax (IRPS) Code, less expenses.

Expenses that are considered essential for the generation of profits or the maintenance of the production source are deductible for tax purposes. Nondeductible expenses include, but are not limited to, the following:

- Undocumented expenses (taxed separately at a rate of 35%)
- 50% of the rent paid by a lessee that is intended to be applied toward the purchase price of the leased asset
- Interest on shareholders loans that exceeds the Maputo Inter-Bank Offered Rate (MAIBOR) for 12 months plus 2%

Premiums paid for health, accident and life insurance and contributions to pension funds and other complementary social security schemes are deductible for tax purposes up to 10% of the salary fund. If the employees do not have the right to social security pensions, this limit can be increased to 20%.

Inventories. Inventories must be valued consistently by any of the following criteria:

- Cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin
- Any other special valuation that receives the prior authorization of the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities. Any profits resulting from such a change are taxable.

Provisions. Provisions for the following items are deductible up to amounts considered reasonable by the tax authorities:

- Doubtful accounts as a percentage of accounts receivable
- Inventory losses
- Obligations and expenses that are subject to a judicial process
- Other provisions imposed by the central bank or General Insurance Inspection (the body that inspects insurance activities) for specific activities

Depreciation. In general, depreciation is calculated using the straight-line method. Maximum depreciation rates are fixed by

law for general purposes and for certain specific industries. If rates below 50% of the official rates are used, the company cannot claim total allowable depreciation over the life of the asset. The following are some of the maximum straight-line depreciation rates fixed by law.

Asset	Rate (%)
Commercial buildings	2
Industrial buildings	2
Motor vehicles	20 to 25
Plant and machinery	10 to 16.66

Relief for losses. Tax losses may be carried forward for five years. No carryback is allowed.

Groups of companies. Mozambican law does not contain any measures allowing the filing of consolidated returns.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax	17
Tax on specific consumption; levied on specified goods at the production stage and on imports of such goods; specified goods include vehicles and luxury goods; maximum rate	75
Social security contributions, on monthly salaries and wages; paid by	
Employer	4
Employee	3
Import duties	2.5 to 20
Property transfer tax (SISA); payable by purchaser of immovable property	2

E. Miscellaneous matters

Foreign-exchange controls. The central bank controls all transfers of capital (including direct investments) and payments into and out of Mozambique. An authorization from the central bank is required for the maintenance of local foreign-currency bank accounts. Service agreements with nonresident entities are subject to registration with the central bank. Loan agreements with nonresident entities are subject to the prior approval of the central bank, except for loans up to the amount of USD5 million that meet all of the following conditions:

- The interest rate is not higher than the base lending rate of the respective currency.
- The sum of the reference rate and the margin does not exceed the interest rate applied by the domestic banking system.
- The maturity is equal or longer than three years.

If the above conditions are met, only registration is required.

In general, the repatriation of profits, dividends and proceeds from the sale or liquidation of an investment is permitted for foreign-investment projects if the investment has been registered and compliance with other requirements exists.

Transfer pricing. From January 2018, taxpayers whose annual net sales or other income exceeds MZN2,500,000 are required to prepare and maintain a local transfer-pricing file and to document controlled transactions, to ensure that the transactions comply with the arm's-length principle.

F. Treaty withholding tax rates

	Dividends %	Interest %	Royalties %
Botswana	10/12/15 (b)	10	10
India	7.5	10	10
Italy	15	10	10
Macau SAR	10	10	10
Mauritius (a)	8/10/15 (b)	8	5
Portugal (a)	10	10	10
South Africa	8/10/15 (b)	8	5
United Arab Emirates (a)	0	0	5
Vietnam	10	10	10
Non-treaty jurisdictions	10/20	20	20

- (a) These rates apply to an effective beneficiary of the income that does not have a permanent establishment in Mozambique.
- (b) The 8% (10% under the Botswana treaty) rate applies if the effective beneficiary of the dividends is a company that holds at least 25% of the share capital of the company distributing the dividends. The 10% (12% under the Botswana treaty) rate applies if the effective beneficiary of the dividends is a company that holds less than 25% of the share capital of the company distributing the dividends. The 15% rate applies to other dividends.

Interest	10 (c)
Royalties from Patents, Know-how, etc.	10 (d)
Services	10/25 (e)
Branch Remittance Tax	0 (f)
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (g)

- (a) This rate applies to years of assessment beginning on or after 1 January 2015.
- (b) This is a final tax applicable to nonresidents. Dividends paid to nonresidents are subject to a final 10% withholding tax if the recipient of the dividend is a company that holds at least 25% of the capital of the company paying the dividend and if it is the beneficial owner of the shares. For all other cases, the dividend withholding tax rate is 20%. Dividends paid out of oil and gas and insurance profits are exempt from withholding tax.
- (c) A 10% withholding tax applies to interest paid to all persons, excluding Namibian companies, by Namibian banking institutions and Namibian unit trust schemes. In addition, effective from 30 December 2015, a 10% withholding tax is imposed on interest paid to nonresidents. The legislation provides for certain exemptions, notably interest paid by Namibian banks to foreign banks and interest paid by the Namibian state to any person.
- (d) This withholding tax applies to royalties or similar payments to nonresidents. Effective from 30 December 2015, the scope of the withholding tax on royalties is extended to include payments for the use of commercial, industrial or scientific equipment.
- (e) The withholding tax on services applies to amounts paid by Namibian residents to nonresidents directly or indirectly for the following:
- Management, administrative, technical or consulting services (10% rate)
 - Directors' fees (25% rate)

- Fees paid for entertainment including payments for cabaret, motion picture, radio, television, theater artists, musicians and sportspersons (25% rate)
- (f) In the absence of treaty protection, the 10% dividend withholding tax may be imposed on branch profits when the parent company declares a dividend.
- (g) Losses may be carried forward provided that the taxpayer continues to trade.

B. Taxes on corporate income and gains

Corporate income tax. Companies subject to tax include companies registered in Namibia and branches of foreign companies in Namibia deriving income from a Namibian source. Other associations (such as close corporations) registered or incorporated outside Namibia that carry on business or have an office in Namibia are taxed as companies. Corporate income tax is levied primarily on income from Namibian sources.

Namibia's taxing rights extend to the exclusive economic zone and the continental shelf.

Rates of tax. The tax rate for companies, other than those companies that have been awarded manufacturing status, is 32% for years of assessment beginning on or after 1 January 2015. The tax rate for companies that were awarded manufacturing status before 31 December 2020 is 18% for their first 10 years of registration as a manufacturer and 32% thereafter. The Namibia Revenue Agency, in consultation with the Ministry of Trade and Industry, reviewed and approved applications to register as manufacturers. Approval was granted only if the company was engaged in manufacturing and if its activities economically benefited Namibia or its inhabitants. The current tax incentives available to registered manufacturers and exporters of manufactured goods were phased out. The following are details regarding the phaseouts:

- The repeal of registered manufacturer status was effective from 31 December 2020 and companies can no longer register for manufacturing status after 31 December 2020 (see Section C for detailed information).
- The repeal of the special tax incentives available to registered manufacturers in terms of Sections 17(1)(f), 17A, 17B and 17D is effective from 16 December 2021, but the allowances will continue to apply to the end of the 2025 tax year for each registered manufacturer.
- The reduced tax rate of 18% will continue to apply to the end of the 10-year period from date of manufacturer registration.
- The repeal of the exporters' allowance granted under section 17C is effective at the end of the five years commencing 31 December 2020 (that is, 31 December 2025).

Mining companies are taxed at a rate of 37.5% for hard-rock mining and 55% for diamond mining. Companies that render hard-rock mining services are taxed at a rate of 37.5%. Companies that render diamond mining services are taxed at a rate of 55%. Petroleum exploration and production companies are taxed at a basic rate of 35% plus additional profit tax that is calculated in accordance with a complex formula.

Under the Export Processing Zones Act, entities that were granted export processing status are exempt from corporate income tax. Value-added tax, transfer duty and stamp duty are not imposed in the zone. The tax incentives granted under the Export Processing Zone Act were repealed on 31 December 2020 but will continue

to apply to 31 December 2025 in terms of the sunset clause. Special-economic zones will be introduced in the future. The incentives to be granted and the requirements for them, as well as the exact date of the proposed special-economic zones legislation, are not yet clear.

Capital gains. Capital gains tax is not imposed in Namibia. However, please note the rules discussed below.

Amounts received as consideration for the alienation or disposal of a mineral license, as defined in the Minerals (Prospecting and Mining) Act, or the sale of shares in a company that owns such a license are specifically included in the gross income of a taxpayer. The scope of the provisions in terms of which mineral licenses and shares in companies owning such licenses are subject to tax have been widened to include in gross income amounts received from sales, donations, expropriations, cessions and grants of shares in companies owning such licenses as well as shares in companies that indirectly own such licenses. A measure provides for the deductibility of costs incurred on the acquisition of mineral licenses.

Amounts received as consideration for the alienation or disposal of a petroleum license, as defined in the Petroleum (Exploration and Production) Act, or the sale of shares in a company that own such a license are specifically included in the gross income of a taxpayer. Amounts received from sales, donations, expropriations, cessions and grants of shares in companies owning such licenses, as well as shares in companies that indirectly own such licenses, are also included in gross income. A measure provides for the deductibility of costs incurred on the acquisition of petroleum licenses and on the improvement of the value of the licenses or rights.

Amounts received for restraints of trade are taxable and whether these amounts are of a capital nature is not relevant because all such amounts are specifically included in gross income.

Administration. Annual financial statements must be prepared as of the last day of February, unless another date is agreed to by the tax authorities. In practice, permission to use the company's financial year-end is always granted. A company's tax year generally coincides with its financial year.

A company is required to make two provisional tax payments, the first payment six months after the start of the financial year and the second at the end of the year. Payments must be based on an estimate of the current year's taxable income and must be accurate to within 80% of the actual tax liability for the year for which the payment is due. A penalty for underestimation of the first or second provisional tax payment is imposed if the respective payments are less than the minimum payment required.

Companies must file an annual return within seven months after the tax year-end unless an extension is obtained. If the total provisional tax payments are less than the tax liability shown on the return, the balance of tax due must be paid within seven months after the end of the tax year, regardless of whether a company has obtained an extension to file its tax return. Interest accrues at a rate of 20% per year on any unpaid tax liability.

Dividends. Dividends received by a company are exempt from the regular company tax, and expenses incurred in the production of dividend income are not deductible in the determination of the company's taxable income. Dividends paid to nonresidents are subject to a final 10% withholding tax if the recipient of the dividend is a company that holds at least 25% of the capital of the company paying the dividend and if it is the beneficial owner of the shares. For all other cases, the dividend withholding tax rate is 20%. Dividends paid out of oil and gas profits or long-term insurance business profits are not subject to dividend withholding tax. A tax treaty may reduce the rate of dividend withholding tax.

Foreign tax relief. In the absence of treaty provisions, a unilateral tax credit is available for foreign direct and withholding taxes paid on dividends and royalties. The credit may not exceed the Namibian tax attributable to such income. The credit is denied to the extent that a refund of the foreign tax is possible.

C. Determination of trading income

General. Taxable income includes both trade and non-trade income (interest) not of a capital nature. Revenue amounts and realized foreign-exchange gains are subject to tax. Taxable income rarely coincides with profit calculated in accordance with accepted accounting practice.

To be eligible for deduction, expenditures must be incurred in the production of taxable income in Namibia, must be for purposes of trade and must not be of a capital nature. However, realized foreign-exchange losses are deductible even if they are of a capital nature.

Scientific research expenditures are deductible if the research is undertaken for the development of business or is contributed to an institution approved by the Council for Scientific and Industrial Research.

Special deductions. The following special deductions are available to registered manufacturers until the end of the 2025 tax year, after which they are repealed:

- An additional deduction of 25% of the wages paid to their manufacturing staffs
- An additional deduction of 25% of approved training expenses for their manufacturing staffs
- An additional deduction of 25% of export marketing expenses
- An additional deduction of 25% of expenses incurred to transport by road or rail raw materials and equipment used in the manufacturing activity for the first 10 tax years as a manufacturer

Taxable income derived from exports of manufactured goods, excluding fish and meat products, is reduced by 80% if the goods are manufactured in Namibia. This special allowance will be repealed on 31 December 2025. It is available to trading houses and manufacturers, provided that the goods are manufactured in Namibia. For manufacturers, this allowance applies in addition to the special deductions listed above. For the first 10 years of operation, the tax rate for registered manufacturers that export all goods manufactured is 3.6%. After the 10-year period, the rate increases to 6.4%.

Losses resulting from these special deductions may not be used to offset other income.

Inventories. Trading stock includes all goods, materials or property acquired for manufacture or sale, including packaging but excluding consumables and machinery parts. The value of stock is based on original cost plus the costs of preparing stock for sale. The last-in, first-out (LIFO) method of stock valuation may be applied on approval by the Minister of Finance, subject to various conditions.

Provisions. Deductible expenses must be actually incurred, and consequently, provisions are not deductible. However, an allowance for doubtful accounts may be established equal to 25% of the debts that the Minister of Finance is satisfied are doubtful. The amount of irrecoverable debts written off is allowed as a deduction if the debts were once included as taxable income or if the write-off can be construed as an operating loss incurred in the production of income (for example, the write-off of casual loans to staff members who are unable to repay).

Tax depreciation (capital allowances)

Machinery, equipment and vehicles. The cost of machinery, motor vehicles, utensils, articles, ships and aircraft may be deducted in three equal annual amounts, beginning in the year of acquisition. No amount may be deducted in the year of disposal of the asset.

Buildings. An initial allowance of 20% of construction cost is permitted for commercial buildings in the year the buildings are first used. An allowance of 4% is permitted in each of the following 20 years. For industrial buildings of a registered manufacturer, an initial allowance of 20% and an annual allowance of 8% are allowed. Such allowances will remain available to each registered manufacturer until the end of the 2025 tax year. No allowance is granted for employee housing (other than to farmers who are entitled to deduct NAD50,000 in the case of employees' houses).

Patents, designs, trademarks and copyrights. If used in the production of income, the cost of developing, purchasing or registering patents, designs, trademarks, copyrights and similar property is allowed in full if such cost is not more than NAD200, or the cost can be amortized over the estimated useful life or 25 years, whichever is shorter, if the acquisition cost is more than NAD200.

Mining including oil and gas. Prospecting and development expenses incurred in mining operations are not subject to the tax depreciation rules described above. In general, prospecting expenses may be deducted in the year production begins. Costs incurred on infrastructure may be deducted over three years, beginning in the year production begins.

Recapture. Capital allowances are generally subject to recapture to the extent the sales proceeds exceed the tax value after depreciation. In addition, capital allowances are recaptured if assets are withdrawn from a business or removed from Namibia, regardless of whether the assets are sold. The market value of the assets is used to determine the amount recaptured if no proceeds are received.

Relief for trading losses. Companies may carry forward unused losses indefinitely to offset taxable income in future years if they carry out a trade. Losses may not be carried back. Companies that carry on mining operations may offset current-year and prior-year trading losses from mining against other trade income and vice versa. However, such losses must be apportioned on a pro rata basis between mining and other trade income to determine taxable income from each source in the current year. Oil and gas companies may not offset losses from oil and gas activities against other trade income, or vice versa, in any year.

Groups of companies. A group of companies is not taxed as a single entity in Namibia, and an assessed loss of one company cannot be offset against the taxable income of another company in the group. An assessed loss of a branch of a foreign company may be transferred to a Namibian subsidiary under certain circumstances.

D. Value-added tax

Value-added tax (VAT) is levied on supplies of goods or services, other than exempt supplies, made in Namibia and on imports of goods and certain services.

The standard VAT rate is 15%. The following items are zero-rated:

- Exports of goods
- Certain services rendered to nonresidents who are not registered for VAT
- Disposals of going concerns
- Local supplies of fuel levy goods (petrol and diesel)
- Maize meal, fresh or dried beans, sunflower cooking oil, fried animal fat used for the preparation of food, bread and bread or cake flour, if these items are not served as cooked or prepared food, fresh milk and white or brown sugar

Local public passenger transport, medical services, services supplied by registered hospitals, educational services, financial services and long-term residential rentals are exempt from VAT.

E. Miscellaneous matters

Exchange controls. Namibia is a member of the Common Monetary Area, which also includes Eswatini, Lesotho and South Africa. Consequently, it is subject to the exchange control regulations promulgated by the Reserve Bank of South Africa. If Namibia withdraws from the Common Monetary Area, it is likely to introduce its own exchange control restrictions along similar lines.

Exchange controls are administered by the Bank of Namibia, which has appointed various commercial banks to act as authorized foreign-exchange dealers.

The Namibian dollar (NAD) is the Namibian currency. The Namibian dollar and the South African rand (ZAR) are convertible one for one (that is, ZAR1 = NAD1), and this rate does not fluctuate.

Debt-to-equity rules. The tax law includes measures that counter thin capitalization by adjusting both the interest rate and the amount of the loan based on arm's-length principles. Although no

guidelines have been published in this area, a debt-to-equity ratio of up to 3:1 is generally acceptable.

Transfer pricing. The Namibian Income Tax Act includes transfer-pricing measures, which are designed to prevent the manipulation of prices for goods and services, including financial services (loans), in cross-border transactions between related parties.

Anti-avoidance legislation. Namibian legislation contains a general anti-avoidance provision to attack arrangements that are primarily tax-motivated and, in certain respects, abnormal when considered in the context of surrounding circumstances. Another anti-avoidance provision deals with transactions involving companies (including changes in shareholdings) that are designed to use a company's assessed loss, usually by diverting income to, or generating income in, that company.

F. Treaty withholding tax rates

Namibia has entered into double tax treaties with Botswana, France, Germany, India, Malaysia, Mauritius, Romania, the Russian Federation, South Africa and Sweden. In addition, it has a treaty with the United Kingdom, which is the 1962 treaty between the United Kingdom and South Africa as extended to Namibia.

The treaties provide for withholding tax rates on dividends, interest and royalties paid to residents of the other treaty countries as indicated in the following table.

	Dividends %	Interest %	Royalties %	Services %
Botswana	10	10	10	0/15 (h)
France	5/15 (a)	10	10	0
Germany	10/15 (b)	0	10	0
India	10	10	10	0/10 (i)
Malaysia	5/10 (c)	10	5	0/5 (j)
Mauritius	5/10 (c)	10	5	0
Romania	15	15	5	0
Russian Federation	5/10 (d)	10	5	0
South Africa	5/15 (c)	10	10	0
Sweden	5/15 (a)	10	5/15 (e)	0/15 (h)
United Kingdom	5/15 (f)	20	5	0
Non-treaty jurisdictions (g)	10/20	10	10	10

- (a) The 5% rate applies if the recipient is a company that owns at least 10% of the payer of the dividends. The 15% rate applies to other dividends.
- (b) The 10% rate applies if the recipient is a company that owns at least 10% of the payer of the dividends. The 15% rate applies to other dividends.
- (c) The 5% rate applies if the recipient owns at least 25% of the payer of the dividends. The 10% rate applies to other dividends.
- (d) The 5% rate applies if the recipient is a company that owns at least 25% of the payer of the dividends and has invested at least USD100,000 in the share capital of the payer. The 10% rate applies to other dividends.
- (e) The 5% rate applies to royalties paid for patents, secret formulas or information relating to industrial or scientific experience. The 15% rate applies to other royalties.
- (f) The 5% rate applies if the recipient is a company that controls directly or indirectly more than 50% of the voting power of the payer of the dividends. The 15% rate applies to other dividends.
- (g) For further details, see Section A.

- (h) The 15% rate applies to payments for administrative, technical, managerial or consultancy services performed outside Namibia.
- (i) The 10% rate applies to technical, managerial or consultancy fees paid by Namibian residents.
- (j) The 5% rate applies to technical, managerial or consultancy fees paid by Namibian residents.

Namibia has a signed tax treaty with Canada, but the treaty has not yet been ratified. Namibia is negotiating tax treaties with Lesotho, Seychelles, Spain, Zambia and Zimbabwe.

A. At a glance

Corporate Income Tax Rate (%)	25.8 (a)
Capital Gains Tax Rate (%)	25.8 (a)
Branch Tax Rate (%)	25.8 (a)
Withholding Tax (%)	
Dividends	15 (b)
Interest	0/25.8 (c)
Royalties from Patents, Know-how, etc.	0/25.8 (c)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	1
Carryforward	Unlimited (d)

- (a) A tax rate of 15% applies to the first EUR395,000 of taxable income. For further details, see *Tax rates* in Section B. An effective tax rate of 9% is available for qualifying income related to certain intellectual property (Innovation Box). For details regarding the Innovation Box, see *Innovation Box* in Section B.
- (b) This rate may be reduced to 0% if the recipient is a parent company established in a European Union (EU) member state, European Economic Area (EEA) state or a country that has concluded a tax treaty with the Netherlands covering dividends, provided that certain anti-abuse requirements are met. Dividends paid by a Dutch Cooperative, which is a specific legal entity, are not subject to Dutch dividend withholding tax if the Dutch Cooperative does not predominantly operate as a holding or financing company. For further details, see *Dividend withholding tax* in Section B. In addition, the Dutch dividend withholding tax rate is typically reduced under the extensive Dutch tax treaty network (see Section F) to as low as 0%.

- (c) From 1 January 2021, a conditional withholding tax applies to intra-group interest and royalty payments in certain wholly artificial or low-taxed situations. The rate of the withholding tax on interest and royalties is the same as the headline corporate income tax rate. Payments to payees in a jurisdiction with which the Netherlands has concluded a tax treaty are grandfathered to 1 January 2024.
- (d) From 1 January 2022, losses may be carried back one year and carried forward indefinitely. However, the offset of losses against taxable income is limited to the first EUR1 million of taxable income and, for taxable income in excess of EUR1 million, losses may only be offset up to 50% of this excess. Tax losses, including tax losses incurred through 31 December 2021 and still available for carry forward as of 31 December 2021, can be carried forward indefinitely.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is levied on resident and nonresident companies. Resident companies are those incorporated under Dutch civil law, European Companies (Societas Europaea, or SEs) and European Co-operative Societies (Societas Cooperativa Europaea, or SCEs) established in the Netherlands, even if their management and statutory seat are located abroad. In addition, companies are resident if incorporated under foreign law, but effectively managed and controlled in the Netherlands. Resident companies are subject to tax on their worldwide income. Nonresident companies, primarily branch offices of foreign companies doing business in the Netherlands, are taxable only on specific income items, such as real estate and business profits generated in the Netherlands.

As part of the implementation of the EU Anti-Tax Avoidance Directive 2 (ATAD 2), for financial years starting on or after 1 January 2022, entities formed under Dutch corporate law and/or residing in the Netherlands that qualify as “reverse hybrid entities” are treated as domestic taxpayers that are fully liable to Dutch corporate income tax and become a withholding agent for Dutch withholding tax purposes. An entity is defined as a “reverse hybrid entity” if it is formed under Dutch corporate law or resides in the Netherlands and is considered transparent from a Dutch tax perspective (for example, a Dutch private limited partnership [*besloten commanditaire vennootschap*] or closed CV) whereby at least 50% of the voting rights, capital interests or profit rights in the entity must be directly or indirectly held by related participants that are resident in a jurisdiction that qualifies the entity as non-transparent. In short, a related entity is an entity that independently or as part of a cooperating group has an (indirect) interest of at least 25% in the reverse hybrid entity. This qualification also applies for withholding taxes.

Tax rates. The standard corporate tax rate is 25.8%. A step-up tax rate of 15% applies to the first EUR395,000 of taxable income. An effective tax rate of 9% is available for qualifying income related to certain intellectual property (IP). For details regarding this IP regime, see *Innovation Box*.

Innovation Box. If certain conditions are met, a taxpayer can elect to apply the Innovation Box. The aim of this regime is to encourage innovation and investment in research and development (R&D), including software development.

In the Innovation Box, net income from qualifying intellectual property is effectively taxed at a rate of 9%. The 9% rate applies

only to the extent that the net earnings derived from the self-developed intangible assets exceed the development costs. The development costs are deductible at the statutory tax rate of 25.8% and form the so-called threshold. The Innovation Box regime can be elected with respect to a particular intangible asset; it is not required to include all intangibles. Advance Tax Rulings (ATRs) and Advance Pricing Agreements (APAs) are available (see *Administration*).

An important condition for the application of the Innovation Box is that the taxpayer must have been granted an R&D declaration from the Netherlands Enterprise Agency (Rijksdienst voor Ondernemend Nederland, or RVO; part of the Ministry of Economic Affairs) for a qualifying intangible asset created by or for the risk and account of the taxpayer.

In line with recommendations by the Organisation for Economic Co-operation and Development (OECD), effective from 1 January 2017, the definition of qualifying intangible assets is limited for so-called “large groups” (groups that have five-year revenues exceeding EUR250 million and stand-alone taxpayers that have five-year income from intangible assets exceeding EUR37.5 million). For large groups, qualifying intangible assets are limited to patents or plant variety rights, software, marketing authorizations for human or animal medicines, intangible assets with a supplemental protection certificate from the Netherlands Patent Office, intangible assets with a registered utility model for the protection of innovation or an exclusive license for the use of the assets mentioned above.

For taxpayers that do not form part of a large group, other intangible assets can also qualify for the Innovation Box. In addition, other intangible assets can qualify for taxpayers forming part of a large group if such intangible assets are connected with intangible assets that fall within one of the above categories. For example, this connection between two or more intangible assets can be present if the intangible assets have been developed by the same research department or applied in the same product (group). Trademarks, logos and similar assets do not qualify.

The OECD’s modified nexus approach should be taken into consideration for purposes of calculating the income that can be taxed under the Innovation Box. Under the modified nexus approach, the proportion of eligible income is determined by reference to the ratio of “qualifying expenditures” compared to “overall expenditures” for the development of the qualifying intangible asset. This is expressed by the following formula:

$$\text{Qualifying income} = \frac{\text{Qualifying expenditures} \times 1.3 \times \text{Income from intangible assets}}{\text{Overall expenditures}}$$

The income from intangible assets can include all types of income, including royalties, capital gains and embedded income (for example, the sales price of a product).

Foreign royalty withholding tax can normally be credited against Dutch corporate income tax, but the amount of the credit is limited to the Dutch corporate income tax attributable to the relevant net royalty income.

The following grandfathering rules have been put in place to facilitate the transition from the pre-2017 Innovation Box to the current Innovation Box:

- The pre-2017 regime remains applicable to intangible assets that have been self-developed before 1 July 2016 if the taxpayer opts to apply the Innovation Box in the tax return that includes the aforementioned date. This grandfathering rule will be discontinued for tax years beginning on or after 1 July 2021.
- Intangible assets developed before 1 January 2017 for which a patent or a plant variety right has been granted will qualify for the current Innovation Box, even if no R&D-declaration has been granted.
- Specific rules have been put in place to determine the nexus ratio in the first years of the new regime. These rules will be discontinued for tax years beginning on or after 1 January 2021.

R&D tax credit. An employer established in the Netherlands that is performing R&D is eligible for the R&D tax credit (*Wet Bevordering Speur-en Ontwikkelingswerk*, or WBSO), regardless of its size or industry. The WBSO is a tax incentive, which offers an immediate benefit on wage costs and other costs and expenses for R&D activities. All R&D cost and expenses will be settled through a reduction of the payroll tax due from an employer.

An R&D declaration must be obtained from the RVO. The benefit from the WBSO can amount up to 40% of the qualifying costs and expenditures. For R&D costs and expenditures that are not labor costs, a company can choose a fixed rate or a calculation of the actual amount of costs and expenses.

Capital gains. No distinction is made between capital gains and other income. In certain cases, capital gains are exempt (for example, if the participation exemption described in Section C applies) or a rollover is available based on case law or under the reinvestment reserve (see the discussion in *Provisions* in Section C).

Administration. The standard tax year is the financial year (as indicated in the articles of association of a taxpayer).

Tax returns. An annual Dutch corporate income tax return must be filed with the tax authorities within 5 months after the end of the tax year, unless the company applies for an extension (normally, an additional 11 months based on an agreement between the tax advisors and the tax authorities).

Companies must make partial advance payments of corporate income tax during the year, based on preliminary assessments. The preliminary assessments are based on the expected final assessment. For 2022, assuming the tax year corresponds to the calendar year, the assessments are levied according to the following schedule:

- The first preliminary assessment is generally imposed on 31 January 2022. The tax administration may estimate the profit by applying a percentage to the average fiscal profit of the previous two years. If the taxpayer can plausibly show that the expected final assessment will be a lower amount, the preliminary assessment is based on that amount.
- The second preliminary assessment is generally imposed at the end of the eighth month of 2022. This preliminary assessment is derived from an estimate made by the taxpayer.

These preliminary assessments may be paid in as many monthly installments as there are months remaining in the year. It is important that taxpayers provide a timely and accurate estimate of the taxable income. If the preliminary corporate income tax liability is understated, this may result in a charge of tax interest when the tax assessment appears to be higher. Tax interest is calculated for the period that begins six months after the tax year to which the tax liability relates and is based on the amount of additional tax due. If the preliminary corporate income tax liability is overstated, this may not result in a tax interest refund when the tax assessment appears to be lower.

The final assessment is made within three years (plus any extensions granted) from the time the tax liability arises.

The tax authorities may impose *ex officio* assessments if the taxpayer fails to file a return or fails to meet the deadline to file a return. Penalties may apply.

Additional assessments may be imposed if, as a result of deliberate actions by the taxpayer, insufficient tax has been levied. A penalty of 100% of the additional tax due may be levied. Depending on the degree of wrongdoing, this penalty is normally reduced to 25% or 50%.

Rulings. Rulings are agreements concluded with the tax authorities confirming to the Dutch tax consequences of transactions or situations involving Dutch taxpayers. Rulings are based on Dutch tax laws that apply at the time of the request.

For certainty in advance regarding general transfer-pricing matters (see Section E), an APA can be concluded with the tax authorities. APAs provide taxpayers with up-front certainty regarding the arm's-length nature of transfer prices. All Dutch APAs are based on OECD transfer-pricing principles and require the taxpayer to file transfer-pricing documentation with the tax authorities. APAs can be entered into on a unilateral, bilateral or multilateral basis (that is, with several tax administrations). APAs may cover all or part of transactions with related parties, including transactions involving permanent establishments.

For most other matters (for example, the applicability of the participation exemption) or the existence or nonexistence of a permanent establishment in the Netherlands or abroad, an ATR can be concluded.

The benefit of an APA or ATR is that companies can obtain certainty in advance regarding their Dutch tax position (for example, before the investment is made).

The ruling process with the tax authorities may require a pre-filing meeting. In general, rulings are concluded for a period of four or five years, but facts and circumstances may allow for a longer or shorter term. If the facts and legislation on which the APA or ATR is based do not change, in principle, the APA or ATR can be renewed indefinitely. No fees are required to be paid when filing an APA or ATR request with the Dutch tax authorities.

The time required for the total process from initiation of the ruling process to conclusion of the ruling depends on the

circumstances. However, in general, it takes between 6 to 10 weeks from the date of the filing of the ruling request to obtain the ruling. It is often possible to expedite the process if required from a commercial perspective (for example, merger and acquisition transactions).

As of 1 July 2019, the new Dutch policy in relation to rulings with an international character has entered into force. This new policy should be viewed as another step to being more transparent and to further combating undesired international structures that, for example, lack relevant substance, while at the same time maintaining an accessible and robust ruling process for genuine operations. As part of this policy, the prior minimum Dutch substance requirements that should be met in order to be eligible for a tax ruling is replaced with the Dutch “economic nexus” requirement. To have sufficient nexus with the Netherlands (and therefore be eligible to enter into a ruling), the Dutch taxpayer (or other Dutch group company) should conduct operational activities in the Netherlands relevant to the activities that form the subject of the ruling request. The group should have appropriate personnel in the Netherlands to manage the risks associated with these activities.

Rulings are no longer issued if the sole or predominant purpose of the relevant case or structure is to reduce Dutch or foreign taxes or if the entities involved are established in non-cooperative tax jurisdictions (EU list) or in a low-tax jurisdiction (jurisdictions with a corporate income tax rate below 9%).

In addition, the Dutch tax authorities publish anonymized extracts of the rulings as well as an annual overview of the number of issued rulings. Also, in case of a ruling process not resulting in a ruling, there will still be a summary published providing the reason why no ruling was concluded. The extracts are highly abstracted in order to ensure that the facts do not allow for taxpayers to be identified indirectly.

In line with the OECD’s Base Erosion and Profit Shifting (BEPS) Action 5 and the EU directive on the automatic exchange of information on tax rulings, the Netherlands has commenced the exchange of information with respect to certain tax rulings in 2016. To facilitate the exchange of information on tax rulings, specific templates that cover generic information and a high-level summary of the agreed-upon ruling should be submitted to the Dutch tax authorities during the ruling process.

Dividend withholding tax. The statutory withholding tax rate for dividends is 15%. However, several exemptions and reductions, as described below, can apply. Under the extensive Dutch treaty network (see Section F), the Dutch dividend withholding tax rate is typically reduced to a rate as low as 0% for qualifying participation dividends. Under the participation exemption (see Section C) or within a Dutch fiscal unity (see Section C), dividends paid by resident companies to other resident companies are usually exempt from dividend withholding tax.

A broader domestic dividend withholding tax exemption is available for dividend distributions made by Dutch resident entities to the following:

- EU/EEA member state resident investors that are not treated as a resident outside the EU/EEA under a tax treaty between the EU/EEA state and a third state (for this purpose, the EEA is limited to Iceland, Liechtenstein and Norway)
- Investors that are resident in a country that has concluded a tax treaty with the Netherlands covering the treatment of dividends

The domestic dividend withholding tax exemption applies if the recipient holding an interest in the Dutch dividend distributing entity would qualify for the Dutch participation exemption benefits if that investor resided in the Netherlands and if certain anti-abuse rules that target, among other items, hybrid recipients, are met. The withholding tax exemption does not apply if the foreign shareholder fulfills a function similar to a Dutch fiscal investment company or tax-exempt investment company.

To apply the domestic withholding tax exemption for dividend distributions to foreign recipients, the Dutch taxpayer should notify the Dutch tax inspector that all of the requirements listed above are met. Such notification should take place within one month after the dividend resolution.

The dividend withholding tax rules are not applicable to Dutch Cooperatives (specific legal entities) that do not predominantly perform holding and/or financing activities and that have operational activities and the relevant substance to carry out these activities. Dividend distributions made by this type of Dutch Cooperatives are not subject to Dutch dividend withholding tax based on domestic law.

As part of the implementation of the EU ATAD 2, reverse hybrid entities (see definition in *Corporate income tax*) are withholding agents for Dutch dividend withholding tax as from 1 January 2022.

Measures to combat dividend stripping. The Dividend Withholding Tax Act provides measures to combat dividend stripping. Under these measures, a reduction of dividend withholding tax is available only if the recipient of the dividends is regarded as the beneficial owner of the dividends. The measures provide that a recipient of dividends is generally not regarded as the beneficial owner if the following cumulative criteria are met:

- The dividend recipient entered into a transaction in return for the payment of the dividends as part of a series of transactions.
- As part of the series of transactions, the payment of the dividends indirectly benefits a person who would have been entitled to a lesser (or no) reduction, exemption or refund of dividend tax than the recipient.
- The person indirectly benefiting from the dividends maintains or acquires an interest in the share capital of the payer of the dividends that is comparable to the person's position in the share capital before the series of transactions.

Share repurchases. Publicly listed companies are not required to withhold dividends tax when they repurchase their own shares if certain requirements are met. One of these requirements is that the company must not have increased its share capital in the four years preceding the repurchase. This requirement does not apply if the share capital was increased for bona fide business reasons.

Credit for dividend withholding tax. A Dutch company may credit a portion of the foreign dividend withholding tax imposed on dividends received against any Dutch withholding tax due on its dividend distributions if certain conditions are satisfied. The credit is generally 3% of the gross amount of qualifying dividends received. However, if the dividends received are not passed on in full by the Dutch company, the credit is 3% of the dividend distribution made by the Dutch company.

Interest and royalty withholding tax. As of 1 January 2021, a conditional withholding tax applies to intra-group interest and royalty payments to an entity resident (or allocable to a permanent establishment) in a jurisdiction that is included on the Dutch list of jurisdictions with a statutory tax rate lower than 9% or a jurisdiction that is included on the EU list of non-cooperative jurisdictions (see *Controlled foreign companies* in Section E for the list). The Dutch government publishes a list at the end of each year that includes jurisdictions that qualify as low-tax jurisdictions (jurisdiction with a statutory tax rate lower than 9% per the cutoff date of 1 October) or jurisdictions that are included on the EU prohibited list at that time. Only jurisdictions that are included on the list for the preceding calendar year are in scope of the conditional withholding tax. In addition, interest and royalty withholding tax is due in certain abusive situations. Payments to payees in a jurisdiction with which the Netherlands has concluded a tax treaty are grandfathered to 1 January 2024. In principle, all Dutch payers of interest or royalties can be withholding agents for this withholding tax; special rules apply if reverse hybrid entities (see *Corporate income tax*) are involved.

Having (relevant) substance in the Netherlands or in the receiving (prohibited list jurisdictions does not provide for an exception from the withholding tax. The legislation also targets abusive situations in which conduit companies (resident in a non-prohibited list jurisdiction) are interposed between the Netherlands and a prohibited list jurisdiction. If such a conduit company does not meet certain the substance requirements, withholding tax remains due.

Affiliated entities. The withholding tax will only be due on interest and royalty payments to affiliated entities. Entities are affiliated if they are of an associated group. This criterion depends on facts and circumstances, but parliamentary proceedings refer to coordinated group decisions. In addition, entities will be considered affiliated if a qualifying interest is (indirectly) held, also taking into account joint parent companies. A qualifying interest exists if influence can be exercised on decisions regarding the activities of the entity. In any case, a qualifying interest exists if more than 50% of the statutory voting rights are held.

Interest and royalty payments. Withholding tax is due on deemed, accrued, imputed or paid interest and royalties. Corrections are

made if the interest or royalty payment (and/or the absence thereof) is not at arm's length.

Moment of taxation. The interest or royalty payments are considered to have been received at the time when they have been paid or settled, made available to the beneficiary, become interest-bearing or become claimable and collectible. If interest or royalties have matured during the period but have not yet been received, the income will be considered to have been enjoyed yearly on 31 December of that year.

Tax rate. The rate of the withholding tax is equal to the headline corporate income tax rate (25.8% in 2022). It is not relevant whether the interest and/or royalty payments are deductible for corporate income tax purposes.

Tax treaty with low-tax jurisdiction. With respect to low-taxed jurisdictions with whom the Netherlands has concluded a tax treaty, a three-year grandfathering period will apply before the withholding tax is levied. Within this three-year period, the Netherlands will approach the treaty partner to renegotiate and amend the respective treaty.

Expansion of scope to dividends. From 2024, this conditional withholding tax will also apply to dividends in a similar fashion. It is intended that any conditional withholding tax on dividends due will be reduced by any dividend withholding tax due under the existing Dividend Withholding Tax Act.

Foreign tax relief. Under unilateral provisions in the corporate income tax act, the Netherlands exempts foreign business profits derived through a permanent establishment, profits from real estate located abroad and certain other types of foreign income from corporate income tax. If the income is derived from a tax treaty country, the exemption applies with consideration of the relevant treaty provisions (for example, a “subject-to-tax” requirement). If such foreign (operational) income is derived from a non-treaty country, no “subject to tax” requirement applies. To the extent that the foreign business income is negative, this amount does not reduce Dutch taxable income unless the foreign business is terminated (object exemption/territorial system). A credit is available for profits allocable to low-taxed portfolio investment/passive branches.

C. Determination of taxable income

General. The fiscal profit is not necessarily calculated on the basis of the annual financial statements. In the Netherlands, all commercial accounting methods have to be reviewed to confirm that they are acceptable under fiscal law. The primary feature of tax accounting is the legal concept of “sound business practice.”

Expenses incurred in connection with the conduct of a business are, in principle, deductible. However, certain expenses are not deductible, such as fines and penalties, and expenses incurred with respect to a crime. Certain expenses are partially deductible, such as meals, drinks and conferences. Restrictions are imposed on the deductibility of certain related-party interest expense (see Section E).

Functional currency. Taxpayers must calculate their taxable income in euros. On request, Dutch corporate tax returns may be calculated in the functional currency of the taxpayer, provided the financial statements of the relevant financial year are prepared in that currency. The financial statements may be expressed in a foreign currency if it is justified by the company's business or the international nature of the company's group. If this regime is applied, in principle, the functional currency must be used for at least 10 years. Only currencies listed by the European Central Bank qualify for the regime.

Inventories. Inventories are generally valued at the lower of cost or market value, but the last-in, first-out (LIFO) and the base stock methods of valuation are acceptable if certain conditions are fulfilled. Both methods make it possible to defer taxation of inventory profits. Valuation under the replacement-cost method is not accepted for tax purposes.

Provisions. Dutch law permits the creation of tax-free equalization and reinvestment reserves.

The equalization reserve may be established in anticipation of certain future expenditure that might otherwise vary considerably from year to year, such as ship maintenance, overhauling, pension payments or warranty costs.

If certain conditions are met, the tax book profit arising from the disposal of a tangible or intangible business asset may be carried forward and offset against the acquisition cost of a reinvestment asset. This is known as a reinvestment reserve. The reinvestment asset must be purchased within three years after the year in which the reinvestment reserve was established. If a reinvestment asset is not purchased within three years after the establishment of the reinvestment reserve, the amount in the reinvestment reserve is included in taxable income for corporate income tax purposes in the third year following the year in which the reinvestment reserve was established. The offset of the book profit may not reduce the book value of the reinvestment asset below the book value of the asset that was sold. An amount that cannot be offset as a result of the rule described in the preceding sentence may continue to be carried forward if the condition of the same economic function for the reinvestment does not apply (see below). If the depreciation period for the reinvestment asset is more than 10 years or if the reinvestment asset is not depreciable, the reinvestment asset must fulfill the same economic function as the asset that was sold. The condition of the same economic function for the reinvestment does not apply to reinvestment assets with a depreciation period of 10 years or less.

Participation exemption. All companies resident in the Netherlands (except qualified investment companies that are subject to a corporate income tax rate of 0%), including holding companies, are in principle exempt from Dutch corporation tax on all benefits connected with certain qualifying shareholdings (participations). Benefits include cash dividends, dividends-in-kind, bonus shares, "hidden" profit distributions and capital gains realized on disposal of the shareholding. If dividends are paid after the date of the declaration of the dividend, potential foreign-exchange results incurred on the dividend receivable over the interim period (that is, in case the dividend is denominated in a different

currency than the currency used by the Dutch shareholder for tax purposes) are not exempt under the participation exemption.

A capital loss that might result from the disposal of the shareholding is similarly nondeductible. However, a liquidation loss of a subsidiary company may be deductible under certain circumstances. The liquidation loss rules of a subsidiary have been tightened further as of 1 January 2021. Liquidation losses can only be deducted up to EUR5 million unless the subsidiary is resident in the EU/EEA and the Dutch taxpayer holds an interest of more than 50% (or interest with decisive influence on the subsidiary's activities).

The participation exemption applies to all (rights to) interests of 5% or more in the nominal paid-up capital of the subsidiary, unless the participation is a "portfolio investment" (determined through the motive test; see below). A less than 5% direct shareholding may be a qualifying participation if a company related to the taxpayer owns an interest of at least 5% in the same subsidiary. If the shareholding is reduced to less than 5% (for example, as a result of a dilution or another event), the participation exemption may still apply for a period of three years from the date the 5% threshold is no longer met. A condition for applying the participation exemption during the three-year period is that the shareholding must have been owned by the Dutch shareholder for more than one year during which the Dutch shareholder was able to fully benefit from the Dutch participation exemption. If the participation can be considered a "portfolio investment" on a particular date, the Dutch shareholder may no longer benefit from the participation exemption as of such date.

The motive test is applied to determine whether a participation is a "portfolio investment." In general, the motive test is met if the shares in the subsidiary are not merely held for the return that can be expected from normal asset management. In a limited number of specific situations, the participation is deemed to be held as a portfolio investment, which is generally determined based on the function, turnover, profit and assets of the subsidiary. However, even if the motive test is not met, the Dutch taxpayer may still benefit from the participation exemption if the reasonable tax test or the asset test is met.

The reasonable tax test is satisfied if the direct subsidiary is subject to a profit tax that results in a reasonable levy of profit tax in accordance with Dutch tax standards. Based on the parliamentary history, in principle, the local tax system needs to be compared with the Dutch tax system. The primary elements that are taken into account for this assessment are the tax base and the local statutory corporate income tax rate. In general, a statutory profit tax rate of at least 10% qualifies as a reasonable levy if no significant deviations exist between the local tax system and the Dutch tax system. Such significant deviations include, among others, a tax holiday, a cost-plus tax base with a limited cost base and the absence of anti-abuse limitation provisions with respect to the interest deduction.

The asset test is satisfied if less than half of the assets of the direct subsidiary usually consists of, directly or indirectly, low-taxed "free" portfolio investments on an aggregated basis. The portfolio investments are considered "free" if the investments are

not used in the course of the business of the company or if the investments are part of certain intra-group transactions. Real estate and rights directly or indirectly related to real estate are excluded from the definition of a portfolio investment. As a result, the participation exemption normally applies to benefits from real estate participations.

Subject to prior approval of the Dutch tax authorities, a taxpayer can apply the participation exemption to the foreign-exchange results relating to financial instruments that hedge the foreign-exchange exposure on qualifying participations.

Compartmentalization reserve. Under rules that were introduced in 2013, companies claiming exemption from corporate income tax (under the 2007 revised participation exemption rules) for dividends received from foreign subsidiaries must apportion the income to the year in which it originated. It prevents companies from claiming the exemption on income originating from a non-exempt period (so-called compartmentalization rules). Under these rules, a taxpayer must create a fiscal “Compartmentalization reserve” if it holds a (share) interest in a company to which the participation exemption no longer applies and if the participation exemption did apply until that moment (and vice versa). Taxpayers should consult their Dutch tax advisors to obtain further details regarding these rules.

Hybrid loans. The participation exemption is not available for certain benefits derived from so-called hybrid loans. Under this measure, the participation exemption does not apply to income derived from participations to the extent that the corresponding payments are, directly or indirectly, deductible at the level of the participation.

Tax depreciation. In principle, depreciation is based on historical cost, the service life of the asset and the residual value. Depreciation is limited on buildings, goodwill and other assets.

Buildings. Buildings (including the land and surroundings on which they were erected) can be depreciated only for as long as the tax book value does not drop below the threshold value. Buildings may not be depreciated to a tax book value lower than the threshold value. The threshold value of buildings held as a portfolio investment equals the value provided in the Law on Valuation of Real Estate (Wet Waardering Onroerende Zaken), known as the WOZ value. Effective from 1 January 2019, the threshold value of buildings used in the taxpayer’s business or a related party’s business equals 100% of the WOZ value. If a building that has been acquired before 1 January 2019 and that is less than three years old has been depreciated, a grandfathering rule applies, and it can be depreciated down to 50% of the WOZ value within three years. In principle, the WOZ value approximates the fair market value of the real estate. The local municipality determines the WOZ value annually. If the threshold value increases, tax depreciation that had been previously claimed is not recaptured.

Goodwill and other assets. Goodwill must be depreciated over a period of at least 10 years. As a result, the maximum annual depreciation rate is 10%. If the goodwill is useful for a longer period, this period must be taken into account. These rules apply

only to acquired goodwill. Costs in relation to self-developed goodwill can be deducted when incurred. For other assets such as inventory, cars and computers, the depreciation is limited to an annual rate of 20% of historical cost.

Limitations on the depreciation of business assets. Effective from 1 January 2022, the Dutch government has introduced certain limitations to the depreciation of business assets if the depreciable asset was acquired by a Dutch taxpayer in financial years starting on or after 1 July 2019 but before 1 January 2022, and if the agreed transfer price was below the arm's-length value (see Section E).

Groups of companies. Under the Dutch fiscal unity regime, a group of companies can be treated as one taxpayer for Dutch tax purposes. The fiscal unity regime has the following characteristics:

- To elect a fiscal unity, among other requirements, Dutch taxpayers must be connected to each other through at least 95% of the entire legal and economic ownership of shares. A connection can be established through a common (indirect) parent company that is either a Dutch resident company that forms part of the fiscal unity itself, or a common (indirect) parent that is resident in an EU/EEA country. In the case of indirect ownership, the intermediate owner of the shares must also either be a Dutch resident company that forms part of the fiscal unity itself or a company resident in an EU/EEA country.
- Both Dutch and certain foreign companies may be included in a fiscal unity if their place of effective management is located in the Netherlands and if the foreign company is comparable to a Dutch *besloten vennootschap* (BV) or *naamloze vennootschap* (NV).
- A permanent establishment in the Netherlands of a company with its effective management abroad may be included in, or can be the parent of, a fiscal unity.
- A subsidiary may be included in the fiscal unity from the date of acquisition or incorporation.

Advantages of such group treatment include the following:

- Losses of one subsidiary may be offset against profits of other members of the group.
- Reorganizations, including transfers of assets with hidden reserves from one company to another, have no direct fiscal consequences.
- Intercompany profits between members of a Dutch fiscal unity may be fully deferred.

Because only Dutch resident entities can be included in a Dutch fiscal unity and this can have several advantages, two cases were initiated at the European Court of Justice (ECJ). In these cases, the ECJ needed to decide whether the Dutch fiscal unity is in accordance with EU rules and the EU freedom of establishment. On 25 October 2017, the Advocate General (AG) of the ECJ of the EU issued an opinion with respect to these cases. According to the AG, some benefits should also be granted in cross-border situations. On 22 February 2018, the EU Court of Justice ruled that certain elements of the Dutch fiscal unity regime were in violation of EU law and the EU principle of freedom of establishment.

In response to the ECJ court case, the Dutch government introduced emergency legislation. Under this emergency legislation, certain tax rules (such as the interest deduction limitation rule to prevent base erosion, excessive participation debt rules and loss relief rules in case of a change in ownership) apply as if no fiscal unity exists. Most of these measures have been implemented into law with retroactive effect from 1 January 2018.

Relief for losses. Effective from financial years starting on or after 1 January 2022, losses of a company may be carried back one year and carried forward indefinitely (previously six years). However, the offset of tax losses against taxable income will be limited. Such losses can be fully offset against the first EUR1 million of taxable income, and, for taxable income in excess of EUR1 million, losses may only be offset up to 50% of this excess. This applies to both the carryback and carryforward of tax losses. Tax losses, including tax losses incurred through the 2021 financial year and still available for carryforward as of the 2022 financial year, will become available for carryforward indefinitely.

For tax losses from the 2011 and 2012 financial years, the carryforward period was nine years and that will not change (that is, if these losses are not settled by end of the 2020 and 2021 financial years, respectively, these losses will be forfeited).

Effective from 1 January 2019, there are no longer restrictions on losses incurred by holding and financing companies. However, restrictions on loss relief remain with respect to losses of holding and financing companies incurred before 2019. The restrictions apply to a company if holding activities and direct or indirect financing of related parties account for at least 90% of the company's activities during at least 90% of the financial year.

The Corporate Income Tax Act contains specific rules to combat the trade in so-called "loss companies." If 30% or more of the ultimate interests in a Dutch taxpayer changes among ultimate shareholders or is transferred to new shareholders, in principle, the losses of the company may not be offset against future profits. However, many exceptions to this rule exist (for example, the going-concern exception). The company has the burden of proof with respect to the applicability of the exemptions. A similar rule applies to companies with a reinvestment reserve and other attributes (such as tax credit carryforwards). With retroactive effect from 1 January 2018, the Dutch government has introduced legislation providing that these rules need to be applied as if no fiscal unity exists (if applicable).

D. Value-added tax

Value-added tax is imposed on goods delivered and services rendered in the Netherlands other than exempt goods and services. The general rate is 21%. Other rates are 0% and 9%.

E. Miscellaneous matters

Controlled foreign companies. Effective from January 2019, the Netherlands introduced the controlled foreign company (CFC) rule as outlined in the EU Anti-Tax Avoidance Directive.

Under the Dutch regime, a foreign company or a permanent establishment qualifies as a CFC if both of the following conditions are satisfied:

- A Dutch taxpayer has a permanent establishment or an interest of more than 50% in a foreign company.
- The entity or branch is tax resident in a jurisdiction listed on the EU list of non-cooperative jurisdictions (EU prohibited list or in a low-tax jurisdiction (that is, a jurisdiction with a statutory corporate income tax rate below 9%).

The relevant EU prohibited list jurisdictions and low-tax jurisdictions are published on a list issued annually by the Dutch government. For the 2022 financial year, the list includes the following jurisdictions:

- American Samoa
- Anguilla
- Bahamas
- Bahrain
- Barbados
- Bermuda
- British Virgin Islands
- Cayman Islands
- Fiji
- Guam
- Guernsey
- Isle of Man
- Jersey
- Palau
- Panama
- Samoa
- Trinidad and Tobago
- Turkmenistan
- Turks and Caicos Islands
- United Arab Emirates
- US Virgin Islands
- Vanuatu

If the above conditions are satisfied, the undistributed tainted profit of the CFC is to be included in the Dutch tax base on a pro rata basis. The income to be included in the Dutch tax base consists of specific tainted categories of passive income (dividends, interest, financial lease income, royalties and others). The CFC income is not included in the taxable income of the Dutch entity if the CFC's income does not consist of more than 70% of such passive income.

As an exception, the Dutch CFC rule does not apply if the CFC has “substantial economic activities.” If the CFC satisfies the increased minimum substance requirements in its jurisdiction, this is a presumption of proof that substantial economic activities are performed; however, this is not a safe harbor (and taxpayers can demonstrate substantial economic activities in other ways). These increased minimum substance requirements include, among others, the following salary costs' requirement and office space requirement:

- The salary costs of the relevant company must amount to at least EUR100,000 annually.
- The office space must be at the disposal of the relevant company for a period of at least 24 months.

Dutch (financial) services companies. Dutch companies that primarily perform intercompany financing and licensing activities must bear a certain level of risk with respect to these activities. A safe-harbor test involving a requirement with respect to minimum equity at risk determines whether sufficient risk is involved.

Dutch tax law contains substance requirements for companies principally engaged in intercompany financing and/or licensing activities. For such Dutch companies that claim the benefits of a tax treaty or EU Directive (treaty benefits), they must declare in their annual corporate income tax return whether the taxpayer meets a defined set of substance requirements. If one or more of these requirements are not met and if the company has claimed the benefits of a tax treaty, the Dutch tax authorities notify the foreign tax authorities. This is a simple notification. It is up to the foreign tax authorities to take action regarding this notification. Taxpayers should consult their Dutch tax advisors to discuss these rules in more detail. As of 2021, the following two substance requirements are added:

- A minimum annual salary expense of EUR100,000
- An office lease of at least 24 months

Ultimate Beneficial Owner Register. Based on the Anti-Money Laundering Directive, which the Netherlands implemented on 25 July 2018, EU member states are required to register the ultimate owner or stakeholder of corporate and legal entities incorporated in their territory in the Ultimate Beneficial Owner Register.

Foreign-exchange controls. No real restrictions are imposed on the movement of funds into and out of the Netherlands.

Debt-to-equity rules and other restrictions on deductibility of interest

Statutory thin-capitalization rules. Effective from 1 January 2013, the statutory thin-capitalization rules were abolished. However, the Dutch government has introduced legislation, effective from 1 January 2019, providing that tier-1 capital (a bank's core capital) is no longer qualified as debt from a Dutch tax perspective and therefore the payments under tier-1 capital are qualified as dividend payments (and therefore no longer deductible). This applies for tax years starting on or after 1 January 2019 and also applies to tier-1 capital issued before 1 January 2019.

In addition, effective from 1 January 2020, the Dutch government has introduced an interest deduction limitation rule for banks and insurance companies, which limits the deductibility of interest expenses to the extent that the amount of debt exceeds 92% of the balance of the taxpayer.

Other anti-base erosion provisions. The deduction of interest paid, including related costs and currency exchange results, by a Dutch company on a related-party loan is in principle disallowed to the extent that the loan relates to any of the following transactions:

- Dividend distributions or repayments of capital by the taxpayer or by a related Dutch company to a related company or a related individual resident in the Netherlands

- Capital contributions by the taxpayer, by a related Dutch company or by a related individual resident in the Netherlands into a related company
- The acquisition or increase of an interest by the taxpayer, by a related Dutch company or by a related individual resident in the Netherlands in a company that is related to the taxpayer after this acquisition or extension

This rule does not apply to such negative interest and/or currency exchange results to the extent that the total results on a loan are positive (that is, in such case, this positive income is taxable). This should be determined per loan.

This interest deduction limitation does not apply if either of the following conditions is satisfied:

- The loan and the related transaction are primarily based on business considerations. Effective from 1 January 2018, Dutch tax law specifically states that the test as to whether the loan is predominantly business driven and based on business considerations should be satisfied for both loans to related entities and loans that can be indirectly linked to third parties.
- At the level of the creditor, the interest on the loan is subject to a tax on income or profits that results in a levy of at least 10% on a tax base determined under Dutch standards. In addition, such interest income may not be set off against losses incurred in prior years or benefit from other forms or types of relief that were available when the loan was obtained. In addition, the loan may not be obtained in anticipation of losses or other types of relief that arise in the year in which the loan was granted or in the near future. Furthermore, even if the income is subject to a levy of at least 10% on a tax base determined under Dutch standards at the level of the creditor, interest payments are not deductible if the tax authorities can demonstrate it to be likely that the loan or the related transaction is not primarily based on business considerations.

Hybrid loans. Interest expense incurred on loans that are (deemed) to function as equity for Dutch tax purposes is not deductible and may be subject to Dutch dividend withholding tax.

Acquisition interest limitation. Effective from 1 January 2019, the acquisition interest limitation rules were abolished.

Participation interest limitation. Effective from 1 January 2019, the participation interest limitation rules were abolished.

Earning stripping interest limitation rule. Effective from 1 January 2019, the Netherlands introduced the 30% Earnings Before Interest, Tax, Depreciation and Amortization (EBITDA) rule in line with the interest deduction limitation rules as outlined in the EU Anti-Tax Avoidance Directive. However, for financial years starting on or after 1 January 2022, the threshold of 30% is reduced to 20% of the EBITDA. The earning stripping rule is a general limitation of the deduction of the net balance of interest paid and interest received, under which the deduction is limited to 20% of the EBITDA. This rule is applied at the level of the Dutch fiscal unity, taking into account the taxable EBITDA of the fiscal unity.

The Netherlands have taken the following approach in implementing the 20% EBITDA rule:

- The earning stripping rule does not contain a group escape.
- The threshold for deductible interest is set at EUR1 million.

No grandfathering is available for existing loans. Any nondeductible interest expenses can be carried forward and will be available to offset future taxable income in other years (to the extent that a taxpayer has sufficient EBITDA). Effective from 1 January 2020, specific rules to combat the trade in so-called “interest companies” have been introduced. If 30% or more of the ultimate interests in a Dutch taxpayer changes among ultimate shareholders or is transferred to new shareholders, in principle, similar to losses, the carryforward of nondeductible interest expenses of the company can become restricted.

Transfer pricing. The Dutch tax law includes the arm’s-length principle (codified in the Corporate Income Tax Act). The arm’s-length principle implies that for the determination of taxable income, related-party transactions should be based on terms and conditions that would have applied in comparable circumstances if the involved parties were not related.

In an international context, this could result in downward adjustments of taxable income in the Netherlands as a result of transfer pricing adjustments, but without corresponding upward adjustments at the level of the other (foreign) party. As such, to combat these transfer pricing mismatches, the Dutch government has introduced certain revisions to the arm’s-length principle. For financial years starting on or after 1 January 2022, downward adjustments of taxable income will only be considered if and to the extent there are corresponding upward adjustments in the other jurisdiction at the level of the related counterparty. For example, this could apply to interest rate adjustments in the case of related-party financing. Similarly, for assets acquired from or transferred by related parties through capital contributions, capital repayments, (liquidation) distributions and legal mergers, an upward adjustment of the asset’s cost price at the level of the Dutch taxpayer (transferee) would be allowed only to the extent that a corresponding adjustment is recognized in the taxable base of a profit tax at the level of the transferor. Finally, a conceptually similar, but opposite adjustment mechanism, is included for inter-company debt transferred to a Dutch taxpayer below the arm’s-length value.

The enacted legislation also affects transactions in which a depreciable business asset was acquired by a Dutch taxpayer in financial years starting on or after 1 July 2019 but before 1 January 2022, if the transfer price agreed was below the arm’s-length value or, in certain cases (capital transactions), if the fair market value of the asset was not taxable at the level of the transferor. In such cases, the rules would recognize a transfer at the arm’s length value but will subsequently limit the amortizable basis for such business asset in financial years starting on or after 1 January 2022, effectively limiting the annual tax depreciation. The depreciable tax basis for a business asset subject to this transitional measure is generally set at the lesser of the following:

- The (lower) commercial value agreed between the Dutch taxpayer and its foreign affiliate (or in some cases, the value that

- was taxable at the level of the transferor) at the time of the acquisition
- The remaining depreciable basis in the opening balance sheet of the Dutch taxpayer for its financial year starting on or after 1 January 2022

Transfer pricing documentation. The Dutch tax law contains specific transfer pricing documentation requirements. Transactions between associated enterprises (controlled transactions) must be documented. Such documentation should include a description of the terms of the controlled transactions, the entities (and permanent establishments) involved and a thorough analysis of the so-called five comparability factors (both from the perspective of the controlled transactions and companies and uncontrolled transactions and companies), of which the functional analysis is the most important. The documentation must establish how transfer prices were determined and provide a basis for determining whether the terms of the intercompany transactions would have been adopted if the parties were unrelated. If such information is not available on request in the case of an audit or litigation, the burden of proof with respect to the arm's-length nature of the transfer prices shifts to the taxpayer. Also, the taxpayer is exposed to possible noncompliance penalty charges. Taxpayers can use the Dutch transfer-pricing decrees for guidance. These decrees provide the Dutch interpretation of the OECD transfer-pricing guidelines.

Additional transfer-pricing requirements in the Dutch tax law took effect on 1 January 2016. In line with the OECD's report on Action 13 of the BEPS plan, new standards for transfer-pricing documentation were introduced. These new standards consist of a three-tiered structure for transfer-pricing documentation that includes a master file, a local file and a template for a Country-by-Country (CbC) Report.

The CbC Report applies to Dutch tax resident entities that are members of a multinational enterprise (MNE) group with consolidated group turnover exceeding EUR750 million in the tax year preceding the tax year to which the CbC Report applies. In addition, Dutch tax resident entities of a MNE group also have to prepare a master file and a local file if the group has consolidated group turnover exceeding EUR50 million in the tax year preceding the tax year for which the tax return applies.

A Dutch tax resident that is a member of a MNE group must notify the Dutch tax authorities as to which entity within the MNE group will file the CbC Report by the last day of the reporting year (for example, if the reporting year is the calendar year, a notification must be filed by 31 December 2019). This is a recurring requirement.

The Dutch government has also issued further guidance on the master, local file and CbC reporting requirements through Ministerial Regulations. Taxpayers should consult their Dutch tax advisors to discuss these rules in more detail in order to ensure that they are compliant with their reporting and documentation obligations.

APAs can be concluded with the Dutch tax authorities with respect to transfer pricing (see Section B).

Anti-hybrid mismatch rules. Effective from 1 January 2020, the Netherlands has introduced anti-hybrid rules to comply with the second part of the EU Anti-Tax Avoidance Directive to tackle hybrid mismatches between affiliated entities.

Hybrid mismatches targeted. The legislation contains provisions to target hybrid mismatches between affiliated entities resulting from the following:

- Hybrid entities
- Hybrid financial instruments and payments made thereunder
- Hybrid permanent establishments
- Deemed branch payments
- Hybrid transfers
- Imported mismatches
- Dual residency cases

Affiliated entities. The anti-hybrid rules apply only in case of mismatches between affiliated entities or in a so-called structured arrangement. Entities are affiliated if (directly or indirectly) a percentage of 25% is held or if they are part of an affiliated group. This latter criterion depends on facts and circumstances, but parliamentary proceedings refer to coordinated decisions. If entities are not affiliated but have made an arrangement with a double deduction or a “deduction no inclusion” (see *Neutralization of hybrid mismatch benefit*) aimed at obtaining a tax benefit (a so-called “structured arrangement”), the anti-hybrid rules also apply. Effective from financial years starting on or after 1 January 2022, the hybrid mismatch rules are also applicable in case of mismatches between a Dutch taxpayer and affiliated individuals, as opposed to affiliated corporate entities only. The scope of the anti-hybrid rules has been broadened with affiliated individuals to align the existing rules with the requirements under ATAD 2. To determine whether an individual or an entity is affiliated to the Dutch taxpayer for purposes of the anti-hybrid rules, the same 25% threshold applies.

Neutralization of hybrid mismatch benefit. A hybrid mismatch may result in a deductible payment while the corresponding income is not taxed at the level of the affiliated entity (“deduction no inclusion”). In case of deduction no inclusion, the primary anti-hybrid rule is to disallow deduction of the payment, neutralizing the previous benefit of the corresponding income not being taxed. If the primary rule does not tackle the mismatch, the secondary rule is to tax the corresponding income at the level of the (deemed) Dutch recipient, neutralizing the mismatch.

Similar to situations giving rise to a deduction no inclusion, a double deduction outcome is subject to a primary rule or, if the primary rule does not apply because, for example, the state of residence of the investor does not have anti-hybrid rules, a defensive rule applies. Under the primary rule, if the Netherlands is the state of residence of the investor, the Netherlands denies the deduction. If the Netherlands is the state of residence of the partnership and the state of residence of the investor has not denied the deduction, the Netherlands will deny the deduction.

For the avoidance of double taxation, the anti-hybrid rules are applied on a pro rata basis. In case of a deduction no inclusion, if part of the income is included at the level of the recipient, the

anti-hybrid rules do not apply to this part of the income. In case of timing differences with respect to income recognition, rules for avoidance of double taxation apply.

In case of deduction no inclusion with respect to a payment by a hybrid entity, a deduction no inclusion with respect to an exemption for permanent establishments or a double deduction, the deduction of the payment at the level of the taxpayer is not disallowed if the deductible expense is set off against income that is included in the taxable basis of both the taxpayer and the affiliated entity (so-called “double income inclusion”).

Hybrid permanent establishments. In case of a hybrid permanent establishment, whereby the Netherlands sees a permanent establishment and the other jurisdiction does not regard a permanent establishment to be in existence in its jurisdiction, the Dutch object exemption (exempting income from a permanent establishment) does not apply to this income.

Imported mismatches. In case a hybrid mismatch in another jurisdiction is shifted into the Netherlands using a non-hybrid instrument, the anti-hybrid rules may apply to the non-hybrid instrument in the Netherlands. This could result in a disallowance of a deduction in the Netherlands on a non-hybrid instrument if there is a direct connection with the hybrid mismatch with another jurisdiction and if the mismatch is not resolved under local anti-hybrid legislation.

Transfer-pricing corrections. Transfer-pricing corrections are only in scope of the anti-hybrid rules to the extent that the corrections are deemed to arise from a hybrid mismatch arrangement. Transfer-pricing mismatches arising from a different application of transfer-pricing principles between jurisdictions do not fall within the scope of the rules; see the above discussion in on the legislation effective for financial years starting on or after 1 January 2022 targeting transfer-pricing mismatches.

Administrative obligations. Dutch corporate income taxpayers must include information in its administration (bookkeeping or business administration) to substantiate whether a payment is considered deductible under, among others, these rules. If such information is not included in its administration, documentation requirements are not met and deductions of payments may not be granted.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under Dutch domestic law.

- (a) The dividend withholding tax rates in this table are based on the lowest available treaty rates.
- (b) The rate is increased to 15% (China Mainland, Czech Republic, Slovak Republic and Venezuela, 10%) if the recipient is not a corporation owning at least 25% of the distributing company.
- (c) The rate is increased to 15% (or other rate as indicated below) if the recipient is not a corporation owning at least 10% of the distributing company.
- | | | | | | |
|---------|-----|--------------|-----|----------------------|-----|
| Bahrain | 10% | Kuwait | 10% | South Africa | 10% |
| Ghana | 10% | Oman | 10% | United Arab Emirates | 10% |
| Japan | 10% | Saudi Arabia | 10% | | |
- (d) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 20% of the distributing company.
- (e) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 15% of the distributing company and if other conditions are met.
- (f) The treaty withholding rate is increased to 15% if the recipient is not a corporation owning at least 5% of the distributing company.
- (g) A dividend withholding tax exemption is available to EU/EEA member state resident investors (who are not treated as a resident outside the EU/EEA under a tax treaty between the EU/EEA state and a third state) holding an interest in a Dutch dividend distributing entity that would qualify for participation exemption benefits. For this purpose, the EEA is limited to the countries of Iceland, Liechtenstein and Norway. The withholding tax exemption does not apply if the foreign shareholder fulfills a similar function as a Netherlands fiscal investment company or tax-exempt investment company. No minimum holding period applies.

- (h) The treaty withholding rate is increased to 10% if the recipient is not a corporation owning at least 7.5% of the distributing company.
- (i) The former USSR tax treaty continues to apply to Kyrgyzstan, Tajikistan and Turkmenistan.
- (j) The former Yugoslavia tax treaty continues to apply to Bosnia and Herzegovina, Kosovo, Montenegro and Serbia.
- (k) The treaty withholding rate is 15% but contains a most-favorite-nation clause. The 10% rate is based on the treaty withholding rate with Germany. The 5% rate is based on the treaty withholding rate with Slovenia and requires ownership of at least 10% of the distributing company.
- (l) The 0% rate applies if the recipient is exempt from tax on the dividend.
- (m) The 5% rate applies if the recipient has invested at least EUR75,000 in the capital of the distributing company and has an interest of at least 25% in the distributing company.
- (n) The 5% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the distributing company or has invested more than USD10 million, or the equivalent in local currency, in the distributing company. The 7% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 25% but less than 50% of the distributing company and if, under the provisions of the Netherlands Corporate Income Tax Act and future amendments thereto, a company that is a resident of the Netherlands is not charged to Netherlands corporate income tax with respect to dividends received by the company from a company that is a resident of Vietnam.
- (o) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly or indirectly at least 50% of the distributing company and has invested more than USD2 million or the equivalent in euro or Georgian currency in the capital of the distributing company.
- (p) The 0% rate applies if the recipient is a corporation that owns at least 50% of the distributing company and has invested EUR250,000 in the share capital of the distributing company or if the recipient is a corporation owning at least 25% of the shares of the distributing company and the capital of the distributing company is guaranteed or insured by the government.
- (q) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the distributing company and if certain other conditions are met. Please consult your Dutch tax advisor for further details.
- (r) The 0% rate applies if either of the following circumstances exists:
- The recipient of the dividends owns at least 50% of the distributing company, and the recipient has invested at least USD300,000, or the equivalent in local currency, in the capital of the distributing company.
 - The investment of the recipient of the dividends in the capital of the company paying the dividends is guaranteed or insured by the government of the other contracting state, the central bank of the other contracting state or any agency or instrumentality (including a financial institution) owned or controlled by that government.
- (s) The 5% rate applies if the beneficial owner is a company that holds directly 25% of the capital of the company paying the dividends and has invested at least EUR200,000 in the capital of the distributing company.
- (t) The 0% rate applies if the beneficial owner is a company that holds directly or indirectly at least 50% of the capital of the distributing company that is wholly or partly divided into shares and if the beneficial owner has invested more than USD250,000 in the capital of the distributing company.
- (u) The 0% rate applies if the profits out of which the dividends are paid have been effectively taxed at the normal rate for profits tax and if the dividends are exempt from tax in the hands of the company receiving such dividends.
- (v) The 0% rate applies if the beneficial owner is a company that has directly or indirectly owned shares representing at least 50% of the voting power of the distributing company for the six-month period ending on the date on which entitlement to the dividends is determined and if other conditions are met.
- (w) The 10% rate applies if, according to the law in force in Venezuela, taxation of the dividends in Venezuela results in a tax burden of less than 10% of the gross amount of the dividends.
- (x) The 0% rate applies if under the provisions of the Netherlands Company Tax Act and the future amendments thereto, a company that is a resident of the Netherlands is not charged to Netherlands company tax with respect to dividends the company receives from a company that is a resident of Uzbekistan.
- (y) The 0% rate applies if the recipient is a company that directly owns shares representing 80% or more of the voting power in the payer of the dividends and if other conditions are met. The 5% rate applies if the recipient is a company that holds directly at least 10% of the voting power of the payer of the dividends.

- (z) The 0% rate applies if the recipient is a company owning at least 50% of the distributing company with respect to investments made, including increases of investments, after the entry into force of this treaty on 10 September 2006. The 5% rate applies if the recipient is a company that owns less than 50% of the distributing company. The competent authorities of the contracting states regulate in an agreement the application of the reduced rates.
- (aa) The 5% rate applies if the recipient of the dividend is subject to profit taxation at a rate of at least 5.5%.
- (bb) Under the new bilateral tax arrangements between the Netherlands and Curaçao and Sint Maarten, the reduced rate of 0% is available if certain requirements are met. If the conditions are not met, a 15% withholding tax rate should apply. However, under grandfathering rules, a 5% withholding tax rate applies for existing situations until the end of the 2019 financial year.
- (cc) These are the rates under a new tax treaty between the Netherlands and Ethiopia, which was signed on 10 August 2012. The effective dates are 1 January 2017 for the Netherlands (including the BES-Islands) and 8 July 2017 for Ethiopia. The 5% rate applies if the beneficial owner of the dividends holds at least 10% of the capital of the distributing company or is a pension fund.
- (dd) The treaty withholding rate is 5% but contains a most-favorite-nation clause. The 0% rate is based on a ruling from a Dutch district court and the Netherlands' treaties with Kuwait and Sweden. The court ruling provides an opportunity to apply a dividend withholding tax exemption under the Netherlands-South Africa tax treaty if the corporate shareholder holds at least 10% of the capital of the company paying the dividends.
- (ee) The 5% treaty withholding tax rate applies if either of the following circumstances exists:
- The receiving company owns 50% or more of the capital of the company paying the dividends.
 - The receiving company owns 25% or more of the capital of the company paying the dividends, provided that at least one other company that is a resident of Spain also owns 25% or more of that capital.
- Otherwise, the rate is increased to 15%.
- (ff) The 5% rate applies if the recipient of the dividends owned at least 50% of the distributing company for a period of 12 months preceding the date on which the dividends are declared.
- (gg) A 10% rate applies if the beneficial owner is a pension fund that is recognized and controlled according to the statutory provisions of Indonesia and if the income of the pension fund is generally exempt from tax.
- (hh) The 0% rate applies if the beneficial owner is a pension fund.
- (ii) The tax treaty provides for full relief of withholding taxes on dividend payments to the following:
- Corporate investors (generally including foundations and establishments), provided that they hold at least 10% of the capital of the company paying the dividends throughout a 365-day period
 - Recognized pension funds

The tax treaty between the Netherlands and the Russian Federation was terminated, effective from 1 January 2022.

The Netherlands is in continuous negotiations with other jurisdictions to conclude new tax treaties or amend existing ones. The Netherlands concluded new tax treaties with Chile and Cyprus during 2021, but the treaties had not yet entered into force as of 1 January 2022. In 2021, the Netherlands signed a protocol to amend the Netherlands-Germany tax treaty and the Netherlands-Poland tax treaty. During 2021, the protocol to amend the Netherlands-Ukraine tax treaty (signed by the Netherlands in 2018) was ratified by Ukraine.

During 2021, the Netherlands reached an official agreement on the text of the tax treaties with Andorra, Bangladesh and Spain as well as on the text of the new tax agreements with Aruba and Curacao. In 2022, the Netherlands is continuing tax treaty negotiations with Bahrain, Barbados, Belgium, Brazil, Kyrgyzstan, Moldova, Morocco, Mozambique, Portugal, the Russian Federation, Rwanda, Sri Lanka, Suriname, Uganda and the United Arab Emirates.

Carryback	0
Carryforward	Unlimited

- (a) For resident companies and New Caledonian branches, surtaxes are imposed on the corporate income tax. For further information and for details concerning these rates, see Section B.
- (b) This is the withholding tax rate under New Caledonia domestic law. The New Caledonia-France tax treaty may reduce or eliminate the withholding tax. For further information, see Section B.
- (c) Profits derived in New Caledonia by branches of nonresident companies are deemed to be distributed, normally resulting in a branch withholding tax of 21% on after-tax income. This tax may be reduced or eliminated by a tax treaty.

B. Taxes on corporate income and gains

Corporate tax. The taxation of New Caledonian companies is based on a territorial principle. As a result, New Caledonian companies carrying on a trade or business outside New Caledonia are generally not taxed in New Caledonia on the related profits and cannot take into account the related losses. Profits derived in New Caledonia by branches of nonresident companies are deemed to be distributed, normally resulting in a branch withholding tax of 18% on after-tax income. It may be reduced or eliminated by a tax treaty.

Rates of corporate tax. The standard corporate tax rate is 30%. A higher corporate tax rate of 35% applies to companies related to the mining industry. A reduced corporate tax rate of 15% applies to taxable income not exceeding XPF10 million of small or medium enterprises if the following conditions are met:

- The turnover of the company is less than XPF200 million.

