you build a faster, smarter and  
future-ready business

The better the question. The better the answer.  
The better the world works.

**EY**

Building a better  
working world

# ASpace

Create, consume and control your own AI solutions

ASpace is a unique enterprise Artificial Intelligence (AI) and automation platform that powers organizations to rapidly adopt AI – resulting in faster, smarter and future-ready businesses.

Built on advanced machine learning algorithms and AI models, ASpace can be hosted on-premise, providing a tailor-made suite of AI solutions designed for enterprise needs.

Backed by over 90+ AI practitioners and machine learning experts, ASpace enables end-to-end automation and also offers complete data privacy with on-premise installation.

While a lot has been said about AI, its potential to create winners or losers depends on whether your organization is an early adopter or a laggard in AI adoption. The biggest risk is non-adoption as every challenge in business is an opportunity for AI.

Few of the most significant challenges that continue to hold organizations back in their AI journey are:

Long AI solution development timelines

Data security and privacy concerns

Inability to scale from proof of concept to production

Difficulties in creating multiple point solutions

Inability to drive direct business consumption

# ASpace: Key features

Can be hosted on-premise

Ability to accelerate AI adoption with 30+ pre-built ready-to-deploy solutions

Built on a powerful suite of 100+ advanced machine learning algorithms and AI models

Deduces human emotions from various forms of communications

Demonstrates human-like decision making capabilities, seeking out relevant information quickly

## How ASpace works:

### Step 1: Create your own AI solutions

- ▶ ASpace provides enterprises with the flexibility to infuse bespoke AI algorithms and models into ASpace to build any custom AI solution
- ▶ Provides enterprises with various tools to customize and build solutions like code editor, label studio, doc studio, etc.

### Step 2: Consume advanced AI solutions

- ▶ Offers robust governance and control that reviews and publishes only validated solutions on the platform
- ▶ Enables organizations to readily deploy AI solutions built with a specific purpose across functions and industries

### Step 3: Control multiple AI solutions from a command center

- ▶ Accuracy is the heartbeat of every AI solution. The platform helps enterprises identify solutions where accuracy has reduced over a period and constantly upgrade them

**Ask for an ASpace demo today.  
You will see the difference.**

ASpace is helping organizations to minimize costs, manage compliances, enhance customer experience and more. Some instances are below:

Helped a global electronics company analyze customer product reviews and accurately classify them into improvement areas, thereby creating a new trusted channel for product improvements

Developed an automated ticket triaging system based on emails received from customers resulting in 93% effort reduction

Enabled a major global manufacturing company to achieve 100% audit compliance and prevent revenue leakage by identifying duplicate or fraudulent claims

Helped a large hospital chain achieve 12% cost reduction by identifying anomalies in material consumption and drugs

Automated conversations with 1,500+ vendors for a leading IT services company resulting in 72% effort reduction

## **Navigating the COVID-19 pandemic with ASpace, a trusted intelligence platform:**

Is helping hospitals offer risk assessments that allow patients to ask questions related to COVID-19 symptoms or book a consultation appointment as per their convenience

Is enabling organizations ensure employee well-being through regular risk assessments thereby plan resourcing effectively and ensure business continuity

Is enabling organizations to stay compliant to government guidelines by helping them monitor adherence to wearing masks or maintaining social distancing at workplaces

Is powering organizations to smoothly run highly secure remote working set-ups that by verifying face IDs of employees/personnel thereby preventing unauthorized access
