Is technology your strategy or your starting point?

Discover how EY AgilityWorks can help you succeed in a rapidly changing world

The better the question. The better the answer.
The better the world works.

A woman with her hair tied back, wearing a black long-sleeved shirt and white boxing gloves, is in a boxing ring. She is looking intently at her opponent, who is wearing a black boxing glove. The background is blurred, showing the ropes of the ring and some spectators.

In a world where what works today won't necessarily work tomorrow, businesses need to be agile to stay ahead. EY AgilityWorks helps you to unlock the power of SAP technology to cut complexity and foster innovation.

EY AgilityWorks and SAP

In 2019, EY acquired AgilityWorks, a leading technology consultancy business, particularly in the deployment of HANA based SAP technology.

Today, the EY AgilityWorks team comes together to shape and deliver digital business transformations with the latest generation of SAP technology.

What EY AgilityWorks can do for you

We help businesses to cut complexity, foster innovation and transform

In this disruptive age, businesses need to be agile to stay ahead. EY AgilityWorks helps you achieve that agility by realising the full benefits of SAP S/4HANA and its associated platforms.

Should you be treating S/4HANA as a business transformation opportunity – or as an upgrade of an existing enterprise resource planning (ERP) system? How can you work through the adoption process logically, securely and effectively? And should SAP S/4HANA be deployed on premise, in the cloud or as a hybrid solution?

We work with you to answer these questions and determine the best S/4HANA transition approach for your business. We help you align technology and strategy, then plan and navigate each stage of the adoption process.

Whether it's a new implementation, a system conversion or landscape transformation, we'll help you devise the most cost-effective and innovative way forward.

EY AgilityWorks has a proven track record of helping clients to:

- ▶ Deliver a digital platform to drive sustainable business transformation using SAP's Intelligent Enterprise concepts
- ▶ Create an infrastructure from which to start exploiting technologies such as robotics, artificial intelligence (AI) and the Internet of Things
- ▶ Achieve rapid and incremental outcomes using the latest methods and agile approaches
- ▶ Use industry-leading tools and assets to accelerate and de-risk delivery
- ▶ Simplify business operations through the adoption of standard SAP capabilities
- ▶ Bring IT systems up to date and remove the legacy of complexity
- ▶ Deliver on-demand real-time data insights and analysis
- ▶ Improve customer experience

Our solutions include:

Agile Business Finance is designed to help Chief Financial Officers (CFOs) and their teams to better realise the benefits of advanced technologies that include robotics, in-memory and cloud-based computing, real-time data analytics and AI. It can help CFOs reduce the costs of finance, speed up financial systems, align people capabilities and make them better equipped to anticipate financial risks on the basis of SAP S/4HANA.

Agile Business Transformation enabled by SAP technology can help organisations address challenges in the digital era. Our collaborative approach focuses on more than technology alone. We take a comprehensive, business-first view to address strategy, customer value, user experiences, processes, technology and operational impacts in tandem.

Agile Business Customer is enabled by SAP Hybris Marketing and the Customer Experience Suite. It aims to bring the customer's vision of how business should be done closer to reality. This is achieved through significant changes to customer applications and a purpose-led approach to transformation.

Agile Business Supply Chain is an enabler of more efficient supply chain execution. Digitisation of the supply chain has led to transformations in manufacturing, platforms and networks. EY Agile Supply Chain reinvents the supply chain to simplify the sales-to-cash process.

Agile Business People combines our leading advisory capability with proven SAP SuccessFactors implementation methodology.

Agile Business Risk focuses on digital risk, controls and security proposition. We are experienced in 3 Lines of Defence (LoD) models, developing fit for purpose security postures, designing highly automated and intelligent controls. We have helped our clients achieve speedier and smarter compliance with UK SOX whilst also strengthening the quality of their controls environment.

Agile Business Tax combines our global capabilities and experience to deliver technology-enabled tax transformation programmes. We work with our clients to address the tax implications of digital and business transformations. We can also implement transformations of the tax function itself – across processes, technology and people. Our approach looks at reducing tax risk and increasing process efficiency by leveraging tax technology solutions across core SAP, the SAP Global Tax Management suite and advanced technologies.

Application Managed Services (AMS) provides comprehensive post project support for all applications and ongoing engagements. We provide a flexible approach to AMS which is scalable and evolves with the needs of our client's businesses.

Get in touch to find out more about how we can help your organisation to cut complexity, foster innovation and realise the full benefits of SAP S/4HANA.