- At least 75% of the company is owned by individuals.
- The share capital of the company is entirely paid up.

An Additional Social Contribution (Contribution Sociale Additionnelle) is due from companies, other than companies engaging in mining activities, and branches that have taxable income of more than XPF200 million. The following are the progressive tax rates:

- Taxable income between XPF200 million and XPF300 million: a 5% rate applies
- Taxable income between XPF300 million and XPF400 million: a 10% rate applies
- Taxable income above XPF400 million: a 15% rate applies

The contribution is not tax deductible, and no tax credit can offset the contribution.

Under certain conditions, mining activities companies are entitled to income tax exemptions or rebates during the construction and exploitation phases of the project.

Tax incentives. Mining companies may benefit from various tax incentives for mining or metallurgical investments projects in New Caledonia under the New Caledonian Tax Code and the French Tax Code.

Other tax incentives exist for investments in certain sectors, such as tourism, new energy sources and hotels.

Capital gains. Capital gains derived from the sale of fixed assets are divided into short-term and long-term gains.

Short-term capital gains are gains derived from the sale of fixed assets that have been held for less than two years and parts of the gains on depreciable assets that have been held for more than two years that corresponds to the depreciation. Short-term capital gains are subject to corporate income tax at the normal 30% rate. Taxation may be spread over three years.

Long-term capital gains are taxed at rates of 15% (mainly sales of non-depreciable assets held for more than two years and sales of patents) and 25% for gains deriving from construction property and shares of companies whose main assets consist of land and buildings.

The 15% and 25% reduced rates are subject to the condition that the company allocates, respectively, 85% and 75%, of the capital gains to a special long-term gains reserve. Any distribution of such a long-term gains reserve is added back to taxable income in order for the distribution to be subject to the 30% normal tax rate.

Short-term capital losses are deductible for the purposes of calculating taxable income. Long-term capital losses can be offset against long-term capital gains in the following 10 tax periods.

Administration. In general, companies must file a tax return within four months following the end of their financial year.

Corporate income tax is prepaid in two installments that are payable by the end of the 7th and 11th months of the financial year. They are calculated based on 1/3 of corporate income tax paid

the previous tax year. The balance of corporate tax is due four months after the end of the financial year. The rules governing the payment of corporate income tax also apply to the payment of the Contribution Sociale Additionnelle.

In general, late payment and late filing are subject to a 10% penalty. If additional tax is payable as a result of a reassessment of tax, interest is charged at 0.4% per month (4.8% per year). Many specific rules apply to interest and penalties.

Dividends. Dividends received from resident companies are exempt from tax. Dividends received from nonresident companies are subject to corporate income tax at the standard rate based on the gross amount of dividends. Any withholding tax levied in the source country gives rise to a tax credit.

Distributions of dividends are subject to a 18.6% withholding tax, which is the Tax on Income Derived from Securities (Impôt sur le Revenu des Valeurs Mobilières, or IRVM). This withholding tax applies to dividends paid to resident and nonresident companies and individuals.

Distributions are also subject to the Social Caledonian Contribution (Contribution Calédonienne de Solidarité, or CCS) at the rates of 2.6% for residents and 5% for nonresidents. This contribution is not withheld at the source. A return together with a payment is required.

The New Caledonia-France double tax treaty reduces the rate of the withholding tax that can be levied by the state of the source of the dividends to 5% for companies and 15% for individuals and partnerships.

If the recipient is a New Caledonian company, IRVM is not due for the portion of profits corresponding to dividends initially received by the distributing company from which IRVM was withheld.

The following are the total rates of the withholding tax on dividends (IRVM + CCS):

- Paid to a New Caledonian company (unless it is a redistribution): 18.6%
- Paid to a foreign company: 21%
- Paid to a French company: 5%

A 3% Additional Contribution to Corporate Income Tax (Contribution Additionnelle à l'Impôt sur les Sociétés, or CAIS) is levied on the gross amount of distributions of dividends in excess of XPF30 million. This contribution is not withheld at the source. A return together with a payment is required.

Withholding taxes on interest and royalties. Under New Caledonia domestic law, interest income received from New Caledonian resident companies and New Caledonian permanent establishments on their deposits, intragroup loans when the beneficiary is a resident company, other than a bank or financial corporation (for which a special tax applies), and current accounts, is subject to the Withholding Tax on Receivables, Deposits and Guarantees (Impôt sur le Revenu des Créances, Dépôts et Cautionnement, or IRCDC) at a rate of 8% of the gross revenue. CCS at a rate of

2.6% is also due. Some exclusions are provided, including current accounts financing real estate operations.

Interest charged on loans to a nonresident company is not subject to IRCDC, but it is subject to General Consumption Tax (see Section D).

No withholding tax is levied on royalties.

C. Determination of trading income

General. The assessment is based on financial statements prepared according to accepted accounting principles, subject to certain adjustments.

Deductibility of interest. In general, interest payments are fully deductible. However, certain restrictions are imposed.

Interest accrued by a New Caledonian entity with respect to loans from its direct shareholders may be deducted from the borrower's taxable income only if the share capital of the borrower is fully paid-up. In addition, the deduction of interest paid to shareholders is denied to the extent the interest rate exceeds the greater of the following:

- Legal interest rate in force for the period in which the interest is due, as provided in Article L.313-2 of the French Financial and Monetary Code (FFMC)
- Legal interest rate in force for the period in which the interest is due, as provided in Article L.313-2 of the FFMC plus 3%, but not to exceed 5%

In addition, interest paid to a nonresident company that is domiciled or established in a jurisdiction where it benefits from a privileged tax regime (that is, the taxation of the company is less than 50% of the taxation in New Caledonia) is deductible only if the debtor provides evidence that the expenditure corresponds to actual transactions and that the expenditure is not abnormal or exaggerated in nature.

Inventories. Inventory is normally valued at the lower of cost or market value. Cost must be determined under a weighted average cost price method. A first-in, first-out basis is also generally acceptable, but a last-in, first-out basis is not permitted.

Reserves. In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes.

Capital allowances. Assets are depreciated using the straight-line method or the declining-balance method.

Tax credit for research and development. To encourage investments in research and development (R&D), a tax credit for R&D expenditure has been enacted through Law No. 2020-2, dated 20 January 2020 (Section Lp 37-16 of the New Caledonian Tax Code).

The tax credit equals 30% of qualifying expenses related to R&D operations (qualifying expenses are depreciation of fixed assets used in a research activity and staff expenses related to research).

The credit is capped at XPF5 million. It applies to expenses incurred between 1 January 2020 and 31 December 2023.

Relief for tax losses. Losses incurred may be carried forward indefinitely. Losses may not be carried back.

Groups of companies. New Caledonia does not have a tax group regime.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
General Consumption Tax (Taxe Générale sur la Consommation, or TGC)	3/6/11/22
Business license fees (fixed and variable); the variable fee corresponds to 1.2% of the Cost, Insurance, Freight [CIF] value of imports of the company	Various
Registration duty	1 to 9

E. Miscellaneous matters

Foreign-exchange controls. The currency in New Caledonia is the Pacific franc (XPF).

No specific exchange-control regulations are imposed in New Caledonia.

Payments to residents of tax havens. Under Article 21VI of the New Caledonian Tax Code, specified payments that are paid or payable by individuals or legal persons domiciled or established in New Caledonia to individuals or legal persons who are domiciled or established outside New Caledonia in a jurisdiction where they benefit from a privileged tax regime (that is, the taxation of which is less than 50% of that in New Caledonia) are deductible only if the debtor provides evidence that the payments correspond to actual transactions and that are not abnormal or exaggerated in nature. The following are the specified payments:

- Interest payments
- Other income from bonds, receivables and deposits
- Royalties for the assignment or grant of operating licenses, patents, trademarks, processes or manufacturing formulas and similar rights
- Remuneration for services

Reorganizations. On election by the companies involved, mergers, spin-offs, split-offs and dissolutions without liquidation may qualify for a special rollover regime.

F. Tax treaty

New Caledonia's only tax treaty is with France. Under the provisions of this tax treaty, dividends are taxable at source at a maximum rate of 5% (if the beneficiary is a corporation) or 15% (if the recipient is an individual). The rate of the withholding tax levied on the profits deemed to be distributed by a New Caledonian branch cannot exceed 10%. Interest expenses are not

subject to withholding tax in the source state. Royalties are subject to a maximum 10% withholding tax.

In addition, under the tax treaty between France and Canada, France includes New Caledonia. Consequently, the treaty applies to New Caledonia. Dividends are taxable at source at a maximum rate of 15% or 5% (if the beneficiary is a corporation holding more than 10% of the distributing company). Interest expenses are subject to withholding tax in the source state at a maximum rate of 10% or 0% in certain cases. Royalties are subject to a withholding tax in the source state at a maximum rate of 10% or 0% in certain cases.

A. At a glance

Corporate Income Tax Rate (%)	28
Capital Gains Tax Rate (%)	0
Branch Tax Rate (%)	28
Withholding Tax (%)	
Nonresidents	
Dividends	30 (a)
Interest	15 (b)
Royalties from Patents, Know-how, etc.	15 (c)
Payments to Contractors	15 (d)
Branch Remittance Tax	0
Residents	
Dividends	33 (e)
Interest	33 (f)
Net Operating Losses (Years)	
Carryback	0 g
Carryforward	Unlimited (h)

(a) This is a final tax. If dividends are fully imputed (see Section B), the rate is reduced to 15% (for cash dividends) or to 0% (for all non-cash dividends and for cash dividends if nonresident recipients have direct voting interests of at least 10% or if a tax treaty reduces the New Zealand tax rate below 15%). The rate is also reduced to 15% to the extent that imputation credits are passed on to foreign investors through the payment of supplementary dividends under the foreign investor tax credit regime.

(b) This is a final tax if the recipient is not associated with the payer. For an associated person, this is a minimum tax (the recipient must report the income on its annual tax return, but it may not obtain a refund if the tax withheld

exceeds the tax that would otherwise be payable on its taxable income). Under the Income Tax Act, associated persons include the following:

- Any two companies in which the same persons have a voting interest of at least 50% and, in certain circumstances, a market value interest of at least 50% in each of the companies
- Two companies that are under the control of the same persons
- Any company and any other person (other than a company) that has a voting interest of at least 25% and, in certain circumstances, a market value interest of at least 25% in the company

Interest paid by an approved issuer on a registered security to a non-associated person is subject only to an approved issuer levy (AIL) of 2% of the interest payable. An AIL rate of 0% applies to interest paid to nonresidents on certain widely offered and widely held corporate bonds that are denominated in New Zealand currency. Legislation made changes to the nonresident withholding tax (NRWT) and AIL rules affecting associated person and branch lending. The changes generally apply from 30 March 2017 or, for existing arrangements, from the beginning of the borrower's income year following 30 March 2017. The changes include the following:

- A new concept of "nonresident financial arrangement income" applies to certain financial arrangements between associated parties. If the borrower and lender are associated, the New Zealand borrower is required to perform a calculation to confirm that NRWT is being paid at approximately the same time the interest is deducted.
 - The concepts of associated person and related-party debt are extended to include funding provided by a member of a "nonresident owning body," as well as indirect associated funding such as certain back-to-back loans and multiparty arrangements.
 - New limits are imposed on the onshore and offshore branch exclusions from NRWT under which interest payments from a New Zealand resident (or a New Zealand branch of a nonresident) to a nonresident are subject to NRWT or AIL, regardless of whether the funding is channeled through a branch.
- (c) This is a final tax on royalties relating to literary, dramatic, musical or artistic works. For other royalties, this is a minimum tax.
- (d) This is neither a minimum nor a final tax and is paid on account of any annual income tax liability. Effective from 1 April 2017, labor-hire firms are required to withhold tax from all payments made to contractors, and contractors can elect their own withholding rate without having to apply to the Inland Revenue Department for a special tax code (subject to a minimum withholding rate of 10% for resident contractors and 15% for nonresident contractors).
- (e) See Section B.
- (f) A 45% default rate applies if recipients' tax file numbers are not supplied. Individuals may elect rates of 10.5%, 17.5%, 30%, 33% or 39%. The basic rate for interest paid to companies is 28%, but companies may elect a 33% or 39% rate.
- (g) For the 2019-20 and 2020-21 income years only, taxpayers may be eligible to carry back tax losses incurred in either of those years to the immediately preceding year. See Section C.
- (h) See Section C.

B. Taxes on corporate income and gains

Income tax. Resident companies are subject to income tax on worldwide taxable income. Nonresident companies carrying on business through a branch pay tax only on New Zealand-source income.

A company is resident in New Zealand if it is incorporated in New Zealand, if it has its head office or center of management in New Zealand or if director control is exercised in New Zealand.

Rate of income tax. Resident and nonresident companies are subject to tax at a rate of 28%.

Capital gains. No capital gains tax is levied in New Zealand. However, residents may be taxed on capital gains derived from many types of financial arrangements, and all taxpayers may be taxed on capital gains derived from certain real and personal

property transactions. These gains are subject to tax at the standard corporate tax rate.

Administration. The income year is from 1 April to 31 March. A company with an accounting period that ends on a date other than 31 March may apply to the Commissioner of Inland Revenue for permission to adopt an income year that corresponds to its accounting period. If the Commissioner approves an alternative income year, income derived during that year is deemed to have been derived during the year ending on the nearest 31 March. For this purpose, year-ends up to 30 September are deemed to be nearest the preceding 31 March, and year-ends after 30 September are deemed to be nearest the following 31 March.

Companies with year-ends from 1 April to 30 September must file tax returns by the seventh day of the fourth month following the end of their income year. All other companies must file their returns by 7 July following the end of their income year. If the company has a tax agent, the filing deadline is extended to the following dates:

- If the return is for the year ending 31 March, the due date is the following 31 March.
- If the return is for any year ending on an annual balance date between 30 September and 31 March, the due date is the second 31 March succeeding the actual balance date.
- If the return is for any year ending on an annual balance date between 31 March and 1 October, the due date is the following 31 March.

Provisional tax payments must generally be made in the fifth, ninth and thirteenth months after the beginning of the company's income year. The first installment equals one-third of the provisional tax payable; the second installment equals two-thirds of the provisional tax payable, less the amount of the first installment; and the balance of the provisional tax is payable in the third installment. In general, the provisional tax payable in a year equals 105% of the income tax payable in the preceding year (standard uplift method). Companies that are registered for Goods and Services Tax (GST; see Section D) that meet certain criteria may elect to calculate their provisional tax under a GST ratio method and pay the provisional tax in installments when they file their GST returns, generally every two months. A further alternative method of paying provisional tax, called the accounting income method (AIM), is generally available for businesses with annual gross income of under NZD5 million. AIM involves the use of approved accounting software and more frequent payments.

Companies with year-ends from October to January must pay terminal tax by the seventh day of the eleventh month following the end of the income year. Companies with a February year-end must pay terminal tax by the fifteenth day of the following January. All other companies must pay terminal tax by the seventh day of February following the end of their income year. The date for payment of terminal tax may be extended by two months if the company has a tax agent.

Several measures impose interest and penalties on late payments of income tax. For late payments or underpayments, the basic penalty equals 5% of the unpaid tax. This penalty is reduced to 1%

if the tax is paid within a week after the due date. Interest may be payable if provisional tax paid at each installment date is less than the relevant proportion (generally, one-third for the first installment date, two-thirds for the second installment date and three-thirds for the third installment date) of the final income tax payable for the year. Conversely, interest may be credited on overpaid provisional tax.

Interest charges and the risk of penalties with respect to provisional tax may be reduced if provisional tax is paid under a tax-pooling arrangement through a Revenue-approved intermediary.

The risk of interest and penalties is minimized for companies that use the GST ratio or standard uplift methods for calculating and paying their provisional tax.

The use of a tax-pooling arrangement is not permitted for AIM provisional tax payments. However, taxpayers using the AIM method that make the provisional tax payments calculated by their AIM-capable software are generally not subject to interest if their year-end residual income tax results in a different tax liability.

From the 2017-18 income year, companies paying provisional tax under the standard uplift method (see above) are not subject to interest on provisional tax installments until their terminal tax date if the residual income tax liability of the company for a year does not exceed NZD60,000 or otherwise until the third installment date.

Dividends

Exempt income. Dividends received by New Zealand resident companies from other New Zealand resident companies are taxable. However, dividends received from wholly owned subsidiaries resident in New Zealand are exempt. Dividends received by New Zealand resident companies from nonresident companies are generally exempt. Certain dividends received by New Zealand resident companies from nonresident companies are taxable, including the following:

- Dividends that are directly or indirectly deductible overseas
- Dividends on certain fixed-rate shares
- Dividends derived by Portfolio Investment Entities (PIEs; see Section E)
- Dividends relating to certain portfolio (less than 10%) investments that are exempt from income attribution under the foreign investment fund regime (see Section E)

Imputation system. New Zealand's dividend imputation system enables a resident company to allocate to dividends paid to shareholders a credit for tax paid by the company. The allocation of credits is not obligatory. However, if a credit is allocated, the maximum credit is based on the current corporate income tax rate. Based on the current corporate income tax rate of 28%, the maximum credit is 28/72, meaning that a dividend of NZD72 may have an imputation credit attached of up to NZD28.

The imputation credits described above may not be used to offset nonresident withholding tax (NRWT) on dividends paid to nonresidents. They may allow NRWT to be reduced to 0% for all

non-cash dividends and for cash dividends if nonresident recipients hold direct voting interests of at least 10% or if a tax treaty reduces the tax rate below 15%. A New Zealand company may pass on the benefit of such credits to other nonresident investors through payments of supplementary dividends. The aim of this mechanism is to allow nonresident investors to claim a full tax credit in their home countries for New Zealand NRWT. The New Zealand company may also claim a partial refund or credit with respect to its own New Zealand company tax liability. Supplementary dividends can generally be made only to nonresident companies and individuals who hold direct voting interests of less than 10% and who are subject to a tax rate of at least 15% after any tax treaty relief. Supplementary dividends can also be paid with respect to qualifying nonresident investors in certain portfolio investment entities (PIEs) that invest in assets outside New Zealand.

Australian resident companies may also elect to maintain a New Zealand imputation credit account and collect imputation credits for income tax paid in New Zealand. New Zealand shareholders in an Australian resident company that maintains such an imputation credit account and attaches imputation credits to dividends can receive a proportion of the New Zealand imputation credits equal to their proportion of shareholding in the Australian company. Imputation credits must be allocated proportionately to all shareholders.

In general, the carryforward of excess credits for subsequent distribution must satisfy a 66% continuity-of-shareholding test. Interests held by companies or nominees are generally traced through to the ultimate shareholders. Listed, widely held companies and limited attribution foreign companies are entitled to special treatment. In effect, they are treated as the ultimate shareholder if their voting interest in other companies is less than 50% or if the actual ultimate shareholders would each have voting interests of less than 10% in the underlying company. The definition of a listed company includes companies listed on any exchange in the world that is recognized by the Commissioner of Inland Revenue. For carryforward purposes, direct voting or market value interests of less than 10% may be considered to be held by a single notional person, unless such an interest is held by a company associated with the company that has the carryforward.

Resident withholding tax. For dividends paid to a resident company by another resident company that is not in a tax group with the recipient, the payer must deduct a withholding tax equal to 33%, having first allowed for any imputation credits attached to the dividend, unless the recipient holds an exemption certificate. From 1 April 2020, the Inland Revenue provides a public register of all current exemption certificates.

Although this rate does not align with the corporate income tax rate of 28%, any excess tax can be used as tax credits during or refunded through the annual income tax return process.

Foreign tax relief. In general, any tax paid outside New Zealand by a New Zealand resident taxpayer can be claimed as a credit

against the tax payable in New Zealand. The credit is limited to the amount of New Zealand tax payable on that income.

C. Determination of trading income

General. Assessable income consists of all profits or gains derived from any business activity, including the sale of goods and services, commissions, rents, royalties, interest and dividends.

A gross approach applies to the calculation of taxable income. Under this approach, a company calculates its gross assessable income and then subtracts its allowable deductions to determine its net income or loss. If the company has net income, it subtracts any losses brought forward or group losses to determine its taxable income.

To be deductible, expenses must generally be incurred in deriving gross income or necessarily incurred in carrying on a business for the purpose of deriving gross income. Interest is generally deductible for most New Zealand resident companies, subject to the thin-capitalization rules (see Section E). Interest paid on certain debts that are stapled to shares may be treated as nondeductible dividends.

In addition, changes introduced in March 2022 limit the deductibility of interest expenses on residential investment property from 1 October 2021. Interest deductibility will be phased out from 100% to 0% from 1 October 2021 to 1 April 2025; with 0% interest being deductible from 1 April 2025.

For companies, these new rules will generally apply only if residential property makes up more than half of their total assets or if five or fewer people own more than half of the company. Relief from the interest limitation rules may be available in certain circumstances, such as for property development, or if the interest expense relates to a property that is a “new build.”

Deductions for certain business entertainment expenses are limited to 50% of the expenses incurred. Capital expenditures are generally not deductible.

Exempt income. The only major categories of exempt income are dividends received from a wholly owned subsidiary resident in New Zealand, certain dividends received from nonresident companies and certain dividends paid out of capital gains derived from arm’s-length sales of fixed assets and investments on winding up.

A specific exemption applies until 31 December 2024 for income derived by nonresident companies from certain oil and gas drilling and related seismic or electromagnetic survey vessel activities in New Zealand’s offshore permit areas.

Inventories. Stock in trade must generally be valued at cost. Market selling value may be used (but not for shares or “excepted financial arrangements”) if it is lower than cost. Cost is determined by reference to generally accepted accounting principles, adjusted for variances between budgeted and actual costs incurred. Simplified rules apply to “small taxpayers,” which are those with annual turnover of NZD3 million or less. A further concession applies to taxpayers with annual turnover of NZD1,300,000 or less and closing inventory of less than NZD10,000.

Depreciation. The depreciation regime generally allows a deduction for depreciation of property, including certain intangible property, used in the production of assessable income. Most assets can be depreciated using the straight-line or the declining-balance methods. A taxpayer may elect to apply the pool-depreciation method for assets valued at less than NZD5,000. Under the pool-depreciation method, the lowest rate applicable to any asset in the pool is used to depreciate all assets in the pool. A taxpayer may have more than one pool of assets. Assets in a pool must be used for business purposes only or be subject to Fringe Benefit Tax (FBT; see Section D) to the extent the assets are not used for business purposes. Buildings may not be pooled.

From 17 March 2021, property costing NZD1,000 or less may generally be expensed immediately. Between 17 March 2020 and 16 March 2021, the threshold was temporarily increased to NZD5,000, and prior to 17 March 2020, the threshold was set at NZD500.

From the 2020-21 income year onward, depreciation is reintroduced for nonresidential buildings. From the 2011-12 income year until the 2019-20 income year, depreciation could be claimed on commercial building fitouts, certain depreciable land improvements and structures other than structures with an estimated useful life greater than 50 years.

The rates for plant and machinery vary depending on the particular industry and type of plant and machinery.

Tax depreciation is generally subject to recapture on the sale of an asset to the extent the sales proceeds exceed the tax value after depreciation. Amounts recaptured are generally included in assessable income in the earliest year in which the disposal consideration can be reasonably estimated. If sales proceeds are less than the tax value after depreciation, the difference may generally be deducted as a loss in the year of disposal. However, such losses on buildings are deductible only if they occur as a result of natural disasters or other events outside the taxpayer's control.

Special deductions. A few special deductions designed to achieve specific government objectives are available, such as certain deductions relating to petroleum, mining, forestry and agricultural activities.

Research and development tax incentives. Certain unlisted New Zealand resident companies carrying out R&D activities in New Zealand may convert current year R&D business tax losses to refundable cash tax credits at the current company tax rate of 28%. The maximum annual losses that a company can "cash out" from the 2020-21 income year onwards is NZD2 million (a cash credit of NZD560,000 at the current company tax rate of 28%). Credits received may be repayable (and tax losses may then be reinstated) in certain circumstances, such as the sale of R&D assets, cessation of New Zealand tax residence, liquidation or the breach of a 10% shareholder continuity test. The extent of R&D credit repayments may be reduced by the amounts of income tax liabilities in intervening income years.

From the 2019-20 income year, all businesses regardless of their legal structure are eligible to claim the R&D tax credit, including industry research cooperatives, state-owned enterprises and

mixed-ownership model companies. The key features of the scheme include the following:

- A tax credit of 15% on eligible R&D expenditure. The definition for R&D is similar to other global schemes. Eligible expenditure encompasses a broad range of actual R&D costs, but some activity and expenditure exclusions apply.
- A minimum R&D expenditure threshold of NZD50,000 per year with an NZD120 million cap per year on eligible R&D expenditure (with a mechanism to go beyond the cap).
- An overseas R&D expenditure cap of 10% of total eligible expenditure.

From the 2019-20 income year, certain businesses are eligible to refund their tax credits if they satisfy additional corporate and R&D intensity requirements. Alternatively, tax credits not refunded can be carried forward.

The R&D credit for tax losses regime and the R&D tax credit regime are not mutually exclusive but have different R&D definitions and eligibility criteria.

Trading losses. Trading losses may generally be carried forward and offset against future taxable income if, at all times from the beginning of the year of loss to the end of the year of offset, a group of persons held aggregate minimum voting interests in the company and, in certain circumstances, minimum market value interests of at least 49%.

For breaches of ownership continuity occurring in the 2020-21 and later income years, a new “business continuity test” applies to determine whether a business that has breached the 49% threshold is able to carry forward its tax losses. Under the business continuity test, losses arising from the 2013-14 income year onwards may generally be carried forward provided there has been no “major change” in the nature of the company’s business activities. Most companies will be required to maintain the business continuity test from the time of the ownership change until the earliest of the end of the income year in which the losses are utilized or five years after the breach.

Sales of residential property (that is not the main home) purchased between 1 October 2015 and 28 March 2018 may be taxable if they occur within a two-year “bright-line” period. For agreements to purchase residential property entered into between 29 March 2018 and 26 March 2021, the “bright-line” period is five years. For agreements to purchase residential property entered into on or after 27 March 2021, the “bright line” period is generally extended to 10 years. Legislation expected to be enacted in 2022 retains the five-year period for “new builds” acquired on or after 27 March 2021.

The offsetting of losses on “bright-line” transactions against other types of income may be limited. For “close companies” (generally if five or fewer people own more than half of the company), additional limitations exist to restrict the offset of losses generated from rental properties (in cases in which rental expenditure exceeds rental income) against income from other sources.

For the 2019-20 and 2020-21 income years, taxpayers may be eligible to carry back tax losses incurred in either of those years to

the immediately preceding year. Losses that can be carried back are limited to the available taxable income in the preceding year to which loss is carried back. Taxpayers can access these losses during the year either by amending the prior-year assessment or through re-estimating their current provisional tax requirements.

Group losses. Losses incurred within a group of companies may be offset against other group company profits either by election or subvention payments.

Subvention payments are intercorporate payments specifically made to effect the transfer of company losses. They are treated as deductions to the paying (profit) company and as taxable income to the recipient (loss) company. The loss company and the profit-making company must be in the same group of companies throughout the relevant period. The required common ownership is 66%.

Wholly owned corporate groups may elect income tax consolidation.

Elective regime for closely held companies. Certain closely held companies can elect to become look-through companies (LTCs) if they have five or fewer shareholders and be taxed similarly to partnerships. The eligibility and membership criteria for this regime include restrictions on the type of shareholder and some restrictions on the earning of foreign income.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and Services Tax (GST), similar to a value-added tax, levied on the supply of goods and services and on imports	15
Fringe Benefit Tax (FBT); paid by the employer on the value of fringe benefits provided to employees and shareholder employees; Standard rate	63.93
(If benefits are attributable to particular employees, employers may elect to calculate FBT on the attributed benefits at a range of rates between 11.73% and 63.93%. The rates vary depending on the employee's cash remuneration inclusive of the fringe benefits. Non-attributed benefits are subject to FBT at a rate of 49.25% [63.93% if provided to major shareholder employees]. As a further alternative, employers may pay FBT at a rate of 63.93% on attributed benefits and 49.25% on non-attributed benefits, 63.93% if provided to major shareholder-employees. Further options are expected to be finalized in 2022.)	
Accident compensation levy, on gross salaries and wages, paid by Employer; rate (before residual and health and safety elements) varies according to industry class and may be reduced if the employer meets certain work safety criteria; certain employers may take direct responsibility under full self-cover or partnership discount plans;	

Nature of tax	Rate (%)
approximate average levy	0.67 (0.63 from April 2022)
Employee	1.21 (1.27 from April 2022)
Self-employed; rate (before residual and health and safety elements) varies according to industry class, incorporating income and non-income benefit portions (the calculation of which depends on the individual's earnings) and according to age and abatement factors if a guaranteed amount of weekly compensation is purchased;	
approximate average levy	0.67 (0.63 from April 2022)
(Self-employed persons must also pay the employee rate of 1.21%.)	

E. Miscellaneous matters

Anti-avoidance legislation. Legislation permits the Inland Revenue Department to void any arrangement made or entered into if tax avoidance is one of the purposes or effects of the arrangement and is not merely incidental.

Controlled foreign companies. New Zealand residents that have an interest in a controlled foreign company (CFC) need to consider the application of the CFC rules. A CFC is a foreign company under the control of five or fewer New Zealand residents or a group of New Zealand resident directors. In general, for purposes of the CFC rules, control is more than 50% ownership. A New Zealand resident with an income interest in the CFC of greater than 10% is required to calculate and include in income the attributed foreign income or loss of the CFC unless the CFC is resident in Australia and meets certain criteria or the active-income exemption applies.

Under the active-income exemption, no attribution is required if passive income is less than 5% of the CFC's or a relevant group's income. If the 5% threshold is exceeded, any attribution is limited to passive income. The rules defining passive income and calculating the percentage of a CFC's passive income in relation to total income are complex.

Foreign investment fund system. New Zealand has a foreign investment fund (FIF) system that aims to tax the change in value of a New Zealand resident's interest in the FIF over an income year. The change in value may include income, capital growth and any exchange fluctuation.

The FIF regime generally applies to all offshore investments that are not CFC interests, including interests in foreign companies, foreign unit trusts, foreign life insurance, and foreign savings and superannuation funds.

The FIF rules do not apply to individuals owning FIF interests that cost less than NZD50,000. Exemptions are also provided for certain employment-related foreign superannuation schemes and foreign private annuities and pensions as well as for the first four years that individuals who become resident in New Zealand hold interests in foreign life insurance funds and superannuation schemes, if the individuals held these interests before they became resident in New Zealand. Superannuation scheme interests

acquired by individuals before becoming resident in New Zealand have generally been removed from the FIF regime, effective from 1 April 2014.

Interests in certain Australian listed companies and unit trusts, certain venture capital investments in grey list country companies and shares held under certain employee share schemes may be excluded from the FIF rules if statutory criteria are met. The grey list countries are Australia, Canada, Germany, Japan, Norway, Spain, the United Kingdom (including Northern Ireland) and the United States.

The most common methods for calculating FIF income are the 5% fair dividend rate method and the comparative value method. The comparative value method involves a comparison of opening and closing values. Other methods include the attributable FIF income method, which includes an “active business” and “active income” exemption for FIF interests in companies of at least 10% (similar to the exemption that applies under the CFC rules [see *Controlled foreign companies*]), a deemed rate of return method and the cost method. The choice of method is limited by legislative criteria.

Portfolio investment entities. Certain collective-investment entities that elect to be in the Portfolio Investment Entity (PIE) regime are not taxable on gains on the disposal of New Zealand and certain Australian shares. In addition, their income may generally be taxed at the corporate tax rate or at rates approximating their individual investors’ marginal tax rates (which may be 0% for non-resident investors in certain types of PIEs that invest wholly or partly in assets outside New Zealand).

Transfer pricing. The transfer-pricing regime in New Zealand is aimed primarily at cross-border arrangements between associated parties. Taxpayers can adopt the method that produces the most reliable measure of arm’s-length consideration. The allowable methods are the comparable uncontrolled price method, the resale price method, the cost-plus method, the profit-split method and the comparable profits method. Binding rulings with respect to transfer-pricing issues are available from the Commissioner of Inland Revenue. New Zealand and countries with which New Zealand has concluded tax treaties may enter into multilateral advance pricing agreements under the transfer-pricing regime.

The New Zealand government has enacted legislation containing reforms to the current transfer-pricing regime, effective for income years commencing on or after 1 July 2018, as part of changes being made to address base erosion and profit shifting. The main measures include the following:

- The New Zealand transfer pricing rules are aligned with the Organisation for Economic Co-operation and Development (OECD) transfer-pricing guidelines and Australian transfer-pricing rules. The legal form can be disregarded if it does not align with the actual economic substance of the transaction.
- The ability of the Inland Revenue Department to reconstruct an arrangement for transfer-pricing purposes is based on the corresponding test in the OECD’s transfer pricing guidelines.
- The onus of proof on transfer-pricing matters is shifted to the taxpayer.

- The Inland Revenue Department's powers to access multinationals' information and documents held offshore, including information about other nonresident group companies, is increased.

Debt-to-equity ratios. In conjunction with the transfer-pricing regime (see *Transfer pricing*), a thin-capitalization regime applies to New Zealand entities that are at least 50% owned or controlled by a single nonresident (however, interests held by persons associated with a nonresident may be included for the purpose of determining the nonresident's level of control). These inbound thin-capitalization rules also apply to the following:

- New Zealand companies that are at least 50% owned or controlled by two or more non-associated nonresident investors if they are regarded as acting together with respect to the debt funding of the New Zealand entities
- Certain trusts and trust-controlled companies if at least 50% of the value of trust settlements have been made by a nonresident or by nonresidents acting together or if entities otherwise subject to the rules have general powers to appoint or remove trustees

The inbound thin-capitalization regime generally denies interest deductions to the extent that the New Zealand entity's level of interest-bearing debt exceeds both a safe harbor debt to total assets ratio of 60% and 110% of the ratio of interest-bearing debt to total assets of the entity's worldwide group. A netting rule generally excludes borrowings that are in turn loaned to the following:

- Nonresidents that are not carrying on business in New Zealand through a fixed establishment
- Non-associated persons
- Associates that are subject to the thin-capitalization regime but are not in the lender's New Zealand group

Other significant aspects of the thin-capitalization regime include the following:

- Complex New Zealand and worldwide group membership rules need to be considered.
- Specific rules and thresholds apply to registered banks.
- Certain stapled debt securities and fixed-rate shares are included as debt. Investments in CFCs and interests of at least 10% in FIFs may be excluded from assets.
- Dividend amounts paid on certain fixed-rate shares may also be added back if interest deductions are limited under the thin-capitalization rules.
- Asset revaluation amounts that arise from associated party transactions are generally excluded from asset values in calculating New Zealand group debt percentages unless the revaluations could have been recognized, without a transaction, under generally accepted accounting practices or unless the revaluations arise from a restructuring following acquisition of the company by a non-associated party.
- Certain related-party debt is excluded from the debt amounts used in calculating worldwide group debt percentages in inbound situations.

Similar thin-capitalization rules (often referred to as the outbound thin-capitalization rules) apply to New Zealand residents with income interests in CFCs or with interests in FIFs of at least 10%

that are subject to the “active income” method or Australian exemptions from FIF income attribution.

Under safe harbor rules, the outbound thin-capitalization rules do not limit interest deductions on outbound investment if the New Zealand group debt percentage does not exceed 75% and 110% of the worldwide group debt percentage. Additional exemptions with respect to outbound investment may apply in certain circumstances, including situations in which New Zealand group assets (generally excluding CFC investments and certain interests of at least 10% in FIFs) are at least 90% of the worldwide group assets. An alternative safe harbor threshold calculation based on an interest-to-net income ratio may be used in limited outbound circumstances. The apportionment calculation provides an effective *de minimis* exemption with respect to outbound investment by eliminating any adjustment if annual New Zealand group finance costs do not exceed NZD1 million and provides relief on a tapering basis if those annual finance costs are between NZD1 million and NZD2 million. This *de minimis* relief may also apply to the inbound thin-capitalization rules in certain circumstances.

Changes affecting interest limitation and the thin-capitalization rules form part of the New Zealand government’s base erosion and profit shifting-related reforms apply for income years commencing on or after 1 July 2018. The main changes include the following:

- A new restricted transfer-pricing rule applies to potentially limit the interest rate that can be applied for tax purposes on cross-border loans (over NZD10 million in total). This rule applies in addition to the existing thin-capitalization rules. The restricted transfer-pricing rule for pricing inbound related-party loans determines the credit rating of New Zealand borrowers at a high risk of base erosion and profit shifting, typically no more than two notches below the ultimate parent’s credit rating. The rules remove any features not typically found in third-party debt to restrict the level of deductible interest. Some of the more common features that may be affected include loans with terms of more than five years and the subordination of a loan to other obligations.
- Non-debt liabilities need to be netted off assets in thin-capitalization gearing calculations. Deferred tax is split into “real” and “accounting fictional” categories for the purposes of this rule, with the former being part of non-debt liabilities and the latter removed.

Hybrid and branch mismatch rules. Hybrid and branch mismatch rules were also introduced as part of the New Zealand government’s base erosion and profit shifting-related reforms applying for income years commencing on or after 1 July 2018. These rules are complex and are designed to prevent the exploitation of differences between countries’ tax rules to create tax advantages. New Zealand’s hybrid rules largely follow the OECD recommendations.

F. Treaty withholding tax rates

The rates reflect the lower of the treaty rate and the rate under domestic tax law.

	Dividends	Interest	Royalties
	%	%	%

- (a) Interest paid to a contracting state or subdivision, to certain state financial institutions or with respect to certain state-guaranteed loans may be exempt.
- (b) The following are the tax rates applicable to dividends:
- 0% for certain government bodies if the competent authorities so agree
 - 5% if paid to companies holding at least 10% of the voting power
 - 15% in all other cases
- (c) The rate is reduced to 10% for bank interest. Interest paid to certain government bodies or central banks may be exempt.
- (d) See applicable footnotes to Section A.
- (e) The rate is 10% for interest paid to banks and insurance companies.
- (f) The rate is 10% for interest paid to financial institutions, including insurance companies, or if the interest relates to arm's-length sales on credit of equipment, merchandise or services. Interest paid to certain institutions of the government or the central bank is exempt.

- (g) The 10% rate applies to payments for the use of copyrights, industrial, scientific or commercial equipment, films, tapes or other broadcast matter. The 15% rate applies to other royalties.
- (h) A minimum rate of 15% applies to interest paid to certain associated persons. No tax applies to interest paid to the other country's reserve bank.
- (i) The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria.
- (j) No tax applies to interest paid to government bodies or to unrelated financial institutions in certain circumstances.
- (k) The rate may be reduced to 5% or 0% for company shareholders, depending on their level of ownership and certain other criteria. Dividends paid to certain government institutions are exempt.
- (l) The rate may be reduced to 5% for dividends paid to companies that have an interest of at least 10% in the payer.
- (m) Interest paid to certain government institutions may be exempt.
- (n) The 5% rate applies if the dividends are paid to companies that directly hold at least 50% of the voting power in the payer.
- (o) The rate may be reduced to 5% if the dividends are paid to companies that have an interest of at least 25% in the payer and if the dividends are exempt in the recipient's country.
- (p) The 15% rate is a minimum rate for interest paid to certain associated persons.
- (q) The rate may be reduced to 0% for dividends paid to company shareholders, depending on the shareholders' level of ownership and certain other criteria.
- (r) The following are the tax rates applicable to interest:
 - 0% for loans made by certain export development bodies or unrelated financial institutions
 - 10% in all other cases
- (s) The following are the tax rates applicable to royalties:
 - 5% on certain copyright, cultural, software and patent royalties
 - 10% in all other cases
- (t) The following are the tax rates applicable to dividends:
 - 0% for dividends paid to certain government bodies in some situations
 - 5% if the beneficial owner is a company that holds directly at least 25% of the capital of the company paying the dividends throughout a 365-day period
 - 15% in all other cases

New Zealand has signed a protocol to its tax treaty with Belgium, which has not yet entered into force.

New Zealand has signed and ratified the multilateral Convention on Mutual Administrative Assistance in Tax Matters, which entered into force for New Zealand on 1 March 2014.

New Zealand has entered into an intergovernmental agreement with the United States and related competent authority arrangements with respect to reporting requirements for financial institutions under the US Foreign Account Tax Compliance Act (FATCA).

Legislation enacted in New Zealand in February 2017 implements the G20/OECD Automatic Exchange of Information initiative and the Common Reporting Standard (CRS) for financial institutions. Due diligence requirements under the CRS commenced on 1 July 2017, with reporting financial institutions required to submit automatic exchange of information reporting to the Inland Revenue Department for the tax year ending 31 March 2018 by 30 June 2018, and the first exchange of information occurred on 30 September 2018.

New Zealand has signed the Multilateral Competent Authority Agreement on the Exchange of Country-by-Country (CbC) Reports. These new CbC reporting requirements apply to corporate groups headquartered in New Zealand with annual consolidated group revenue over EUR750 million. Initial analysis undertaken by the Inland Revenue Department suggests that around 20 New

Zealand-headquartered corporate groups are affected by the new rules. Groups with 31 December balance dates are required to collect data for the 12 months beginning 1 January 2016. Groups with a 31 March or 30 June balance date need to collect data for the 12 months beginning 1 April 2016 and 1 July 2016, respectively.

New Zealand has ratified the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (commonly referred to as the Multilateral Instrument, or MLI), with the MLI entering into force on 1 October 2018. New Zealand's treaties have begun to be modified from 2019.

New Zealand has entered into tax information exchange agreements with Anguilla, Bahamas, British Virgin Islands, Cayman Islands, Cook Islands, Curaçao, Dominica, Gibraltar, Guernsey, Isle of Man, Jersey, Marshall Islands, Netherlands Antilles, Niue, St. Vincent and the Grenadines, San Marino, Sint Maarten, Turks and Caicos Islands and Vanuatu. It has also entered into tax information exchange agreements that are not yet in force with Bermuda and St. Christopher and Nevis.

No new tax information exchange agreements are currently being negotiated as these are no longer needed with the signing of the MLI.

A. At a glance

Corporate Income Tax Rate (%)	30
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	15 (a)
Interest	15 (a)
Royalties from Patents, Know-how, etc.	15 (a)
Payments for Movies, Films, Radio and Television	15 (a)
Income Derived from Leasing of Real Estate	2/12 (a)(b)
Air and Maritime Transportation	3 (c)
International Telecommunications	3 (c)
Insurance and Bail Premiums	3 (c)
Reinsurance	1.5 (c)
Musical and Artistic Public Spectacles	0/15 (d)
Compensation for Services	2/10/20 (c)(e)(f)
Other Service Activities	20 (c)
Branch Remittance Tax	15
Net Operating Losses (Years)	
Carryback	0
Carryforward	3

- (a) The 15% rate applies to residents and nonresidents (also, see footnote [b] regarding the tax base for the tax on income derived from the leasing of real estate). A 10% rate applies to interest paid to foreign investment banks.
- (b) For income derived from real estate property when the leasing of real estate is not the main activity of the taxpayer, the tax base equals the net income after applying a deduction of 20% of the gross income. As a result, the effective general rate for residents and nonresidents is 12% and this withholding tax is the final tax. The 2% rate applies if the economic activity of the resident taxpayer is real estate or the leasing of real estate, and this 2% withholding tax is creditable against income tax.
- (c) This withholding tax applies to nonresidents. It is a final tax for nonresidents.
- (d) The 0% rate applies to payments related to filming movies that will be transmitted abroad and promote tourism in Nicaragua and to payments related to non-professional spectacles.
- (e) Transactions with tax havens are subject to a 30% withholding tax. However, the list identifying such tax havens has not yet been issued.
- (f) The 20% rate applies to nonresidents. The 10% applies to residents who are individuals. The 2% rate applies to residents that are legal entities. The withholding tax is creditable against income tax for residents and is final for nonresidents.

B. Taxes on corporate income and gains

Corporate income tax. The Nicaraguan tax system is based on an extended territorial principle. The following items are subject to corporate income tax:

- Income from business activities
- Income from capital income, capital gains and capital losses

Corporate income tax rates. The standard corporate tax rate for resident companies and branches of foreign companies is 30% of taxable income. A company is deemed to be resident for tax purposes if it is incorporated in Nicaragua.

Companies operating under certain special incentive regimes, such as Free Trade Zone companies, are exempt from income tax.

After the third year of operations, companies are subject to tax on their Nicaraguan-source income, which equals the higher of the following:

- 30% of net taxable income
- A percentage of gross taxable income which is the following:
 - 3% for large taxpayers (that is, income of NIO160 million or higher in the preceding fiscal year), except for taxpayers dedicated to fishing in the Caribbean coast of Nicaragua for which a reduced rate of 2% applies
 - 2% for main taxpayers (that is, income of NIO60 million or higher but below NIO160 million in the preceding fiscal year)
 - 1% for the other taxpayers (that is, income below NIO60 million in the preceding fiscal year)

Certain exceptions may be stated in the law.

Capital gains. Capital gains are realized gains resulting from the transfer of immovable and movable assets, goods and rights of the taxpayer. The following are the capital gain tax rates:

- Transfer of assets held in a trust: 5%
- Other capital gains derived by residents and nonresidents: 15%

A definitive withholding tax payment is required on the transfer of property subject to public registration. This payment ranges from 1% to 7% of the transfer value.

Administration. The statutory tax year runs from 1 January through 31 December. However, taxpayers may request a special fiscal year.

Annual income tax returns must be filed within two months after the end of the tax year.

Companies must make monthly advance payments for purposes of income tax equal to 1%, 2% or 3% of their monthly gross income. The advance payments are applied to the annual income tax liability. In addition, for large collectors of the excise tax and financial institutions supervised by the Superintendent of Banks and Other Financial Institutions, the minimum monthly payment is the greater of 30% of monthly profits and 1% of gross monthly income. The advance payments are applied to the annual income tax liability.

The 3% rate applies to large taxpayers (that is, income over NIO160 million in the preceding fiscal year), except for taxpayers dedicated to fishing in the Caribbean coast of Nicaragua for which a reduced rate of 2% applies. The 2% applies to main taxpayers (that is, income over NIO60 million but below NIO160 million in the preceding fiscal year). The 1% rate applies to the other taxpayers (that is, income below NIO60 million in the preceding fiscal year).

Dividends. A 15% withholding tax is imposed on dividends paid to resident individuals and business entities. For dividends paid to nonresident individuals and business entities, the withholding tax rate is 15%.

Foreign tax relief. A direct tax credit for foreign taxes against corporate income tax is not provided in Nicaragua. However, foreign taxes may be deducted from taxable income if the deductibility requirements are met.

C. Determination of trading income

General. Taxable income is calculated in accordance with generally accepted accounting principles (GAAP) or International Financial Reporting Standards (IFRS), subject to adjustments required by the Nicaraguan income tax law.

In general, taxable income includes Nicaraguan-source income derived from goods, services, assets, rights and any other economic activity in Nicaragua, even if such income is accrued or realized abroad, and regardless of whether the taxpayer has physical presence in the country.

Allowable deductions generally include all expenses necessary to generate taxable income. The deduction must be taken in the year in which the expense was incurred and the corresponding tax is withheld (if applicable).

Expenses paid or credited by a resident taxpayer or a permanent establishment of a nonresident to a person or entity resident in a tax haven are subject to a final withholding tax rate of 30%.

Inventories. If inventories are a significant element in the determination of a company's taxable income, the company must value each item based on the lower of the acquisition cost or market price. The law allows companies to use the weighted average cost, first-in, first-out (FIFO) or last-in, first-out (LIFO) methods to determine the cost of merchandise sold. The tax administration may authorize other methods.

Provisions. In general, companies may deduct 2% of the balance of accounts receivable from customers.

Two percent of the provisions for severance payments can also be deducted.

Banks may deduct increases in minimum reserves for debtors in accordance with the standards of the Superintendent of Banks in Nicaragua.

Tax depreciation. Regulations under the income tax law allow the use of the straight-line method to calculate depreciation. However, the tax authorities may authorize certain exporters to use

accelerated depreciation methods. The regulations containing the applicable straight-line rates are pending.

Relief for losses. Companies may carry forward their net operating losses for three years to offset all types of income. Net operating losses may not be carried back.

Groups of companies. Nicaraguan law does not allow consolidated income tax returns or provide any other tax relief to consolidated groups of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; the 0% rate applies to exports of goods produced in Nicaragua and exports of services	0/15
Municipal taxes	
Monthly tax on gross income	1
Annual municipal registration tax; tax base equals one-third of the gross income for the last three months of the preceding tax year	2
Real estate tax; imposed on 80% of the appraised value of the property	1
Payroll taxes; paid by employers (average rate)	22.5

E. Foreign-exchange controls

The Nicaraguan currency is the córdoba (NIO). Effective from 14 March 2022, the official exchange rate for the córdoba against the US dollar is NIO 35.6619 = USD1.

No restrictions apply to foreign-trade operations or to foreign-currency transactions.

F. Tax treaties

Nicaragua has not entered into any income tax treaties with other foreign countries.

Building, Construction and Related Activities	2.5
Contract for Supplies	5
Consulting, Management and Technical Services	10 (g)
Commissions	10
Net Operating Losses (Years)	
Carryback	0
Carryforward	Unlimited (h)

- (a) Large companies are companies with annual gross turnover over NGN100 million.
- (b) Medium companies are companies with annual gross turnover between NGN25 million and NGN100 million.
- (c) Small companies are companies with annual gross turnover of NGN25 million and below.
- (d) The withholding taxes are applicable to residents and nonresidents.
- (e) Certain dividends are exempt (see Section B).
- (f) Certain interest is exempt (see Section C).
- (g) The rate is 5% for private businesses (sole proprietorships) and partnerships.
- (h) Insurance companies may carry forward losses indefinitely.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to tax on their worldwide profits. Nonresident companies are taxed only on the profits of their operations attributable to Nigeria through a fixed base or permanent establishment. However, if a nonresident company performs a single contract for survey, deliveries, installation or construction for a customer in Nigeria, the entire contract sum should be taxable in Nigeria, regardless of whether a portion of the contract is performed outside Nigeria.

Taxable income derived by foreign companies includes income from digital services if such foreign companies have significant economic presence in Nigeria. In addition, profits arising from consultancy or professional services, including technical and management services, with respect to offshore services rendered by a person outside Nigeria to a person resident in Nigeria is subject to tax if such foreign companies have significant economic presence in Nigeria.

A company is deemed to be resident in Nigeria if it is incorporated in Nigeria. A resident company is subject to tax in Nigeria. This does not preclude nonresident companies from being subject to tax in Nigeria based on relevant tax laws.

Assessable profits from all sources accruing in the accounting period are aggregated for tax purposes. Total profit on which tax is assessed is calculated by deducting capital allowances (tax depreciation) from the aggregate of assessable profits.

Rates of corporate tax

Corporate income tax. The corporate income tax rate due from a company is dependent on the company's turnover. Large companies with turnover greater than NGN100 million are taxed at a rate of 30%. Medium companies with turnover between NGN25 million and NGN100 million are taxed at a rate of 20%. Small companies are exempt from corporate income tax.

Tax holidays. Limited liability companies that are registered in Nigeria and that perform activities that qualify for pioneer status may apply for pioneer status, which is granted to companies in industries that are considered vital to Nigeria's economic development. A company with pioneer status is granted a tax holiday of up to three years, with a possible extension for two years.

Approved enterprises operating in export free-trade zones are exempt from all federal, state and local government taxes, levies and rates. Export-oriented companies located outside free-trade zones may qualify for income tax exemptions if certain conditions are met. Nonetheless, these enterprises are now required to prepare and file their tax returns with the Federal Inland Revenue Service (FIRS).

New companies engaged in the mining of solid minerals also benefit from a tax holiday during their first three years of operations. Under the Mining and Minerals Act 2007, the tax holiday can be extended for two years.

Oil and gas companies. Companies engaged in the marketing and distribution of gas for domestic and industrial use (downstream operations) are subject to the Companies Income Tax Act.

Beginning from the date on which they begin production, companies engaged in gas utilization (downstream operations) should benefit from an initial three-year tax holiday. This tax holiday is renewable for an additional two years after the tax holiday expires if the company is performing satisfactorily. The companies also benefit from accelerated capital allowances after the tax-holiday period. These allowances consist of the following:

- An annual allowance of 90% with a 10% retention for investment in plant and machinery

- An additional 15% investment allowance, which does not reduce the cost of the asset for the purposes of calculating the annual allowance

However, these incentives do not apply if the company has claimed or wishes to claim pioneer status incentives for the same qualifying investment.

Companies engaged in the exploration and production of oil and gas are deemed to be in the upstream sector of the oil and gas sector and are subject to tax under the Petroleum Profits Tax Act. The applicable Petroleum Profits Tax rate is 85%. A reduced rate of 65.75% applies to companies for their first five years of petroleum operations. However, for petroleum operations carried out under the production-sharing contract regime, the applicable rate is 50%.

A gas-flaring penalty is imposed on oil companies for wasteful disposals of gases through burning in oil fields and refineries.

Minimum tax. Companies are required to pay minimum corporate tax if the minimum tax is greater than their actual tax liability. The minimum tax is levied at 0.5% of the gross turnover of the company less franked investment income (in this context, franked investment income refers to dividend income received by a company on which withholding tax has already been paid). A 50% reduction in the minimum tax rate from 0.5% to 0.25% is applicable for any two consecutive financial years falling between 1 January 2020 and 31 December 2021 (both dates inclusive), as may be elected by the taxpayer.

The minimum tax does not apply to companies until the fifth year after the commencement of business. Companies that earn gross turnover of less than NGN25 million and companies engaged in an agricultural trade or business are exempt from the minimum tax requirement.

Withholding tax. The withholding tax rate on dividends, interest, rent and royalties for residents and for recipients in non-treaty countries is generally 10%. However, certain dividends are exempt from tax (see *Dividends*). Taxable interest income includes interest on all time deposits with banks and on savings passbook accounts of NGN50,000 and above. Certain types of interest income are exempt from tax (see Section C). Tax withheld from dividends and interest accruing to nonresident companies is regarded as a final tax provided that the company does not have a taxable presence in Nigeria. For resident companies, the withholding tax from dividends is also regarded as a final tax, but they must account for other investment income in their tax returns and claim credit for tax withheld. Both resident and nonresident companies must include in their tax returns earned income subject to withholding and claim the tax withheld as a credit.

Exemption of convertible currencies derived from tourists. Twenty-five percent of income in convertible currencies derived from hotel guests is exempt from tax, provided that such income is put in a reserve fund to be used within five years for the building and expansion of hotels, conference centers and facilities for the purpose of tourism development.

Capital gains. Capital gains tax is chargeable on the gains accruing from the disposal of all types of assets, including the following:

- Land and buildings
- Options, debts and other property rights
- Any currency other than Nigerian currency
- Any form of property created by the person disposing of it or otherwise coming to be owned without being acquired
- Movable assets (motor vehicles)

For nonresident companies, the location of the assets and whether the proceeds from the sale are brought into or received in Nigeria are important considerations in determining whether the relevant gain is subject to capital gains tax in Nigeria.

The taxable gain is the difference between the consideration accruing on the disposal of an asset and its original cost together with expenses incurred on its disposal.

Any loss incurred on a disposal may not be offset against the gains accruing from the disposal of another asset for the purpose of calculating capital gains tax. However, if assets are sold under a single agreement comprising two or more transactions, the transactions may be treated as a single disposal for the purpose of calculating capital gains. Taxable gains are assessed in the year of disposal of an asset. The capital gains tax rate is 10%.

A company may claim rollover relief if the proceeds from the disposal of an asset used in a trade or business are applied within a year before or after the disposal toward the acquisition of a similar asset to be used in the same trade or business.

Dividends. Dividends are generally subject to a final 10% withholding tax.

Dividends distributed from pioneer profit and by small companies (see *Rates of corporate tax*) are exempt from tax.

Dividends paid out of retained earnings of a company are exempt from income tax if the dividends are paid out of profits that have been subject to tax under the Company Income Tax Act, Petroleum Profits Tax Act or the Capital Gains Tax Act.

Also, dividends paid out of the profits that are exempt under the Income Tax Act, Petroleum Profits Tax Act or Industrial Development (Income Relief) Act are exempt from tax.

Administration

Tax authority. The Federal Inland Revenue Service (Establishment) Act, which was enacted in 2007, established the Federal Inland Revenue Service (FIRS). The FIRS is responsible for assessing, collecting and accounting for tax revenue accruable to the federal government of Nigeria.

Filing and tax payment. The FIRS is responsible for administering and collecting companies' income tax, petroleum profits tax (see Section D) and capital gains tax imposed on companies.

The tax year is from 1 January to 31 December. Under the self-assessment regime modified by the government in December 2011, all companies subject to tax must compute their tax liability, make payment and file their tax return with the FIRS on or before

the due date. The due date for filing of the company income tax return is six months after the end of its accounting year or within 18 months after its date of incorporation. A penalty of NGN50,000 is imposed for the first month of lateness in filing a return and NGN25,000 for each subsequent month.

A taxpayer must apply to the tax authority to make installment tax payments. The final installment must be paid not later than the due date.

A 10% penalty and interest at the prevailing bank lending rate are imposed for late payment of assessed tax.

There is a tax credit of 2% (medium companies) and 1% (large companies) of tax payable for the early payment of tax liability up to 90 days before the due date. Such credit should be utilized in the subsequent year.

Tax refunds. The reforms to the tax system in Nigeria included the introduction of a tax refund system. After auditing a company's documents, the FIRS determines whether an overpayment was made.

Excess dividend tax. If dividends are distributed from profits on which no tax is payable as a result of no taxable profits or taxable profits that are less than the amount of dividends paid, the company paying the dividends is charged to tax on the dividends as if such dividends are the taxable profits of the company for the relevant year of assessment. The following types of income are excluded from the application of excess dividend tax:

- Dividends paid out of retained earnings, provided that the dividends are paid out of profits that have been subject to tax under the relevant tax legislation
- Dividends paid out of tax-exempt income under the relevant tax legislation
- All franked investment income
- Distributions made by a real estate investment company to its shareholders from rental income and dividend income received on behalf of its shareholders

Foreign tax relief. Foreign tax relief for the avoidance of double taxation is governed by tax treaties with other countries. If foreign tax is paid to a country that does not have a tax treaty with Nigeria, resident companies may claim the foreign tax paid as a tax-deductible expense.

C. Determination of trading profit

General. Taxable income is based on financial statements prepared on commercial principles (that is, International Financial Reporting Standards [IFRS], adopted in 2012). Trading profit is adjusted for deductions not allowed for tax purposes and for profits or gains not subject to tax.

Investment income earned abroad is tax-exempt if it is brought into Nigeria through the Central Bank of Nigeria or through any bank or other corporate body appointed by the Minister of Finance as an authorized dealer.

Interest received by banks on loans with a moratorium of at least 18 months and with an interest rate that is not more than the base

lending rate at the time the loan was granted is exempt from tax if the following circumstances exist:

- The loans are granted to agricultural trades or businesses.
- The loans are granted to companies or individuals engaged in the manufacturing of plant and machinery in Nigeria.
- The loans are granted for working capital for any cottage industry established by the company.

Interest on bank loans granted for the manufacturing of goods for export are exempt from tax if certain specified conditions are met.

Interest on foreign loans is exempt from tax in accordance with the following percentages.

Repayment period including moratorium	Grace period	Tax exemption allowed (%)
More than 7 years	Not less than 2 years	70
5 to 7 years	Not less than 18 months	40
2 to 4 years	Not less than 12 months	10
Less than 2 years	None	0

Interest earned by a nonresident company on a deposit account consisting entirely of foreign-currency transfers is exempt from tax. In addition, interest on foreign-currency accounts maintained or operated in Nigeria is exempt from tax.

The following are exempt from income tax:

- Trading income derived from short-term federal government securities, such as treasury bills and promissory notes
- Trading income derived from bonds issued by federal, state and local governments and their agencies
- Trading income derived from bonds issued by corporate bodies including supranationals
- Interest earned by holders of the bonds and securities listed above

These exemptions are for a period of 10 years with the exception of income derived from bonds issued by the federal government, which have an indefinite exemption. From 2 January 2022, only Federal Government of Nigeria bonds will continue to enjoy such tax exemption.

Expenses must be wholly, reasonably, exclusively and necessarily incurred for the purpose of the trade or business to be deductible for tax purposes.

Deductions are not allowed for the following:

- Losses reimbursable under an insurance contract or a contract of indemnity
- Donations made to bodies and institutions not specified in Schedule 5 of the Companies Income Tax Act
- Subscriptions to social organizations

Limitations apply to the deductibility of the following:

- Interest on loans from foreign related parties
- Donations to approved bodies and institutions
- Donations made to any fund set up by the federal or any state government, to any agency designated by the federal government or to any similar fund or purpose in consultation with any

- ministry, department or agency of the federal government, with respect to any pandemic, natural disaster or other exigency
- Research and development
 - Management fees
 - Royalties

Inventory. The tax law does not prescribe any basis for the valuation of inventory, provided a method is used consistently from year to year. However, subject to certain exceptions stated in the IFRS issued by the International Accounting Standards Board, stocks must be valued at the lower of cost and net realizable value.

Tax depreciation (capital allowances)

Initial and annual allowances. Annual allowances are granted under the straight-line method. The company deducts the initial allowance from the asset's cost once in the life of an asset and then applies the annual allowance rate to the balance. The following are rates of initial and annual allowances.

Qualifying expenditure	Initial allowance (%)	Annual allowance (%)
Buildings (industrial and non-industrial)	15	10
Mining	95	Nil
Plant		
Agricultural production	95	Nil
Others	50	25
Furniture and fittings	25	20
Motor vehicles		
Public transportation	95	Nil
Others	50	25
Plantation equipment	95	Nil
Housing estate	50	25
Ranching and plantation	30	50
Research and development	95	Nil

Investment allowances. An investment allowance at a rate of 10% is granted for expenditure incurred on plant and equipment. If the expenditure is for replacement of obsolete industrial plant and equipment, an investment tax credit of 15% is granted. The investment allowance is not taken into account in determining the tax written-down value of the asset. It is granted in addition to the initial allowance.

Initial and annual allowances are recaptured on the sale of an asset if the sales price exceeds the tax written-down value. The amount recaptured may not exceed the initial and capital allowances granted. Amounts recaptured are taxed as ordinary income at the regular corporate tax rates.

Investment tax relief. Investment tax relief is similar to the rural investment allowance. It is granted for expenditures on certain infrastructural facilities by companies established at least 20 kilometers (12.4 miles) from such facilities. The following are the types of facilities and the applicable percentages of the relief:

- Electricity: 50%
- Water: 30%
- Tarred road: 15%

The investment tax relief may be claimed for three years. A company that has enjoyed or is enjoying pioneer status (see Section B) may not claim the relief.

Companies engaged in research and development activities may claim a tax credit of 20% of their qualifying capital expenditure.

Relief for losses. Trade and business losses may be carried forward to offset profits of the same trade or business for an unlimited number of years. Losses may not be carried back.

Groups of companies. Each company must file a separate tax return. No provisions exist for filing consolidated returns or offsetting losses and capital allowances against profits within a group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, levied on specified goods and services, including goods manufactured or assembled in Nigeria, imported goods, certain bank services and services performed by professionals	7.5
Education tax, on assessable income; the tax is deductible for purposes of the petroleum profits tax	2.5
Pension contributions, on monthly gross salary (for pension purposes, gross salary consists of basic pay, housing and transport allowances); paid by	
Employer	10
Employee	8
(Expatriates covered by a plan in their home country may qualify for exclusion.)	
Information technology levy; imposed on before-tax profits of specified companies and enterprises with annual turnover of NGN100 million or more	1

E. Miscellaneous matters

Foreign-exchange controls. Foreign investors that intend to set up businesses in Nigeria must register with the Nigeria Investment Promotion Commission and obtain a Certificate of Capital Importation from authorized foreign-exchange dealers through whom foreign currency is imported. This certificate, which serves as documentary evidence of the importation of the currency, guarantees the unconditional transferability of dividends and interest and the repatriation of capital through authorized dealers.

Companies are free to determine the amount of dividends distributed. The application to remit dividends must be submitted with the Certificate of Capital Importation and a tax clearance certificate, which establishes that tax was paid or that no tax is due with respect to the dividends to be remitted. If the appropriate amount of tax is withheld from dividends and interest paid to nonresidents, no additional tax clearance is required.

Remittances of royalties and technical fees payable to foreign companies require the approval of the underlying agreements by the National Office for Technology Acquisition and Promotion. Permission is granted if the royalties and fees are within certain prescribed limits.

Importation and exportation of the naira (NGN), the Nigerian currency, are regulated.

Exporters must open a local domiciliary bank account marked "Export Proceeds" and must credit their foreign-currency export earnings to this account.

Anti-avoidance provisions. Under the general anti-avoidance provisions, if the tax authority determines that a disposition has not in fact had an effect or that a transaction that reduces or would reduce the amount of any tax payable is artificial or fictitious, it may disregard any such disposition or transaction or direct that appropriate adjustments be made to the tax liability. These actions are designed to counteract the reduction of the tax liability that would otherwise result from the transaction. Any company concerned is then assessed accordingly. For this purpose, a disposition includes a trust, grant, covenant, agreement or arrangement.

Transfer pricing. The Transfer Pricing Regulations, which took effect on 2 August 2012, apply to transactions between connected taxable persons (related parties, as defined in the regulations). Connected taxable persons entering into transactions to which the regulations apply must determine the taxable profits resulting from such transactions in a manner that is consistent with the arm's-length principle. For purposes of the regulations, a permanent establishment is treated as a separate entity, and a transaction between a permanent establishment and its head office or other connected taxable persons is considered a controlled transaction subject to the regulations. Key provisions of the regulations include those pertaining to the following:

- Entities and transactions to which the regulations apply
- Methods that may be used to determine arm's-length prices
- Documentation that must be maintained to support the arm's-length price and advance pricing agreements

The regulations must be applied in a manner consistent with the arm's-length principle in Article 9 of the United Nations (UN) and Organisation for Economic Co-operation and Development (OECD) Model Tax Conventions on Income and Capital, the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, and the UN Transfer Pricing Manual.

Country-by-Country Reporting. The federal government of Nigeria formally released the Income Tax (Country-by-Country Reporting) Regulations, 2018, with an effective date of 1 January 2018. The regulations provide the framework for the automatic exchange of Country-by-Country Reports in accordance with the Multilateral Competent Authority Agreement signed by Nigeria in January 2016 and ratified by the Federal Executive Council in August 2016.

Debt-to-equity rules. The interest deduction with respect to loans obtained from foreign connected persons is restricted to 30% of earnings before interest, tax, depreciation and amortization

(EBITDA). The excess interest expense may be carried forward for a period of not more than the five subsequent years. This restriction does not apply to Nigerian subsidiaries of foreign companies engaged in banking and insurance business.

F. Treaty withholding tax rates

	Dividends	Interest	Royalties
	%	%	%
Belgium	7.5	7.5	7.5
Canada	7.5	7.5	7.5
China Mainland	7.5	7.5	7.5
Czech Republic	7.5	7.5	7.5
France	7.5	7.5	7.5
Italy*	7.5	7.5	7.5
Netherlands	7.5	7.5	7.5
Pakistan	7.5	7.5	7.5
Philippines	7.5	7.5	7.5
Romania	7.5	7.5	7.5
Singapore	7.5	7.5	7.5
Slovak Republic	7.5	7.5	7.5
South Africa	7.5	7.5	7.5
Spain	7.5	7.5	7.5
United Kingdom	7.5	7.5	7.5
Non-treaty jurisdictions	10	10	10

* The treaty with Italy applies to air and shipping only.

Nigeria has signed double tax treaties with Bulgaria, Korea (South), Mauritius, Poland, Qatar Sweden and the United Arab Emirates, but these treaties have not yet been ratified.

Nigeria has concluded negotiations on double tax treaties with Cameroon and Ghana.

Nigeria has begun tax treaty negotiations with Algeria and Tunisia.

North Macedonia, which was a republic of the former Yugoslavia, gained its independence in 1991. The country changed its name to North Macedonia in 2019. Because of the rapidly changing economic situation in North Macedonia, readers should obtain updated information before engaging in transactions.

B. Taxes on corporate income and gains

Corporate income tax. North Macedonian companies are subject to corporate tax on their worldwide income. North Macedonian companies are companies incorporated in North Macedonia. Foreign companies are taxed in North Macedonia on their profits generated from activities conducted through a permanent establishment in the country and on income from North Macedonian sources.

Rate of corporate income tax. The corporate income tax rate is 10%.

Tax incentives. Tax incentives available in North Macedonia are described below.

Tax relief for reinvested profits. As of January 2015, companies may claim tax relief for the amount of profits reinvested in business-related tangible and intangible assets, including investments in tangible assets procured through financial leasing. No relief is available for profits reinvested in cars, furniture, carpets, audiovisual devices and other decorative objects used to equip administrative premises. Assets acquired or leased under the tax relief may not be sold or otherwise disposed of within the five-year period beginning with the year in which the investment is made. If this condition is not satisfied, the company must pay the tax saved.

Technological Industrial Development Zones. Companies are exempt from income tax for the first 10 years of their activities in a Technological Industrial Development Zone, subject to the conditions and procedures established in the Law on Technological Industrial Development Zones.

Capital gains and losses. Capital gains are included in taxable income and are subject to tax at the regular corporate income tax rate of 10%.

Administration. The tax year is the calendar year.

Companies must make advance monthly payments of corporate income tax by the 15th day of each month. The tax base for the monthly payments equals $\frac{1}{12}$ of the tax determined for the preceding year adjusted by the percentage of the cumulative growth of retail prices in the country in the preceding year.

Companies must file annual tax returns by 15 March of the year following the tax year. Filing of monthly tax returns is not required. If the tax determined in an annual tax return is more than the amount of advance tax paid, the company must pay the difference within 30 days after the filing due date. Any overpaid amount must be refunded within 30 days following the request of the taxpayer.

Dividends. Dividends paid to foreign companies are subject to withholding tax at a rate of 10% on the net amount of the distributed dividends (that is, after deduction of the 10% corporate tax), unless tax treaty relief applies. Remittances of profits by branches to their home countries are not subject to withholding tax.

Dividends distributed to resident companies are exempt from corporate tax.

Foreign tax relief. Resident companies may claim a tax credit for foreign income tax paid, but the amount of the credit may not exceed the 10% profit tax imposed in North Macedonia on the foreign-source income.

C. Determination of trading income

General. Companies pay income tax on the profit realized in the year, increased by the amount of the nondeductible expenses.

Inventories. Inventories are valued at cost, but the value for tax purposes may not exceed the sales value on the date when taxable income is determined.

Provisions. Provisions booked for current liabilities are deductible for tax purposes. Write-offs of receivables are not tax-deductible, unless such receivables are from companies in liquidation or bankruptcy and are confirmed by the bankruptcy trustee.

Tax depreciation. Tax depreciation is a tax-deductible expense as long as the depreciation is in line with the rates determined by the authorities. Depreciation costs of revaluated assets are deemed a nondeductible expense. Written-off assets with remaining value can be depreciated in full and the relevant costs are deemed deductible, provided that the taxpayer has approval from the tax authorities for treating the depreciation costs as deductible expenses.

Relief for losses. As of 1 January 2015, losses may be carried forward for three years. Losses may not be carried back. As a result of the economic crisis related to the COVID-19 pandemic, losses realized in 2020 and 2021 can be carried forward for a period of five years.

Groups of companies. Group registration is not permitted in North Macedonia.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax; imposed on goods sold and services rendered in North Macedonia, on sales of real property in North Macedonia and on imports; certain items are exempt, such as banking, insurance and other financial activities	
Standard rate	18%
Reduced rate (for food products for human use, drinking water from public water supply systems, books, brochures and newspapers, certain materials and fixed assets for agriculture, drugs and medicine products for human use, computers, printers and accessories, software, equipment that is used for the production of solar electricity and passenger transport)	5%
Reduced rate (for services with respect to on-site consumption of food and beverage, and catering services, excluding alcoholic beverages)	10%
Exports	0%
Excise tax on sales in North Macedonia and on imports of various items; tax is imposed at ad valorem rates, which are applied to the sales or import price, or at specific rates, which are expressed in North Macedonian denars per unit of goods; for petrol, Diesel D-1 and gas, the rates are subject to change every two weeks	
Petrol	MKD21.692 to MKD24.396 per liter

Nature of tax	Rate
Diesel D-1 (petrol for use in motor cars)	MKD18.121 per liter
Heating oil	MKD6.301 per liter
Fuel oil	MKD0.10 per kilogram
Alcoholic beverages	MKD340 per liter of pure alcohol
Beer	MKD4 per percentage of alcohol in a liter
Cigars and cigarillos	
Cigars	MKD21.37 per piece
Cigarillos	MKD10 per piece
Cigarettes	MKD2.453 per piece plus 9% of the retail price
Taxes contained in Property Tax Law	
Property tax; annual tax on owners of immovable property, including non-rural land, residential buildings or apartments, industrial, business and administrative buildings, and garages and other structures; tax base is the market value of the real estate or movable property; tax return must be filed by 31 January (only if changes have occurred since the previous period)	0.1% to 0.2%
Tax on sales and other transfers of real estate and rights to real estate; tax base is the market value of the real estate or right at the time of the sale; for exchanges, the tax base is the difference between the market values of the items being exchanged; tax payable by transferor; tax return must be filed within 15 days after the transfer of the property	2% to 4%
Inheritance and endowment tax, on the inheritance or endowment of immovable or movable property; tax applies regardless of whether inheritance or endowment is granted in a will or is acquired under the inheritance law or under an endowment agreement; tax base is the market value of the inheritance and endowment, reduced by debts and expenses; tax is paid by resident and nonresident recipients, including companies; tax return must be filed within 15 days after the transfer of the property	
Individuals in first line of heritage	0%
Individuals in second line of heritage	2% to 3%
All others	4% to 5%

E. Miscellaneous matters

Foreign-exchange controls. The currency in North Macedonia is the denar (MKD). All transactions in North Macedonia must be made in denars.

The National Bank of the Republic of North Macedonia, which is the central bank, is exempt from income tax.

Residents and nonresidents may maintain foreign-currency accounts at commercial banks.

Registration with the central bank is required for the following transactions:

- Obtaining or granting loans
- Paying or receiving cash
- Opening bank accounts abroad

Transfer pricing. North Macedonia has transfer-pricing rules. Under these rules, the tax authorities may adjust the taxable income of taxpayers derived from transactions with related companies if they deem prices paid (or charged) to related companies for various types of items to be excessive. In such circumstances, the difference between prices stated in financial statements and arm's-length prices is subject to tax. Taxpayers whose total annual turnover exceeds MKD300 million (approximately EUR4.8 million) that are engaged in related-party transactions with nonresident entities must file an annual transfer-pricing report. Taxpayers whose volume of related-party transactions does not exceed MKD10 million (approximately EUR163,000) per year are required to submit a "short" transfer-pricing report with the corporate income tax return. The deadline for submission of the transfer-pricing report is 30 September of the year following the reporting year.

Debt-to-equity ratios. Under thin-capitalization rules, interest on loans received from shareholders owning at least 20% of the capital of the borrower or on loans guaranteed by such shareholders is subject to tax to the extent that such interest corresponds to the excess of the loan balance over three times the shareholders' share in the equity of the borrower.

The thin-capitalization restrictions apply only to loans provided by direct shareholders that are nonresidents. In addition, the 20% participation threshold is alternatively measured by reference to voting rights. Loans provided from financial institutions are excluded from the thin-capitalization restrictions. Newly established entities are excluded in their first three years of operations.

- (a) The lower rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends.
- (b) The 0% rate applies if the beneficial owner of the interest is the government or the central bank.
- (c) The 0% rate applies if the beneficial owner of the interest is the government, a municipality, the central bank or an agency fully owned and controlled by the government or a municipality (debts indirectly financed by the government, a local authority or the central bank).
- (d) The 0% rate applies if the recipient of the dividend is a company that holds directly or indirectly at least 10% of the equity of the payer of the dividends.
- (e) The 0% rate applies if the beneficial owner of the interest is the government, municipalities, the central bank, other financial institutions fully owned by the government or municipalities, or other legal entities that are directly financed by the government, the central bank or municipalities.
- (f) The 0% rate applies if the beneficial owner of the dividends is a pension fund or other similar institution providing pension schemes in which individuals may participate to secure retirement benefits. The 5% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends and if such holding is maintained for an uninterrupted period of at least one year and the dividends are declared within that period.

