EY’s US oil and gas perception survey found industry executives have a much more positive view of the impact of tax reform compared to American consumers.

If tax reform occurs, consumers believe taxes on oil and gas companies should be:

- Higher: 33%
- Same: 31%
- Lower: 21%
- Not sure: 15%

The oil and gas industry should pay the same amount of taxes as other industries:

- 55% Consumers agree
- 88% Executives agree

EY research is based on a poll of 1,200 US consumers and 109 oil and gas executives. See full survey for more details.
