

Do you know the opportunities and risks associated with the electrification of your vehicle fleet?

The fleet electrification process consists of the transformation of internal combustion vehicles to electrical equipment whose impact on direct emissions is consistent with the companies' decarbonization plan.

At EY we advise and work with you using a methodology that measures the impact of updating the fleet, using state-of-the-art technology and guiding you in the execution of renewal plans according to your needs.

Key questions

- ▶ What is the real impact of electromobility on the productivity, performance, costs and benefits of my organization?
- ▶ What is the best electromobility strategy for my company?
- ▶ Do I have the technical and economic capacities to update my fleet?
- ▶ Is the market ready to meet my fleet electrification needs?
- ▶ What do I need to comply with the associated legal regulations?

Building a better
working world

Electromobility Opportunity and Risk Management

Our approach

Our approach to electromobility risk management considers the dimensioning of the organization's current capacity in technical and strategic terms, mapping out and identifying the critical path towards effective electrification in the medium and long term.

We directly involve OEMs and Stakeholders in a collaborative environment generating innovation and development. We establish a roadmap with concrete action plans, where the level of

technological maturity, team performance and human development are priority aspects of an effective implementation and maintenance.

Methodology

We support our clients with world class methodologies to:

- 1 Understand and quantify the current situation of the organization and the market for the different types of equipment.
- 2 Develop a matrix of risks and opportunities associated with electrification, addressing parameters linked to people management, innovation, regulation, infrastructure and logistics.
- 3 Generate action plans for the risks and opportunities evaluated, with detailed actions, activities, responsible parties, deadlines and effectiveness verification method.
- 4 Continuous support and leadership in the execution of action plans and electromobility projects.

Main benefits

Have the best strategy and electromobility implementation plan for your company

Improved productivity and costs

Reduction in impact on direct emissions of polluting gases

Management of the electric fleet in accordance with the organization requirements and technological maturity of the market

Methodology for the acquisition and contract of electro mobile equipment

Positioning as a sustainable company

EY | Building a better working world

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets.

Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services

to clients. Information about how EY collects and uses personal data and a description of the rights individuals have under data protection legislation are available via ey.com/privacy. EY member firms do not practice law where prohibited by local laws. For more information about our organization, please visit ey.com.