- (g) The 0% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the voting power of the payer of the dividends.
- (h) The 0% rate applies if the beneficial owner of the interest is the State of Finland, Bank of Finland, Finnish Fund for Industrial Co-operation or if the interest is from loans supported by the government of Finland.
- (i) The 0% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.
- (j) The 0% rate applies if the beneficial owner of the interest is the government, municipalities or their fully owned entities or if the interest payments arise from loans of other agencies or instrumentalities (including financial institutions) based on agreements between the governments.
- (k) The 0% rate applies if the beneficial owner of the interest is the government including municipalities, the central bank and financial institutions controlled by the government or if the interest is derived from loans guaranteed by the government.
- (l) The 0% rate applies if the beneficial owner of the interest is the government including municipalities, agencies or banks of the government or municipalities or if the interest is derived from loans warranted, insured or financed by the government.
- (m) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner of the interest is the state, a statutory body or the central bank.
 - The interest is paid on loans approved by the government of the country of the interest payer.
 - The interest is paid on loans granted by the SWEDCORP, Swedfund International AB, the Swedish Export Credits Guarantee Board or any other public institution with the objective of promoting exports or development.
 - The interest is paid on bank loans.
- (n) The 0% rate applies if the beneficial owner obtained the interest with respect to sales on credit of industrial, commercial or scientific equipment or with respect to sales on credit of merchandise between enterprises or if the interest is paid on bank loans.
- (o) The 0% rate applies if the beneficial owner of the interest is the government, municipalities or the central bank.
- (p) The 0% rate applies if the beneficial owner obtained the interest with respect to sales on credit of industrial, commercial or scientific equipment or with respect to sales on credit of merchandise between enterprises or if the interest is paid on long-term bank loans (over five years).
- (q) The lower rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.
- (r) The 0% rate applies if the beneficial owner of the dividends owns at least 25% of the equity of the payer of the dividends for the entire 12-month period ending on the date of payment of the dividend or if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the voting power of the payer of the dividends.
- (s) The 0% rate applies to interest paid with respect to a loan granted or credit extended by an enterprise to another enterprise and to interest paid to political subdivisions, local authorities or public entities.
- (t) The 0% rate applies to interest paid with respect to a loan granted or credit extended for the sale of industrial, commercial or scientific equipment (unless the sale or loan is between related persons), and to interest paid to the government including local authorities, the central bank and financial institutions wholly owned by the government.
- (u) The higher rate applies to royalties paid for the use of, or the right to use, movies or tapes for radio and television broadcasting.
- (v) The 0% rate applies if the beneficial owner of the dividends owns at least 25% of the equity of the payer of the dividends for the entire 12-month period ending on the date of payment of the dividend or if the beneficial owner of the dividends is a pension scheme. The 5% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 10% of the equity of the payer of the dividends.
- (w) This treaty is not yet in force.
- (x) The 0% rate applies if the beneficial owner of the dividends is the central bank of Norway, the government pension plan of Norway or Norfund or, in case of North Macedonia, the central bank of North Macedonia. The 10% rate applies if the recipient of the dividend is a company (other than a partnership) that holds at least 25% of the equity of the payer of the dividends.

- (y) The 0% rate applies to the following:
- Interest paid to the government of a contracting state, a political subdivision or local authority thereof, the central bank of a contracting state or an institution wholly owned by the government of a contracting state
 - Interest paid on a loan insured or guaranteed by a governmental institution for the purpose of promoting exports
 - Interest paid with respect to the sale on credit of industrial, commercial or scientific equipment
- (z) The 0% rate applies to the following:
- Interest paid with respect to the sale of commercial or scientific equipment on credit
 - Interest paid with respect to the sale of goods by an enterprise to another enterprise on credit
 - Interest paid on a loan guaranteed by the Federal Republic of Germany with respect to the export of foreign direct investment
 - Interest paid to the government of the Federal Republic of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau, the Deutsche Investitions- und Entwicklungsgesellschaft or the North Macedonian government
- (aa) The lower rate applies if the recipient of the dividend is a company that holds directly at least 25% of the equity of the payer of the dividends.
- (bb) The 5% rate applies if the recipient of the dividend is a company that holds directly at least 70% of the equity of the payer of the dividends. The 10% rate applies if the recipient of the company holds at least 25%, but no more than 70%, of the equity of the payer of the dividends.
- (cc) The 0% rate applies if the beneficial owner of the interest is the government, municipalities, the central bank, other financial institutions fully owned by the government or other legal entities that are indirectly financed by the government, the central bank or municipalities.
- (dd) The 0% rate applies if the payer or the beneficial owner of the interest is the government, including municipalities, the central bank and financial institutions fully owned by the government.
- (ee) The 0% rate applies if the beneficial owner of the interest is the state, a local government, the central bank, the Abu Dhabi Investment Authority, the Abu Dhabi Office, the International Petroleum Investment Company, the Abu Dhabi Investment Council, the Dubai Investment Company, the Mubadala Development Company, the United Arab Emirates Investment Authority, the Al Dafra Holding Company or any other institution created by the government or a local authority or local government, other than the state, that is recognized as an integral part of that government.
- (ff) The 0% rate applies if the recipient of the dividend is a company that holds at least 25% of the equity of the payer of the dividends. The 5% rate applies if the recipient of the dividend is a company that holds directly at least 10% of the equity of the payer of the dividends.

A. At a glance

Corporate Income Tax Rate (%)	21 (a)
Capital Gains Tax Rate (%)	21 (a)
Branch Income Tax Rate (%)	21 (a)
Withholding Tax (%)	
Dividends	30 (a)(b)
Interest	30 (a)(b)(c)
Royalties from Patents, Know-how, etc.	30 (a)(b)
Branch Profits Tax	30 (a)(d)
Net Operating Losses (Years)(e)	
Carryback	0
Carryforward	Unlimited

- (a) Income tax on income sourced within the Northern Marianas that exceeds gross revenue tax on the same income is subject to a rebate. For details, see Section B.
- (b) This tax is imposed on payments to nonresidents. See Section E.
- (c) Bank deposit interest not effectively connected with a trade or business in the Northern Marianas and interest on certain portfolio debt obligations are exempt from withholding tax.
- (d) This is the branch profits tax, imposed on the earnings of a foreign corporation attributable to its branch, reduced by earnings reinvested in the branch and increased by reinvested earnings withdrawn.
- (e) This is applicable to losses generated after the 2017 tax year. No deduction is available for net operating losses arising before 1 January 1985. A net operating loss deduction is generally limited to 80% of taxable income. Special rules apply to certain types of losses and entities.

B. Taxes on corporate income and gains

Corporate income tax. Corporations are subject to a gross revenue tax. In addition, the Commonwealth of the Northern Mariana

Islands (CNMI) has adopted the US Internal Revenue Code (IRC) as its income tax law. For a description of the income taxation of resident corporations doing business in CNMI, refer to the chapter in this book on the United States and substitute “CNMI” for each reference to the “United States.”

To avoid double taxation, a credit against income tax is given for gross revenue tax paid or accrued on income earned within the Northern Marianas. If income tax on Northern Marianas income exceeds the gross revenue tax, the company is entitled to a rebate of specified percentages of the excess. The following are the rebate percentages:

- 90% of the excess up to USD20,000
- 70% of the next USD80,000
- 50% of the excess over USD100,000

Income earned by residents from foreign sources is subject to the full amount of tax under the IRC. A special rule prevents US residents from taking advantage of the rebate by changing their residence to report gains on the sale of US property or stock in US companies on their Northern Marianas tax return.

Gross revenue tax. A gross revenue tax is imposed on the gross income of businesses from their activities and investments in the CNMI. The gross revenue tax rates are shown in the following table.

Gross revenue		Rate on
Exceeding USD	Not exceeding USD	total gross income %
0	5,000	0
5,000	50,000	1.5
50,000	100,000	2
100,000	250,000	2.5
250,000	500,000	3
500,000	750,000	4
750,000	—	5

These rates apply to total gross income and are not progressive.

Tax incentives. The CNMI, through the Commonwealth Development Authority, is authorized by law to grant tax rebates to qualified investors. The Commonwealth Development Authority grants Qualifying Certificates (QCs) for tax incentives to businesses engaged in activities that are deemed to be beneficial to the development of the CNMI economy. The incentives are aimed primarily at franchise restaurants, water parks, aquariums, cultural centers, theme parks, resort hotels, golf courses, convention centers, dinner theaters, special events, CNMI-based airlines, manufacturing of high-technology products and internet-related businesses. In general, QCs can provide rebates of up to 100% of income tax paid for up to 25 years.

Basis of qualified fresh-start assets. Under the Northern Marianas Territorial Income Tax, effective 1 January 1985, income from pre-1985 appreciation of Northern Marianas property is not subject to income tax. For the purposes of determining gain and allowances for depreciation and amortization, the basis of the Northern Marianas real and personal property is the greater of the basis determined under the IRC or the fair-market value as of 1 January 1985. Fair-market value can be established either by

independent appraisal or by discounting the ultimate sales price back to 1 January 1985, using the discount factors specified by regulation. Currently, rates published by the US Internal Revenue Service are used.

Administration. Income taxes are paid to the government of the Northern Marianas, which administers its tax system. In general, the administration of the Northern Marianas tax is the same as in the United States, but estimated taxes are due on the last day of the month following the end of each quarter of the tax year. The income tax rebate is not available to reduce estimated tax payments.

Foreign tax relief. Foreign tax credits are available in the Northern Marianas to reduce income tax in the same manner as foreign tax credits in the United States. The credits do not reduce gross revenue tax, which is imposed on CNMI-source income only.

C. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Hotel occupancy tax	15%
Bar tax	10%
Excise taxes on all property except school and library books and machinery and raw materials used in manufacturing	Various
Liquid fuel taxes	
Gasoline, diesel and other liquid fuels (refunded if used by commercial vessels outside CNMI)	15 cents a gallon
Aviation fuel (reduced depending on flight schedule)	3%
Social security contributions (including 1.45% Medicare tax); imposed on Wages up to USD147,000 (for 2022); paid by	
Employer	6.2%
Employee	6.2%
All covered wages (for 2022; Medicare tax); paid by	
Employer	1.45%
Employee	1.45%
(Effective from 1 January 2013, an additional Medicare tax of 0.9% applies to wages, tips, other compensation and self-employment income in excess of USD200,000 for taxpayers who file as single or head of household. For married taxpayers filing jointly and surviving spouses, the additional 0.9% Medicare tax applies to the couple's combined wages in excess of USD250,000. The additional tax applies only to the amount owed by the employee; the employer does not pay the additional tax. Employers withhold tax only on wages in excess of USD200,000.)	
Miscellaneous license fees	Various

D. Miscellaneous matters

Foreign-exchange controls. CNMI does not impose foreign-exchange controls, but large currency transfers must be reported to the US Treasury Department.

Transfer pricing. The US transfer-pricing rules apply in CNMI.

Debt-to-equity rules. The US debt-to-equity rules apply in CNMI.

E. Treaties and withholding taxes

CNMI does not participate in the US income tax treaties and has not entered into any treaties with other countries. The withholding tax rate for dividend, interest and royalty payments to nonresidents is 30%, but the rebate discussed in Section B is available if a recipient files a CNMI income tax return. In general, no withholding tax is imposed on payments between CNMI and the United States or Guam, unless the recipient exceeds certain foreign ownership and income limitations.

Unless otherwise indicated, the rates and thresholds stated in the chapter are applicable as of 1 January 2022.

A. At a glance

Corporate Income Tax Rate (%)	22 (a)
Capital Gains Tax Rate (%)	22 (a)
Branch Tax Rate (%)	22 (a)
Withholding Tax (%)	
Dividends	25 (b)
Interest	0/15 (c)
Royalties from Patents, Know-how, etc.	0/15 (c)
Certain Lease Payments	0/15 (c)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0 (d)
Carryforward	Unlimited

- (a) A 25% rate applies to companies in the financial sector (see Section B).
- (b) This tax applies to dividends paid to nonresident shareholders. Dividends paid to corporate shareholders that are tax residents and genuinely established in member states of the European Economic Area (EEA) (including the European Union [EU], Iceland and Liechtenstein) are exempt from withholding tax.
- (c) A 15% withholding tax on interest, royalties and certain lease payments to related entities resident in a low-tax jurisdiction has been introduced. The rules entered into force on 1 July 2021 for interest and royalties and on 1 October 2021 for certain lease payments. The withholding tax may be reduced or exempt under the provisions of a tax treaty entered into by Norway or when the recipient is a company that is actually established and carrying on genuine economic activities within the EEA. For the purpose of the rules, a company is considered a “related party” if the payer and the recipient are directly or indirectly under the same ownership and control by at least 50%. The term “low-tax jurisdiction” is to be interpreted in line with the controlled foreign company rules (see Section E).
- (d) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. In general, resident companies are subject to corporate income tax on worldwide income. However, profits and losses on upstream petroleum activities in other jurisdictions are exempt from Norwegian taxation. Nonresident companies are subject to corporate income tax on income attributable to Norwegian business operations.

A company is tax resident in Norway if it is legally incorporated according to Norwegian corporate law or if its effective management is carried out in Norway.

Rates of corporate tax. The corporate tax rate is currently 22%.

In addition to the general income tax of 22%, a special petroleum tax of 56% applies to income from oil and gas production and from pipeline transportation. A special power production tax of 37% applies on top of the general income tax of 22% for the generation of hydroelectric power.

For companies in the financial sector, a 25% rate applies if they are within the scope of the financial tax rules (see *Financial tax*).

Qualifying shipping companies may elect to be taxed under the Norwegian tonnage tax regime instead of the ordinary tax

regime. Under the tonnage tax regime, profits derived from qualifying shipping activities are exempt from income tax. However, companies electing the shipping tax regime must pay an insignificant tonnage excise tax. Financial income derived by shipping companies is taxed at a rate of 22%. Breach of the requirements under the regime generally leads to forced exit from the regime. The Norwegian Ministry of Finance submitted a proposal for certain amendments to the tonnage tax regime for public consultation in September 2021. The most significant change is the proposal to introduce so-called “mixed use,” providing that certain types of activities (“additional activities”) that currently are not permitted will be allowed within the regime. The proposal is not intended to expand the types of income qualifying for tax exemption under the regime, but rather to increase the flexibility and reduce the risk of forced exit from the regime. If enacted, the defined additional activities will be subject to ordinary tax at a rate of 22%. In addition, certain other changes have been proposed. It is expected that the changes will be enacted during 2022.

Financial tax. A financial tax for companies in the financial sector was introduced from 1 January 2017. The main purpose of the financial tax is to serve as a form of substitute tax for financial businesses that are value-added tax (VAT)-exempt (that is, they benefit from the Norwegian VAT exemption for the sale and mediation of financial services). The financial tax consists of the following two elements:

- The application of a 25% rate on the income of companies covered by the financial tax, instead of the 22% rate, which applies to companies in all other sectors
- A 5% tax on wage costs

The main rule is that all companies that conduct activities that are covered by Group K “Financial and insurance activities” (Codes 64-66) in SN2007 (the European system NACE rev. 2) are subject to the financial tax. These types of activities are referred to as financial activities. The financial tax applies only to companies with employees.

The following businesses are typically subject to the financial tax:

- Businesses engaged in banking
- Businesses engaged in insurance (both life and general insurance)
- Securities funds
- Investment companies
- Holding companies
- Pension funds
- Businesses performing services related to finance business, including administration of financial markets and mediation of securities

The 5% tax on wage cost is calculated based on the yearly payments to all of the company’s employees who perform financial activities as defined in Group K in SN2007. The same base applicable to the calculation of the employer’s social insurance contribution is used for the calculation of the 5% tax on wage costs.

The following exemptions apply:

- An entity that has less than 30% of its total payroll cost relating to financial activities is exempt from the 5% part of the financial tax.
- An entity that has more than 70% of its total payroll cost relating to VAT-liable financial activities is exempt from the 5% part of the financial tax.

All companies covered by the financial tax can deduct the 5% financial tax on wage cost in calculating their taxable income for corporate income tax purposes.

Capital gains. In general, capital gains derived from the disposal of business assets and shares are subject to normal corporate taxes. However, for corporate shareholders, capital gains derived from the sale of shares in limited liability companies, partnerships and certain other enterprises that are qualifying companies under the tax exemption system are exempt from tax. This tax exemption applies regardless of whether the exempted capital gain is derived from a Norwegian or a qualifying non-Norwegian company. In general, life insurance companies and pension funds are not covered by the tax exemption regime.

For shares in companies resident in another EEA member state (the EEA includes the EU, Iceland, Liechtenstein and Norway), the exemption applies regardless of the ownership participation or holding period. However, if the EEA country is regarded as a low-tax jurisdiction (as defined in the Norwegian tax law regarding controlled foreign companies [CFCs]; see Section E), a condition for the exemption is that the EEA resident company be actually established and carrying out genuine economic activities in its home country.

For shares in non-EEA resident companies, the exemption does not apply to capital gains on the alienation of shares in the following companies:

- Companies resident in low-tax jurisdictions, as defined in the Norwegian tax law regarding CFCs; see Section E)
- Companies of which the corporate shareholder has not held at least 10% of the capital and the votes in the company for more than two years preceding the alienation

The right of companies to deduct capital losses on shares is basically eliminated to the same extent that a gain would be exempt from tax.

The exit from Norwegian tax jurisdiction of goods, merchandise, intellectual property, business assets and other items triggers capital gains taxation as if such items were sold at the fair market price on the day before the day of exit. The payment of the exit tax on business assets, financial assets (shares) and liabilities may be deferred if the taxpayer remains tax resident within the EEA. However, the deferred tax must be paid in equal installments over a period of seven years, calculated from the year of exit. Interest is calculated on the deferred tax amount. If a genuine risk of non-payment of the deferred tax exists, the taxpayer must furnish security or a guarantee for the outstanding tax payable. No deferral of the tax is available for intangible assets and inventory.

Administration. The annual tax return is due on 31 May for accounting years ending in the preceding calendar year and must be submitted electronically. Assessments are made in the year in which the return is submitted (not later than 1 December). Tax is paid in three installments. The first two are paid on 15 February and 15 April in the year after the income year, respectively, each based on $\frac{1}{2}$ of the tax due from the previous assessment. The last installment represents the difference between the tax paid and the tax due, and is payable three weeks after the issuance of the assessment. Interest is charged on residual tax.

Dividends. An exemption regime with respect to dividends on shares is available to Norwegian companies if the distribution is not deductible for tax purposes at the level of the distributing entity. However, the 100% tax exemption is limited to 97% if the recipient of the dividends does not hold more than 90% of the shares in the distributing company and a corresponding part of the votes that may be given at the general meeting (that is, the companies do not constitute a tax group of companies). In such cases, the remaining 3% of the dividends is subject to 22% taxation, which results in an effective tax rate of 0.66%.

The tax exemption applies regardless of the ownership participation or holding period if the payer of the dividends is a resident in an EEA member state. However, if the EEA country is regarded as a low-tax jurisdiction, the EEA resident company needs to qualify as actually established and carrying out genuine economic activities in its home country.

For non-EEA resident companies, the exemption does not apply to dividends paid by the following companies:

- Companies resident in low-tax jurisdictions as defined in the Norwegian tax law regarding CFCs (see Section E)
- Other companies of which the recipient of the dividends has not held at least 10% of the capital and the votes of the payer for a period of more than two years that includes the distribution date

Dividends paid to nonresident shareholders are subject to a 25% withholding tax. The withholding tax rate may be reduced by tax treaties. Dividends distributed by Norwegian companies to corporate shareholders resident in EEA member states are exempt from withholding tax. This exemption applies regardless of the ownership participation or holding period. However, a condition for the exemption is that the EEA resident company be actually established and carrying out genuine economic activities in its home country.

Foreign tax relief. A tax credit is allowed for foreign tax paid by Norwegian companies, but it is limited to the proportion of the Norwegian tax that is levied on foreign-source income. Separate limitations must be calculated according to the Norwegian tax treatment of the following two different categories of foreign-source income:

- Income derived from low-tax jurisdictions and income taxable under the CFC rules
- Other foreign-source income

For dividend income taxable in Norway (that is, dividends that are not tax-exempt under the exemption regime), Norwegian

companies holding at least 10% of the share capital and the voting rights of a foreign company for a period of more than two years that includes the distribution date may also claim a tax credit for the underlying foreign corporate tax paid by the foreign company, provided the Norwegian company includes an amount equal to the tax credit in taxable income. In addition, the credit is also available for tax paid by a second-tier subsidiary, provided that the Norwegian parent indirectly holds at least 25% of the second-tier subsidiary and that the second-tier subsidiary is a resident of the same country as the first-tier subsidiary. The regime also applies to dividends paid out of profits that have been retained by the first- or second-tier subsidiary for up to four years after the year the profits were earned. The tax credit applies only to tax paid to the country where the first- and second-tier subsidiaries are resident.

C. Determination of taxable income

General. In calculating taxable income, book income shown in the annual financial statements (which must be prepared in accordance with generally accepted accounting principles) is used as a starting point. However, the timing of income taxation is based on the realization principle. Consequently, the basic rules are that an income is taxable in the year in which the recipient obtains an unconditional right to receive the income, and an expense is deductible in the year in which the payer incurs an unconditional obligation to pay the expense. In general, all expenses, except gifts and entertainment expenses, are deductible.

Inventory. Inventory is valued at cost, which must be determined on a first-in, first-out (FIFO) basis.

Depreciation. Depreciation on fixed assets must be calculated using the declining-balance method at any rate up to a given maximum. Fixed assets (with a cost of more than NOK15,000 and with a useful life of at least 3 years) are allocated to one of the following 10 different groups.

Group	Maximum depreciation rates (%)
A Office equipment and similar items	30
B Acquired goodwill	20
C Specified vehicles	
Trailers, trucks and buses	24
Commercial vehicles, taxis and vehicles for the transportation of disabled persons	24
Electric trucks acquired on or after 20 December 2016	30
D Cars, tractors, other movable machines, other machines, equipment, instruments, furniture, fixtures and similar items	20
E Ships, vessels, drilling rigs and similar items	14
F Aircraft and helicopters	12
G Installations for transmission and distribution of electric power, electronic equipment in power stations and such production equipment used in other industries	5

	Group	Maximum depreciation rates (%)
H	Industrial buildings and industrial installations, hotels, rooming houses, restaurants and certain other structures	
	Useful life of 20 years or more	4
	Useful life of less than 20 years	10
	Livestock buildings in the agricultural sector	6
I	Office buildings	2
J	Technical installations in buildings	10

Assets in groups A, B, C and D are depreciated as whole units, while assets in groups E, F, G, H, I and J are depreciated individually.

If fixed assets in groups A, B, C and D are sold, the proceeds reduce the balance of the group of assets and consequently the basis for depreciation. If a negative balance results within groups A, C or D, part of the negative balance must be included in income. In general, the amount included in income is determined by multiplying the negative balance by the depreciation rate for the group. However, if the negative balance is less than NOK15,000, the entire negative balance must be included in taxable income.

A negative balance in one of the other groups (B, E, F, G, H, I and J) must be included in a gains and losses account. Twenty percent of a positive balance in this account must be included annually in taxable income.

Relief for losses. A company holding more than 90% of the shares in a subsidiary may form a group for tax purposes. To consolidate taxable income in a tax group, a company with net profits may transfer those profits to a loss-making company. The profits are required to be actually transferred between the group companies. Companies covered by the financial tax (see *Financial tax* in Section B) may only deduct 22/25 of intragroup contributions to companies not covered by the financial tax.

Effective from the 2021 income year, Norwegian companies may grant tax-deductible group contributions to subsidiaries that are resident in an EEA country, provided that certain conditions are fulfilled. The group contribution must cover a final loss in the subsidiary, in line with the principles established under EU case law.

Alternatively, losses may be carried forward indefinitely. Losses can only be carried back when a line of business has been terminated. Losses may be carried back to offset profits of the preceding two years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax, on any supply of goods and services, other than zero-rated (0%) and exempt (without credit) supplies, in Norway	
General rate	25
Articles of food	15

Nature of tax	Rate (%)
Passenger transportation, cultural events and certain other supplies	12
Social security contributions, on all taxable salaries, wages and allowances, and on certain fringe benefits; paid by Employer (general rates; lower in some municipalities and for employees age 62 and over)	14.1
Employee (expatriates liable unless exempt under a social security convention)	8
Professional income	11.42
Pensioners and persons under 17 years old	5.1

E. Miscellaneous matters

Anti-avoidance legislation. According to a general anti-avoidance provision in Norwegian legislation, tax authorities may disregard a transaction if its main purpose is to obtain a tax benefit and, after an overall assessment, it is determined that the transaction cannot be used as the basis for taxation. The determination of whether the main purpose is to obtain a tax benefit is dependent on an objective assessment (that is, an assessment of what a hypothetical rational taxpayer would have done in a similar situation instead of the specific taxpayer).

In addition, Norwegian legislation has a specific anti-avoidance rule. If a company with a general tax position (that is, a tax position not connected to any specific asset or debt, such as a tax loss carryforward) is involved in a transaction in which the use of that tax position is the main objective of the transaction, the tax authorities may disallow such a tax position. This rule has a narrower scope, but a lower threshold for application, than the general anti-avoidance provision described above.

Foreign-exchange controls. Norway does not impose foreign-exchange controls. However, foreign-exchange transactions must be carried out by approved foreign-exchange banks.

Debt-to-equity rules. Norway does not have statutory thin-capitalization rules. Based on the arm's-length principle (see *Transfer pricing*), the tax authorities may deny an interest deduction on a case-by-case basis if they find that the equity of the company is not sufficient (for example, the Norwegian debtor company is not able to meet its debt obligations). An allocation rule regulates the deductibility of interest expenses for income subject to petroleum tax.

Norway has interest limitation rules. Under these rules, interest payments that exceed 25% of "tax earnings before interest, tax, depreciation and amortization (EBITDA)," which is defined as ordinary taxable income with tax depreciation and net interest expenses added back, are nondeductible (fixed ratio rule).

These rules impose a general restriction on interest deductibility, which applies to corporations and transparent partnerships as well as Norwegian permanent establishments of foreign companies. The restriction applies to interest payments made in both domestic and cross-border situations. With respect to companies that are not part of a group, only interest paid to related persons are covered

by the fixed ratio rule. Companies that are part of a consolidated multinational group for financial accounting purposes or companies that can be part of such group (group companies) are subject to the fixed ratio rule on interest paid on both internal and external loans. Companies taxed under the tonnage tax regime and under the hydropower tax regime are also subject to the fixed ratio rule. However, entities subject to the Norwegian Petroleum Tax Act are not yet covered by the rules.

The fixed ratio rule applies only if net interest expenses exceed the threshold established by the law. For group companies, the threshold is NOK25 million, which is computed on a combined basis for all Norwegian entities in the global consolidated group. For companies that are not part of a group, the threshold is NOK5 million. If the applicable threshold is exceeded, all interest expenses must be assessed under the fixed ratio rule, including the first NOK25 million or NOK5 million.

There are two alternative equity escape rules that may apply to group companies if the threshold of NOK25 million is exceeded.

The first equity escape rule allows all interest expenses to be deducted if the Norwegian company can demonstrate that its adjusted equity over total assets ratio (equity ratio) is no more than two percentage units (points) lower than the equivalent equity ratio of the global group.

The second equity escape rule allows all interest expenses to be deducted if the combined Norwegian part of the group can demonstrate that its adjusted equity ratio is no more than two percentage units lower than the equivalent equity ratio of the global group.

Certain exceptions apply to interest expenses incurred by group companies on borrowing arrangements with related parties that are not part of the consolidated group. For such related-party interest, the equity escape rules do not apply and, if net interest expenses in the borrowing entity exceed NOK5 million, the net related-party interest can be deducted only to the extent both internal and external net interest expenses do not exceed 25% of tax EBITDA.

Under the rules, a related party is a person, company or entity if, at any point during the fiscal year, any of the following is true:

- It directly or indirectly controls at least 50% of the debtor.
- It is a company or entity of which the debtor directly or indirectly controls at least 50%.
- It is a company or entity that is at least 50% owned directly or indirectly by the same company or entity as the debtor.

In general, interest expenses that cannot be deducted during the fiscal year can be carried forward for 10 years. However, the interest expenses carried forward cannot exceed 25% of the basis of the calculation to be made in any future year. Any carryforward of non-deducted interest expenses must be deducted before the current year's interest expenses.

Controlled foreign companies. Norwegian shareholders in controlled foreign companies (CFCs) resident in low-tax jurisdictions are subject to tax on their allocable shares of the profits of the CFCs, regardless of whether the profits are distributed as

dividends. A CFC is a company of which 50% or more of its shares is directly or indirectly owned or controlled by Norwegian residents. A low-tax jurisdiction is a jurisdiction with an effective corporate tax rate for that kind of company that is less than two-thirds of the Norwegian effective tax rate that would have been imposed if the taxpayer had been resident for tax purposes in Norway. The CFC rules do not apply to the following CFCs:

- A CFC resident in a country with which Norway has entered into a tax treaty if the income of the CFC is not of a predominantly passive nature.
- A CFC resident in an EEA member country if such CFC is actually established and carries out genuine economic activities in its home country and if Norway and the home country have entered into a treaty containing exchange-of-information provisions. As of 2019, Norway has entered into such treaties with all EEA countries.

The losses of a CFC may not offset the non-CFC income of an owner of the CFC, but they may be carried forward to offset future profits of the CFC.

Transfer pricing. The arm's-length principle is stated in Section 13-1 of the Tax Act, and the transfer-pricing filing and documentation requirements are stated in Section 8-11 of the Tax Administration Act. Norway has not yet formally implemented the changes for transfer-pricing documentation set out in Chapter V of the 2017 Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines. However, the Norwegian Ministry of Finance and the tax administration in Norway have communicated that the new rules will be formally implemented. In practice, transfer-pricing documentation in line with Chapter V of the 2017 OECD Transfer Pricing Guidelines is accepted as long as it also fulfills the more specific Norwegian requirements set out in Section 8-11 of the Tax Administration Act. As an attachment to the annual tax return, Norwegian companies and Norwegian permanent establishments must report summary information about their business and their controlled transactions (Form RF-1123) with affiliated companies.

Norwegian companies and Norwegian permanent establishments must prepare and maintain annual written documentation describing their group, the Norwegian entities and their significant controlled transactions and dealings with related parties. To avoid a deemed tax assessment, such documentation must be presented to the tax authorities no later than 45 days after it has been requested. The statutory limitation for providing such documentation is 10 years.

Companies that meet the following criteria for the relevant tax year are exempt from the documentation requirements:

- The real value of the controlled (intercompany) transactions is less than NOK10 million during the fiscal year.
- At the end of the relevant tax year, the intercompany loans, debts, guarantees and receivables amount to less than NOK25 million.

In addition, Norwegian entities belonging to a group of companies with less than 250 employees may be exempted from the abovementioned documentation requirements if the group has consolidated sales revenue of less than NOK400 million or a

consolidated total balance of less than NOK350 million. The exemption does not apply if the Norwegian entity has controlled transactions with related parties located in countries from which Norwegian tax authorities cannot request exchange of information under a treaty. The exemption also does not apply to companies subject to tax under the Norwegian Petroleum Tax Act.

Country-by-Country Reporting. Norway has introduced Country-by-Country Reporting (CbCR) requirements that mainly follow OECD BEPS Action 13 requirements. The CbCR requirements apply to Norwegian entities that are part of a multinational group of companies with consolidated turnover exceeding NOK6.5 billion. Any Norwegian entity that is part of such group of companies must notify the Norwegian tax authorities about the reporting entity for the group in the annual tax return (Form RF-1028) concerning the reporting year, at the latest. The requirements are stated in Section 8-12 of the Tax Administration Act.

F. Treaty withholding tax rates

On 21 December 2020, the Norwegian parliament adopted rules imposing a 15% withholding tax on interest, royalties and certain lease payments to related parties resident in a low-tax jurisdiction. For the purpose of the rules, a company is considered a “related party” if the payer and the recipient are directly or indirectly under the same ownership and control by at least 50%. The term “low-tax jurisdiction” is to be interpreted in line with the controlled foreign company rules (see Section E). The rules entered into force on 1 July 2021 for interest and royalties. Consequently, the treaty rates listed below for interest and royalties may apply from 1 July 2021, subject to the fulfillment of requirements (if any) established in each treaty.

Many treaties provide exemptions for dividend, interest and royalties paid to certain entities (for example, to the state, local authorities, the central bank, export credit institutions or with respect to sales on credit). Such exemptions are not considered in the table below.

	Dividends %	Interest %	Royalties %

- (a) Dividends paid to corporate residents of EEA member states are exempt from withholding tax if the EEA resident company is really established in its home country.
- (b) A revision of this treaty (or a new protocol) is currently being negotiated. Also, see the first paragraph after the footnotes.
- (c) The treaty withholding rate is increased if the recipient is not a company owning at least 25% of the distributing company. For Serbia, in order to be entitled to this reduced rate, the recipient must also fulfill a holding period in accordance with the provisions of Article 8 of the Multilateral Instrument to Implement Tax Treaty Measures to Prevent Base Erosion and Profit Shifting (MLI). The holding period applies to dividend payments from 1 January 2020. For Kenya, the withholding rate is increased if the recipient is not a company owning at least 25% of the distributing company during the period of six months immediately preceding the date of payment of the dividends.
- (d) The treaty withholding rate is increased if the recipient is not a company owning at least 10% of the distributing company. For Ireland and the Netherlands, in order to be entitled to this reduced rate, the recipient must also fulfill a holding period in accordance with the provisions of Article 8 of the MLI. The holding period applies to dividend payments from 1 January 2020. For Poland, the 0% rate applies if the Polish company owns directly at least 10% of the capital in the Norwegian company for an uninterrupted period of at least 24 months. For Belgium, the 5% rate applies if the beneficial owner is a pension fund that satisfies additional conditions established in the treaty. The 0% rate applies if the beneficial owner of the dividends owns directly at least 10% of the capital in the Norwegian company for an uninterrupted period of at least 12 months.
- (e) Norway honors the Czechoslovakia treaty with respect to the Slovak Republic. Norway has entered into a tax treaty with the Czech Republic. The withholding tax rates under the Czech Republic treaty are shown in the above table.
- (f) Norway honors the suspended Yugoslavia treaty with respect to Bosnia and Herzegovina, Croatia and Montenegro.
- (g) The treaty withholding rate is increased if the recipient is not a company holding at least 50% of the voting power of the distributing corporation.
- (h) The 5% rate applies if the recipient is a company owning at least 25% of the distributing company. The rate is increased to 10% if the recipient is a company owning at least 10%, but less than 25%, of the distributing company. For other dividends, the rate is 15%.

-
- (i) The 0% rate applies if the recipient company owns at least 25% of the capital in the Norwegian company. The 5% rate applies if it owns at least 10% of the capital in the Norwegian company but less than 25%. The 15% rate applies if the beneficial owner owns less than 10% of the capital in the Norwegian company.
- (j) The 5% rate applies if the recipient of the dividends owns at least 70% of the capital of the Norwegian payer. The rate is increased to 10% if the recipient owns at least 25%, but less than 70%, of the Norwegian payer. For other dividends, the rate is 15%.
- (k) The treaty withholding rate is increased to 15% if the recipient is not a company that satisfies both of the following conditions:
- It owns at least 30% of the capital of the distributing company.
 - It has invested more than USD100,000 in the payer.
- (l) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the distributing company.
- (m) The Hong Kong and Macau Special Administrative Regions (SARs) are not covered by the China Mainland treaty.
- (n) The 5% rate applies if the Australian company holds at least 10% of the voting power in the Norwegian company and fulfills the required holding period in accordance with the provisions of Article 8 of the MLI. The holding period applies to dividend payments from 1 January 2020. The 0% rate applies if more than 80% of the voting power is held, subject to several conditions.
- (o) The 0% rate applies if the recipient is a company.
- (p) The 5% rate applies if the dividends are exempt in Norway and if they are derived by either of the following:
- A beneficial owner (other than a partnership) who holds directly at least 20% of the capital in the Norwegian company
 - The Government Social Security Fund (Sosyal Güvenlik Fonu)
- (q) The treaty withholding rate is increased if the recipient is not a company owning at least 15% of the distributing company and/or does not fulfill the required holding period in accordance with the provisions of Article 8 of the MLI. The holding period applies to dividend payments from 1 January 2020. The 0% rate applies if more than 80% of the voting power is held, subject to several conditions.
- (r) The 0% rate applies if the beneficial owner is one of the following:
- A company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends on the date on which the dividends are paid if it has maintained that holding for an uninterrupted 24-month period or if it will maintain that holding for an uninterrupted 24-month period in which that date falls
 - A statutory body or an institution wholly or mainly owned by the government of Malta or the Central Bank of Malta
- (s) The treaty withholding tax rate is increased if the recipient is not a company directly owning at least 10% of the distributing company for the last 12 months. If the distributing company has existed for less than 12 months, the recipient must satisfy the 10% condition since the date on which the distributing company was established.
- (t) The treaty withholding tax rate is increased if the recipient is not a company owning, directly or indirectly, at least 10% of the distributing company or is a pension scheme.
- (u) The rate under the treaty is 12.5%. However, as a result of a most-favored-nation clause, the rate is reduced to 12%.
- (v) The 0% rate applies to interest is derived from the investment of official reserve assets by the government of a contracting state, its monetary institutions or a bank performing central banking functions in that state or interest derived by a financial institution that is unrelated to and dealing wholly independently with the payer. However, a 10% rate applies if the interest is paid as part of an arrangement involving back-to-back loans, or other arrangements that are economically equivalent and intended to have a similar effect. The 10% rate applies in all other cases.
- (w) The 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 4% rate applies if the beneficial owner is one of the following:
- A bank
 - An insurance company
 - An enterprise substantially deriving its gross income from the active and regular conduct of a lending or finance business involving transactions with unrelated persons if the enterprise is unrelated to the payer of the interest

- An enterprise that sold machinery or equipment if interest is paid with respect to indebtedness that arises as part of the sale on credit of such machinery or equipment
- Any other enterprise, provided that in the three tax years preceding the tax year in which the interest is paid, the enterprise derives more than 50% of its liabilities from the issuance of bonds in the financial markets or from the taking of deposits at interest, and more than 50% of the assets of the enterprise consist of debt-claims against unrelated persons

The 15% rate applies in all other cases.

- (x) The 10% rate applies to interest paid to banks.
- (y) The 10% rate applies to interest paid to banks carrying on bona fide banking business.
- (z) The 0% rate applies to interest on certain qualifying loans.
- (aa) The 10% rate applies to interest paid to financial institutions (including insurance companies). A most-favored-nation clause may apply with respect to interest payments.
- (bb) The 5% rate applies to certain credit institutions providing export credits or a government pension or social security fund. The 10% rate applies to interest paid to banks. The 15% rate applies in all other cases.
- (cc) The 5% rate applies to interest paid to banks.
- (dd) The 3% rate applies to news-related royalties. The 5% rate applies to copyright royalties other than royalties related to films or tapes. The 10% rate applies to patents, trademarks, know-how, certain lease-related royalties and technical assistance. The 15% rate applies in all other cases. A most-favored-nation clause may apply with respect to royalty payments.
- (ee) The 0% rate applies to copyright royalties (excluding films), computer software, patents and know-how.
- (ff) The royalties' rates under the treaty are 5% for equipment leasing and 15% in all other cases. However, as a result of a most-favored-nation clause, the rates are reduced to 2% for equipment leasing and 10% in all other cases.
- (gg) The 0% rate applies to copyrights of literary, artistic or scientific works except for computer software and including cinematographic films, and films or tapes for television or radio broadcasting. The 5% rate applies to industrial, commercial or scientific equipment. The 10% rate applies to patents, trademarks, designs or models, plans, secret formulas or processes and computer software, or for information concerning industrial, commercial or scientific experience.
- (hh) The reduced rate does not apply to royalties with respect to cinematographic films.
- (ii) The rates for royalties under the treaty are 5% for equipment rentals and 10% in all other cases. However, as a result of a most-favored-nation clause, royalties are exempt from withholding tax.
- (jj) The 10% rate applies for the use of any patents, trademarks, designs or models, plans, secret formulas or processes, and for the supply of commercial, industrial or scientific equipment or information. The 15% rate applies for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes for radio or television broadcasting.
- (kk) A most-favored-nation clause may apply with respect to royalties.
- (ll) The 10% rate applies for the use of any patents, trademarks, designs or models, plans, secret formulas or processes, and for the supply of commercial, industrial or scientific equipment or information. The 15% rate applies for the use of, or the right to use copyrights of literary, artistic or scientific works, including cinematographic films.
- (mm) The 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment. The 10% rate applies to all other cases. A most-favored-nation clause may apply with respect to royalties, reducing the rate to 0%.
- (nn) The 5% rate applies to royalties paid for the use of, or the right to use copyrights of literary, artistic or scientific works, including cinematographic films or films or tapes used for radio or television broadcasting. The 10% rate applies to royalties paid for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial or scientific experience. A most-favored-nation clause may apply with respect to interest payments.
- (oo) The 5% rate applies for the use of or the right to use patents, trademarks, designs or models, plans, secret formulas or processes, or industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. The 0% rate applies to royalties paid for the use of or the right to use copyrights of literary, artistic or scientific works, including cinematographic films, and films or tapes for television or radio broadcasting.

- (pp) The 5% rate applies for the use of, or the right to use, copyrights of literary, artistic or scientific works. The 10% rate applies to royalties for the use of or the right to use industrial, commercial or scientific equipment. The 15% rate applies in all other cases.
- (qq) The 5% rate applies for the use of, or the right to use, copyrights of literary, artistic or scientific works, excluding cinematographic films or films for television broadcasting. The 15% rate applies for the use of patents, models, secret formulas or processes, or for information concerning industrial, commercial or scientific experience. The 20% rate applies for the use of, or the right to use, licensing rights, manufacturing rights or trademarks, cinematographic films or films for television broadcasting and equipment used in agricultural, industrial or scientific research.
- (rr) The 5% rate applies for the use of patents, plans, secret formulas or processes, or for information (know-how) concerning industrial, commercial or scientific experience. The 10% rate applies in all other cases.
- (ss) The reduced rate does not apply to royalties for copyrights of motion picture films or films or tapes used for radio or television broadcasting.
- (tt) The 9% rate applies to payments for technical assistance. The 12% rate applies in all other cases.
- (uu) The 0% rate applies if one of the following conditions are met:
- The interest is paid by a purchaser to a seller in connection with a commercial credit resulting from deferred payments for goods, merchandise, equipment or services.
 - The interest is paid with respect to loans of any nature granted by a banking enterprise, except when such loans are represented by bearer instruments.
 - The interest is paid with respect to a credit or loan of any nature granted or extended by an enterprise to another enterprise.
 - The interest is paid to a pension fund, provided that the debt-claim with respect to which such interest is paid is held for the purpose of certain activities.
- (vv) A most-favored-nation clause may apply with respect to interest payments.
- (ww) The 0% rate applies to royalties received in consideration for the use of, or the right to use, ships or aircraft on a bareboat basis, or containers, in international traffic. The 5% rate applies in all other cases.
- (xx) The 0% rate applies to interest paid by a purchaser to a seller in connection with commercial credit resulting from deferred payments for goods, merchandise or services and interest paid with respect to a loan of any nature made by a bank.

Norway signed a tax treaty with Ghana on 20 November 2020, but the treaty is not yet in force. Norway is negotiating tax treaties with the Hong Kong SAR, Iran, Kuwait and Liechtenstein.

Norway has entered into exchange-of-information tax treaties with Andorra, Anguilla, Antigua and Barbuda, Aruba, Bahamas, Bahrain, Belize, Bermuda, Botswana, British Virgin Islands, Brunei Darussalam, Cayman Islands, Cook Islands, Costa Rica, Denmark (Nordic Treaty), Dominica, Faroe Islands (Nordic Treaty), Finland (Nordic Treaty), Gibraltar, Grenada, Guernsey, the Hong Kong SAR, Iceland (Nordic Treaty), Isle of Man, Jersey, Liberia, Lichtenstein, the Macau SAR, Marshall Islands, Mauritius, Monaco, Montserrat, Niue, Panama, Samoa, San Marino, Seychelles, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, the Turks and Caicos Islands, the United Arab Emirates, the United States, Uruguay and Vanuatu.

In addition, Norway signed an exchange-of-information tax treaty with Guatemala on 15 May 2012, but the agreement is not yet in force.

The Income Tax Law (ITL), which is effective from the tax year beginning on 1 January 2010, was published in the Official Gazette on 1 June 2009. The Executive Regulations (ERs), which provide clarifications to certain provisions of the ITL, were issued on 28 January 2012 through Ministerial Decision (MD) 30/2012.

Royal Decree (RD) 9/2017 published in the Official Gazette on 26 February 2017 amended certain provisions of the ITL. In September 2020, the ITL was further amended by RD 118/2020.

MD 14/2019, amending the ERs to the ITL, was published on 10 February 2019. The amendments include clarifications on the withholding tax regime, administrative procedures, tax exemptions, deductibility of expenses, on-site inspection procedures and taxability of enterprises. They generally apply from 11 February 2019, but some amendments apply retroactively to tax years beginning on or after 1 January 2018.

A. At a glance

Corporate Income Tax Rate (%)	15 (a)
Capital Gains Tax Rate (%)	15
Branch Tax Rate (%)	15
Withholding Tax (%)	10 (b)
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (c)

- (a) The rate for Small and Medium-Sized Enterprises is 3%. For further information regarding corporate income tax rates, see Section B.
- (b) This tax is imposed on certain payments to nonresident persons that do not have a permanent establishment in Oman or have a permanent establishment in Oman but such payments do not form part of the gross income of that permanent establishment in Oman. Companies or permanent establishments in Oman that make specified payments on which withholding tax is applicable must deduct the tax at source and remit it to the Tax Authority (for a listing of these items, see Section B).
- (c) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Companies, which include Omani companies, partnerships, joint ventures and sole proprietorships, and permanent establishments of foreign companies are subject to Omani income tax. A permanent establishment, which is defined in the law, also includes a building site, a place of construction or an assembly project if it lasts for a period of more than 90 days. In addition, a permanent establishment is created for a foreign person providing consultancy or other services in Oman through employees or designated agents visiting Oman for at least 90 days in any 12-month period.

Omani companies and Omani sole proprietorships are subject to tax on overseas income (income accrued from a source outside Oman). However, a foreign tax credit limited to Oman's tax rate of 15% is available against the tax payable in Oman.

Under amendments contained in RD 9/2017, taxability of Gulf Co-operation Council (GCC) country citizens or a GCC-owned company is based on a 2001 economic agreement between the GCC member states.

Rates of corporate income tax. Companies registered in Oman, regardless of the extent of foreign participation, and permanent establishments of foreign companies are subject to tax at a rate of 15% on their taxable income. RD 9/2017 removed the statutory exemption limit of OMR30,000.

Oil exploration and production companies are taxed at a rate of 55% and are usually covered by special rules contained in concession agreements. Exploration and production sharing agreements

(EPSAs) signed between the government of Oman and concession partners provide detailed procedures for computing taxable income and settlement of tax due. Under an EPSA, the government of Oman settles tax due on behalf of the concession partner out of the government's share of production.

Foreign shipping and aviation companies are exempt from tax in Oman if the Omani shipping and aviation companies enjoy similar reciprocal treatment in the respective foreign countries. Omani companies and sole proprietorships engaged in shipping are exempt from tax.

Income derived by investment funds established in Oman and by funds established outside Oman dealing in Omani securities listed in the Muscat Securities Market (MSM) is exempt from tax. These exemptions are for indefinite periods.

Tax holidays are available to companies engaged in industrial activities. The exemption is restricted to five years, subject to the fulfillment of certain conditions.

No income can be exempt from tax unless provided by a law or Royal Decree.

Small and Medium-Sized Enterprises. Under RD 9/2017, Small and Medium-Sized Enterprises (SMEs) are now taxed at 3%, effective from 1 January 2017. For an entity to be considered as an SME, certain prescribed criteria must be fulfilled.

MD 14/2019 amended the criteria on capital, revenue and number of employees for enterprises to benefit from the applicability of reduced tax rates of 0% and 3%. SMEs must submit a final return of income within three months after the end of the accounting period, together with a statement of income on a cash basis. The amendments introduced by MD 14/2019 clarify that the general rules for deductibility of expenses for enterprises are similar to those for other local taxpayers.

SMEs that do not keep accounts of expenses are required to submit an annual application together with the tax return and details of revenue during the year. The Tax Authority will determine the deductibility of deemed expenses based on the application.

Capital gains. No special rules apply to capital gains. Capital gains are taxed as part of regular business income at the rates set out in *Rates of corporate income tax*.

The tax law provides that profits and gains derived from disposals of all assets, including disposals of goodwill, trade names or trademarks with respect to all or part of a business, are included as deemed income.

Gains derived from the sale of investments and securities listed on the MSM are exempt from tax.

Withholding tax. Withholding tax at a rate of 10% of gross payments is imposed on certain gross payments made to foreign companies, including the following (also, see below):

- Dividends
- Interest
- Royalties (see below)
- Consideration for research and development

- Fees for management or performance of services
- Consideration for the use of or right to use computer software

Entities in Oman, including permanent establishments, are responsible for deducting and remitting tax to the government. The tax is final. Foreign persons do not have any further filing or other obligations with respect to such income.

If a foreign company has a permanent establishment in Oman, but the permanent establishment in Oman is unconnected to the receipt of income that is subject to withholding tax, withholding tax applies to such payments.

A Royal Assent has suspended the application of provisions of the ITL relating to withholding tax on dividends and interest for a period of three years from 6 May 2019. This suspension was further increased to five years from the 2020 tax year (until 31 December 2024) under the Economic Stimulus Plan introduced by the Ministry of Finance.

Further details regarding the withholding taxes are provided below.

Withholding tax on performance of services. The term “services” is not defined in the ITL or the regulations. However, ERs provide that the following are excluded from the applicability of withholding tax:

- Participation in organizations, conferences, seminars or exhibitions
- Training
- Transporting, shipping and insurance of goods
- Air tickets and accommodation expenses abroad
- Board meeting fees
- Reinsurance payments
- Any services related to an activity or property outside Oman

Withholding tax on royalties. Royalties include payments for the use of or right to use software, intellectual property rights, patents, trademarks, drawings, equipment rentals, consideration for information concerning industrial, commercial or scientific experience, and concessions involving minerals.

Withholding tax on dividends. Under RD 9/2017, dividends paid to foreign persons on publicly listed shares are subject to withholding tax at 10% of gross payments, effective from 27 February 2017. The amendments introduced by MD 14/2019 clarify that the term “dividends” includes dividends distributed by joint stock companies and distributions by investment funds.

Withholding tax on interest. Amendments introduced by MD 14/2019 define the term “interest” for withholding tax purposes and clarify the treatment of returns generated by certain Islamic Finance products. MD 14/2019 excludes certain payments from withholding tax, including the following:

- Interest paid on amounts deposited in banks located in Oman
- Returns on bonds and *sukuk* issued by the government or banks located in Oman
- The benefits of transactions and facilities between banks for the purpose of providing and managing liquidity or financing, if the term for repayment of the debt does not exceed five years

Other. The applicability of withholding tax on interest and payments for services is an evolving issue for which taxpayers should seek advice before making decisions. Effective from 27 February 2017, responsibility to deduct withholding tax is extended to ministries, public establishments and other government administrative bodies.

Administration

General. A taxpayer is required to register with the Tax Authority by filing a declaration of details related to the entity (Income Tax Forms Nos. 2 to 5) within a period of 60 days after the date of incorporation or commencement of activities, whichever is earlier. Any changes to the registration information must be communicated within 30 days by submitting a form entitled “Declaration of modification to the details related to the taxpayer” (Income Tax Form No. 6).

Tax card. Under an amendment contained in RD 9/2017, a request for a tax card must be submitted to the Tax Authority within two months after the date of incorporation or commencement of business or within one month after the date of any change in data of an entity. The allotted card number and date must be included in all the invoices, contracts and correspondence. The tax card system entered into effect on 1 July 2020. Fines that may be imposed on taxpayers in case of noncompliance with this requirement have been stipulated.

Accounting period. The accounting period begins on the date of commencement of business for joint ventures and permanent establishments. For companies, the start date is the date of registration or incorporation. The first accounting period may be less than 12 months but cannot exceed 18 months. The accounting period may be changed with the approval of the Tax Authority.

Books of accounts. Books of accounts are required to be maintained for a period of 10 years. Permission is required for maintaining books of accounts in a foreign currency. In such a case, income must be converted at exchange rates prevailing on the last day of the accounting year, as published by the Central Bank of Oman. The accrual method of accounting must be used.

Principal Officer. The term “Principal Officer” is defined for various entities. If a permanent establishment carries on an activity in Oman through a dependent agent, the agent is treated as Principal Officer. If a sole proprietor or owner of a permanent establishment is outside Oman, the individual or permanent establishment must designate a Principal Officer to comply with the obligations under the law. Such Principal Officer may not be absent from Oman for more than 90 days in a tax year.

Partners of joint ventures are jointly and severally liable for taxes of the joint venture.

Returns: The previous requirement to submit two tax returns (the provisional and final returns of income) has been replaced. An income tax return is now required to be submitted within four months from the end of the relevant tax year or accounting period for which the return is prepared. This requirement is effective for tax years commencing on or after 1 January 2020.

Electronic filing of returns. Amendments contained in RD 9/2017 introduced a system of electronic filing of tax returns. Although e-filing regulations have not yet been prescribed, tax returns (both corporate income tax and withholding tax) are required to be filed electronically via the tax online portal.

Tax residency. RD 118/2020 introduced a new concept of tax residency as follows:

- A natural person is a resident if he or she spends 183 days or more (consecutive or intermittent) in Oman during the tax year.
- A legal person is a tax resident if it has been established in accordance with the laws and RDs in force in Oman, or if its head office or headquarters is in Oman.

The reference to foreign persons in the charging section for withholding tax in the ITL has been amended to apply to nonresident persons (that is, a person not fulfilling the above criteria).

Financial institutions and other businesses operating in Oman. On 14 September 2020, Oman ratified the automatic exchange of information (AEOI) through RD 118/2020 to support the implementation of the Common Reporting Standard and Country-by-Country Reporting Standards developed by the Organisation for Economic Co-operation and Development. The Chairman of the Tax Authority has also issued announcements related to relevant administrative rules. Reporting financial institutions and other multinational businesses should assess their compliance requirements, if any, under the AEOI regime.

Assessments. Assessments must be issued within three years from the end of the year in which tax returns are filed. If no assessment is issued within a period of three years, such assessments are deemed to have been issued (that is, tax returns are accepted as filed).

Rectification, revision or additional assessment may be carried out by the Tax Authority within three years after the date of the original assessment. However, in a case of fraud or deception, the statutory timeline for assessment is extended up to five years. If a tax return is not submitted for a tax year, the time limit for making an assessment is five years from the end of the tax year for which the tax return is due.

Assessed tax, reduced by tax already paid, must generally be paid within 30 days after the date of issuance of the assessment. A delay results in a fine of 1% per month on taxes due for the period of delay. If a refund is assessed, the refund must be claimed within five years from the end of the year in which such refund is due. The refund may also be used as a setoff against future tax payable.

Assessments are made with respect to withholding tax. Under an amendment contained in RD 9/2017, assessments can be issued in cases in which withholding tax is not paid by the taxpayer.

RD 9/2017 introduced a system of sample basis selection for investigation before the issuance of an assessment. However, regulations on sampling and other procedures have not yet been issued.

Statutory periods of limitation. For the period of limitation related to assessments, see *Assessments*.

The government's right to collect taxes expires after seven years from the date taxes became due and payable, unless the Tax Authority initiates action to recover taxes.

Appellate processes. An objection against an assessment order must be filed with the Tax Authority. Other appellate procedures are an appeal with the Tax Grievance Committee (a special committee recently formed to address taxpayers' grievances), a tax suit filed in the primary court, an appeal to the appellate court, and finally a case before the Supreme Court.

An objection against an assessment must be filed within 45 days from the date of serving of the assessment order. An appeal must be submitted within 45 days from the date of the decision on the objection or the date of expiration of the specified period for deciding on the objection if no decision is issued.

The time limit for consideration of the objection is five months, with an extension of an additional three months. If no decision is issued, an implied rejection of the objection is deemed to occur.

A taxpayer can seek extension of time for the payment of disputed tax. However, the undisputed tax must be paid within 30 days after the date of assessment.

Stringent penalties are imposed for noncompliance with the procedural requirements and any understatement of income or profits.

Dividends. Dividends received by Omani companies, permanent establishments of foreign companies or Omani sole proprietorships from Omani companies are exempt from tax.

Foreign tax relief. A foreign tax credit limited to Oman's tax rate of 15% is available against the tax payable in Oman on overseas income of Omani companies and sole proprietors.

C. Determination of trading income

General. Tax is levied on the taxable income earned by Omani companies, permanent establishments of foreign companies and Omani sole proprietorships. Financial accounts must be prepared using the accrual basis of accounting and in accordance with international accounting standards.

Gains on the disposal of goodwill and trademarks are deemed to be taxable income.

Income arising before registration or incorporation is considered to be taxable income in the first year after registration. The market value of assets received in exchange for other assets is considered to be the disposal value, suggesting that mergers may give rise to a taxable event.

Other types of income such as payments on insurance claims, debts recovered in subsequent periods, balancing charges and reversals of liabilities, are treated as income subject to tax.

Expenses are deductible only if they are incurred wholly and exclusively for the purpose of production of gross income. If only a portion of the expense is incurred for the purpose of income generation, the proportionate expense attributable to the income generated is allowed as a deduction. Expenses incurred before registration, incorporation or the commencement of business are deemed to be incurred on the day on which business commences and are deductible in the first year of commencement of operations.

Expenses that are incurred in generating tax-exempt income are not allowed as deductions.

Special rules apply to allowances, such as depreciation, bad debts, donations, remuneration of shareholders, proprietors and directors, rent, head-office overhead allocated to branches, interest paid to related parties and sponsorship fees. Exchange differences relating to head-office or related-party balances are normally disregarded.

Donations made “in kind” to approved organizations are allowed as deductible payments. The amendments introduced by MD 14/2019 provide specific rules for deduction of in-kind donations, effective for tax years beginning on or after 1 January 2018.

MD 14/2019 has increased the limit for deduction of remuneration paid to owners or partners of a company from RO3,000 to RO3,500 per month for companies carrying on professional activities, and from RO1,000 to RO1,500 per month for all other companies. In addition, the annual limit on deductible remuneration paid to all owners or partners of a company has increased to 35% of the taxable income for the year (calculated before deducting such remuneration) for companies carrying on professional activities and 25% for all other companies. These amendments are effective for tax years beginning on or after 1 January 2018.

Foreign taxes are not deductible for tax purposes. However, foreign taxes can be set off against taxes due on the same income in Oman (see Section B).

Inventories. The ITL does not stipulate a required method of accounting for inventories. In general, inventories are valued at the lower of cost or net realizable value, with cost determined using the weighted average or first-in, first-out (FIFO) method. Provisions to reduce the value to net realizable value are not allowed for tax purposes.

Provisions. In general, provisions are not allowed as deductible expenses when created. However, they are allowed as deductions when they are written off or utilized. Exceptions to this rule include the following:

- Provisions for loan losses are deductible for tax purposes for banks and other financial companies regulated by the central bank.
- Provisions for unexpired risks, unsettled claims and contributions to contingency funds are deductible for tax purposes for insurance companies.

Tax depreciation. Depreciation of assets other than buildings must be calculated using the pooling (or block) of assets method. Each pool's asset base is calculated with reference to the written-down value plus additions minus sale proceeds from disposals.

The straight-line depreciation method applies to certain assets as indicated in the table below.

The following annual depreciation rates are set out under the tax law.

Assets	Rate (%)
Permanent buildings (selected materials)	4*
Building (other than selected materials)	15*
Quays, jetties, pipelines, road, railways	10*
Ships and aircraft	15*
Drilling rigs	10
Other machinery and equipment	15
Tractors, cranes and other heavy equipment	33½
Computers, vehicles, self-propelling machines	33½
Furniture and fixtures (including computer software and copyrights)	33½
Hospital buildings and educational establishments	100

* These assets are depreciated using the straight-line method.

The rate for intangible assets is determined by the Tax Authority.

Relief for losses. Losses may be carried forward for five years. Losses of an earlier year must be set off first before using losses of a later year.

Companies that are exempt from tax because they carry on activities set out in Section B may carry forward net losses incurred during the first five years of exemption for an indefinite period.

No carryback of losses is permitted.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Valued-added tax (VAT); effective from 16 April 2021; VAT is applicable to goods and services; recently issued ERs have clarified matters regarding VAT registration requirements, goods that are exempt or zero-rated and certain other matters; on 6 January 2020, the Oman Tax Authority issued Executive Decisions on VAT registration thresholds, VAT registration dates and the basic food items that are subject to 0% VAT rate	
Standard rate	5%
Excise tax; introduced in June 2019 on carbonated drinks, energy drinks, tobacco-related products, pork products and alcohol; under MD 34/2020, the excise tax regime was expanded to include a wide range of other products	Various

Nature of tax	Rate
Social security contributions, on “monthly wage” of Omani employees only, effective from 1 July 2014; “monthly wage” is defined as “all amounts paid to the insured in cash or in kind or periodically or regularly for his work whatever the method used for its determination, or is the sum of basic wages plus allowances, which shall be determined by a decision of the Minister after the approval of the Board of Directors”; the amount (wage) is capped at OMR3,000 per month	
Pension fund; paid by	
Employer	10%
Employee	7%
Government	5.5%
Occupational injuries and diseases; payable by employer	1%
Contribution to job security fund; paid by	
Employer	1%
Employee	1%
Total fees for issuing and renewing permits for recruitment of non-Omani employees; rates depend on the type of profession, number of workers and amount of salary	
Non-Omani employees working in SMEs,	OMR101 to OMR1,001
Other non-Omani employees	OMR141 to OMR2,001
End-of-service benefit payable to expatriate staff on the termination of service	15 days of basic salary for each of the first 3 years and 30 days’ basic salary for years of service in excess of 3 years
Vocational training levy for each non-Omani employee; paid biennially by employer	OMR350

E. Miscellaneous matters

Anti-avoidance legislation. If a company carries out a transaction with a related party that is intended to reduce the company’s taxable income, income arising from such transaction is deemed to be the income that would have arisen had the parties been dealing at arm’s length.

For transactions between related parties that are not at arm’s length, certain arrangements and terms may be ignored by the Tax Authority if such arrangements or terms result in lower taxable income or greater losses.

The Tax Authority may make adjustments if the principal purpose of a transaction is to avoid taxation even if the transaction is between unrelated parties.

Thin-capitalization rules. Under the ITL, interest payable by Omani companies other than banks and insurance companies may be deducted from taxable income, subject to the satisfaction of certain conditions prescribed by the ERs.

The ERs provide that interest on loans from related parties paid by Omani companies other than banks and insurance companies may be deductible if total loans do not exceed twice the value of the shareholder's equity.

The above provision introduces the concept of thin capitalization requiring Omani companies to comply with a minimum capital requirement, which is that loans may not exceed a debt-to-equity ratio of 2 to 1. If the debt-to-equity ratio exceeds 2 to 1, the deduction of related-party interest costs may be partially or completely disallowed.

Head office overhead. Allocations of overhead by the head office to a branch are capped at the lower of 3% of revenue or actual charges. If the head office has only a supervisory role with respect to a branch, no overhead deduction is allowed. A recent circular issued by the Tax Authority states that withholding tax of 10% applies to head office overheads recorded by a branch as an expense.

Islamic financial transactions. The taxation of Islamic financial transactions and its exclusions are now covered by the ITL. However, regulations regarding Islamic financial transactions have not yet been issued.

Transfer pricing. The tax law has introduced the concept of transfer pricing. It seeks to restrict any measures that may be taken by related parties for the avoidance of tax through transactions entered into between them.

Oman has recently joined the Base Erosion and Profit Shifting (BEPS) Inclusive Framework. By joining this framework, Oman has committed to implementing four minimum standards of the BEPS package, relating to Actions 5, 6, 13 and 14. Action 13 requires transfer pricing and Country-by-Country Reporting. Oman has issued legislative frameworks to meet the BEPS Inclusive Framework requirements. As a result of these BEPS changes, taxpayers may be subject to additional reporting and compliance requirements, including a review of their structures to facilitate compliance with the new international standards.

Common Reporting Standard. On 14 September 2020, Oman ratified the automatic exchange of information (AEOI) through RD 118/2020 to support the implementation of the Common Reporting Standard (CRS) developed by the Organisation for Economic Co-operation and Development (OECD). On 17 September 2020, the Chairman of the Tax Authority issued Decision No. 78/2020 outlining related administrative rules for CRS compliance. The effective date for the CRS in Oman was 1 July 2019 and the first reporting was due by 31 October 2020. The deadline for CRS reporting for following years is five months from the calendar year end (that is 31 May). As of 31 December 2021, Oman has 43 reportable jurisdictions for the purposes of CRS.

Reporting Financial Institutions (such as banks, funds, brokers, custodians and insurance companies offering cash value or annuity products) need to have processes and procedures in place to meet their compliance requirements. Individuals and entities that are not Reporting Financial Institutions should be prepared to provide relevant documentation to reporting financial institutions to support their tax residency status.

Country-by-Country Reporting. On 27 September 2020, Oman introduced, through Tax Authority Decision 79/2020, Country-by-Country Reporting requirements. The requirements affect all businesses that have a legal entity or branch in Oman and are members of a multinational enterprise (MNE) group with annual turnover above OMR300 million (approximately USD780 million or EUR670 million).

Covered businesses are required to submit a notification no later than the last day of the reporting fiscal year of such MNE group. This notification should identify whether the Constituent Entity (the covered business) is the Ultimate Parent Entity (UPE) or the Surrogate Parent Entity (SPE) of the MNE group. If the Constituent Entity is neither the UPE nor the SPE, the notification must include the identity and tax residence of the Reporting Entity. An Omani Reporting Entity (UPE or SPE) must file its Country-by-Country report no later than 12 months after the last day of the reporting fiscal year of the MNE group.

Others. Oman does not have any rules relating to foreign-exchange controls or controlled foreign companies.

F. Tax treaties

Oman has entered into double tax treaties with Algeria, Belarus, Bulgaria, Brunei Darussalam, Canada, China Mainland, Croatia, France, Hungary, India, Iran, Italy, Japan, Korea (South), Lebanon, Mauritius, Moldova, Morocco, Netherlands, Pakistan, Portugal, Seychelles, Singapore, South Africa, Spain, Sri Lanka, Switzerland, Sudan, Syria, Thailand, Tunisia, Turkey, the United Kingdom, Uzbekistan, Vietnam and Yemen.

Oman has signed double tax treaties with Austria, Bangladesh, Belgium, the Czech Republic, Egypt, Estonia, Germany, Ireland, Kyrgyzstan, Libya, Lithuania, Malta, Nepal, Qatar, Russian Federation, Serbia, the Slovak Republic and Sweden, but these treaties are not yet in force.

Certain double tax treaties include the benefit of reduced withholding tax rates. The applicability of reduced tax rates under the provisions of a double tax treaty is not automatic. Companies must apply to obtain the benefit of reduced treaty tax rates. Withholding tax relief is available under double tax treaties with certain countries subject to satisfying certain conditions or requirements.

Oman has also entered into treaties with several countries with respect to the avoidance of double taxation on income generated from international air transport.

A. At a glance

Corporate Income Tax Rate (%)	
Companies Other than Banking	
Companies	29
Banking Companies	35
Small Companies	21
Capital Gains Tax Rate (%)	— (a)
Branch Tax Rate (%)	29
Withholding Tax (%) (b)	
Dividends	7.5/15/25 (c)
Interest	10/15/20 (d)
Royalties from Patents, Know-how, etc.	15/20 (e)
Fees for Technical Services	8/10/15 (f)
Offshore Digital Services	5/8/10 (g)
Branch Remittance Tax	15 (h)
Net Operating Losses (Years)	
Carryback	0
Carryforward	6

- (a) Capital gains are taxed at various rates. For details, see Section B.
- (b) See Section B for a listing of additional withholding taxes.
- (c) The 15% rate is the general tax rate for dividends. The 7.5% rate applies to dividends paid by independent power producers if such dividend is a pass-through item under the implementation agreement, power purchase agreement or energy purchase agreement and is required to be reimbursed by the Central Power Purchasing Agency or its predecessor or successor entity. The 25% tax rate applies to a person receiving a dividend from a company if no tax is payable by such company as a result of specified reasons. The withholding tax is imposed on the gross amount of the dividend. The withholding tax on dividends is considered a final discharge of the tax liability on such income (except for banks). The withholding tax rate is doubled for persons not appearing in the active taxpayers list (ATL; for details, see *Withholding taxes* in Section B).
- (d) The withholding tax on interest is considered to be an advance payment of tax, which may be credited against the eventual tax liability for the year. Interest paid on loans and overdrafts to resident banks and Pakistani branches of nonresident banks and financial institutions is not subject to withholding tax. The withholding tax rate is 15% of the gross amount of interest paid to resident persons. Interest paid to nonresident persons without a permanent establishment (PE) in Pakistan is subject to withholding tax at a rate of 10%, while the rate is 20% for nonresidents with a PE in Pakistan. The withholding tax rate is doubled for resident persons not appearing in the ATL (for details, see *Withholding taxes* in Section B). Interest earned on investments by foreign portfolio investors (not having a PE in Pakistan) through a Special Convertible Rupee Account (SCRA) is subject to withholding tax at 10%. The tax collected is treated as final tax on such income.
- (e) The general withholding tax rate for royalties is 15%. This tax is considered to be a final tax for nonresident recipients of royalties. However, if royalties are derived with respect to properties or rights effectively connected with a PE of a nonresident, a 20% withholding tax rate is imposed, unless a non-deduction certificate is obtained by the PE. The 20% withholding tax is credited against the eventual tax liability. The withholding tax rate on royalties is doubled for resident persons not appearing in the ATL (for details, see *Withholding taxes* in Section B).
- (f) Fees for technical services do not include consideration for construction, assembly or similar projects of the recipient (such consideration is subject to various withholding tax rates) or consideration that is taxable as salary. The general withholding tax rate is 15% of the gross amount of the payment. This withholding tax is considered to be a final tax for nonresident recipients. However, if technical services are rendered through a PE in Pakistan, the withholding tax rate is 8% in the case of companies and 10% in other cases. The withholding tax is considered to be an advance payment of tax by the nonresident recipient of such technical service fees and may be credited against their eventual tax liability. The withholding tax rate for a PE is doubled for payments to persons not appearing in the ATL (for details, see *Withholding taxes* in Section B).

- (g) The withholding tax rate for offshore digital services is 5%. This tax is considered to be a final tax for nonresident recipients. However, if such services are rendered with respect to properties or rights effectively connected with a PE of a nonresident, the rate is 8% in the case of companies and 10% in other cases. The withholding tax rate for a PE is doubled for persons not appearing in the ATL (for details, see *Withholding taxes* in Section B).
- (h) Remittances of after-tax profits by branches of nonresident petroleum exploration and production companies are not taxable.

B. Taxes on corporate income and gains

Corporate income tax. Companies that are resident in Pakistan are subject to corporation tax on their worldwide income. Tax is levied on the total amount of income earned from all sources in the company's accounting period, including dividends and taxable capital gains. Branches of foreign companies and nonresident companies are taxed only on Pakistan-source income. A company is resident in Pakistan if it is incorporated in Pakistan or if its control and management are exercised wholly or almost wholly in Pakistan during the tax year. Company is defined to include the following:

- A company as defined in the Companies Act, 2017 (formerly the Companies Ordinance, 1984)
- A body corporate formed by or under any law in force in Pakistan
- An entity incorporated by or under the corporation law of a country other than Pakistan
- The government of a province
- A local government in Pakistan
- A foreign association that the Federal Board of Revenue declares to be a company
- A modaraba, cooperative society, finance society or other society
- A nonprofit organization
- A trust, an entity or a body of persons established or constituted by or under any law that is in force
- A small company

Tax rates. For the 2022 tax year (income year ending on any day between 1 July 2021 and 30 June 2022), the tax rate is 29%. However, for banking companies, the tax rate is 35%.

Small companies are subject to tax at a rate of 21% for the 2022 tax year.

Small companies are companies incorporated after 1 July 2005 that meet the following conditions:

- They have paid-up capital and undistributed reserves of not exceeding PKR50 million.
- They have no more than 250 employees at any time during the year.
- They have annual turnover not exceeding PKR250 million.
- They were not formed as a result of a restructuring involving the splitting up or reorganization of an already existing business.
- They are not a small or medium-sized enterprise, which is an enterprise not engaged in manufacturing that has business turnover in a tax year not exceeding PKR250 million.

The gross revenue of nonresidents' air transportation and shipping businesses is taxed at 3% and 8%, respectively. This income is not subject to any other tax.

The shipping business of resident persons is taxed on the basis of registered tonnage per year.

Builders and developers are subject to tax at varying rates depending on the area and size of the property.

Certain types of income are subject to final withholding taxes. For information regarding these taxes, see Section A and *Withholding taxes*.

Super tax. The 2015 Finance Act introduced a super tax for rehabilitation of temporarily displaced persons for the 2015 tax year, and the 2016 Finance Act extended the tax to the 2016 tax year. The 2017 Finance Act further extended this tax to the 2017 tax year. The 2018 Finance Act extended the tax up to the 2021 tax year. However, the tax rate is reduced by 1% for each tax year for companies other than banking companies. For the 2022 tax year, the tax rate is 4% for banking companies and 0% for other companies. All banking companies must pay the super tax at a rate of 4% of their income, regardless of the amount of their income.

Alternative corporate tax. The 2014 Finance Act introduced an alternate corporate tax, which is effective from the 2014 tax year. If the corporate tax is less than 17% of the accounting income (excluding certain types of income and related expenses), alternative corporate tax is required to be paid as minimum tax. The difference between the corporate tax and alternative corporate tax can be carried forward to offset corporate tax for a maximum period of 10 years.

Tax incentives. Some of the significant tax incentives available in Pakistan are described in the following paragraphs.

Private sector projects engaged in the generation of electricity are exempt from tax. However, this exemption is not available to oil-fired electricity generation plants set up during the period of 22 October 2002 through 30 June 2006.

Income (other than capital gain on securities held for less than 12 months) derived from instruments of redeemable capital, as defined in the Companies Ordinance, 1984, by the National Investment (Unit) Trust of Pakistan established by the National Investment Trust Limited or by mutual funds, investment companies, collective-investment schemes, real estate investment trust (REIT) schemes or the Private Equity and Venture Capital Fund established by the National Investment Trust Limited is exempt from tax if such enterprises distribute at least 90% of their profits to their unit holders.

Income derived by a collective-investment scheme or real estate investment trust scheme is exempt from tax if at least 90% of the scheme's accounting income for the year, reduced by realized and unrealized capital gains, is distributed among the unit or certificate holders or shareholders.

A tax credit is allowed to a company that is set up in Pakistan before 1 July 2011 if it invests at least 70% new equity raised through issuance of new shares in the purchase and installation of plant and machinery for an industrial undertaking, for the expansion of plant or machinery already installed or for the undertaking of a new project. The credit is allowed against the tax payable for

a period of five years. The credit is calculated by applying the proportion of new equity to total equity including new equity against the tax payable.

A tax credit equal to 20% of the amount of investment is allowed to a company that is set up in Pakistan before 1 July 2011 and that makes an investment during the period of 1 July 2011 through 30 June 2016 with 100% new equity raised through the issuance of new shares, for the purpose of balancing, modernization and replacement of plant and machinery already installed in an industrial undertaking owned by a company. The tax credit may be carried forward up to five years.

A tax credit is available for 10 years to a company formed to establish and operate a new manufacturing unit set up between 1 July 2015 and 30 June 2019. The tax credit equals 2% of the tax payable for every 50 employees registered with the social security institutions of the federal and provincial governments. The total tax credit is restricted to 10% of the total tax payable.

Profits and gains derived by a taxpayer from a bagasse or biomass-based cogeneration power project having one or more boilers of not less than 60 bar (kg/CM³) pressure each, commissioned after 1 January 2013, are exempt from tax.

Profits and gains derived by a refinery from new deep conversion refining of at least 100,000 barrels per day for which approval is given by the federal government before 31 December 2021, or for the purpose of upgradation, modernization or expansion project of an existing refinery, which makes an undertaking to the federal government in writing before 31 December 2021 in this regard, are exempt from tax. This exemption is available for a period of 20 years beginning from the date of commencement of commercial production in the case of a new refinery and 10 years from the date of completion of upgradation, modernization or expansion project of an existing refinery. The exemption under this clause is only available to refineries whose products fulfill Euro 5 standards.

A tax credit is allowed to the following persons and income equal to 100% of the tax payable under any provisions of the Tax Ordinance, 2001, including minimum, alternate corporate tax and final taxes for the period, if one of the following specified conditions are met:

- Persons engaged in coal mining projects in Sindh, supplying coal exclusively to power generation projects.
- A startup for the tax year in which the startup is certified by the Pakistan Software Export Board and for the following two tax years.
- Income from exports of computer software or services or information technology-enabled services up to 30 June 2025. This credit is available subject to the condition that 80% of the export proceeds are brought into Pakistan in foreign exchange remitted from outside Pakistan through normal banking channels.

A 20% tax credit is available on investment in the purchase and installation of new machinery, buildings, equipment, hardware and software, except self-created software and used capital

goods, against tax payable (including minimum and final taxes) in the following situations:

- Greenfield industrial undertaking engaged in manufacturing of goods or shipbuilding, subject to the condition that the person is incorporated between 30 June 2019 and 30 June 2024, is not formed by the splitting up or reconstitution of an undertaking already in existence or by transfer of machinery, plant or building from an undertaking established in Pakistan prior to commencement of the new business and is not part of an expansion project
- Industrial undertaking set up by 30 June 2023 and engaged in the manufacturing of plant, machinery, equipment and items with dedicated use for generation of renewable energy from sources such as solar and wind, for a period of five years beginning from the date such industrial undertaking is set up.

Unadjusted credit, if any, in the year of investment can be carried forward to the following two tax years.

