

A woman with long brown hair, wearing a white sweater with blue and red stripes, is standing in a server room. She is working at a computer monitor on a black metal cart. The server racks are dark grey and filled with equipment. The floor is light-colored with a grid pattern. The background is slightly blurred, showing more server racks and cables.

Is your biggest  
cyber risk the one  
you can't see coming?

EY Energy Cyber Smart Connect

## EY Energy Cyber Smart Connect

The EY Energy Cyber Smart Connect is an exclusive platform for senior leaders in the energy sector to be at the forefront of security issues.

This by-invitation event is an opportunity for senior energy leaders to glean insights from industry subject matter experts, network with fellow peers, foster exchange of perspectives among members on trending cybersecurity matters and keep pace with industry best practices.

The roundtable sessions are held virtually every quarter. Sessions are complimentary and Chatham House Rules apply. Comments made during the meetings will not be attributed to companies, shared outside the club or in any published materials.

This initiative is our commitment to building a better working world and supporting senior business leaders to seize opportunities in this new era of energy transition.

**The better the question.  
The better the answer.  
The better the world works.**

“

It is time for a new take on protecting the organization: ensuring day-to-day resilience as well as a proactive, pragmatic and strategic approach that considers risk and security from the onset.

**Eric Jost**

EY Asean Energy Leader;  
EY Asia-Pacific Power & Utilities Leader

Discussing the issues that matter

With the acceleration of energy transition, companies in the energy and resources sector are moving forward quickly with their digital transformation efforts to respond to evolving customer needs and create new revenues streams, while upgrading their infrastructure and creating operational efficiencies. This transformation requires a stronger integration between IT and Operational Technology (OT) systems, exposing new and hybrid systems to a wide range of cyber threats and increasing the attack surface.

Cybersecurity resilience needs to be incorporated into every aspect of the company to reduce the growing cyber risks that energy and resources companies face. At these quarterly sessions, guest speakers from the industry and EY leaders will discuss pressing cybersecurity issues high on the agenda of the energy community such as:

- ▶ Zero Trust implementation: challenges and pitfalls for a Chief Information Security Officer
- ▶ Vulnerable software supply chain: the SBOM conundrum
- ▶ Global cyber skills shortage: do more with less - how?
- ▶ Digital transformation: the need for speed and connectivity
- ▶ Anywhere work models: information governance gaps
- ▶ The visibility challenge: OT SOC monitoring

How do I join?

If you would like to join these invitation-only sessions, please contact:

**EY | Building a better working world**

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets.

Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients.