Capital gains. Capital gains on shares of public companies, vouchers of the Pakistan Telecommunication Corporation, modaraba certificates, instruments of redeemable capital, debt securities and derivative products are taxable. The tax rates for the 2022 tax year for capital gains on securities are shown below.

If the acquisition date of the securities was before 1 July 2013, the rate is 0%.

If the acquisition date of the securities is on or after 1 July 2013, the rate is 12.5%, regardless of the holding period.

For capital gains on future commodity contracts entered into by members of the Pakistan Mercantile Exchange, the rate is 5%.

Capital gains earned on disposals of debt instruments and government securities purchased by foreign portfolio investors (not having a PE in Pakistan) through an SCRA is subject to deduction of tax at 10% by the banking companies maintaining the SCRA of such investors. The tax collected by the banks is treated as a final tax on capital gains earned by such nonresident investors.

Capital gains on other assets (including non-public securities) are taxable at the corporate rate. However, only 75% of capital gains derived from transfers of capital assets, excluding immovable properties and assets on which tax depreciation or amortization is claimed, is taxed if the assets were held for more than 12 months.

Capital gains on the disposal of listed securities and the tax payable on the gains are computed, determined, collected and deposited on behalf of a taxpayer by the National Clearing Company of Pakistan Limited (NCCPL), which is licensed as a clearing house by the Securities and Exchange Commission of Pakistan. However, the NCCPL does not collect tax from the following categories of the taxpayers:

- Mutual funds
- Banking companies, nonbanking finance companies and insurance companies
- Modarabas
- Companies, with respect to debt securities only

- Other persons or classes of persons notified by the Federal Board of Revenue

The investors listed above are required to self-pay their capital gain tax obligation on a quarterly basis at a rate of 1.5% or 2% of the amount of gain, depending on the holding period of the securities. They must file a statement of advance tax and pay the tax within 21 days after the end of each quarter.

Capital gains on immovable property are calculated as shown in the following table.

Holding period	Gain
Not exceeding one year	Consideration - cost
Exceeding one year but not exceeding two years	$\frac{3}{4}$ of (consideration - cost)
Exceeding two years but not exceeding three years	$\frac{1}{2}$ of (consideration - cost)
Exceeding three years but not exceeding four years	$\frac{1}{4}$ of (consideration - cost)
Exceeding four years	0

The above gains on immovable property are subject to tax at the following rates:

- Gain up to PKR5 million: 3.5%
- Gain above PKR5 million and up to PKR10 million: 7.5%
- Gain above PKR10 million and up to PKR15 million: 10%
- Gain above PKR15 million: 15%

Capital losses can be offset only against capital gains. Capital losses can be carried forward for six years. Capital losses on disposals of securities (shares of public companies, vouchers of the Pakistan Telecommunication Corporation, Modaraba Certificates, instruments of redeemable capital and derivative products) in the 2019 tax year and onward that have not been set off against capital gains on the disposal of securities chargeable to tax can be carried forward up to the three tax years immediately following the tax year in which loss was first computed.

Administration

Business license. Every person engaged in a business, profession or vocation is required to obtain and display a business license as prescribed by the Federal Board of Revenue. The Commissioner of Inland Revenue may impose a fine on a person who fails to obtain such license. The amount of the fine is PKR20,000 in the case of persons deriving taxable income and PKR5,000 in other cases if income is exempt from tax or below the tax limit. The Commissioner also may cancel the business license of a person if the person fails to notify the change in particulars of the business license to the Commissioner within 30 days of such change or if the person is convicted of any offense under any federal tax law.

Filing requirements. The tax year commences on 1 July and ends on 30 June. Companies are required to end their fiscal years on 30 June. Special permission is required from the Commissioner of Inland Revenue to use a different year-end. The Federal Board of Revenue has specified 30 September as the year-end for certain industries, such as sugar and textiles, and 31 December as the year-end for insurance companies.

An income tax return must be filed by 30 September of the following year if the company's year-end is from 1 July through 31 December and by the following 31 December if the year-end is from 1 January through 30 June. Any balance due after deducting advance payments and withholding taxes must be paid when the tax return is filed.

Advance tax payments. In general, advance tax is payable quarterly based on the tax to turnover ratio of the latest tax year. However, banking companies must pay advance tax on a monthly basis. If the tax liability is estimated to be more or less than the tax charged for the prior tax year, an estimate of tax liability can be filed and advance tax liability can be paid in accordance with such estimate, subject to certain conditions. For taxpayers other than banking companies, the due dates for the advance tax payments are 25 September, 25 December, 25 March and 15 June. Banking companies must pay advance tax by the 15th day of each month.

Adjustable quarterly advance tax on capital gains from the sale of securities is payable on the capital gains derived during the quarter by companies within 21 days after the end of each quarter at a rate of 2% if the holding period is less than 6 months and 1.5% if the holding period is between 6 and 12 months.

Minimum tax. Resident companies, PEs of nonresident companies and nonresident banking companies are subject to a minimum income tax equal to 1.25% of gross receipts from sales of goods, services rendered and the execution of contracts, if the corporate tax liability is less than the amount of the minimum tax. The excess of the minimum tax over the corporate tax liability may be carried forward and used to offset the corporate tax liability of the following five tax years. Reduced rates are applicable on certain categories of taxpayers, including the following:

Taxpayer category	Rate of minimum tax applied to a taxpayer's turnover (%)
Oil marketing companies, Sui Southern Gas Company Limited and Sui Northern Gas Pipelines Limited (with annual turnover exceeding PKR1 billion), Pakistani airlines and the poultry industry	0.75
Oil refineries and motorcycle dealers registered under the Sales Tax Act, 1990	0.5
Distributors of pharmaceutical products, fast-moving consumer goods and cigarettes, petroleum agents and distributors registered under the Sales Tax Act, 1990; rice mills and dealers, flour mills, Tier-1 retailers of fast-moving consumer goods who are integrated with the Federal Board of Revenue or its computerized system for real-time reporting of sales and receipts; persons' turnover from supplies through e-commerce, including from running an online marketplace, and persons engaged in the sale and purchase of used vehicles	0.25

Withholding taxes. Withholding tax is an interim tax payment that may or may not be the final tax liability. Amounts withheld that are not final taxes are credited to the final tax liability of the taxpayer for the relevant year.

In addition to the withholding taxes listed in Section A, payments by corporations and companies are subject to the taxes listed below that are deducted or collected at source. The withholding tax rates are increased by 100% (doubled) for persons not appearing in the ATL with certain exceptions as provided in the Tenth Schedule to the Income Tax Ordinance, 2001. The ATL is a list that includes the names and registration numbers of persons who have filed income tax returns for the latest tax year by the due date. Those who have not filed income tax returns by the due date may be included in the ATL on the filing of a return after the due date and the payment of a penalty for the late filing. The tax deducted from persons not appearing in the ATL may be credited against the eventual tax liability of such persons if the return is filed within the specified time period. The following are the withholding tax rates.

Tax	Rate
Foreign-exchange proceeds from exports of goods	1% (a)
Rent for immovable property	Various (b)
Payments for goods	
Specified goods (rice, cotton seeds and edible oil)	1.5%/3%
Sales by distributors of cigarettes and pharmaceutical products	1%/2%
Other goods	
Payments to companies	4%/8% (c)
Payments to PEs of nonresidents	
Payments to companies	4% (c)
Payments to others	4.5% (c)
Payments to others	4.5%/9% (c)
Imports of goods; rates depend on the classification of goods in the Twelfth Schedule to the Income Tax Ordinance, 2001	1% to 5.5%/2% to 11% (d)
Payments under executed contracts for construction, assembly and similar projects by nonresident contractors	7% (e)
Payments under executed contracts (other than contracts for the sale of goods or rendering of services)	
By nonresidents having a PE	
Sports persons	10% (e)
Other persons	7% (e)
By companies	6.5%/13% (e)
By other taxpayers	7%/14% (e)
By sports persons	10%/20% (e)
Payments for services	
Rendered by residents	
Services in specified services sectors	3%/6% (f)

Tax	Rate
Electronic and print media advertising services	1.5%/3% (f)
Other services	
By companies	8%/16% (f)
By other taxpayers	10%/20% (f)
Rendered by nonresidents through PEs	
Services in specified service sectors	3% (f)
Other services	
By companies	8% (f)
By other taxpayers	10% (f)
Brokerage and commission	
Indenting commission	5% (a)(g)
Advertising agents	10%/20% (a)(g)
Life insurance agents whose commission is less than PKR500,000 per year	8%/16% (a)(g)
Other commission and brokerage	12%/24% (a)(f)
Advertisement services by a nonresident person relaying from outside Pakistan (broadcasting an advertisement into Pakistan from outside the country)	10%/20% (e)
Advertisement services performed by nonresident media persons	20%/40% (a)
Payments to employees	– (g)(h)
Payments to distributors, dealers and wholesalers for specified goods	0.1%/0.2%/0.7%/1.4%/0.25% (i)
Transfers of immovable property	1%/2% (j)
Sales to retailers	0.5%/1% (k)
Purchase of motor vehicles	Various (l)
Registration of motor vehicles	Various (l)
Electricity consumption	0%-12% (m)
Telephone use, including internet and mobile	Various
Auction of property or goods	5%/10%/20% (n)
Right to use machinery and equipment	10% (o)

- (a) This tax is a final tax.
- (b) Property income is subject to bottom-line profit taxation. The tax deducted at source may be credited against the eventual tax liability. The rate is 15% for payments made to companies. For payments made to individuals or associations of persons, the rate ranges from 0% to 35%, depending on the amount of rent. The rate is doubled for persons not appearing in the ATL.
- (c) Tax deducted on the sale of goods is a minimum tax for resident companies as well as for PEs of nonresidents in Pakistan. The tax deduction may be credited against the eventual tax liability for listed companies and companies engaged in the manufacturing of goods. No withholding is required on imported goods sold by an importer if tax at the import stage has been paid. The tax rate is doubled for persons (other than PEs of nonresidents) not appearing in the ATL.
- (d) This tax is a minimum tax for entities engaged in the trading of imported goods. The tax paid may be credited against the eventual tax liability of the taxpayer calculated at the corporate tax rate on total income relating to such imports if such tax liability is higher than the amount of tax paid at import stage. Lower rates may apply to importers or manufacturers of specific goods. The tax rate is doubled for persons not appearing in the ATL. The tax is an advance tax on imports of goods by industrial undertakings for their own use. The tax rate on such imports is 1% or 2%.
- (e) The tax withheld is treated as a minimum tax if the tax liability computed on a bottom-line profit basis is less than the amount of the tax withheld. The tax rate is doubled for persons (other than PEs of nonresidents) not appearing in the ATL.

- (f) The tax withheld is treated as a minimum tax if the tax liability computed on a bottom-line profit basis is less than the amount of the tax withheld. Specified services sectors include transportation services, freight forwarding services, air cargo services, courier services, manpower outsourcing services, hotel services, security guard services, software development services, information technology services and information technology-enabled services, tracking services, advertising services (other than print and electronic media), share registrar services, engineering services, car rental services, building maintenance services, services rendered by Pakistan Stock Exchange Limited and Pakistan Mercantile Exchange Limited, inspection, certification, testing, training, warehousing services, services rendered by asset management companies, data services provided under a license issued by the Pakistan Telecommunication Authority, telecommunication infrastructure (tower) services, oilfield services, telecommunication services, collateral management services, travel and tour services, subject to fulfillment to certain conditions.
- (g) This tax is imposed on residents and nonresidents.
- (h) The applicable rate depends on the income earned by the employee for the year.
- (i) The tax is collected by manufacturers and commercial importers at the time of the sale of goods in specified sectors. The tax collected is an advance tax for distributors, dealers and wholesalers. The 0.1% rate applies to sales of goods other than fertilizers. The 0.7% rate applies to fertilizer sales. The rate for fertilizers is 0.25% for persons appearing in the ATLs for both income tax and sales tax.
- (j) A person responsible for registering or attesting the transfer of immovable property must collect the tax from the person selling or transferring the property (other than certain persons specified as exempt). The tax collected is an advance tax. A 1% rate applies to the gross amount of consideration received on the sale of property.
- (k) The tax is collected by manufacturers, distributors, dealers, wholesalers or commercial importers at the time of the sale of goods in specified sectors to retailers. The tax collected may be credited against the eventual tax liability.
- (l) This advance tax is collected by the motor vehicle registration authorities at the time of registration of the vehicle. The rates vary according to the engine capacity of the relevant motor vehicles.
- (m) This advance tax is collected by electric companies at the time of issuance of invoices to consumers. Progressive rates ranging from 0% to 12% applies to industrial and commercial consumers.
- (n) Specified persons making sales through public auction or auction by tender are required to collect advance tax at a rate of 5% on immovable property and 10% on goods. Tax collected on leases of the right to collect tolls is a final tax.
- (o) This is a minimum tax.

In general, for payments not listed in the above tables or in Section A, withholding tax is imposed at a rate of 20% on payments to nonresidents subject to tax in Pakistan.

Interest and penalties. For a failure to file an income tax return by the due date, a penalty equal to higher of 0.1% of the gross tax payable for each day of default or PKR1,000 is imposed, subject to a minimum penalty of PKR50,000. The penalty shall not exceed 200% of the gross tax payable. The penalty shall be reduced by 75%, 50% and 25% if the return is filed within one, two or three months, respectively, after the due date or extended due date for the filing of the return.

The 2018 Finance Act introduced a new Section 182A of Income Tax Ordinance, 2001, which provides that if an income tax return of a person has not been filed by the due date or extended due date, the name of the person is not included in the ATL for the tax year for which the return was not filed by the due date. The person is also not allowed to carry forward any losses for that tax year or adjust a refund for that tax year during the period that the person is not included in the ATL, and not entitled to additional payment for a delayed refund. The 2020 Finance Act inserted a

new subsection in the above section, which provides that if a person fails to furnish or update a taxpayer's profile by the due date, the person's name shall not be included in the ATL for the latest tax year ending prior to the due date. However, the person can be included in the ATL by filing an income tax return after the due date and paying a surcharge of PKR20,000.

In addition, interest and penalties are imposed in the following circumstances:

- Interest at a rate equal to 12% per year is charged if tax payments, including advance tax payments, are not made or are partially paid.
- For non-payment or underpayment of tax, a penalty equal to 5% of the amount of tax in default is imposed. For a second default, a penalty equaling an additional 25% of the amount of tax in default is imposed. For any subsequent defaults, an additional penalty equal to 50% of the amount of tax in default is imposed.
- If income is concealed, a penalty equal to the amount of tax sought to be evaded or PKR100,000, whichever is higher, is levied in addition to the normal tax payable.

The income tax department is required to pay compensation at the Karachi Interbank Offered Rate (KIBOR) plus 0.5% per year on refunds due that have not been paid within three months after the due date, from the expiration of the three months until the date on which the refund is paid.

Dividends. Dividends, including remittances of profits by a Pakistan branch to its head office (other than remittances of profits by a Pakistan branch engaged in exploration and production of petroleum), are subject to withholding tax at a general rate of 15%. The withholding tax is considered to be a final discharge of the tax liability. A 7.5% rate is imposed on certain dividends (also, see footnote [c] to Section A). Intercorporate dividends paid within a wholly owned group are exempt from tax, provided that a group return has been filed for the latest completed tax year.

Foreign tax relief. A foreign tax credit is granted to resident companies with respect to foreign-source income at the average rate of Pakistani income tax or the actual foreign tax paid, whichever is less. If foreign income is derived under different heads (categories) of income, the amount of the allowable credit is applied separately to each head of income. However, income derived under a particular head of income from different locations is pooled together. A credit is allowed only if the foreign income tax is paid within two years after the end of the tax year in which the foreign-source income is derived.

C. Determination of taxable income

General. The determination of taxable income is generally based on the audited financial statements, subject to certain adjustments. Any income accruing or arising, whether directly or indirectly, through or from a PE or any other business connection in Pakistan, through or from any asset, property or source of income in Pakistan, or through the transfer of a capital asset located in Pakistan, is subject to tax.

Expenses incurred to derive income from business that is subject to tax are allowed as deductions to arrive at taxable income. For

branches of foreign companies, allocated head-office expenses may be deducted, up to an amount calculated by applying the ratio of Pakistani turnover to worldwide turnover.

Inventories. Inventory for a tax year is valued at the lower of cost or net realizable value of the inventory on hand at the end of the year. If a particular item of inventory is not readily identifiable, the first-in, first-out (FIFO) or weighted-average methods may be used. The valuation method should be applied consistently from year to year, but the method may be changed with the prior approval of the tax authorities.

Provisions. General provisions for bad debts are not allowed as deductions from income. However, a charge for specific bad debts may be allowed if the debt is accepted by the income tax officer as irrecoverable.

Nonbanking finance companies and the House Building Finance Corporation may claim a deduction equal to 3% of the income from consumer loans for the maintenance of a reserve for bad debts resulting from such loans. In this context, a consumer loan is a loan obtained for personal, family or household purposes and includes debts resulting from the use of a credit card or insurance premium financing.

For advances and off-balance sheet items, banking companies are allowed a provision not exceeding 1% of their total advances. This percentage is increased to 5% with respect to consumers and small and medium-sized enterprises. The provision is allowed if a certificate from the external auditor is furnished by the banking company to the effect that such provisions are based on and are in line with the Prudential Regulations issued by the State Bank of Pakistan. The amount in a provision in excess of the allowable percentage may be carried over to succeeding years.

Tax depreciation. Depreciation recorded in the financial statements is not allowed for tax purposes. Tax depreciation allowances are given on assets, such as buildings, plant and machinery, computers and furniture owned by the company and used for business purposes. A depreciation allowance equal to 50% of the depreciation for the year is allowed in the year in which the asset is placed in service, and 50% of the depreciation allowance is allowed in the year of disposal of the asset.

Depreciation is calculated using the declining-balance method. The following depreciation rates are generally used.

Assets	Annual allowance %
Buildings	10
Furniture and fixtures	15
Machinery and plant, technical or professional books, ships and motor vehicles	15
Computer hardware including printers, machinery and equipment used in the manufacturing of information technology products, aircraft and aero engines	30

Assets	Annual allowance %
Below-ground installations (including offshore) of mineral oil enterprises	100
Offshore platform and production installations of mineral oil enterprises	20

To promote industrial development in Pakistan, certain other allowances relating to capital expenditure have been introduced. These allowances are summarized below.

Initial allowance. An initial depreciation allowance is available at a rate of 25% for plant and machinery placed in service in Pakistan. The allowance is granted in the tax year in which the assets are first placed in service in Pakistan and used in the taxpayer's business for the first time, or in the tax year in which commercial production begins, whichever is later.

A first-year depreciation allowance at a rate of 90% is granted for plant machinery and equipment installed for generation of alternate energy. This allowance is available to an industrial undertaking set up anywhere in Pakistan and owned and managed by a company. The allowance is granted instead of the initial allowance.

Amortization of intangibles. Amortization of intangibles is allowed over the normal useful life of intangibles. If an intangible does not have an ascertainable useful life or if the normal useful life is more than 10 years, for purposes of calculating annual amortization, the normal useful life is considered to be 10 years for the purposes of calculating amortization.

Amortization of expenses incurred before the commencement of business. The amortization of expenses incurred before the commencement of business is allowed on a straight-line basis at an annual rate of 20%.

Relief for losses. Business losses, other than capital losses and losses arising out of speculative transactions, may be carried forward to offset profit in subsequent years for a period not exceeding six years. Unabsorbed depreciation may be carried forward indefinitely.

The 2018 Finance Act restricted offsetting of prior year losses representing depreciation and amortization to the extent of 50% of the balance income for the year after adjustment of business loss, if any. However, such loss is offset against 100% of such balance income if the taxable income for the year is less than PKR10 million.

Foreign losses can only offset foreign-source income and may be carried forward for a period not exceeding six years.

Groups of companies. A group of companies comprising holding companies and subsidiaries in a 100%-owned group can file its tax returns as one fiscal unit, subject to the satisfaction of certain conditions.

In addition, on the satisfaction of certain conditions, group companies can surrender their assessed losses (excluding capital

losses and losses brought forward) for the tax year to other group companies. The amount of loss to be surrendered is calculated in the ratio of the percentage of shareholding of the holding company in the subsidiary company.

The option of group taxation is available to group companies that comply with the corporate governance requirement and group designation rules or regulations, as specified by the Securities and Exchange Commission of Pakistan.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Sales tax, on the supply of goods, on the cost of imported goods and on certain services; certain items and classes of persons are exempt	Various
Excise duties, on specified goods imported or manufactured in Pakistan and on specified services provided or rendered in Pakistan (the government may declare any goods or services or class of goods or services exempt)	Various
State and local taxes; an annual trade tax on companies, including branches of foreign companies	Various
Net assets tax (<i>zakat</i> , a religious levy), on certain assets of companies having a majority of Muslim shareholders who are citizens of Pakistan	2.5
Social security contributions, on salaries of employees (maximum of PKR1,583 per month)	6
Employees' old-age benefits; based on minimum wages of employees under law of PKR19,000 per month; payable by	
Employer	5
Employee	1

E. Miscellaneous matters

Foreign-exchange controls. In general, remittances in foreign currency are regulated, and all remittances are subject to clearance by the State Bank of Pakistan. However, foreign currency may be remitted through the secondary market.

Debt-to-equity rules. Under the thin-capitalization rules, if the foreign debt-to-equity ratio of a foreign-controlled company (other than a financial institution, a banking company or a branch of a foreign company operating in Pakistan) exceeds 3:1, interest paid on foreign debt in excess of the 3:1 ratio is not deductible.

The State Bank of Pakistan prescribes that borrowers from financial institutions have a debt-to-equity ratio of 60:40. This may be increased for small projects costing up to PKR50 million or by special government permission.

Loans and overdrafts to companies (other than banking companies), controlled directly or indirectly by persons resident outside

Pakistan, and to branches of foreign companies are generally restricted to certain specified percentages of the entities' paid-up capital, reserves or head-office investment in Pakistan. The percentage varies, depending on whether the entities are manufacturing companies, semi-manufacturing companies, trading companies or branches of foreign companies operating in Pakistan.

To meet their working capital requirements, foreign controlled companies and branches of foreign companies may contract working capital loans in foreign currency that can be repatriated. The State Bank of Pakistan also permits foreign controlled companies to take out additional matching loans and overdrafts in rupees equal to the amount of the loans that may be repatriated. Other loans in rupees are permitted in special circumstances. Certain guarantees issued on behalf of foreign controlled companies are treated as debt for purposes of the company's borrowing entitlement.

F. Treaty withholding tax rates

The maximum withholding rates provided in the treaties are shown in the following table.

	Dividends %	Interest %	Royalties %
Austria	10/20 (d)	– (b)(g)	20
Azerbaijan	10	10	10
Bahrain	10	10 (b)	10
Bangladesh	15	15 (b)	15
Belarus	10/15 (d)	10 (b)	15
Belgium	10/15 (d)	15 (b)	20 (m)
Bosnia and Herzegovina	10	20	15

Switzerland	10/20 (a)	10 (f)	10
Syria	10	10	10/15/18 (w)
Tajikistan	5/10 (p)	10 (x)(y)	10 (x)
Thailand	15/25 (d)	25 (i)	10/20 (j)
Tunisia	10	13	10
Turkey	10/15 (d)	10	10
Turkmenistan	10	10	10
Ukraine	10/15 (a)	10	10
United Arab Emirates	10/15 (v)	10 (b)	12
United Kingdom	10/15/20 (n)	15 (b)	12.5
United States	3.75 (h)	– (g)	– (e)
Uzbekistan	10	10 (b)	15
Vietnam	15	15 (y)	15
Yemen	10	10 (y)	10
Non-treaty jurisdictions (z)	7.5/15/25	10/15/20	15/20

- (a) Treaty-determined percentage holding required.
- (b) Interest paid to the government or, in certain circumstances, to a financial institution owned or controlled by the government is exempt.
- (c) Fifteen percent for industrial, commercial or scientific know-how.
- (d) Treaty-determined percentage holding required, and payer must be engaged in an industrial undertaking; otherwise, higher rate or normal rate applies.
- (e) Royalties are exempt from withholding tax to the extent they represent a fair and reasonable consideration.
- (f) Certain approved loans are exempt.
- (g) Normal rates apply.
- (h) Treaty-determined percentage holding by a public company required and the profits out of which the dividends are paid must be derived from an industrial undertaking; otherwise, normal rates apply.
- (i) Ten percent if the recipient is a financial institution.
- (j) Lower amount for literary, artistic or scientific royalties.
- (k) Fifteen percent if payer is an enterprise engaged in preferred activities.
- (l) Rate reduced to 10% if recipient is a bank or financial institution or if certain types of contracts apply. Rate reduced to 15% if recipient holds 25% of the capital of the paying company.
- (m) Copyright royalties and other similar payments for literary, dramatic, musical or artistic work are exempt.

- (n) Fifteen percent if the recipient is a company. Further reduced to 10% if the treaty-determined percentage is held by the recipient and the industrial undertaking is set up in Pakistan after 8 December 1987. Twenty percent in other cases.
- (o) Lower rate applies if the recipient is a company that controls, directly or indirectly, 10% of the voting power in the company paying the dividend.
- (p) Lower rate applies if recipient is a company that owns directly at least 25% of the capital of the paying company.
- (q) The 15% rate applies to dividends paid to companies. The 30% rate applies to other dividends.
- (r) The 15% rate applies if the recipient is a company that owns directly at least 25% of the capital of the payer and is engaged in an industrial undertaking.
- (s) The 12% rate applies if the recipient is a company that owns directly at least 25% of the capital of the payer; the 15% rate applies to dividends paid to other companies; and the 20% rate applies to other dividends.
- (t) Interest paid to the government or to an agency of or an instrumentality owned by the government is exempt from tax.
- (u) The 10% rate applies if the payer is engaged in an industrial undertaking and if the recipient is a company; the 12.5% rate applies if the recipient is a company; the 15% rate applies in all other cases.
- (v) The lower rate applies if the beneficial owner of the dividends is a company that owns at least 20% of the shares of the payer.
- (w) The 10% rate applies to royalties for cinematographic films and to tapes for television or radio broadcasting. The 15% rate applies to royalties for literary, artistic or scientific works.
- (x) The treaty rate applies to the extent the amount represents a fair and reasonable consideration.
- (y) Interest paid to the government or to the central bank is exempt.
- (z) For details regarding these rates, please see the relevant footnotes in Section A.

Pakistan has also entered into treaties that cover only shipping and air transport. These treaties are not included in the above table.

Royalties from Patents, Know-how, etc.	5
Payments for Services and Goods	10 (f)
Other Payments to Nonresidents	10
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

- (a) This is the standard corporate income tax rate. For other rates, see Section B.
- (b) Foreign branches operating in Palestine are taxed like Palestinian companies.
- (c) In general, the withholding taxes may be credited against income tax due.
- (d) See Section B.
- (e) No withholding tax is imposed on interest received from banks. Withholding tax applies to interest payments to nonresidents.
- (f) This withholding tax applies to resident and nonresident companies. It applies to payments of higher than ILS2,500 if the vendor does not provide a deduction-at-source certificate.

B. Taxes on corporate income and gains

Corporate income tax. Palestinian companies and branches of foreign companies carrying on business in Palestine are subject to corporate income tax. A company is considered Palestinian if it is registered in Palestine. A branch of a foreign company registered in Palestine is treated like a Palestinian company.

Rates of corporate income tax. The standard rate of corporate income tax is 15% of taxable income. Telecommunication companies, franchises and monopoly companies are taxed at a rate of 20%. The tax rate on life insurance companies is 5% of the total life insurance premiums owed to the company. Interest income derived by banks from small and medium-sized entities' finance programs is subject to income tax at a rate of 10%.

Under the Law for Encouragement of Investments, as amended in 2014, approved companies may pay income tax at the following rates:

- 0% for agricultural projects that realize income from the cultivation of land or livestock
- 5% for a period of five years beginning on the date of realization of profit but not exceeding four years from the beginning of the company's operations
- 10% for a period of three years after the end of the first phase
- The standard rate after the end of the three-year period

Under Decree No. 14 for 2016, up to ILS300,000 from agriculture projects is subject to a 0% income tax rate; the remaining income is subject to the standard rate.

An application must be filed with the Palestinian Investment Promotion Agency to obtain approval for these tax benefits.

Capital gains. Capital gains are taxable. However, gains arising from the sale of shares and bonds from an investment portfolio are exempted. The expenses related to these exempted gains are not deductible for tax purposes. These nondeductible expenses are calculated according to a formula in the law and subtracted from the total expenses of the entity.

Administration. Companies must file a corporate tax return by the end of the fourth month after their year-end. All companies must use the calendar year as their tax year, unless the tax authorities approve a different tax year. As a result, tax returns are generally due on 30 April. Any balance of tax due must be paid by the due date of filing the annual tax return.

Payment of income tax on account must be made in accordance with instructions issued by the Minister of Finance. The tax regulations provide incentives for advance tax payments made during the tax year. The incentive rates are announced at the beginning of the tax year.

Special incentives are granted for companies who file and pay within a certain period after the tax year-end. For filing and paying during the first and second months after the year-end, the discount is 4%. The discount is 2% for the third month.

Dividends. Under the Income Tax Law amendments in 2014, dividends are subject to withholding tax. Dividends distributed by companies resident in Palestine are subject to withholding tax at a rate of 10%. However, in January 2015, the Ministry of Finance put the application of this withholding tax on hold. As a result, dividends from resident companies are currently exempted from income tax. However, the related expenses are not deductible for tax purposes; these nondeductible expenses represent 20% of the total exempted dividends.

Interest. Interest is subject to income tax at the applicable income tax rate.

C. Determination of trading income

General. Taxable income is the income reported in the companies' financial statements, subject to certain adjustments.

All types of income are taxable, unless otherwise stated in the law.

All business expenses incurred to generate income may be deducted, with limitations on certain items, such as entertainment and donations. A certain percentage of entertainment expenses is deductible. Head-office charges are limited to 2% of branch net taxable income.

Inventories. The tax law does not specify a particular method for determining the cost of inventory.

Provisions. In general, provisions are not deductible for tax purposes, except for banks and insurance companies. Banks can deduct bad debt provisions that were established in accordance with the instructions of the Palestine Monetary Authority, and insurance companies can deduct part of its unexpired risks' and outstanding claims' provisions.

Depreciation. The Palestinian tax law provides straight-line tax depreciation rates for various types of assets. These rates are applied to the purchase prices for the assets. If the rates for accounting purposes are greater than the tax depreciation rates, the excess is disallowed but may be used for tax purposes at a later date. The following are the straight-line rates for certain assets.

Asset	Rate (%)
Industrial buildings	4
Transportation	
Land transportation	
Cars, trains, buses, trucks and trailers	10
Cars and buses for public transportation and for driving schools	12
Air transportation	
Aircraft	8
Cable cars	5

Asset	Rate (%)
Sea transportation	
Ships for transportation, cargo and freezing	5
Boats and yachts	8
Sport and racing boats	15
Other ships or boats that work over or under the water	15
Office equipment	7 to 10
Equipment used in industrial activities	5 to 10
Equipment used in agricultural activities	7 to 25
Technological equipment	20 to 25
Office furniture and decoration	10 to 15
Computers	20

Groups of companies. Companies must file separate financial statements for tax purposes.

Relief for losses. Companies may carry forward losses to the following five tax years.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT)	
Standard rate	16
Wages and profit tax; imposed on financial institutions instead of VAT and in addition to corporate income tax	16
Property tax; based on 80% of the assessed rental value	17

E. Foreign-exchange controls

The Palestinian Authority does not have a national currency. Major currencies used in Palestine include the Israeli shekel (ILS), Jordanian dinar (JOD) and the US dollar (USD).

F. Tax treaties

The Palestinian Authority has entered into double tax treaties with Ethiopia, Jordan, Serbia, Sri Lanka, Sudan, Turkey, the United Arab Emirates, Venezuela and Vietnam.

The Palestinian Authority has signed a tax treaty with Egypt. In addition, tax treaties with Oman and Turkmenistan are in various stages of negotiation, signature, ratification or entry into force.

The Palestinian Authority has also entered into tax treaties related to customs with the European Union, Japan, Turkey, the United States and certain Arab countries. Under these treaties, goods imported from the treaty countries have either full or limited customs exemption, depending on the type of goods imported.

- (a) See Section B for details concerning deemed dividend tax.
 (b) The withholding taxes apply only to nonresidents. Nonresident companies are entities not incorporated in Panama.
 (c) Certain interest is exempt from tax. See Section B.
 (d) For details, see Section C.

B. Taxes on corporate income and gains

Corporate income tax. Corporations, partnerships, branches of foreign corporations, limited liability companies and any other entity considered a legal entity by law are subject to income tax on any profits or income generated in or derived from Panama.

Income that does not arise in Panama or is not derived from Panama is not subject to tax in Panama. However, dividends arising from foreign income that are distributed by Panamanian companies holding a Notice of Operation (formerly Commercial License) are subject to tax (for further details, see *Dividends*).

Corporate income tax rates. Income tax is assessed at a flat rate of 25% on net taxable income. For details regarding net taxable income, see Section C.

Taxpayers with annual taxable income greater than PAB1,500,000 are required by law to calculate the tax using two methods and pay the higher of the amounts calculated under these methods. This calculation must be included in their annual taxable income tax return. The following are the two methods:

- Applying the corresponding tax rate to the net taxable income
- Applying the corresponding tax rate to 4.67% of the total income

Headquarters Law. The Headquarters Law contains a special tax-incentive regime for multinational companies that establish their headquarters in Panama (Multinational Headquarters [MHQ] regime).

Under the Headquarters Law, a headquarters is the office that renders services to its related parties.

Under the law, a headquarters may provide only specified services, including the following:

- Technical, financial and/or administrative assistance
- Financial and accounting services
- Logistics or warehousing services to the multinational group
- Marketing and publicity
- Plot or construction design

Under the Headquarters Law, the headquarters must belong to a multinational company with either regional or international operations or significant operations in the country of origin. To operate under the Headquarters Law, a license granted by the Commission of Licenses of the Multinational Companies of the Ministry of Commerce and Industry must be obtained.

Law No. 57, published on 24 October 2018, amended the MHQ regime. Companies granted a license must pay income tax in Panama on the net taxable income derived from the services provided at a rate of 5%. Panamanian taxpayers benefiting from services or acts rendered by MHQ companies must withhold 5% from the total sum to be paid if these services or acts were related to the generation of local income or the conservation of its source and if the payment is considered a deductible expense for the taxpayer.

Also, MHQ companies can claim a tax credit for the amounts withheld by the Panamanian taxpayers, as well as the tax effectively paid abroad for services rendered to nonresidents. However, the company must pay at least 2% of the net taxable income generated in Panama as a minimum income tax.

Likewise, MHQ companies must withhold 5% on 50% of the payments remitted abroad for services and acts received by nonresidents. The company also must withhold 5% on 50% of the interest, commissions and other charges generated by loans granted by a nonresident and used in Panama.

In addition to obtaining an MHQ license, companies must maintain an adequate number of full-time employees and incur an adequate amount of annual operational expenses, both of which

must be adequate with respect to the type of business carried out by the companies, in order to apply the corporate income tax incentive. Companies granted a license to operate under this regime are exempt from value-added tax (VAT). However, the VAT exemption applies only to the export of services. The VAT exemption does not apply to imports made by the headquarters or the sale or purchase of goods or services rendered in Panama.

The Headquarters Law also includes immigration aspects. For example, it clarifies that the salary received by an employee with an MHQ Permanent Personnel Visa is exempt from income tax, social security contributions and educational insurance in Panama. Employees with an MHQ Permanent Personnel Visa can opt for a permanent residence in Panama and keep working for a company with an MHQ license. However, these employees would be subject to income tax, social security contributions and educational insurance on the salary received by them.

Transfer-pricing rules apply under the regime.

Panama-Pacifico regime. Panama has established certain free-trade zones, which provide for an exemption from the general income tax (with the exception of certain rental income), as well as other imposts and duties, such as sales taxes, import duties, export taxes, and selective consumption taxes related to royalties on exports and re-export activities.

Law No. 41 of 2004 created the Panama-Pacifico (PP) Special Economic Zone. The law's purpose was to create a special legal, tax, customs, labor, immigration and business regime, designed to encourage and ensure the free flow and movement of goods, services and funds in order to attract and promote investments and the generation of jobs and to make Panama more competitive in the global economy.

Law No. 66 of 2018 included relevant amendments to the PP regime by adding requirements for the recognition of income tax benefits for some activities. Also, companies under the PP regime dedicated to the categories listed below must comply with the following substance requirements:

- They must maintain an adequate number of full-time employees.
- They must incur an adequate amount of annual operational expenses.

The following are the categories referred to in the preceding paragraph:

- Radio, television, audio, video and data signal linking
- Office administrative services
- Call centers
- Capturing, processing, storage, switching, transmitting and retransmitting data and digital information
- Logistic and multimodal services
- Research and development of resources and digital applications for use in networks

Both of these requirements must be adequate with respect to the type of business carried out by the companies.

Companies that provide office administration services are subject to a 5% income tax rate on the related net taxable income, as

long as they comply with the substance requirements mentioned above. Panamanian recipients benefiting from these services must withhold 5% from the total service payment if these services were related to the generation of local income or the conservation of its source and if the payment is considered a deductible expense by the recipient.

An amendment to the Panamanian Fiscal Code provides that transfer-pricing rules apply to individuals or companies established under a preferential tax regime (which includes the PP regime) for their operations with related parties that are in Panama or that are under any other preferential tax regime in Panama or abroad.

Special Regime for the Establishment and Operation of Multinational Enterprises that Render Manufacturing Services. On 1 September 2020, Panama enacted Law 159 of 2020 to establish the Special Regime for the Establishment and Operation of Multinational Enterprises that Render Manufacturing Services (EMMA for its Spanish acronym). The law took effect on 1 December 2020. The EMMA regime seeks to promote foreign investment, create new job opportunities for both locals and foreigners, and contribute to the transfer of technology knowledge in Panama. To be eligible to EMMA regime, the companies should perform services related to the following:

- The manufacturing of products, machinery and equipment
- The assembly of products, machinery and equipment
- The maintenance and repair of products, machinery and equipment
- The remanufacturing of products, machinery and equipment
- The conditioning of products
- Product or existing process development, investigation or innovation
- Analysis, lab work, tests or other activities related to manufacturing services
- Logistics, such as storage, deployment and distribution of components or parts, required for the supply of manufacturing services

Entities can only provide these services to the multinational group to which they belong.

EMMA companies that are granted a license pay income tax in Panama on their net taxable income at a rate of 5%, as long as they comply with substance requirements. Net taxable income is calculated by deducting from taxable income special discounts granted by certain investment promotion regimes and carryforwards of legally authorized net operating losses. Panamanian taxpayers benefiting from services rendered by EMMA companies must withhold 5% from the total amount to be paid if these services or acts are related to the generation of local income or the conservation of its source and if the payment is considered a deductible expense for the taxpayer.

Also, EMMA companies can claim a tax credit for the amounts withheld by the Panamanian taxpayers, as well as the tax effectively paid abroad. However, a company must pay at least 2% of the net taxable income generated in Panama as a minimum income tax.

Capital gains

Shares and quotas. Under Section 701(e) of the Panamanian Fiscal Code, capital gains derived from the transfer of shares or quotas are subject to capital gains tax if the shares or quotas were issued by a company that has operations or assets located in Panama. The tax applies regardless of the place where the transaction takes place. Capital gains are taxed in accordance with the following rules:

- Capital gains derived from the transfer of shares in Panama that constitute taxable income are subject to income tax at a rate of 10%.
- The buyer must withhold 5% from the purchase price as an advance income tax payment and remit the withholding tax to the tax authorities within 10 days following the date on which the payment was made according to the transaction documents. For a failure to comply with this obligation, both the buyer and the issuer of the shares become jointly liable to the Panamanian tax authorities.
- The 5% tax withheld by the buyer can be credited against the final 10% capital gain tax. However, the seller may elect to consider the 5% tax to be the final income tax payment.
- If the 5% tax withheld by the buyer is higher than the 10% income tax on the capital gain, the taxpayer may claim a cash refund or credit the excess against other tax liabilities. The tax credit may also be transferred to another taxpayer.
- Income derived from capital gains is not included in the seller's ordinary income for the fiscal year, because the tax due is paid through withholding.
- The amount of the capital gain equals the purchase price minus the value of the investment made by the seller at the moment the shares were acquired. The costs related to the transaction (for example, lawyer's fees, commissions, notary fees and broker fees) are taken into account.

Indirect transfers of shares "economically invested in Panama" are also subject to Panamanian capital gains tax, even if the seller and buyer are nonresidents. Specific rules apply to compute the gain if one or several entities that are being transferred generate both Panamanian-source income and foreign-source income. In this case, the tax base is the proportion of Panamanian-source income determined by using the greater amount resulting from the following two methods:

- The equity amount of the entities that earn taxable income in Panama divided by the total equity of the transaction
- The proportion of assets economically invested in Panama divided by the total assets of the transaction

The above result is subject to a 5% withholding tax, which is an advance income tax payment.

Movable assets. Capital gains derived from transfers of movable assets are subject to income tax at a reduced rate of 10%.

Real estate transfer tax. The sale of real estate located in Panama is subject to a 2% property transfer tax. The 2% property transfer tax rate is applied to the higher of the following amounts:

- Sales price set forth in the public deed of transfer

- The cadastral value of the property on the date of the acquisition, plus any increase in value derived from improvements, plus 5% per year computed on the sum of the cadastral value and the improvements

To execute the deed of transfer before a Notary Public, the seller of real estate must submit evidence to demonstrate that the corresponding transfer tax and capital gains tax have been paid.

The real estate transfer tax is not imposed on the first transfer of new houses and commercial establishments if the transfer occurs within the two-year period after the occupation permit is issued.

Sales of homes and business premises by taxpayers engaged in real estate business. For the sale of home properties by taxpayers in the real estate business, the following rates are applied to the higher of the total value of the transfer or the land value.

Higher of transfer or land value	Rate %
PAB0 to PAB35,000	0.5
PAB35,000 to PAB80,000	1.5
Over PAB80,000	2.5

The rate imposed on taxpayers in the real estate business for sales of new business premises is 4.5%.

The above rates apply if building permits are issued on or after 1 January 2010.

Ordinary taxpayers that are not engaged in the trade or business of the purchase and sale of real estate. For ordinary taxpayers that are not engaged in the trade or business of the purchase and sale of real estate, tax is calculated at a rate of 10% on taxable income. This income is not taken into account in determining the taxpayer's taxable income, and the taxpayer may not deduct the transfer tax or transfer fees incurred.

Advance income tax of 3% must be paid on the greater of the total value of the transfer or cadastral value.

The above tax can be considered as final payment or the surplus can be reimbursed if the amount of the tax exceeds 10% of taxable income.

Administration. The calendar year is the fiscal year. However, under certain circumstances, a special fiscal year may be requested from the Panamanian tax authorities. Businesses earning income subject to Panamanian tax must file annual income tax returns even if the net result for the period is a loss. Corporations having no Panamanian taxable income or loss are not required to file income tax returns. Tax returns are due 90 days after the end of the fiscal year. The regulations provide for an extension of time of up to one month to file an income tax return if the corporation pays the estimated tax due. A penalty of PAB500,000 is imposed for the late filing of an income tax return.

Monthly interest is charged for late payments. The interest charges are calculated based on rates established periodically by the tax authorities. These rates equal the local reference banking annual interest rate for commercial financing as defined by the

Panamanian Banking Superintendence plus two percentage points. If an extension is obtained, any tax that is due when the return is filed is subject to the abovementioned interest rate. Late payments of taxes made after 1 January 2015 are subject to a 10% surcharge. This 10% surcharge is imposed in addition to the late payment interest.

Tax returns must be filed on electronic forms provided by the Panamanian tax authorities. The taxpayer must file an estimated tax return for the following year together with the income tax return. The total amount of estimated tax for the following year, which normally cannot be lower than the income declared in the current-year return, must be paid in full or in three equal installments by 30 June, 30 September and 31 December. Late payment of this estimated tax generates a 10% surcharge (calculated on the unpaid amount) plus applicable interest.

Dividends. All companies that have a Notice of Operations or Commercial License (the prior name of the Notice of Operations) or that generate taxable income in Panama must pay dividend tax at a fixed rate of 10% for nominative shares and 20% for bearer shares. Dividends distributed from foreign-source income, export operations and certain types of exempt income are subject to a final 5% withholding tax. Subsequent distributions of these dividends are not taxed if they arise from dividends that already have been subject to the abovementioned withholding.

Dividends distributed by Real Estate Investment Companies (Sociedades de Inversión Inmobiliaria) are subject to a 10% withholding tax.

Dividends distributed by entities in free-trade zones from local-source income, foreign-source income, export activities and certain types of exempt income are subject to a final 5% withholding tax.

The following are exempt dividends:

- Dividends distributed by Panamanian companies that do not require a Notice of Operations or Commercial License and that do not produce any taxable income in Panama
- Dividends distributed by entities under the tax-incentive system for multinational companies that establish headquarters in Panama (MHQ regime; see *Headquarters Law*)

Dividends distributed to individuals or legal entities from states included in the List of States that Discriminate against the Republic of Panama (this list has not yet been issued by the Republic of Panama) are subject to the following withholding tax rates:

- 20% for nominative shares
- 40% for bearer shares

Exemptions from withholding tax granted by special laws on dividend distributions from Panamanian entities to entities or individuals located abroad apply only if the recipients cannot claim a tax credit in their country of residence for such dividend distributions. To prove that that no tax credit is available in the recipient's country of residence for a dividend, the beneficial owner must submit a formal tax opinion issued by an independent

tax expert of such country, which indicates that a tax credit cannot be claimed.

If a tax treaty applies, the treaty measures prevail over the domestic rules.

Withholding taxes. The effective withholding tax rate is 12.5% for interest and royalties paid to nonresident companies.

Payments to nonresidents for professional services rendered in Panama or from abroad are subject to a withholding tax at an effective rate of 12.5% if certain requirements are met. In principle, the withholding obligation applies if the following requirements are met:

- The payments made to nonresident beneficiaries must be related to the generation of Panamanian-source income for the payer.
- The payment made to the nonresident beneficiaries must be considered and reported as deductible expenses by the Panamanian payer (except in case of interest).

However, a tax reform established several exceptions to these requirements. As a result, payments made by public entities (entities that are not income taxpayers) and taxpayers with losses are subject to the withholding tax at an effective rate of 12.5% even if those entities have not deducted the payments as expenses. In addition, taxpayers that have several sources of income are required to apply an effective 12.5% withholding tax rate if they are in a loss situation even though they did not claim a deduction for the payments.

No withholding tax obligation applies to entities that generate foreign-source income only and entities or individuals exempt from income tax in accordance with an international treaty or special law.

In addition, exemptions granted by special laws from withholding taxes on interest, royalties, professional fees and similar payments from Panamanian entities or individuals to entities or individuals located abroad apply only if the recipient cannot claim a tax credit in their country of residence for withholding taxes on such income. To prove that no tax credit is available in the recipient's country of residence for such withholding taxes, the beneficial owner must submit a formal tax opinion issued by an independent tax expert of such country, which indicates that the tax paid in Panama would not be credited such country.

Interest, royalties, commissions and fees paid to nonresidents from states included in the List of States that Discriminate against the Republic of Panama (this list has not yet been issued by the Republic of Panama) are subject to a 25% withholding tax.

The tax must be withheld by the Panamanian enterprise that receives the benefits of the loans, leases or professional services, and must be remitted to the government within 10 days after the tax is withheld or the account is credited, whichever occurs first.

Interest income derived from the following investments is exempt from withholding tax:

- Savings and time deposits held in Panamanian banks
- Panamanian government securities

- Securities issued by companies registered with the National Securities Commission, if the securities were acquired through a securities exchange established to operate in Panama
- Interest and commissions paid by banking institutions in Panama to international banks or financial institutions established abroad, in connection with loans, bankers' acceptances and other debt instruments
- Interest paid to official or semiofficial institutions of international bodies or foreign governments
- Interest paid to foreign investors, if the capital on which such interest is paid is exclusively intended for housing projects for people of low income

For a loan granted by a domestic bank or related Panamanian party, no withholding tax is applicable, because the financial services payment is taxed in the lender's annual income tax return.

Except in the case of financing, if a local company does not take a deduction for an expense, no withholding tax applies.

Foreign tax relief. Because Panama taxes only income sourced in Panama, regardless of where payment is received or the residence of the taxpayer, no credit or deduction is available for any foreign taxes paid, except in international transport activities.

C. Determination of trading income

General. Taxable income or revenue includes all income derived from business activities in Panama less expenses incurred wholly and exclusively in the production of taxable income or the conservation of its source.

Net taxable income is the difference or balance that results on deducting the following from gross income or general earnings:

- Foreign income
- Exempt income
- Deductible costs and expenses

Revenues must be recognized in the year in which they are earned. Construction companies may recognize long-term contract revenues either by the percentage-of-completion method, percentage-of-invoicing method or the completed-contract method. The installment-sales method of recognizing revenue is not permitted by the Panamanian Fiscal Code.

Earnings derived from the following activities are not considered to be Panamanian source:

- Invoicing by an office established in Panama for sales of merchandise or goods for amounts greater than cost, provided the merchandise never enters Panama
- Directing by an office established in Panama of transactions that are completed, consummated or take effect outside Panama
- Distributing dividends or profits derived from income not generated in Panama, including income derived from the two activities noted above, to the extent that the company distributing dividends does not hold a Notice of Operation

All expenses incurred wholly and exclusively in the production of taxable income or in the conservation of its source are allowed as deductions for income tax purposes, regardless of where the

expense is incurred, provided that the corresponding tax is withheld (if applicable). Expenses of one tax year may not be deducted the following year, except those which, by their nature, cannot be determined precisely in the current tax year.

Interest is a deductible expense if it is incurred on loans or credits necessary for the production of taxable income. If non-taxable interest income from savings accounts or certificates of deposit is earned, the only interest deductible is the excess of the interest expense over the non-taxable interest income. Royalties are deductible, except for those paid abroad by free-zone companies.

Inventories. Inventories may be valued by using the first-in, first-out (FIFO), last-in, first-out (LIFO) or average-cost methods. However, the Panamanian tax authorities may allow other methods. After a system of valuation is adopted, it may not be changed for five years.

Provisions. The only deductible reserves are those for depreciation, bad debts (1% of credit sales, up to 10% of total receivables) of entities other than banks and financial institutions and certain fringe benefits. Reserves for personal insurance and contingencies are not deductible.

Tax depreciation and amortization allowances. Depreciation allowances are permitted for capital expenditures incurred in the production of taxable income. Depreciation may be computed by using the straight-line, declining-balance or sum-of-the-years' digits methods. Depreciation is computed over the useful life of an asset. The minimum useful lives are 3 years for movable assets and 30 years for buildings.

Startup expenses may be amortized over a period of five years. Improvements to leased properties must be amortized over the period of the lease. Purchasers of intangible assets, such as patents and goodwill, may claim straight-line amortization deductions for such assets when they derive income from such assets.

Relief for losses. Tax-loss carrybacks are not recognized under Panamanian law. Carryforwards of net operating losses are allowed. Taxpayers can deduct net operating losses over a period of five years following the year in which the loss is incurred. The maximum annual deduction is 20% of the relevant loss, but the amount of the deduction may not exceed 50% of the taxable income for the year.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; tax on the sale or transfer of any chattel, services and imports of goods; certain goods and services are specifically exempt, such as medical services and fixed telephony that is not for commercial use	7
Notice of Operation (formerly Commercial and Industrial Licenses); paid annually on corporate capital (up to a maximum amount of PAB60,000)	2

Nature of tax	Rate (%)
Notice of Operation for companies operating under a free-trade zone regime; paid annually on corporate capital (up to a maximum tax of PAB50,000)	0.5
Municipal tax; based on the nature of the business activity and the amount of sales (up to a maximum tax of PAB3,000 a month)	Various
Social security contributions and education tax, based on wages or salaries; paid by	
Employer	12.5
Employee	9.75
Excise taxes	
Imports and sales of alcoholic beverages	10
Imports and sales of tobacco and cigarettes	15
Imports of jewels, cars, motorcycles, jet skis, boats (including sailboats), noncommercial airplanes, cable and microwave television services and mobile phones	Various
Public accommodations and lodging services	10

E. Miscellaneous matters

Foreign-exchange controls. Panama does not impose foreign-exchange controls.

Transfer pricing. Cross-border intercompany transactions conducted by Panamanian taxpayers are subject to transfer-pricing obligations if the transactions result in income, costs or expenses that are taken into account in the determination of taxable income.

The transfer-pricing rules are based on the arm's-length principle established in the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

An annual statement of transactions (Form 930) with related parties must be submitted to the tax authorities within six months after the end of the fiscal year (if the fiscal year coincides with the calendar year, the deadline is 30 June). In addition, taxpayers must prepare a transfer-pricing study and make it available to the tax authorities.

Resolution No. 201-1937 of 2 April 2018 modified Form 930, "Transfer Pricing Information Return" (Version 1.0). The new form is Form 930, Version 2.0.

The changes include the following:

- The addition of new cells in the main tab of Form 930 related to the adjustments made in the related-party transactions analyses
- The addition of an "Intangible Annex" for reporting intangible transactions
- The addition of a "Comparable Companies Annex" for reporting the name, type, location and country of the comparables, as well as the selected profit level indicator and the financial information for each one of them

- A new section with “Questions related to the taxpayer” and “Questions related to the multinational enterprise,” in which some of the questions are related to the information required by Article 11 of Executive Decree 390, published on 24 October 2016

If Form 930 is not filed, a 1% fine capped at PAB1 million applies to the gross amount of the transactions with related parties.

Law No. 57 of 2018 contains provisions regarding the application of the transfer-pricing rules to transactions conducted by entities with an MHQ license. The law establishes that the transfer-pricing rules apply, starting with the 2019 tax year, to any related-party transaction that an individual or entity conducts with an MHQ license.

The transfer-pricing rules also apply to transactions conducted by companies with related parties that meet the following conditions:

- They are established in Panama.
- They are tax residents of other jurisdictions.
- They are established in the Colón Free Zone.

In addition, the transfer-pricing rules apply if the related parties operate in or under any of the following:

- The Oil Free Zone under Cabinet Decree 36 of 2003
- The PP Special Economic Zone
- The MHQ regime
- The City of Knowledge regime
- Any other current or future free zones or special-economic areas

Law No. 52 of 2018 contains provisions on the activities that individuals or entities with a call center concession may conduct. The law also includes provisions on applying transfer-pricing rules to transactions conducted by those entities.

The law establishes that, starting with the 2019 tax year, the transfer-pricing rules apply to any related-party transactions conducted by individuals or entities with individuals or entities that have a concession to provide call center services.

Although individuals and entities with a concession to provide call center services are exempt from income tax, the transfer-pricing rules also apply to transactions conducted by those individuals or entities with related parties that meet the following conditions:

- They are established in Panama.
- They are tax residents of other jurisdictions.
- They are established in the Colón Free Zone.

In addition, the transfer-pricing rules apply if the related parties operate in or under any of the following:

- The Oil Free Zone under Cabinet Decree 36 of 2003
- The PP Special Economic Zone
- The MHQ regime
- The City of Knowledge regime
- Any other current or future free zones or special economic areas

Also, an amendment to the Panamanian Fiscal Code established that transfer-pricing rules apply to individuals or companies

established under a preferential tax regime, for their operations with related parties that are in Panama or that are under any other preferential tax regime in Panama or abroad.

Law 159 of 2020 establishes that entities under the EMMA regime (see *Special Regime for the Establishment and Operation of Multinational Enterprises that Render Manufacturing Services* in Section B) must apply the transfer pricing principle established in the Panamanian Fiscal Code to all transactions carried out with related parties in Panama, those that are tax residents abroad and those that are registered under the Panama Pacific Regime, MHQ regime, Colón Free Zone, Fuel Free Zone, City of Knowledge regime or any other free zone or special-economic area regime currently existing or that may be created in the future.

In all cases, the application of the transfer-pricing rules must be in accordance with the provisions of the Fiscal Code, except for the provisions of Article 762-D of the Fiscal Code.

Multilateral Competent Authority Agreement for Country-by-Country Reporting. On 24 January 2019, Panama's tax authorities signed the Multilateral Competent Authority Agreement for Country-by-Country (CbC) Reporting, which is a multilateral framework agreement that provides a standardized and efficient mechanism to facilitate the bilateral automatic exchange of CbC reporting, is one of the four minimum standards of the OECD/G20 Base Erosion and Profit Shifting Project.

On 27 May 2019, Panama's government published in the *Official Gazette* Executive Decree No. 46, which addresses the disclosure of information in the CbC report by tax resident companies in Panama for purposes of the automatic exchange of information.

Any ultimate parent entity of a multinational group must file the CbC report on an annual basis if it has consolidated revenues that are higher than EUR750 million or its equivalent in balboas at the exchange rate as of January 2015 during a tax year and if it is tax resident in Panama.

A reporting entity is any entity of a group or multinational group that must file the CbC report in its tax jurisdiction on behalf of the multinational group. The reporting entity is the ultimate parent entity.

A company that is part of a multinational group that is tax resident in Panama must notify the Panamanian tax administration of the identity and tax residence of the reporting entity, as well as the fiscal period used by the multinational group. The entity doing the reporting must submit the notification using the format and terms and conditions established by the Panamanian tax administration.

On 27 December 2019, Panama published in the *Official Gazette* Resolution No. 201-9117 of 2019, regulating the notification obligation included in Article 3 of Executive Decree 46 of 2019, which establishes the regulatory framework of the CbC report in Panama.

On 31 December 2019, Resolution No. 201-9411, issued by the Ministry of Economy and Finance for Panama, was published in the *Official Gazette*. The resolution extended the CbC reporting

deadline for multinational enterprise groups with a reporting fiscal year ending between 31 December 2018 and 31 January 2019 to 31 January 2020.

The resolution was effective from its date of publication.

F. Treaty withholding tax rates

Panama has entered into tax treaties with Barbados, the Czech Republic, France, Ireland, Israel, Italy, Korea (South), Luxembourg, Mexico, the Netherlands, Portugal, Qatar, Singapore, Spain, the United Arab Emirates, the United Kingdom and Vietnam. Panama has concluded treaty negotiations with Austria and Bahrain.

The following are withholding tax rates under Panama's tax treaties.

	Dividends %	Interest %	Royalties %
Barbados	7.5 (a)	0/5/7.5 (j)(k)	0/7.5 (t)
Czech Republic	10	0/5/10 (w)(x)	10
France	5/15 (b)	0/5 (l)	5
Ireland	5	0/5 (y)	5
Israel	5/15/20 (ee)	0/15 (ff)	15
Italy	5/10	0/5	10
Korea (South)	5/15 (c)	0/5 (m)	0/10 (u)
Luxembourg	5/15 (b)	0/5 (l)	5
Mexico	5/7.5 (c)	0/5/10 (n)(o)	10
Netherlands	0/15 (d)	0/5 (p)	5
Portugal	10/15 (e)	10 (q)	10
Qatar	6 (f)	6 (r)	6
Singapore	5 (g)	5 (s)	5
Spain	0/5/10 (h)(i)	5 (v)	5
United Arab Emirates	5 (aa)	0/5 (bb)	5
United Kingdom	0/15 (cc)	0/5 (dd)	5
Vietnam	5/7/12.5	0/10	10
Non-treaty jurisdictions	10/20 (z)	12.5 (z)	12.5

- (a) The rate equals 75% of the statutory nominal rate applicable at the time of dividend distribution. The rate is reduced to 5% if the beneficial owner of the dividends is a company that owns at least 25% of the capital of the payer of the dividends. The rates do not apply to dividends paid on bearer shares.
- (b) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 10% of the capital of the payer of the dividends.
- (c) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 25% of the capital of the payer of the dividends.
- (d) The rate is reduced to 0% if the beneficial owner of the dividends is a company that owns at least 15% of the capital of the payer of the dividends (additional specific conditions apply).
- (e) The rate is reduced to 10% if the beneficial owner of the dividends is a company that owns at least 10% of the capital of the payer of the dividends.
- (f) The rate is reduced to 0% if the beneficial owner of the dividends is the other state, a political subdivision, a local authority or the central bank of the other state, a pension fund, an investment authority or any other institution or fund that is recognized as an integral part of the other state, political subdivision or local authority, as mutually agreed.
- (g) The rate is reduced to 4% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 10% of the capital of the payer of the dividends.

- (h) The rate is reduced to 5% if the beneficial owner of the dividends is a company (other than a partnership) that owns at least 40% of the capital of the payer of the dividends.
- (i) The rate is reduced to 0% if the beneficial owner of the dividends is a company that owns at least 80% of the capital of the payer of the dividends (additional specific conditions apply).
- (j) The rate is reduced to 5% if the interest is derived by a bank that is a resident of Barbados.
- (k) The rate is reduced to 0% if the beneficial owner of the interest is a contracting state, the central bank of a contracting state, or a political subdivision or local entity of the contracting state or if the interest is paid to another entity or body (including a financial institution) as a result of financing provided by such institution or body in connection with an agreement concluded between the governments of the states.
- (l) The rate is reduced to 0% with respect to the following:
- Interest paid to or by the state, a local authority or central bank
 - Interest paid on sales on credit
 - Interest paid by a financial institution to another financial institution
 - Interest paid to the state as a result of financing provided in relation to an agreement between the governments of the states
- (m) The rate is reduced to 0% with respect to the following:
- Interest paid to the state, a local authority, central bank or a public financial institution
 - Interest paid on sales on credit
 - Interest paid to entities (including financial institutions) as a result of financing provided in relation to an agreement between the governments of the states
- (n) The rate is reduced to 5% if the interest is derived by a bank that is a resident of Mexico.
- (o) The rate is reduced to 0% with respect to interest paid to the state, a political subdivision or local entity of the state, the central bank or specific credit institutions.
- (p) The rate is reduced to 0% with respect to the following:
- Interest paid to the state, a local authority or the central bank
 - Interest paid on sales on credit
 - Interest paid to the state as a result of financing provided in relation to an agreement between the governments of the states
 - Interest paid to pension funds
- (q) The rate is reduced to 0% with respect to interest paid to the state, a political subdivision or local entity, or the central bank.
- (r) The rate is reduced to 0% with respect to the following:
- Interest paid to the state or a political subdivision or local authority of the state
 - Interest paid to specific credit institutions
 - Interest paid on sales on credit
 - Interest paid by a financial institution to another financial institution
 - Interest paid as a result of financing provided in relation to an agreement between the governments of the states
- (s) The rate is reduced to 0% with respect to interest paid to the government or to banks.
- (t) The rate is reduced to 0% with respect to royalties including royalties for scientific works related to biotechnology industry.
- (u) The rate is reduced to 3% with respect to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
- (v) The rate is reduced to 0% with respect to the following:
- Interest paid to or by the state, a local authority or central bank
 - Interest paid on sales on credit
 - Interest paid by a financial institution to another financial institution
 - Interest paid to the state as a result of financing provided in relation to an agreement between the governments of the states
 - Interest paid to pension funds
- (w) The rate is 5% if the beneficial owner is a bank that is a resident of the other contracting state.
- (x) The rate is reduced to 0% if any of the following circumstances exists:
- Interest arises in a contracting state and is paid to a resident of the other contracting state that is the beneficial owner thereof, and such interest is paid in connection with the sale on credit of merchandise or equipment.
 - Interest is paid to the government of the other contracting state, including a political subdivision or local authority thereof, the central bank or a financial institution owned or controlled by such government.

- Interest is paid to a resident of the other state in connection with a loan or credit guaranteed by the government of the other state, including a political subdivision or local authority thereof, the central bank, or a financial institution owned or controlled by such government, if the loan or credit is granted for a period of not less than four years.
- (y) The rate is reduced to 0% if any of the following circumstances exists:
- The beneficial owner of the interest is a contracting state, the central bank of a contracting state, or a political subdivision or local authority of such state.
 - Interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of a contracting state.
 - Interest is paid to other entities or bodies (including financial institutions) as a result of financing provided by such institutions or bodies in connection with agreements concluded between the governments of the states.
 - Interest is paid to a pension fund established in the other contracting state to provide benefits under pension arrangements recognized for tax purposes in that other contracting state.
- (z) See Section A.
- (aa) The rate is reduced to 5% if the beneficial owner of the dividends is a resident of the other contracting state.
- (bb) The rate is reduced to 5% if the beneficial owner of the interest is a resident of the other contracting state. The rate is reduced to 0% if any of the following circumstances exists:
- The beneficial owner of the interest is the government, a political subdivision or a local authority of the other contracting state.
 - The interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of a contracting state.
 - The interest is paid to financial institutions and other bodies as a result of financing provided by such institutions or bodies in connection with agreements concluded between the governments of the contracting states.
- (cc) The rate is 15% if the beneficial owner of the dividends is a resident of the other contracting state. The withholding tax rate is reduced to 0% if either of the following circumstances exists:
- The beneficial owner of the dividends is a company that is a resident of the other contracting state and that holds directly at least 15% of the capital of the entity paying the dividends, and other requirements are satisfied.
 - The beneficial owner of the dividends is a contracting state, a political subdivision or local authority thereof, or a pension scheme.
- (dd) The rate is reduced to 5% if the beneficial owner of the interest is one of the following persons:
- An individual
 - A company whose principal class of shares is regularly traded on a recognized stock exchange
 - A financial institution that is unrelated to, and dealing wholly independently with, the payer
 - A company other than those mentioned above, subject to conditions
- The rate is also reduced to 5% if the beneficial owner of the interest is a resident of the other contracting state and any of the following circumstances exists:
- The interest is paid by a contracting state or a political subdivision or local authority thereof.
 - The interest is paid by a bank in the ordinary course of its banking business.
 - The interest is paid on a quoted Eurobond.
- The rate is reduced to 0% if any of the following circumstances exists:
- The beneficial owner of the interest is a central bank of the contracting state or any of its political subdivisions or local authorities.
 - The interest is paid with respect to the sale on credit of merchandise or equipment to an enterprise of a contracting state.
 - The interest is paid to other entities or bodies (including financial institutions) as a result of financing provided by such entities or bodies in connection with agreements concluded between the governments of the contracting states.
 - The beneficial owner of the interest is a pension scheme.
- (ee) The rate is reduced to 15% if the beneficial owner of the dividends is a resident of the other contracting state. The rate is reduced to 5% if the beneficial owner is a pension fund that is a resident of the other contracting state. A 20% withholding tax rate applies if dividends are distributed by a Real Estate Investment Company and if the beneficial owner holds less than 10% of the capital of the Real Estate Investment Company.
- (ff) The standard rate is 15%. Interest payments to specific entities and interest paid on traded corporate bonds are exempt (0% rate).

A. At a glance

Corporate Income Tax Rate (%)	30
Capital Gains Tax Rate (%)	0
Branch Income Tax Rate (%)	48 (a)
Withholding Tax (%)	
Dividends	0/10/15 (b)
Interest	15
Royalties	
Associates	30
Non-associates	– (c)
Foreign contractors	15
Management fees	17
Net Operating Losses (Years)	
Carryback	0
Carryforward	7 (d)

(a) See Section B.

(b) Effective from 1 January 2017, the dividend withholding tax rate is 15%, unless a fiscal stability agreement is in place. If such agreement is in place, a 0% rate would continue to apply to dividends paid out of oil or gas profits, and the 10% rate would continue to apply to dividends paid out of mining profits.

(c) For payments to non-associates, the amount of tax equals the lesser of 10% of assessable income or 48% of taxable income. Assessable income is the amount assessable under the provisions of the Income Tax Act. Taxable income is the amount remaining after deducting from assessable income all allowable deductions.

(d) Resource (mining, oil and gas) and primary production taxpayers may carry forward losses for 20 years.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to income tax on worldwide assessable income. Nonresident companies carrying on business through a branch pay tax only on Papua New Guinea (PNG)-source income. A resident company is a company incorporated in PNG. A company not incorporated in PNG is

considered a resident company if it carries on business in PNG and it has either its central management and control in PNG or its voting power controlled by shareholders who are residents of PNG.

Tax rates. Resident companies are subject to tax at a rate of 30%. Branches of nonresident companies (other than those engaged in mining, petroleum or gas operations) are subject to tax at a rate of 48%. Nonresident companies deriving “prescribed income” are subject to the foreign contractor provisions (see *Foreign Contractor Withholding Tax*).

For resident and nonresident companies engaged in mining, petroleum or gas operations, the tax rate is 30%.

In addition to any tax liability determined in accordance with the above rate, an Additional Profits Tax may be levied with respect to gas projects in certain circumstances and, from 1 January 2017, with respect to mining and petroleum projects.

From 1 January 2022, a Market Concentration Levy applies in the commercial banking and telecommunications sectors. The levy is PGK190 million in the commercial banking sector and PGK95 million in the telecommunications sector.

Foreign Contractor Withholding Tax. Most activities conducted by nonresidents in PNG (including PNG branches), other than individuals deriving employment income, fall under the foreign contractor and management fee (see *Management Fee Withholding Tax*) provisions of the domestic law. The Foreign Contractor Withholding Tax (FCWT) applies if income is derived by nonresidents (usually referred to as “foreign contractors”) from contracts for “prescribed purposes,” including installation and construction projects, consultancy services, lease of equipment and charter agreements.

Effective from 1 January 2017, payments to foreign contractors are subject to 15% withholding tax, which is a final PNG tax on the PNG income. Before 1 January 2017, the rate was 12% and foreign contractors had the option of electing to file an annual PNG corporate tax return and pay tax at the nonresident rate on actual taxable income.

Management Fee Withholding Tax. Subject to the availability of treaty relief, Management Fee Withholding Tax (MFWT) at a rate of 17% must be withheld from management fees paid or credited to nonresidents.

The definition of “management fee” is very broad and includes “a payment of any kind to any person, other than to an employee of the person making the payment and other than in the way of royalty, in consideration for any services of a technical or managerial nature and includes payment for consultancy services, to the extent the Commissioner General of Internal Revenue is satisfied those consultancy services are of a managerial nature.”

In practice, MFWT generally applies to services rendered outside PNG, and FCWT (see *Foreign Contractor Withholding Tax*) applies to fees for services rendered in PNG.

The deduction for management fees paid by a PNG resident company to a nonresident associate cannot exceed the greater of 2%

of assessable income derived from PNG sources or 2% of allowable deductions excluding management fees paid. In addition, for resource companies, to the extent that management fees exceed 2% of the allowable exploration or capital expenditure (other than management fees) incurred during the year, the excess is not allowable exploration or capital expenditure, respectively. However, a full deduction is allowed if the management fee can be supported as an arm's-length transaction. The above limit does not apply with respect to payments made to non-associates.

Incentives. Several specific incentives are available with respect to taxpayers operating in certain industries, including resource taxpayers (mining, oil and gas) and taxpayers engaged in primary production. These incentives range from general concessions with respect to the calculation of taxable income to concessions with respect to specific types of expenditure. Although some investors have been able to negotiate specific incentives for particular projects, the government now aims to include all tax concessions in the domestic legislation and make any concessions available on an industry basis with the goal of developing a more neutral and equitable treatment of projects.

Capital gains. Capital gains are not subject to tax in PNG. The disposal of a capital asset may be subject to tax to the extent the disposal takes place as part of a profit-making scheme or is part of the ordinary business activities of a taxpayer.

Although capital gains on the disposal of depreciable plant and equipment are generally not subject to tax, a calculation of any gain or loss on disposal must be performed. If the amount received exceeds the tax written-down value, an amount of income may be derived (up to the amount of depreciation deductions previously claimed). Alternatively, if the amount received on disposal is less than the tax written-down value, the taxpayer may be able to claim a deduction.

Administration. The PNG tax year is the calendar year. However, for most companies, a substituted accounting period is permitted on written request to the Commissioner General of Internal Revenue. Tax for any fiscal year is payable in three installments on a provisional tax assessment basis according to the following schedule:

- First installment: 120 days after the end of the preceding tax year
- Second installment: 210 days after the end of the preceding tax year
- Third installment: 300 days after the end of the preceding tax year

Provisional tax is generally assessed by the Commissioner General of Internal Revenue based on the latest information available. Accordingly, provisional tax does not generally become payable until after a taxpayer has filed its first tax return, and installments may be revised following the filing of returns.

Any balance must be paid within 30 days after the assessment is issued and served on the taxpayer. Any overpayment of provisional tax is refundable to the taxpayer. The Commissioner General of Internal Revenue does not pay interest on overpaid tax. Penalties apply for underestimation of provisional tax.

Companies are required to file tax returns within two months after the end of the fiscal year (that is, by the end of February of the following year). However, for returns filed by registered tax agents, extensions of an additional four, six or eight months are possible, depending on the level of taxable income. The income and expenses of taxpayers must be expressed in Papua New Guinea currency, unless permission is granted by the Commissioner General of Internal Revenue to report in a currency other than Papua New Guinea currency.

Companies carrying on business in PNG, or deriving income in PNG, must appoint a public officer to act as the representative of the company in all dealings with the IRC. The public officer need not be an employee or shareholder of the company but must be tax resident in PNG.

Dividends. Dividends received by resident companies from other resident companies are fully rebatable; that is, although dividends received by corporate taxpayers from other PNG corporations are fully assessable, the taxpayers may claim a credit of 30% (corporate tax rate), thereby reducing the effective tax rate to nil. Dividends paid out of profits arising from the sale or revaluation of assets that were acquired for purposes other than resale at a profit are exempt if the dividend is distributed through the issuance of non-redeemable shares. Effective from 1 January 2017, dividends paid out of profits derived from petroleum or gas operations are no longer exempt unless a fiscal stability agreement applies.

Effective from 1 January 2017, dividends paid or credited by resident companies to nonresident shareholders (other than superannuation funds) are generally subject to a final 15% dividend withholding tax, which is deducted at source from the gross amount of the dividend.

Foreign tax relief. A resident deriving foreign-source income that has been subject to foreign tax is entitled to a credit equal to the lesser of the following:

- The foreign tax paid
- The amount of PNG tax payable on that income

For purposes of the foreign tax credit, no distinction is made between income derived from treaty and non-treaty countries.

C. Determination of taxable income

General. Income is defined as the aggregate of all sources of income, including annual net profit from a trade, commercial, financial or of other business. Expenses are deductible to the extent that they are incurred in producing assessable income, and are not capital or of a capital nature or incurred in producing exempt income. Deductions are allowable for certain capital expenditures incurred in the agriculture and fishing industries.

Foreign-exchange gains and losses. Realized exchange gains and losses from debts incurred or borrowings made on or after 11 November 1986 (at any time with respect to reforestation activities) in a foreign currency are generally assessable and deductible, respectively, as well as any realized gains or losses made on amounts of income or deductions. Unrealized gains are not assessable, and unrealized losses are not deductible.

Inventories. Trading stock must be valued at the end of an income year either at cost, market selling price, or replacement price. Any change in the method of valuing trading stock must be approved by the Commissioner General of Internal Revenue. The Commissioner General of Internal Revenue has the discretion to make adjustments if the trading stock is sold or otherwise disposed of other than at market value.

Provisions. Provisions are not deductible until payments are made or, in the case of doubtful debts, until the debts are considered totally irrecoverable and are written off.

Tax depreciation. Depreciation of fixed assets that are used in the production of taxable income is calculated using either the prime-cost (straight-line) method or the diminishing-value method. The default method is the diminishing-value method with taxpayers having the option by notice in writing to use the prime-cost method for any or all units of property. Any change in the method of depreciation must be approved by the Commissioner General of Internal Revenue.

The IRC publishes depreciation rates for certain items of plant and equipment. The following are some of the applicable rates published by the IRC.

Item	Method	
	Prime-cost (%)	Diminishing-value (%)
Manufacturing		
Cement, pipe and tile manufacturing plant	10	15
Chemical manufacturing plant	10	15
Primary industries, farmers and so forth		
Cocoa and coffee industry plant	10	15
Copra industry plant	5	7.5
Other industries		
Aircraft	10	15
Building industries	20	30
Buildings		
Residential buildings	2	3
Storage buildings (steel framed)	4	6
Transportation		
Aircraft	12.5	18.75
Motor vehicles (other motor vehicles, including buses, lorries and trucks)	20	30
Wharves	5	7.5
Ships and steamers	7.5	11.25
Mining		
Development works	Nil	Nil
Dragline	13	20
Plant and machinery		
General plant and equipment	10	15
Drills	17	25
Earthmoving plant and heavy equipment	20	30
Motor trucks	20	30
Shovels	20	30
Oil		
Exploration	20	30

Item	Method	
	Prime-cost (%)	Diminishing-value (%)
Oil companies		
Aircraft	25	37.5
Aircraft refueling equipment	15	22.5
Drilling plant	20	30
Seismic geophysical survey equipment	20	30
Oil rigs (offshore) and ancillary plant	10	15
Petroleum		
Drilling and down hole (specialized drilling) equipment	20	30
Earthmoving plant and heavy equipment	20	30
General plant and equipment	17	25
Onshore production plant	13	18
Offshore production plant	13	20
Refining plant	13	20
Wharves and jetties	5	7.5
Vehicles	20	30

The amortization deduction for allowable exploration expenditure (AEE) incurred by resource taxpayers is determined by dividing the undeducted expenditure by the lesser of the number of years in the remaining life of the project or four.

The deduction allowable for short-life allowable capital expenditure (ACE; effective life of less than 10 years) incurred by resource taxpayers is calculated by dividing the undeducted balance of ACE by the lesser of the number of years in the remaining life of project or 4. For long-life ACE (effective life of 10 years or more) incurred by resource taxpayers, depreciation must be calculated at a rate of 10% under the straight-line method.

The order of deductions for AEE and ACE amortization is AEE, long-life ACE and short-life ACE. The deductions may not create a loss and any excess deductions are carried forward to future years.

Environmental protection and cleanup costs. A specific deduction is available to taxpayers for certain expenditure incurred with respect to environmental-protection activities and cleanup costs incurred when pollution occurs. This measure is available to taxpayers in all industries. It was introduced to encourage taxpayers to safeguard the environment.

Several specific exclusions exist, including capital expenditure incurred to acquire land and buildings. Expenditure incurred for environmental impact studies is deductible under a separate measure (see *Environmental impact studies*).

Depreciation deductions are also available for plant and equipment used in environmental-protection activities.

Environmental impact studies. A deduction is allowed for environmental impact studies. For this purpose, an environmental impact study is the study of the environmental impact of an assessable

income-producing activity or business that is carried on or proposed to be carried on in PNG by the taxpayer.

The expenditure incurred is apportioned over the life of the project or 10 years, whichever is less. If the taxpayer is in the resources industry, the cost of the environmental impact is not allowable under this measure, but is available under the specific resources taxation provisions.

Depreciation deductions are also available for plant and equipment used for environmental impact studies.

Rehabilitation costs of resource taxpayers. For resource projects that begin on or after 1 January 2012, at the end of a project, a resource taxpayer may transfer losses incurred on environmental rehabilitation to other projects owned by it. PNG uses ring-fencing provisions and calculates the profits of resource projects on a project-by-project basis. Historically, losses incurred were effectively lost if no further income was produced.

Research and development. On 1 January 2014, the extended deduction of 50% was phased out for research and development (R&D) expenditure. Previously, a 150% deduction was available for “prescribed” R&D expenditure. To claim the R&D concession, taxpayers needed to complete and submit an application annually to the Research and Development Expenses Approval Committee (within the PNG IRC) for approval before the start of the fiscal year. However, any expenditure on scientific research incurred before 1 January 2014 will continue to be eligible. In addition, although the additional deduction (50%) for eligible R&D expenditure has been abolished, such expenditure will continue to be deductible on a 100% basis even if such expenditure might otherwise be capital in nature and not deductible under general provisions.

The following payments and expenditure incurred by a taxpayer carrying on business for the purpose of obtaining assessable income may be allowable R&D deductions:

- Payments to an approved research institute for scientific research related to the business of the taxpayer and payments to an approved research institute for the purpose of undertaking research related to the business of the taxpayer
- Capital expenditure on scientific research related to the business of the taxpayer (except expenditure on plant, machinery, land or buildings, or alterations, additions or extensions to buildings)
- Expenditure on plant and equipment used solely for R&D purposes (depreciable at a rate of 33% per year)
- Expenditure on buildings and additions to buildings used solely for R&D purposes (deductible in equal installments over three years)

For purposes of the R&D concession, scientific research includes any activities in the fields of natural or applied science for the extension of knowledge.

Relief for losses. Losses incurred may generally be carried forward for seven years. However, losses incurred by resource taxpayers and primary production taxpayers can be carried forward 20 years. Losses incurred by a company are allowed as a

deduction only if the taxpayer passes either the continuity of ownership test or the same business test.

For entities in the resources sector, losses may also be quarantined on a project basis.

Losses may not be carried back.

No provisions exist for grouping losses with associated companies (with the specific exception of certain company amalgamations).

Groups of companies. No provisions exist in PNG for the grouping of income or losses of associated companies or for other group relief. Companies are assessed on an individual basis.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Goods and services tax (GST); imposed on virtually all goods and services unless the goods or services are exempt (for example, financial services and gambling) or the supply is zero-rated (for example, exports); any entity undertaking taxable activity in PNG must register and charge GST if taxable supplies exceed, or are expected to exceed, PGK250,000 in any 12-month period; entities that are registered must account for GST collected (output tax) and GST paid (input tax) during each month with any excess of GST collected to be remitted to the IRC by the 21st day of the following month; entities may generally claim a refund for most GST input tax paid on importations or local purchases of goods and services; effective from 1 January 2016, a deferral scheme applies with respect to GST on imports	10
Customs and excise duty; imposed on all goods imported into PNG, unless the goods are duty-free or exempt from duty; duty is imposed on the total value including cost, insurance and freight; the rate of duty depends on the nature of the goods; a zero rate often applies to goods imported into PNG if the goods are not available in PNG, but a specific analysis must be undertaken in each instance	Various
Stamp duty; imposed on dutiable instruments such as deeds, share transfers and a wide range of other documents at varying rates; may also apply to documents executed outside PNG under provisions that impose an obligation to file documents for assessment for stamp duty with respect to property or activities in PNG	Various

E. Miscellaneous matters

Foreign-exchange controls. The currency in PNG is the kina (PGK).

A tax-clearance certificate is required if certain cumulative remittances of foreign currency exceed PGK500,000 in a calendar year. For a remittance to a tax haven, a tax clearance is always required, regardless of the amount being remitted.

PNG resident companies are generally not permitted to receive payment for goods or services in a foreign currency. Consequently, if a contract is entered into between two PNG resident companies in a foreign currency (for example, US dollars), the settlement of the invoice must be made in Papua New Guinea currency. For exchange-control purposes, a resident includes a foreign company operating actively in PNG as a branch.

Debt-to-equity ratios. Previously, the thin-capitalization rules applied only to taxpayers operating in the resources sector. Effective from 2013, PNG's thin-capitalization rules apply to PNG companies in all industries. The 3:1 debt-to-equity ratio that previously applied for resource companies has been adjusted to 2:1 from 1 January 2020. Projects that are covered by a fiscal stability agreement are not affected by this change. All other companies are subject to a 2:1 ratio (with the exception of approved financial institutions, which are not subject to any ratio). If the applicable ratio is breached, a proportion of the interest on foreign debt is denied as a tax deduction.

Anti-avoidance legislation. Contracts, agreements or arrangements that have the effect of avoiding any tax may be rendered void by the tax authorities.

Transfer pricing. Related-party transactions are accepted by the tax authorities if they are carried out at arm's length. However, a taxpayer's taxable income can be adjusted if transactions are not conducted on an arm's-length basis (that is, if the transaction would not have been conducted on the same basis between independent parties). Specific provisions also exist with respect to management or technical fees paid to international related parties. Documentation of the appropriate methodology and calculation of pricing must be maintained. Country-by-Country Reporting rules are effective from 1 January 2017.

Controlled foreign companies. The PNG tax legislation does not currently contain any controlled foreign company (CFC) rules. Consequently, any income derived by foreign subsidiaries of a PNG entity is typically taxed on a receipts basis only.

F. Treaty withholding tax rates

Taxpayers self-assess any treaty reductions of withholding taxes.

The following table lists the effective treaty withholding tax rates for dividends, interest, royalties, management fees and payments to foreign contractors with respect to prescribed services.

	Dividends	Interest	Royalties	Management fees (a)	Payments to foreign contractors
	%	%	%	%	%
Australia	15	10	10	0 (b)	15 (c)
Canada	15	10	10	0 (b)	15 (c)
China Mainland	15	10 (f)	10	0 (b)	15 (c)
Fiji	15	10 (f)	15	15	15 (c)

	Dividends	Interest	Royalties	Management fees (a)	Payments to foreign contractors
	%	%	%	%	%
Germany	15	10 (f)	10	0 (b)	15 (c)
Indonesia	15	10 (f)	10	10	15 (c)(d)
Korea (South)	15	10 (f)	10	0 (b)	15 (c)
Malaysia	15	15 (f)	10	10	15 (c)(d)
New Zealand	15	10 (f)	10	0 (b)	15 (c)
Singapore	15	10 (f)	10	0 (b)	15 (c)(d)
United Kingdom	15	10 (f)	10	10	15 (c)(d)
Non-treaty jurisdictions	15	15	– (e)	17	15

- (a) For the purposes of this table, management fees include technical fees.
- (b) Management services, including services of a technical nature rendered from sources outside of PNG for a resident of PNG are subject to MFWT at a rate of 17%. For services provided by a resident of a country with which PNG has entered into a double tax treaty that does not have a specific technical services article, the payment is not subject to withholding tax in PNG if all of the services were performed outside PNG.
- (c) Nonresident entities deriving income from “prescribed contracts” are subject to FCWT at a rate of 15% of the gross receipts. The income of residents of countries with which PNG has entered into a double tax treaty is subject to the FCWT provisions if the nonresident is conducting business in PNG through a permanent establishment.
- (d) Until recently, a reduced FCWT rate may have applied to foreign contractors from these countries in accordance with the non-discrimination article in the relevant treaty. However, the PNG tax authorities now apply the 15% rate to foreign contractors from all countries.
- (e) The rate is 30% for payments to associates. For payments to non-associates, the amount of the tax equals the lesser of 10% of assessable income or 48% of taxable income.
- (f) The rate is 0% for interest paid to the government or the central bank.

- (a) The Paraguayan tax law does not have a separate capital gains tax. Capital gains are subject to the general regime for business income tax and accordingly are taxed at the same rate of 10%.
- (b) The 15% withholding tax applies to dividends paid abroad to nonresidents.

B. Taxes on corporate income and gains

Business income tax. Tax is levied on Paraguay-source income of corporations and commercial enterprises. Income is consid-

ered to be from a source in Paraguay if it is derived from capital, property or rights in Paraguay or from a business in Paraguay. For companies domiciled in Paraguay, income derived from capital invested abroad is considered Paraguayan-source income and, accordingly, subject to business income tax.

Income earned from farming activities in Paraguay is also subject to business income tax under the rules established by Law 6380/19.

Rate of business income tax. Under Law 6380/19, the business income tax rate is 10%.

The Paraguay incentive tax law provides an exemption from the 15% withholding tax mentioned above if an investment of greater than USD5 million is made in industrial activities through a specific Bi-Ministerial Tax Resolution.

Capital gains. The Paraguayan tax law does not have a separate capital gains tax. Capital gains are subject to the general regime for business income tax and accordingly are taxed at the business income tax rate of 10%.

Administration. The tax year is the calendar year. Returns must be filed within four months after the end of the financial year. Penalties are imposed for failure to comply with these rules.

Dividends. The distribution of dividends is subject to dividend tax of 15% for non-Paraguayan entities and 8% for local entities.

C. Determination of trading income

General. Taxable income is based on profits from the financial statements after tax adjustments. Expenses are generally deductible if they are incurred for the purposes of the business and in the production of taxable income.

Inventories. Inventory is valued at the cost of production or acquisition. The cost may be calculated under the average-cost or first-in, first-out (FIFO) methods. After choosing a method, a corporation may not change it without prior authorization.

Tax depreciation. Depreciation must be calculated using the straight-line method.

Relief for losses. The tax law allows losses to be carried forward for a five-year-period.

Groups of companies. Paraguayan law does not contain any measures for filing consolidated returns or for relieving losses within a group.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; imposed on goods sold, including imports, and services rendered in Paraguay; exports are exempt; in certain circumstances, payments of royalties are subject to the tax	
Standard rate	10

Nature of tax	Rate (%)
Basic consumer food items, pharmaceutical products, and the leasing and sale of real estate for the family home	5
Excise tax on certain manufactured and imported goods, such as cigarettes, liquor and petroleum products, among others	1 to 50
Social security contributions for nonbank institutions, on payroll; paid by	
Employer	16.5
Employee	9

E. Foreign-exchange controls

The central bank does not control the foreign-exchange market. A free-market rate of exchange prevails.

F. Tax treaties

Paraguay has entered into double tax treaties with Chile, Qatar, Taiwan, the United Arab Emirates and Uruguay. It has also entered into a tax treaty on international freight with Argentina and tax treaties on international air freight with Belgium and Germany.

- (a) Mining companies are subject to an additional Special Mining Tax or to “voluntary” payments. For further details, see Section B.
- (b) Capital gains derived by nonresident entities are subject to income tax at a rate of 5% if the transfer is made in Peru. Otherwise, the rate is 30%. For the period of 1 January 2016 through 31 December 2022, capital gains derived from the transfer of securities carried out through the Lima Stock Exchange are exempt from tax if certain conditions are met. For further details regarding the applicable tax rates, see *Capital gains* in Section B. Capital gains derived by resident entities are subject to income tax at a rate of 29.5%.

- (c) Branches and permanent establishments of foreign companies are subject to the same corporate income tax rate as domiciled companies.
- (d) The Dividend Tax, which is imposed at a rate of 5% and is generally withheld at source, is imposed on profits distributed to nonresidents and individuals. For further details regarding the Dividend Tax, see Section B.
- (e) This tax applies to payments to nonresidents.
- (f) A reduced rate of 4.99% applies to certain interest payments. For further details, see Section B.
- (g) See Section C.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies are subject to income tax on their worldwide taxable income. Resident companies are those incorporated in Peru. Branches and permanent establishments of foreign companies that are located in Peru and nonresident entities are taxed on income from Peruvian sources only.

Tax rates. The corporate income tax rate is 29.5%.

A Dividend Tax at a rate of 5% is imposed on distributions of profits to nonresidents and individuals by resident companies and by branches, permanent establishments and agencies of foreign companies. This tax is generally withheld at source. However, in certain circumstances, the company must pay the tax directly. For details regarding the Dividends Tax, see *Dividends*.

Mining tax. Mining companies are subject to an additional Special Mining Tax based on a sliding scale, with progressive marginal rates ranging from 2% to 8.4%. The tax is imposed on a quarterly basis on the operating profits derived from sales of metallic mineral resources, regardless of whether the mineral producer owns or leases the mining concession.

In addition, mining companies that have signed stability agreements with the state are subject to “voluntary” payments, which are calculated based on a sliding scale with progressive marginal rates ranging from 4% to 13.12%. These rates are applied on a quarterly basis to the operating profits derived from sales of metallic mineral resources, regardless of whether the mineral producer owns or leases the mining concession. Higher tax rates apply to higher amounts of operating profits.

Tax incentives. Various significant tax incentives are available for investments in the following:

- Mining enterprises
- Oil and gas licenses and services contracts
- Certain agriculture, aquaculture and forestry activities
- Capital markets

They are also available for investments in manufacturing industries located in the jungle, in designated tax-free zones and in borderline areas of the country.

Law 31110, published in December 2020, enacted a new agribusiness preferential tax regime, establishing new corporate income tax rates for companies engaged in agribusiness. For companies whose income does not exceed 1,700 tax units (approximately USD2,025,900), a 15% rate applies from 2021 to 2030. For those companies whose income exceeds 1,700 tax units, the following gradual reduction of the benefit of the reduced corporate income tax rate is established:

- 2021–2022: 15%

- 2023–2024: 20%
- 2025–2027: 25%
- 2028 onward: general regime (29.5%)

Legislative Decrees 1515 and 1517 (published in December 2021) establish that, as of 1 January 2022, taxpayers engaged in aquaculture and forestry activities have the same tax benefits as those applicable to the agribusiness tax regime. For companies whose income does not exceed 1,700 tax units, a 15% rate applies from 2022 to 2030. For companies whose income exceeds 1,700 tax units, the following gradual reduction of the corporate income tax rate is established:

- 2022: 15%
- 2023–2024: 20%
- 2025–2027: 25%
- 2028 onward: general regime (29.5%)

Capital gains. Capital gains derived by nonresident entities are subject to income tax at a rate of 5% if the transfer is made in Peru. Otherwise, the rate is 30%. The regulations provide that a transaction is made in Peru if the securities are transferred through the Lima Stock Exchange. The transaction takes place abroad if securities are not registered with the Lima Stock Exchange or if registered securities are not transferred through the Lima Stock Exchange.

A special procedure has been introduced to determine the tax basis of listed securities acquired before 1 January 2010. The general rule is that the tax basis for these securities is the value of such securities at the closing of 31 December 2009, if this value is not lower than the price paid for the acquisition of the securities. The purpose of this rule is to impose capital gains tax only on the capital gain resulting from the appreciation of securities since 1 January 2010 (date when the exemption was repealed).

For the period of 1 January 2016 through 31 December 2022, the transfer of securities carried out through the Lima Stock Exchange is exempt from capital gains tax if the following conditions are met:

- The securities must be traded on the Lima Stock Exchange.
- In any 12-month period, the taxpayer and its related parties must not transfer more than 10% of the securities issued by the company.
- The securities should must meet a liquidity threshold to be considered “stock market securities.” Numerical parameters are established for “stock market securities.” On a daily basis at the opening of the stock market session, the Lima Stock Exchange publishes the securities that comply with the requirements to be considered “stock market securities.”

In any case, the exemption is lost if, after the application of the exemption, the issuer of the securities unlists them from the Lima Stock Exchange within the 12 months following the sale.

Capital gains derived from the disposal of bonds issued by the government as well as by Peruvian corporations before 10 March 2007, through public offerings, are exempt from Peruvian income tax.

CAVALI withholds capital gains in transactions concluded on the Lima Stock Exchange. As a result, nonresidents are not required to pay their income tax liability to the Peruvian tax authorities.

For this purpose, an indirect transfer of Peruvian shares is deemed to occur if the following conditions are met:

- Within the 12-month period before the transfer, the fair market value of the shares issued by the Peruvian entity represents at least 50% or more of the fair market value of the total shares of the nonresident entity.
- At least 10% of the shares of the nonresident entity are transferred within a 12-month period.

Effective from 1 January 2019, an indirect transfer of Peruvian shares is always triggered if the amount paid for the shares of the nonresident entity that corresponds to the Peruvian shares is equal to or higher than 40,000 Tax Units (approximately USD48 million).

For purposes of the indirect transfer of shares, temporary provisions established a special procedure to determine the tax basis of shares acquired before 16 February 2011. Under this procedure, the tax basis is the higher of the price paid on acquisition or the market value on 15 February 2011.

On 21 April 2020, Peru's executive power enacted Supreme Decree 085-2020-EF, amending the Peruvian Income Tax Law regulations and establishing a new procedure for the determination of the market value of indirect disposals. The procedure determines the market value of the shares of resident entities and nonresident entities in cases of indirect disposals with related parties or unrelated parties.

The Supreme Decree provides, among other information, that one of the following methods must be used:

- Higher listed value method. This method applies to shares listed on the stock market. The market value is the highest listed value.
- Discounted cash flow method. This method applies if the shares that are not listed on the stock exchange.
- Equity participation value (EPV) method. If the methods indicated above are not complied with, the EPV is calculated based on the last audited balance sheet.
- Residual method. This method applies if the above methods are not applicable.

Administration. The mandatory closing date for business enterprises is 31 December. Tax returns must be filed by the end of March or beginning of April, depending on the taxpayer number.

Companies must make advance payments of income tax. Such payments can be used as a credit against the annual income tax obligation, or they can be refunded at the end of the fiscal year if requested by the taxpayer.

The monthly advance payments equal the higher of the following amounts:

- The amount obtained by applying to the monthly net income the ratio obtained by dividing the amount of tax calculated for the preceding tax year by the total net income for that year. For

the January and February payments, the ratio is determined by dividing the amount of tax calculated for the year before the preceding tax year by the net income for that year.

- The amount obtained by applying a 1.5% rate to the net income for the month.

Companies in a startup process or in a net operating loss position make monthly advance payments equal to 1.5% of their monthly net income.

Monthly advance payments are due on the 9th to the 15th business day, according to a schedule. Taxes and related penalties not paid by due dates are subject to interest charges, which are not deductible for tax purposes.

Interest rates for tax refunds and tax debts. Beginning 1 April 2021, the monthly interest rate for tax debts in national currency was reduced from 1% to 0.9%. The monthly interest rate for tax refunds in national currency is 0.42%.

Beginning 1 April 2020, the monthly interest rate for tax debts in foreign currency was reduced from 0.6% to 0.5%, and the monthly interest rates for tax refunds in foreign currency was reduced from 0.3% to 0.25% per month.

Dividends. Effective from 1 January 2017, the dividend withholding tax rate is 5%. This rate applies to dividends that correspond to profits generated since such date. Profits generated up to 31 December 2014 are subject to a withholding tax rate of 4.1%, and profits generated between 1 January 2015 and 31 December 2016 are subject to a withholding tax rate at a rate of 6.8%, even if the relevant profits are distributed in 2017 or future years. For these purposes, first-in, first-out (FIFO) rules apply.

The Dividend Tax applies to profits distributed to nonresidents and individuals.

The Dividend Tax applies to distributions by Peruvian companies, as well as to distributions by Peruvian branches, permanent establishments and agencies of foreign companies. The income tax law specifies various transactions that are considered profits distributions by resident entities for purposes of the Dividend Tax. These transactions include the distribution of cash or assets, other than shares of the distributing company, and, under certain circumstances, a capital reduction, a loan to a shareholder or a liquidation of the company. For permanent establishments, branches, and agencies of foreign companies, a distribution of profits is deemed to occur on the deadline for filing their annual corporate income tax return (usually at the end of March or the beginning of April of the following tax year).

The law also provides that if a resident company, or a branch, permanent establishment or agency of a foreign company, pays expenses that are not subject to further tax control, the amount of the payment or income is subject to the Dividend Tax. Dividend Tax for these items is paid directly by the resident entity or the branch or permanent establishment. In this case, the tax rate is 5%.

The capitalization of equity accounts, such as profits and reserves, is not subject to the Dividend Tax, unless these items are further distributed.

Interest. Interest paid to nonresidents is generally subject to withholding tax at a rate of 30%. For interest paid to unrelated foreign lenders, the rate is reduced to 4.99% if all of the following conditions are satisfied:

- For loans in cash, the proceeds of the loan are brought into Peru as foreign currency through local banks or are used to finance the import of goods.
- The proceeds of the loan are used for business purposes in Peru.
- The participation of the foreign bank is not primarily intended to cover a transaction between related parties (back-to-back loans).
- The interest rate does not exceed the London Interbank Offered Rate (LIBOR) plus seven points. For this purpose, interest includes expenses, commissions, premiums and any other amounts in addition to the interest paid.

If the first three conditions described above are satisfied and the interest rate exceeds the LIBOR plus seven points, only the excess interest is subject to withholding tax at the regular rate of 30%.

Interest arising from loans granted by international banks to Peruvian banks and financial institutions is subject to a 4.99% withholding tax.

In general, interest derived from bonds and other debt instruments is also subject to a withholding tax rate of 4.99%, unless the holder of the bonds or other debt instruments is related to the issuer or its participation is primarily intended to avoid transactions between related parties (back-to-back transactions).

Interest earned on bonds issued by the government is exempt from tax. Effective from 1 January 2010, interest on bonds issued by Peruvian corporations before 11 March 2007, in general through public offerings, is exempt from tax. Interest from deposits in Peruvian banks is subject to a 4.99% withholding tax if the beneficiary is a foreign entity.

Other withholding taxes. Payments for technical assistance used in Peru are subject to withholding tax at a rate of 15%, regardless of whether the technical assistance is effectively provided. If the consideration exceeds 140 Tax Units (approximately USD 167,222), the local user must obtain and provide to the Peruvian tax authorities a report from an audit company confirming that the technical assistance services were actually rendered.

Payments for digital services that are provided through the internet or a similar platform and used in Peru are subject to withholding tax at a rate of 30%.

Payments for non-technical services provided in Peru are subject to withholding tax at a rate of 30%.

Foreign tax relief. Tax credits are permitted, within certain limits, for taxes paid abroad on foreign-source income.

Under domestic law, a direct tax credit is allowed. In addition, effective from 1 January 2019, an indirect tax credit is established

for foreign tax credit purposes. A Peruvian entity receiving foreign income as dividends or profits from nonresident entities are able to deduct the following:

- The income tax withheld from the dividends or profits distributed (direct credit)
- The income tax paid by the first-tier nonresident entity (indirect credit)

To qualify for the indirect foreign tax credit, the Peruvian entity must directly own at least 10% of the shares of the nonresident entity for a period of 12 months before the date on which the dividends are paid.

The indirect foreign tax credit may be claimed for the income tax paid by the second-tier nonresident entity if the following conditions are met:

- The Peruvian entity indirectly owns at least 10% of the shares of the nonresident entity for a period of 12 months before the date in which the dividends are paid.
- The second-tier nonresident entity is a resident of a country that has an exchange-of-information agreement with Peru or is a resident of the same country of residence as the first-tier nonresident entity.

In addition, taxpayers must communicate to the Peruvian tax authority the equity participation in foreign companies, the profits obtained by the first- and second-tier nonresident companies, and the dividends distributed by them.

Resolution 059-2020, effective 21 March 2020, establishes that taxpayers should communicate the following information through the tax authority's online platform in Excel format:

- Equity participation in foreign companies
- Profits obtained by the first- and second-tier nonresident companies and the dividends distributed by them

An indirect tax credit is also allowed under certain treaties.

C. Determination of trading income

General. Taxable income of business enterprises is generally computed by reducing gross revenue by the cost of goods sold and all expenses necessary to produce the income or to maintain the source of income. However, certain types of revenue must be computed as specified in the tax law, and some expenses are not fully deductible for tax purposes. Business transactions must be recorded in legally authorized accounting records that are in full compliance with International Financial Reporting Standards (IFRS). The accounting records must be maintained in Spanish and must be expressed in Peruvian currency. However, under certain circumstances, foreign investors who invest in foreign currency may enter into an agreement with the state or with state-owned corporations that allows them to keep their accounting books in foreign currency.

Research and development expenses. Up to 31 December 2013, the deduction of scientific and technological research and innovation expenses incurred by a company was limited to 10% of the annual net income, with a maximum annual limitation of 300 Tax

Units (approximately USD358,333. Effective from 1 January 2014, these limits were eliminated.

In addition, to be tax-deductible, the expenses must be previously qualified. Effective from 1 February 2014, the treatment of research and development expenses varies depending on whether they are related to the core business of the taxpayer.

A temporary tax benefit is available for taxpayers that carry out scientific research, technological and innovation development projects beginning on or after 1 January 2016. The tax benefit is an additional expense deduction of 115%, 50% or 75%, if certain conditions are met. The projects do not have to be related to the taxpayer's core business. Beginning 1 January 2020, the additional deduction of 115%, 50% or 75% cannot exceed 500 tax units (approximately USD595,800). The benefit is extended until the 2022 fiscal year.

Inflation adjustments. For tax and accounting purposes, inflation adjustments apply only until 31 December 2004. Consequently, beginning 1 January 2005, transactions are recognized and recorded in local books at their historical value.

Special activities. Nonresident corporations, including their branches and agencies, engaged in certain specified activities provided partially in Peru are subject to tax on only a percentage of their gross income derived from such activities. This tax is withheld at source. The following are the applicable percentages for some of these specified activities.

Activity	Applicable percentage (%)
Air transportation	1 (a)(b)
Marine transportation	2 (a)(b)
Leasing of aircraft	60 (c)
Leasing of ships	80 (c)
International news agencies	10 (a)
Sale of highly migratory hydrobiological resources	9 (a)

- (a) The withholding tax rate is 30%. As a result, the effective tax rates are 0.3% for air transportation, 0.6% for marine transportation and 3% for international news agencies. As of 1 January 2022, an effective tax rate of 3.7% applies to income from the sale of highly migratory hydrobiological resources.
- (b) This percentage applies to services rendered partly in Peru and partly abroad.
- (c) The withholding tax rate is 10%. As a result, the effective tax rates are 6% for leasing of aircraft and 8% for leasing of ships.

Inventories. Inventories must be carried at cost. Cost may be determined specifically or by the first-in, first-out (FIFO), average, retail or basic inventory method. The last-in, first-out (LIFO) method is not permitted.

Provisions. Provisions for bad debts, bonuses, vacations, employees' severance indemnities and other expenses are allowed if made in accordance with certain tax regulations.

Tax depreciation. Depreciation rates are applied to the acquisition cost of fixed assets. The following are some of the maximum annual depreciation rates allowed by law.

Asset	Maximum rate (%)
Buildings and structures	5 (a)
Cattle and fishing nets	25
Vehicles	20
Machinery and equipment for construction, mining and oil activities	20
Machinery and equipment for other activities	10
Data processing equipment	25 (b)
Other fixed assets	10 (b)

(a) This is a fixed rate rather than a maximum rate. Also, see below.

(b) See below.

Taxpayers may apply any depreciation method for their fixed assets other than buildings and structures, taking into account the characteristics of the business as long as the resulting depreciation rate does not exceed the maximum rates stated above.

In general, except for buildings and structures, tax depreciation must match financial depreciation.

Under the Special Regime of Depreciation for Buildings, which is effective from 1 January 2015, buildings can be depreciated for income tax purposes at an annual depreciation rate of 20% if certain conditions are met.

On 10 May 2020, Legislative Decree 1488 was issued, establishing optional special depreciation rules. The decree establishes a special depreciation regime under which taxpayers may claim 20% depreciation for building and constructions in the following cases:

- Construction is started on or after 1 January 2020.
- At least 80% of the construction is completed as of 31 December 2022.

The 20% depreciation rate also may apply to buildings acquired by taxpayers in the 2020, 2021 and 2022 tax years, provided the assets meet certain requirements.

Legislative Decree 1488 also establishes the following annual depreciation percentages for assets acquired in the 2020 and 2021 tax years:

- Data processing equipment: 50%
- Machinery and equipment: 20%
- Ground transportation vehicles (except railways) used by authorized companies that provide transportation service to people and/or goods at the provincial, regional and national level: 33.3%
- Hybrid or electric ground transportation vehicles (except railways): 50%

Relief for losses. Taxpayers may select from the following two systems to obtain relief for their losses:

- System A: Carrying forward losses to the four consecutive years beginning with the year following the year in which the loss is generated
- System B: Carrying forward losses indefinitely, subject to an annual deductible limit equal to 50% of the taxpayer's taxable income in each year

Loss carrybacks are not allowed.

On 8 May 2020, Legislative Decree 1481 was issued, establishing a special rule for carrying forward losses incurred during the 2020 tax year. According to the decree, companies that opt for System A may carry forward losses incurred in the 2020 tax year for five years instead of four, counting from the 2021 fiscal year.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Temporal net assets tax; imposed on companies, and on agencies, branches and permanent establishments of foreign entities; the tax base equals the value of the net assets of the taxpayer as of 31 December of the preceding year that exceeds PEN1 million (approximately USD259,067); the tax payments may offset the advance payments required under the general income tax regime or may be claimed as a credit against the income tax payable for the tax year; a refund may be requested for any balance of tax payment that is not used in the current year; the tax does not apply to certain companies; tax is payable beginning in the year following the first year of productive activities (Law 31104, published in January 2021, authorizes the refund of the temporary tax on net assets corresponding to the 2020 tax year to mitigate the impact of the COVID-19 pandemic on the national economy.)	0.4
Sales tax, on the sale of goods, services and the import of most products	18
Excise tax, on goods and imports; the tax is either a fixed amount or an amount determined by applying a percentage rate	Various
Social security contributions to the Peruvian Health Social Security Office, on salaries and legal bonuses; paid by employer	9
Pension Fund; paid by employee (Alternatively, employees may contribute approximately 11.8% of their salaries to the Private Pension Funds Trustee [AFP].)	13
Employees' profit sharing; calculated on pretax income and deductible as an expense in determining taxable income; rate varies depending on companies' activities (mining, fishing, manufacturing, telecommunications and other activities)	5 to 10
Tax on Financial Transactions; imposed on debits and credits in Peruvian bank accounts	0.005

E. Miscellaneous matters

Foreign-exchange controls. Peru does not impose foreign-currency controls. Exchange rates are determined by supply and demand.

Means of payment. Any payment in excess of PEN3,500 or USD1,000 must be made through the Peruvian banking system using the so-called “Means of Payment,” which include bank deposits, wire transfers, pay orders, credit and debit cards and non-negotiable checks. Noncompliance with this measure results in the disallowance of the corresponding expense or cost for income tax purposes. In addition, any sales tax (see Section D) related to the acquisition of goods and services is not creditable.

Related-party transactions. Expenses incurred abroad by a non-resident parent company, affiliates or the home office of a Peruvian subsidiary or branch (or prorated allocations of administrative expenses incurred by those entities) are deemed by law to be related to the generation of foreign revenue and, accordingly, nondeductible, unless the taxpayer can prove the contrary.

Transfer pricing. Peru’s transfer-pricing rules apply to cross-border and domestic transactions between related parties and to all transactions with residents in tax-haven jurisdictions. Effective from 2019, the transfer-pricing rules also apply to transactions with residents in non-cooperating jurisdictions, as well as transactions with residents whose revenue or income is subject to a preferential tax regime.

The transfer-pricing rules are consistent with the Organisation for Economic Co-operation and Development (OECD) guidelines. Intercompany charges must be determined at arm’s length. Regardless of the relationship between the parties involved, the fair market value (FMV) must be used in various types of transactions, such as the following:

- Sales
- Contributions of property
- Transfers of property
- Provision of services

For the sale of merchandise (inventory), the FMV is the price typically charged to third parties in profit-making transactions. For frequent transactions involving fixed assets, the FMV is the value used in such frequent transactions by other taxpayers or parties. For sporadic transactions involving fixed assets, the FMV is the appraisal value.

In the event that the transactions are performed without using the FMV, the tax authorities will make the appropriate adjustments for the parties to the transaction.

The FMV of transactions between related parties is the value used by the taxpayer in identical or similar transactions with unrelated parties. The tax authorities may apply the most appropriate of the following transfer pricing methods to reflect the economic reality of the transactions:

- Comparable uncontrolled price method
- Cost-plus method
- Resale price method
- Profit-based method

Transfer-pricing aspects of cross-border commodity transactions. Effective from 1 January 2019, specific rules are introduced for applying the comparable uncontrolled price method to the exportation and importation of commodities and other products, with prices set by reference to commodity prices.

The tax regulations provide lists of export and import products whose prices are set by reference to quoted prices. The following is the list of export products:

- Copper
- Gold
- Silver
- Zinc
- Fishmeal

The following is the list of import products:

- Corn
- Soy
- Wheat

Advance pricing agreements. The transfer-pricing rules provide for advance pricing agreements between taxpayers and the Peruvian tax authorities.

Intragroup services. To deduct amounts paid for services provided between related parties, taxpayers must comply with the benefit test and provide the documentation and information requested by the tax authorities.

The benefit test is met if the services rendered provide economic or commercial value to the recipient of the service or improves or maintains the commercial position of the recipient. This can be established if independent parties would be satisfied as to the need for the service, whether they perform the services themselves or through a third party. In this regard, the information and documentation provided must evidence the actual performance of the service, the nature of the service, the actual necessity for the service, and the cost and expenses incurred by the service provider.

Regarding low value-adding services, the service provider must apply a profit markup of no more than 5% to the relevant costs incurred in performing the services. Low value-adding services for purposes of this approach are services performed by one member or more than one member of a multinational enterprise group on behalf of one or more other group members. The services must satisfy all of the following conditions:

- They must be of a supportive nature.
- They must not be part of the core business of the multinational enterprise group.
- They must not require the use of unique and valuable intangibles and must not lead to the creation of unique and valuable intangibles.
- They must not involve the assumption or control of substantial risk by the service provider and must not give rise to the creation of significant risk for the service provider.

Under tax regulations, the following do not qualify as low value-adding services, unless they meet the above characteristics:

- Research and development services

- Manufacturing and production services
- Purchase activities related to raw materials or other materials that are used in the manufacturing or production process
- Sales, distribution and marketing activities
- Financial transactions
- Extraction, exploration or transformation of natural resources
- Insurance and reinsurance
- Senior management services

Transfer pricing documentation and Country-by-Country reporting. From 1 January 2017, taxpayers must file with the Peruvian tax authorities the following reports:

- **Local File:** this file is required if the accrued revenues exceed 2,300 Tax Units (approximately USD2,740,930 for the 2021 fiscal year). This report provides detailed information on inter-company transactions (both domestic and cross-border) and transactions between the local taxpayer and residents in tax-haven jurisdictions. In addition, information with respect to the benefit test must be included in the Local File with respect to services. The information required in the Local File helps ensure that the taxpayer has complied with the arm's-length principle in its transfer-pricing positions. The Local File focuses on information relevant to the transfer-pricing analysis for transactions taking place between a local taxpayer and associated enterprises. Such information includes relevant financial information regarding those specific transactions, a comparability analysis, and the selection and application of the most appropriate transfer-pricing method.
- **Master File:** the requirements for this file apply only to taxpayers that are members of a domestic or multinational group of companies whose annual revenue for the fiscal year exceeds 20,000 Tax Units (approximately USD24 million for the 2021 fiscal year). Taxpayers exceeding the annual revenue threshold are only required to prepare and submit the Master File if aggregate annual related-party transactions equal or exceed 400 Tax Units (approximately USD476,680 for the 2021 fiscal year) during the relevant year. The Master File provides high-level information on the group's business operations, its transfer-pricing policies and its global allocation of income and economic activity. Specifically, the information required in the Master File provides a "blueprint" of the group and contains relevant information that is grouped in the following five categories:

- The group's organizational structure
- A description of its business or businesses
- The group's intangibles
- The group's intercompany financial activities
- The group's financial and tax positions

In general, the Master File is intended to assist the tax authorities in evaluating the presence of significant transfer-pricing risks and provide an overview of the group to place its transfer-pricing practices in their global, economic, legal, financial and tax contexts.

- **Country-by-Country Report (CbCR):** this report is required for taxpayers forming part of multinational groups, in accordance with Action 13 of the Base Erosion and Profit Shifting (BEPS) Action Plan of the OECD. The CbCR must include aggregate worldwide tax jurisdiction information relating to the global

allocation of the revenue, profits (or losses), income taxes paid (and accrued) and certain indicators of the location of economic activity among tax jurisdictions in which the multinational group operates. The CbCR also must contain a listing of all of the constituent entities of the group. This listing must include the tax jurisdictions of incorporation, as well as the nature of the main business activities carried out by the constituent entities. Under BEPS Action 13, the CbCR should be filed in the jurisdiction of tax residence of the ultimate parent entity of a multinational enterprise group and is shared between jurisdictions through the automatic exchange of information, by a government mechanism under the Multilateral Convention on Mutual Administrative Assistance in Tax Matters, bilateral tax treaties or tax information exchange agreements.

The requirements regarding the submission of the Local File apply from the 2017 fiscal year, while the Master File and the CbCR requirements are mandatory from the 2018 fiscal year.

Debt-to-equity rules. On 1 January 2021, a new set of thin capitalization rules will enter into effect. Under these rules, the interest that exceeds 30% of Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA) of the preceding year will not be deductible. Interest that is not deducted may be carried forward for up to four years, but will always be subject to the 30% of EBITDA limitation.

Supreme Decree 432-2020-EF, which was issued on 31 December 2020, provides that, as a result of the COVID-19 pandemic, with respect to the limit on the deduction of interest expenses applicable as of 2021, taxpayers who establish or begin activities in 2021 consider the EBITDA of that year and not of the preceding year (2020) as established in the rule above.

Supreme Decree 402-2021-EF, effective from 31 December 2021, establishes that for taxpayers not having net income in a tax year or for taxpayers that have losses equal to or more than their net income, the EBITDA is the sum of net interest, depreciation and amortization. It is also established that if a new company is incorporated as a result of a reorganization, the company must take into account the EBITDA for the year in which the reorganization takes place. If a company enters into a reorganization and a new company does not result from it, the company must take into account the EBITDA for the previous tax year.

Transactions with residents in tax havens and entities subject to preferential tax regimes. Expenses incurred in transactions with residents in low-tax jurisdictions and noncooperative jurisdictions (tax havens) as well as entities subject to preferential tax regimes, are not deductible for tax purposes, except for the following:

- Toll payments for the right to pass across the Panama Channel
- Expenses related to credit operations, insurance or reinsurance, leasing of ships or aircraft and freight services to and from Peru

The following jurisdictions are considered to be low-tax jurisdictions or noncooperative jurisdictions.

American Samoa	Dominica	Panama
Andorra	Gibraltar	St. Kitts and Nevis

Anguilla	Guam	St. Lucia
Antigua and Barbuda	Guernsey	St. Vincent and the Grenadines
Aruba	Grenada	Samoa
Bahamas	Hong Kong SAR	Seychelles
Bahrain	Isle of Man	Sint Maarten
Barbados	Jersey	Tonga
Belize	Labuan	Trinidad and Tobago
Bermuda	Liberia	Turks and Caicos Islands
British Virgin Islands	Liechtenstein	US Virgin Islands
Cayman Islands	Maldives	Vanuatu
Cook Islands	Marshall Islands	
Curaçao	Monaco	
Cyprus	Montserrat	
	Nauru	
	Niue	

A country or jurisdiction may be included in the above list if one of the following requirements is met:

- There is no information exchange agreement or double tax treaty including a clause for the exchange of information in force with Peru.
- There is no transparency at a legal, regulatory or administrative level.
- The corporate income tax rate is 0% or lower than 17.7% (60% of the current corporate income tax rate in Peru, which is 29.5%).

A country or jurisdiction may be excluded from the list if one of the following requirements is met:

- The country is member of the OECD.
- There is a double tax treaty in force with Peru that includes a clause for the exchange of information.
- The country effectively exchanges information with Peru without limitation based on domestic legislation or administrative practice.

Inclusions or exclusions are applicable as of 1 January of the year following the inclusion or exclusion.

In addition to the jurisdictions mentioned above, a jurisdiction is deemed to be a preferential tax regime if at least two of the following requirements are met:

- An information exchange agreement or double tax treaty including a clause for the exchange of information is not in force with Peru.
- There is no transparency at a legal, regulatory or administrative level.
- The corporate income tax rate is 0% or lower than 17.7% (60% of the current corporate income tax rate in Peru, which is 29.5%).
- Tax benefits are available for nonresidents, but not residents.
- The jurisdiction has been qualified by the OECD as a harmful jurisdiction as a result of the lack of a requirement that there be a substantive local presence, real activities or economic substance.

The same tax consequences apply for low-tax jurisdictions, non-cooperative jurisdictions and jurisdictions deemed to be preferential tax regimes.

Controlled foreign corporations. The Peruvian Income Tax Law contains the International Fiscal Transparency System, which applies to Peruvian residents who own a controlled foreign corporation (CFC). The law provides requirements for a foreign company to be qualified as a CFC. For these purposes, the ownership threshold is set at more than 50% of the equity, economic value or voting rights of a nonresident entity.

In addition, to be considered a CFC, a nonresident entity must be a resident of either of the following:

- A tax-haven jurisdiction
- A country in which passive income is either not subject to income tax or subject to an income tax that is equal to or less than 75% of the income tax that would have applied in Peru

The law also provides a list of the types of passive income that must be recognized by the Peruvian resident (such as dividends, interest, royalties and capital gains).

The revenues are allocated based on the participation that the Peruvian entity owns in a CFC as of 31 December.

General anti-avoidance rule. The Peruvian general anti-avoidance rule (GAAR) was enacted on 19 July 2012 but was suspended until regulations were issued. On 6 May 2019, regulations were published, which lifted the GAAR suspension. It went into effect on 7 May 2019, but it has been applicable since 19 July 2012.

Under a GAAR, which took effect on 19 July 2012, to determine the true nature of a taxable event, the Peruvian tax authorities take into account the events, situations and economic relationships that are actually carried out by the taxpayers.

If the Peruvian tax authorities identify a tax-avoidance case, it may demand payment of the omitted tax debt or decrease the amount of any credits, net operating losses or other tax benefits obtained by the taxpayer.

In addition, the rule establishes specific requirements to determine whether a taxpayer intended to avoid all or part of a taxable event or reduce the tax base or tax liability.

Also, if the Peruvian tax authorities determine that the taxpayer executed sham transactions, it applies the appropriate tax rules to such acts.

The GAAR is applicable for tax audits reviewing facts, acts and situations from 19 July 2012 and thereafter. The regulations establish the following non-exhaustive list of situations in which a tax auditor can apply the Peruvian GAAR:

- Acts, situations and business relationships in which there is no connection between the benefits and associated risks, or low or no profitability
- Transactions conducted that are not at fair market value or have no economic rationale
- Acts, situations and business relationships that are not related to the ordinary operations in achieving the desired legal, economic or financial effects
- The use of “non-business structures” to conduct business activities, instead of business structures

- Corporate restructures or corporate reorganizations with no economic substance
- Acts or operations with countries and jurisdictions that are considered tax havens or noncooperative jurisdictions
- Zero-value or low-cost transactions or the use of structures that minimize costs or nontaxable profits for the parties involved
- The use of unusual legal and business structures, acts or contracts that contribute to the deferral of profits and income or the anticipation of expenses, costs or losses

Legal representatives will be jointly liable for the tax debt when the GAAR is applied, provided that the legal representatives have collaborated with the design or implementation of the acts challenged by the Peruvian tax authorities using the GAAR.

For entities having a board of directors, the board of directors will be responsible for approving the entity's tax planning; this obligation cannot be delegated.

The board of directors must evaluate the tax planning implemented up to 14 September 2018 in order to ratify or modify the plan; the period for ratifying or modifying the tax plan will end on 29 March 2019.

To apply the GAAR in tax audits, the Peruvian tax authorities must follow a special procedure that requires the auditor to send the case to the Revision Committee, which will notify the taxpayer of a hearing; the Revision Committee's opinion is issued within 30 days after the hearing, and the opinion is binding for the Peruvian tax authorities.

Domestic reorganizations. Under the existing Income Tax Law, domestic reorganizations are subject to a tax-free regime, to the extent that the basis of the assets included in the reorganization is kept at historical value. A law, which is effective from 1 January 2013, maintains this regime but establishes a minimum holding period in cases of spin-off reorganizations. The law states that the shareholders of the company being spun off that receive shares in the company to which the assets are contributed must keep the shares of the latter company until the closing of the next fiscal year following the reorganization. If the shares are transferred before that time, the underlying assets are deemed to be transferred by the acquiring company at market value. The tax is determined by the difference between the historic tax basis and the market value. In addition, the shareholder selling the shares is subject to the ordinary capital gains tax.

Ultimate beneficial ownership. Peruvian entities and nonresidents are required to disclose the individuals who are the ultimate beneficial owners to the Peruvian tax authority.

The following entities are required to report and identify their ultimate beneficial owners:

- Peruvian entities incorporated in Peru
- Nonresident entities provided one of the following requirements is met:
 - The foreign entity has a branch or permanent establishment in Peru.

- The foreign fund or foreign trust is managed by a Peruvian administrator, either an entity or an individual.
- One party of a consortium is a Peruvian resident.

Ultimate beneficial owners are determined by the following criteria:

- **Property:** an individual holds a minimum of 10% of an entity's capital directly or indirectly
- **Control:** an individual who, directly or indirectly, has the ability to appoint or remove the majority of the administrative, management or supervisory organs of the legal entity and has the decision-making capacity with respect to the financial, operational and/or commercial agreements of the legal entity

If it is not possible to determine the ultimate beneficial owner based on the criteria, the ultimate beneficial owner is deemed to be the individual occupying the higher administrative position, such as the general manager or a member of the board of directors.

F. Tax treaties

Peru has entered into double tax treaties with Brazil, Canada, Chile, Japan, Korea (South), Mexico, Portugal and Switzerland. It has also signed an agreement to avoid double taxation with the other members of the Andean Community (Bolivia, Colombia and Ecuador) under which the exclusive right to tax is granted to the source country. The following is a table of treaty withholding tax rates.

	Dividends %	Interest %	Royalties %
Brazil	10/15 (a)	15	15
Canada	10/15 (a)	15	15
Chile	10/15 (a)	15	15
Japan (b)	10	10	15
Korea (South)	10	15	10/15
Mexico	10/15 (a)	15	15
Portugal	10/15 (a)	10/15	10/15
Switzerland	10/15 (a)	10/15	10/15
Non-treaty jurisdictions	5 (c)	4.99/30 (c)	30

- (a) The dividends tax rate may vary depending on the percentage of the direct or indirect ownership of the beneficiary in the payer company.
- (b) On 30 December 2020, Peru ratified the double tax treaty with Japan through Supreme Decree 060-2020-RE. Japan received from Peru the notification confirming that its internal procedures necessary for the entry into force of the double tax treaty were completed. As a result, all of the necessary procedures for the entry into force of the treaty have been completed and the treaty entered into force on 29 January 2021 (the 30th day after the date of receipt of the latter notification), and beginning 1 January 2022 the treaty is effectively applicable.
- (c) See Section B.

A. At a glance

Corporate Income Tax Rate (%)	20/25 (a)
Capital Gains Tax Rate (%)	
Real Property	6 (a)
Shares	15 (b)
Branch Income Tax Rate (%)	25 (c)
Withholding Tax (%)	
Dividends	
Nonresident Foreign Corporations	15/25 (d)
Domestic Corporations and Resident Foreign Corporations	0 (e)
Interest on Peso Deposits	20 (f)
Royalties from Patents, Know-how, etc.	20 (g)
Branch Profits Remittance Tax	15

Net Operating Losses (Years)

Carryback	0
Carryforward	3/5 (h)

- (a) See Section B.
- (b) A uniform 15% rate on net capital gains applies to capital gains on shares in domestic corporations not traded on a local stock exchange. See *Capital gains* in Section B for further details and for the rates applicable to gains derived from sales of shares traded on a local stock exchange.
- (c) Certain types of Philippine-source income of foreign corporations are taxed at preferential rates (see Section B).
- (d) As a general rule, the withholding tax on dividends paid to a nonresident foreign corporation is 25%, which can be reduced to 15% under certain conditions.
- (e) Under domestic law, dividends paid to domestic corporations or resident foreign corporations are not subject to tax.
- (f) The final withholding tax rate for interest on peso deposits derived by domestic and resident foreign corporations is 20%. For preferential rates under tax treaties for nonresident foreign corporations, see Section F. For preferential rates on interest derived from foreign-currency deposits, see Section B. Final withholding tax rates on interest income can range from 0% to 20% on foreign loans or peso deposits or yields on deposit substitutes. On the other hand, the creditable withholding tax on interest income derived by a domestic corporation or resident foreign corporation from a debt instrument that is not a deposit substitute is 15%.
- (g) Under domestic law, if the recipient is a nonresident foreign corporation, the final withholding tax rate is 25%. For reduced rates under tax treaties for nonresident foreign corporations, see Section F.
- (h) See Section C.

Republic Act No. 11534, otherwise known as the "Corporate Recovery and Tax Incentives for Enterprises Act" or CREATE, amended several sections of the National Internal Revenue Code. Although CREATE took effect on 11 April 2021, several provisions were made to retroactive to 1 July 2020 or 1 January 2021, as described below.

B. Taxes on corporate income and gains

Corporate income tax. Domestic corporations are taxed on their worldwide net taxable income. Domestic corporations are corporations incorporated under the laws of the Philippines. Resident foreign corporations are taxed on net taxable income derived from the Philippines, and nonresident foreign corporations are taxed on gross income derived from the Philippines. A resident foreign corporation (a branch) is one created under foreign laws and engaged in trade or business in the Philippines. Any other foreign corporation is considered a nonresident.

Rates of corporate tax. CREATE subjects domestic and resident foreign corporations to regular corporate income tax (RCIT) at a rate of 25% beginning 1 July 2020. For domestic corporations with net taxable income not exceeding PHP5 million and total assets (excluding land on which plant and offices are located) not exceeding PHP100 million, the RCIT rate is 20%. In general, nonresident foreign corporations are subject to a 25% tax on income from Philippine sources beginning 1 January 2021.

Subject to certain exceptions, a Minimum Corporate Income Tax (MCIT) may be imposed on domestic and resident foreign corporations beginning with the fourth tax year following the year of commencement of business operations. The MCIT must be paid if the corporation has zero or negative taxable income or if the MCIT is greater than the regular corporate income tax liability. CREATE imposes a 1% MCIT from 1 July 2020 until 30 June

2023. After such period, the MCIT rate reverts to 2%, which was the rate applicable prior to 1 July 2020.

Philippine-source income of foreign corporations taxed at preferential rates includes the following.

Type of income	Rate (%)
Interest income of domestic corporations and resident foreign corporations from peso bank deposits and yields or other monetary benefits from deposit substitutes and from trust funds or similar arrangements	20
Interest income of domestic corporations and resident foreign corporations from depository banks under the expanded foreign-currency deposit system	15
Income of nonresidents from transactions with depository banks under the expanded foreign-currency deposit system	0
Royalties derived by resident foreign corporations from sources in the Philippines	20
Gross Philippine billings of international carriers doing business in the Philippines	2.5
Taxable income of regional operating headquarters (ROHQs) of multinational companies engaged in the following: general administration and planning services, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance and advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, and business development (also next paragraph)	10/25
Rentals, charter fees and other fees derived by nonresident owners or lessors of vessels chartered by Philippine nationals	4.5
Rentals, charter fees and other fees derived by nonresident lessors of aircraft, machinery and other equipment	7.5
Gross income of nonresident cinematographic film owners, lessors or distributors	25
Interest on foreign loans	20

CREATE eliminated the preferential tax rates applicable to Offshore Banking Units (OBUs) and their transactions. ROHQs will be subject to the RCIT of 25% beginning 1 January 2022. ROHQs are subject to 10% income tax prior to such date.

Under CREATE, qualified domestic market and export enterprises may be registered with Investment Promotion Agencies, and in general, these may be granted an income tax holiday for a period not longer than seven years. Thereafter, the registered enterprise may enjoy either of the following:

- 5% special corporate income tax based on gross income in lieu of national and local taxes

- Enhanced deductions for corporate income tax for a period not longer than 10 years.

In addition, the registered enterprise may enjoy duty-free exemption on importation of capital equipment and raw materials, and/or value-added tax (VAT) exemption on importation, and zero-rated VAT on local purchases. Enterprises with incentives prior to the effectivity of CREATE can opt to avail of a sunset period of 10 years subject to certain conditions or to apply for CREATE incentives

Profits remitted by a branch to its head office are subject to a 15% tax. This tax is imposed on the total profits remitted, or earmarked for remittance, without deduction of tax. The tax does not apply to profits from activities registered with the Philippine Economic Zone Authority (PEZA). Dividends, interest, royalties, rent and similar income received by a foreign corporation from sources in the Philippines are not treated as branch profits unless they are effectively connected with the conduct of a trade or business in the Philippines.

Capital gains. A 6% tax is imposed on capital gains presumed to have been derived from the sale, exchange or disposition of land or buildings classified as capital assets for domestic corporations. The tax is applied to the gross selling price or the fair market value, whichever is higher.

Net capital gains derived from the sale of shares of domestic corporations not traded on the Philippine Stock Exchange are subject to 15% capital gains tax.

If the shares are listed and traded through the facilities of the Philippine Stock Exchange, the tax is 0.6% of the gross selling price.

There is no longer any tax imposed on the sale, barter, exchange or other disposition through an initial public offering of shares of stock (IPO Tax) because Republic Act No. 11494 (Bayanihan to Recover as One Act) deleted the National Internal Revenue Code provision imposing such IPO Tax.

Administration. A corporation may use the calendar year or a fiscal year as its tax year.

Corporations must file quarterly returns within 60 days from the close of each of the first three quarters of the tax year, and a final or adjusted return on or before the 15th day of the fourth month following the close of the tax year. The corresponding tax is paid at the time the return is filed.

Dividends. Dividends received by a domestic or resident foreign corporation from a domestic corporation are not subject to tax. If the recipient is a nonresident foreign corporation, the 25% tax under CREATE may be reduced to 15% if any of the following circumstances exists:

- The country of domicile of the recipient does not impose any tax on offshore or foreign-source income.
- The country of domicile of the recipient allows a credit for taxes deemed paid in the Philippines equal to 15%, which

represents the difference between the corporate income tax rate and the 15% preferential tax on dividends.

- The dividend is not taxed in the recipient's country of domicile.

Under CREATE, dividends received by a domestic corporation from a foreign corporation are exempt from income tax if these are reinvested in the domestic corporation's business operations in the Philippines to fund working capital requirements, capital expenditures, dividends, investment in domestic subsidiaries and infrastructure projects, within the next tax year from the receipt of the dividends. The domestic corporation must have directly held at least 20% of the outstanding shares of the foreign corporation for at least two years at the time of the dividend distribution.

Foreign tax relief. For domestic corporations, tax credits are allowed for income taxes paid or accrued to any foreign country, subject to certain limitations. Alternatively, such income taxes may be claimed as a deduction from taxable income. Resident foreign corporations are not allowed to credit tax paid to foreign countries against Philippine income.

C. Determination of trading income

General. The computation of income for income tax purposes must be in accordance with the accounting method regularly employed in maintaining the taxpayer's books of account, provided that method clearly reflects income.

Other allowable deductions include the usual, ordinary and necessary business expenses, such as interest, taxes, losses, bad debts, charitable and other contributions, and contributions to a pension trust. All of these expenses are required to be directly attributable to the development, management, operation or conduct of a trade or business in the Philippines.

The deduction for interest expense is reduced by an amount equal to 20% of interest income that has been subject to final tax under CREATE. Interest incurred to acquire property used in a trade or business may be claimed as a deduction or treated as a capital expenditure.

Research and development expenses that are paid or incurred during the tax year in connection with a trade or business and that are not chargeable to a capital account or treated as deferred expenses may be claimed as deductible expenses.

Inventories. Inventory valuation must conform as nearly as possible to the best accounting practice in the trade or business and must clearly reflect income. The most commonly used methods of inventory valuation are cost and the lower of cost or market.

Tax depreciation. Taxpayers may deduct a reasonable allowance for exhaustion and wear and tear (including obsolescence) of property used in a trade or business. The depreciation method used must be reasonable and generally accepted in the particular industry. Depreciation methods that are generally acceptable include the straight-line method, declining-balance method, the sum-of-the-years' digits method or any other method that may be prescribed

by the Secretary of Finance. Resident foreign corporations may claim depreciation only on property located in the Philippines.

Relief for losses. Net operating losses may be carried forward three years to offset future income in those years. Net operating losses incurred during the 2020 and 2021 tax years may be carried forward five years to offset future income pursuant to Republic Act No. 11494. A net operating loss is defined as the excess of allowable deductions over gross income in a tax year. Net losses may not be carried forward if the losses are incurred in a year in which a corporation is exempt from income tax or if a substantial change of ownership occurs.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); imposed on all persons who, in the course of their trade or business, sell, barter, exchange or lease goods or properties (including intangible personal properties and real properties), render services or import goods; services rendered in the Philippines by nonresident foreign persons are deemed to be rendered in the course of trade or business; specific goods and transactions are exempt; in general, exports of goods and services are subject to a 0% rate	12%
Fringe benefit tax; applied to the grossed-up monetary value of fringe benefits received by managerial and supervisory employees; the grossed-up monetary value is determined by dividing the monetary value of the benefit by 65%; the employer must withhold the tax and pay it to the tax authorities; the tax does not apply if the benefit is required for or is necessary to the trade or business of the employer or if the benefit is granted for the convenience of the employer; this tax is considered to be a final tax	
General rate	35%
Benefits paid to nonresident alien individuals who are not engaged in a trade or business in the Philippines (monetary value of benefit is divided by 75%)	25%
Documentary stamp tax	
Original issue of all debt instruments; imposed on issue price	PHP1.50 per PHP200
Original issue of stock certificates; imposed on the par value or the consideration if no par value	PHP2 per PHP200
Transfer that is not made through a local stock exchange	PHP1.50 per PHP200

Nature of tax	Rate
Bills of exchange or drafts; imposed on the face value	PHP0.60 per PHP200
Other specified transactions and documents	Various

E. Miscellaneous matters

Foreign-exchange controls. The Philippines has adopted liberal foreign-exchange policies. In general, no restrictions are imposed on the repatriation of capital, profits or income earned in the Philippines. Foreign loans and foreign investments may be registered with the Philippine Central Bank (BSP). Only loans registered with the BSP are eligible for servicing through the use of foreign exchange purchased from the banking system. However, the registration of a foreign investment is required only if the foreign exchange needed to service the repatriation of capital and the remittance of dividends, profits and earnings is sourced in the banking system.

Transfer pricing. The method used by a corporation to fix prices must be consistent worldwide.

The Bureau of Internal Revenue (BIR) issued Revenue Regulations 2-2013 on Transfer Pricing (TP Regulations) in January 2013. These regulations are largely based on the arm's-length methodologies prescribed by the Transfer Pricing Guidelines of the Organisation for Economic Co-operation and Development (OECD). The following are significant aspects of the TP Regulations:

- They implement the authority of the Commissioner of Internal Revenue under Section 50 of the National Internal Revenue Code to review controlled transactions among associated enterprises and to allocate or distribute their income and deductions to determine their appropriate revenues and taxable income.
- They provide the methods of establishing an arm's-length price.
- They require the maintenance and safekeeping of the documents necessary for the taxpayer to prove that efforts were exerted to determine the arm's-length price. The TP Regulations apply to both cross-border and domestic transactions between associated enterprises.

In relation to the TP Regulations, the BIR issued Revenue Regulations No. 19-2020, as amended by Revenue Regulations No. 34-2020, which requires the submission of a Related Party Transaction form with the annual income tax return. Relevant transfer-pricing documentation and other supporting documents must be submitted to the BIR on request during the course of a tax audit.

Related-party transactions. Related-party transactions must comply with the arm's-length standard. Under certain conditions, a deduction may not be claimed for losses on sales or exchanges of properties or for interest incurred on transactions between related parties. The BIR Commissioner may reallocate gross income or deductions among related entities to prevent manipulation of reported income.

F. Treaty withholding tax rates

The table below lists the maximum withholding rates for dividends, interest and royalties provided under the treaties. Most of the treaties require that the recipient be the beneficial owner of the income for the preferential rates to apply. The BIR now requires the submission of a Certificate of Residence for Tax Treaty Relief (CORTT) form to the Philippine payer of dividends, interest or royalties in order to benefit from a preferential treaty rate for these types of income payments. The beneficial owner must certify that the information supplied in the CORTT form is true, correct and complete, and the competent authority of the country of domicile of such beneficial owner must sign the CORTT form or issue a separate certificate of tax residence. All other claims for a tax exemption or a preferential withholding tax rate under a tax treaty still require the filing of a tax treaty relief application.

- (a) The rate is 15% if a rebate or credit is granted to the recipient.
- (b) The rate is 10% if the interest is paid with respect to public issues of bonds, debentures or similar obligations (under the United States treaty, with respect to public issues of bonded indebtedness). Under the Austria, Japan and Korea (South) treaties, the 10% rate also applies to interest paid by a Board of Investments (BOI)-registered preferred pioneer enterprise. Under the India treaty, the 10% rate also applies to interest paid to financial institutions, including insurance companies. Under the new treaty with Thailand, the rate is 10% if the interest is received by a financial institution (including an insurance company) and 15% in all other cases.
- (c) The rate is 10% (Austria, Japan, Korea (South), Netherlands and Spain) or 15% (Australia, Finland, Indonesia, Italy, Malaysia, New Zealand, Pakistan, Singapore, the United Kingdom and the United States) for royalties paid by a BOI-registered preferred enterprise (under the Austria, Japan and Korea (South) treaties, the enterprise must be a pioneer enterprise). The 15% rate also applies to royalties paid with respect to cinematographic films or tapes for television or broadcasting under the treaties with Finland, Italy, Japan, Malaysia, Singapore, Turkey and the United Kingdom. Under the Spain treaty, the rate is 20% for such royalties. Under the Finland treaty, the rate is also 15% for royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works. Under the new treaty with Thailand, the rate is 15% for the alienation of or the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films, or films or tapes used for radio or television broadcasting, patents, trademarks, designs or models, plans or secret formulas or processes, for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.
- (d) The rate is 10% (Canada, Japan, Norway, and the United Kingdom, 15%) if the recipient holds 10% (Romania, 25%) of the voting shares of the payer corporation. Under the treaties with Austria and Japan, the rate is also 10% if the payer holds 10% (Japan, 25%) of the total shares issued by the payer during the six months immediately preceding the dividend payment date. Under the Japan treaty, the rate is also 10% if the dividends are paid by a BOI-registered pioneer enterprise. Under the Romania and Spain treaties, the 10% rate does not apply to partnerships. Under the treaty with Romania, the shares must have been owned for at least two years preceding the date of the dividend payment.
- (e) This rate is subject to the "most-favored-nation" provision of the treaty.
- (f) The rate is 10% if the recipient of the dividends holds directly at least 10% of the capital of the payer. Under the treaties with Bahrain, Israel, Kuwait, Qatar, Switzerland and the United Arab Emirates, partnerships do not qualify for the 10% rate. Under the treaty with the United Arab Emirates, the dividends are exempt from tax if the beneficial owner of the dividends is the government of a contracting state, a local government, a political subdivision, a local authority or any of their governmental institutions or entities.
- (g) The 25% rate applies to royalties paid for the use of, or the right to use, trademarks, cinematographic films, or films or tapes for television or radio broadcasting. A 15% rate applies to other royalties. Under the treaty with Sri Lanka, the rate is 15% if the royalties are paid by an enterprise registered with and engaged in preferred areas of activities in the Philippines, and 25% in all other cases.
- (h) This rate applies if the interest payments or royalties are taxable in Canada.
- (i) A 15% rate applies if the recipient is a company (under the Brazil treaty, a partnership also qualifies). The 25% rate applies in all other cases. Under the Malaysia treaty, the recipient must be subject to tax in Malaysia. Under the treaty with Sri Lanka, the rate is 15% if the beneficial owner is a company (excluding partnerships), and 25% in all other cases.
- (j) The rate is 15% for royalties paid with respect to cinematographic films and tapes for television or broadcasting. The rate is 10% if the payer is registered with the BOI as a preferred pioneer enterprise.

- (k) The rate is 10% (Hungary and Indonesia, 15%) if the recipient holds directly at least 25% of the capital of the payer. Under the treaties with Bangladesh, Denmark, Germany, Korea (South), Poland, Sweden, Turkey and Vietnam, a partnership does not qualify for the 10% rate. Under the Korea (South) treaty, the 10% rate also applies if the dividends are paid by a BOI-registered preferred pioneer enterprise. The new treaty with Germany provides for a withholding tax of 15% on dividends, which is reduced to 10% or 5% if the beneficial owner is a company other than a partnership and if the following additional condition is satisfied:
- The beneficial owner holds directly at least 25% of the capital of the company paying the dividends (rate reduced to 10%).
 - The beneficial owner holds directly at least 70% of the capital of the company paying the dividends (rate reduced to 5%). Under the treaty with Mexico, the withholding tax on dividends is 15%, which is reduced to 5% or 10% if the beneficial owner is a company (other than a partnership) and if the following additional conditions are satisfied:
 - The beneficial owner holds directly at least 70% of the capital of the company paying the dividends (rate reduced to 5%).
 - The beneficial owner holds directly at least 10% of the capital of the company paying the dividends (rate reduced to 10%).
- (l) The rate is 10% for interest paid with respect to sales on credit of industrial, commercial or scientific equipment or with respect to public issues of bonds, debentures or similar obligations. Under the Netherlands treaty, the 10% rate also applies to interest on bank loans. Under the new Germany treaty, the withholding tax rate on interest is 10%, but no withholding tax applies if any of the following circumstances exist:
- The interest is paid in connection with the sale of commercial or scientific equipment on credit.
 - The interest is paid in connection with the sale of goods by an enterprise to another enterprise on credit.
 - The interest is paid in consideration of a loan guaranteed by the Federal Republic of Germany with respect to an export or foreign direct investment or it is paid to the government of the Federal Republic of Germany, the Deutsche Bundesbank, the Kreditanstalt für Wiederaufbau or the DEG mbH.
- (m) Under the new treaty with Germany, the withholding tax on royalties is 10%, and the term “royalties” means payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematographic film, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience. The term “royalties” also includes payments of any kind for the use of or the right to use a person’s name, picture, or any other similar personality rights and payments received as consideration for the registration of entertainers’ or sportspersons’ performances by radio or television.
- (n) The rate is 15% if the recipient held 25% of the capital of the payer during the two tax years preceding the year of the dividend payment. Partnerships do not qualify for the 15% rate.
- (o) The rate is 15% if the beneficiary of the dividends owns at least 10% of the shares of the payer. Under the new treaty with Thailand, the rate is 10% if the beneficial owner is a company (excluding partnerships) that holds directly at least 25% of the capital of the paying company, and 15% in all other cases.
- (p) The rate is 10% (India, 15%) if the Philippine payer is registered with the BOI (under the Norway treaty, the enterprise must be a preferred pioneer enterprise). Under the Norway treaty, the rate is 7.5% for payments for the use of containers.
- (q) Under the treaty with Romania, the rate is 10% for interest paid with respect to sales on credit of industrial, commercial or scientific machines or equipment; bank loans; or public issues of bonds, debentures or similar obligations. Under the treaty with the United Arab Emirates, interest is exempt from tax if it is derived with respect to a loan made, guaranteed or insured by the government of the other contracting state or a political subdivision, local authority or local government, including financial institutions wholly owned by the government or any other instrumentality, as agreed by the contracting states. Under the treaty with Nigeria, interest is exempt if it is derived and beneficially owned by the government of the other contracting state or a local authority thereof or an agency or instrumentality of that government or local authority. Under the treaty with Kuwait, the interest is exempt in the following circumstances:
- It is derived by the government of the other contracting state or a governmental institution or other entity thereof as defined in Paragraph 2 of Article 4 of the treaty.

- It is derived by an institution or company that is a resident of the other contracting state, and the institution or company's capital is wholly owned by the government or a governmental institution or other entity thereof, as defined in Paragraph 2 of Article 4 of the treaty and as agreed to by the competent authorities of the two governments.
 - It is paid on loans guaranteed by the government of the other contracting state or a governmental institution or other entity thereof, as defined in paragraph 2 of Article 4 of the treaty.
- (r) The 15% rate (France, 10%; United States, 20%) applies if the recipient holds at least 10% (Singapore, 15%) of the voting shares of the payer. Under the Finland and France treaties, partnerships do not qualify for the 10% rate. Under the Singapore and United States treaties, the shares must have been owned for at least two tax years preceding the year of the dividend payment.
- (s) The 15% rate applies to royalties for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. A 10% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas or processes
 - The use of, or the right to use, industrial, commercial or scientific equipment
 - Information concerning industrial, commercial or scientific experience
- (t) This rate applies to royalties paid for the use of, or the right to use, copyrights of literary, artistic or scientific works, including cinematographic films or tapes for television or broadcasting. The rate is 10% for other royalties.
- (u) The 15% rate applies to royalties paid for the use of, or the right to use, copyrights of cinematographic films, and films or tapes for television or radio broadcasting. A 10% rate applies to royalties paid for the following:
- The use of, or the right to use, copyrights of literary, artistic or scientific works, with certain exceptions
 - The use of, or the right to use, patents, trademarks, designs or models, plans, or secret formulas or processes
 - The use of, or the right to use, industrial, commercial or scientific equipment
 - Information concerning industrial, commercial or scientific experience
- (v) A preferential rate of 15% under the National Internal Revenue Code may apply if the recipient's country of domicile allows a credit for taxes deemed paid in the Philippines equal to 15%. This credit represents the difference between the RCIT of 25% and the 15% preferential rate. The 15% rate also applies if the dividend is not taxed in the recipient's country of domicile.
- (w) Under Philippine domestic law, interest on foreign-currency deposits of non-residents is exempt from tax.
- (x) The rate is 12.5% if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the paying company.
- (y) See Section A.

Because of the rapidly changing regulatory framework in Poland, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	5/9/19 (a)
Capital Gains Tax Rate (%)	19
Branch Tax Rate (%)	19
Withholding Tax (%)	
Dividends	19 (b)(c)
Interest	20 (d)(e)
Royalties	20 (d)(e)
Services	20 (f)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	5 (g)

- (a) The preferential 5% tax rate applies to “qualified income” obtained from the qualifying intellectual property (IP) created, developed or improved by a taxpayer as part of its research and development (R&D) activity. The reduced 9% corporate income tax rate on income other than income from capital gains applies to small taxpayers whose revenue from sales did not exceed the zloty (PLN) equivalent of EUR2 million in the preceding year (gross, including value-added tax [VAT]) and in the current year (net, excluding VAT).
- (b) This tax is imposed on dividends paid to residents and nonresidents.
- (c) This rate may be reduced by a tax treaty, or under domestic law, if certain conditions are met (see Section B).
- (d) This rate applies only to interest and royalties paid to nonresidents.
- (e) The tax rate may be reduced by a tax treaty or under domestic law if certain conditions are met (see Section B).
- (f) This withholding tax applies only to service payments made to nonresidents.
- (g) No more than 50% of the original loss can be deducted in one year unless the loss is below PLN5 million. Tax losses can reduce taxable income only from the same income source.

B. Taxes on corporate income and gains

Corporate income tax. Resident companies (including companies in the process of incorporating or registering) are subject to corporate tax on their worldwide income and capital gains. Nonresident companies are taxed only on income earned in Poland. For corporate income tax purposes, Polish-source income includes income (revenue) from, among others, the following:

- Activities conducted in Poland, including activities of foreign permanent establishments located in Poland

- Real estate located in Poland or rights resulting from such real estate (including sales of real estate or related rights)
- Transfers of shares (stocks), participation rights in partnership profits, investment fund certificates as well as receivables connected with those rights, if real estate located in Poland, directly or indirectly, accounts for at least 50% of the total value of the assets
- Transfer of ownership of shares (stocks), all rights and obligations, participation titles or rights of a similar nature in a real estate company
- Securities and derivatives listed on a stock exchange in Poland, including income (revenue) from the sales or execution of resulting rights
- Receivables settled by Polish taxpayers, regardless of the place where the agreement was concluded or where the agreed action was performed

A company is resident in Poland for tax purposes if it is incorporated in Poland or managed in Poland. For this purpose, the concept of management is broadly equivalent to the effective management test in many treaties. The definition of management was amended as of 1 January 2022. A branch of a nonresident company is generally taxed according to the same rules as a Polish company. Partnerships (civil law partnerships and general partnerships with some exceptions) are tax transparent except for foreign partnerships that are treated in their countries as taxpayers subject to corporate income tax. Polish limited joint-stock partnerships are treated as corporate income tax taxpayers. From 1 January 2021, under an amending law, limited partnerships are treated as corporate income taxpayers (that is, eliminating tax transparency of such entities). In a similar manner, general partnerships are subject to corporate income tax in Poland if partners (who are not exclusively natural persons) in such a partnership are not disclosed to the tax authorities. The limited partnerships are able to decide whether the new regulations imposing the corporate income taxpayer status will apply from 1 January 2021 or from 1 May 2021.

Income from an overseas permanent establishment of a Polish resident company is taxable in Poland, subject to tax treaties.

Tax rates. The general corporate income tax rate is 19%. In the limited cases mentioned below, the rate is 5% or 9%.

5% tax rate for qualifying IP activity. Effective from 1 January 2019, an Innovation Box Regime (IBR) is introduced. The IBR is aimed at incentivizing innovative R&D activities by taxing profits from qualifying IP rights at a preferential 5% tax rate.

The preferential 5% tax rate applies to the “qualified income” derived from qualifying IP created, developed or improved by a taxpayer as part of its R&D activity covering the following:

- Patents
- Extensions of patent protection
- Protected utility models
- Registered industrial designs
- Registered topographies of integrated circuits
- Extensions of patent protection for medicinal products and plant protection products

- Registered medicinal and veterinary products admitted to trading
- Registered new varieties of plants and animal breeds
- Rights to computer programs protected under national or international law

The amount that is subject to the preferential 5% tax rate (the qualified income amount) corresponds to the amount calculated as the income obtained from the qualifying IP right multiplied by a ratio established in accordance with a particular formula based on the Organisation for Economic Co-operation and Development (OECD) recommendations. From 1 January 2022, it is possible to apply both the IP Box Regime and R&D credit.

Nine percent tax rate for small entities. Effective from 1 January 2019, a reduced 9% corporate income tax rate on income other than income from capital gains has been introduced, replacing the prior reduced 15% tax rate. Broadly, the reduced rate applies on the condition that an entity is a small taxpayer (its revenues in a given and preceding year do not exceed the equivalent of EUR2 million).

The 9% corporate income tax rate does not apply to taxpayers that were created as a result of certain restructuring activities including, among others, mergers, spin-offs (demergers), transformations (except transformations that do not change the status for corporate income tax purposes; that is, both prior and after the transformation the entity remains a corporate income tax taxpayer) and contributions in-kind (including contributions of an organized part of an enterprise; that is, a going concern).

Minimum tax on corporate taxpayers. The minimum revenue-based corporate income tax is levied on taxpayers to whom the following applies to in a given tax year:

- They incurred tax losses within an operating income basket.
- They reported a tax-profitability ratio (in an operating income basket) below 1%.

However, for the purpose of calculating the above, costs incurred for an acquisition or improvement of fixed assets (also depreciation write-offs) are not taken into account. For the purposes of calculating the minimum tax, revenues and costs related to the transactions in which the price or the method of determining the price of the subject of the transaction results from the provisions of laws or normative acts are not taken into account.

The tax is calculated as 10% of the sum of the following (subject to some deductions):

- 4% of operating revenues (that is, tax revenue other than from capital transactions)
- Part of the related-party debt financing costs exceeding a specific threshold.
- Deferred tax asset derived from the revealing for tax purposes an intangible asset resulting in an increase of gross profits or a decrease of gross losses
- Part of the costs of services (that is, advisory, marketing, management and control, insurance and guarantees), royalty payments incurred (also indirectly) for the benefit of related parties exceeding a specific threshold.

The rules provide for certain exceptions from this new tax for new taxpayers (in their first, second and third tax year of operations), financial institutions, taxpayers with revenues lower than at least 30% of revenues earned in the previous tax year, and taxpayers with no subsidiaries of any kind and whose only shareholders (stockholders) are natural persons. The revenue-based minimum corporate income tax is deductible from the regular annual corporate income tax due in Poland.

Further changes are planned with respect to the application of minimum tax, including postponing the effective date of the new minimum tax to 1 January 2023 (or until the end of a taxpayer's tax year that started during 2022).

New tax incentives package. From 1 January 2022, a new tax incentives package entered into force. It includes the following measures:

- Significant enhancement of the existing (R&D) relief and IP Box regime: a possible deduction of additional 200% employment costs for those involved in an R&D activity
- Relief for innovative employees: reduction of monthly personal income tax advances by a portion of a non-utilized R&D deduction, for companies whose low or lack of operating income prohibits them from fully applying the R&D relief
- Relief for “robotization:” deduction of additional 50% of costs of brand new industrial robots, their machines and peripheral devices, and intangible assets to use these robots, including related training services
- Relief for prototypes: deduction of 30% of costs of trial production of a new product and of introducing it to the market (up to 10% of operating income)
- Relief for business expansion and consolidation (deduction of up to PLN250,000 annually) and initial public offerings (including advisory costs to some extent)

Capital gains. Effective from 1 January 2018, capital gains constitute a separate revenue “basket” from other sources of revenue. Capital gains include, among others, the following:

- Revenues from sharing in profits of legal entities, including, among others, the following:
 - Dividends
 - Revenues from redemption of shares (stock)
 - Proceeds from liquidation of a company
 - Profits of a company designated to increase its share capital as well as amounts transferred from other capital of a company to increase its share capital
 - Additional payments received in connection with a merger or demerger of a company by entities that have the right to share in profits of that company
 - Revenues derived by a shareholder of a demerged company, if property taken over as a result of the demerger or a property remaining at the level of a demerged company does not constitute an organized part of the business
 - Additional payments received in connection with an exchange of shares
 - Undivided profits and profits designated to capital other than share capital in a transformed company in the case of its transformation into a partnership
 - Interest from certain profit-participation loans

-
- Revenues from transformations, mergers or demergers
 - Revenues derived as a result of liquidation of a partnership, exiting such an entity or decreasing the interest in it, if Poland loses the right to tax income from the disposal of the acquired assets
 - Revenues from a contribution in kind to a company
 - Revenues from shares in a company other than those mentioned above, including the following:
 - Revenues from the disposal of shares (including disposal of shares as a part of a redemption process)
 - Revenues from an exchange of shares
 - Revenues from the disposal of an interest in a partnership
 - Revenues from the disposal of receivables acquired by a taxpayer and receivables connected with revenues treated as capital gains
 - Revenues from the following:
 - Certain property rights (including copyrights, licenses, industrial property rights and know-how), excluding revenues from licenses directly connected with revenues not treated as capital gains
 - Securities and derivatives, excluding derivatives hedging revenues or costs that are not treated as capital gains
 - Participations in investment funds or institutions for common investments
 - Renting or disposal of the above rights

In general, taxable income from a given source should be calculated as the difference between taxable revenues from that source and tax-deductible costs connected with that source of income. Taxable income or loss should be calculated separately for capital gains and for other sources of income. Capital losses do not offset income from other sources and vice versa.

Capital gains derived by nonresidents from sales and other disposals of state bonds issued on foreign markets may be effectively exempt from tax in Poland under domestic regulations if certain conditions are satisfied.

Administration. The Polish tax year must last 12 consecutive months, and it is usually the calendar year. However, a company can choose a different period of 12 consecutive months as its tax year by notifying the relevant tax office by certain deadlines. The first tax year after a change must extend for at least 12 months, but no longer than 23 months. If a company incorporated in the first half of a calendar year chooses the calendar year as its tax year, its first tax year is shorter than 12 months. A company incorporated in the second half of a calendar year may elect a period of up to 18 months for its first tax year (that is, a period covering the second half of the year of incorporation and the subsequent year).

In general, companies must pay monthly advances based on preliminary income statements. Monthly declarations do not need to be filed. In certain circumstances, a company may benefit from a simplified advance tax payment procedure.

Companies must file an annual income tax return within three months after the end of the company's tax year. They must pay any balance of tax due at that time. From 2023, there will be an

obligation to provide an electronic version of accounting books to the tax authorities.

An overpayment declared in an annual tax return is refunded within three months. However, before the overpayment is refunded, it is credited against any past and current tax liability of the company. If the company has no tax liability, it may request that the tax office credit the overpayment against future tax liabilities or refund the overpayment in cash. Overpayments earn interest at the same rate that is charged on late payments. Under the tax code, the rate of penalty interest on unpaid taxes varies according to the fluctuation of the Lombard credit rate. The interest rate on tax arrears is 200% of the Lombard credit rate, plus 2%. It cannot be lower than 8%. The penalty interest rate was 8% on 1 January 2022.

Dividends. A 19% withholding tax is imposed on dividends and other profit distributions (other revenues from sharing in profits of legal entities) paid to residents and nonresidents, subject to provisions of double tax treaties and the European Union (EU) Parent-Subsidiary Directive. Resident recipients do not aggregate domestic dividends received with their taxable income subject to the regular rate. For nonresident recipients, the withholding tax is considered a final tax and, accordingly, the recipient is not subject in Poland to any further tax on the dividend received.

Polish companies (joint-stock partnerships, effective from 1 January 2014 and limited partnerships, effective from 1 January 2021), other European Economic Area (EEA; the EEA consists of the EU countries and Iceland, Liechtenstein and Norway) companies and Swiss companies are exempt from tax on dividends received from Polish subsidiaries, profits of a subsidiary (or amounts from certain capital) designated to increase its share capital and undivided profits of a subsidiary and profits designated to capital other than share capital on transformation of the subsidiary into a partnership, if they satisfy all of the following conditions:

- They are subject to income tax in Poland, an EU/EEA member state or Switzerland on their total income, regardless of the source of the income (the exemption applies also to dividends or other profit distributions paid to permanent establishments, located in EU/EEA member states or in Switzerland, of such companies).
- They do not benefit from income tax exemption on their total income (which should be documented with their written statement).
- For at least two years, they hold directly at least 10% (25% for Swiss recipients) of the capital of the company paying the dividend. The two-year holding period can be met after payment is made. If the two-year holding period is eventually not met (for example, the shareholder disposes of the shares before the two-year holding requirement is met), the shareholder must pay the withholding tax and penalty interest. Broadly, except for some specific cases, full ownership of the shares is required.
- The Polish payer documents the tax residency of the recipient with a certificate of residency issued by the competent foreign tax authorities (if payments are received by a permanent establishment, some other documents may be needed).

- A legal basis exists for a tax authority to request information from the tax administration of the country where the taxpayer is established, under a double tax treaty or other ratified international treaty to which Poland is a party.
- The dividend payer is provided with a written statement confirming that the recipient of the dividend does not benefit from exemption from income tax on its worldwide income, regardless of the source from which such income is derived.

The above exemption does not apply to revenues earned by a general partner from its share in the profits of a limited partnership or a general partner from its share in the profits of a limited joint-stock partnership.

The tax exemption for inbound dividends and the exemption from withholding tax on outbound dividends do not apply if the dividends are connected with an agreement, other legal action or a series of related actions and if the main purpose or one of the main purposes is to benefit from these tax exemptions (see Section E).

The application of exemptions from withholding tax or reduced treaty rates (above certain thresholds) may be subject to a pay and refund mechanism (see *Withholding tax collection mechanism*).

Specific rules exist regarding the corporate income taxation of the general partner of a limited partnership and a general partner of a limited joint-stock partnership. In general, such partner is subject to regular withholding tax on dividends in Poland. However, the amount of withholding tax on revenue earned by a general partner in a limited partnership or a limited joint-stock partnership is reduced by the amount calculated by multiplying the percentage of the share in profits attributable to the general partner and the amount of the tax due on the total income of the limited partnership or the limited joint-stock partnership.

Specific rules regarding exemption from tax on dividends exist with respect to the limited partner of a limited partnership (that is, 50% of income derived by the limited partner of a limited partnership having its seat or place of management in Poland from the profits of such a limited partnership is exempt from tax on dividends. However, the amount of exempted income cannot exceed PLN60,000 in a given tax year, calculated separately from the profits of each such limited partnership of which the taxpayer is a limited partner. This exemption does not apply to the limited partner of a limited partnership having its seat or place of management in Poland if the limited partner holds, directly or indirectly, at least 5% of the shares (stock) in an entity being a legal person or a company in an organization that is a general partner in such a limited partnership, or is a member of the management board, of any of the following:

- An entity being a legal person or a company in organization that is a general partner in such a limited partnership
- An entity holding, directly or indirectly, at least 5% shares (stock) in an entity being a legal person or a company in an organization that is a general partner in such a limited partnership
- A related entity, in the meaning of the respective Polish corporate income tax regulations, to the member of the management board or the partner of the entity holding, directly or indirectly,

at least 5% shares (stock) in an entity being a legal person or a company in organization that is a general partner in such a limited partnership

The income (revenue) allocated to a Polish branch is subject to regular taxation in Poland. Withholding tax is not imposed on transfers of profits from such branch to its head office because from a legal perspective, a branch is regarded as an organizational unit of the foreign enterprise.

Interest, royalties and service fees. Under the domestic tax law in Poland, a 20% withholding tax is imposed on interest, royalties and fees for certain services paid to nonresidents.

Under most of Poland's tax treaties, the withholding tax on fees for services may not be imposed in Poland.

The full exemption applies to interest and royalties paid to qualifying entities if the following conditions are met:

- The payer is a company that is a Polish corporate income taxpayer (the exemption does not apply to limited partnerships and joint-stock partnerships) with a place of management or registered office in Poland (the exemption applies also to payments made by permanent establishments located in Poland of entities subject to income tax in the EU on their total income, regardless of the source of the income, provided that such payments qualify as tax-deductible costs in computing the taxable income subject to tax in Poland).
- The entity earning the income is a recipient of such income and is a company subject to income tax in an EU/EEA member state (other than Poland) on its total income, regardless of the source of the income (the exemption applies also to payments made to permanent establishments of such companies if the income earned as a result of such a payment is subject to income tax in the EU member state in which the permanent establishment is located). In addition, the company must not benefit from income tax exemption on its total income.
- For at least two years, the recipient of the payments holds directly at least 25% of the share capital of the payer or the payer holds directly at least 25% of the share capital of the recipient of the payments. This condition is also met if the same entity holds directly at least 25% of both the share capital of the payer and the share capital of the recipient of the payments and such entity is subject to income tax in an EU/EEA member state on its total income, regardless of the source of the income. The two-year holding period can be met after payment is made. If the two-year holding period is eventually not met (for example, the shareholder disposes of the shares before the two-year holding requirement is met), the shareholder must pay the withholding tax together with the penalty interest. Full ownership of the shares is required.
- The Polish payer documents the tax residency of the recipients of the payments with a certificate of tax residency issued by the competent foreign tax authorities (if payments are received by a permanent establishment, some other documents may be needed).
- A legal basis exists for a tax authority to request information from the tax administration of the country where the taxpayer is

established, under a double tax treaty or other ratified international treaty to which Poland is a party.

- The recipient of the payments provides a written statement confirming that it does not benefit from exemption from income tax on its total income, regardless of the source of the income, and that it is the “beneficial owner” (see below) of the payments received.

The application of exemptions from withholding tax or reduced treaty rates (above certain thresholds) may be subject to the pay and refund mechanism described below.

Withholding tax collection mechanism. Effective from 1 January 2022, a significant tax reform entered into force, including a revision of the rules regarding withholding tax on dividends, interest and royalty payments. The new measures provide for a replacement of the prior direct application of withholding tax exemptions or treaty rates with a “pay and refund” system. There are two regimes depending on whether the total amount of dividend, interest and royalty payments paid to a foreign taxpayer in one tax year exceeds PLN2 million (approximately USD500,000). If the annual total amount of qualified payments does not exceed PLN2 million, the formal conditions required for application of a treaty rate or an exemption generally remain the same (including obtaining certificate of residency, with the exception of a new beneficial owner definition, which is more stringent). However, it is now explicitly stated that when determining whether a treaty rate or exemption can apply, the tax remitter is obliged to assure due diligence, which should take into account the nature and scale of the recipient’s business activity.

In cases in which qualified payments to a single recipient exceed PLN2 million annually, the general rule is that a payer should remit withholding tax on the excess over PLN2 million annually at standard rates (19% for dividends and 20% for interest and royalty payments). In such cases, tax treaty rates or exemptions, as well as those provided for by domestic provisions implementing the EU Parent-Subsidiary Directive and Interest-Royalties Directive, must be disregarded and standard rates should apply. The following are two exceptions to this rule:

- The tax remitter provides a statement confirming fulfillment of all conditions required for the withholding tax exemption or treaty rate.
- An opinion is issued by the tax office on request.

If the tax authorities find out that the above statement is not true, a sanction may be imposed corresponding to 10% of the payment made or 20% for payments in excess of PLN15 million (USD3.8 million). The same penalties apply if the remitter (Polish company) did not carry out the required verification of substance/beneficial owner test, or the due diligence was not adequate for the nature and scale of the remitter’s business.

Pay and refund mechanism. If neither of the above measures is applied (tax remitter’s statement or a tax office’s opinion), withholding tax must be paid at the statutory rates. In such a case, the tax could be claimed back provided that the conditions were met. The refund could be claimed either by the taxpayer or tax remitter (if it incurred the economic burden of tax).

Beneficial ownership definition. As of 1 January 2019, the definition of “beneficial owner” was changed to require proof that the recipient conducts real business activity in the country of its seat, taking into account certain criteria, such as premises, sufficient local staff, broad business rationale and local board members. The rules were amended again in January 2022 and do not include a direct reference to the substance criteria (the controlled foreign company [CFC] test); nevertheless, in practice the approach remains the same. Other conditions that need to be satisfied include the following:

- The recipient receives a payment for its own benefit, can decide how the received payment should be utilized, and bears economic risk associated with the loss of all or a portion of this receivable.
- The recipient is not a broker, representative, trustee or any other entity that is legally or actually obliged to transfer all or part of the payment to another entity. Under the Corporate Income Tax Act, a beneficial owner is an entity receiving income for its own benefit, and is not an intermediary, agent, trustee or another entity obliged to pass on all or part of the income to another entity.

Foreign tax relief. Under its tax treaties, Poland exempts foreign-source income from tax or grants a tax credit (usually with respect to dividends, interest and royalties). Broadly, foreign taxes are creditable against Polish tax only up to the amount of Polish tax attributable to the foreign income.

In addition to a credit for tax on dividends (that is, a deduction of withholding tax; direct tax credit), Polish companies (or Polish permanent establishments of EU/EEA resident companies) may also claim a credit for the tax on profits generated by their subsidiaries in other treaty countries (indirect or underlying tax credit). A Polish company receiving a dividend from a subsidiary that is not resident in the EU, EEA or Switzerland may deduct from its tax the amount of income tax paid by the subsidiary on that part of the profit from which the dividend was paid if the Polish parent company has held directly at least 75% of the foreign subsidiary’s shares for an uninterrupted period of at least 2 years. The total deduction is limited to the amount of Polish tax attributable to the foreign income.

Foreign-source dividends are added to other profits of a Polish taxpayer and are taxed at the standard 19% rate.

Dividends from companies resident in EU/EEA states or in Switzerland may be exempt in Poland if the Polish recipient holds directly at least 10% (25% in the case of Switzerland) of the share capital of the foreign subsidiary for an uninterrupted period of at least 2 years. The shareholding period requirement does not have to be met as of the payment date. The exemption does not apply if the dividends (or dividend-like income) are deductible for tax purposes in any form.

The tax exemption for inbound dividends does not apply if the dividends are connected with an agreement or other legal action or a series of related actions and if the main purpose or one of the main purposes is to benefit from this exemption (see Section E).

The above exemption also does not apply if income from the participation, including redemption proceeds, is received as a result of the liquidation of the legal entity making the payments.

The domestic exemption or tax credit can be applied if a legal basis exists for a tax authority to request information from the tax administration of the country from which the income was derived, under a double tax treaty or other ratified international treaty to which Poland is a party.

Broadly, except for some specific cases, full ownership of the shares is required to claim the credits and exemptions discussed above.

C. Determination of trading income

General. Taxable income is calculated as the sum of taxable income from the capital gains basket (source) and taxable income from other sources of revenues. Taxable income from a given source of revenue equals the difference between taxable revenues and tax-deductible costs related to that source in a given tax year. If tax-deductible costs are higher than revenues, the difference constitutes a tax loss from a given source of revenue. Taxable income or loss should be calculated separately for capital gains and for other sources of revenue. Capital losses do not offset income from other sources and vice versa.

In general, taxable revenues of corporate entities carrying out business activities are recognized on an accrual basis. Revenues are generally recognized on the date of disposal of goods or property rights or the date on which services are supplied (or supplied in part), but no later than the following:

- Date of issuance of the invoice
- Date of receipt of payment

If the parties agree that services of a continuous nature are accounted for over more than one reporting period, revenue is recognized on the last day of the reporting period set out in the contract or on the invoice (however, not less frequently than once a year).

The definition of revenues includes free and partially free benefits.

Expenses are generally allowed as deductions if they relate to taxable revenues derived in Poland, but certain expenses are specifically disallowed. Payments in the amount of at least PLN15,000 should be made through a bank account; otherwise, effective from 1 January 2017, such expenses might not be allowed as deductions for tax purposes. Additionally, payments exceeding PLN15,000 need to be made to a bank account listed on a so-called approved list if the invoice is issued by an active VAT payer. Otherwise, unless the tax office is informed on time, the cost needs to be treated as a non-tax-deductible cost. Starting from 2023, the limit will be reduced to PLN8,000 unless regulations change by then.

Branches and permanent establishments of foreign companies are taxed on income determined on the basis of the accounting records. However, regulations provide coefficients for specific revenue categories, which may be applied if the tax base for

foreign companies cannot be determined from the accounting records.

Limitation on the deductibility of costs of intangible services and royalties. Effective from 1 January 2018 until the end of 2021, fees for certain intangible services and royalties in part exceeding the limit of the sum of 5% of the adjusted tax base (broadly, 5% of taxable earnings before interest, taxes, depreciation and amortization [EBITDA]) and PLN3 million were not deductible for tax purposes. In particular, the limit applies to the following:

- Services such as advisory, market research, advertising, management, data processing, insurance, providing guarantees and other similar services
- Payments for the use of licenses, trademarks and certain other rights
- Payments for credit-risk instruments or derivatives regarding non-banking loans, made directly or indirectly to related parties or entities in a prohibited list territory or state

Certain exceptions existed, including direct costs of goods or services sold and transactions for which a taxpayer obtains an Advanced Pricing Agreement (APA) from the Polish Ministry of Finance.

A carryforward mechanism of five years for non-deducted costs was provided, with certain restrictions.

The limitation mentioned above was abolished, starting from 1 January 2022. There are, however, other new rules that may potentially impact deductibility or taxation of such items.

Hidden dividends. Payments classified as “hidden dividends” are not deductible for Polish corporate income tax purposes. According to the legislative explanation, the intention of the new regulations is to prevent the tax deductibility of payments that economically are profit distributions. Under these new provisions, costs incurred by a corporate taxpayer in relation to a service or other performance provided by a related entity (not only a shareholder) can be disallowed for corporate income tax purposes if they are determined to constitute “hidden dividends.” These costs are regarded as “hidden dividends” if one of the following conditions is met:

- The amount and/or timing of the payment are dependent on the profit earned.
- A taxpayer acting reasonably would not incur such costs or would incur them in a lower amount if the benefit were provided by an unrelated entity.
- These costs comprise remuneration for the right to use assets that were owned by the shareholder or an entity related to the shareholder prior to establishing the paying entity.

However, fulfillment of the tests under the second and third bullets above can be waived if the total amount of costs regarded as the hidden dividends (based on these two bullets) in a given tax year is lower than the amount of gross profit (based on the accounting provisions) generated in a financial year in which these costs were included in the taxpayer’s financial result. The regulations will take effect on 1 January 2023 unless the draft proposal published in 2022 is passed and the rules on hidden dividends are entirely deleted from the corporate income tax law.

Depreciation. For tax purposes, depreciation calculated in accordance with the statutory rates is deductible. Depreciation is computed using the straight-line method. However, in certain circumstances, the reducing-balance method may be allowed. The following are some of the applicable annual straight-line rates.

Asset	Rate (%)
Buildings	1.5 to 10*
Office equipment	14
Office furniture	20
Computers	30
Motor vehicles	20
Plant and machinery	4.5 to 20

* For used buildings, an individual depreciation rate may be applied (the minimum depreciation period is calculated as a difference between 40 years and the time of use of the building).

For certain types of assets, depreciation rates may be increased. Companies may also apply reduced depreciation rates.

Intangibles are amortized over a minimum period, which usually ranges from 12 months (for example, development costs) to 60 months (for example, goodwill).

Certain limitations with respect to the tax depreciation of real property and residential properties have been introduced from 1 January 2022.

Relief for losses. Losses from the capital gains basket may not offset income from another basket (source) and vice versa. Losses from a given basket (source) may be carried forward to the following five tax years to offset profits from that source of income that are derived in those years. Up to 50% of the original loss may offset profits in any of the five tax years, with an exception to tax losses not exceeding PLN5 million. Losses from capital gains cannot offset profits from another source and vice versa. Losses may not be carried back. Certain restructurings may cause premature expiration of tax losses.

Groups of companies. Groups of related companies (only limited-liability companies, joint-stock companies and simple joint-stock companies) may report combined taxable income and pay one combined tax for all companies belonging to the group. To qualify as a tax group, related companies must satisfy several conditions, including the following:

- The average share capital per each company is not lower than PLN250,000.
- The parent company in the tax group must directly own 75% of the shares of the subsidiary companies.
- The agreement on setting up a tax group must be concluded for a period of at least three years. It must be concluded in written form and registered with the tax office.
- The members of the group may not benefit from any corporate income tax exemptions based on laws other than the Corporate Income Tax Act.

In practice, the applicability of the rules for tax groups were previously limited, primarily as a result of the profitability requirement and certain other restrictive conditions. However,

because the profitability requirement has been abolished, it is expected that tax grouping will become more common.

From 1 July 2022, there will be also a possibility to establish VAT groups in Poland, subject to certain conditions. VAT groups will be created by entities with financial, economic and organizational links that make an appropriate agreement, select the VAT group's representative and file their VAT group registration form together with the VAT Group agreement to the tax office. VAT groups will be available not only to taxable persons that are members of tax capital groups. Transactions between VAT group members will be beyond the scope of VAT (no requirement to charge and deduct VAT). A VAT group will file a single JPK-V7M in the name of the whole group. A VAT group must continue in effect for not less than three years (with a renewal option).

D. Other significant taxes

The following table discusses other significant taxes.

Nature of tax	Rate
Value-added tax (VAT); imposed on goods sold and services rendered in Poland, exports, imports, and acquisitions and supplies of goods within the EU; Poland has adopted most of the EU VAT rules; certain goods and services are exempt	
Standard rate	23%
Reduced rates (applicable to specified goods and services indicated in the VAT Act, such as food, agricultural products and medical equipment)	5%/8%
Exports and supplies of goods within the EU	0%
Tax on retail sales; imposed on revenues earned on retail sales; for purposes of this tax, revenues from retail sales are revenues earned on sales of goods to consumers (that is, individuals not engaged in economic activity) in Poland that are connected with the taxpayer's business activity (effective from 1 January 2021)	
Monthly revenues between PLN17 million and PLN170 million	0.8%
Monthly revenues exceeding PLN170 million	1.4%
Tax on certain financial institutions; monthly tax on assets of selected financial institutions (domestic banks, consumer loan lending institutions and insurance companies as well as branches of foreign banks and insurance companies; tax base is the excess of total assets of the taxpayer over PLN4 billion (in some cases, lower thresholds may apply); tax is due monthly; taxpayers must file self-assessment declarations by the 25th day of the following month; tax is not deductible for corporate income tax purposes in Poland	0.0366%

Nature of tax	Rate
Tax on commercial property (malls and office buildings) with an initial value exceeding PLN10 million (effective from 1 January 2018); an exception exists for office buildings used solely or mainly for the own purposes of the taxpayer; the tax is payable monthly and is creditable against the corporate income tax	0.035%
Sugar tax; introduced as of 1 January 2021; relates to the supply of beverages with the addition of sugar, other sweeteners and/or caffeine and taurine; the entity required to settle the tax is usually the producer/wholesaler supplying the beverages to the entity conducting retail sales, but also possibly the producer or entity that purchases the beverages from outside Poland conducts retail sales	
Content of sugars in an amount equal to or less than 5g in 100ml of drink, or for the content in any amount of at least one sweetener referred to in the specific regulation	PLN0.5
For each gram of sugar over 5g in 100ml of drink per liter of drink	PLN0.05
Beverages containing addition of caffeine or taurine per liter of drink	PLN0.1

E. Miscellaneous matters

Foreign-exchange controls. Polish-based companies may open foreign-exchange accounts. All export proceeds received in convertible currencies and receipts from most foreign sources may be deposited in these accounts. Businesses may open foreign currency accounts abroad. However, restrictions apply to the opening of accounts in countries that are not members of the EU, EEA or the OECD. No permit is required for most loans obtained by Polish-based companies from abroad, including loans from foreign shareholders. Reporting requirements are imposed for certain loans and credits granted from abroad.

Anti-avoidance legislation. In applying the tax law, the tax authorities refer to the substance of a transaction in addition to its form.

If under the name (legal form) of the transaction, the parties have hidden some other transaction, the tax authorities may disregard the name (legal form) used by the parties and determine the tax implications of the transaction on the basis of actual intent of the parties.

If the tax authorities have doubts about the existence or the substance of the legal relationship between the parties, they refer the case to the common court to establish the type of the actual legal relationship.

Polish anti-avoidance rules implementing EU Council Directive 2015/121 of 27 January 2015 are effective from 1 January 2016. These rules were amended, effective from 1 January 2019. Under these rules, the tax exemption for inbound dividends, as well as the exemption from withholding tax on outbound dividends, do not apply if the dividends are connected with an agreement or

other legal action or a series of related actions and if the following three circumstances exist:

- The main purpose or one of the main purposes of the agreement or action is to benefit from the above tax exemptions.
- The application of the exemption does not result only in elimination of double taxation.
- Such agreement or other legal action has no real character.

For purposes of the above rule, an agreement or other legal action does not have real character to the extent that it is not performed for justified economic reasons.

The above anti-abuse rule applies only to entities that can benefit from withholding tax exemption based on the Polish domestic rules implementing the EU Parent Subsidiary Directive.

Certain anti-avoidance rules relate to the neutrality of a merger, demerger and a share-for-share exchange.

A bill adding a General Anti-Abuse Rule (GAAR) to the Polish Tax Ordinance Act entered into force on 15 July 2016. The GAAR was amended, effective 1 January 2019. Broadly, under the GAAR provisions, tax authorities shall disregard an arrangement or a series of arrangements that have been put into place for the main purpose or one of the main purposes of obtaining a tax advantage that defeats the object or purpose of the applicable tax law and accordingly is not genuine (artificial). In such a case, the tax implications of a transaction are determined by reference to the facts that would have been generated if a suitable transaction (or, if suitable, no transaction) had been carried out. The GAAR does not apply if an entity receives a securing opinion issued by the head of the National Tax Administration (Krajowa Administracja Skarbowa, or KAS). A separate procedure, which costs PLN20,000 (approximately EUR4,500), exists for obtaining such a securing opinion. GAAR regulations do not apply to VAT (a separate regulation exists) and non-tax budget revenues. If GAAR is applied, additional tax of up to 30% of the additional tax base (for corporate income tax) can be imposed.

Mandatory Disclosure Regime. Effective from 1 January 2019, Poland introduced a Mandatory Disclosure Regime requiring certain intermediaries (including non-Polish tax consultants, banks and lawyers) and, in some situations, taxpayers to report certain arrangements (reportable arrangements) to the relevant tax authority.

Arrangements are reportable if they contain certain features (hallmarks). The Polish legislation extends the scope of the reporting required under the Council of the EU Directive 2018/822 of 25 May 2018, amending Directive 2011/16/EU, to include the following:

- The definition of reportable tax arrangements is extended to comprise not only cross-border but also domestic tax arrangements.
- The definition of covered taxes is widened to include VAT.
- Additional hallmarks are added.
- Like the directive, reporting applies to cross-border arrangements for which the first step of implementation takes place after 25 June 2018. In addition, reporting applies to tax arrangements defined by domestic law for which the first step of implementation occurs after 1 November 2018.

Broadly, tax arrangements commencing on or after 1 January 2019 are reportable within 30 days after earliest of the following dates:

- The scheme is available for the client.
- The scheme is ready for implementation.
- The scheme is started.

In the event of failure to meet the above obligation, the tax authorities may impose financial penalties.

Debt-to-equity rules. Apart from the above, targeted regulations address certain specific transactions.

Thin-capitalization rules. The Polish thin-capitalization rules limit deductibility of the excess of financing costs over interest income to 30% of the adjusted tax base (broadly, 30% of taxable EBITDA). The limitation applies also to financing provided by third parties. A safe harbor for financing costs up to PLN3 million per year is provided. Deduction is explicitly limited to one of the parameters set by either a PLN3 million annual threshold or 30% of taxable EBITDA. Nondeductible costs can be carried forward up to five consecutive years, within a relevant basket of income. The rules do not apply to certain financing institutions.

In addition, in certain events, rules limit deductibility of interest when the acquisition of shares was debt financed (so-called “debt push-down” scenarios).

Controlled foreign companies. Effective from 1 January 2015, certain income or gains derived by foreign subsidiaries of Polish taxpayers that fulfill the definition of a CFC are subject to tax in Poland. The CFC rules were subsequently modified, effective from 1 January 2018, 1 January 2019 and 1 January 2022.

Under the rules in effect from 1 January 2022, the following foreign companies are considered CFCs:

- A foreign company that has its registered office or management or is registered or located in a prohibited list territory or state
- A foreign company that has its registered office or management or is registered or located in a state with which Poland or the EU has not concluded an agreement containing an exchange-of-information clause
- A foreign company that fulfills all of the following criteria:
 - A Polish taxpayer holds individually or together with related parties or other taxpayers having their place of residence or management in Poland, directly or indirectly, at least 50% of the shares, voting rights or profit participation rights in this company.
 - At least 33% of this company’s revenues is derived from dividends and other revenues from sharing in the profits of legal persons, disposals of shares in companies, all rights and obligations in partnership companies, titles of participation in investment funds, joint investment institutions or other legal persons and rights of a similar nature, receivables, consulting, accounting, market research, legal services, advertising, management and control data processing, employee recruitment and acquisition services and similar services, leases, subleases, tenancies, subtenancies and other contracts of a similar nature, interest and benefits from loans, interest part of lease installments, guarantees,

copyrights or industrial property rights, including the sale of such rights, copyrights or industrial property rights included in the sale price of a product or service, the sale and execution of rights from financial instruments, insurance, banking or other financial activities and transactions with related parties if the entity does not generate economic value added in connection with these transactions or if the value is insignificant.

- The tax paid by this company is lower than 25% of the difference between tax that would have been paid if the company was a Polish tax resident and that the tax actually paid by that company is not subject to refund or deductible.

A CFC's income is subject to tax in Poland at 19% at the level of the Polish shareholder. The shareholder is taxed on the part of the profits of the CFC in which the shareholder participates after deducting dividends received from the CFC and gains on disposals of shares in the CFC, if they are included in the shareholder's tax base (these amounts may be deducted in the following five tax years). The tax payable in Poland may be decreased by the relevant proportion of corporate income tax paid by the CFC.

CFCs in prohibited list territories or states (and to some extent, CFCs in non-treaty countries) are subject to more restrictive rules.

Taxation under the CFC rules does not apply if the CFC is subject to tax on its worldwide income in an EU/EEA member state and carries a "substantial genuine business activity" in that state.

The CFC rules also apply to taxpayers carrying on business activity through a permanent establishment located outside of Poland, with certain exceptions, as well as to non-Polish tax residents carrying out its activities through a permanent establishment located in Poland to the extent that such activities are connected with activities carried out by the permanent establishment located outside Poland.

Effective from 1 January 2019, certain anti-abuse provisions have been introduced. Under these provisions, artificial relationships that distort the relations or status of a foreign entity for CFC purposes are disregarded.

Taxation of "shifted profits." The taxation of "shifted profits" (also referred to as taxation of undertaxed payments) would impose corporate income tax of 19% in Poland on certain qualified payments made directly or indirectly to related entities if effective taxation is lower by at least 25% of the hypothetical corporate rate of 19% (that is, lower than hypothetical 14.25% corporate income tax). Additional tests and exceptions could apply.

Polish holding regime. From 1 January 2022, the concept of a Polish holding company is introduced. A Polish holding company may enjoy an exemption for 95% of dividends received from qualified subsidiaries and a capital gains tax exemption on sales of shares of such qualified subsidiaries, subject to certain conditions. The status of "holding company" will depend on, among other things, conducting real economic activity (assessed based on CFC regulations).

Investment agreement with Ministry of Finance. The Polish government has introduced the concept of an investment agreement for strategic investors who would like to agree regarding a variety of tax consequences related to their investment.

The agreement (commonly referred to as Interpretation 590) concluded with the Ministry of Finance will set forth certain tax consequences of the investment that a given investor intends to carry out in Poland. It will be binding on the tax administration and should enable the business to obtain comprehensive tax clearance regarding its investment in Poland.

It is generally available to investors planning an investment in Poland worth at least PLN100 million (approximately USD26 million) and, from 2025 onward, PLN50 million (approximately USD13 million). Separate applications to various tax authorities (for example, individual tax rulings, APAs, GAAR clearance) are not required, as all of these matters would be covered with one investment agreement.

Standard audit file for tax purposes. The standard audit file for tax (SAF-T) is a standardized form for transmitting tax information to the tax authorities. The format in which SAF-T reports are prepared is XML.

The scope of information that should be transferred to the tax authorities in the form of SAF-T covers the following:

- Account books
- Bank account statements
- Inventory turnover
- Invoices
- VAT registers
- Tax revenue and expense ledger
- Revenue records

The above structures should generally be provided to the tax authorities at their request. However, the SAF-T for the VAT register needs to be provided to the Ministry of Finance on a monthly basis automatically (that is, no summons of the tax authorities is required in the case of this item).

For “large enterprises,” a requirement to submit all of the SAF-T structures on demand of the tax authorities has applied since 1 July 2016. From that date, “large enterprises” are required to submit the SAF-T files for the VAT register on a monthly basis. For this purpose, “large enterprises” are entities that have met in at least one of the last two financial years either of the following criteria:

- Annual headcount of not less than 250 (on a yearly average)
- Annual volume of sales of at least EUR50 million and assets amounting to at least EUR43 million

Other entities (medium, small and micro enterprises) must submit the on-demand SAF-T structures to the tax authorities from 1 July 2018. However, they must submit the SAF-T files for the VAT register on a monthly basis from the following dates:

- Medium and small enterprises: 1 January 2017
- Micro enterprises: 1 January 2018

The tax authorities conduct automatic controls of SAF-T reports submitted by taxpayers.

In 2020, a new SAF-T for VAT was implemented. A new structure (Form JPK_V7M [submitted monthly] or JPK_V7K [submitted quarterly]) replaced the existing SAF-T for VAT registers and VAT returns (VAT-7, VAT-7K, VAT-27, VAT-ZT, VAT-ZZ and VAT-ZD). The scope of information reportable under the new SAF-T is broader than the scope of information reported under the previous version. The new JPK_V7 consists of the following two sections:

- Evidence section of JPK_V7, which covers the data relating to the sales and purchases that took place in a given period. In addition, detailed information can be split into obligatory and optional data. The evidence section as a rule includes the information presented previously in the JPK VAT registers submitted.
- Declarative section of JPK_V7, which covers the data from the VAT declaration but in a different format.

JPK_V7 also introduces additional requirements for the enterprises and accountants, including the following:

- The use of GTU codes for the goods and services
- The use of procedural transaction codes
- The use of document classification codes

The new SAF-T scheme entered into force on 1 October 2020 and applies to all taxpayers (large, medium, small and micro-enterprises).

E-invoices in the National e-Invoices System. From 1 January 2022, entrepreneurs are able to use the e-invoice system voluntarily. The seller will be in a position to issue an e-invoice through the National e-Invoices System (KSeF), but an invoice of that type will require the recipient's consent to be sent in the system. From 1 January 2024, the system will be obligatory with respect to all invoices. E-invoices should be issued in the XML format (similar to that of the SAF-T; see *Standard audit file for tax purposes*). The system assumes real-time reporting.

Exit tax. As required by the EU, Poland has introduced an exit tax, effective from 1 January 2019. This is an income tax on unrealized profits (hidden reserves) that are embedded in a taxpayer's property and that are potentially transferred together with such property outside of Poland in the following actions:

- The property is transferred within the same taxpayer (for example, a transfer by a Polish resident to its permanent establishment located abroad or a transfer by a nonresident operating through a Polish permanent establishment to its home country or to another country in which it operates).
- The taxpayer's residence is changed.

Exit tax on unrealized profits is calculated as the difference between the fair market value of the property transferred (established based on separate rules) and its tax book value (that would have applied had the given property been disposed of) as of the date of the transfer.

Transfer pricing. The Polish tax law includes specific rules on transfer pricing. Effective from 2017, fundamental changes were

introduced regarding the obligations and scope with respect to transfer-pricing documentation, followed by changes effective from 2019 and from 2023. The main rules, which are based on the OECD guidelines, are contained in the Corporate Income Tax Act and the Personal Income Tax Law. Several Decrees of the Ministry of Finance and official announcements of the Ministry of Finance were published to provide details regarding the wording of the law.

Effective from 2019, the definition of related parties is changed significantly. The amended law broadens the scope of entities that may fall within this definition and incorporates additional anti-abuse rules. The amended law has removed the relations resulting from employment from the definition.

Under the Corporate Income Tax Act, the following entities are considered to be related parties:

- An entity and at least one other entity over which it exercises significant influence
- A natural person, including a spouse or a relative to the second degree of relation and an entity, and an entity over which he or she exercises significant influence
- An entity that exercises significant influence over a company without legal personality and such company and its partners
- The taxpayer and its permanent establishment, and in the case of a tax capital group, a capital company belonging to the group and its permanent establishment

Under the amended law, parties whose relations are held or established without business justification, including relations aimed at the manipulation of the ownership structure or the creation of circular ownership structures, are treated as related parties.

The following is considered to be significant influence:

- Owning directly or indirectly at least 25% of shares in capital, the voting rights for the control of the managing authorities of the company or shares or rights for participation in profits, property or expectative, including participation units and investment certificates
- The actual ability of a natural person to influence the key business decisions undertaken by a legal person or an organizational unit without legal personality
- Being married or being a relative to the second degree

In 2019, the catalog of the transfer-pricing methods was revised in that methods are now considered equal. The tax law provides for the following transfer-pricing methods:

- The comparable uncontrolled price method
- The resale-price method
- The cost-plus method (significant change of the definition aligning it with the OECD definition)
- The transactional net margin method
- The profit-split method

If none of the above methods can be used, other methods may be applied, including valuation techniques. A Decree of the Ministry of Finance provides further details on the application of the valuation techniques for transfer-pricing purposes.

The revised Corporate Income Tax Act also incorporates new rights of the tax authorities to reclassify or not recognize a transaction under several conditions.

The Polish Decrees on transfer pricing also provide detailed rules regarding the preparation of comparability analyses as well as business restructurings.

Effective from 2017, an obligation to prepare a three-tiered standardized transfer-pricing documentation was introduced. It is amended from 2019 (and to a small extent from 2022), with the following main changes:

- Documentation thresholds for controlled transactions were changed. Depending on the type of transaction, the thresholds are PLN2 million or PLN10 million.
- Documentation thresholds for controlled transactions were changed. Depending on the type of transaction, the thresholds are PLN2 million or PLN10 million. Starting in 2022, new regulations regarding the transactions concluded with entities located in a tax haven were introduced. According to the regulations, a Local File is required in the following instances:
 - The transactions concluded with related and unrelated entities located in a tax haven exceed PLN100,000.
 - The transactions concluded with related and unrelated parties exceed PLN500,000 and the beneficial owner is located in a tax haven.

It is presumed that the beneficial owner is domiciled in a tax haven if the other party to the transaction makes settlements with an entity that has its registered office or management board in a territory or in a country applying harmful tax competition in the tax year.

- The threshold requiring entities to have Master File documentation was changed. The Master File should be provided within 12 months after the end of the tax year, provided that consolidated financial statements are prepared by the group, that the group has generated consolidated revenues exceeding PLN200 million and that the Polish entity is required to prepare Local File documentation.
- The threshold for the preparation of benchmarking analyses was removed. Benchmarking analyses covering comparable data and selection process should also be available in electronic form. They need to be revised every three years, or earlier in the case of significant change of the market conditions. Starting from 2022, regulations introducing the possibility to waive the preparation of benchmarking analysis were introduced for the following:
 - Controlled transactions concluded by taxpayers that are micro or small businesses (applicability for the tax year beginning in 2021)
 - Transactions other than controlled transactions concluded with tax havens (direct transactions) or in which the actual owner of the counterparty is a resident of a tax haven (indirect transactions), covered by the documentation obligation (applicability for the tax year beginning in 2021)
- Some types of controlled transactions are excluded from the documentation requirement.
- Safe harbors for selected service transactions and loans are introduced.

- The scope of Local File and Master File documentation was revised.
- A tax return on transfer pricing (TPR-C) is introduced, replacing the CIT TP return. It requires taxpayers to report a significant amount of information regarding intragroup relations, including the categories of transfer-pricing methods and the profitability achieved on the transactions and how it corresponds to the benchmarking results. As from 2023, the TP Statement (statement confirming that the transfer-pricing documentation was prepared and the prices are of arm's length) will be combined with the TPR-C form.

The Local File documentation must be prepared in Polish and in electronic form. However, the Master File may be provided in English (during a tax audit, the tax authorities may request that the taxpayer translate the Master File within 30 days). From 2023, local transfer-pricing documentation must be prepared by the end of the 10th month after the end of the entity's tax year, and TPR-C transfer-pricing information must be filed by the end of the 11th month after the end of the entity's tax year.

Taxpayers must submit a signed declaration confirming that local transfer-pricing documentation is in place and that the transfer-pricing policy used conforms with the arm's-length principle within nine months after the end of the tax year. The statement needs to be signed by members of the management board and cannot be provided by the proxy. Lack of declaration or the filing of an untrue declaration is penalized based on the Penal Fiscal Code.

As from 2023, the TP Statement (statement confirming that the transfer-pricing documentation was prepared and the prices are of arm's length) will be combined with the TPR-C form.

The Master File needs to be prepared (not provided) within 12 months from year-end. The above deadlines were extended by three months for 2019 only as a result of the COVID-19 pandemic.

Taxpayers must present transfer-pricing documentation within seven days after the date of the request of the tax authorities. However, from 2023, the deadline for submitting local transfer-pricing documentation at the request of the tax authorities has been extended from 7 to 14 days.

If the tax authorities assess additional income to a taxpayer realizing intragroup transactions, the additional tax liability is calculated by the tax authorities to be a value of 10% of the additional income reassessed. The value of the additional tax liability is doubled if a taxpayer does not provide the transfer-pricing documentation required by the law or provides documentation that is incomplete or if the additional income reassessed exceeds a value of PLN15 million. If both of these conditions are fulfilled, the additional tax liability is tripled.

Penalties from the Penal Fiscal Code may be applied.

The APA regulations entered into force on 1 January 2006 and were changed in 2019. An APA concluded for a particular transaction is binding on the tax authorities with respect to the method selected by the taxpayer. APAs may apply to transactions that have

not yet been executed or transactions that are in progress when the taxpayer submits an application for an APA.

In June 2006, Poland ratified the EU convention on the elimination of double taxation in connection with the adjustment of profits of associated enterprises (90/436/EEC).

Effective from 2015, it is possible to eliminate double taxation in domestic transactions.

Polish headquarters with consolidated revenues (as defined in the Accounting Act) in Poland and outside of Poland that exceeded in the previous tax year the equivalent of EUR750 million must file a CbCR report within 12 months after the end of the reporting year of the group. The first reporting year was 2016. In addition, Polish law includes a secondary filing mechanism (under this mechanism, if no agreement on the exchange of tax information exists between two given countries and if no other entity from the group is responsible for the preparation of a CbCR report, the Polish tax authorities may request the Polish entity to prepare a CbCR report).

Polish subsidiaries are required to file with the Head of Tax Administration a notification on which entity within the group is responsible for CbCR preparation. Such notification should be filed by the end of the tax year (the exceptional deadline for the 2016 tax year was 10 months from the year-end).

Financial penalties up to an amount of PLN1 million can be imposed for not fulfilling reporting obligations. These penalties can be imposed on the entities belonging to the group that, despite the obligation to submit the CbCR report, failed to do so, provided incomplete information or did not send a notification. Under the Fiscal Penal Code, a fine of up to 240 daily rates (the daily rate is calculated based on the minimum wage in force in Poland on the day on which a penalty is imposed) may be imposed on entities acting on behalf of or in the taxpayer's interest that submit false information about entities that are part of a group.

F. Treaty withholding tax rates

The standard withholding tax rates are 19% for dividends and 20% for interest and royalties. The rate may be reduced under a double tax treaty on presentation of a certificate of tax residence or, in some cases, under domestic regulations. Poland ratified the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument or "MLI"), which may modify the application of Polish double tax treaties starting from 1 January 2019. The following table shows the withholding tax rates under Polish double tax treaties without taking into account the impact of the MLI.

- (a) The lower rate applies if the recipient of the dividends is a company that owns at least 10% of the payer.
- (b) The lower rate applies if the recipient of the dividends is a company that owns at least 15% of the payer.
- (c) The lower rate applies if the recipient of the dividends is a company that owns at least 20% of the payer.
- (d) The lower rate applies if the recipient of the dividends is a company that owns at least 25% of the payer.
- (e) The lower rate applies if the recipient of the dividends is a company that owns more than 30% of the payer.
- (f) The lower rate applies to royalties paid for copyrights, among other items; the higher rate applies to royalties for patents, trademarks and industrial, commercial or scientific equipment or information.
- (g) The lower rate applies if the recipient of the dividends is a company that owns at least 10% of the voting shares of the payer.
- (h) The lower rate applies to royalties paid for the use of, or the right to use, industrial, commercial or scientific equipment.
- (i) The lower rate applies to copyright royalties.
- (j) This rate applies if the recipient of the dividends is a company that owns at least one-third of the payer.
- (k) The 0% rate applies to among other items, interest paid to government units, local authorities, central banks and retirement funds. In the case of certain countries, the rate also applies to banks (the list of exempt or preferred recipients varies by country). The relevant treaty should be consulted in all cases.
- (l) The 0% rate applies to royalties paid for, among other items, copyrights. The 10% rate applies to royalties paid for patents, trademarks and for industrial, commercial or scientific equipment or information.
- (m) The 20% rate applies if the recipient of the interest is not a financial or insurance institution or government unit.
- (n) The lower rate applies to know-how; the higher rate applies to copyrights, patents and trademarks.

- (o) The 10% rate applies if, on the date of the payment of dividends, the recipient of the dividends has owned at least 25% of the share capital of the payer for an uninterrupted period of at least two years. The 15% rate applies to other dividends.
- (p) The lower rate applies to royalties paid for the following:
- Copyrights
 - The use of or the right to use industrial, commercial and scientific equipment
 - Services comprising scientific or technical studies
 - Research and advisory, supervisory or management services
- The treaty should be checked in all cases.
- (q) The lower rate applies to know-how, patents and trademarks.
- (r) The 5% rate applies if the recipient is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
- (s) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the capital of the payer of the dividends for at least one year and if the dividends are declared within such holding period. The 5% rate applies to dividends paid to pension funds or other similar institutions operating in the field of pension systems. The 15% rate applies to other dividends.
- (t) Because the rate under the domestic law of Poland is 19%, the treaty rate of 20% does not apply.
- (u) The treaty with the former Federal Republic of Yugoslavia that applied to the Union of Serbia and Montenegro should apply to the Republics of Montenegro and Serbia.
- (v) The lower rate applies to fees for technical services.
- (w) The 10% rate also applies to fees for technical services.
- (x) The 20% rate also applies to certain services (for example advisory, accounting, market research, legal assistance, advertising, management and control, data processing, search and selection services, guarantees and pledges and similar services).
- (y) The lower rate applies if the beneficial owner is a company (other than a partnership) that controls directly at least 25% of the capital of the company paying the dividends.
- (z) The lower rate applies if the owner of the dividends is the government or a government institution.
- (aa) The 10% rate applies to interest paid to banks and insurance companies and to interest on bonds that are regularly and substantially traded.
- (bb) The 0% rate applies to certain dividends paid to government units or companies.
- (cc) The lower rate applies if the recipient of the dividends is a company that owns at least 10% of the payer for at least 24 months or is a retirement fund.
- (dd) The 4% rate applies if the interest is paid to a beneficial owner that is one of the following:
- Bank
 - Insurance company
 - Enterprise substantially deriving its gross income from the active and regular conduct of a lending or finance business involving transactions with unrelated persons
 - Enterprise that sold machinery or equipment if the interest is paid with respect to indebtedness arising as part of the sale on credit of such machinery or equipment
 - Any other enterprise, provided that in the three tax years preceding the tax year in which interest is paid, the enterprise derived more than 50% of its liabilities from the issuance of bonds in the financial markets or from taking deposits at interest, and more than 50% of the assets of the enterprise consisted of debt-claims against unrelated persons
- The 5% rate applies to interest derived from bonds or securities that are regularly and substantially traded on a recognized securities market. The 10% rate applies in all other cases.
- (ee) Under a most-favored-nation clause in a protocol to the treaty, the interest or royalties treaty rates are replaced by any more beneficial rate or exemption agreed to by Chile for interest or royalties in a treaty entered into with another jurisdiction that is a member state of the OECD.
- (ff) The 0% rate applies if the beneficial owner of the dividends is a company that holds at least 10% of the share capital of the payer of the dividends for an uninterrupted period of at least two years.
- (gg) The treaty has not yet entered into force.
- (hh) The 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends on the date on which the dividends are paid and has held the

- capital or will hold the capital for an uninterrupted 24-month period that includes the date of payment of the dividends.
- (ii) The rate is 10% if Switzerland imposes a withholding tax on royalties paid to nonresidents.
- (jj) The lower rate applies if the recipient of the dividends is a company (other than a partnership) that owns directly at least 10% of the payer. Certain limitations to the application of the preferential rates may apply.
- (kk) The lower rate applies if the beneficial owner of the dividends is a company that holds directly at least 25% of the voting power of the payer. Under the Ireland treaty, if Ireland levies tax at source on dividends, the 0% rate is replaced by a rate of 5%.
- (ll) The 0% rate applies to dividends paid to a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends on the date the dividends are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls. The 0% rate may also apply to dividends paid to certain pension funds.
- (mm) The 10% rate applies to interest paid before 1 July 2013. For interest paid on or after 1 July 2013, the 5% rate applies unless an exemption applies. The 0% rate applies to such interest if any of the following conditions is satisfied:
- The beneficial owner of the interest is a company (other than a partnership) that holds directly at least 25% of the share capital of the payer of the interest.
 - The payer of the interest holds directly at least 25% of the share capital of the beneficial owner of the interest.
 - An EU/EEA company holds directly at least 25% of the share capital of both the beneficial owner of the interest and the payer of the interest.
- (nn) For royalties paid before 1 July 2013, the 10% rate applies if Switzerland imposes in its local provisions a withholding tax on royalties paid to nonresidents. Otherwise, a 0% rate applies. For royalties paid on or after 1 July 2013, a 5% rate applies unless an exemption applies. The 0% rate applies to such royalties if any of the following conditions is satisfied:
- The beneficial owner of the royalties is a company (other than a partnership) that holds directly at least 25% of the share capital of the payer of the royalties.
 - The payer of the royalties holds directly at least 25% of the share capital of the beneficial owner of the royalties.
 - An EU/EEA company holds directly at least 25% of the share capital of both the beneficial owner of the royalties and the payer of the royalties.
- Furthermore, if Poland enters into an agreement with an EU or EEA country that allows it to apply a rate that is lower than 5%, such lower rate will also apply to royalties paid between Poland and Switzerland.
- (oo) The lower rate (5% rate under the Singapore treaty) applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends for an uninterrupted period of 24 months.
- (pp) The 0% rate applies to the following:
- Interest arising in Poland and paid to a resident of Canada with respect to a loan made, guaranteed or insured by Export Development Canada or to a credit extended, guaranteed or insured by Export Development Canada
 - Interest arising in Canada and paid to a resident of Poland with respect to a loan made, guaranteed or insured by an export financing organization that is wholly owned by the state of Poland or to a credit extended, guaranteed or insured by an export financing organization that is wholly owned by the state of Poland
 - Interest arising in Poland or Canada and paid to a resident of the other contracting state with respect to indebtedness arising as a result of the sale by a resident of the other contracting state of equipment, merchandise or services (unless the sale or indebtedness is between related persons or unless the beneficial owner of the interest is a person other than the vendor or a person related to the vendor)
- (qq) The lower rate applies to copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or artistic works and royalties for the use of, or the right to use, patents or information concerning industrial, commercial or scientific experience (with some exceptions).
- (rr) The protocol to the double tax treaty or a new double tax treaty changing certain rates has not yet entered into force. The implementation process will be observed.

- (a) Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRC) applies to resident companies and nonresident companies with permanent establishments (PEs) in Portugal. The rate is 16.8% in Azores and 14.7% in Madeira. Small and medium-sized companies can benefit from a 17% reduced rate (13.6% in Azores and 11.9% in Madeira) for the first EUR25,000 of taxable income. Micro, small and medium-sized companies located in the interior of Portugal can benefit from a 12.5% reduced rate for the first EUR25,000 of taxable income. See Section B for details of other rates.
- (b) A municipal surcharge of 1.5% is generally imposed on the taxable profit determined for IRC purposes. Certain municipalities do not levy the surcharge. For further details, see Section B.
- (c) A state surcharge of 3% is imposed on the taxable profit determined for IRC purposes between EUR1,500,000 and EUR7,500,000. If the taxable profit for IRC purposes exceeds EUR7,500,000, the state surcharge is levied at a rate of 5% on the excess up to EUR35 million. If the taxable profit for IRC purposes exceeds EUR35 million, the state surcharge is levied at a rate of 9% on the excess. Reduced rates apply in Azores and Madeira.
- (d) See Section B.
- (e) Income must be declared and is subject to the normal tax rates. Amounts withheld may be credited against the IRC due. See Section B.
- (f) Investment income paid to tax-haven entities is subject to a 35% withholding tax. The same tax applies if the beneficial owner of the income paid into a bank account is not properly disclosed.
- (g) These rates may be reduced by tax treaties or by European Union (EU) Directives. Under the EU Parent-Subsidiary Directive (also applicable to dividends paid to Swiss parent companies), the rate on dividends may be reduced to 0%. The rate may also be reduced to 0% if the beneficiary is resident in a tax treaty country and if certain other conditions are met. Under the EU Interest and Royalties Directive, the rate on interest or royalties may be reduced to 0% if the interest or royalties are paid between EU associated companies.
- (h) This tax applies to interest from private and public company bonds.
- (i) This tax applies to interest on bonds issued after 15 October 1994. A 25% withholding tax applies to interest on bonds issued on or before that date.
- (j) Interest on certain bonds traded on the stock exchange and paid to nonresidents not operating in Portugal through a PE may in certain circumstances be exempt from tax. The same exemption may also apply to capital gains derived from disposals of such bonds. The exemption does not apply to entities resident in tax havens (except central banks and other government agencies), unless an applicable tax treaty or an exchange of information agreement with Portugal exists.

- (k) The 25% rate applies to most services and commissions. The 25% rate applies to services performed by artists and sportspersons and to fees paid to board members. This tax does not apply to communication, financial and transportation services. The tax is eliminated by most tax treaties, but this may not be the case for income derived from the performance of artists and sportspersons.
- (l) For tax losses computed before 2010, the prior six-year carryforward period applies. For tax losses computed in 2010 or 2011, a four-year carryforward period applies. For tax losses computed in 2012 or 2013, a five-year carryforward period applies. For tax losses used from 1 January 2014, the amount deductible each year is capped by 70% of the taxable profit for the year. For tax losses computed in 2014, 2015 and 2016, a 12-year carryforward period applies. It continues to apply for micro, small and medium-sized companies from 2017 and onward. For tax losses incurred in 2020 and 2021, a 12-year carryforward period applies and the losses can be used up to 80% of the taxable profit.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (Imposto sobre o Rendimento das Pessoas Colectivas, or IRC) is levied on resident and nonresident entities.

Resident entities. Companies and other entities, including non-legal entities, whose principal activity is commercial, industrial or agricultural, are subject to IRC on worldwide profits, but a foreign tax credit may reduce the amount of IRC payable (see *Foreign tax relief*).

Companies and other entities, including non-legal entities, that do not carry out commercial, industrial or agricultural activities, are generally subject to tax on their worldwide income (for details regarding the calculation of the taxable profit of these entities, see Section C).

Nonresident entities. Companies or other entities that operate in Portugal through a PE are subject to IRC on the profits attributable to the PEs.

Companies or other entities without a PE in Portugal are subject to IRC on income deemed to be obtained in Portugal.

For tax purposes, companies or other entities are considered to have a PE in Portugal if they have a fixed installation or a permanent representation in Portugal through which they engage in a commercial, industrial or agricultural activity. Under rules that generally conform to the Organisation for Economic Co-operation and Development (OECD) model convention, a PE may arise from a building site or installation project that lasts for more than six months (90 days for facilities, platforms and ships used in prospecting or exploiting natural resources or for the existence of a dependent agent). Under these rules, commissionaire structures, dependent agents and services rendered in Portugal are more likely to result in a PE for IRC purposes. From 1 January 2021, the PE concept is amended to include a service PE rule (triggered when the presence in Portugal exceeds 183 days in a 12-month period), enlarge the dependent agent concept and exclude the deposit of stock for delivery from the ancillary or preparatory activities.

Double tax treaties may further limit the scope of a PE in Portugal.

Tax rates. For 2022, IRC is levied at the following rates.

Type of enterprise	Rate (%)
Companies or other entities with a head office or effective management control in Portugal, whose principal activity is commercial, industrial or agricultural	21
Companies or other entities with a head office or effective management control in the autonomous region of the Azores, or with a branch, office, premises or other representation there	16.8
Companies or other entities with a head office or effective management control in the autonomous region of the Madeira, or with a branch, office, premises or other representation there	14.7
Entities other than companies with a head office or effective management control in Portugal, whose principal activity is not commercial, industrial or agricultural PEs	21
Nonresident companies or other entities without a head office, effective management control or a PE in Portugal	
Standard rate	25
Rental income	25

Certain types of income earned by companies in the last category of companies listed above are subject to the following withholding taxes.

Type of income	Rate (%)
Copyrights and royalties	25
Technical assistance	25
Income from shares	25
Income from government bonds	25
Revenues derived from the use of, or the right to use, equipment	25
Other revenues from the application of capital	25
Payments for services rendered or used in Portugal, and all types of commissions	25*

* This tax does not apply to communications, financial and transportation services. It is eliminated under most tax treaties.

Applicable double tax treaties, EU directives or the agreement entered into between the EU and Switzerland may reduce the above withholding tax rates.

A 35% final withholding tax rate applies if income is paid or made available in a bank account and if the beneficial owner is not identified. A 35% final withholding tax rate also applies to investment income obtained by an entity located in a tax haven.

A municipal surcharge (*derrama municipal*) is imposed on resident companies and nonresident companies with a PE in Portugal. The rate of the municipal surcharge, which may be up to 1.5%, is set by the respective municipalities. The rate is applied to the taxable profit determined for IRC purposes. Consequently, the maximum combined rate of the IRC and the municipal surcharge on companies is 22.5%. Municipalities may apply an exemption or a reduced rate, including whenever the turnover in the preceding year was below EUR150,000.

A state surcharge (*derrama estadual*) is also imposed on resident companies and nonresident companies with a PE in Portugal. The rate of the state surcharge, which is 3%, is applied to the taxable profit determined for IRC purposes between EUR1,500,000 and EUR7,500,000. For taxable profits exceeding EUR7,500,000, a 5% rate of state surcharge is levied on the excess up to EUR35 million. For taxable profits exceeding EUR35 million, a 9% rate of state surcharge is levied on the excess. Consequently, the maximum combined rate of the IRC and the surcharges on companies is 31.5%. Reductions of the state surcharge rates apply in Azores and Madeira.

Companies established in the free zones of Madeira and the Azores enjoyed a tax holiday until 2011. The more important of the two, Madeira, is internationally known as the Madeira Free Zone (Zona Franca da Madeira). An extended regime has been approved for companies licensed between 2007 and 2013 (extended to 31 December 2014). Under this extended regime, the reduced rate is 5% for 2013 through 2020. This rate applies to taxable income, subject to a cap, which is generally based on the existing number of jobs. Requirements and limitations apply to the issuance of licenses for the Madeira Free Zone. This regime is also available for companies licensed before 2007. However, it was subject to a formal option that should have been elected on or before 30 December 2011. A new regime has been approved for companies licensed between 2015 and 2020. Under the new regime, the reduced rate is 5% for 2015 through 2027. This rate applies to taxable income, subject to a cap, which is generally based on the existing number of jobs as well as other criteria (annual gross value-added, employment costs or turnover). New requirements and limitations apply to the issuance of licenses for the Madeira Free Zone. The new regime is also available for companies licensed before 2015. In addition to the benefits that previously been available, the new regime provides for exemptions regarding dividends and interest paid to nonresident shareholders, provided certain conditions are met.

Significant incentives are also available for qualifying new investment projects established before 31 December 2021 (based on the 2022 Government Budget Law, already generally approved but under discussion in detail in parliament and accordingly not yet published, this measure should be extended until 31 December 2027). To qualify for the incentives, the projects must satisfy the following requirements:

- They must have a value exceeding EUR3 million.
- They must develop sectors considered to be of strategic importance to the Portuguese economy.

- They must be designed to reduce regional economic imbalances, create jobs and stimulate technological innovation and scientific research in Portugal.

Qualifying projects may enjoy the following tax benefits for up to 10 years:

- A tax credit of 10% to 25% of amounts invested in plant, equipment and intangibles used in the project. However, buildings and furniture qualify only if they are directly connected to the development of the activity.
- An exemption from, or a reduction of, the municipal real estate holding tax for buildings used in the project.
- An exemption from, or a reduction of, the property transfer tax (see Section D) for buildings used in the project.
- An exemption from, or a reduction of, the stamp duty for acts and contracts necessary to complete the project, including finance agreements.

Portuguese tax law also provides for significant tax credits and deductions concerning research and development (R&D) investments, fixed-asset investments and creation of jobs (grants and temporary exemption from the employer's social security contribution are available). In addition, a specific tax benefit is available for the reinvestment of profits by small and medium-sized companies. Under this measure, such companies can benefit from a tax credit of 10% of the retained earnings (capped to the lower of 25% of the IRC liability [50% in the case of micro and small companies] and EUR1,200,000 per year) reinvested in the acquisition of eligible fixed assets if several conditions are met.

Companies can benefit for a six-year period from a notional interest deduction of 7% on the amount of cash contributions or conversions of loans by shareholders to share capital, if they are made on or after 1 January 2017, as well as conversions of payables to share capital, if they are made on or after 1 January 2018. The amount on which the notional interest deduction applies is capped at EUR2 million.

Certain incentives are also available to land transportation of passengers and stock activities, car-sharing and bike-sharing, and activities related to bicycle fleets. Incentives are also available for cinema production activity and urban rehabilitation.

Undertakings for Collective Investment. Effective from 1 July 2015, a special tax regime is introduced for Undertakings for Collective Investment (UCIs) incorporated and operating in accordance with Portuguese law. UCIs can take the form of a fund or a company. UCIs are subject to IRC but benefit from a tax exemption for investment income, rental income and capital gains, unless the income or gains originated from a tax haven. UCIs are exempt from municipal and state surcharges.

UCIs are liable to stamp duty on net assets, which is payable quarterly. The rate of tax is 0.0025% for UCIs investing in securities and 0.0125% in the remaining cases.

Resident participants in UCIs are subject to tax at IRC rates and surcharges (legal entities) or 28% (individuals).

Nonresident participants benefit from a tax exemption regarding securities' UCIs, while a 10% rate applies with respect to real estate UCIs. A 25% to 35% rate, depending on the nature of the income and the type of UCI, applies to the following nonresident entities:

- Entities controlled more than 25% by resident entities, unless the nonresident entity is located in the EU, in an EEA member state that has entered into cooperation agreement on tax matters or in a country that has entered into a tax treaty with Portugal that includes an exchange of tax information clause
- Entities located in tax havens
- Other entities if the income is paid into a bank account for which the beneficial owner is not identified

Simplified regime of taxation. Resident companies that have annual turnover not exceeding EUR200,000 and total assets not exceeding EUR500,000 and that meet certain other conditions may opt to be taxed under a simplified regime of taxation. The taxable income corresponds to a percentage ranging between 4% and 100% of gross income, depending on the nature of the income.

Special regime for maritime transportation. Resident companies carrying out a maritime transportation business may opt for a special regime if certain conditions and requirements are met. Under the special regime, the taxable income of eligible activities is computed based on the ship's tonnage. This regime is available from 1 January 2018 and has a duration of 10 years. Crew members may benefit from a personal income tax exemption if certain conditions are met. The company and the crew members may also benefit from reduced social security contribution rates if certain conditions are met.

Capital gains. Capital gains derived from the sale of fixed assets and from the sale of financial assets are included in taxable income subject to IRC. The capital gain on fixed assets is equal to the difference between the sales value and the acquisition value, adjusted by depreciation and by an official index. The tax authorities may determine the sales value for real estate to be an amount other than the amount provided in the sales contract.

Fifty percent of the capital gains derived from disposals of tangible fixed assets, intangibles assets and non-consumable biological assets held for more than one year may be exempt if the sales proceeds are invested in similar assets during the period beginning one year before the year of the disposal and ending two years after the year of the disposal. A statement of the intention to reinvest the gains must be included in the annual tax return for the year of disposal. The remaining 50% of the net gains derived from the disposal is subject to tax in the year of the disposal.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If by the end of the second year following the disposal no reinvestment is made, the net capital gains remaining untaxed (50%) are added to taxable profit for that year, increased by 15%.

A full participation exemption regime is available for capital gains and losses on shareholdings held for at least 12 months if the remaining conditions for the dividends participation

exemption regime are met. The regime does not apply if the main assets of the company that issued the shares being transferred are composed, directly or indirectly, of Portuguese real estate (except real estate allocated to an agricultural, industrial or commercial activity [other than real estate trading activities]). This applies to gains and losses from onerous transfers of shares and other equity instruments (namely, supplementary contributions), capital reductions, restructuring transactions and liquidations.

Losses from the onerous transfer of shareholdings in tax-haven entities are not allowed as deductions. Losses resulting from shares and equity instruments are not deductible in the portion corresponding to the amount of dividends and capital gains that were excluded from tax during the previous four years under the participation regime or the underlying foreign tax credit relief.

Liquidation proceeds are treated as capital gains or losses. The losses from the liquidation of subsidiaries are deductible only if the shares have been held for at least four years. If within the four-year period after the liquidation of the subsidiary, its activity is transferred so that it is carried out by a shareholder or a related party, 115% of any loss deducted by the shareholder on liquidation of the subsidiary is added back.

Tax credits are available for a venture capital company (*sociedade de capital de risco*, or SCR) as a result of investments made in certain types of companies.

Nonresident companies that do not have a head office, effective management control or a PE in Portugal are subject to IRC on capital gains derived from sales of corporate participations, securities and financial instruments if any of the following apply:

- More than 25% of the nonresident entities is held, directly or indirectly, by resident entities (unless the seller is resident in an EU, EEA or double tax treaty jurisdiction and certain requirements are met).
- The nonresident entities are resident in territories listed on a prohibited list contained in a Ministerial Order issued by the Finance Minister.
- The capital gains arise from the transfer of shares held in a Portuguese property company in which more than 50% of the assets comprise Portuguese real estate or in a holding company that controls such a company.

Nonresident entities are also subject to IRC on capital gains derived from the transfer of shares and other rights in a foreign entity if, at any moment during the previous 365 days, more than 50% of the respective value of the shares derived, directly or indirectly, from Portuguese real estate (except real estate allocated to an agricultural, industrial or commercial activity [other than real estate trading activities]).

Nonresident companies that do not have a head office, effective management control or a PE in Portugal are taxed at a 25% rate on taxable capital gains derived from disposals of real estate, shares and other securities. For this purpose, nonresident entities must file a tax return. A tax treaty may override this taxation.

Exit taxes. The IRC Code provides that the transfer abroad of the legal seat and place of effective management of a Portuguese

company, without the company being liquidated, results in a taxable gain or loss equal to the difference between the market value of the assets and the tax basis of assets as of the date of the deemed closing of the activity. This rule does not apply to assets and liabilities remaining in Portugal as part of the property of a Portuguese PE of the transferor company if certain requirements are met.

The exit tax also applies to a PE of a nonresident company on the closing of an activity in Portugal or on the transfer of the company's assets abroad.

Following the European Court of Justice decision in Case C-38/10, significant changes to the existing exit tax rules were made. Under the revised rules, on a change of residency to an EU or EEA member state, the taxpayer may now opt for either of the following alternatives:

- Immediate payment of the full tax amount
- Payment of the full tax amount in equal installments during a five-year period

The deferral of the tax payment triggers late payment interest. In addition, a bank guarantee may be requested. This guarantee equals the tax due plus 25%. In addition, annual tax returns are required if the tax is deferred.

The deferral of tax payment stops if any of the following events occur:

- The assets become extinct, are transferred or are no longer used in the activity, in the portion of the tax related to those assets.
- The assets are subsequently transferred, with any title, to a third country, in the portion of the tax related to those assets.
- The tax residency of the entity is transferred to a third country.
- The entity enters into insolvency or liquidation.

Administration. Companies with a head office, effective management control or a PE in Portugal are required to make estimated payments with respect to the current financial year. The payments are due in July, September and December. For companies with turnover of up to EUR500,000, the total of the estimated payments must equal at least 80% of the preceding year's tax. For companies with turnover exceeding EUR500,000, the total of the estimated payments must equal at least 95% of the preceding year's tax. The first payment is mandatory. However, the obligation to pay the other installments depends on the tax situation of the company. For example, a company may be excused from making the third installment if it establishes by adequate evidence that it is suffering losses in the current year. However, if a company ceases making installment payments and if the balance due exceeds by 20% or more the tax due for that year under normal conditions, compensatory interest is charged. Companies must file a tax return by 31 May of the following year. Companies must pay any balance due when they file their annual tax return.

Companies with a head office, effective management control or a PE in Portugal that have adopted a financial year other than the calendar year must make estimated payments as outlined above, but in the 7th, 9th and 12th months of their financial year. They must file a tax return by the end of the 5th month following the end of that year.

Advance payments concerning the state surcharge are also required in the 7th, 9th and 12th months of the tax year.

In addition, companies must make a Special Payment on Account (SPA) in the 3rd month of the financial year, or they can elect to pay the amount in the 3rd and 10th months. The SPA is equal to the difference between the following amounts:

- 1% of turnover of the preceding year, with a minimum limit of EUR850, or, if the minimum limit is exceeded, EUR850 plus 20% of the excess with a maximum limit of EUR70,000
- The ordinary payments on account made in the preceding year

Under certain conditions, the obligation to make the SPA may be waived beginning in 2019.

The SPA may be subtracted from the tax liability in the following six years, or refunded if, on the occurrence of certain events (for example, the closing of activity), a petition is filed. Based on the 2022 Government Budget Law, already generally approved but under discussion in detail in parliament and accordingly not yet published, the SPA should be eliminated for 2022 and future years.

In 2021, cooperatives as well as micro, small and medium-sized companies were waived from making advance payments.

A nonresident company without a PE in Portugal must appoint an individual or company, resident in Portugal, to represent it concerning any tax liabilities. The representative must sign and file the tax return using the general tax return form. IRC on capital gains derived from the sale of real estate must be paid within 30 days from the date of sale. IRC on rents from leasing buildings must be paid by 31 May of the following year.

Binding rulings. A general time frame of 150 days exists in the tax law to obtain a binding ruling. This period can be reduced to 75 days if the taxpayer pays a fee between EUR2,550 and EUR25,500 and if the ruling petition with respect to an already executed transaction contains the proposed tax treatment of the transaction as understood by the taxpayer. This tax treatment is deemed to be tacitly accepted by the tax authorities if an answer is not given within the 90-day period.

Dividends. Dividends paid by companies to residents and nonresidents are generally subject to withholding tax at a rate of 25%.

On distributions to resident parent companies, the 25% withholding tax is treated as a payment on account of the final IRC due.

A resident company subject to IRC may deduct 100% of dividends received from another resident company if all of the following conditions apply:

- The recipient company owns directly or directly and indirectly at least 10% of the capital or voting rights of the payer.
- The recipient company holds the interest described above for an uninterrupted period of at least one year that includes the date of distribution of the dividends, or it makes a commitment to hold the interest until the one-year holding period is complete.
- The payer of the dividends is a Portuguese resident company that is also subject to, and not exempt from, IRC or Game Tax

(tax imposed on income from gambling derived by entities such as casinos).

A 100% dividends-received deduction is granted for dividends paid by entities from EU member countries to Portuguese entities (or Portuguese PEs of EU entities) if the above conditions are satisfied and if both the payer and recipient of the dividends qualify under the EU Parent-Subsidiary Directive. The same regime is also available for dividends received from European Economic Area (EEA) subsidiaries. The participation exemption regime also applies to dividends from subsidiaries in other countries, except tax havens, if the subsidiary is subject to corporate tax at a rate not lower than 60% of the standard IRC rate (this requirement can be waived in certain situations).

The participation exemption regime does not apply in certain circumstances, including among others, the following:

- The dividends are tax deductible for the entity making the distribution.
- The dividends are distributed by an entity not subject to or exempt from income tax, or if applicable, the dividends are paid out of profits not subject to or exempt from income tax at the level of sub-affiliates, unless the entity making the distribution is resident of an EU or an EEA member state that is bound to administrative cooperation in tax matters equivalent to that established within the EU.

If a recipient qualifies for the 100% deduction, the payer of the dividends does not need to withhold tax. This requires the satisfaction of a one-year holding period requirement before distribution.

A withholding tax exemption applies to dividends distributed to EU and EEA parent companies and to companies resident in treaty countries that have entered into tax treaties with Portugal that includes an exchange of tax information clause, owning (directly or indirectly and indirectly through eligible companies) at least 10% of a Portuguese subsidiary for more than one year. Companies outside the EU and EEA must be subject to corporate tax at a rate not lower than 60% of the standard IRC rate. A full or partial refund of the withholding tax may be available under certain conditions. A withholding tax exemption is also available for dividends paid to a Swiss parent company, but the minimum holding percentage is increased to 25%.

The participation exemption on dividends received and the withholding tax on distributed dividends does not apply if an arrangement or a series of arrangements are performed with the primary purpose, or with one of the principal purposes, to obtain a tax advantage that frustrates the goal of eliminating double taxation on the income and if the arrangement or series of arrangements is not deemed genuine, taking into account all of the relevant facts and circumstances. For this purpose, an arrangement or series of arrangements is deemed not to be genuine if it is not performed for sound and valid economic reasons and does not reflect economic substance.

The withholding tax exemption on dividends distributed to non-resident entities is also not available if the Portuguese distributing company does not comply with the legal disclosure requirements regarding its ultimate beneficial owners or if any of the reported

ultimate beneficial owners is located in a tax haven (unless it is proven that the parent company did not integrate an arrangement or series of arrangements deemed not to be genuine).

Foreign PE profits. Resident taxpayers may opt for an exemption regime for foreign PE profits. The regime is available if all of the following circumstances exist:

- The PE is subject to one of the taxes listed in the EU Parent-Subsidiary Directive or to corporate tax at a rate not lower than 60% of the standard IRC rate.
- The PE is not located in a tax-haven territory.
- The PE's effective tax rate is not lower than 50% of the tax that would have been paid in Portugal, except when the controlled foreign entities (CFE) imputation exclusion rule may apply (see *Controlled foreign entities* in Section E).

Transactions between the head office and the foreign PE must respect the arm's-length principle, and the costs related to the PE are not deductible for the head office.

The following are recapture rules:

- PE profits are not exempt up to the amount of PE losses deducted by the head office in the 12 preceding years (5 years from 2017).
- If the PE is incorporated, subsequent dividends and capital gains from shares are not exempt up to the amount of PE losses deducted by the head office in the 12 preceding years (5 years from 2017).
- If the exemption regime ceases to apply, the PE losses as well as the dividends and capital gains from shares (if the PE was previously incorporated) are not deductible or exempt, respectively, up to the amount of the PE profits that were exempt from tax during the preceding 12 years (5 years from 2017).

Foreign tax relief. Foreign-source income is taxable in Portugal. However, direct foreign tax may be credited against the Portuguese tax liability up to the amount of IRC attributable to the net foreign-source income. The foreign tax credit can be carried forward for five years.

In addition, taxpayers may opt to apply an underlying foreign tax credit with respect to foreign-source dividends that are not eligible for the participation exemption regime. Several conditions must be met, including the following:

- The minimum holding percentage is 10% for at least 12 months.
- The entity distributing the dividends is not located in a tax-haven territory, and indirect subsidiaries are not held through a tax-haven entity.

C. Determination of trading income

General. Taxable profit is determined according to the following rules:

- For companies with a head office or effective management control in Portugal that are principally engaged in commercial, agricultural or industrial activities, the taxable profit is the net accounting profit calculated in accordance with Portuguese generally accepted accounting principles (GAAP), as adjusted by the IRC Code.

- For companies with a head office or effective management control in Portugal that do not principally engage in commercial, industrial or agricultural activities, the taxable profit is the net total of revenues from various categories of income as described in the Personal Tax (IRS) Code, less expenses.
- For PEs, the taxable profit is determined as outlined in the first item. In calculating taxable profit, general administrative expenses that are attributable to the PE may be deducted as a cost if justified and acceptable to the fiscal authorities.

Effective from 2010, Portuguese GAAP is similar to International Financial Reporting Standards (IFRS). In addition, the tax law has been adapted to the new GAAP, but several adjustments are still required between net accounting profit and taxable profit.

An intellectual property (IP) regime provides for a 50% exclusion from the tax base with respect to income derived from contracts for the transfer or temporary use of patents and industrial designs or models as well as software copyrights. To benefit from the IP regime, several conditions must be satisfied. This regime applies to patents and industrial designs or models registered on or after 1 January 2014. For patents and industrial designs or models registered on or after 1 July 2016, the regime is very much connected to the underlying R&D expenses. Based on the 2022 Government Budget Law, already generally approved but under discussion in detail in parliament and accordingly not yet published, the 50% exclusion should be increased to 85%.

Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses are not deductible including, but not limited to, the following:

- The tax depreciation of private cars, on the amount of the acquisition price exceeding EUR25,000 but not exceeding EUR62,500 (depending on the acquisition date and type of vehicle), as well as all expenses concerning pleasure boats and tourism airplanes, except for those allocated to public transportation companies or used for rental purposes as part of the company's normal activities
- Daily allowances and compensation for costs incurred in traveling in the employees' own vehicles at the service of the employer that are not charged to clients if the company does not maintain a control map of the expenses, allowing it to identify the place, length and purpose of the displacements, except for the amounts on which the beneficiary is subject to IRS
- Expenses shown on documents issued by entities without a valid taxpayer number
- Improperly documented expenses
- IRC and surcharges (see Section B)
- Penalties and interest charges
- Contribution on banking sector (see Section D)
- Contribution on energy sector (see Section D)
- Contribution on pharmaceutical industry (see Section D)

Assets under financial leases are deemed to be owned by the lessee, and consequently the lessee may deduct only applicable tax depreciation and any interest included in the rent payments. Special rules apply to sale and leaseback transactions.

Although representation expenses and expenses related to private cars are deductible with some limits, they are subject to a special

stand-alone tax at a rate of 10%. This rate is increased to 27.5% for expenses related to private cars if the acquisition price of the car is between EUR27,500 and EUR35,000, or to 35% if the acquisition price of the car exceeds EUR35,000. The rates applicable to expenses related to private cars may be significantly reduced, depending on the type of car (electric or natural gas powered and hybrid plug-in).

The 5% tax also applies to daily allowances and compensation for costs incurred in traveling in the employees' own vehicles at the service of the employer that is not charged to clients and not subject to IRS.

Undocumented expenses are not deductible. In addition, these expenses are subject to a special stand-alone rate of 50% (70% with respect to entities partially or totally exempt from IRC, not principally engaged in commercial, industrial or agricultural activities or subject to the Game Tax). The tax authorities may classify an expense as undocumented if insufficient supporting documentation exists.

Certain indemnities and compensation paid to board members and managers (including "golden parachutes") are subject to a special stand-alone tax at a rate of 35%.

A special stand-alone tax at a rate of 35% applies to bonuses and other variable compensation paid to board members and managers, if such compensation exceeds 25% of the annual remuneration and EUR27,500. This tax does not apply if at least 50% of the payment is deferred over a period of at least three years and conditioned on the positive performance of the company during such period.

A "Robin Hood" tax is levied on both oil production and distribution companies and is charged based on the rise in value of the oil stocks held. For tax purposes, the first-in, first-out (FIFO) method or the weighted average cost method is deemed to be used for the valuation of oil stocks. The positive difference between the gross margin determined based on these methods and the gross margin determined under the accounting method used by the company is subject to a stand-alone tax at a flat rate of 25%. This tax is not deductible for IRC purposes and cannot be reflected in the purchase price paid by the final consumer.

The above stand-alone taxes are imposed regardless of whether the company earns a taxable profit or suffers a tax loss in the year in which it incurs the expenses. In addition, all stand-alone rates are increased by 10 percentage points if the taxpayer incurs a tax loss in the relevant year. In 2020 and 2021, this increase may not apply to cooperatives as well as micro, small and medium-sized companies that meet certain conditions. Based on the 2022 Government Budget Law, already generally approved but under discussion in detail in parliament and accordingly not yet published, the same should be available for 2022.

Inventories. Inventories must be consistently valued by any of the following criteria:

- Effective cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles

- Cost of sales less the normal profit margin
- Cost of sales of products cropped from biological assets, which is determined at the time of cropping, less the estimated costs at the point of sale, excluding transportation and other costs required to place the products in the market
- Any other special valuation considered basic or normal, provided that it has the prior approval of the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

Provisions. The following provisions, among others, are deductible:

- Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
- Inventory losses (inventory values in excess of market value)
- Warranty expenditures
- Technical provisions imposed by the Bank of Portugal or the Portuguese Insurance Institute

Depreciation. In general, depreciation is calculated using the straight-line method. The declining-balance method may be used for new tangible fixed assets other than buildings, office furniture and automobiles not used for public transport or rental. Maximum depreciation rates are established by law for general purposes and for certain specific industries. If rates that are less than 50% of the official rates are used, total depreciation will not be achieved over the life of the asset. The following are the principal official straight-line rates.

Asset	Rate (%)
Commercial buildings	2
Industrial buildings	5
Office equipment	12.5 to 25
Motor vehicles	12.5 to 25
Plant and machinery	5 to 33.33

Companies may request the prior approval of the tax authorities for the use of depreciation methods other than straight-line or declining-balance or rates up to double the official rates. Approval is granted only if the request is justified by the company's business activities.

For tax purposes, the maximum depreciable cost of private motor cars is between EUR25,000 and EUR50,000, depending on the acquisition date and type of vehicle.

Intangibles (excluding patents and goodwill from shares) that are acquired on or after 1 January 2014 for consideration and that do not have a defined economic life can be amortized over 20 years. Investment properties and non-consumable biological assets that are subsequently measured at fair value can also be depreciated during the remaining period of their maximum economic life. From 1 January 2019, the deduction is not available with respect to intangibles acquired from related parties.

Relief for losses. Tax losses may be carried forward for 12 years (6 years if the losses were computed before 2010, 4 years if the losses were computed in 2010 or 2011, or 5 years if the losses were computed in 2012 or 2013). For losses incurred in or after 2017,

the 12-year period is reduced to 5 years (except for micro, small and medium-sized companies). For tax losses used from 1 January 2014, the amount deductible each year is capped at 70% of the taxable profit for the year. Loss carrybacks are not allowed. Tax losses existing at the time of the occurrence of certain changes may not be carried forward. For tax losses computed in 2020 and 2021, a 12-year carryforward period applies and can be used up to 80% of the taxable profit. A change of at least 50% of the shareholders or voting rights can trigger the cancellation of tax losses, unless it is derived from certain situations.

Groups of companies. Resident groups of companies may elect to be taxed on their consolidated profit. To qualify for tax consolidation, a group must satisfy certain conditions, including the following:

- The parent company must hold, directly or indirectly, at least 75% of the subsidiaries' registered capital, provided that the holding accounts for more than 50% of the voting rights.
- The parent company may not be deemed to be dominated by the other resident company.
- All companies belonging to the group must have their head office and place of effective management in Portugal.
- The parent company must hold the participation in the subsidiary for more than one year beginning from the date the regime begins to be applied.
- All group companies must be subject to IRC at the standard rate of 21%.

Effective from 2015, tax grouping is also allowed if the parent entity of the Portuguese resident companies is a local branch of an EU or EEA resident company or if Portuguese resident companies are under common control by the same EU or EEA resident company.

Applications for consolidated reporting must be filed with the Ministry of Finance before the end of the third month of the year for which the application is intended to take effect.

Losses of individual group companies may be offset against taxable profit within the consolidated group, in accordance with the following rules:

- Losses of individual group companies incurred in years before the consolidation can only be offset up to the amount of the taxable profit derived by the company that incurred such losses.
- Consolidated losses may be offset against consolidated profits only.
- Consolidated losses may not be offset against profits generated by companies after they leave the group.
- The consolidated group may not deduct losses incurred by companies after they leave the group.

The cap of 70% of the taxable profit with respect to deductible losses also applies for tax group purposes.

The consolidated taxable profit equals the sum of the group's companies' taxable profits or losses, as shown in each of the respective tax returns.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax (IVA), levied on goods and services, other than exempt services	
General rates	
Portugal	23%
Madeira	22%
Azores	18%
Intermediate rates	
Portugal	13%
Madeira	12%
Azores	9%
Reduced rates	
Portugal	6%
Madeira	5%
Azores	4%
Social security contributions, on salaries, wages and regular bonuses but excluding meal subsidies, up to a specified amount; paid by	
Employer	23.75%
Employee	11%
Property transfer tax; payable by purchaser	
Buildings	6.5%
Farm land	5%
Offshore companies or companies controlled, directly or indirectly, by offshore companies	10%
Municipal real estate holding tax; local tax imposed annually on the assessed tax value of the property on 31 December; tax payable by the owner of the property; tax rate for urban property established by the Municipal Assembly in the location of the property	
Offshore companies or companies controlled, directly or indirectly, by offshore companies	7.5%
Other entities	0.3% to 0.45%
Additional municipal real estate holding tax; local tax imposed annually on the assessed tax value of urban property (for residential purposes and land for construction) on 1 January; tax payable by the owner of the property (for individuals, the tax is due only if the value of all properties owned exceeds EUR600,000)	
Collective persons	
General rate	0.4%
Certain situations	0.7%/1%/1.5%
Individuals	
Tax value up to EUR1 million	0.7%
Tax value from EUR1 million to EUR2 million	1%
Tax value exceeding EUR2 million	1.5%
Offshore entities	7.5%
Stamp duty	
Loans and mortgages (maximum rate)	0.6%

Nature of tax	Rate
Interest on bank loans	4%
Transfer of real estate	0.8%
Insurance premiums	3% to 9%
Transfer of business as a going concern	5%
Contribution on banking sector; imposed on Portuguese resident credit institutions and branches of credit institutions resident outside the EU	
Debt deducted by own funds (Tier 1 and Tier 2; own funds are computed based on the regulations of the Bank of Portugal) and deposits covered by the Deposits Guarantee Fund	0.01% to 0.11%
Notional value of derivative financial instruments not stated in the balance sheet	0.0001% to 0.0003%
Contribution on energy sector that is applicable to entities that integrate the national energy sector and that have their domicile, legal seat, effective management or PE in Portugal; the tax base is the sum of the value of the tangible fixed assets, intangible fixed assets (except industrial property) and financial assets allocated to concessions or licensed activities; for regulated activities, the tax base is the value of the regulated assets, if higher	0.285% to 0.85%
Contribution on energy sector; applicable to long-term provisioning contracts under a take-or-pay regime (long-term contracts for the supply of gas)	
On the equivalent economic value (the fair market value of the contract, taking into consideration several factors)	1.45%
On the excess of the equivalent economic value, taking into account the real value (positive difference between the equivalent economic value described above and the initial equivalent economic value calculated based on a regulation issued in May 2015)	1.77%
Contribution on pharmaceutical industry; applicable to entities that commercialize medicines; tax base is the turnover for each quarter	2.5% to 14.3%
Contribution on light plastic bags; applicable to entities that produce, import or acquire light plastic bags from outside mainland Portugal; tax base is each light plastic bag	EUR0.08

E. Miscellaneous matters

Foreign-exchange controls. Portugal does not impose foreign-exchange controls. No restrictions are imposed on inbound or outbound investments.

Mergers and reorganizations. Mergers and other types of corporate reorganizations may be tax-neutral in Portugal if certain condi-

tions are met. Property transfer tax and stamp duty exemptions on the transfer of immovable property, as well as on the transfer of a business as a going concern, may also be available.

Entities deemed to be subject to a clearly more favorable tax regime. A nonresident entity is deemed to be subject to a clearly more favorable tax regime if any of the following circumstances exist:

- The entity is not subject to corporate income tax.
- It is subject to tax at a rate of tax equal to or lower than 60% of the IRC standard rate.
- Its place of business is included in a prohibited list of tax-haven territories provided in a Ministerial Order of the Finance Minister.

The first two above criteria should only be relevant if the nonresident is related to the Portuguese entity. An entity resident in the EU or in an EEA member state that has entered into cooperation agreement on tax matters is not deemed to be subject to a clearly more favorable tax regime.

In general, payments made by Portuguese residents to nonresidents subject to a clearly more favorable tax regime, including payments made to bank accounts in financial institutions in the home countries of the nonresidents, are not deductible for tax purposes and the payers are subject to a stand-alone tax rate of 35% (55% for entities partially or fully exempt from IRC or not principally engaged in commercial, industrial or agricultural activities). However, these payments may be deducted and are not subject to stand-alone taxation if the payer establishes the following:

- The payments were made in real transactions.
- The payments are normal.
- The amounts of the payments are not unreasonable.

The nondeductibility of payments to nonresidents subject to a clearly more favorable tax regime also applies if the payments are made indirectly to those entities; that is, the payer knew or should have known of the final destination of such payments. This is deemed to occur if special relations exist between the payer and the nonresident entity subject to a clearly more favorable tax regime or between the payer and the intermediary that makes the payment to the nonresident entity subject to a clearly more favorable tax regime.

Controlled foreign entities. The rules described below apply to CFEs deemed to be subject to a clearly more favorable tax regime (that is, its place of business is included in a prohibited list of tax-haven territories provided in a Ministerial Order of the Finance Minister or the effectively paid tax is lower than 50% of the tax that would be due in Portugal).

A Portuguese resident owning directly or indirectly at least 25% in the capital, voting rights, or rights to income or estate of a CFE is subject to tax on its allocable share of the CFE's net profit or income. For computing the 25% threshold, the capital and rights owned directly or indirectly by related parties are also considered.

Notwithstanding the above, foreign entities should be excluded from the CFE imputation rules if the sum of certain types of

income does not exceed 25% of their total income. These types of income include the following:

- Royalties or other intellectual property income
- Dividends and capital gains from shares
- Income from financial leasing
- Income derived from banking and insurance activities carried out with related parties
- Income derived from goods and services resulting from goods and services acquired and supplied to related parties while adding no or small economic value
- Interest or income derived from financial assets

The CFE rules do not apply to entities resident in the EU or in the EEA if the EEA entity has entered into a cooperation agreement on tax matters and if the taxpayer proves that the incorporation and functioning of the nonresident entity is based on valid economic reasons and that the entity carries out an agricultural, commercial, industrial or service activity. This exclusion from the CFE rules requires that the business activity be carried out with proper personnel, equipment, assets and premises.

Related-party transactions. For related-party transactions (transactions between parties with a special relationship), the tax authorities may make adjustments to taxable profit that are necessary to reflect transactions on an arm's-length basis. The IRC Code contains transfer-pricing rules, which are applied on the basis of the OECD guidelines. In addition, recent legislation had provided details regarding these rules.

A special relationship is deemed to exist if one entity has the capacity, directly or indirectly, to influence in a decisive manner the management decisions of another entity. This capacity is deemed to exist in the following relationships:

- Between one entity and its shareholders, or their spouses, ascendants or descendants, if they possess, directly or indirectly, 20% of the capital or voting rights of the entity
- Between one entity and the members of its board, administration, management or fiscal bodies, as well as the members' spouses, ascendants and descendants
- Between any entities bound by group relations
- Between any entities bound by dominance relations
- Between one entity and the other if the first entity's business activities depend on the other entity as a result of a commercial, financial, professional or legal relationship
- Between a resident entity and an entity located in a prohibited list territory

The IRC Code provides for Advance Pricing Agreements. It now also provides for Country-by-Country Reporting.

Debt-to-equity rules. The previous thin-capitalization rules contained in the IRC Code are abolished, effective from 2013.

A limitation to the deduction of interest expenses (net of interest revenues) applies, effective from 2013. The tax deduction for net financial expenses is capped by the higher of the following amounts:

- EUR1 million
- 30% of the earnings before interest, taxes, depreciation and amortization (EBITDA)

The nondeductible excess, as well as the unused fraction of the 30% threshold, may be carried forward to the following five years.

The relevant EBITDA is calculated by adding to the taxable profit the deductible net interest expenses and depreciation and amortization.

It is possible to consider the EBITDA on a group basis if tax grouping is being applied.

Anti-hybrid rules. Portugal fully implemented the Anti-Tax Avoidance Directive (ATAD) 2, which applies from 1 January 2020, but certain rules will not enter into force until 2022 or 2023.

Tax-planning disclosure. Portugal implemented the mandatory disclosure regime stated in the EU Directive on Administrative Cooperation 6 (DAC 6), which entered into force on 1 July 2020, but also covers a transitional period between 25 June 2018 and 30 June 2020. As a result of the COVID-19 pandemic, the reporting obligation was deferred for six months commencing on 1 January 2021. Under Portuguese law, both cross-border and domestic arrangements are reportable and IVA is also a covered tax for domestic arrangements. Penalties apply for lack of reporting.

- (a) The 10% rate applies if the recipient holds directly more than 50% of the capital of the payer. For other royalties, the rate is 5%.
- (b) See Section B for details regarding a 0% rate for distributions to parent companies in EU member states.
- (c) The 10% rate applies if the recipient holds directly at least 25% of the capital of the payer. The 15% rate applies to other dividends.
- (d) The 10% rate applies if, at the date of payment of the dividend, the recipient has owned directly at least 25% of the payer for an uninterrupted period of at least two years. The 15% rate applies to other dividends.
- (e) The 10% rate applies to interest on loans considered to be of economic or social interest by the Portuguese government. The 15% rate applies to other interest.
- (f) The rate is 10% for technical assistance fees.
- (g) The 10% rate applies to interest on bonds issued in France after 1965. The 12% rate applies to other interest payments.
- (h) The 10% rate applies to interest paid by an enterprise of a contracting state if a financial establishment resident in the other contracting state may deduct such interest. The 15% rate applies to other interest payments.
- (i) If the beneficial owner of the dividends is a company that owns 25% or more of the capital of the payer, and if, at the date of the distribution of the dividends, the participation has been held for at least two years, the withholding tax rate is 5%. For other dividends, the rate is 15%.
- (j) The 5% rate applies if the recipient holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
- (k) The 10% rate applies to interest on loans with a duration of more than two years. The 15% rate applies in all other cases.
- (l) The 10% rate applies to dividends paid by a company resident in Israel if the beneficial owner is a company that holds directly at least 25% of the capital of the payer of the dividends and if the dividends are paid out of profits that are subject to tax in Israel at a rate lower than the normal rate of Israeli company tax.
- (m) See Sections A and B for details.
- (n) The 5% rate applies to interest on bonds and other titles regularly and substantially traded on a recognized market. The 10% rate applies to interest on loans granted by banks and insurance companies as well as to interest from credit sales of machinery and equipment. The 15% rate applies in all other cases.
- (o) The 5% rate applies to the leases of equipment. The 10% rate applies in all other cases.
- (p) The 5% rate applies if the recipient holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
- (q) The 10% rate applies if the recipient holds directly at least 10% of the capital of the payer. The higher rate applies to other dividends.
- (r) The 5% rate applies if the recipient is a bank resident in the other contracting state.
- (s) The 0% rate applies if the recipient holds directly at least 25% of the capital of the payer for at least two years and if both companies comply with certain requirements. The 5% rate applies if the recipient holds directly at least 25% of the capital of the payer. The higher rate applies to other dividends.
- (t) The 0% rate applies if the recipient and the payer are associated companies that comply with certain requirements. The higher rate applies to other interest and royalties.
- (u) The 10% rate applies if the recipient holds directly at least 10% of the capital or of the voting rights of the payer. The 15% rate applies to other dividends.
- (v) The 10% rate applies if the recipient is a bank resident in the other contracting state.
- (w) The 5% rate applies if the recipient is a company that holds directly during a period of 12 months before the dividend distribution at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- (x) The rate is 10% for technical assistance fees associated with copyrights or know-how.
- (y) The 5% rate applies if the recipient holds directly at least 10% of the capital of the payer or the beneficiary is the state. The 10% rate applies to other dividends.
- (z) The 5% rate applies if the recipient is the state of Portugal, the Bank of Portugal, the state of Oman, the Oman Central Bank, the Oman State General Reserve Fund or the Omani Investment Fund (as well as other entities). The 10% rate applies if the recipient is a company that holds directly at least 10% of the payer. The 15% rate applies to other dividends.

-
- (aa) The 5% rate applies if the recipient is a company that holds directly at least 70% of the payer. The 10% rate applies if the recipient is a company that holds directly at least 25% of the payer. The 15% rate applies to other dividends.
 - (bb) The 7.5% applies to technical services.
 - (cc) The 5% rate applies if the recipient holds directly at least 5% of the capital of the payer. The 10% rate applies to other dividends.
 - (dd) The 5% rate applies to copyrights of literary, artistic or scientific works, including cinematographic films and recordings on tape or other media used for radio or television broadcasting or other means of reproduction or transmission or computer software. The 10% rate applies to patents, trademarks, designs or models, plans, secret formulas or processes, or for information concerning industrial, commercial or scientific experience.
 - (ee) The 8% rate applies if the recipient held at least 25% of the capital in the payer during the last 365 days. The 15% rate applies to other dividends.

Portugal has also signed a double tax treaty with Timor-Leste and Kenya, but these treaties are not yet in force.

A. At a glance

Corporate Income Tax Rate (%)	37.5 (a)
Capital Gains Tax Rate (%)	20 (b)
Branch Income Tax Rate (%)	37.5 (a)
Withholding Tax (%)	
Dividends	10
Interest	0 (c)
Royalties	2 to 29
Services Rendered	10 to 29
Branch Remittance Tax	10
Net Operating Losses (Years)	
Carryback	2 (d)
Carryforward	7/10/12 (e)

- (a) This is the maximum tax rate (see Section B). An alternative minimum tax (AMT) may apply instead of the regular tax. For details regarding the AMT, see Section B.
- (b) Under Act 77-2014, this rate applies to long-term capital gains realized after 30 June 2014.
- (c) A 29% withholding tax is imposed on interest paid to foreign corporations on related-party loans.
- (d) Losses caused by the COVID-19 pandemic during the 2020 tax year can be carried back up to two tax years under certain conditions.
- (e) Net operating losses incurred during tax years beginning after 31 December 2004 and before 1 January 2013 may be carried forward for 12 years. For net operating losses incurred during tax years beginning after 31 December 2012, the carryforward period is 10 years. For years beginning before 1 January 2005, the carryforward period was seven years.

B. Taxes on corporate income and gains

Corporate income tax. Companies organized in Puerto Rico are subject to Puerto Rico income tax on worldwide income. Foreign companies engaged in trade or business in Puerto Rico are taxable on income earned in Puerto Rico and on income that is effectively connected with their Puerto Rico operation. Partnerships are treated as pass-through entities. Accordingly, their partners (both residents and nonresidents) are taxed on their distributive shares of the income and expenses of the partnership.

Limited liability companies are subject to tax in the same manner as regular corporations. However, they can elect to be taxed as partnerships or pass-through entities under certain conditions. If a non-Puerto Rico limited liability company is treated as a partnership or a pass-through entity for federal tax purposes or in a foreign jurisdiction, it is treated as a partnership for Puerto Rico tax purposes. However, a limited liability company that is treated as a partnership for federal tax purposes or in a foreign jurisdiction does not have to be treated as a partnership for Puerto Rico tax purposes if the entity was operating under any of the tax incentive laws or filed an application for a tax grant (a private contract between the Commonwealth of Puerto Rico and the grantee whereby the tax benefits and responsibilities of the grantee are established) before 1 January 2011.

Rates of corporate income tax. The corporate income tax rates range from 18.5% to 37.5% under the Puerto Rico Internal Revenue Code of 2011, as amended (Code).

A segment of companies doing business in Puerto Rico is operating under the benefits of tax exemption under various incentives acts. In July 2019, the Puerto Rico Incentives Code was enacted (Act 60-2019) to consolidate dozens of incentives laws currently active in Puerto Rico. A regulation clarifying various aspects of Act 60-2019 was published in September 2020.

The Incentives Code generally allows for a 15-year period of tax exemption. As a general rule, for exempt businesses, they are subject to a flat income tax rate of 4% on their exempt income, their dividends are not subject to withholding tax, their royalties paid to nonresidents are subject to a 12% withholding tax rate, real and personal property have a 75% exemption, and municipal license tax has a 50% exemption. Also, the Incentives Code provides for a flexible tax exemption in which the exempt business has the option to select the tax years in which the tax exemption is applicable.

The Incentives Code includes subchapters for the different economic development incentives, which include, among others, the following:

- General incentives for small and medium businesses and certain businesses located in the municipalities of Vieques and Culebra
- Other incentives for the following:
 - Individual resident investors
 - Exports of goods and services
 - Financial and insurance services
 - Visitors' economy
 - Manufacturing
 - Infrastructure
 - Agriculture
 - Creative industries
 - Entrepreneurship

Each subchapter includes certain incentives specific to the corresponding activities detailed above. Depending on the eligible activity, certain exceptions to the general rules may apply.

Alternative minimum tax. The alternative minimum tax (AMT) is designed to prevent corporations with substantial economic income from using preferential deductions, exclusions and credits to substantially reduce or eliminate their tax liability. After 31 December 2018, the AMT rate is 18.5% for taxpayers with a volume of business of less than USD3 million and applies to the extent that the AMT exceeds the regular tax liability. A USD500 minimum AMT may apply instead of the AMT rates. If a taxpayer's volume of business is USD3 million or more, then the applicable AMT rate is 23%.

Alternative minimum taxable income is determined by adding back certain tax preferential deductions to the taxable income computed for regular income tax purposes. For purposes of the AMT calculation, the net operating loss deduction is limited to 70% of the alternative minimum taxable income. In addition, the following deductions are allowed in determining net income subject to the AMT:

- 125% of salaries paid and reported on PR-W2 forms
- Payments for services directly related to the trade or business of the corporation if such payments were reported on the informative returns
- Rent payments if such payments are reported on the informative returns
- Contributions to health and accident plans of the employees
- Utility expenses directly related to the trade or business
- Publicity expenses directly related to the trade or business of the corporation if such payments were reported on the informative returns
- Property, public liability and malpractice insurance directly related to the trade or business of the corporation if such payments were reported on the informative returns
- Straight-line depreciation method
- Interest paid
- Taxes, bad debts, contributions to employee trusts, annuities or compensation, charitable donations and agriculture income, directly related to the operation of a trade or business

In accordance with the Code, informative returns (Form 480.7E) related to advertisements, insurance premiums, telecommunications services, internet access and cable or satellite television must be prepared by the service provider and a copy of the filed form provided to the payer (commercial client) no later than 28 February of the following calendar year for which the declaration was filed.

In addition, 60% of adjusted financial statement income in excess of adjusted taxable income is included in determining the amount subject to tax. Any AMT paid may be recovered in subsequent years as a credit to the regular tax when the regular tax is in excess of that year's AMT. The allowable credit may not exceed 25% of the excess of the net regular tax over the net AMT.

Capital gains. The holding period for long-term capital transactions is one year for sales or exchanges occurring after 30 June 2014, and the special applicable tax rate is 20%.

Losses from the sale or exchange of capital assets are allowed only to the extent of 80% of the gains from the sale or exchange

of such assets for tax years beginning after 31 December 2014 and before 1 January 2019. For tax years commencing after 31 December 2018, losses from the sale or exchange of capital assets are allowed to the extent of 90% of the gains from sale or exchange of such assets.

Capital losses can be carried forward for seven years to offset capital gains for tax periods after 31 December 2012.

Business assets that are not part of inventory are generally accorded capital gain treatment in the case of a gain and ordinary loss treatment in the case of a loss.

Administration. Corporate tax returns are due on the 15th day of the fourth month after the close of the taxable year. Extensions are available for up to six months for tax years commencing after 31 December 2016; however, the tax must be fully paid by the original due date. For income tax returns related to the 2020 tax year that are due on or before 15 April 2021, the Secretary of the Treasury is authorized to postpone the due date until 15 June 2021. However, the extension was granted until 17 May 2021. Estimated tax payments are required on a quarterly basis. Estimated tax equals the lesser of the following:

- 90% of the tax for the tax year
- The greater of the following:
 - 100% of the total tax liability of the prior year
 - The tax liability determined using current tax rates and applicable law based on the taxable income from the preceding year's tax return

Tax returns of partnerships, Special Partnerships and limited liability companies that elected to be treated as partnerships and corporations of individuals, among others, are due on the 15th day of the third month after the close of the tax year. Extensions are also available for up to six months for tax years commencing after 31 December 2016. However, the tax must be fully paid by the original due date.

The PR Code grants the Puerto Rico Treasury Department (PRTD) the authority to establish the form, manner and place in which “large taxpayers” must file their income tax returns. For this purpose, a “large taxpayer” is a taxpayer engaged in a trade or business in Puerto Rico that meets at least one of the following requirements:

- It is a commercial bank or trust company.
- It is a private bank.
- It is a securities or brokerage house.
- It is an insurance company, including an international insurer.
- It is an entity engaged in the business of telecommunications.
- It is an entity that had a volume of business of USD50 million or more in the preceding tax year.

Starting 10 December 2018, the Code allows large taxpayers to request an administrative determination from the Secretary of the Treasury to be removed from the large taxpayer category for subsequent tax years. The petition must be made through the filing of a formal ruling request.

Dividends. Corporations engaged in a trade or business in Puerto Rico may deduct 85% of the dividends they receive from

domestic (Puerto Rican) corporations, subject to limitations. Dividends received by domestic corporations or partnerships from controlled domestic corporations or partnerships are 100% deductible.

Dividends paid to nonresident corporations are subject to a 10% withholding tax.

A 10% tax is imposed on implicit dividends. This tax, which is essentially a prepayment of a tax on dividends, is imposed on the implicit dividend received by a foreign owner from an entity taxed as a corporation. A foreign shareholder is defined as a nonresident person who owns directly or indirectly 50% or more of the interests in an entity. For these purposes, an implicit dividend is defined as the lesser of the following:

- The average value of certain assets held outside Puerto Rico
- Accumulated earnings and profits of the corporation at the end of the year

The following entities are excluded from this tax:

- Not-for-profit organizations
- International insurers
- International financial entities
- Foreign corporations taxed under PR Code Section 1092.02 (that is, branch profit tax)

Foreign tax relief. A tax credit is allowed for foreign taxes incurred, but is limited to the equivalent Puerto Rican tax on the foreign-source portion of taxable income. A foreign tax credit is also allowable under the AMT system, subject to limitations.

C. Determination of trading income

General. Income for tax purposes is computed in accordance with generally accepted accounting principles, as adjusted for certain statutory provisions. Consequently, taxable income frequently does not equal income for financial reporting purposes.

Interest income derived from certain instruments issued by the governments of the United States or Puerto Rico is exempt from tax. Expenses related to the generation of this type of income are not deductible.

For expenses to be deductible, they must be incurred wholly and exclusively for the production of income. Statutory provisions limit the amounts of certain deductible expenses.

A disallowance of 51% of payments made to related parties not engaged in trade or business in Puerto Rico, including the allocation of expenses between a branch and its home office, applies in the calculation of taxable income for regular income tax purposes unless the taxpayer provides a transfer-pricing study prepared under Section 482 of the United States Internal Revenue Code. This adjustment does not apply to entities operating with tax grants under tax incentive laws with respect to their operations covered under the grant.

Noteworthy changes with respect to tax deductions were introduced in recent years. The following changes were introduced with respect to tax deductions for tax years commencing after 31 December 2018:

- Meals and entertainment expense: The 50% disallowance for deductions related to meals and entertainment expenses is increased to 75% and is further limited to a maximum of 25% of gross income for the tax year.
- Travel and lodging expense: Travel and lodging expenses are limited to 50% of the amount paid or incurred.
- Settlement payments in sexual harassment cases. A deduction is not allowed for settlement payments in sexual harassment cases that include a nondisclosure clause.
- Charitable contributions: The deduction for charitable contributions made by corporations is allowed only if the contributions are made to nonprofit entities certified by the PRTD that provide services to Puerto Rico residents.
- Automobile expenses: Taxpayers may deduct actual expenses incurred for the use and maintenance of automobiles or utilize a standard mileage rate, subject to the limits established by the Secretary of the PRTD.
- College students' deduction: Commencing after 31 December 2018, an employer may claim a 150% to 200% deduction for salaries paid to each college student and recently graduated individual who is hired to work at least 20 hours per week for 9 months or a minimum 800 hours and makes at least USD10 per hour. To claim the deduction, the employer must report the salaries in the annual wage statement, Form 499R-2/W-2PR.

Inventories. Inventory is valued for tax purposes at either cost or the lower of cost or market value. In determining the cost of goods sold, the two most commonly used methods are first-in, first-out (FIFO) and last-in, first-out (LIFO). The method chosen must be applied consistently, except that an election to change from FIFO to LIFO may be made without prior permission.

Tax depreciation. A depreciation deduction is available for most property (except land) used in a trade or business. The time period over which an asset is depreciated is based on the asset classification. The following three depreciation methods are allowed in Puerto Rico:

- Straight-line
- A method similar to the US ACRS method
- Flexible depreciation

Deductions for ACRS depreciation are allowed only for assets acquired in tax years beginning on or after 1 July 1995. Deductions for flexible depreciation are allowed only for assets acquired in tax years beginning before 1 July 1995. The flexible method is limited to the following types of businesses:

- Construction
- Agriculture
- Selling or leasing of buildings
- Manufacturing
- Tourism
- Shipping

Businesses enjoying tax exemption (see Section B) may not use the flexible depreciation method. The amount of the flexible depreciation deduction is limited to a percentage of taxable income.

Depreciation computed under the straight-line depreciation method is not recaptured on the sale of an asset, but depreciation

computed under the flexible depreciation and ACRS methods is subject to recapture.

Intangible property (other than goodwill) acquired by purchase or developed after 1 September 2010 is depreciated using the straight-line method over the lesser of 15 years or the useful life of the property. Limitations on intangibles acquired from related parties may apply under certain conditions.

For tax years commencing after 31 December 2018, a business with USD3 million or less in volume of business may elect to depreciate, amortize or deplete certain machinery, equipment, personal property, appliances or any other fixed assets over a useful life of two years.

Relief for losses. Net operating losses incurred during tax years beginning after 31 December 2004 and before 1 January 2013 may be carried forward for 12 years. For net operating losses incurred during tax years beginning after 31 December 2012, the carryforward period is 10 years. For years beginning before 1 January 2005, the carryforward period was seven years.

The deduction for net operating losses is limited to 90% (rather than 80% under past law) of the net income.

In June 2020, Puerto Rico enacted legislation that provides, among other COVID-19 relief measures, a two-year carryback period for net operating losses generated as a direct result of the COVID-19 pandemic. Large taxpayers, as defined in the Code, are excluded from the net operating loss carryback provisions as well as taxpayers whose volume of business exceeds USD10 million. In addition, regarding the carryforward provisions, there is a waiver of the 90% limitation on the net operating loss deduction generated during the 2020 tax year, subject to certain limitations.

Groups of companies. Affiliated corporations doing business in Puerto Rico may not elect to file a single income tax return on a consolidated basis.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Special excise tax; imposed on the acquisition from a related party of personal property manufactured in Puerto Rico and related services by a nonresident foreign corporation or partnership; if the provider has gross receipts in excess of USD75 million for any of the three preceding taxable years and if certain other requirements are met (the tax rate is fixed until 2027 when the tax expires)	4
Sales and use tax imposed on tangible personal property, taxable services, admission rights and mixed transactions; specific exemptions and exclusions are provided	10.5
Municipal sales and use tax; imposed by municipalities on taxable items; specific exemptions and exclusions are provided	1

Nature of tax	Rate (%)
Sales and use tax; imposed on certain business-to-business (B2B) services and designated professional services (DPS) (effective from 1 July 2020, B2B and DPS services provided by merchants with gross sales equal to or less than USD300,000 are exempt from the 4% sales and use tax); B2B services and DPS are not subject to the 1% municipal sales and use tax	4
Excise taxes on specified items, such as imports of cigarettes, gasoline and other fuels, vehicles, heavy equipment and alcoholic beverages	Various
Payroll taxes	
Federal unemployment insurance (FUTA), imposed on first USD7,000 of wages (a credit of 5.4% is given for Puerto Rican unemployment tax; the overall rate can be less than 6%)	6
Workmen's compensation insurance, varies depending on nature of employee's activities	Various
Social security contributions; subject to the same limitations as in the United States; imposed on	
Wages up to USD147,000 (for 2022); paid by Employer	6.2
Employee	6.2
Medicare portion (hospital insurance; for 2022); paid by	
Employer	1.45
Employee (subject to an additional 0.9% of Medicare tax for wages in excess of USD200,000; no employer matching contribution for Medicare Tax)	1.45
Municipal license tax; on gross sales volume (if volume exceeds USD3 million, a financial statement certified by a certified public accountant [CPA] licensed in Puerto Rico must accompany the business volume declaration); rate varies by municipality; payable by	
Financial institutions	1 to 1.5
Other businesses	0.2 to 0.5
Property taxes (if volume exceeds USD3 million, a financial statement certified by a CPA licensed in Puerto Rico must accompany the tax return); rate varies by municipality	
Personal property	5.80 to 10.33
Real property	8.03 to 12.33
Additional special tax on insurance premiums; imposed on premiums earned by insurance companies; tax must be paid on or before 31 March of the following year (exemption is provided for domestic insurers maintaining a home office in Puerto Rico)	1

E. Miscellaneous matters

Financial statements requirements. All entities engaged in trade or business in Puerto Rico must submit financial statements with their income tax returns.

Audited financial statements are required if the volume of business is equal to or greater than USD10 million. As a general rule, not-for-profit corporations and entities with a volume of business of less than USD3 million are not required to file audited financial statements.

Entities with volume of business less than USD1 million are not required to submit audited financial statements. However, for years after 31 December 2018, if Agreed Upon Procedures (AUP) prepared by a CPA licensed to practice in Puerto Rico are voluntarily submitted, certain limitations related to claiming deductions for purposes of AMT and the basic alternative tax (BAT) do not apply. Entities may also decide to prepare audited financial statements instead; in this case, AMT and BAT do not apply.

If the volume of business is equal or greater than USD3 million but less than USD10 million, audited financial statements are required but may be replaced with AUP issued by a CPA licensed to practice in Puerto Rico. In this case, any of the reports, the audited financial statements or the AUP should suffice for the entity not to be limited on the deductibility of the expenses for AMT and BAT.

Related-party entities are generally required to submit combined or consolidated audited financial statements. However, individual audited financial statements are allowed in certain instances. For a group of related-party entities with USD10 million or more in aggregate, each entity with volume of USD1 million or more is required to submit audited financial statements separately. For those with a volume of less than USD1 million, AUP must accompany the income tax return.

Financial statements must be prepared in accordance with US generally accepted accounting principles. Other detailed rules apply to the preparation of financial statements, including rules regarding foreign corporations and related entities, such as the requirement to submit supplemental information schedules.

For years starting after 31 December 2018, every entity required to submit audited financial statements is required to include an uncertain tax position (UTP) schedule. The schedule must include details about the UTPs as provided under accounting for income tax guidance (US Accounting Standards Codification 740). This relatively new reporting requirement is similar to the existing requirement in place at the US federal level.

Entities engaged in a trade or business in Puerto Rico that have a volume of business in excess of USD10 million must submit, together with their property and volume of business declaration tax returns, audited financial statements certified by a CPA licensed to practice in Puerto Rico. For property and volume of business declaration tax returns, if the volume of business is

equal or greater than USD3 million but less than USD10 million, the company may opt between audited financial statements or AUP issued by a CPA licensed to practice in Puerto Rico.

In addition, for corporations with a volume of business equal or greater than USD3 million, audited financial statements are required to be attached to the annual report filed with the Secretary of the Puerto Rico Department of State. For corporations with a volume of business of less than USD3 million, a balance sheet with relevant footnotes prepared in accordance with generally accepted accounting principles must accompany the annual report filed with the Secretary of State. The rules vary for entities that are part of a controlled group in the case of domestic corporations.

If foreign corporations do not keep available books of account and supporting documents in Puerto Rico, all of their tax deductions may be denied. A foreign corporation is deemed to be in compliance with this requirement if it can physically produce its books and records in Puerto Rico within 30 days. An extension of 15 days may be granted.

F. Tax treaties

Puerto Rico does not participate in US income tax treaties and has not entered into any treaties with other jurisdictions.

Qatar has two tax regimes, which are the state regime administered by the General Tax Authority (GTA) and the Qatar Financial Centre (QFC) regime administered by the QFC Tax Department. Unless specifically stated otherwise, the information in this chapter relates to the state tax regime.

A. At a glance

Corporate Income Tax Rate (%)	10
Capital Gains Tax Rate (%)	0/10
Branch Tax Rate (%)	10

Withholding Tax (%)	5
Net Operating Losses (Years)	
Carryback	0
Carryforward	5

B. Taxes on corporate income and gains

Corporate income tax. Qatar has two independent taxation frameworks. State-registered entities are subject to the State Income Laws, while entities registered in the QFC are subject to QFC regulations.

The basis of taxation in Qatar is territorial. Persons carrying on business activities in Qatar are subject to tax on profits arising from sources in Qatar. Income from outside Qatar is generally not subject to tax.

Companies are exempt from tax to the extent that they are owned by Qatari shareholders who are tax resident in Qatar and to the extent of the profits that are attributable to citizens of the other Gulf Cooperation Council (GCC) countries (Bahrain, Kuwait, Oman, Saudi Arabia and the United Arab Emirates) who are tax resident in Qatar.

Rates of corporate income tax. The standard corporate tax rate is 10%.

Companies engaged in petrochemical industries and petroleum operations are taxed at the rates specified in their agreements, provided that the tax rate is not less than 35% on their taxable income. Taxable income is determined in accordance with the provisions of the underlying production-sharing contract or development and fiscal agreement. Petroleum operations are defined by law as the exploration for petroleum, improving oil fields, drilling, well repair and completion, the production, processing and refining of petroleum, and the storage, transport loading and shipping of crude oil and natural gas. Oilfield service companies contracting with petroleum and petrochemical companies are subject to the standard 10% tax rate.

Foreign international shipping and aviation companies are exempt from tax in Qatar if Qatari shipping and aviation companies enjoy similar reciprocal treatment in the respective foreign countries.

Not-for-profit entities that are registered in Qatar or in another country are not covered by the provisions of the Qatar Income Tax Law and are accordingly exempt from tax. However, they must withhold tax if applicable.

The income of businesses registered and operating in the QFC is subject to a standard rate of tax of 10%. Regulated and non-regulated activities may be carried on from the QFC. Regulated activities include the following:

- International banking
- Insurance and reinsurance
- Fund management
- Brokerage and dealer operations
- Treasury management
- Funds administration and pension funds
- Financial advice and back-office operations

Non-regulated activities include the following:

- Professional and business services (including, but not limited to audit, legal, consultancy, tax advisory, media and public relations, project management, architecture and engineering)
- Holding company and headquarter hosting
- Special-purpose company
- Single-family office
- Ship brokering and agency services
- Trust and trust services

Tax incentives. Taxpayers may seek approval for an exemption or preferential tax rate for projects based on criteria related to the nature of a project or its location. The Ministry of Finance may grant exemptions for up to five years. The Council of Ministers may approve exemptions for longer periods, or approve a preferential tax rate.

Taxpayers enjoying tax exemptions are required to submit their annual corporate tax return showing the amount of income that would have been taxable without the exemption, and the amount of tax exempted. Failure by a tax-exempt entity to file exemption documents together with the tax return results in a penalty of QAR10,000.

The income of businesses operating at the Qatar Science and Technology Park (QSTP) is exempt from tax. However, such businesses must file annual tax returns, together with audited financial statements, with the GTA. QSTP-registered entities must also withhold tax if applicable.

Activities that may be carried out at the QSTP include the following:

- Research and development of new products
- Technology development and development of new processes
- Low-volume, high-value-added specialist manufacturing
- Technology-related consulting services, technology training and promotion of academic developments in the technology fields
- Incubating new businesses with advanced learning

To support financing and investment activities carried on by QFC entities, the QFC tax regulations provide for the establishment of tax-exempt vehicles. A QFC entity that is one of the following exempt vehicles may elect for special tax-exempt status, subject to meeting certain conditions:

- Registered Fund (QFC Scheme or a Private Placement Scheme)
- Special Investment Fund (permitted activities are private equity investments, venture capital investments, investments in property and investments on behalf of a single family)
- Special Funding Company (includes holding company and special-purpose company)
- Alternative Risk Vehicle

QFC firms whose shares are listed on the Qatar Stock Exchange may elect for special tax exemption, subject to meeting certain conditions.

QFC firms that are engaged in captive insurance or reinsurance business, and of which at least 90% of their ordinary capital, profit and asset entitlement is beneficially, directly or indirectly owned by Qatari nationals (and are licensed to engage in

unregulated activities), and investment managers meeting certain conditions may elect a 0% concessionary tax rate for their chargeable profits.

In addition, a newly registered and incorporated QFC company may be able to claim reimbursement in the form of a tax credit with respect to tax losses incurred in the first two accounting periods, subject to meeting all criteria. If a QFC company receives a reimbursement of tax losses, it is automatically precluded for the following three accounting periods from electing special exemption status or the concessionary 0% tax rate.

Law No. 24 of 2018 provides a tax exemption for non-Qatari investors holding shares of companies or units in investment funds listed on the Qatar Stock Exchange (non-QFC entities). This exemption also extends to profits realized on the sale, transfer or exchange of listed shares or investment fund units.

Capital gains. Capital gains are aggregated with other income and are subject to tax at the regular corporate income tax rate. The sale by foreign nationals and nonresident GCC nationals of shares in Qatar tax resident companies is taxable at a rate of 10%. However, the sale of shares (and the share of profits) in listed companies is exempt from tax.

Gains resulting from the revaluation of assets that are used as in-kind contributions to the capital of another resident stockholding company are exempt, provided that the shares of that company are not sold within five years.

Capital gains derived by a QFC taxpayer may be exempt from tax in the QFC if they are considered non-local source or meet the conditions of the QFC participation exemption.

Administration. A taxpayer must register with the GTA via the GTA tax administration portal, Dhareeba, and obtain a Tax Card and Tax Identification Number within 60 days after commencing a taxable activity in Qatar or register with the Ministry of Economy and Commerce. Failure to register for tax results in a penalty of QAR20,000.

The tax year runs from 1 January to 31 December, and a taxpayer must use this accounting period unless approval is obtained for a different year-end. Approval to use an alternative accounting period is granted in exceptional cases only.

In general, all companies, including tax-exempt companies (see Tax incentives), must file corporate income tax declarations, denominated in Qatar riyals, within four months after the end of the accounting period. The due date may be extended at the discretion of the GTA, but the length of the extension may not exceed four months.

Tax is payable on the due date for filing the tax declaration. The due date for payment of taxes may be extended if the filing date is extended and if the taxpayer provides reasons acceptable to the GTA. Alternatively, the GTA may allow taxes to be paid in installments during the extension period. Tax is payable in Qatari riyals.

Penalties for late filing are levied at a rate of QAR500 per day, subject to a maximum of QAR180,000. The penalty for late

payment equals 2% of the tax due for each month or part of a month for which the payment is late, up to the amount of the tax due.

The GTA may issue tax assessments based on a presumptive basis or reassess by applying market prices to certain related-party transactions in certain circumstances. The tax law provides for a structured appeals process with respect to such tax assessments. Correspondence for all appeals must be in Arabic. The appeals procedure consists of the following three stages:

- Correspondence and negotiations with the GTA
- Formal appeal to an Appeal Committee
- The commencement of a case in the judicial courts

The GTA may inspect a taxpayer's books and records, which should be maintained in Qatar. The books and records are not required to be maintained in Arabic. The accounting books and records must be maintained for 10 years following the year to which the books, registers and documents are related.

Tax return submissions and communications from the GTA to the taxpayer with respect to inquiries, assessments and appeals are communicated via the Dhareeba online portal.

For QFC entities, including tax-exempt entities, the annual income tax declaration must be submitted and the corresponding tax due must be paid within six months after the end of the accounting period.

Financial sanctions for the late submission of the annual QFC tax declaration are levied based on when the delayed filing is submitted. In addition, the delay payment charge on unpaid tax, which is currently 5% per year, is imposed. An additional financial penalty up to the amount of assessed tax due may be levied by the QFC Tax Department.

Withholding taxes. Payments with respect to royalties, interest, commission, services conducted wholly or partially in Qatar made to nonresident entities for activities not connected with a permanent establishment (PE) in Qatar (essentially, those without a Tax Card issued by the GTA) are subject to 5% withholding tax. Services are deemed to be conducted in Qatar to the extent that they are used, consumed or exploited in Qatar, even if rendered wholly or partially outside Qatar.

Companies or PEs in Qatar that make the above payments must deduct tax at source and remit it to the GTA by the 15th day of the month following the month in which the payment is made. The penalty for a failure to deduct withholding tax equals 100% of the withholding tax amount. Penalties for late remittance to the GTA of the amount withheld are levied at a rate of 2% per month, up to a maximum of 100% of the withholding tax due.

There is currently no withholding tax regime in the QFC. QFC taxpayers are not required to withhold tax.

Dividends. Dividends paid by a Qatar tax resident company are not subject to withholding tax. Income distributed from profits that have already been subject to Qatar taxation are not subject to further taxation in the hands of the recipient. Dividends paid by an entity that has a tax exemption are exempt from tax.

Dividends paid to a QFC taxpayer are not subject to tax in the QFC.

Foreign tax relief. A deduction is allowed for income taxes incurred by the taxpayer abroad if the revenues related to the foreign taxes are taxable in Qatar, subject to other deductibility requirements. In addition, foreign tax relief is available under the tax treaties with the countries listed in Section E.

In the QFC, tax resident taxpayers may credit foreign taxes imposed on income that is also taxed in the QFC either through a double tax treaty or unilateral relief, or they may elect to treat such taxes as deductible expenses.

C. Determination of trading income

General. The following are some of the items that are included in taxable income:

- Interest and returns realized outside Qatar from amounts generated by taxable activity carried on in Qatar
- Revenues earned from an activity performed in Qatar, including trading, contracting and the provision of services
- Revenues earned from the partial or total performance of a contract in Qatar
- Service fee income received by head offices, branches or related companies
- Certain dividend income and capital gains on real estate located in Qatar
- Interest on loans obtained in Qatar

Normal business expenses are allowable and must be determined under the accrual method of accounting. Branches are limited in the deduction of head office expenses (see *Head office overhead*). Self-employed individuals engaged in a professional activity may choose to deduct a notional expense equal to 30% of their total income instead of all of the expenses and costs that are allowed to be deducted. Expenses for entertainment, hospitality, meals, holidays, club subscriptions and client gifts are subject to restrictions. Guidance contained in supporting Executive Regulations specifies that these expenses are subject to an allowable ceiling of 2% of net income, up to a maximum of QAR500,000.

Inventories. Inventories must be valued using international accounting standards.

Provisions. General provisions, such as bad debts and stock obsolescence, are generally not allowed. Specific bad debts that are written off are deductible to the extent that they satisfy conditions set by the GTA. Deductions by banks for loan-loss provisions are the subject of periodic instructions from the Qatar Central Bank and, in general, provisions are allowable up to a ceiling of 10% of net profits.

Head office overhead. In general, charges of a general or administrative nature imposed by a head office on its Qatar branch are allowed as deductions, provided that they do not exceed 3% of turnover less subcontract costs. However, for banks, the limit is 1%. If a project derives income from both Qatari and foreign sources, the limit is 3% of the total revenues of the project, less subcontract costs, revenues from the supply of machinery and equipment overseas, revenues derived from services performed

overseas, value of paid reinsurance premiums and other income not related to activities in Qatar.

No such restriction applies in the QFC.

Tax depreciation. Under the Executive Regulations relating to the Qatar Income Tax Law, assets should be depreciated on a straight-line basis using the following annual depreciation rates:

Asset	Rate (%)
<i>Buildings and facilities</i>	
Buildings and durable facilities	5
Prefabricated light buildings	10
Roads, bridges, railways, and electrified railways	5
Pipelines, tanks and platforms	5
Pipelines and refining equipment within the refinery and small tanks	10
Networks and channels	5
<i>Transportation</i>	
Cargo and passenger means of transportation, including cars, vehicles, tractors, trailers, cranes and motorcycles	20
Ships and boats	10
Airplanes and helicopters	20
Rail transport and electrical rail transport	10
<i>Intangible assets</i>	
Pre-establishment expenses	50
Trademarks, patents and similar items	15
Capitalized research and development expenses	20
<i>Machinery and equipment</i>	
Computer hardware, software and accessories	33
Machinery, equipment and electrical appliances	20
Industrial machinery and equipment	20
Machinery and public works and construction equipment	20
Drilling tools	15
Air conditioners	25
Passenger and cargo elevators and escalators	15
Furniture and office equipment	15
Gas fixture, transportation and distribution equipment	5
Electricity and water production, transmission and distribution equipment	5
Machinery, equipment and other fixtures	15
<i>Hotels, hostels, resorts, restaurants and cafes</i>	
Cooking and washing machines	20
Glass utensils	50
Other utensils	25
Furniture, furnishings and décor works	25
Swimming pools and accessories thereof	15

Approval of the Minister of Finance is required for departure from the tax depreciation rates noted above. Departures from these rates are normally allowed only for new startup projects if the project owner requests permission to adopt different depreciation rates based on the presentation of appropriate justifications to the Minister.

The Executive Regulations limit the deductibility of depreciation to the amount reflected in the financial statements.

In the QFC, tax depreciation should be in line with the depreciation in the financial accounts, subject to additional requirements of the QFC tax regulations.

Relief for losses. Losses may be carried forward for five years. The carryback of losses is not allowed.

In the QFC, losses may be carried forward indefinitely, and the carryback of losses is not allowed.

Groups of companies. No tax regulations cover groups of companies in the Qatar Income Tax Law.

In the QFC, companies that are members of the same group may apply for a group relief (offset of taxable profits and losses).

D. Other significant taxes

Qatar has signed and ratified the GCC Value-Added Tax (VAT) Framework Agreement, and it is anticipated that Qatar will introduce VAT in 2022. Because the GCC operates as a single customs territory, the GCC VAT Framework Agreement follows many of the principles in the EU VAT system.

The standard rate of VAT in Qatar is expected to be 5%.

Qatar has also signed and ratified the GCC Common Excise Tax Agreement and has introduced excise tax on tobacco and tobacco derivatives, carbonated drinks, energy drinks, and special-purpose goods as of 1 January 2019.

E. Miscellaneous matters

Qatar Free Zones. The Qatar Free Zone Authority (QFZA) was created in 2018 as an independent authority to regulate and develop the Qatar Free Zones (QFZs). The QFZs are situated in geographically strategic areas to provide investors with direct access to Qatar's airports and seaports and connect them with global markets. Foreign investors may establish a wholly owned company or branch in these QFZs. In addition, entities licensed in the QFZs are entitled to a 20-year income tax exemption from the establishment of the QFZA and customs exemption on goods imported into them, renewable for similar or more periods.

Foreign-exchange controls. Qatar does not impose foreign-exchange controls. Equity capital, loan capital, interest, dividends, branch profits, royalties and management fees are freely remittable.

Transfer pricing and anti-avoidance legislation. The Qatar Income Tax Law contains anti-avoidance provisions. The GTA may nullify or alter the tax consequences of any transaction that it has reasonable cause to believe was entered into to avoid or reduce a tax liability.

If a company carries out a transaction with a related party that was intended to reduce the company's taxable income, the income arising from the transaction is deemed to be the income that would have arisen had the parties been dealing at arm's length.

Under Qatar's tax regime, in determining the arm's-length value, the GTA requires the use of the comparable uncontrolled price (CUP) method. Under this method, the price of the service or

goods is deemed to be the price that would have been applied if the transaction had been between unrelated parties. If the information required to apply the CUP method is not available, an application to apply a different transfer-pricing method approved by the Organisation for Economic Co-operation and Development (OECD) must be submitted to the GTA. Under the QFC tax regime, transfer pricing may be determined using the accepted OECD transfer-pricing methods, and there is no requirement to seek pre-approval to use any of these transfer-pricing methods.

A group Master File and Qatar Local File should be submitted via the GTA's Dhareeba portal if one of the group's entities is resident outside Qatar and if the local entity or permanent establishment's annual revenue or total assets meets or exceeds the statutory threshold of QAR50 million in the reporting year.

In addition to the transfer-pricing documentation, there is an additional transfer-pricing compliance requirement in Qatar. A transfer-pricing statement (together with the annual tax declaration) should be completed and submitted by the Qatar entity via the GTA's Dhareeba portal if the local entity or permanent establishment's annual revenue or total assets meets or exceeds the statutory threshold of QAR10 million in the reporting year.

There is currently no formal advance pricing agreement (APA) regime in Qatar. However, APA regulations are expected to be issued by the local tax authority soon.

Under the QFC tax regime, a taxpayer's presentation to the QFC Tax Department of a Qatar local file or a local transfer-pricing documentation report (including functional analysis and benchmarking study) is generally required in the event of a tax or transfer-pricing inquiry.

Country-by-Country Reporting. On 14 November 2017, Qatar joined the inclusive framework for the global implementation of the Base Erosion and Profit Shifting (BEPS) Project. As a BEPS Associate, Qatar is committed to implementing four minimum standards under the BEPS Project, one of which is Action 13 on transfer-pricing documentation.

On 19 December 2017, Qatar signed the Multilateral Competent Authority Agreement on the exchange of Country-by-Country (CbC) Reports. The signing of this agreement enables Qatar to efficiently establish a wide network of exchange relationships for the automatic exchange of CbC Reports. As of the end of 2020, Qatar has activated its (non-reciprocal) exchange relationship with approximately 60 countries.

As part of the proposed implementation of Action 13 of the BEPS Project, Qatar published Ministerial Decision No. 16 of 2019, which outlines CbC Reporting requirements in Qatar that are applicable for tax years beginning on or after 1 January 2018. The CbC Reporting rules are aligned with the model legislation set out in the OECD's BEPS Action 13 Final Report on CbC Reporting. These requirements also apply to entities that are registered in the QFC.

An ultimate parent entity that is tax resident in Qatar is required to submit a CbC Reporting notification and file a CbC Report in

Qatar if it is a member of a multinational enterprise group that had consolidated group revenue of at least QAR3 billion in the preceding fiscal year. The annual CbC Reporting notification must be submitted by the end of the reporting tax year. CbC Reports should be filed with Qatar's Tabadol Portal within 12 months after the end of the reporting tax year.

Noncompliance with CbC Reporting notification is subject to a penalty of QAR100 per day for delay of filing or submission of false or incorrect information in the notification. Failure to comply with the CbC Reporting requirements is subject to a penalty of QAR500 per day for delay of filing or submission of false or incorrect information in the report.

Currently, Qatar's CbC Reporting requirements do not apply to entities of a foreign company that operates in Qatar in the form of a subsidiary or a PE.

Thin-capitalization rules. The Executive Regulations indicate that for tax residents, the amount of an intercompany loan should not exceed the debt-equity ratio of 3:1 for interest deductibility purposes.

Interest paid by a PE to its head office or a related entity is not deductible.

However, under the QFC tax regime, the following are safe harbor debt-to-equity ratios:

- 2:1 for nonfinancial institutions
- 4:1 for financial institutions

Although the above ratios are non-statutory and are non-binding on taxpayers and the QFC Tax Department, they are expected to be accepted as default thresholds by the QFC Tax Department. The safe-harbor guidance applies for accounting periods beginning on or after 1 January 2012. A higher debt-to-equity ratio may be accepted by the QFC Tax Department.

Supply and installation contracts. Profits from "supply only" operations in Qatar are exempt from tax because the supplier trades "with" but not "in" Qatar. If a contract includes work elements that are performed partially outside Qatar and partially in Qatar, and if these activities are clearly separated in the contract, only the revenues from the activity performed in Qatar are taxable in Qatar.

Contract retention. All ministries, government departments, public and semipublic establishments and other payers must retain the final contract payment or 3% of the contract value (after deducting the value of supplies and work done abroad), whichever is greater, due to foreign branches that have a commercial registration linked to a specific project with a duration of at least one year. The contract retention payable to the contractor or subcontractor must be retained until the contractor or subcontractor presents a tax clearance from the GTA confirming that all tax liabilities have been settled.

Contract retention does not apply to QFC taxpayers.

Contract reporting. Ministries and other government bodies, public corporations and establishments, and companies are required to report to the GTA on contracts concluded with nonresidents

without a PE in Qatar, regardless of their value. In addition, contracts concluded with residents or with nonresidents that have a PE in Qatar must also be reported to the GTA if the contract value amounts to QAR200,000 for service contracts, or to QAR500,000 for contracting, supply, and supply and service contracts. Copies of the contracts must also be submitted together with the statement, except for contracts concluded with nonresidents with no PE in Qatar that have a contract value not exceeding QAR100,000. A failure to comply results in a penalty of QAR10,000 per contract.

Contract reporting does not apply to QFC taxpayers.

Multilateral Instrument. On 4 December 2018, Qatar signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (Multilateral Instrument, or MLI). The MLI seeks to facilitate the efficient updating of existing tax treaties to incorporate treaty-related measures recommended by the OECD to counter base erosion and profit shifting, without the need for jurisdictions to bilaterally renegotiate each tax treaty.

Qatar deposited its instrument of ratification for the MLI with the OECD on 23 December 2019. The MLI entered into force on 1 April 2020.

At the point of the MLI ratification, Qatar indicated that it wants to amend its double tax treaties with 76 countries by using the MLI.

Common Reporting Standard. Qatar is one of the jurisdictions that has committed to implement the Common Reporting Standard (CRS). The CRS is a standard developed by the OECD relating to automatic exchange of financial account information and requires jurisdictions to obtain information from their financial institutions and automatically exchange that information with other jurisdictions on an annual basis. On 10 November 2017, Qatar signed the CRS Multilateral Competent Authority Agreement (CRS MCAA). The signing of the CRS MCAA enables Qatar to efficiently establish a wide network of exchange relationships for the automatic exchange of information under CRS.

The effective date for the CRS in Qatar was 1 July 2017. Reporting Financial Institutions (such as banks, funds, brokers, custodians and insurance companies offering cash value or annuity products) must have processes and procedures in place to meet their compliance requirements.

Individuals and entities that are not Reporting Financial Institutions should be prepared to provide relevant documentation to Reporting Financial Institutions to support their tax residency status.

The annual reporting deadline is 31 July following the year to which the data relates (subject to change by the GTA).

Economic substance rules. On 17 October 2021, Qatar introduced economic substance rules via the Resolution of the Minister of Finance No. 20 of 2021 for companies that are engaged in relevant activities and intellectual property activities and that benefit

from a Preferential Tax System (Qualified Entities). The rules will enter into force on 31 December 2023.

The Preferential Tax System is defined as any system that provides a preferential tax benefit that is not available under the general tax system of the state, regardless of its form, nature of benefit or its amount. Therefore, entities established under the QSTP, the Qatar Free Zone and the QFC (together referred to as Licensed Authorities) that are benefitting from the Preferential Tax System would be covered under these regulations.

The following are the relevant activities under the regulations:

- Head office
- Center for distribution and other services
- Finance acquisition of assets and leasing of assets
- Treasury funds management
- Banking
- Insurance
- Shipping
- Holding companies
- Technical consulting
- Technical training

To continue benefitting from the Preferential Tax System, Qualified Entities should meet certain requirements, such as conducting of a core income-generating activity in Qatar, having adequate number of full-time employees in Qatar, incurring an adequate amount of operational expenses to carry out activities and meeting the other requirements set by the Licensed Authorities.

The Resolution does not provide for reporting compliance requirements but requires Qualified Entities to maintain certain information to be provided to the Licensed Authorities and competent authorities on request.

F. Tax treaty withholding tax rates

The table provided below is intended purely for orientation purposes. It does not reflect the various special provisions of individual treaties or the withholding tax regulations in domestic law. The following is a table of treaty withholding tax rates.

	Dividends		Interest (a) %	Royalties %
	A %	B %

A Individuals and companies

B Qualifying companies

- (a) Some treaties provide for an exemption for certain types of interest, such as interest paid to public bodies and institutions. Such exemptions are not considered in this column.
- (b) Income may be taxed in the residence state at the rate provided under its domestic law.
- (c) Income is taxable only in the residence state at the rate provided under its domestic law.
- (d) The 5% rate applies if the beneficial owner has invested capital of more than USD100,000.
- (e) The 5% rate applies if the beneficial owner holds at least 25% of the capital of the company paying the dividends.
- (f) Dividends, interest and royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
- (g) Royalties are taxable only in the residence state at the rates provided under its domestic law if the recipient is the beneficial owner of the income.
- (h) This rate applies if the beneficial owner holds at least 10% of the capital of the company paying the dividends.
- (i) The 5% rate applies if the beneficial owner has owned directly or indirectly at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date on which the dividends are declared.
- (j) Dividends, interest and royalties are taxable in the residence state at the rates provided under its domestic law.
- (k) The 5% rate applies if the beneficial owner is an individual who holds directly at least 10% of the capital of the company paying the dividends and who has been a resident of the other contracting state for a period of 48 months immediately preceding the year in which the dividends are paid.
- (l) The 5% rate applies if the beneficial owner is an individual or a company that holds directly at least 10% the capital of the company paying the dividends. Otherwise, a 10% rate applies.
- (m) The 5% rate applies if the beneficial owner holds directly at least 10% of the capital of the company paying the dividends.
- (n) The 0% rate applies if the beneficial owner is a company that has its capital wholly or partly divided into shares and that holds directly at least 7.5% of the capital of the company paying the dividends.
- (o) The 10% rate applies if the individual holds at least 10% of the capital of the distributing company. Otherwise, the 15% rate applies.
- (p) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the voting stock of the company paying the dividends. The 0% rate applies to dividends distributed to certain state-owned entities.
- (q) The income is not taxable in either state.
- (r) The income may be taxed in the source state at the rate provided under its domestic law.
- (s) This rate applies if the beneficial owner is the government or a public institution that is wholly owned by the government or its political subdivisions or local authorities, of the other contracting state or a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends. Otherwise, the 10% rate applies.
- (t) The income is exempt from tax if it is beneficially owned by the government of the contracting state or a political subdivision or a local authority thereof or by the central bank of the other contacting state.
- (u) Dividends distributed by real estate investment trusts are subject to a 15% withholding tax, unless the beneficial owner is a pension scheme, in which case an exemption applies.

- (v) The treaty provides for several alternative conditions relating to the beneficial owner or the payer of the interest for the application of the 0% rate. This rate applies if one of these conditions is met. Otherwise, the domestic rate in the source state applies.
- (w) The 5% rate applies if the beneficial owner is a company that holds directly or indirectly at least 50% of the capital of the company paying the dividends or that has invested more than USD10 million or the equivalent in Qatari or Vietnamese currency in the capital of the company paying the dividends.
- (x) The 5% rate applies to royalties paid for the following:
- The use of, or the right to use, patents, designs or models, plans, or secret formulas or processes
 - The use of, or the right to use, industrial, commercial or scientific equipment
 - Information concerning industrial, commercial or scientific experience
- The 10% rate applies in other cases.
- (y) The income is taxable only in the source state at the rate provided under its domestic law.
- (z) The income may be taxed in the source state at the rate provided for under its domestic law.
- (aa) This rate applies if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital of the company paying the dividends.
- (bb) The 0% rate applies if the beneficial owner of the dividends is a company resident in the other contracting state. The 5% rate applies to all other beneficial owners of dividends resident in the other contracting state.
- (cc) See Section B.
- (dd) This rate applies if the beneficial owner of the dividends holds at least 10% of the capital of the company paying the dividends or if the beneficial owner is the state of Portugal, a political or administrative subdivision or a local authority thereof, or the central bank of Portugal.
- (ee) The 5% rate applies if the beneficial owner of the interest is a bank. A 10% rate applies in all other cases.
- (ff) The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 20% of the capital of the company paying the dividends.
- (gg) The rate is 0% if the beneficial owner is a company (other than a partnership). The rate is 5% of the gross amount of the dividends or interest in all other cases.
- (hh) The 5% rate applies if, for the six-month period ending on the date on which entitlement to the dividends is determined, the beneficial owner of the dividends owned at least 10% of the voting power or the total issued shares of the company paying the dividends, and if the company paying the dividends is not allowed a tax deduction for the dividends.
- (ii) The 0% rate applies if the interest is derived from government debt or if the beneficial owner is one of the following:
- A government entity
 - A bank
 - An insurance company
 - A securities dealer
 - A pension fund (conditions apply)
 - Any other enterprise, provided that in the three tax years preceding the tax year in which the interest is paid, the enterprise derives more than 50% of its liabilities from the issuance of bonds in the financial markets or from taking deposits for interest and more than 50% of the assets of the enterprise consist of debt-claims against persons not associated with the enterprise
- (jj) The 5% rate applies if the beneficial owner holds at least 10% of the capital of the company paying the dividends. The 0% rate applies to dividends paid to the other contracting state or a local authority, political subdivision or statutory body thereof.
- (kk) The 0% rate applies if the interest arises with respect to a government debt or debt listed on a recognized stock exchange.
- (ll) Exemptions apply to certain specified state-owned entities.
- (mm) The 0% rate applies to dividends beneficially owned by a contracting state, a political subdivision, a local authority, an investment authority, the central bank or a pension fund thereof or any other entity or institution that is recognized, by mutual agreement, as an integral part of the state and is exempt from tax in the source state.
- (nn) The exemption applies if the recipient company holds directly at least the following percentage of the capital of the company paying the dividends:
- 1% if the dividends are paid by a company, the shares of which are substantially and regularly traded on a stock exchange

- 5% if the beneficial owner of the dividends is a public body
 - 10% in other cases
- (oo) The 0% rate applies to dividends beneficially owned by a contracting state, a political subdivision, a local authority, an investment authority, the central bank or a pension fund thereof or any other institution or fund that is recognized, by mutual agreement, as an integral part of the state, political subdivision or local authority. The 5% rate applies if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends.
- (pp) The 5% rate applies to sales on credit of industrial, commercial or scientific equipment, and on loans granted by banks. The 10% rate applies in all other cases.
- (qq) The 5% rate applies to payments of royalties regarding copyrights of scientific works, patents, trademarks, secret formulas, processes or information concerning industrial, commercial or scientific experience.
- (rr) The 5% rate applies if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. The 0% rate applies to dividends beneficially owned by a contracting state, a political subdivision, a local authority, an investment authority, the central bank or a pension fund thereof or any other institution or fund that is recognized as an integral part of that state, political subdivision or local authority, as shall be agreed by mutual agreement of the competent authorities of the contracting states.
- (ss) This treaty is effective from 1 January 2022.
- (tt) The 5% rate applies if the beneficial owner is the “government,” as defined below, of a contracting state. The 10% rate applies if the beneficial owner is a company that holds at least 25% of the capital of the distributing company. Otherwise, the 15% rate applies.
- For the purposes of Article 10 “Dividends”, Article 11 “Interest” and Article 13 “Capital gains” of the double tax treaty, the term “government” means the following:
- Political subdivision
 - Local authorities
 - Central bank
 - Any other institution resident in that contracting state performing financial functions of a governmental nature and the capital of which is wholly owned directly or indirectly by that contracting state
- In the case of Qatar, the institutions referred to above are the following:
- Qatar Investment Authority
 - Qatar Holding
 - Qatar Development Bank
 - Qatar Energy (formerly known as Qatar Petroleum)
 - Qatar Retirement Funds
- (uu) The 0% rate applies if the beneficial owner is the “government” of the other contracting state. The term “government” has the same meaning as defined in footnote (tt) above.

Qatar has ratified tax treaties with Belgium, Eritrea, Fiji, Gambia, Mauritania, Nigeria and Paraguay. The entry into force dates of these treaties is unknown at this stage.

Qatar has signed treaties that are in the process of ratification with Bosnia and Herzegovina, Ethiopia, Ghana and Oman.

Qatar is in the process of negotiating, signing and ratifying tax treaties with Bangladesh, the Czech Republic, Egypt, Estonia, Eswatini, Gabon, Germany, Iceland, Libya, Lithuania, Montenegro, Peru, Tajikistan, Thailand, Turkmenistan, Uruguay and Uzbekistan.

Qatar is renegotiating its tax treaties with India, Morocco and Pakistan.

A. At a glance

Corporate Income Tax Rate (%)	16 (a)
Capital Gains Tax Rate (%)	16 (a)
Branch Tax Rate (%)	16 (a)
Withholding Tax (%) (b)	
Dividends	5 (c)
Interest	16 (d)(e)(f)(g)
Royalties	16 (d)(f)(g)
Commissions	16 (d)(g)
Certain Services Rendered Abroad	16 (d)(g)(h)
Services Rendered in Romania	16 (d)(g)
Gambling	1
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	7 (i)

- (a) See Section B.
- (b) These withholding tax rates are standard and final. They can be reduced under double tax treaties or European Union (EU) directives.
- (c) This tax may be reduced to nil for dividends paid to a legal entity residing in another EU member state or to a permanent establishment of an entity residing in an EU member state, if certain conditions relating to the dividend recipient and dividend payer are satisfied. These conditions are described in *Dividends* in Section B. Dividends paid by Romanian legal entities to pension funds resident in an EU member state, as defined by the law of such state, are exempt from withholding tax in Romania.
- (d) This withholding tax applies only if the income is not attributable to a permanent establishment in Romania.
- (e) The following types of interest derived by nonresidents are not subject to withholding tax:
- Interest from public debt instruments in national and foreign currency
 - Interest related to instruments issued by the National Bank of Romania to carry out monetary policy
 - Interest paid by Romanian legal entities to pension funds resident in an EU member state, as defined by the law of such state

- (f) The withholding tax rate is 0% for interest and royalties if certain conditions are satisfied, including the following principal conditions:
- The beneficial owner of the interest or royalties is a legal person resident in an EU member state or a permanent establishment of an entity resident in such a state.
 - The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.
- (g) The rate is 10% for income derived by nonresident individuals who are resident in another EU member state or in a country that has entered into a double tax treaty with Romania.
- (h) This withholding tax applies only to management and consultancy services rendered abroad. International transport and supplies of services ancillary to such transport are not subject to withholding tax.
- (i) Annual tax losses may be carried forward for seven years and are not adjusted for inflation.

B. Taxes on corporate income and gains

Corporate income tax. Resident entities are subject to tax on their worldwide income. An entity is resident in Romania if it satisfies any of the following conditions:

- It is incorporated in Romania.
- Its place of effective management and control is located in Romania.
- It is a legal entity that has its headquarters in Romania and that is incorporated in accordance with the European legislation.

Associations or consortia, which are not considered separate legal persons in Romania, are tax transparent. Different tax rules apply depending on the members of the associations or consortia (for example, whether the members are Romanian, nonresident, individuals or companies).

Nonresident companies that do not have an effective place of management in Romania are subject to tax on their Romanian-source income only, including capital gains derived from specified transactions (see *Capital gains*).

Rates of corporate income tax. The standard rate of income tax for Romanian companies is 16%, regardless of whether the companies have foreign participation. Income derived by companies from night bars, nightclubs, discos and casinos directly or in association is also normally taxable at a rate of 16%, but the amount of the tax payable may not be less than 5% of the gross income derived from such activities.

Nonresident companies that do not have their place of effective management in Romania are taxed in Romania at the standard rate of 16% on earnings derived from their operations in Romania through branches, permanent establishments or certain consortia. A permanent establishment of a foreign company in Romania may be constituted in certain forms, including the following:

- A place of management
- An office
- A branch
- A factory
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources
- A building site that exists for a period exceeding six months

- The place in which an activity continues to be carried out with the assets and liabilities of a Romanian legal person subject to a cross-border reorganization

Foreign companies are also normally taxable in Romania at the standard corporate income tax rate on profits derived in Romania from real estate located in Romania and the exploitation of natural resources, as well as on certain capital gains (see *Capital gains*).

Representative offices are subject to an annual tax equal to RON18,000 (approximately EUR4,000).

Law on specific tax for some activities. Effective from 1 January 2017, instead of the corporate tax, a specific tax applies to Romanian legal persons that perform certain activities in the hotels and accommodation, restaurant and other food services, bars and beverage-serving sectors, other than the legal persons for which the microenterprise tax is applicable (see *Microenterprises*).

The specific tax applies only to Romanian legal persons that on 31 December of the preceding year performed one of the activities mentioned above, according to their Articles of Incorporations, and that are not in liquidation.

Formulas determine the specific tax. If the taxpayer performs more than one of the activities listed above (except for hotel complexes), the specific tax equals the tax determined by applying the specific formulas to each of the activities performed.

In the event that the taxpayer derives income from other activities that are not subject to this specific tax, the taxpayer must apply the corporate income tax system to such income.

Taxpayers that applied the specific tax for some activities and previously incurred tax losses have the right to recover those losses in the seven consecutive years from the date on which they returned to the corporate income tax system. The period runs from the date on which the tax loss was incurred.

Specific derogations and reductions were provided in 2021 as a result of the COVID-19 pandemic.

Microenterprises. Romanian legal persons fulfilling certain conditions must pay microenterprise tax, which is calculated by applying the following rates to the taxable revenues with exemptions for certain revenues:

- 3% if the legal person has no employees
- 1% if the legal person has one or more employees

The microenterprise regime applies to companies that derived income of less than EUR1 million in the preceding year.

A company can choose to exit the microenterprise regime and become a corporate income tax taxpayer if it has registered and paid share capital of RON45,000 (approximately EUR10,000) and has at least two employees.

If during a tax year, a taxpayer assessed as microenterprise fulfills the conditions to become a corporate income taxpayer (for example, it has income exceeding EUR1 million), it pays corporate income tax based on revenues and expenses recorded from the

beginning of the quarter in which it no longer meets the conditions to qualify as a microenterprise.

A tax loss incurred by the taxpayer in the period in which the microenterprise income tax is applied is not taken into account (the taxpayer's tax result is not calculated).

Tax losses incurred by legal persons before applying the microenterprise tax regime can be carried forward until the legal entity fulfills the conditions to become a corporate income taxpayer, but only within the seven-year period stated by the law.

Tax incentives. Romania offers certain tax incentives, which are summarized below.

Corporate income tax. The Tax Code contains measures allowing companies to claim accelerated depreciation in certain circumstances.

The Tax Code allows "sponsorship" expenses to be claimed as a credit against corporate income tax due, subject to certain limitations. Under the Sponsorship Law, "sponsorship" is defined as "the juridical deed by which two persons agree upon the transfer of the ownership right upon certain material goods or financial means, in order to support the activity without lucrative scope, carried out by one of them." The tax credit for sponsorship expenses is limited to the lower of the following:

- 0.75% of the company's turnover
- 20% of the corporate income tax due

A tax credit for sponsorship expenses is also available to microenterprises up to a limit of 20% of the microenterprise tax due.

Sponsorship expenses incurred up to 31 December 2021 that were not used for obtaining a tax credit can be carried forward for seven consecutive years.

It is no longer possible to carry forward sponsorship expenses incurred on or after 1 January 2022 for which a tax credit could not be claimed. Instead, starting on 1 January 2022, it is possible to redirect the corporate income tax or income tax of micro-enterprises up to the unused sponsorship tax credit limit within a maximum of six months from the date of submission of the annual corporate income tax return or quarterly tax return for micro-enterprises, respectively.

Reinvested profit. The profit invested in the production and/or acquisition of certain technological equipment, computers and peripherals, tax registers, control and billing machines, as well as software and the right to use software, is exempt from tax. The reinvested profit represents the balance in the profit-and-loss account, which is the difference between the total income and total expenses booked in the trial balance of the company beginning with 1 January of the year in which such assets are commissioned. The assets must be retained for at least half of their useful economic life, but no longer than five years, with certain exceptions (for example, cases in which the assets are destroyed, lost or stolen). In addition, the accelerated depreciated method cannot be used for the respective assets.

Innovation and research and development, as well as ancillary activities. Effective from 1 January 2017, a new exemption from corporate income tax was introduced. It applies for the first 10 years of activities to taxpayers that exclusively undertake innovation and research and development (R&D), as well as ancillary activities. Application norms for this incentive are still to be issued by the Romanian authorities.

R&D costs. An additional allowance granted for R&D activities equals 50% of eligible costs under certain conditions. Also, accelerated depreciation can be applied for the equipment and machinery used in the R&D activities. To be eligible for this incentive, the R&D activities must qualify as applicative research and/or technological development.

Industrial parks. Companies administering industrial parks (administrator companies) may benefit from the following incentives by observing the state-aid legislation:

- Exemption from taxes due on conversion of agricultural land to be used for industrial parks
- Buildings, constructions and land located inside industrial parks are exempt from building tax and land tax
- Other incentives, which may be granted by the local authorities

Petroleum companies. Incentives are available to titleholders of oil and gas concessions. Titleholders are granted the concessions by the government in exchange for the payment of a royalty. The following are the incentives:

- For rehabilitation projects, a deductible provision equal to 10% of the annual offshore exploitation profits derived by titleholders of oil and gas licenses that relate to offshore areas with water deeper than 100 meters (328 feet).
- Provisions set up for equipment decommissioning and environmental rehabilitation are deductible up to a limit of 1%, which is applied to the accounting result of the exploitation and production of natural resources, except for the result related to the offshore activities and other activities of the legal entity.
- Reserves for the development and modernization of oil and gas production and for oil refining and infrastructure are deductible. These are included in taxable income on the depreciation of the assets and their write-off, respectively, over the period in which the expenses financed from these reserves are incurred.

Free-trade zones. The following tax benefits are available to companies performing activities in free-trade zones:

- Value-added tax (VAT) exemption applies to supplies of non-Community goods to be placed in a free-trade zone and to supplies of the respective goods performed in a free-trade zone.
- Non-Community goods introduced into free-trade zones for storage purposes are not subject to customs duties.
- State aid is available for investments performed in free-trade zones.

Property taxes. Local councils may grant building and land tax exemptions to legal entities, subject to the state-aid regulations.

Tax reduction for capitalized entities. Tax reductions of up to 15% are granted for taxpayers paying corporate income tax, microenterprise tax or specific tax in the period of 2021 to 2025

for the increase of equity, under certain conditions. The following are the percentages of the reductions:

- 2%, if the value of accounting equity in the year for which the tax is due is positive and at least half of the value of the subscribed share capital
- Between 5% and 10% for annual increases in adjusted equity, depending on the increase percentage
- 3%, starting with 2022, if the taxpayer registers an increase of the adjusted equity compared to 2020 by a certain targeted percentage

Capital gains. Capital gains are included in taxable income and taxed at the normal corporate income tax rate. Capital gains derived by nonresident companies are also subject to the standard 16% tax rate if they are derived from the disposal of the following:

- Immovable property located in Romania
- Participation titles (shares) in a Romanian resident company

Income derived by nonresident collective placement bodies without corporate status from the transfer of value titles (securities participation titles in open funds, and other financial instruments, such as derivatives) and participation titles held directly or indirectly in Romanian resident companies, as well as income derived by nonresidents from the transfer on a foreign capital market of participation titles held in a Romanian resident company and of value titles, is not taxable in Romania.

Income derived from the sale or assignment of shares held in Romanian resident legal entities or in legal entities from countries with which Romania has entered into a double tax treaty is not included in taxable income if the taxpayer holds for an uninterrupted period of one year at least 10% of the share capital of the legal entity that issued the shares.

Administration. In general, the tax year is the calendar year. However, certain companies may opt for a tax year other than the calendar year.

Under the corporate income tax law, payers of corporate income tax (for example, companies, branches and permanent establishments) must file tax returns and pay corporate income tax quarterly (computed based on actual numbers) by the 25th day of the first month following the first, second and third quarters.

As an exception to the general rule, payments made by banks are advance payments based on the corporate income tax for the preceding year, adjusted by the inflation rate. These payments must be made quarterly by the 25th day of the first month following the first, second and third quarters, as well on 21 December, of the respective year for the fourth quarter. This rule does not apply to newly established banks and banks that recorded a tax loss in the preceding year. These banks apply the 16% rate to the accounting profit of the current quarter.

All other payers of corporate income tax may opt for reporting and paying the annual corporate income tax through advance payments made on a quarterly basis, provided that certain conditions are met.

The annual corporate income tax return must be filed and any balance of annual corporate income tax must be paid by 25 March of the following year (as an exception, for the period of 2021 through 2025, this will be changed to 25 June for most taxpayers). For taxpayers using a non-calendar tax year, the annual corporate income tax return must be filed and any balance of annual corporate income tax must be paid by the 25th day of the third month (as an exception, for the period 2021 through 2025, this will be changed to the 25th day of the sixth month for most taxpayers) following the tax year-end.

Certain taxpayers, such as nonprofit organizations or taxpayers deriving most of their revenues from cereals and technical plants, must submit the annual corporate income tax return and pay the related tax by 25 February of the following year.

Payers of corporate income tax that cease to exist must submit a final tax return and pay the corporate income tax based on special rules.

The annual financial statements must be submitted within specified time periods after the year-end. The following are the time periods:

- Companies (in general), national companies and R&D institutes: 150 days
- Certain specified legal persons, individuals and bodies: 120 days
- Companies not performing any activities after their formation: 60 days

The failure of a company to file tax returns by the deadline may result in a fine ranging usually from RON500 to RON5,000. Companies are liable for the payment of the fines for late filing of returns even if they pay the tax due. For the late payment of tax liabilities, the following late payment interest and late payment penalties are due (except as otherwise provided):

- Late payment interest, computed at 0.02% per day of delay
- Late payment penalties, computed at 0.01% per day of delay
- Penalties for unreported or inaccurately reported obligations, computed at 0.08% per day of delay
- Late payment penalties for local tax liabilities, computed at 1% per month or part of a month of delay

Dividends. Dividends paid by Romanian resident companies to resident companies are subject to a 5% withholding tax. The 5% tax is considered a final tax and, accordingly, the dividends are not included in the taxable income of the recipient. However, as a result of Romania's accession to the EU, no tax is imposed on dividends paid by a Romanian resident company to resident companies that held at least 10% of the shares of the payer for an uninterrupted period of at least one year that ended on the date of payment of the dividend.

Dividends paid by Romanian resident companies to resident individuals and nonresident companies and individuals are generally subject to a 5% withholding tax. However, dividends paid by a Romanian resident legal entity to a legal entity resident in another EU member state or to a permanent establishment of an entity residing in an EU member state are not subject to withholding tax if certain conditions relating to the legal entity

receiving the dividends and to the Romanian income payer are satisfied. These conditions are described below.

The following conditions must be satisfied with respect to the legal entity receiving the dividends:

- The legal entity or permanent establishment receiving the dividends must be established in one of the legal forms provided by the law and must be resident in the respective EU member state and, according to the double tax treaties entered into with third countries, may not be resident outside the EU from a tax perspective.
- The legal entity or permanent establishment receiving the dividends must be liable to pay corporate income tax or other similar tax under the tax law in its state of residence without the possibility of exemption or choice of the tax treatment or a tax that is a substitute for such tax.
- The beneficiary of the dividends must own at least 10% of the participation titles in the Romanian legal entity for an uninterrupted period of at least one year ending on the date of the payment of the dividends.

The Romanian resident entity paying the dividends must satisfy the following conditions:

- It must be a joint stock company, limited stock partnership (*societate in comandita pe actiuni*), limited liability company, general partnership (*societate in nume colectiv*) or limited partnership (*societate in comandita simpla*).
- It must be liable to pay corporate income tax without the possibility of exemption or choice of the tax treatment, or a tax that substitutes for corporate income tax as per the domestic legislation.

Dividends paid by Romanian resident legal entities to pension funds, as defined by the law of the respective EU member state, are exempt from withholding tax in Romania if a legal instrument for information exchange exists.

The deadline for payment of dividend withholding tax is the 25th day of the month following the month in which the dividends are paid. However, if the dividends are distributed but not paid to shareholders by the end of the year in which the annual financial statements are approved, the tax is due on 25 January of the following year (the 25th day of the first month following the end of the tax year for taxpayers using a tax year different than the calendar year).

Foreign tax relief. Foreign taxes may be credited against Romanian taxes based on the provisions of a double tax treaty between Romania and the foreign state.

Permanent establishments. Romanian permanent establishments of foreign legal entities resident in an EU or European Economic Area (EEA) member state that derive income from another EU or EEA member state benefit under certain conditions from a tax credit for the tax paid in the state from which the permanent establishment from Romania derived the income.

C. Determination of trading income

General. In general, all income that is booked as revenue is included in taxable income for corporate income tax purposes. However,

the following items, among others, are not included in taxable income:

- Dividends received by a Romanian resident company from another Romanian resident company
- Dividends received by a Romanian resident company from a foreign legal entity subject to corporate income tax or a similar tax located in a state with which Romania entered into a double tax treaty, dividends received from an EU resident subsidiary and dividends received by a Romanian permanent establishment of an EU company, if certain conditions are satisfied
- The value of new shares or increases in the value of existing shares held in other companies, resulting from the incorporation of reserves, premiums, profits and similar items
- Revenues from the reversal, recovery and recharge of expenses and provisions that were previously considered to be non-deductible
- Income derived from the liquidation of other Romanian resident legal entities or foreign legal entities located in countries with which Romania has entered into a double tax treaty, if certain conditions are met
- Income from the revaluation of fixed assets, land and intangibles, which offsets the previous decreases incurred with respect to the same assets
- Income derived from a permanent establishment in a country with which Romania has entered into a double tax treaty that provides the exemption method for the elimination of double taxation

The second and fifth items above apply if the taxpayer holds for an uninterrupted period of one year at least 10% of the share capital of the legal entity distributing the dividends or the legal entity subject to liquidation.

In general, expenses are deductible for tax purposes if they are incurred for the purpose of carrying out business activities. However, the following items, among others, are deductible within specified limits:

- Protocol and entertainment expenses (for example, gifts to clients and business lunches), up to 2% of the sum of the accounting profit, corporate income tax, and protocol and entertainment expenses
- Employee-related expenses (social expenses), up to 5% of the total salary cost
- Contributions to the legal reserve fund, generally up to 5% of the accounting profit before tax, until the reserve fund reaches 20% of share capital
- Expenses with respect to shrinkage of goods and to perishable goods (goods on which a company might incur losses for various reasons, such as from damage suffered during the transport of the goods), which are deductible within the limits set by a government decision
- Provisions (see *Provisions*)
- Borrowing costs (see Section E)
- Depreciation expenses (see *Tax depreciation*)
- Net losses from the transfer of receivables, which are deductible within a limit of 30% of such losses

The following expenses, among others, are not deductible for tax purposes:

- Service expenses, including management, assistance and consultancy expenses, if they are provided by a person located in a state with which Romania does not have a legal instrument for information exchange and if such transactions are considered to be artificial.
- Expenses relating to insurance, other than insurance relating to assets owned by the company and risks related to the company's activity.
- Penalties and fines paid to Romanian or foreign authorities.
- Losses from the reduction in the value of inventory that cannot be recovered and uninsured assets, as well as the related VAT. However, these losses are deductible under certain conditions, such as losses regarding goods that exceeded their validity term or passed their expiration date according to the law or that were qualitatively degraded, if their destruction can be proved accordingly.
- Romanian and foreign corporate income tax (however, a tax credit is allowed for taxes paid in other countries based on the provisions of a double tax treaty between Romania and the foreign state).
- Expenses incurred for the benefit of shareholders or associates, other than payments for goods and services at market value.
- Expenses related to non-taxable income.

The deductibility of car expenses not falling under the full deductibility criteria provided under the Romanian tax law is limited to 50% for certain cars not exclusively used for business purposes.

Sponsorship expenses are also nondeductible, but they may be claimed as a credit against corporate income tax due, subject to certain limitations (see Section B).

Taxpayers applying International Financial Reporting Standards.

Taxpayers applying International Financial Reporting Standards (IFRS), such as banks and listed companies, must also take specific tax rules into consideration in determining the corporate income tax.

Inventories. Under Romanian law, inventories of raw materials and merchandise are valued at purchase cost, while inventories of finished goods and work-in-progress are valued at production cost. On the write-off of the inventories, the valuation is calculated using the first-in, first-out (FIFO), weighted average or last-in, first-out (LIFO) methods.

Provisions. Under Romanian law, the following provisions, among others, are deductible for corporate income tax purposes:

- Bad debt provisions under specified conditions
- Provisions for performance guarantees granted to clients
- Mandatory credit risk provisions, if established by banks, credit institutions or nonbanking financial institutions (leasing companies)
- Special provisions for titleholders of oil and gas concessions

Tax depreciation. The following are the permissible depreciation methods:

- Buildings: straight-line depreciation
- Equipment: straight-line, degressive or accelerated depreciation
- Other depreciable assets: straight-line or degressive depreciation

The depreciation method must be applied consistently. Land may not be depreciated.

Under the accelerated depreciation method, the assets are depreciated at a maximum rate of 50% in the first year of use, and the balance of the value is deducted using the straight-line method during the remaining useful life of the asset. Assets financed from reinvested profit cannot be depreciated using the accelerated depreciation method (see Section B).

Patents, licenses, know-how, manufacturers' brands, trademarks and service marks, as well as other similar industrial and commercial property rights, are depreciated during the contract period or during the period in which the purchaser intends to use the rights.

Expenses for the production or purchase of software programs are deductible on a straight-line or degressive basis over three years. The degressive and accelerated depreciation methods may be used for patents.

Goodwill, as well as intangibles with an undetermined operational life according to the accounting regulations, cannot be depreciated for tax purposes.

The deductibility of the tax depreciation of certain vehicles is limited to RON1,500 per month per vehicle.

For tax depreciation purposes, useful lives are prescribed by law. The following are the useful lives that are generally applicable to major categories of assets.

Asset	Years
Buildings and constructions (for example, roads and fences)	8 to 60
Machinery and equipment	2 to 24
Furniture and fittings	2 to 15
Motor vehicles	3 to 9

Reserves from the revaluation of fixed assets, carried out after 1 January 2004, which are deducted as tax depreciation or expenses when assets are sold or written off are taxed simultaneously with the deduction of the tax depreciation or expenses (that is, when the assets are sold or written off).

Relief for losses. Annual tax losses may be carried forward for seven years and are not adjusted for inflation. Losses of entities ceasing to exist as a result of a spin-off or merger are recovered by the taxpayers taking over the patrimony of the absorbed or spun-off company, proportionally to the value of the assets transferred to the beneficial legal entity. The same rules apply to entities that do not cease to exist.

Losses may not be carried back.

Groups of companies. The Romanian law provides financial accounting rules for the consolidation of companies under certain circumstances. In addition, a tax consolidation system for corporate income tax has been established and will apply starting with the 2022 fiscal year, provided that certain conditions are met (among others, a direct or indirect holding of at least 75%).

Tax consolidation is also available for foreign legal entities that have several permanent establishments in Romania. As a result, the taxable profits of one permanent establishment may be offset against the tax losses of another permanent establishment.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax; certain enterprises, products and services are exempt, including banks, financial intermediaries and insurance companies	
Standard rate	19
Special rates for certain goods and services	5/9
Special consumption (excise) taxes; imposed, for example, on energy products, beverages, cigarettes and coffee; taxes are imposed at specified amounts per unit on certain products (for example, alcohol) and at percentage rates for other products	Various
Local taxes on land, buildings, cars, certain authorizations and other items	Various

E. Miscellaneous matters

Foreign-exchange controls. The Romanian currency is the leu (RON). Regulation 4/2005, as amended, governs the foreign-exchange regime in Romania.

In Romania, transactions between resident companies or between resident companies and resident individuals must be made in local currency, with certain exceptions. Transactions between residents and nonresidents can be made in domestic as well as in foreign currency. In the free-trade zones (see Section B), transactions between residents can also be performed in foreign currency.

Residents and nonresidents may open foreign-currency accounts in Romanian banks or foreign banks authorized to operate in Romania. Residents are allowed to open accounts in banks located abroad. Romanian legal entities may hold and use hard currency deposited with authorized banks.

Romanian legal entities may make payments in foreign currency to nonresidents without prior approval. Current-account transactions include, among others, imports of goods and services, payments of dividends and repatriation of profits.

Romanian and foreign entities may freely buy and sell hard currency on the interbank foreign-exchange market, but specified documentation is usually required.

Transfer pricing. Under the provisions of the Romanian Tax Code, for transactions between related parties, the tax authorities may adjust the amount of income or expenses of either party to reflect the market value of the goods or services provided in the transaction. Such reassessment affects only the tax position of the Romanian entity. It does not affect the entity's financial statements.

The law indicates that in applying the domestic transfer-pricing measures, the Romanian tax authorities must also take into account the Organisation for Economic Co-operation and Development (OECD) Transfer-Pricing Guidelines.

On request, Romanian entities performing transactions with related parties must make available to the tax authorities a file containing specified transfer-pricing documentation.

Country-by-Country Reporting (CbCR) notification requirements were introduced, starting with transactions performed during 2016. They apply to all Romanian entities that are part of multinational enterprise groups that have a total consolidated turnover of at least EUR750 million.

Anti-Tax Avoidance Directive. The provisions of the EU Anti-Tax Avoidance Directive (ATAD; EU Council Directive 2016/1164 of 12 July 2016), which provides rules against tax avoidance practices that directly affect the functioning of the internal market were transposed into the Romanian Tax Code, applying from 1 January 2018.

The following provisions were introduced:

- Limitation on the deductibility of interest and of other costs economically equivalent to interest (see *Borrowing costs*)
- Exit taxation rules
- Controlled foreign company rules

Anti-Tax Avoidance Directive II. The provisions of the EU Anti-Tax Avoidance Directive II (ATAD II; EU Council Directive 2017/952 of 29 May 2017) regarding hybrid mismatches with third countries were transposed into the Romanian Tax Code (together with the provisions on hybrid mismatches included in the ATAD, which had not been implemented previously). The provisions apply from 3 February 2020.

Borrowing costs. As a result of the transposition of ATAD, the limitation on the deductibility of interest and other costs economically equivalent to interest were introduced, replacing the previous limitations applicable to interest and foreign-exchange differences.

The limitation applies also to banks and nonbanking financial entities, as well to borrowing costs owed to them.

Borrowing costs also include, for example, interest capitalized in the accounting value of an asset and arrangement fees.

Taxpayers can deduct during a tax period, the exceeding borrowing costs (the amount by which the borrowing costs exceed the interest revenues) up to the deductible limit of the Romanian lei equivalent of EUR1 million.

The exceeding borrowing costs exceeding the abovementioned limit have limited deductibility in the tax period in which they are incurred, up to 30% from the basis of calculation.

The basis of calculation of the deductible exceeding borrowing costs is calculated as follows:

Total revenues – total expenses – nontaxable revenues + corporate income tax expense + exceeding borrowing costs + deductible tax

depreciation (adjusted earnings before interest, taxes, depreciation and amortization [EBITDA])

If the basis of calculation is negative or is equal to zero, the exceeding borrowing costs (the costs exceeding EUR1 million) are nondeductible in the tax period in which they are incurred, and they are carried forward for an unlimited period of time under the same deduction conditions.

As an exception, taxpayers that are independent entities, are not part of a consolidated group from a financial accounting perspective and have no affiliated entities or permanent establishments can fully deduct the exceeding borrowing costs in the tax period in which the costs are incurred.

These provisions apply also to interest expenses and net foreign-exchange losses carried forward in relation to periods before 2018, according to the previously applicable legislation.

The nondeductible exceeding borrowing costs carried forward recorded by entities that cease to exist as a result of a spin-off or merger can be carried forward by the new taxpayers or taxpayers that take over the assets and liabilities of the merged or spun-off entity.

F. Treaty withholding tax rates

The table below shows the applicable withholding rates under Romania's bilateral tax treaties. This table does not reflect the potential effect that the OECD Multilateral Instrument (MLI) might have over the affected bilateral tax treaties.

	Dividends (gg)	Interest (hh)	Royalties (hh)

- (a) The lower rate applies if the beneficiary of dividends is a company owning at least 25% of the capital of the payer.
- (b) The lower rate applies if the beneficiary of dividends is a company owning at least 10% of the capital of the payer.
- (c) The rate is 0% if the indebtedness on which the interest is paid is guaranteed, insured, or financed by the other state or by a financial institution that is a resident of the other state.
- (d) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- The government of a contracting state
 - The governmental institution or entity of a contracting state
 - A company that is resident in a contracting state and that has at least 25% of its capital owned directly or indirectly by the government or governmental institutions of either contracting state
- (e) The 5% rate applies to royalties paid for patents, brands, designs and models and know-how.
- (f) The 2.5% rate applies to royalties relating to computer software or industrial equipment.
- (g) The 0% applies to interest paid to the German government, Deutsche Bundesbank Kreditanstalt für Wiederaufbau or Deutsche Investitions und Entwicklungsgesellschaft (DEG) and to interest paid on a loan guaranteed by Hermes-Deckung. The 0% rate also applies to interest paid to the Romanian government if it is derived and beneficially owned by certain types of institutions (for example, the Romanian government, an administrative-territorial unit, a local authority, or an agency, bank unit or institution of the Romanian government) or if the debt claims of Romanian residents are warranted, insured or financed by a financial institution wholly owned by the Romanian government. In addition, as long as Germany does not impose taxes on interest, Romania may not tax interest. The protocol to the treaty provides that the following types of interest are taxed only in the state where the interest arises and according to the law of that state, provided that they are deductible in the determination of profits of the interest payer:
- Interest derived from rights or debt claims carrying a right to participate in profits
 - Interest linked to the borrower's profits
 - Interest derived from profit-sharing bonds
- (h) The lower rate applies to dividends paid by companies resident in Romania.
- (i) The lower rate applies to cultural royalties.
- (j) The lower rate applies if the beneficiary of dividends is a company owning at least 40% of the capital of the payer.
- (k) The lower rate applies to payments received for the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulas and processes, or industrial, commercial or scientific equipment, and for information concerning industrial, commercial or scientific experience.
- (l) The 0% rate applies to the following types of interest:
- Interest paid in connection with sales on credit of industrial, commercial or scientific equipment
 - Interest on loans granted by banks or other financial institutions (including insurance companies)
 - Interest on loans with a term greater than two years
 - Interest on debt-claims guaranteed, insured or directly or indirectly financed by or on behalf of the government of either contracting state

- (m) The 0% rate applies to interest arising in one contracting state with respect to debentures, public funds or similar instruments of the government that is paid to residents of the other contracting state and to interest on loans granted or guaranteed by the National Bank of Romania or by the Bank of Israel. The 5% rate applies to interest paid with respect to sales on credit of merchandise or industrial, commercial or scientific equipment and to interest on loans granted by banks. The 10% rate applies to other interest.
- (n) As long as Austria, under its national law, does not levy withholding tax on interest paid to Romanian residents, the withholding tax rate is 0%. An exemption also applies if any of the following circumstances exist:
- The payer or the recipient of the interest is the government of a contracting state, a local authority or an administrative or territorial unit thereof or the central bank of a contracting state.
 - The interest is paid with respect to a loan granted, approved, guaranteed or insured by the government of a contracting state, the central bank of a contracting state or a financial institution owned or controlled by the government of a contracting state.
 - The interest is paid with respect to a loan granted by a bank or other financial institution (including an insurance company).
 - The interest is paid on a loan made for a period of more than two years.
 - The interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment.
- (o) The 0% rate applies to dividends paid by a company resident in Malaysia to a Romanian resident; the 10% rate applies to dividends paid by a company resident in Romania to a Malaysian resident.
- (p) The 0% rate applies to interest paid to Romanian residents on long-term loans.
- (q) The 0% rate applies to industrial royalties received from Malaysia by Romanian residents.
- (r) The 5% rate applies to the following:
- Copyright royalties and similar payments with respect to the production or reproduction of literary, dramatic, musical or other artistic works (but not including royalties with respect to motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting)
 - Royalties for the use of, or the right to use, computer software, patents or information concerning industrial, commercial or scientific experience (but not including royalties paid with respect to a rental or franchise agreement)
- (s) The 0% rate applies if the beneficiary of the dividends is a company owning at least 25% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 15% rate applies to other dividends.
- (t) Romania will not impose withholding tax on interest and royalties paid to Dutch residents as long as Dutch domestic law does not impose withholding tax on these types of payments. An exemption also applies if any of the following circumstances exist:
- The payer or the recipient of the interest is the government of a contracting state, a public body, a political subdivision, an administrative-territorial unit or a local authority thereof or the central bank of a contracting state.
 - The interest is paid with respect to a loan granted, approved, guaranteed or insured by the government of a contracting state, the central bank of a contracting state or any agency or instrumentality (including a financial institution) owned or controlled by the government of a contracting state.
 - The interest is paid with respect to a loan granted, approved, guaranteed or insured by the government of a contracting state, the central bank of a contracting state or any agency or instrumentality (including a financial institution) owned or controlled by the government of a contracting state.
 - The interest is paid on a loan made for a period of more than two years.
 - The interest is paid in connection with the sale on credit of industrial, commercial or scientific equipment.
- (u) The lower rate applies to interest related to sales on credit of equipment, loans granted by a bank or to public issues of bonds and debentures.
- (v) The 10% rate applies to royalties paid by a company that is registered as a foreign investor and is engaged in an activity in a priority economic field. The 15% rate applies to royalties related to film or television production. The 25% rate applies to other royalties.
- (w) The 10% rate applies if the beneficiary of dividends is a company owning at least 25% of the capital of the payer for an uninterrupted period of two years.
- (x) The 0% rate applies to interest related to sales on credit of industrial and scientific equipment.

- (y) Romania will not impose withholding tax on royalties paid to Swiss residents as long as Swiss domestic law does not impose withholding tax on royalties.
- (z) The 10% rate applies if the beneficiary of the interest is a financial company, including an insurance company. The 20% rate applies to interest with respect to sales on credit. The 25% rate applies to other interest payments.
- (aa) The 0% rate applies if the interest is beneficially owned by the other contracting state or an administrative-territorial unit or a local authority thereof, the central bank of that other state, or an agency, bank or institution of that other state or administrative-territorial unit or local authority thereof or if the debt-claims of a resident of the other contracting state are warranted, insured or financed by a financial institution wholly owned by that other state.
- (bb) The 0% rate applies if either of the following circumstances exist:
- The interest is derived and beneficially owned by the government of the other state, a local authority or an administrative-territorial unit thereof or an agency or bank unit or institution of that government, local authority or administrative-territorial unit.
 - The debt claims of a resident of the other state are warranted, insured, or directly or indirectly financed by a financial institution wholly owned by the government of the other state.
- (cc) The 0% rate applies to the following types of interest:
- Interest related to public debt instruments or to instruments issued by the National Bank of Romania with the purposes of reaching monetary policy objectives
 - Interest paid to EU pension funds
- The 16% rate applies to other interest payments.
- (dd) This treaty is not yet in force.
- (ee) The 0% rate applies if the beneficiary of the dividends is a company owning at least 50% of the capital of the payer. The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 10% rate applies to all other dividends.
- (ff) The 0% rate applies to dividends paid to the government of the other contracting state.
- (gg) In accordance with an EU directive, the following rules apply to dividends paid to companies residing in the EU:
- The withholding tax rate in Romania is 0% if certain conditions are met, such as the beneficiary of the dividends owns at least 10% of the capital of the payer for an uninterrupted period of one year before the payment of the dividends.
 - The withholding tax rate in Romania is 5% if the conditions mentioned in the preceding bullet are not satisfied.
- (hh) The withholding tax rate is 0% for interest and royalties if both of the following conditions are satisfied:
- The beneficial owner of the interest or royalties is a legal person resident in an EU member state or a permanent establishment of an entity resident in such a state.
 - The beneficial owner of the interest or royalties holds at least 25% of the value or number of participation titles in the Romanian entity for an uninterrupted period of at least two years that ends on the date of payment of the interest or royalties.
- (ii) The 0% rate applies to dividends paid to the government or political subdivisions, local authorities or administrative territorial units. The 0% rate also applies to majority state-owned companies (at least 51%) if the minority shareholders are residents of that state.
- (jj) The 0% rate applies if the beneficial owner of the dividends is one of the following:
- The government of a contracting state
 - A governmental institution or entity of a contracting state
- (kk) The 0% rate applies if any of the following circumstances exists:
- The payer of the income from debt-claims is the government of a contracting state or an administrative-territorial unit or an administrative subdivision or a local authority thereof.
 - The income from debt-claims is paid to the government of the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof, or an agency or instrumentality (including a financial institution) wholly owned by the other contracting state or administrative-territorial unit, or an administrative subdivision or local authority thereof.

- The income from debt-claims is paid to any other agency or instrumentality (including a financial institution) with respect to loans made in application of an agreement between the governments of the contracting states.
 - The income from debt-claims is paid on loans granted, insured or guaranteed by a public institution for purposes of promoting exports.
- (ll) A withholding tax exemption for dividends applies if either of the following circumstances exists:
- The dividends are paid to a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends.
 - The beneficial owner of the dividends is the government of the contracting state or a governmental institution or entity of a contracting state.
- (mm) The withholding tax exemption for interest applies if either of the following circumstances exists:
- The interest is paid to related parties (that is, direct parent or sister companies) that have a shareholding of 25% or more.
 - The loan is secured by a governmental institution.
- (nn) The 0% rate applies if any of the following circumstances exist:
- The beneficial owner is the government, an administrative subdivision, a local authority or an administrative-territorial unit.
 - The beneficial owner is a bank owned by the government, an administrative subdivision, a local authority or an administrative-territorial unit.
 - The loan is guaranteed, assured or financed by a bank entirely owned by the government.
- (oo) This treaty currently applies to Montenegro and Serbia.
- (pp) The 0% rate applies if the interest is derived and beneficially owned by the following:
- The government, an administrative territorial unit, a political subdivision, a local authority or an administrative-territorial unit
 - In the case of Romania, by the National Bank of Romania or the Export-Import Bank of Romania
 - In the case of India, by the Reserve Bank of India, the Export-Import Bank of India or the National Housing Bank
 - Any other institution that may be agreed to through an exchange of letters between the competent authorities
- (qq) The treaty provides for an exemption for interest in the following circumstances:
- Interest arising in the United Arab Emirates and paid to the Government of Romania or to any of its financial institutions is exempt from United Arab Emirates tax.
 - Interest arising in Romania and paid to the government of the United Arab Emirates or its financial institutions is exempt from Romanian tax.
 - Interest arising from institutions the capital of which is wholly or partially owned by the Government of Romania or the Government of the United Arab Emirates exempt from tax in the respective contracting states.
- (rr) In the case of the Hong Kong Special Administrative Region (SAR), the 0% rate applies if the beneficiary is one of the following:
- The Government of the Hong Kong SAR
 - The Hong Kong Monetary Authority
 - The Exchange Fund
 - A financial institution wholly or mainly owned by the Government of the Hong Kong SAR and mutually agreed on by the competent authorities of the contracting parties
- In the case of Romania, the 0% rate applies if the beneficiary is one of the following:
- Romania or an administrative-territorial unit thereof
 - The National Bank of Romania
 - The Export-Import Bank of Romania (EXIMBANK)
 - A financial institution wholly or mainly owned by Romania and mutually agreed on by the competent authorities of the contracting parties
- Otherwise, the following are the rates:
- 3% if the beneficial owner is a company (other than a partnership) that holds directly at least 15% of the capital of the company paying the dividends
 - 5% in all other cases
- (ss) The 0% rate applies if and as long as the Hong Kong SAR, under its internal legislation, levies no withholding tax on interest. In the case of the Hong Kong SAR, an exemption is also available if the interest is beneficially owned by one of the following:
- The Government of the Hong Kong SAR
 - The Hong Kong Monetary Authority

- The Exchange Fund
- A financial institution wholly or mainly owned by the Government of the Hong Kong SAR and mutually agreed on by the competent authorities of the contracting parties

In the case of Romania, an exemption is also available if the interest is beneficially owned by one of the following:

- Romania or an administrative-territorial unit thereof
- The National Bank of Romania
- The EXIMBANK
- A financial institution wholly or mainly owned by Romania and mutually agreed upon by the competent authorities of the contracting states

(tt) In the case of Norway, the 0% rate applies to dividends paid to the following:

- The Central Bank of Norway
- The Government Pension Fund Global
- A statutory body or any entity wholly or mainly owned by Norway as may be agreed from time to time between the competent authorities of the contracting states

In the case of Romania, the 0% rate applies to dividends paid to the following:

- The National Bank of Romania
- The EXIMBANK
- A statutory body or any entity wholly or mainly owned by Romania as may be agreed from time to time between the competent authorities of the contracting states

The 5% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer. The 10% rate applies to all other dividends.

(uu) The 0% rate applies if the interest is derived and beneficially owned by the government of the other contracting state or a political subdivision, local authority or administrative-territorial unit thereof or an agency, bank unit or institution of that government or political subdivision, local authority or administrative-territorial unit or if the debt-claims of a resident of the other contracting state are warranted, insured or financed by a financial institution wholly owned by the government of the other contracting state.

(vv) The 0% rate applies to dividends paid to the government of a contracting state or a governmental institution or entity thereof and to companies that are resident of either contracting state and that have at least 25% of their capital owned directly or indirectly by the government or a governmental institution of a contracting state.

(ww) The 0% rate applies if the beneficiary of the dividends is a company owning at least 10% of the capital of the payer for an uninterrupted period of two years.

(xx) The 0% rate applies if any of the following circumstances exists:

- The payer of the interest is the government of a contracting state or a local organization thereof.

- The interest is paid to the government of the other contracting state or local organization thereof or to a body or an agency (including a financial institution) wholly owned by that contracting state or local authority thereof.

- The interest is paid to other bodies or agencies (including a financial institution) dependent for their funds on the entities mentioned above under agreements concluded between the governments of the contracting states.

(yy) The 0% rate applies to dividends paid to the government or political subdivisions, local authorities or administrative territorial units. The 0% rate also applies to dividends paid to majority state-owned companies (at least 51%) if the minority shareholders are residents of that state.

(zz) The 0% rate applies to the following types of interest:

- Interest paid in connection with sale on credit of equipment, merchandise or services
- Interest on loans granted by financial institutions of the other state
- Interest paid to the other state or a political subdivision, local authority or administrative-territorial unit thereof, or any entity wholly or mainly owned by the other state (more than 50%)

(aaa) The 0% rate applies if the beneficiary of the dividends is a company owning, directly or indirectly, at least 10% of the capital of the payer for more than one year or is a pension scheme that is a resident of the other state.

- (bbb) The 0% rate applies if either of the following circumstances exist:
- The interest is derived and beneficially owned by the other contracting state or a political subdivision or administrative-territorial unit thereof or an agency, bank unit or institution of that state, political subdivision or administrative-territorial unit.
 - The debt claims of a resident of the other contracting state are warranted, insured or financed by a financial institution wholly or mainly owned by that other state.

In addition, under a protocol to the double tax treaty, as long as, according to its internal legislation, interest arising in a contracting state is exempt from tax in that state, the withholding tax rate is reduced to 0%.

At the time of writing, a completely new income tax law was expected to be enacted, which would include full-fledged transfer-pricing regulations and documentation guidelines. Because of the expected enactment of this new law, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	30
Capital Gains Tax Rate (%)	5
Branch Tax Rate (%)	30
Withholding Tax (%)	
Dividends	5/15 (a)(b)
Interest	5/15 (a)(b)(c)
Royalties	15
Management Fees	15
Technical Fees	15
Service Fees	15
Sports and Entertainment Fees	15
Lottery and Gambling Proceeds	15
Imports	5 (d)
Public Procurement	3 (e)
Net Operating Losses (Years)	
Carryback	0 (f)
Carryforward	5

- (a) This tax is a final tax.
 (b) A reduced 5% rate applies to dividends and interest received by Rwandan and East African Community resident taxpayers from entities listed on the Rwanda Stock Exchange.
 (c) A reduced 5% rate applies to interest derived from treasury bonds with a maturity of at least three years.
 (d) This is a recoverable advance tax that applies to taxpayers without a tax clearance certificate issued by the Rwanda Revenue Authority.

- (e) This is a recoverable advance tax that applies to suppliers of goods and services to public institutions.
- (f) Rwanda does not have a provision for the carrying back of losses.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax is payable by companies, cooperative societies, foreign companies or their branches, autonomous public enterprises, associations and any other business entities that engage in for-profit business activities. Resident entities are subject to corporate income tax on worldwide income. Nonresident entities are subject to corporate income tax on income derived through a permanent establishment. Nonresident entities without a permanent establishment in Rwanda are not subject to corporate income tax, but they may be subject to other taxes in Rwanda.

An entity is considered to be resident in Rwanda during a tax year if it satisfies any of the following conditions:

- It is a company or an association established according to Rwandan laws.
- It has its place of effective management in Rwanda at any time during the tax year.
- It is a Rwandan government company.

Rates of corporate tax. The corporate tax rate is 30%.

Capital gains. Rwanda imposes a separate tax on capital gains of 5% arising from the transfer of shares (direct or indirect). Gains from the disposal of shares listed on the Rwanda Stock Exchange or units of a collective-investment scheme are exempt from capital gains tax.

Capital gains derived from the transfer of assets other than shares are included in taxable income and taxed at the normal corporate income tax rate.

Administration. A company's year of assessment (tax year) is the calendar year. A company wishing to maintain a tax year other than the calendar year must obtain prior approval from the Minister of Finance.

Companies must make installment payments, which are each equal to 25% of the tax due for the preceding tax year. The payment dates are 30 June, 30 September and 31 December. The installment payments are subtracted from tax due at the end of the financial year. Any overpayment is generally treated as a prepayment of future income tax liabilities or other tax liabilities and may only be offset on obtaining the prior approval of the Rwanda Revenue Authority. However, a company may seek a refund of the overpayment by a written request to the Commissioner General of Rwanda Revenue Authority.

Companies must file a final tax return accompanied by proof of payment of tax provided by the tax administration within three months after the end of the tax year (31 March for calendar-year taxpayers). The company calculates the tax payable on the tax return form. The tax due equals the tax payable minus installments and recoverable withholding tax paid. Any tax due must be paid with the return.

Dividends. Dividends are subject to a final withholding tax at a rate of 15%. However, a reduced 5% rate applies to dividends received by Rwandan and East African Community resident taxpayers from securities listed on the Rwanda Stock Exchange.

Foreign tax relief. Relief for foreign taxes paid is granted in accordance with tax treaties with other countries. If foreign tax is paid to a country that does not have a tax treaty with Rwanda, the tax paid may be subtracted from tax payable in Rwanda, subject to a maximum cap of the Rwandan income tax payable on that foreign-source income.

C. Determination of trading income

General. Taxable income is accounting income adjusted for non-taxable income and for nondeductible expenses. Expenses are deductible if they are incurred wholly and exclusively in the production of income.

Provisions. General and specific provisions, which are reflected in the computation of financial accounting income, are generally not deductible for tax purposes. However, banks and financial institutions may deduct any increase in the mandatory reserve for non-performing loans determined by the National Bank of Rwanda.

Tax depreciation. Depreciation charged in the financial statements is nondeductible for tax purposes, subject to limits that are set forth in the tax law or are determined by the Minister of Finance from time to time. The following are the current allowable tax depreciation rates:

Asset class	Rate (%)
Buildings (excluding land) including equipment and machinery	5
Intangible assets including goodwill	10
Information and communication systems with a life of more than 10 years	10
Computer equipment and accessories with a life of less than 10 years	50
All other business assets	25

Groups of companies. The income tax law does not allow the filing of consolidated returns, the combining of profits and losses of affiliated companies or the transfer of losses from loss companies to profitable members of the same group of companies.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate
Value-added tax, on the supply of goods and services in Rwanda and on imports of goods and services	
Standard rate	18%
Other rate	0%
Social security contributions; paid by	
Employer	5%
Employee	3%

Nature of tax	Rate
Maternity Leave Benefits Scheme contributions	
Employer	0.3%
Employee	0.3%
Community-based health insurance; paid by employee	0.5%
Trade licenses; varies by nature and location of business; maximum amount	RWF240,000

E. Miscellaneous matters

Foreign-exchange controls. The currency in Rwanda is the Rwandan franc (RWF). Rwanda does not impose foreign-exchange controls.

Debt-to-equity rules. Interest paid on related-party loans exceeding four times equity does not qualify as a deductible expense for companies other than commercial banks and insurance companies.

F. Tax treaties

Rwanda has entered into double tax treaties with Barbados, Belgium, Jersey, Mauritius, Qatar, Singapore, South Africa, Turkey and the United Arab Emirates.

St. Lucia is a member country of the Organisation for Economic Co-operation and Development (OECD)/G20 Inclusive Framework on Base Erosion and Profit Shifting (BEPS) to tackle tax avoidance, improve the coherence of international tax rules, ensure a more transparent tax environment, and address the tax challenges arising from the digitalization of the economy. As part of the new two-pillar plan to reform international taxation rules, which includes the proposal of a global minimum tax of 15% to address the incentives to shift profits to lower tax regimes and ensure that multinational enterprises pay a fair share of tax wherever they

operate, St. Lucia is in the process of formulating its position. In view of the potential changes to the local law, readers should obtain updated information before engaging in transactions.

A. At a glance

Corporate Income Tax Rate (%)	30 (a)
Capital Gains Tax Rate (%)	0
Branch of Nonresident Corporation Tax Rate (%)	30 (a)
Withholding Tax (%)	
Payments to Nonresidents	
Dividends	0
Interest	15 (b)
Royalties	25 (b)
Rents	0
Management and Technical Services Fees	25 (b)
Any Other Payments of Income	25 (b)
Branch Remittance Tax	0
Net Operating Losses (Years)	
Carryback	0
Carryforward	6

- (a) This rate applies only to companies that are in good standing with the Inland Revenue Department. Otherwise, the rate is 33.3%.
- (b) This is a final tax.

B. Taxes on corporate income and gains

Corporate income tax. All resident and nonresident companies in St. Lucia are subject to corporate tax on income that is sourced in St. Lucia. Income sourced outside of St. Lucia falls outside the scope of taxation.

Detailed legislation has been passed specifying what is considered local and foreign-source income. Nonresident companies that derive income from St. Lucia (other than by carrying on business through a permanent establishment) are not subject to tax in St. Lucia. However, such income earned by nonresident companies may be subject to withholding tax.

A company is considered to be tax resident in St. Lucia if it is incorporated in St. Lucia. A company incorporated outside of St. Lucia is also considered resident in St. Lucia if its management and control are located in St. Lucia.

Rates of corporate tax. All domestic companies that are in good standing with the Inland Revenue Department, including branches of nonresident companies, are subject to tax at a basic rate of 30%. Companies that are not in good standing are subject to tax at a rate of 33.3%.

Foreign-source income is not subject to tax in St. Lucia. Expenses incurred in connection with foreign-source income are not tax-deductible. Any such expenses paid to nonresidents are not subject to withholding tax in St. Lucia.

International Business Companies. International Business Companies (IBCs) registered before 1 December 2018 are no longer able to utilize preferential tax rates (tax-exempt or a 1% rate) and withholding tax exemptions. Effective 1 July 2021, all

IBCs are subject to tax on income from sources in St. Lucia at the standard corporate tax rate of 30%.

IBCs must fulfill certain substance requirements, based on their core economic activity, including the following:

- Employment of an adequate number of employees with the necessary level of qualifications and experience
- Demonstration of an adequate amount of operating expenditure
- Adequate investment and capital commensurate with the type and level of activity

IBCs are also required to do the following:

- File annual tax returns based on annual audited financial statements
- Comply with the monitoring requirement as prescribed by the guidelines and regulations made by the competent authority
- Provide other documents required by the competent authority

Capital gains. Capital gains are not taxed in St. Lucia.

Administration. The fiscal (income) year is the period for which the accounts of the business are normally prepared.

A corporation is required to determine its own tax liability and to prepare and file a corporation tax return within three months after the end of its fiscal year. If a return is not filed on time, the Comptroller of Inland Revenue may levy a penalty of 5% of the tax payable for that income year.

Corporations must prepay tax in three installments. These installments must be paid by 25 March, 25 June and 25 September in each year, and each tax prepayment must equal one-third of the preceding year's tax. Any balance of tax due is paid when the return is filed. Failure to pay an installment of tax is subject to a penalty of 10% of the amount of unpaid tax as well as interest at a rate of 1.04% per month. Any balance of tax not paid by the due date incurs interest at a rate of 1.04% per year for the period during which it remains unpaid.

Dividends. Dividends paid by companies resident in St. Lucia to nonresidents are not subject to withholding tax in St. Lucia. Dividends received by companies resident in St. Lucia from domestic and foreign companies are not included in the companies' taxable income.

C. Determination of trading income

General. Taxable income is determined on the basis of accounts prepared in accordance with International Financial Reporting Standards, subject to specific adjustments identified in the Income Tax Act.

Management fees' restriction. Management fees allowable as a deduction are restricted to 10% of all allowable deductions (excluding the management charge and cost of sales).

Inventories. The authorities generally accept a method of valuation of inventory that conforms to standard accounting practice in the trade or business, provided it is applied consistently. Average cost or first-in, first-out (FIFO) are the generally accepted methods.

Provisions. Reserves or provisions of a general nature for doubtful accounts receivable, inventory shrinkage, inventory obsolescence and other items are not allowable. However, write-offs of specific amounts or balances are generally allowed if these amounts are calculated in accordance with the guidelines issued by the Inland Revenue Department.

Tax depreciation. Depreciation and amortization reported in the financial statements are not allowed as deductions in calculating taxable income. However, a company may claim capital allowances. Annual allowances of between 2.5% and 33.3% are granted on the original cost of fixed assets, calculated on a declining balance. An initial allowance of 20% is also granted with respect to capital expenditure.

Relief for losses. Losses may be carried forward six years to offset income derived in those years. However, for any year, the deduction with respect to the prior year losses may not exceed one-half of the taxable income for that year. Losses may not be carried back.

Groups of companies. A member of a group of companies (the surrendering company) may surrender current trading losses to another member of the group (the claimant company). The claimant company may then claim a deduction for the losses in calculating its taxable income. This deduction may not exceed half of the taxable income of the claimant company.

To qualify for group relief, the surrendering company and the claimant company must be tax resident in St. Lucia and must be members of the same group throughout the fiscal year for which group relief is claimed. Two companies are members of the same group if one is a 51% subsidiary of the other or both are 51% subsidiaries of a third company. In determining whether a company is a 51% subsidiary of another company, share capital is excluded if profits from sales of such shares would be trading receipts of the direct owner of the shares. Share capital is also excluded if it is owned directly or indirectly in a company not resident in St. Lucia. In addition, the parent company must be beneficially entitled to at least 51% of the profits available for distribution to shareholders of the subsidiary and to at least 51% of the subsidiary's assets available for distribution to shareholders of the subsidiary on a winding up.

Trading losses may not be surrendered to the extent that they include the following:

- The surrendering company's capital allowances
- Expenses payable to a group member that are claimed as deductions but are not included in the income of that group member for the same fiscal year

Group relief is available only if the claimant company has used its capital allowances and offset its loss carryforwards against its current profits. A claim for group relief must be made within two years after the end of the surrendering company's fiscal year, and the surrendering company must consent to the relief. Group relief is not available to IBCs, International Banks and other companies granted special tax concessions.

Consolidated group returns may not be filed with the tax authorities.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Value-added tax (VAT), on the supply of goods and services in St. Lucia and on goods imported into St. Lucia	
Standard rate	12.5
Supply of tourism accommodation services	7
Basic food items	0
Nature of tax	Rate (%)
Excise tax, on imports of vehicles; this tax is imposed in addition to the VAT	15 to 85
Import duty	5 to 45
National insurance contributions, on monthly insurable earnings up to XCD5,000; paid by	
Employer	5
Employee	5
Self-employed individual	10

E. Miscellaneous matters

Foreign-exchange controls. St. Lucia does not impose foreign-exchange controls.

Debt-to-equity rules. St. Lucia does not impose thin-capitalization rules.

Anti-avoidance legislation. Anti-avoidance provisions may be applied to transactions effected for the main purpose of avoidance or reduction of tax liability.

Economic substance. Under the Economic Substance Act, a St. Lucia entity must satisfy certain economic substance requirements for each year of income in which it derives income from a relevant sector. The following are the requirements:

- The company must be directed and managed in St. Lucia.
- The company must have an adequate number of qualified employees in St. Lucia.
- The company has adequate operating expenditure proportionate to the level of activity carried on in St. Lucia.
- The company has an adequate physical presence.
- The company conducts core income-generating activities.

The activities conducted by a company for which economic substance is required include the following:

- Banking business
- Insurance business
- Shipping
- International mutual funds business
- Financing and leasing
- Headquartering
- Activities of a company holding tangible assets
- Activities of a company holding intangible assets
- Activities of a pure equity holding company
- Distribution and service center business
- Carrying on of a combination of businesses or activities listed above

Examples of a core income-generating activity in the banking business sector include, but are not limited to, the following:

- Raising funds
- Managing risk, including credit, currency and interest risk
- Taking hedging positions

If an entity fails to comply with the prescribed economic substance requirements, the entity may no longer qualify for the tax exemption on income that has accrued from a source outside St. Lucia.

Also, see *International Business Companies* in Section B.

Global minimum tax. St. Lucia has joined the two-pillar plan to reform international taxation rules. Under Pillar 2, the inclusive framework members have agreed to introduce a global minimum corporate tax rate of 15%. Global Anti-Base Erosion (GloBE) rules provide for a coordinated system of taxation intended to ensure that multinational enterprises (MNEs) with global revenue exceeding EUR750 million pay a fair share of tax in each of the jurisdictions where they operate. They do so by imposing a top-up tax on profits arising in a jurisdiction whenever the effective tax rate, determined on a jurisdictional basis, is below the minimum rate. The GloBE rules are not mandatory but have been agreed as a “common approach.” This means that jurisdictions are not required to adopt the GloBE rules, but if they choose to do so, they agree to implement and administer them in a way that is consistent with the agreed outcomes set out under those rules. Even if they do not implement the rules, agreement on a common approach means that one jurisdiction accepts the application of the GloBE rules by another with respect to MNEs operating in its jurisdiction. If St. Lucia agrees to apply the GloBE rules from 2023, they must first be implemented into domestic law.

F. Treaty withholding tax rates

The following treaty withholding tax rates apply to income received in St. Lucia.

	Dividends %	Interest %	Royalties %
Caribbean Community and Common Market (a)	0	15	15
Switzerland (b)	– (c)	– (d)	0

- (a) This is the Caribbean Community and Common Market (CARICOM) double tax treaty. Income is taxed in the country of source only.
- (b) This is the 1954 treaty between the United Kingdom and Switzerland, which was extended by exchange of notes to St. Lucia under Article XXI.
- (c) The treaty does not contain a dividend article. Consequently, the normal Swiss withholding tax rate applies.
- (d) The treaty does not contain an interest article. Consequently, the normal Swiss withholding tax rate applies.

For payments from St. Lucia, the following treaty withholding tax rates apply (however, see the paragraph after the footnotes).

	Dividends %	Interest %	Royalties %
Caribbean Community and Common Market (a)	0	15	15
Switzerland (b)	0 (c)	15 (d)	0
Non-treaty jurisdictions	0	15	25

- (a) This is the CARICOM double tax treaty. Income is taxed in the country of source only.
- (b) This is the 1954 treaty between the United Kingdom and Switzerland, which was extended by exchange of notes to St. Lucia under Article XXI.
- (c) The treaty does not contain a dividend article. Consequently, the normal withholding tax rate applies.
- (d) The treaty does not contain an interest article. Consequently, the normal withholding tax rate applies.

Expenses paid to nonresidents in the production of foreign-source income are not subject to withholding tax in St. Lucia.

Corporate Income Tax Rate (%)	20
Capital Gains Tax Rate (%)	20
Branch Tax Rate (%)	20
Withholding Tax (%)	0
Net Operating Losses (Years)	
Carryback	3
Carryforward	Unlimited

B. Taxes on corporate income and gains

Corporate income tax. The taxation of Saint-Martin companies is based on a territorial principle. As a result, Saint-Martin companies carrying on a trade or business outside Saint-Martin are generally not taxed in Saint-Martin on the related profits and cannot take into account the related losses. However, under the Saint-Martin controlled foreign company (CFC) rules contained in Article 209 B of the Saint-Martin Tax Code, income earned by a Saint-Martin enterprise through a foreign enterprise may be taxed in Saint-Martin if such income is subject to an effective tax rate that is 50% lower than Saint-Martin's effective tax rate on similar income (for further details, see Section E).

Tax rates. The net profits earned by resident and nonresident entities, including branches of foreign entities, are taxed at a standard rate of 20%.

A reduced tax rate of 10% applies to the first EUR40,000 of the profits of small and medium-sized enterprises if certain conditions are met, including the following:

- The turnover of the company is less than EUR7,630,000.
- At least 75% of the shares is directly or indirectly held by private persons or by entities that meet the above condition.
- The capital is fully paid.

In addition, a 10% rate applies to the following:

- Royalties from the lease of property rights, such as patents, patentable inventions, brands and copyrights on artistic, intellectual or cinematographic works.
- Long-term capital gains on the transfer or assignment of patents, patentable inventions or improvement of patents and the granting of licenses to use the rights described in the above bullet.
- Interest derived from securities giving access to the company's capital. These securities include share purchase warrants (*obligations à bons de souscription d'actions*, or OBSAs), Oceane Bonds convertible into new or existing shares, bonds with redeemable share subscription warrants (*obligations à bons de souscription en actions remboursables*, or OBSARs) and certain other securities.

Tax incentives. Business enterprises engaged in, among other activities, hotel industry, transport industry, tourism and information technology services industries may apply for a tax holiday regime.

The mechanism of the tax assistance for these activities is a deduction for direct investments from taxable income. The mechanism allows a 50% tax allowance (that is, 50% of the investment is deductible). As a result, the company may not be taxable on its taxable income if the amount of total income is below 50% of the invested amount.

In addition, companies that subscribe to the capital of a company registered in Saint-Martin that invests in the industries listed above may benefit from this deduction.

In several cases, an approval procedure must be performed to benefit from the deduction.

The tax assistance for investment regime applies to investments realized before 31 December 2025.

Administration. In general, companies must file a tax return within three months following the end of their financial year.

Corporate income tax is prepaid in four installments. Companies with a financial year ending on 31 December must pay the installments on 15 March, 15 June, 15 September and 15 December. The balance of corporate tax is due by 15 May of the following year. Other companies must pay the balance of corporate tax due within four months following the end of their financial year.

In general, late payment and late filing are subject to a 10% penalty. If additional tax is payable as a result of a reassessment of tax, interest is charged at 0.4% per month (4.8% per year). Many exceptions and specific rules apply to interest and penalties.

Capital gains. Under the corporate income tax rules, in general, no distinction is made between the taxation of capital gains and the taxation of other income. In general, all income is taxed at the standard income tax rate of 20%.

Capital gains derived from the sale of qualifying participations are exempt from tax. Qualifying participations must satisfy both of the following conditions:

- They must be considered to be *titres de participation* (specific class of shares for accounting purposes that enables the

shareholder to have a controlling interest) or be eligible for the dividend participation exemption regime (see *Dividends received* in Section C).

- They must have been held for at least two years before their sale.

However, corporate income tax applies to 5% of the gross capital gains (that is, not reduced by any related costs) realized on qualifying participations. As a result, the effective tax rate on such gains is 1%.

Corporate income tax applies to 10% of the gross capital gains derived from the sale of industrial property rights if they have been held for at least two years before their sale.

Dividends paid. Saint-Martin does not levy withholding tax on dividend distributions.

Foreign tax relief. Saint-Martin domestic law grants a tax credit with respect to tax on foreign-source income that has already been taxed in its source country, even in the absence of a double tax treaty. The tax credit equals the amount of tax paid in the source country, up to the corresponding amount of tax due in Saint-Martin for this income.

C. Determination of trading income

General. The assessment is based on financial statements prepared according to French generally accepted accounting principles, subject to certain adjustments.

All expenses incurred with respect to conducting a business are, in principle, deductible.

Dividends received. To compute taxable profit, favorable tax treatment may apply to dividends received by companies established in Saint-Martin that qualify as parent companies and receive dividends from companies established in Saint-Martin or abroad.

To qualify for this favorable treatment, the following conditions must be met:

- The parent company must be liable for corporate income tax.
- The parent company must hold a minimum of 5% of the distributing company's capital (financial rights and voting rights) or the amount paid for the shareholding is at least EUR1 million.
- The shares are held by the parent company for at least one year.

If the above conditions are met, 95% of the dividends received from the subsidiary are exempt from corporate income tax for the parent company. The remaining 5% that is still taxable may not exceed expenses and costs that the parent company incurred during the tax year.

Inventories. Inventory is normally valued at the lower of cost or market value. Cost must be determined under a weighted average cost price method. A first-in, first-out (FIFO) basis is also generally acceptable, but a last-in, first-out (LIFO) basis is not permitted.

Reserves. In determining accounting profit, companies must book certain reserves, such as reserves for a decrease in the value of assets, risk of loss or expenses. These reserves are normally deductible for tax purposes. In addition, the law provides for the

deduction of special reserves, including reserves for foreign investments and price increases.

Capital allowances. In general, assets are depreciated using the straight-line method. However, specific assets are generally depreciated using the declining-balance method.

Depreciable assets composed of various parts with different characteristics must be depreciated on a separate basis. These assets must be split into the following:

- A principal component or structure
- Additional components

The depreciable amount of each asset must be spread out over its likely useful life for the company, which corresponds to the time period during which the company may expect to derive a profit from it. The depreciation method applied to each asset (straight-line method or accelerated method) must also be consistent with the pace at which the company expects to derive a profit from the asset.

Periodic assessment of the residual value of each component must be conducted to establish a (non-tax deductible) provision for impairment if needed.

For tax purposes, the depreciation of assets that have not been split into components and the depreciation of the asset's principal component that has been split into components can be spread out over the useful life commonly accepted in business practices. This rule does not apply to buildings acquired by real estate investment companies. The following are some of the acceptable straight-line rates.

Asset	Rate (%)
Commercial buildings	2 to 5
Office buildings	4
Furniture	10

Certain specified assets may be depreciated using accelerated depreciation methods. For example, hotel investments (movable or immovable) may be fully depreciated over a 12-month period.

Relief for tax losses. Tax operating losses can be carried forward for an unlimited number of years. They may also be carried back to offset profits in the preceding three years. If losses are carried back, a credit is granted rather than a refund. The credit may be used in the following five years and is refundable in the sixth year if it is not used.

Groups of companies. Related companies subject to corporate tax may elect to form a tax-consolidated group. Under the tax-consolidation regime, the parent company files a consolidated return, thereby allowing the offset of losses of one group entity against the profits of related companies. The parent company then pays tax based on the net taxable income of companies included in the consolidated group, after certain adjustments for intra-group provisions are made, such as the following:

- Intra-group asset or share transfers, as well as any subsequent depreciation related to these transfers, are neutralized.
- Waivers of debts and subsidies between members of the group are neutralized.

D. Other significant taxes

The following table summarizes other significant taxes.

Nature of tax	Rate (%)
Business activity tax (<i>taxe générale sur le chiffre d'affaire</i> , or TGCA); levied in principle on all sales of goods and services provided in exchange for payment within the territory of Saint-Martin by persons acting independently as producers, traders or persons supplying services	4
<i>Contribution des patentes</i> ; subject to certain exemptions that have a limited scope, the tax is payable each year by individuals and legal entities that regularly carry on a non-salaried business activity in Saint-Martin; a company may request a cap set at 3% of the value-added generated in the preceding year	
Companies in general; tax base is the cost of equipment and movable assets (such as furniture, vehicles and computers)	13
Companies exercising a noncommercial activity (such as persons in the medical sector, lawyers, accountants, auditors, architects, consulting engineers, software designers and surveyors); tax base is revenue	5

E. Miscellaneous matters

Foreign-exchange controls. Saint-Martin does not impose any specific foreign-exchange controls. The euro (EUR) is the official currency. The US dollar (USD) is used on a daily basis.

Payments to residents of tax havens or to uncooperative states or territories. Under Article 238 A of the Saint-Martin Tax Code, interest, royalties and other remuneration paid to a recipient established in a tax haven or on a bank account located in a tax haven are deemed to be fictitious and not at arm's length. As a result, to deduct the amount paid, the Saint-Martin entity must prove that the operation is effective (that it effectively compensates executed services) and is at arm's length.

For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in Saint-Martin in similar situations.

Controlled foreign companies. Under Section 209 B of the Saint-Martin Tax Code, if Saint-Martin companies subject to corporate income tax in Saint-Martin have a foreign branch or if they hold, directly or indirectly, an interest (shareholding, voting rights or share in the profits) of at least 50% in any type of structure benefiting from a privileged tax regime in its home country (the shareholding threshold is reduced to 5% if more than 50% of the foreign entity is held by Saint-Martin companies acting in concert or by entities controlled by the Saint-Martin company), the profits of this foreign entity or enterprise are subject to corporate income tax in Saint-Martin. Such foreign entity is known as a CFC. If the foreign profits have been realized by a legal entity, these profits are taxed as a deemed distribution in the hands of

the Saint-Martin company. If the profits have been realized by an enterprise (an establishment or a branch), these profits are taxed as profits of the Saint-Martin company.

For purposes of the above rules, a privileged tax regime is a regime under which the effective tax paid is 50% lower than the tax that would be paid in Saint-Martin in similar situations.

Tax paid by a CFC in its home country may be credited against Saint-Martin corporate income tax.

The CFC rules do not apply if the profits of the foreign entity are derived from an activity effectively performed in the country of establishment. However, this exception does not apply if either of the two following circumstances exists:

- More than 20% of the profits are derived from portfolio management activities (involving securities, shares and outstanding debts) and intangible rights management.
- The total profits derived from the items mentioned in the first bullet and from intercompany services represent more than 50% of the profits of the foreign entity.

In such circumstances, the Saint-Martin company may nevertheless try to establish that the principal effect from the use of the foreign entity is not the obtaining of an advantage from a privileged tax regime.

F. Tax treaties

A tax treaty between France and Saint-Martin entered into force in 2010. Saint-Martin has not signed any other tax treaty, and tax treaties signed by France do not apply in Saint-Martin.

Saint-Martin grants a tax credit with respect to tax on foreign-source income that has already been taxed in its source country, even in the absence of a double tax treaty. For details, see *Foreign tax relief* in Section B.

- The general tax rate of 25% applies to resident companies and nonresident companies with a permanent establishment (PE) in São Tomé and Príncipe. Income derived from oil activities is subject to a specific regime, which includes a tax rate of 30%. Companies exclusively engaged in the agricultural sector benefit from a 50% exemption regarding the respective taxable income.
- Nonresident companies without a PE in São Tomé and Príncipe are subject to a final withholding tax at a rate of 20% on certain types of income.
- Capital gains are taxed as business income.

B. Taxes on corporate income and gains

Corporate income tax. Corporate income tax (*Imposto sobre o Rendimento das Pessoas Colectivas*, or IRC) is levied on resident and nonresident entities.

Under São Tomé and Príncipe's General Tax Code, legal entities with a registered office and place of effective management in São Tomé and Príncipe are deemed to be resident for tax purposes.

Resident entities. Resident companies and other entities, including non-legal entities, whose principal activity is commercial, industrial or agricultural, are subject to IRC on worldwide profits, but a foreign tax credit may reduce the amount of IRC payable (see *Foreign tax relief*).

A 50% IRC exemption applies to entities exclusively engaged in agricultural activities.

Nonresident entities. Companies or other entities that operate in São Tomé and Príncipe through a PE are subject to IRC on their profits attributable to the PE. General administrative costs attributable to the PE may be deductible under certain conditions.

Income earned by companies or other entities without a PE in São Tomé and Príncipe are subject to IRC through a withholding tax mechanism.

A nonresident entity is deemed to have a PE in São Tomé and Príncipe if it has one of the following fixed places of business to carry out commercial, industrial, agricultural, forestry, livestock or fishing activities:

- A place of management
- A branch
- An office
- A factory
- A workshop
- A natural resources' extraction site

In addition, a building, installation or assembly yard qualifies for PE purposes if the activity is carried on for more than six months.

Installations, platforms and vessels rendering prospecting and exploration services with respect to natural resources may also attract a PE in São Tomé and Príncipe if the activity is carried out for more than six months.

Free-Zone Regime. São Tomé and Príncipe has implemented a Free-Zone Regime, which grants several tax incentives. Among other incentives, entities included in this regime are entitled to benefit from a tax exemption (covering all taxes for a period of 10 years), as well as exemptions on income of any kind paid to nonresidents. In addition, these entities are not subject to any foreign-exchange controls on their funds held in foreign currency.

Taxation groups. The following taxation groups are established in the IRC Code:

- Group 1, which includes resident entities with an annual turnover (expected for the current year or based on the previous year), equal to or greater than STN500,000 (approximately USD23,161), as well as public undertakings, public companies,

- partnerships limited by shares and PEs of nonresident entities, regardless of whether their annual turnover exceeds the threshold
- Group 2, which, as a secondary legal regime, includes all companies not included in Group 1 (Group 1 is mandatory for companies that have annual turnover equal to or greater to STN500,000 [approximately USD23,161]), as well as other taxable persons that carry out commercial, industrial or agricultural activities or that provide services, even if on an occasional or temporary basis

Tax rates. IRC is levied at the following rates:

Type of enterprise	Rate (%)
Companies or other entities with a head office or effective management control in São Tomé and Príncipe, whose principal activity is commercial, industrial or agricultural PEs	25*
Nonresident companies or other entities without a head office, effective management control or a PE in São Tomé and Príncipe; income is subject to withholding tax	20

* Companies exclusively engaged in the agricultural sector benefit from a 50% exemption regarding the respective taxable income.

Certain types of income are subject to withholding tax at a rate of 20% if it is obtained in São Tomé and Príncipe and if the beneficiary is subject to IRC.

A participation exemption mechanism (full or partial) applies to domestic dividends (see *Dividends*). Dividends received from abroad are subject to IRC, but a foreign tax relief mechanism can be applied (see *Foreign tax relief*).

Simplified regime of taxation. Micro and small-sized resident companies that have annual turnover of less than STN500,000 (approximately USD23,161) and meet certain other conditions may opt to be taxed under the simplified regime of taxation established for companies included in Group 2.

Companies in Group 2 may choose one of the following regimes:

- Simplified accounting records for computing taxable profit.
- Simplified taxation regime, based on presumed margins over the turnover (ranging from 20% to 30%), with a minimum amount of taxable income equal to 18 minimum monthly salaries, as per Article 58 (9) of the São Tomé Corporate Income Tax Code. Under Decree Law No. 24/2015 of 23 December 2015, the minimum monthly salary varies as a function of the number of employees and total turnover, ranging from STN800 to STN1,600 (approximately USD36 and USD72, respectively).

Capital gains. Capital gains are taxed in São Tomé and Príncipe as business income and subject to the general rate of IRC. Capital gains correspond to the positive difference between the sales proceeds, net of expenses incurred on the sale, and the acquisition value, as adjusted by depreciation, impairment relevant for tax purposes and an official index.

Fifty percent of the capital gains derived from disposals of certain qualifying assets held for more than one year may be exempt if

the corresponding sales proceeds are reinvested in tangible fixed assets during a four-year period, consisting of the year before the disposal, the year of the disposal and the two subsequent years after the disposal, and to the extent that such tangible fixed assets are not acquired from a related entity in secondhand condition. A statement of the intention to reinvest the sales proceeds must be included in the annual corporate income tax return in the year of disposal. The remaining 50% of the net gain derived from the disposal is subject to tax in the year of the disposal.

If only a portion of the proceeds is reinvested, the exemption is reduced proportionally. If no reinvestment is made by the end of the second year following the disposal, the net capital gain that remains untaxed (50%) is added to taxable profit for that year and compensatory interest is payable.

Administration. In general, the tax year is the calendar year. However, through a request to the tax authorities, nonresident entities with a PE may adopt a different tax year.

All companies engaged in activities in São Tomé and Príncipe must register with the tax department to obtain a taxpayer number.

Entities included in Group 1 and Group 2 (with the exception of those subject to the simplified taxation regime) must file an annual corporate income tax return, together with their financial statements and other documentation. For entities in Group 1, the deadline is 30 April of the year following the tax year. For entities included in Group 2, the deadline is 20 February of such year.

Entities subject to the simplified taxation regime are not required to submit an annual tax return.

All companies must make three advance payments of IRC in June, September and December of the tax year, each equal to 25% of the IRC paid in the preceding year. These payments may be credited against the final tax assessment for the tax year and any remaining amount due must be paid with the submission of the year-end tax return. Excessive advance payments are refunded to taxpayers.

Penalties are imposed for the failure to file tax returns and satisfy other compliance obligations. If, on the final assessment, the tax authorities determine that a further payment is required and that the taxpayer is at fault, interest is imposed on the amount of the additional payment. Fines, which are generally based on the amount of tax due, are also imposed. If the tax due is not paid, interest is imposed from the date of the tax authorities' notice that an additional payment is due.

Binding rulings. The General Tax Code grants the taxpayer the possibility of obtaining a binding ruling. The binding ruling is limited to a certain time period, which is determined on a case-by-case basis by the tax authorities.

Dividends. Dividends paid by companies to residents and non-residents are generally subject to withholding tax at a rate of 20%.

On distributions to resident parent companies, the 20% withholding tax is treated as a payment on account of the final IRC due.

Under a participation exemption mechanism, a resident company may deduct 100% of dividends received from another resident company if both of the following conditions are met:

- The recipient owns directly at least 20% of the capital.
- The recipient held the interest for an uninterrupted period of at least one year before the date of distribution of the dividends or will subsequently complete this holding period.

If the holding period or the minimum participation conditions are not met, the recipient may deduct 50% of the dividends received for purposes of computing taxable income.

Foreign tax relief. Foreign-source income is taxable in São Tomé and Príncipe. However, direct foreign tax may be credited against the local tax liability, limited to the lower of the following amounts:

- The amount of tax incurred in the foreign jurisdiction
- The amount of IRC attributable to the foreign-source income

C. Determination of trading income

General. Taxable profit is determined according to the following rules:

- For companies included in Group 1, the taxable profit is the net accounting profit computed in accordance with the generally accepted accounting principles, adjusted for positive and negative equity variations and adjusted or corrected by the provisions in the IRC Code. Positive or negative equity variations are considered capital gains or losses for tax purposes.
- For companies included in Group 2 subject to the regime of the simplified accounting records, the taxable profit is based on the specific accounting records required for this regime and equals the difference between the profits and costs (deemed necessary), pertaining to the tax year.
- For companies included in Group 2 subject to the simplified taxation regime, the taxable profit is computed by the application of different coefficients (depending on the activity of the company) to the turnover.

Expenses that are considered essential for the generation or maintenance of profits are deductible. However, certain expenses are not deductible for IRC purposes. These include, but are not limited to, the following:

- Illicit expenses, which are expenses not in compliance with local law
- Depreciation and amortization claimed that exceed the rates fixed in the tax law
- Provisions and impairments (except for those provided in the tax law)
- IRC and other income taxes, including payments on account and withholding tax
- Taxes and other costs of third parties that the company is not legally authorized to bear
- Penalties of any kind, including compensatory interest
- Confidential or improperly documented expenses
- Entertainment expenses to the extent that they exceed 2% of turnover

- Payments made to entities resident in tax havens, unless the company is able to justify the operation from an economic viewpoint (that is, the need for the costs incurred and the reasonability of the amounts of the costs)
- Compensation or indemnities paid for insurable risk events
- 50% of the expenses incurred by employees when traveling in their own vehicles at the service of the employer if these amounts are not charged to clients, excluding the amounts subject to personal income tax
- 50% of the expenses incurred with respect to a travel allowance (travel bonuses and compensation, which differ from the expenses mentioned in the preceding bullet), excluding amounts subject to personal income tax

Inventories. Inventories must be consistently valued by one of the following criteria:

- Effective cost of acquisition or production
- Standard costs in accordance with adequate technical and accounting principles
- Cost of sales less the normal profit margin, under certain conditions
- Other methods of valuation subject to prior authorization from the tax authorities

Changes in the method of valuation must be justifiable and acceptable to the tax authorities.

Provisions. The following provisions are deductible:

- Bad and doubtful debts, based on a judicial claim or on an analysis of the accounts receivable
- Inventory losses
- Litigation processes involving items that would represent costs of that year
- Technical provisions imposed on insurance companies and financial institutions by the regulatory authorities of São Tomé and Príncipe

Depreciation. In general, depreciation is calculated using the straight-line method.

Maximum depreciation rates are established by law. If rates that are less than 50% of the official rates are used, part of the depreciation costs will not be tax deductible in the future (that is, in the tax periods that go beyond the maximum period of useful life; this is determined by dividing 100 by the minimum official depreciation rate, which corresponds to half of the standard depreciation rate established by law).

The following depreciation or amortization costs are nondeductible:

- Depreciation or amortization of assets not subject to effective depreciation
- Depreciation of immovable property with respect to the component related to the value of the land or any other component not subject to effective depreciation
- Depreciation or amortization costs computed at rates greater than the maximum accepted rates
- Depreciation costs deriving from the use of rates of less than half of the maximum rates

- Depreciation of light passenger vehicles valued at more than STN200,000 (approximately USD9,265), leisure boats and airplanes (unless allocated for public transportation or to a leasing business)
